Under the Family Educational Rights and Privacy Act ("FERPA"; 20 U.S.C. 1232g) and implementing regulations (34 CFR part 99) and the confidentiality requirements of part B, officials of teacher organizations may not attend IEP meetings if personally identifiable information from the student's education records is discussed—except with the prior written consent of the parents. (See 34 CFR §§ 99.30(a)(1) and 300.571(a)(1).)

In addition, part B does not provide for the participation of representatives of teacher organizations at IEP meetings. The legislative history of the Act makes it clear that attendance at IEP meetings should be limited to those who have an intense interest in the child. (121 Cong. Rec. S10974 (June 18, 1975) (remarks of Sen. Randolph).) Since a representative of a teacher organization would be concerned with the interests of the teacher rather than the interests of the child, it would be inappropriate for such an official to attend an IEP meeting.

21. When may a child with a disability attend an IEP meeting?

Generally, a child with a disability should attend the IEP meeting whenever the parent decides that it is appropriate for the child to do so. Whenever possible, the agency and parents should discuss the appropriateness of the child's participation before a decision is made, in order to help the parents determine whether or not the child's attendance will be (1) helpful in developing the IEP and/or (2) directly beneficial to the child. The agency should inform the parents before each IEP meeting—as part of the notice of meeting required under § 300.345(b)—that they may invite their child to participate.

Note: The parents and agency should encourage older children with disabilities (particularly those at the secondary school level) to participate in their IEP meetings.

22. Do the parents of a student with a disability retain the right to attend the IEP meeting when the student reaches the age of majority?

The Act is silent concerning any modification of the rights of the parents of a student with a disability when the student reaches the age of majority.

23. Must related services personnel attend IEP meetings?

No. It is not required that they attend. However, if a child with a disability has an identified need for related services, it would be appropriate for the related services personnel to attend the meeting or otherwise be involved in developing the IEP. For example, when the child's evaluation indicates the need for a specific related service (e.g., physical therapy, occupational therapy, or counseling), the agency should ensure that a qualified provider of that service either (1) attends the IEP meeting, or (2) provides a written recommendation concerning the nature, frequency, and amount of service to be provided to the child.

Note: This written recommendation could be a part of the evaluation report.

24. Are agencies required to use a case manager in the development of the IEP of a child with a disability?

No. However, some agencies have found it helpful to have a special educator or some other school staff member (e.g., a social worker, counselor, or psychologist) serve as coordinator or case manager of the IEP process for an individual child or for all children with disabilities served by the agency. Examples of the kinds of activities that case managers might carry out are (1) coordinating the multidisciplinary evaluation; (2) collecting and synthesizing the evaluation reports and other relevant information about a child that might be needed at the IEP meeting; (3) communicating with the parents; and (4) participating in, or conducting, the IEP meeting itself.

25. For a child with a suspected speech impairment, who must represent the evaluation team at the IEP meeting?

No specific person must represent the evaluation team. However, a speech-language pathologist would normally be the most appropriate representative. For many children whose primary disability is a speech impairment, there may be no other evaluation personnel involved. The note following § 300.532 (Evaluation procedures) states:

Children who have a speech impairment as their primary disability may not need a complete battery of assessments (e.g., psychological, physical, or adaptive behavior). However, a qualified speech-language pathologist would (1) evaluate each child with a speech impairment using procedures that are appropriate for the diagnosis and appraisal of speech and language impairments, and (2) if necessary, make referrals for additional assessments needed to make an appropriate placement decision.

26. What is the role of the parents at an IEP meeting? The parents of a child with a disability are expected to be equal participants along with school personnel, in developing, reviewing, and revising the child's IEP. This is an active role in which the parents (1) participate in the discussion about the child's need for special education and related services, and (2) join with the other participants in deciding what services the agency will provide to the child.

Note: In some instances, parents might elect to bring another participant to the meeting, e.g., a friend or neighbor, someone outside of the agency who is familiar with applicable laws and with the child's needs, or a specialist who conducted an independent evaluation of the child.)

27. What is the role of a surrogate parent at an IEP meeting?

A surrogate parent is a person appointed to represent the interests of a child with a disability in the educational decision-making process when that child has no other parent representation. The surrogate has all of the rights and responsibilities of a parent under Part B. Thus, the surrogate parent is entitled to (1) participate in the child's IEP meeting, (2) see the child's education records, and (3) receive notice, grant consent, and invoke due process to resolve differences. (See § 300.514, Surrogate parents.)

28. Must the public agency let the parents know who will be at the IEP meeting?

Yes. In notifying parents about the meeting, the agency "must indicate the purpose, time, and location of the meeting, and *who will be in attendance.*" (§ 300.345(b), emphasis added.) If possible, the agency should give the name and position of each person who will attend. In addition, the agency should inform the parents of their right to bring other participants to the meeting. (See Question 21, above, regarding participation of the child.) It is also appropriate for the agency to ask whether the parents intend to bring a participant to the meeting.

29. Are parents required to sign IEPs?

Parent signatures are not required by either the Act or regulations. However, having such signatures is considered by parents, advocates, and public agency personnel to be useful.

The following are some of the ways that IEPs signed by parents and/or agency personnel might be used:

a. A signed IEP is one way to document who attended the meeting.

Note: This is useful for monitoring and compliance purposes.

If signatures are not used, the agency must document attendance in some other way.

b. An IEP signed by the parents is one way to indicate that the parents approved the child's special education program.

Note: If, after signing, the parents feel that a change is needed in the IEP, it would be appropriate for them to request another meeting. See Question 11, above.

c. An IEP signed by an agency representative provides the parents a signed record of the services that the agency has agreed to provide.

Note: Even if the school personnel do not sign, the agency still must provide, or ensure the provision of, the services called for in the IEP.

30. If the parent signs the IEP, does the signature indicate consent for initial placement?

The parent's signature on the IEP would satisfy the consent requirement concerning initial placement of the child (§ 300.504(b)(1)(ii)) only if the IEP includes a statement on initial placement that meets the definition of consent in § 300.500:

Consent means that: (a) the parent has been fully informed of all information relevant to the activity for which consent is sought * * *

(b) The parent understands and agrees in writing to the carrying out of the activity for which his or her consent is sought, and the consent describes that activity and lists the records (if any) that will be released and to whom; and

(c) The parent understands that the granting of consent is voluntary * * * and may be revoked at any time.

31. Do parents have the right to a copy of their child's IEP?

Yes. Section 300.345(f) states that the public agency shall give the parent, on request, a copy of the IEP. In order that parents may know about this provision, it is recommended that they be informed about it at the IEP meeting and/or receive a copy of the IEP itself within a reasonable time following the meeting.

32. Must parents be informed at the IEP meeting of their right to appeal?

If the agency has already informed the parents of their right to appeal, as it is required to do under the prior notice provisions of the regulations (§§ 300.504–300.505), it would not be necessary for the agency to do so again at the IEP meeting.

Section 300.504(a) of the regulations states that "written notice that meets the requirements under § 300.505 must be given to parents a reasonable time" before the public agency proposes or refuses "to initiate or change the identification, evaluation, or educational placement of the child or the provision of FAPE to the child."

Section 300.505(a) states that the notice must include "(1) A full explanation of all of the procedural safeguards available to the parents under § 300.500, §§ 300.502–300.515, and §§ 300.562–300.569."

The IEP meeting serves as a communication vehicle between parents and school personnel, and enables them, as equal participants, to jointly decide upon what the child's needs are, what will be provided, and what the anticipated outcomes may be. If, during the IEP meeting, parents and school staff are unable to reach agreement, the agency should remind the parents that they may seek to resolve their differences through the due process procedures under the Act.

Note: Section 300.506(a) states that "a parent or public educational agency may initiate a hearing on any matters described in § 300.504(a) (1) and (2)."

Every effort should be made to resolve differences between parents and school staff without resort to a due process hearing (i.e., through voluntary mediation or some other informal step). However, mediation or other informal procedures may not be used to deny or delay a parent's right to a due process hearing. (See § 300.506, Impartial due process hearing.)

33. Does the IEP include ways for parents to check the progress of their children?

In general, the answer is yes. The IEP document is a written record of decisions jointly made by parents and school personnel at the IEP meeting regarding the special education program of a child with a disability. That record includes agreed upon items, such as goals and objectives, and the specific special education and related services to be provided to the child.

The goals and objectives in the IEP should be helpful to both parents and school personnel, in a general way, in checking on a child's progress in the special education program. (See Questions 37–43, below, regarding goals and objectives in the IEP.) However, since the IEP is not intended to include the specifics about a child's total educational program that are found in daily, weekly, or monthly instructional plans, parents will often need to obtain more specific, on-going information about the child's progress—through parent-teacher conferences, report cards and other reporting procedures ordinarily used by the agency.

34. Must IEPs include specific checkpoint intervals for parents to confer with teachers and to revise or update their children's IEPs?

No. The IEP of a child with a disability is not required to include specific "checkpoint intervals" (i.e., meeting dates) for reviewing the child's progress. However, in individual situations, specific meeting dates could be designated in the IEP, if the parents and school personnel believe that it would be helpful to do so.

Although meeting dates are not required to be set out in the IEP itself, there are specific provisions in the regulations and in this document regarding agency responsibilities in initiating IEP meetings, including the following:

(1) Public agencies must hold meetings periodically, but not less than annually, to review, and if appropriate, revise, each child's IEP (§ 300.343(d)); (2) there should be as many meetings a year as the child needs (see Question 10, above); and (3) agencies should grant any reasonable parental request for an IEP meeting (see Question 11, above).

In addition to the above provisions, it is expected that, through an agency's general reporting procedures for all children in school, there will be specific designated times for parents to review their children's progress (e.g., through periodic parent-teacher conferences, and/or the use of report cards, letters, or other reporting devices).

35. If the parents and agency are unable to reach agreement at an IEP meeting, what steps should be followed until agreement is reached?

As a general rule, the agency and parents would agree to an interim course of action for serving the child (i.e., in terms of placement and/or services) to be followed until the area of disagreement over the IEP is resolved. The manner in which this interim measure is developed and agreed to by both parties is left to the discretion of the individual State or local agency. However, if the parents and agency cannot agree on an interim measure, the child's last agreed upon IEP would remain in effect in the areas of disagreement until the disagreement is resolved. The following may be helpful to agencies if there are disagreements:

a. There may be instances where the parents and agency are in agreement about the basic IEP services (e.g., the child's placement and/or the special education services), but disagree about the provision of a particular related service (i.e., whether the service is needed and/or the amount to be provided). In such cases, it is recommended (1) that the IEP be implemented in all areas where there is agreement, (2) that the document indicate the points of disagreement, and (3) that procedures be initiated to resolve the disagreement.

b. Sometimes the disagreement is with the placement or kind of special education to be provided (e.g., one party proposes a self-contained placement, and the other proposes resource room services). In such cases, the agency might, for example, carry out any one or all of the following steps:

(1) Remind the parents that they may resolve their differences through the due process procedures under part B; (2) work with the parents to develop an interim course of action (in terms of placement and/or services) that both parties can agree to until resolution is reached; and (3) recommend the use of mediation, or some other informal procedure for resolving the differences without going to a due process hearing. (See Question 32, above, regarding the right to appeal.)

c. If, because of the disagreement over the IEP, a hearing is initiated by either the parents or agency, the agency may not change the child's placement unless the parents and agency agree otherwise. (See § 300.513, Child's status during proceedings.) The following two examples are related to this requirement:

(1) A child in the regular fourth grade has been evaluated and found to be eligible for special education. The agency and parents agree that the child has a specific learning disability. However, one party proposes placement in a self-contained program, and the other proposes placement in a resource room. Agreement cannot be reached, and a due process hearing is initiated. Unless the parents and agency agree otherwise, the child would remain in the regular fourth grade until the issue is resolved.

On the other hand, since the child's need for special education is not in question, both parties might agree—as an interim measure—(1) to temporarily place the child in either one of the programs proposed at the meeting (self-contained program or resource room), or (2) to serve the child through some other temporary arrangement.

(2) A child with a disability is currently receiving special education under an existing IEP. A due process hearing has been initiated regarding an alternative special education placement for the child. Unless the parents and agency agree otherwise, the child would remain in the current placement. In this situation, the child's IEP could be revised, as necessary, and implemented in all of the areas agreed to by the parents and agency, while the area of disagreement (i.e., the child's placement) is being settled through due process.

Note: If the due process hearing concerns whether or not a particular service should continue to be provided under the IEP (e.g., physical therapy), that service would continue to be provided to the child under the IEP that was in effect at the time the hearing was initiated, (1) unless the parents and agency agree to a change in the services, or (2) until the issue is resolved.

36. What should be included in the statement of the child's present levels of educational performance?

The statement of present levels of educational performance will be different for each child with a disability. Thus, determinations about the content of the statement for an individual child are matters that are left to the discretion of participants in the IEP meetings. However, the following are some points that should be taken into account in writing this part of the IEP:

a. The statement should accurately describe the effect of the child's disability on the child's performance in any area of education that is affected, including (1) academic areas (reading, math, communication, etc.), and (2) non-academic areas (daily life activities, mobility, etc.).

Note: Labels such as mental retardation or deafness may not be used as a substitute for the description of present levels of educational performance.

b. The statement should be written in objective measurable terms, to the extent possible. Data from the child's evaluation would be a good source of such information. Test scores that are pertinent to the child's diagnosis might be included, if appropriate. However, the scores should be (1) self-explanatory (i.e., they can be interpreted by all participants without the use of test manuals or other aids), or (2) an explanation should be included. Whatever test results are used should reflect the impact of the disability on the child's performance. Thus, raw scores would not usually be sufficient.

c. There should be a direct relationship between the present levels of educational performance and the other components of the IEP. Thus, if the statement describes a problem with the child's reading level and points to a deficiency in a specific reading skill, this problem should be addressed under both (1) goals and objectives, and (2) specific special education and related services to be provided to the child.

37. Why are goals and objectives required in the IEP?

The statutory requirements for including annual goals and short term instructional objectives (Section 602(a)(20)(B)), and for having at least an annual review of the IEP of a child with a disability (Section 614(a)(5)) provide a mechanism for determining (1) whether the anticipated outcomes for the child are being met (i.e., whether the child is progressing in the special education program) and (2) whether the placement and services are appropriate to the child's special learning needs. In effect, these requirements provide a way for the child's teacher(s) and parents to be able to track the child's progress in special education. However, the goals and objectives in the IEP are not intended to be as specific as the goals and objectives that are normally found in daily, weekly, or monthly instructional plans.

38. What are annual goals in an IEP?

The annual goals in the IEP are statements that describe what a child with a disability can reasonably be expected to accomplish within a twelve month period in the child's special education program. As indicated under Question 36, above, there should be a direct relationship between the annual goals and the present levels of educational performance.

39. What are short term instructional objectives in an IEP?

Short term instructional objectives (also called IEP objectives) are measurable, intermediate steps between the present levels of educational performance of a child with a disability and the annual goals that are established for the child. The objectives are developed based on a logical breakdown of the major components of the annual goals, and can serve as milestones for measuring progress toward meeting the goals.

In some respects, IEP objectives are similar to objectives used in daily classroom instructional plans. For example, both kinds of objectives are used (1) to describe what a given child is expected to accomplish in a particular area within some specified time period, and (2) to determine the extent that the child is progressing toward those accomplishments.

In other respects, objectives in IEPs are different from those used in instructional plans, primarily in the amount of detail they provide. IEP objectives provide general benchmarks for determining progress toward meeting the annual goals. These objectives should be projected to be accomplished over an extended period of time (e.g., an entire school quarter or semester). On the other hand, the objectives in classroom instructional plans deal with more specific outcomes that are to be accomplished on a daily, weekly, or monthly basis. Classroom instructional plans generally include details not required in an IEP, such as the specific methods, activities, and materials (e.g., use of flash cards) that will be used in accomplishing the objectives.

40. Should the IEP goals and objectives focus only on special education and related services, or should they relate to the total education of the child?

IEP goals and objectives are concerned primarily with meeting the needs of a child with a disability for special education and related services, and are not required to cover other areas of the child's education. Stated another way, the goals and objectives in the IEP should focus on offsetting or reducing the problems resulting from the child's disability that interfere with learning and educational performance in school. For example, if a child with a learning disability is functioning several grades below the child's indicated ability in reading and has a specific problem with word recognition, the IEP goals and objectives would be directed toward (1) closing the gap between the child's indicated ability and current level of functioning, and (2) helping the child increase the ability to use word attack skills effectively (or to find some other approach to increase independence in reading).

For a child with a mild speech impairment, the IEP objectives would focus on improving the child's communication skills, by either (1) correcting the impairment, or (2) minimizing its effect on the child's ability to communicate. On the other hand, the goals and objectives for a child with severe mental retardation would be more comprehensive and cover more of the child's school program than if the child has only a mild disability.

41. Should there be a relationship between the goals and objectives in the IEP and those that are in instructional plans of special education personnel?

Yes. There should be a direct relationship between the IEP goals and objectives for a given child with a disability and the goals and objectives that are in the special education instructional plans for the child. However, the IEP is not intended to be detailed enough to be used as an instructional plan. The IEP, through its goals and objectives, (1) sets the general direction to be taken by those who will implement the IEP, and (2) serves as the basis for developing a detailed instructional plan for the child.

Note: See Question 56, below, regarding the length of IEPs.

42. When must IEP objectives be written—before placement or after placement?

IEP objectives must be written before placement. Once a child with a disability is placed in a special education program, the teacher might develop lesson plans or more detailed objectives based on the IEP; however, such plans and objectives are not required to be a part of the IEP itself.

43. Can short term instructional objectives be changed without initiating another IEP meeting?

No. Section 300.343(a) provides that the agency "is responsible for initiating and conducting meetings for the purpose of developing, reviewing, and *revising* the IEP of a child with a disability" (emphasis added). Since a change in short term instructional objectives constitutes a revision of the child's IEP, the agency must (1) notify the parents of the proposed change (see § 300.504(a)(1)), and (2) initiate an IEP meeting. Note, however, that if the parents are unable or unwilling to attend such a meeting, their participation in the revision of the IEP objectives can be obtained through other means, including individual or conference telephone calls (see § 300.345(c)).

44. Must the IEP include all special education and related services needed by the child or only those available from the public agency?

Each public agency must provide FAPE to all children with disabilities under its jurisdiction. Therefore, the IEP for a child with a disability must include all of the specific special education and related services needed by the child—as determined by the child's current evaluation. This means that the services must be listed in the IEP even if they are not directly available from the local agency, and must be provided by the agency through contract or other arrangements.

45. Is the IEP a commitment to provide services—i.e., must a public agency provide all of the services listed in the IEP?

Yes. The IEP of each child with a disability must include all services necessary to meet the child's identified special education and related services needs; and all services in the IEP must be provided in order for the agency to be in compliance with the Act.

46. Must the public agency itself directly provide the services set out in the IEP?

The public agency responsible for the education of a child with a disability could provide IEP services to the child (1) directly, through the agency's own staff resources, or (2) indirectly, by contracting with another public or private agency, or through other arrangements. In providing the services, the agency may use whatever State, local, Federal, and private sources of support are available for those purposes (see § 300.301(a)). However, the services must be at no cost to the parents, and responsibility for ensuring that the IEP services are provided remains with the public agency.

47. Does the IEP include only special education and related services or does it describe the total education of the child?

The IEP is required to include only those matters concerning the provision of special education and related services and the extent that the child can participate in regular education programs.

(**Note:** The regulations define special education as specially designed instruction to meet the unique needs of a child with a

disability, and related services as those services that are necessary to assist the child to benefit from special education.) (See §§ 300.17 and 300.16, respectively.)

For some children with disabilities, the IEP will only address a very limited part of their education (e.g., for a child with a speech impairment, the IEP would generally be limited to the child's speech impairment). For other children (e.g., those with profound mental retardation), the IEP might cover their total education. An IEP for a child with a physical disability with no mental or emotional disability might consist only of specially designed physical education. However, if the child also has a mental or emotional disability, the IEP might cover most of the child's education.

Note: The IEP is not intended to be detailed enough to be used as an instructional plan. See Question 41, above.

48. If modifications are necessary for a child with a disability to participate in a regular education program, must they be included in the IEP?

Yes. If modifications (supplementary aids and services) to the regular education program are necessary to ensure the child's participation in that program, those modifications must be described in the child's IEP (e.g., for a child with a hearing impairment, special seating arrangements or the provision of assignments in writing). This applies to any regular education program in which the student may participate, including physical education, art, music, and vocational education.

49. When must physical education (PE) be described or referred to in the IEP?

Section 300.307(a) provides that physical education services, specially designed if necessary, must be made available to every child with a disability receiving FAPE. The following paragraphs (1) set out some of the different PE program arrangements for students with disabilities, and (2) indicate whether, and to what extent, PE must be described or referred to in an IEP:

a. Regular PE with nondisabled students. If a student with a disability can participate fully in the regular PE program without any special modifications to compensate for the student's disability, it would not be necessary to describe or refer to PE in the IEP. On the other hand, if some modifications to the regular PE program are necessary for the student to be able to participate in that program, those modifications must be described in the IEP.

b. Specially designed PE. If a student with a disability needs a specially designed PE program, that program must be addressed in all applicable areas of the IEP (e.g., present levels of educational performance, goals and objectives, and services to be provided). However, these statements would not have to be presented in any more detail than the other special education services included in the student's IEP.

c. PE in separate facilities. If a student with a disability is educated in a separate facility, the PE program for that student must be described or referred to in the IEP. However, the kind and amount of information to be included in the IEP would depend on the physical-motor needs of the student and the type of PE program that is to be provided.

Thus, if a student is in a separate facility that has a standard PE program (e.g., a residential school for students with deafness), and if it is determined—on the basis of the student's most recent evaluation—that the student is able to participate in that program without any modifications, then the IEP need only note such participation. On the other hand, if special modifications to the PE program are needed for the student to participate, those modifications must be described in the IEP. Moreover, if the student needs an individually designed PE program, that program must be addressed under all applicable parts of the IEP. (See paragraph "b", above.)

50. If a student with a disability is to receive vocational education, must it be described or referred to in the student's IEP?

The answer depends on the kind of vocational education program to be provided. If a student with a disability is able to participate in the regular vocational education program without any modifications to compensate for the student's disability, it would not be necessary to include vocational education in the student's IEP. On the other hand, if modifications to the regular vocational education program are necessary in order for the student to participate in that program, those modifications must be included in the IEP. Moreover, if the student needs a specially designed vocational education program, then vocational education must be described in all applicable areas of the student's IEP (e.g., present levels of educational performance, goals and objectives, and specific services to be provided). However, these statements would not have to be presented in any more detail than the other special education services included in the IEP.

51. Must the IEP specify the amount of services or may it simply list the services to be provided?

The amount of services to be provided must be stated in the IEP, so that the level of the agency's commitment of resources will be clear to parents and other IEP team members. The amount of time to be committed to each of the various services to be provided must be (1) appropriate to that specific service, and (2) stated in the IEP in a manner that is clear to all who are involved in both the development and implementation of the IEP.

Changes in the amount of services listed in the IEP cannot be made without holding another IEP meeting. However, as long as there is no change in the overall amount, some adjustments in scheduling the services should be possible (based on the professional judgment of the service provider) without holding another IEP meeting.

Note: The parents should be notified whenever this occurs.

52. Must the IEP of a child with a disability indicate the extent that the child will be educated in the regular educational program?

Yes. Section 300.346(c) provides that the IEP for each child with a disability must include a "statement of * * * the extent that the child will be able to participate in regular educational programs." One way of meeting this requirement is to indicate the percent of time the child will be spending in the regular education program with nondisabled students. Another way is to list the specific regular education classes the child will be attending.

Note: If a child with a severe disability, for example, is expected to be in a special classroom setting most of the time, it is recommended that, in meeting the above requirement, the IEP include any non-curricular activities in which the child will be participating with nondisabled students (e.g., lunch, assembly periods, club activities, and other special events).

53. Can the anticipated duration of services be for more than twelve months?

In general, the anticipated duration of services would be up to twelve months. There is a direct relationship between the anticipated duration of services and the other parts of the IEP (e.g., annual goals and short term instructional objectives), and each part of the IEP would be addressed whenever there is a review of the child's program. If it is anticipated that the child will need a particular service for more than one year, the duration of that service could be projected beyond that time in the IEP. However, the duration of each service must be reconsidered whenever the IEP is reviewed.

54. Must the evaluation procedures and schedules be included as a separate item in the IEP?

No. The evaluation procedures and schedules need not be included as a separate item in the IEP, but they must be presented in a recognizable form and be clearly linked to the short term instructional objectives.

Note: In many instances, these components are incorporated directly into the objectives.

Other Questions About the Content of an IEP

55. Is it permissible for an agency to have the IEP completed when the IEP meeting begins?

No. It is not permissible for an agency to present a completed IEP to parents for their approval before there has been a full discussion with the parents of (1) the child's need for special education and related services, and (2) what services the agency will provide to the child. Section 602(a)(20) of the Act defines the IEP as a written statement developed in any meeting with the agency representative, the teacher, the parent, and, if appropriate, the child.

It would be appropriate for agency staff to come prepared with evaluation findings, statements of present levels of educational performance, and a recommendation regarding annual goals, short term instructional objectives, and the kind of special education and related services to be provided. However, the agency must make it clear to the parents at the outset of the meeting that the services proposed by the agency are only recommendations for review and discussion with the parents. The legislative history of Pub. L. 94-142 makes it clear that parents must be given the opportunity to be active participants in all major decisions affecting the education of their children with disabilities. (See, e.g., S.

Rep. No. 168, 94th Cong. 1st Sess. 13 (1975); S. Rep. No. 455 (Conference Report), 94th Cong. 1st Sess. 47–50 (1975).)

56. Is there a prescribed format or length for an IEP?

No. The format and length of an IEP are matters left to the discretion of State and local agencies. The IEP should be as long as necessary to adequately describe a child's program. However, as indicated in Question 41, above, the IEP is not intended to be a detailed instructional plan. The Federal IEP requirements can usually be met in a one to three page form.

57. Is it permissible to consolidate the IEP with an individualized service plan developed under another Federal program?

Yes. In instances where a child with a disability must have both an IEP and an individualized service plan under another Federal program, it may be possible to develop a single, consolidated document only if: (1) it contains all of the information required in an IEP, and (2) all of the necessary parties participate in its development.

Examples of individualized service plans that might be consolidated with the IEP are: (1) The Individualized Care Plan (Title XIX of the Social Security Act (Medicaid)), (2) the Individualized Program Plan (Title XX of the Social Security Act (Social Services)), (3) the Individualized Service Plan (Title XVI of the Social Security Act (Supplemental Security Income)), and (4) the Individualized Written Rehabilitation Plan (Rehabilitation Act of 1973).

58. What provisions on confidentiality of information apply to IEPs?

IEPs are subject to the confidentiality provisions of both (1) Part B (Section 617(c) of the Act; §§ 300.560–300.576 of the regulations), and (2) the Family Educational Rights and Privacy Act ("FERPA", 20 U.S.C. 1232g) and implementing regulations in 34 CFR part 99. An IEP is an education record as that term is used in the FERPA and implementing regulations (34 CFR § 99.3) and is, therefore, subject to the same protections as other education records relating to the student.

Note: Under Section 99.31(a) of the FERPA regulations, an educational agency may disclose personally identifiable information from the education records of a student without the written consent of the parents "if the disclosure is—(1) To other school officials, including teachers, within the educational institution or LEA who have been determined by the agency or institution to have legitimate educational interests * * *" in that information. Insert illus. 01788

59. If placement decisions are made at the time the IEP is developed, how can a private school representative attend the meeting?

Generally, a child who requires placement in either a public or private residential school has already been receiving special education, and the parents and school personnel have often jointly been involved over a prolonged period of time in attempting to find the most appropriate placement for the child. At some point in this process (e.g., at a meeting where the child's current IEP is being reviewed), the possibility of residential school placement might be proposed—by either the parents or school personnel. If both agree, then the matter would be explored with the residential school. A subsequent meeting would then be conducted to finalize the IEP. At this meeting, the public agency must ensure that a representative of the residential school either (1) attends the meeting, or (2) participates through individual or conference telephone calls, or by other means.

60. Is the IEP a performance contract?

No. Section 300.350 makes it clear that the IEP is not a performance contract that imposes liability on a teacher or public agency if a child with a disability does not meet the IEP objectives. While the agency must provide special education and related services in accordance with the IEP of each child with a disability, the Act does not require that the agency, the teacher, or other persons be held accountable if the child does not achieve the growth projected in the written statement.

PART 301—PRESCHOOL GRANTS FOR CHILDREN WITH DISABILITIES

2. The authority citation for part 301 continues to read as follows:

Authority: 20 U.S.C. 1419, unless otherwise noted.

3. Section 301.1 is amended by revising paragraph (a) to read as follows:

§ 301.1 What is the Preschool Grants for Children with Disabilities program?

* * * * *

(a) Providing special education and related services to children with disabilities aged three through five years, and, at a State's discretion, providing a free appropriate public education to two-year-old children with disabilities who will reach age three during the school year;

* * * * *

§ 301.2 [Amended]

4. The heading for § 301.2 in the table of contents is revised to read "Who is eligible for an award?".

5. Section 301.3 is amended by revising paragraphs (a) and (c) to read as follows:

§ 301.3 What kinds of activities may be assisted?

* * * * *

(a) Provide subgrants to LEAs and IEUs to assist them in providing special education and related services to children with disabilities aged three through five years, and, if consistent with State policy, provide a free appropriate public education to two-year-old children with disabilities who will reach age three during the school year, whether or not those children are receiving, or have received, services under Part H of the Act.

* * * * *

(c) Provide direct and support services from the SEA to children with disabilities aged three through five years, and, at the State's discretion, provide a free appropriate public education, in accordance with the Act, to two-year-old children with disabilities who will reach age three during the school year, whether or not those children are receiving, or have received, services under Part H.

(Authority: 20 U.S.C. 1419)

6. A new § 301.6 is added to Subpart A to read as follows:

§ 301.6 Does Part H of the Act apply to two-year-old children with disabilities?

Part H of the Act does not apply to any child with disabilities receiving a free appropriate public education, in accordance with Part B of the Act, with funds received under the Preschool Grants program.

(Authority: 20 U.S.C. 1419(g))

7. Section 301.10 is amended by revising paragraph (b)(2) to read as follows:

§ 301.10 How does a State become eligible to receive a grant?

* * * * *

(b) * * *

(2) The State has policies and procedures in its State plan under 34 CFR part 300 that assure the provision of a free appropriate public education—

(i) For all children with disabilities aged three through five years in accordance with the requirements in 34 CFR part 300; and

(ii) For any two-year-old children, provided services by the State under 301.30(b)(3) or by a LEA or IEU under 301.30(a)(2); and

* * * * *

8. Section 301.30 is amended by revising paragraphs (a), (b)(2), and (d), and adding a new paragraph (b)(3) to read as follows:

§ 301.30 How does a State distribute the grant money?

(a) A state shall distribute at least 75 percent of its grant to LEAs and IEUs to be used to provide:

(1) Special education and related services to children with disabilities aged three through five years; and

(2) If consistent with State policy, a free appropriate public education, in accordance with Part B, to two-year-old children with disabilities who will reach age three during the school year, whether or not those children are receiving or have received, services under Part H of the Act.

(b) * * *

(2) The provision of direct and support services for children with disabilities aged three through five years; and

(3) At the State's discretion, the provision of a free appropriate public education to two-year-old children with disabilities who will reach age three during the school year, whether or not those children are receiving, or have received, services under Part H of the Act.

* * * * *

(d) If a State provides services to preschool children with disabilities because some or all LEAs and IEUs are unable or unwilling to provide appropriate programs, the SEA may use payments that would have been available to those LEAs or IEUs to provide special education and related services to children with disabilities aged three through five years, and to two-year-old children with disabilities in accordance with paragraph (b)(3) of this section, residing in the area served by those LEAs and IEUs.

(Authority: 20 U.S.C. 1414(d), 1419(c)(2), 1419(f))

Appendix

(Not to be Codified in the Code of Federal Regulations)

Appendix

Analysis of Comments and Changes

(Note: This appendix will not be codified in the Code of Federal Regulations.)

The following is an analysis of the comments and of the changes in the regulations since publication of the NPRM on August 19, 1991 (56 FR 41266). Substantive issues are discussed under the section of the regulations to which they pertain. Minor changes made to the language published in the NPRM—and suggested changes the Secretary is not legally authorized to make under applicable statutory authority—are not addressed. References to section numbers in this appendix are to the final regulations.

Assistive Technology Device; Assistive Technology Service (§§ 300.5 and 300.6)

Comment: One commenter requested that the proposed definitions of "assistive technology device" and "assistive technology service" be modified to make them as educationally relevant as possible. Another commenter stated that, in the definition of "assistive technology service" (§ 300.6(f)), the term "children" should be used in lieu of "individuals." Another commenter suggested that each State be required to include in the State plan its system for providing information and technological assistance for LEAs regarding assistive technology acquisition.

A commenter requested that procedures for determining when a child needs assistive technology be added to the final regulations. Another commenter requested that evaluations be done by personnel qualified to assess the technological needs of children with disabilities. Another commenter was concerned that school personnel would not have the training and knowledge to provide required services.

Discussion: The definitions of "assistive technology device" and assistive technology service" are taken from sections 602(a)(25) and 602(a)(26) of the Act, and there is no authority to change the substance of those definitions. However, the requirement in § 300.308 limits the provision of assistive technology to educational relevancy—i.e., an assistive technology device or service is only required if it is determined, through the IEP process, to be (1) special education, as defined in § 300.17, (2) a related service, as defined in § 300.16, or (3) supplementary aids and services required to enable a child to be educated in the least restrictive environment. The Secretary believes that the effect of § 300.308 is to limit the provision of assistive technology devices and services to those situations in which they are required in order for a child to receive FAPE.

The Note following "assistive technology service" in the NPRM explained that, except for replacing "child" for "individual," the definition is taken directly from section 602(a)(25)–(26) of the Act. The term "individuals" was inadvertently included in paragraph (f) of that definition. Therefore, that term is being changed to "children" in these final regulations.

The Secretary believes that while an SEA, at its discretion, might choose to provide technical assistance to LEAs about assistive technology or other provisions required in this part, it would be inappropriate and burdensome to require that a State include a description of a technical assistance system on assistive technology in the State plan.

It is not necessary to add procedures for determining the need for assistive technology services because this determination is made as part of the individual evaluation of each child required in §§ 300.530–300.534. These evaluations must be done by qualified individuals, as specified in § 300.532(a)(3).

In instances where LEA personnel do not have the knowledge to provide assistive technology services, funds under this part may be used to obtain the necessary expertise, and, if appropriate, to train existing school personnel. The Secretary does not believe that further guidance is needed on the matters raised by these commenters.

Changes: In § 300.6(f), the clause "or are otherwise substantially involved in the major life functions of individuals with disabilities" has been revised to substitute the term "children" for "individuals."

Autism (§ 300.7(b)(1))

Comment: Some commenters proposed that the phrase "generally evident before the age of three" be eliminated because it may result in excluding children who exhibit those characteristics after age three. One commenter requested that the regulations clarify that autism is a medical diagnosis, while another commenter asked if a medical diagnosis would be required for this disability.

Discussion: The reference to age three is not an age limitation, but merely indicates that children identified as having autism generally exhibit characteristics of this disability before age three. The Secretary does not agree that a medical diagnosis is required to determine whether a child falls within the disability category of "autism." The definition of "children with disabilities" in § 300.7(a)(1) states that the term means "those children evaluated in accordance with §§ 300.530–300.534 * * *." The required procedures in those sections are broad enough to ensure that diagnostic and placement decisions are based on comprehensive information about the child, including medical information that may be needed to determine whether the child has a disability and is in need of special education and related services.

Changes: None.

Comment: Several commenters raised issues regarding the characteristics listed in the definition of "autism." For example, some commenters stated that the proposed definition implies that a child must exhibit all of the characteristics listed to be considered to have autism. In addition, a commenter asked that impairments in the development of social relationships be added to the list of characteristics. Commenters raised two concerns about the term "stereotyped movements"—that the term is too vague and that, in some instances, older children may not exhibit stereotyped movements.

One commenter proposed that the phrase "that markedly restricts activities and interests" be included after "generally evident before age three" to be consistent with the

definition of "Pervasive Developmental Disorder" in the Diagnostic and Statistical Manual of Mental Disorders (DSM–III–R). Several commenters requested that the term "Pervasive Developmental Disorder" be included to ensure that the definition is not restrictive. One commenter requested that a statement be added noting that the term "autistic" does not include children with "autistic-like tendencies."

Discussion: The definition in the NPRM was not intended to require the presence of all of the characteristics listed, nor to be an exhaustive list of characteristics. Children with autism must have impairments in both communication and social interaction. In addition, there are other characteristics that are often, but not always, associated with autism. The term "stereotyped movements" is used by most special educators and medical and health professionals to describe behaviors of many children with autism. The phrase "that markedly restricts activities and interests" does not need to be added because it is implicit in the definition. Children with "autistic-like tendencies" are included if they meet the definition of "autism." Inclusion of the definition of "Pervasive Developmental Disorder" is not needed because the definition of "autism" is sufficiently broad to encompass children who exhibit a range of characteristics of autism.

Changes: The definition has been revised to (1) include, in the first sentence, characteristics generally common to children with autism, and (2) list, in the second sentence, "Other characteristics often associated with autism * * *."

Comment: Several commenters requested that the last sentence in the definition of "autism" regarding the exclusion of children with characteristics of the disability "serious emotional disturbance" be eliminated. They indicated that some characteristics of autism are similar to some characteristics of serious emotional disturbance. A few commenters stated that, in the past, autism was classified under the definition of "serious emotional disturbance."

Discussion: A clarifying change has been made in the definition. However, the Secretary believes that it is important that the regulations distinguish between serious emotional disturbance and autism because children may exhibit characteristics of both disabilities. While the commenters are correct that, in the past, autism was included in the category of "serious emotional disturbance," the current regulations include "autism" in the category of "other health impaired." The legislative history of Public Law 101–476 indicates that autism has suffered from an inaccurate identification with mental illness, and that the designation of autism as a disability category is meant to clarify it as a developmental disability and not as a form of mental illness. (See House Report No. 101–544, 5 (1990).)

Changes: The last sentence of the definition of "autism" has been modified to clarify that the term does not apply if a child's educational performance is adversely affected primarily because the child has a serious emotional disturbance.

Traumatic Brain Injury (§ 300.7(b)(12))

Comment: A commenter suggested that the first sentence of the proposed definition of "traumatic brain injury" be amended by adding "acquired" before "injury," and substituting "impairment" for "maladjustment". The commenter also pointed out that "functional disability" and "psychosocial impairment" resulting from an injury to the brain are not always mutually exclusive, and recommended that the definition be amended to allow for both. One commenter requested the inclusion of adverse effects on social-emotional development, not just academic performance.

Discussion: The Secretary agrees that the definition of "traumatic brain injury" should clarify that the injury (1) occurs after birth, and (2) results in total or partial functional disability, or psychosocial impairment, or both, to provide a more accurate and comprehensive description of children in this disability category. It is not necessary to include a statement of adverse effects on social-emotional development in the definition because social-emotional developmental consequences may be reflected in adverse effects on educational performance.

Changes: The definition has been revised to incorporate the commenter's suggestions, to the extent indicated in the above discussion.

Comment: Some commenters requested clarification as to whether medical verification or physician documentation would be required. In addition, a few commenters requested that specific assessment procedures be developed and required. One commenter stated that LEAs do not have individuals skilled in assessing children with traumatic brain injury and expressed concern about assessment costs.

Discussion: The definition of "children with disabilities" in § 300.7(a)(1) states that the term means "those children evaluated in accordance with §§ 300.530–300.534 * * *." The required procedures in those sections are broad enough to ensure that diagnostic and placement decisions are based on comprehensive information about the child, including medical information if it is needed to determine whether the child has a disability and is in need of special education and related services. There should not be a significant increase in the cost of assessing children with traumatic brain injury, since these children are being currently assessed and are receiving special education, although they are identified as having other disabling conditions. The establishment of a separate category should facilitate the development of improved assessment and program planning efforts. These efforts, together with improved personnel training, should help to ensure that required personnel in LEAs are appropriately skilled in the identification, evaluation, and placement of children with traumatic brain injury. (See House Report No. 101–544, 5 (1990).)

Changes: None.

Comment: Several commenters requested clarification as to whether there is any overlap between the definitions of "traumatic brain injury" and "other health impaired." The commenters asked if an injury resulting from infection, tumor, fever, exposure to a toxic substance, or near-drowning would be considered a traumatic brain injury. A commenter also requested that the definition not exclude other acquired brain injuries when the resulting functional areas of disability are similar to the disabilities resulting from traumatic brain injury.

Discussion: The term "traumatic brain injury," as used in professional practice, applies only to children with acquired brain injuries caused by an external physical force. It does not apply to injuries caused by internal occurrences, such as infections, tumors, fever, and exposure to toxic substances. Children whose educational performance is affected as a result of acquired injuries to the brain caused by internal occurrences may meet the criteria of one of the other disability categories, such as "other health impaired," "specific learning disabilities," or "multiple disabilities." The definition of "traumatic brain injury" does include an acquired injury to the brain caused by the external physical force of near-drowning.

Changes: The phrase "or by an internal occurrence such as a stroke or

aneurysm" has been deleted from the first sentence of the definition.

Comment: A commenter suggested that the word "mild" be deleted from the second sentence of the definition of "traumatic brain injury." Another commenter asked that descriptions of the degree of a child's impairment be eliminated from the definition.

Discussion: The Secretary believes that the degree of impairment is not a factor in determining whether a child has a "traumatic brain injury." Therefore, the terms "mild," "moderate," and "severe" should be deleted from this definition. The factors for determining whether a child is eligible under this disability category for services under part B are (1) an acquired injury to the brain caused by an external physical force resulting in total or partial functional disability or psychosocial impairment that adversely affects educational performance, and (2) a need for special education and related services because of that disability or impairment. The particular services provided to the child are determined on an individual basis. Thus, as long as the factors described above are met, children are eligible whether or not they have mild, moderate, or severe impairments.

Changes: The descriptions of degree of impairment (mild, moderate, and severe) have been deleted from the definition.

Rehabilitation Counseling Services (§ 300.16(b)(10))

Comment: Some commenters indicated that rehabilitation counseling services should be provided by State vocational rehabilitation agencies under title I of the Rehabilitation Act of 1973, and not be a requirement under this part. Commenters also expressed concern regarding the potential responsibility and the financial burden to LEAs to provide services that were previously the responsibility of other agencies, as well as the inability of LEAs to commit the resources of other agencies. Two commenters requested that the definition of "rehabilitation counseling services" be broadened to mention additional services. A commenter requested clarification about the intent of the new requirement, especially with respect to services provided under the Rehabilitation Act of 1973.

Discussion: Public Law 101-476 added "rehabilitation counseling" as a type of "counseling service" in the list of related services in part B. The Report of the House Committee on Education and Labor on Public Law 101-476 describes rehabilitation counseling as an important related service in special education, as well as an important transition service in preparing students with disabilities for employment or postsecondary education. In addition, the report states, "It is the intent of the Committee that rehabilitation counseling * * * be provided to all students with disabilities for whom this service is necessary for the achievement of the individualized education program." (See House Report No. 101-544, 7-8 (1990).)

"Rehabilitation counseling services," as defined in § 300.16(b)(10), includes a variety of services, such as career development, employment counseling, and employment preparation. The term also includes vocational rehabilitation services provided to students with disabilities under the Rehabilitation Act of 1973. The Secretary believes that the definition is broad enough not to require the listing of additional services.

Because "rehabilitation counseling services" is a type of related service under "counseling services" in part B, public agencies must provide that service to any student with a disability, if the IEP team determines that the service is required to assist the student to benefit from special education. As indicated in the discussion to the comment that follows, rehabilitation counseling may be provided by existing LEA staff, if they are qualified under § 300.15 to provide those services in areas appropriate to their disciplines.

The Secretary recognizes that LEAs do not have the authority to commit the resources of another agency. However, the SEA is responsible—through the use of interagency agreements required under § 300.151, or other means—to ensure that services that would have been provided by other agencies will continue to be provided, either by those agencies, or by the LEA responsible for providing FAPE to the child. In accordance with § 300.150, States may not permit LEAs to use funds under this part to provide or pay for services that would have been paid for by a health or other agency pursuant to policy or practice but for the fact that these services are now included in a student's IEP.

Changes: None.

Comment: Many commenters requested that the term "qualified counseling professional" be deleted from the definition of "rehabilitation counseling services." They were concerned that it would add a new personnel category that would require States to adopt new certification or licensure standards, and preclude the continued provision of services by existing school staff, who are otherwise qualified. A few commenters suggested that "certified" be used in lieu of "qualified."

Discussion: The Secretary believes that existing school staff (e.g., prevocational counselors, work-study coordinators, or special education teachers), who are qualified under § 300.15, should be permitted to provide rehabilitation counseling services appropriate to their disciplines. The qualifications of personnel providing those services, like the qualifications of personnel providing other services, is a matter to be determined by each State. The method used to specify the qualifications of personnel (e.g., certification, licensure, or registration) is also a matter that is left to State discretion.

Changes: The term "a qualified counseling professional" has been changed to "qualified personnel."

Social Work Services in Schools (300.16(b)(12))

Comment: A large number of commenters did not support the proposed deletion of "in schools" from the definition of "social work services," and requested that the current term "social work services in schools" be retained in the final regulations. These commenters stated, among other reasons, that the existing term helps to ensure that the services provided will be educationally relevant and directly linked to the IEP. Some commenters requested that the term be changed to "school social work services."

A few commenters supported the deletion of "in schools" from the defined term, asserting that the change would enable broader services to be provided. One commenter stated that the proposed change would allow schools and other public and private agencies to work together in providing appropriate mental health services to children with serious emotional disturbance.

Another commenter requested the following changes: (1) Substituting developmental "history" for developmental "assessment," (2) adding the phrase "making home visits," to be consistent with the definition in 34 CFR 303.12(d)(11), and (3) changing "mobilizing" to "identifying and coordinating." A few commenters requested that the qualifications of social workers be clarified. Commenters also urged that services be provided by credentialed school social workers.

Discussion: The phrase "in schools" was proposed to be omitted from the defined term because the Secretary believed that public agencies understood that phrase to limit the

setting in which social work could be provided as a related service. The comments received make clear that this is not the case. The substance of the definition, which was not proposed to be amended, permits these services to be provided in any environment, including a child's home, if they are required to assist the child to benefit from special education.

Because the term "social work services in schools" has been used in this part since 1977 and is commonly accepted by LEAs and other public agencies throughout the Nation, the Secretary does not believe that it is necessary to change the term to "school social work services" or to make other changes to the substance of the definition.

Social work services in schools must be provided by personnel who are qualified under § 300.15. The qualifications of personnel providing those services is a matter to be determined by each State. The method used to specify the qualifications of personnel (e.g., certification, licensure, or registration) is also a matter that is left to State discretion.

Changes: The phrase "in schools" has been retained in the defined term.

Comment: Several commenters requested that, in § 300.16(b)(12)(iv), the goal of receiving "maximum benefit" be deleted. These commenters asserted that "maximum benefit" exceeds the legally required standard for providing FAPE. Some of the commenters stated that the phrase "to receive maximum benefit from his or her educational program" is inconsistent with the decision of the United States Supreme Court in *Board of Education* v. *Rowley*, 458 U.S. 176 (1982)—that part B does not entitle children to maximization of their educational potential, but only to educational benefit.

Discussion: The definition of "social work services in schools," included at § 300.12(b)(12) of the current regulations has remained unchanged since 1977. The phrase "to receive maximum benefit," as used in that definition, was intended only to provide that one activity carried out by personnel qualified to provide social work services in schools is to mobilize resources so that a child can learn as effectively as possible in his or her educational program. This provision did not set a legal standard for that program or entitle the child to a particular educational benefit. However, because of the commenters' concerns that the phrase "to receive maximum benefit" appears to be inconsistent with the Rowley decision, the Secretary believes that the phrase should be revised.

Changes: Section 300.16(b)(12)(iv) has been revised to read: "Mobilizing school and community resources to enable the child to learn as effectively as possible in his or her educational program."

Transition Services (§ 300.18)

Comment: A large number of comments were received on the proposed Note following the definition of transition services. The majority of commenters requested that the last sentence of the Note be revised to delete the statement that the listed activities in the definition are only examples of different types of post-school activities, and, instead, to specify that the listed activities are the minimum that must be provided. Other commenters requested that the listed activities be permissive and not mandatory. One commenter requested that the final regulations define the limits of transition services. (See other comments on transition services relating to §§ 300.344–300.347 in this appendix.)

Discussion: The Secretary agrees with commenters that the statement in the Note—that the listed activities are only examples—must be deleted. The statute defines both "transition services" and "individualized education program." 20 U.S.C. 1401(a)(19) and 1401(a)(20). Paragraph (D) of the definition of IEP provides that an IEP must include a statement of the needed transition services for students with disabilities who are 16 years of age or older, and for certain students below age 16. The Secretary interprets these provisions to require that, at a minimum, the IEP team for each student must address each of the areas listed in § 300.18(b)(2)(i) through § 300.18(b)(2)(iii) (as incorporated from section 602(a)(19) of the Act), and determine what services are needed by the student in each area. If the IEP team determines that no services within a particular area are needed by the student, the IEP must include a statement to this effect, and the basis upon which that determination was made. See § 300.346(b).

Although the definition of transition services in § 300.18 includes a specific list of activities, that list is not intended to be exhaustive. The Secretary does not believe that further guidance is needed regarding the limits of transition services.

Changes: The last sentence of the Note following § 300.18 has been revised to delete the statement that the listed activities are only examples of different types of post-school activities.

Comment: One commenter requested clarification of what is meant by the term "outcomes," as used in "outcome-oriented process." Some commenters requested clarification of the term "coordinated," as used in "a coordinated set of activities." A few commenters requested that recreation and leisure, and orientation and mobility, be added to the coordinated set of activities.

A few commenters requested that the term "if appropriate" be deleted as a modifier of the phrases "acquisition of daily living skills" and "functional evaluation," stating that these activities are needed by all students. Another commenter requested deletion of "if appropriate," stating that the IEP is already individualized.

One commenter requested an emphasis on the responsibility of schools to prepare students with severe disabilities to work and live in the community. Another commenter requested that the definition emphasize the importance of involving the student, parents, other family members, employers, and other community representatives earlier in the student's educational process. One commenter requested a definition of "functional vocational evaluation."

Discussion: The term "outcome," as used in the phrase "outcome-oriented process," refers to the results, or intended effect, of the activities on a student. The Secretary interprets the term "coordinated" to mean both (1) the linkage between each of the component activities that comprise transition services, and (2) the interrelationship between the various agencies that are involved in the provision of transition services to a student. With respect to the comment on "outcomes and the request to clarify the term "coordinated," the Secretary does not believe that further guidance is needed in these regulations. It also is not necessary to specify recreation and leisure, and orientation activities because they could be included under other post-school adult living objectives. As used in § 300.18, the term "if appropriate" is incorporated from the statutory definition of transition services.

It is not necessary to emphasize the responsibility of schools in preparing students with severe disabilities for postschool activities, since transition services are to be provided to each student who is eligible for those services.

The Secretary agrees with the commenter that it is important to involve students, their parents, and appropriate community representatives as early as possible in the educational process—to facilitate a smooth transition from school to employment.

However, it is not appropriate to add this as a requirement in the definition under § 300.18. It also is not necessary to add a definition of "functional vocational evaluation." The term is intended to be sufficiently broad to enable States and LEAs to include whatever services or activities are determined appropriate for individual students.

Changes: None.

Full Educational Opportunity Goal—Data Requirement (§ 300.124)

Comment: Two commenters requested clarification regarding whether the effect of the removal of this section was simply to require data to be submitted separately from the State plan or whether the data requirements would be less specific or otherwise substantively different.

Discussion: When the original regulations in this part were published in 1977, States were required to submit State plans on an annual basis. State plans are now submitted on a triennial basis; but the data for the Part B program are required to be submitted each year as part of the Department's Annual Data Report under section 618 of the Act. This change does not affect the substance of the data requirements.

Changes: None.

Child Identification (§ 300.128, Note 2)

Comment: One commenter felt that the issue of coordination between the Part B and Part H programs was so important that it should be addressed in the regulation rather than a note. The commenter requested clarification regarding the responsibility of the Part H lead agency when it is not the SEA. Another commenter suggested that the two agencies be required to coordinate child find activities with other agencies. Other commenters requested clarification of the components of these activities and applicable procedural safeguards. One commenter questioned whether Part B requires child find activities for children from birth to two years of age.

Discussion: A specific provision requiring the lead agency for Part H to coordinate its child find system with all other child find efforts in the State, including those under Part B, is contained in 34 CFR 303.321(c). Therefore, a Note following § 300.128 is sufficient to address the importance of effective coordination between the two programs.

The Secretary believes that, in States where the SEA and the lead agency for Part H are different, effective coordination between the two agencies is essential to the implementation of the child find activities. The nature and extent of that participation must be included in the State plan. With the agreement of the SEA, the Part H lead agency may undertake the actual implementation of child find efforts for infants and toddlers with disabilities. However, the SEA remains responsible in all events for ensuring compliance with all child find requirements, including those relating to the evaluation of children.

With respect to the scope of the child find requirements under this part, the Secretary interprets those requirements to apply to all children from birth through twenty-one.

Changes: Note 2 has been revised to reflect the above discussion.

Assistive Technology (§ 300.308)

Comment: A few commenters questioned the Department's authority to require assistive technology devices and services under § 300.308, stating that the only new statutory provisions affecting Part B are the definitions of these terms in 20 U.S.C. 1401 (a)(25) and (a)(26).

Several commenters requested that the provisions on assistive technology devices and services be amended to clarify that the cost of personal or medical devices should be borne by parents or other public agencies and not educational agencies. A few commenters requested that the final regulations clarify that an assistive technology device can be taken home by a child if it is needed to complete a homework assignment; other commenters stated that devices should be used only at school. One commenter suggested that, with respect to a child's need for assistive technology devices and services, the phrase "following evaluation of such needs" be added to proposed § 300.308(a).

Discussion: The Secretary believes that the requirements for assistive technology in this part are fully authorized by law. The report of the House Committee on Education and Labor on Public Law 101–476 states:

> * * * The Committee is aware that since the passage of the Education of the Handicapped Act, advances in the development and use of assistive technology have provided new opportunities for children with many disabilities to participate in educational programs. For many children and youth with disabilities, the provision of assistive technology devices and services will redefine "an appropriate placement in the least restrictive environment" and allow greater independence and productivity * * *.
>
> The Committee bill incorporates definitions for assistive technology service and assistive technology device in order * * * (2) to increase the awareness of assistive technology as an important component of meeting the special education and related service needs of many students with disabilities, and thus enable them to participate in, and benefit from, educational programs * * *. (House Report No. 101–544, 8–9 (1990).)

The Secretary believes that assistive technology devices and services may be essential to the provision of FAPE to certain children with disabilities. Section 300.308 provides only that these devices and services must be made available if they are required under current provisions of the regulations relating to special education, related services, and supplementary aids and services.

A determination as to whether an assistive technology device or service is required in order for a child to receive FAPE must be made on an individual basis using the evaluation procedures, the procedures for developing IEPs, and the procedures for placement described in these regulations. Similarly, a decision as to whether a child may use a device or service in settings other than the child's school (e.g., the child's home or other parts of the community) also must be made on an individual basis.

Under § 300.301, a public agency may use whatever State, local, Federal, and private sources of support are available to provide or pay for services, including assistive technology services or devices. These services and devices must be provided at no cost to the child or parent under §§ 300.8 and 300.300.

The Secretary does not believe that it is necessary to add the phrase "following evaluation of such needs" because the concept of determining needs based on evaluation is central to these regulations.

Changes: None.

Comment: Several commenters objected to proposed § 300.308(b), regarding the provision of supplementary aids and services for children who are educated in regular classes, because the proposed language implied that assistive technology devices and services under this part must be provided to children who do not receive special education and related services.

Discussion: Under § 300.550(b)(2), "supplementary aids and services" must be provided to children with disabilities who have been determined to be eligible under Part B and are able to be educated in regular classes with the use of those aids and services. Assistive technology can be a form of "supplementary aids and services."

Changes: Section 300.308 has been revised to make it clear that assistive

technology devices and services must be provided only if they are required under current regulations as part of a child's special education (§ 300.17), related services (§ 300.16), or supplementary aids and services (§ 300.550(b)(2)).

Priorities (§ 300.321(c))

Comment: A few commenters requested that the prohibition against the use of Part B funds for preservice training in § 300.321(c) of the current regulations be retained. These commenters expressed concern about duplication of effort, noting that preservice training is currently the responsibility of institutions of higher education. Another commenter expressed concern that public agencies would be required to use Part B funds for preservice education, thus diverting funds away from the provision of direct services. One commenter expressed support for deleting the provision if the change would provide LEAs more flexibility in using Federal funds for preservice training, but not if it would mean that universities would have increased availability of Part B funds for preservice training previously funded from other sources.

Discussion: The Secretary believes that the prohibition against using funds under this part for preservice training should be deleted, as proposed in the NPRM. Deleting the prohibition will give States and LEAs the flexibility to use funds under this part for preservice training if they choose to do so.

Changes: None.

Participants in Meetings; Parent Participation (§§ 300.344(c) and 300.345(b)(2))

Comment: Several commenters requested that the term "if appropriate" be deleted from the Note following § 300.344(c), and that inclusion of students in their IEP meetings be required. Other commenters requested that the Note reflect a preference for student inclusion and clarify who makes the determination of the appropriateness. These commenters stressed the importance of students having direct involvement in determining their own programs and services.

Discussion: The Secretary agrees with commenters that "if appropriate" should be deleted, and that students should be afforded the opportunity to participate and have a voice in their own transition planning. Providing for the inclusion of older students in their IEP meetings is consistent with the current provisions of this part. Section 300.344(a)(4) states that each public agency "shall ensure that the meeting includes * * * the child, where appropriate." The Note following question 21 of Appendix C of these regulations states that "[t]he parents and the agency should encourage older children with disabilities (particularly those at the secondary level) to participate in their IEP meetings." The Secretary believes that, if a purpose of the IEP meeting is the consideration of transition services for a student, the public agency has a responsibility to (1) invite the student to attend the meeting, and (2) consistent with Executive Order 12606, entitled "The Family," inform the parents, in the notice required at § 300.345(a)(1), that the student will be invited. Also, if the student does not attend, the public agency must use other methods to ensure that the student's preferences and interests are taken into account at the meeting.

The Secretary believes that it is important to add a Note to clarify when the public agency is required to invite students to attend their IEP meetings. All students who are 16 years of age, or older, must be invited, since one of the purposes of the annual IEP meeting will always be the planning of transition services. Also, any student younger than age 16 must be invited before a decision about transition services for the student is made.

Changes: The following changes have been made: (1) the title of § 300.344(c) has been changed to "Transition services participants"; (2) that paragraph has been revised to specify that if a purpose of the meeting is the consideration of transition services for a student, the public agency must invite the student, and, if the student does not attend, take steps to ensure that the student's preferences and interests are considered; (3) proposed Note 2 following § 300.344 in the NPRM has been revised to clarify when public agencies must invite students to their IEP meetings; and (4) § 300.345 (Parent participation) has been revised at paragraph (b)(2) to provide that, if a purpose of the IEP meeting is the consideration of transition services, the notice of the meeting must indicate this purpose, and indicate that the student will be invited.

Comment: Several commenters expressed concern about the requirement in § 300.344(c)(2) of the NPRM that public agencies must ensure that IEP meetings include, "if appropriate, a representative of each other participating agency providing the transition services * * *." The commenters stated that public agencies do not have the authority to require the attendance of personnel from other agencies, and requested that the requirement be deleted, or modified to provide guidance on alternatives for the public agency to follow if other agencies fail to participate (e.g., to require documentation of efforts to involve agencies, or to use other methods to ensure participation).

A commenter requested clarification of the term "a representative of the public agency," as used in § 300.344(a)(1) of the current regulations and proposed § 300.344(c)(1) of the NPRM, noting that the terms appear to be duplicative. Another commenter requested the inclusion of agency representatives who are needed to assist in planning (e.g., case managers or advocates), but whose agencies are not necessarily providing or paying for transition services. One commenter requested that the regulation address the need for providing information on accommodations in postsecondary education and employment that are required under section 504 of the Rehabilitation Act and the Americans With Disabilities Act.

Discussion: The Secretary believes that LEAs need the involvement of, and commitment from, the various agencies that will participate in the provision of transition services to students with disabilities, but agrees with the commenters that LEAs cannot compel the attendance of representatives of transition agencies at IEP meetings. Therefore, the Secretary believes that LEAs need to adopt other methods to ensure the involvement of those agencies (e.g., through individual or conference telephone calls, or correspondence).

The Secretary agrees with the commenter that the provision at proposed § 300.344(c)(1) of the NPRM that requires each IEP meeting to include "a representative of the public agency responsible for providing or supervising the provision of transition services" duplicates the statutory requirement in the current regulations at § 300.344(a)(1) (i.e., "a representative of the public agency * * * who is qualified to provide or supervise the provision of special education").

Under § 300.344(a)(5), participants at IEP meetings are not limited to representatives of agencies that provide or pay for the provision of transition services, but may include, at the discretion of the agency or parents, other individuals who can be helpful in planning transition services. Because § 300.344(a)(5) already provides for the kind of participation requested by the commenter, no further clarification is needed in these regulations. Considering an individual student's need for

reasonable accommodation in post-school environments is an inherent part of transition planning, and is implicit in these regulations. Therefore, it is not necessary to add a requirement on this point.

Changes: Section 300.344(c)(1) of the NPRM has been deleted. The requirement at § 300.344(c)(2) of the NPRM (designated as § 300.344(c)(1)(ii) in these final regulations) has been modified to specify that the public agency must invite "a representative of any other agency that is likely to be responsible for providing or paying for transition services." A provision has been added to specify that if a transition agency fails to send a representative to the IEP meeting, the public agency must take other steps to obtain the participation of that agency.

Content of IEP (§ 300.346).

Comment: A few commenters requested that a note be added to clarify that the statement of needed transition services must be based on current academic, vocational, and functional assessment and evaluation information. Some commenters requested that the regulations specify that the "statement of needed transition services" include (a) goals and objectives, including short-term transitional objectives, and (b) the specific special education services to be provided to the student.

A few commenters requested that the regulations refer to a "plan" rather than a "statement" because this would provide a fully developed schemata for implementation of services. One commenter requested that an exit planning meeting be held prior to graduation to determine if transition goals have been met and if appropriate services are being provided.

Several commenters expressed concern that other agencies would abandon their commitment to provide transition services, and suggested that the regulations require that participating agencies must provide the transition services agreed to in the IEP. Many of these commenters, citing the legislative history of the 1990 Amendments, requested that the Note following § 300.346 be amended to clarify that the statement of agency responsibilities is intended to address shared financial and programmatic responsibility. One commenter suggested deleting the language regarding participating agencies' responsibilities, since that concept is already covered in other areas of the Part B regulations.

Discussion: The Secretary agrees with commenters that it is important to base transition services on current evaluation and assessment information about a student that is derived from a current evaluation that meets the requirements of §§ 300.532 and 300.533.

Nothing in Part B excludes goals and objectives for transition services. However, given that the IEP content requirements in § 300.346(a) do not appear to be appropriate for all types of transition services, the Secretary has determined not to regulate further on this point at this time.

With respect to the request to use the term "plan" in lieu of "statement," the regulation uses the terminology of section 602(a)(20) of the Act. The Secretary believes that it is not necessary to require that an exit planning meeting be held because exit planning should be discussed as a matter of course in IEP meetings on transition services.

The Secretary believes that it is important to ensure that other agencies continue to provide or pay for those transition services for which they are financially and legally responsible. This position is stated in § 300.347(b) of these final regulations (§ 300.347(c) in the NPRM). The Secretary agrees with commenters that the Note following § 300.346 should reflect the legislative history of the Act regarding shared financial responsibilities for transition services.

Changes: A new heading for paragraph (a) ("General") has been added, and the five components of the IEP, as contained in § 300.346 of the current regulations, have been included under that heading. A new paragraph (b) ("Transition services") has been added. The transition services requirements under paragraph (b) have been revised to specify that the IEP for a student must include the three areas listed in § 300.18(b)(2)(i) through § 300.18(b)(2)(iii), unless (1) the IEP team determines that services are not needed in one of those areas, and (2) the IEP includes information to that effect, including the basis for the determination. (The comments and discussion related to these changes are included under § 300.18.)

The Note following § 300.346 in the NPRM (designated as Note 1 in these final regulations) has been revised consistent with the above discussion. A new Note 2 has been added to clarify the requirement in paragraph (b) related to including in a student's IEP the three transition services areas specified in § 300.18(b)(2)(i) through § 300.18(b)(2)(iii).

Comment: Some commenters recommended decreasing the age criterion to "no later than age 14," and requiring a statement of explanation for any 14 or 15-year old student not receiving such services. Another commenter recommended that the required age for providing transition services be lowered to age 15.

Discussion: Section 602(a)(20) of the Act provides that IEPs must include a statement of needed transition services for students beginning no later than age 16, but adds qualifying language related to students below 16 (i.e., "* * * and, when determined appropriate for the individual, beginning at age 14 or younger."). The Secretary believes that it would be inconsistent with the Act to mandate services for all students beginning at age 14 or 15, or to require public agencies to include a statement in a student's IEP explaining why the IEP team determined that transition services were not appropriate.

Although there is no statutory base to mandate transition services for all students beginning at age 14 or younger, the Secretary believes that the provision of these services could have a significantly positive effect on the employment and independent living outcomes of these students in the future, especially for students who are likely to drop out before age 16. As indicated in the Report of the House Committee on Education and Labor on Public Law 101-476:

> Although this language leaves the final determination of when to initiate transition services for students under age 16 to the IEP process, it nevertheless makes clear that Congress expects consideration to be given to the need for transition services for some students by age 14 or younger. The Committee encourages that approach because of their concern that age 16 may be too late for many students, particularly those at risk of dropping out of school and those with the most severe disabilities. Even for those students who stay in school until age 18, many will need more than two years of transitional services. Students with disabilities are now dropping out of school before age 16, feeling that the education system has little to offer them. Initiating services at a younger age will be critical. (House Report No. 101-544, 10 (1990).)

Therefore, the Secretary encourages public agencies to provide transition services to students below age 16 when there is a need for those services.

Changes: A new Note 3 has been added to reflect the above discussion.

Agency responsibilities for transition services (§ 300.347).

Comment: Several commenters expressed concerns about the costs of transition services to educational agencies and requested clarification about the financial responsibilities of other agencies for these services. Two commenters suggested that the regulations require interagency agreements concerning transition

services. One commenter suggested that the requirement to reconvene the IEP team in proposed § 300.347(a) be deleted. One commenter requested that the regulations include a time limit for reconvening the IEP team when a participating agency fails to provide agreed upon services. Another commenter requested that the requirement to reconvene be revised to specify that only the agencies necessary to the particular issue attend the meeting. One commenter requested that the phrase "to be implemented" be deleted from the description of the "alternative strategies" that the reconvened team would identify.

Discussion: Comments regarding the costs of providing transition services are discussed under § 300.346. It is not necessary to add a provision requiring interagency agreements on transition services because the requirements of § 300.152 ("Interagency agreements") apply to transition services.

The Secretary agrees that, in order to ensure that there will not be any undue delay in providing needed transition services to a student, the regulation should include some time-limited standard for reconvening a meeting to identify alternative strategies. The Secretary also agrees that the phrase "to be implemented" is unnecessary. However, the Secretary believes that the statute, which requires that the IEP team be reconvened, requires the public agency to reconvene all members of the team.

When an IEP team is reconvened, an alternative strategy may be able to be identified without changing the student's IEP. In other cases, the IEP team may find it necessary to revise the IEP to include alternative ways to meet the goals that were identified.

Changes: Section 300.347(a) has been revised by (1) requiring that the meeting of the IEP team be initiated "as soon as possible," after a participating agency fails to provide agreed-upon services, (2) deleting the phrase "to be implemented," and (3) adding at the end of the paragraph "and, if necessary, revising the student's IEP."

In addition to changes made based on the comments received, the following other changes have been made: (1) the definition of IEP in § 300.340 of the current regulations is now designated § 300.340(a); (2) the definition of "participating agency" in proposed § 300.347(b) has been moved from § 300.347 and added as a definition under new § 300.340(b); and (3) proposed § 300.347(c) in the NPRM has been redesignated as § 300.347(b).

Comment: Several commenters requested that the regulations clarify that transition services can continue to be provided to students after graduation. One commenter asked for clarification of the responsibility to reconvene the IEP team after graduation.

Discussion: Part B of the Act neither requires nor prohibits the provision of services to a student after the student has completed the State's graduation requirements. Thus, if a student is still within the eligible age range for FAPE within the State, the State, at its discretion, could continue to provide needed transition services to the student and use funds under this part to pay for the transition services, or contribute to the cost of those services through a shared cost arrangement with another agency—provided that all applicable requirements of this part are met.

Changes: None.

General (§ 300.380).

Comment: A few commenters requested that the proposal to require the highest requirements in the State applicable to a specific profession or discipline be eliminated. Another commenter requested that the "highest standards" be defined, and one commenter asked if these standards applied to related services and support personnel.

Discussion: The Secretary believes that a State's CSPD should be consistent with the personnel standards requirements in § 300.153. Those standards apply to all personnel who provide special education or related services to children with disabilities. "Highest requirements in the State applicable to a specific profession or discipline" is defined in § 300.153 to be State-specific.

Changes: No change has been made in response to the comments. However, a technical change has been made by Public Law 102–119 to require that States ensure that the CSPD under Part B is consistent with the purposes of the IDEA and the CSPD for the Part H program.

Adequate supply of qualified personnel (§ 300.381).

Comments: Several commenters requested that proposed § 300.381(c) be deleted or clarified to indicate that it is not mandatory for all teacher aides to acquire credentials for teaching special education from institutions of higher education. One commenter requested that the requirement in the current § 300.381(a) that other agencies have the opportunity to participate in the development, review, and annual update of the CSPD be retained. Another commenter requested the addition of consumer and parent involvement in the plan development. One commenter requested reorganization of the section for consistency with the statute. A few commenters requested clarification of the term "leadership personnel." Some commenters requested clarification concerning whether the provisions of this section apply to personnel who are seeking advanced degrees or degrees in new areas of specialization. One commenter requested that proposed § 300.381 include a specific reference to § 300.153(a).

Discussion: The Secretary agrees that § 300.381(c) should be deleted from the regulations. While States may choose to take steps to enable teacher aides and other paraprofessionals to acquire the necessary credentials for teaching special education as one method to ensure an adequate supply of qualified personnel, it is not appropriate to require that all States use this option.

Section 300.383(b)(3) specifies the kinds of personnel that are included under "leadership personnel." With respect to whether the provisions of this section apply to personnel who are seeking advanced degrees or degrees in new areas of specialization, a State is not prohibited from using funds under this part for those purposes so long as this use is not inconsistent with the priorities in §§ 300.320–300.324.

The Secretary believes that it is not necessary to add a requirement related to the participation of parents and consumers on a State's CSPD because States are required to obtain their involvement through the State advisory panel required under § 300.650. This panel has among its functions, responsibility for advising the SEA of unmet needs within the State and commenting publicly on the State's Part B plan and regulations (see § 300.652). The membership of this panel must include "persons involved in or concerned with the education of children with disabilities," such as parents as well as representatives from a wide variety of groups. State educational agencies also have the discretion to expand the membership of this panel as needed (see § 300.651). In addition, there is nothing in the Act or this part that would preclude States from consulting with parents and consumers on their CSPDs.

The Secretary does not believe that further changes to the proposed regulations in this section are necessary. The regulations proposed in the NPRM reflect the Secretary's intention to increase States' flexibility in ensuring comprehensive personnel development.

Changes: Section 300.381(c) has been deleted.

Personnel preparation and continuing education (§ 300.382).

Comments: Commenters requested the deletion of proposed § 300.382(b) because it defined regular education personnel too narrowly and conflicted with the LRE requirements at § 300.550. Two commenters requested that § 300.382 of the current regulations, which addresses inservice training, be retained; one of the commenters also requested that the section be revised to provide for the training of hearing officers, administrative law judges, and parents. Another commenter suggested that the procedures and activities required by proposed § 300.382(a) should be explicitly tied to a specific needs assessment process.

Discussion: The Secretary agrees with commenters that proposed § 300.382(b) should be deleted from the final regulations because it implies that public agencies must provide such preparation only to certain categories of regular education personnel. Section 300.550 of the regulation requires that, to the maximum extent appropriate, children with disabilities are to be educated with children without disabilities. Through the implementation of this requirement, all regular education personnel, including administrators, teachers, counseling staff, and paraprofessionals, are potentially involved in the provision of education or services to children with disabilities.

With respect to the training of hearing officers, administrative law judges, and parents, § 300.370(b)(2) already permits a State to use funds under this part for that purpose.

The Secretary does not agree that the other requested changes should be made. The requirements proposed in the NPRM reflect the Secretary's intention to increase States' flexibility in this area. The Secretary believes that sufficient guidance is provided.

Changes: Section 300.382(b) has been deleted. A statement has been added to clarify that a purpose of the system of continuing education is to enable regular and special education and related services personnel to meet the needs of children with disabilities under Part B.

Data system on personnel and personnel development (§ 300.383).

Comment: Some commenters requested the inclusion of data on vision specialists, and several commenters requested the inclusion of data on personnel providing assistive technology. One commenter requested clarification of what types of special education personnel, in addition to the list of related service personnel provided in the NPRM, are covered by § 300.383(b)(2). Clarification on data collection regarding contract providers as opposed to personnel who are employees was requested.

One commenter suggested use of the phrase "profession and discipline" instead of "area of specialization" in § 300.383(c). Another commenter requested the deletion of the data requirements in § 300.383(b)(1)(ii) concerning personnel who do not hold appropriate State certification, licensure or other credentials comparable to certification or licensure for that profession or discipline. This commenter proposed the addition of data requirements in two categories: Personnel who meet and those who do not meet the highest requirements in the State. Other commenters stated that the data collection requirements constituted an unreasonable burden on the States and that the data were not relevant to providing special education and related services. Another commenter stated that the States do not have the necessary authority to collect the data regarding higher education.

Several commenters objected to the deletion of §§ 300.384–300.387. One commenter requested that the regulations require inclusion of the data specified in § 300.383 in the State plan.

Discussion: Section 300.383(b)(2) of the NPRM requires the collection of data regarding all personnel who provide or are needed to provide special education and related services, including vision specialists and personnel providing assistive technology. The Secretary believes that sufficient guidance is provided in this section and that no other clarification is needed. In response to requests for changes in the language in the section, as well as questions regarding the authority to require data, the language referred to and the authority to require data were added by Public Law 101–476, and the Secretary regards those provisions as sufficient. Finally, the CSPD provisions in the NPRM simplify and distill the fundamental requirements contained in §§ 300.384–300.387 of the current regulations and fully implement requirements added by Public Law 101–476. The new provisions give States greater flexibility in implementing the CSPD requirements than was possible under the current regulations. Therefore, the Secretary believes that the language in the NPRM should be retained in the final regulations.

Changes: None.

Prior notice; parent consent (§ 300.504(d)).

Comment: The proposed § 300.504(d) provides that States establishing additional State consent requirements must ensure that public agencies have informal and formal procedures for dealing with parental withholding of consent to those requirements. Some commenters suggested deleting all or part of § 300.504(d), stating that current procedures are adequate to ensure the provision of services to children; one of those commenters recommended that no requirements be added unless they are expressly found in the statute.

Some commenters indicated that in order to increase the States' flexibility when a parent withholds consent under additional State consent requirements, informal procedures for resolving disagreements between the parent and the public agency should be encouraged but not required. One commenter requested standards for informal procedures. Commenters also expressed concern about the potential for confusion if States are permitted to adopt additional consent requirements. A commenter indicated that proposed Note 3 should be revised to make it permissive to use formal procedures if informal procedures fail. One commenter requested modification of § 300.504(d) to provide for an expedited resolution in the form of an intermediate ruling so that a change in placement could occur before final resolution of an administrative proceeding.

Discussion: The Secretary believes that States should have the discretion to adopt additional parental consent requirements. Nothing in the Part B statute prohibits a State from implementing additional consent requirements that give parents additional procedural protections and do not otherwise conflict with the procedural protections guaranteed under Part B. The provisions that have been added to § 300.504 are for the purpose of ensuring that additional State consent requirements will be implemented in a manner that is consistent with the procedural protections guaranteed under Part B.

The Secretary agrees that proposed paragraph (d)(2), which requires informal and formal procedures for overriding parental withholding of consent, and proposed paragraph (d)(3), which permits States to designate the due process procedures in §§ 300.506–300.513 as the formal procedures for overriding parental withholding of consent, should be deleted to avoid imposing an additional and unnecessary burden on States, and to give States flexibility in implementing consent override procedures. However, with regard to additional State consent requirements, consent override procedures must be implemented, if necessary, to ensure that children with disabilities continue to receive FAPE. In

addition, the Secretary believes that it is important for the prohibition of the current § 300.504(b)(2) that "[e]xcept for preplacement evaluation and initial placement, consent may not be required as a condition of any benefit to the parent or child" to apply to any other areas in which the State requires consent.

Changes: Sections 300.504(d)(2) and 300.504(d)(3) of the NPRM have been deleted. The consent requirements in the current regulations have been reorganized and revised (1) to provide that if a State requires additional consent requirements, the State must ensure that each public agency in the State establishes and implements effective procedures to ensure that individual children continue to receive FAPE, and (2) to ensure that a public agency does not require parental consent as a condition of any benefit except for services or activities covered by the Federal consent requirements and the additional State consent requirements. Note 3 has been revised to indicate that if parental consent is refused, and the public agency determines that the service or activity in dispute is necessary to provide FAPE to the child, the agency must implement its procedures to override the refusal.

Hearing rights (§ 300.508(a)(5)).

Comment: Commenters wondered whether the Secretary had the authority under the statute to require that hearing decisions be made public and expressed concern about the cost of implementing this requirement without the addition of new funds. One commenter requested the addition of "within a reasonable time" as a time frame for availability of the decisions. Commenters also requested clarification concerning which hearing decisions are covered and what format is required for dissemination of decisions. One commenter requested that administrative complaint decisions also be included within this requirement. One commenter suggested that summaries be permitted.

Discussion: The Secretary believes that no change is necessary for this section. The requirement that the public agency make hearing findings and decisions available to the State advisory panel and the general public after deleting any personally identifiable information is set forth at 20 U.S.C. 1415(d)(4). It is not necessary to add language requiring that the decisions be made available "within a reasonable period of time" because that concept is implicit.

The types of hearing decisions that must be made available to the public and transmitted to the State advisory council include due process hearing decisions under § 300.506(a) and review decisions under § 300.510 (see comment and discussion under § 300.510, following). The provisions of 20 U.S.C. 1415(d) do not apply to administrative complaint decisions under §§ 300.660–300.662. However, those decisions may be made available to the public at the discretion of the SEA. The format for disseminating decisions is also an individual SEA decision.

Changes: None.

Administrative appeal; impartial review (§ 300.510(c), (d), and Note 1).

Comments: The NPRM proposed to add a new paragraph (c) to § 300.510, and to revise Note 1 following the section, to clarify which officials may not conduct State-level reviews under this program. A number of commenters requested that the proposed paragraph and note be deleted from the final regulations. The comments included objections that the regulation goes beyond the scope of IDEA, and that it is contrary to some judicial opinion. One commenter stated that the regulation does not recognize that there is a distinction between the statutory requirements applicable to hearings and to State-level reviews. Another commenter stated that the proposed regulation conflicts with the SEA's obligation to conduct a review. One commenter felt that the need for the individual conducting the review to have special knowledge and training virtually required that the person be employed by the SEA. A commenter requested that the regulation be revised to permit the SEA to hire individuals whose primary role would be to conduct reviews, with some conditions established to ensure impartiality. Other commenters requested (1) further definition of "employee" of the SEA or any other public agency that may not conduct a review, (2) that language be added to indicate that the review may not be conducted by a person having a personal or professional interest that would conflict with the person's objectivity, and (3) that the regulation require knowledge of special education by the reviewing official.

A commenter requested that the requirement at proposed § 300.508(a)(5) concerning transmitting written findings of fact and decisions to the State advisory panel be applied to State-level review decisions.

Discussion: Based on the lack of consensus about the proposed change on State-level review officials and the wide variety of alternative suggestions offered, the Secretary has determined that the current regulation remains the best guidance at this time.

The Secretary interprets the requirement set forth at 20 U.S.C. 1415(d)(4) to require that both hearing and review decisions must be available to the public and transmitted to the State advisory panel.

Changes: Proposed § 300.510(c) and the change in Note 1 have been deleted. Paragraph (c) of the current regulations (regarding the finality of decisions) has been redesignated as paragraph (d), and a new paragraph (c) has been added to require that review findings and decisions be made available to the State advisory panel and to the public, after deleting any personally identifiable information.

Adoption of State complaint procedures (§ 300.660).

Comment: One commenter requested that the requirements on State complaint procedures in proposed §§ 300.660 through 300.662 be deleted because they exceed statutory authority. Two commenters requested that the requirement to review an appeal from a decision of a public agency with respect to a complaint be deleted or revised. Another commenter requested that the complaint procedures be retained in 34 CFR 76.780–76.783 until the proposed §§ 300.660–300.662 have been in effect for a period of time.

Commenters also requested clarification about whether the complainant can by-pass filing a complaint with an LEA and file the complaint directly with the SEA.

Discussion: The Secretary believes that proposed §§ 300.660–300.662, with certain modifications, should be retained and that they are generally consistent with the requirements previously in the EDGAR regulations at 34 CFR 76.780–76.782. The Secretary agrees that clarification is needed regarding the circumstances under which a complainant can file a complaint with an LEA and those when a complainant can file directly with the SEA. Proposed § 300.662 provides for complaints to be filed with the State. However, a revision is needed to allow an SEA, at its discretion, to have procedures that allow complainants to elect to file a complaint with an LEA or other public agency and to request the SEA to review that agency's decision on the complaint. The SEA must review the public agency's decision to ensure that the complaint was resolved.

Changes: Proposed § 300.660 (a) and (b) (redesignated as § 300.660 (a)(1) and (a)(2) in these final regulations) have been revised to specify that the SEA's procedures must provide for filing a complaint directly with the SEA, and may, at the SEA's discretion, permit the

filing of a complaint with the public agency, including the right to have the SEA review the public agency's decision on the complaint. The provision in proposed paragraph (c), regarding the SEA's procedures for conducting an independent on-site investigation of a complaint, has been deleted, because it is already required in the section on "Minimum State complaint procedures" (§ 300.661). Proposed § 300.660(d) has been redesignated as § 300.660(b).

Comment: One commenter requested the deletion of the proposed requirement that parents be informed about complaint procedures because it is too burdensome for public agencies. Another commenter suggested that the requirement to adopt procedures for informing parents about the State complaint procedures be changed to informing complainants.

One commenter requested that the proposed regulation be revised to clarify the scope of complaints that States must investigate and to provide that States are not required to investigate matters that are the subject of a due process hearing under § 300.506. Another commenter requested that mediation be required as a step prior to filing a complaint.

Several commenters requested guidelines and clarification for determining the responsibility of the State to conduct an independent review. Another commenter requested that the regulation be revised to provide that the SEA need not resolve a complaint if it has been resolved voluntarily.

One commenter requested that States be required to make complaint decisions available to the public. One commenter requested that the States be required to submit complaint management procedures as part of the State plan.

A commenter requested that a note be added to indicate that a State may use these procedures to resolve a complaint that an agency is violating the requirements of section 504 of the Rehabilitation Act of 1973.

Discussion: The Secretary believes that it is essential for parents and other interested individuals to be informed about their right to file a complaint and that this requirement is not unreasonably burdensome. Public agencies may choose to provide this information as part of the explanation of procedural safeguards in the notice requirements under § 300.504(a) and § 300.505(a)(1) or § 300.505(a)(2), or may use other means.

The Secretary believes that no further guidance is needed regarding the parent's right to file a complaint and request a due process hearing regarding the same issues. A parent has the right to file a complaint under proposed §§ 300.660–300.662 and to initiate a hearing under § 300.506 regarding the same issue. However, in order to avoid the possibility of inconsistent decisions on the same subject matter and waste of government resources, a State may delay resolution of identical issues raised in a complaint while those same issues are pending in a due process hearing. This does not relieve the SEA of its responsibility to resolve other issues in the complaint that are not identical to those raised under § 300.506.

It is not necessary to include a provision regarding mediation in the regulations. A State may include procedures that permit, but do not require, complainants to participate in mediation prior to filing a complaint. However, those procedures may not be used to deny or delay the right of an individual or organization to file a complaint or use the due process procedures in § 300.506.

The Secretary believes that no further guidance is needed related to conducting an independent review by the SEA, or regarding a State's responsibility to resolve a complaint that has been voluntarily resolved. It is implicit in proposed §§ 300.660 and 300.661 that a State need not resolve a complaint that has been otherwise resolved to the satisfaction of the complainant.

The Secretary believes that it would be unnecessarily burdensome to require SEAs to make complaint decisions available to the public or to include their complaint resolution procedures in their part B State plan.

Changes: None.

Minimum State complaint procedures (§ 300.661).

Comment: Several commenters requested that proposed § 300.661(a)(2), regarding the opportunity for the complainant to submit additional information, be deleted or revised. One commenter suggested that the regulations specify that the respondent should be given the opportunity to submit additional information in response to the allegations of the complainant.

Several commenters stated that the required complaint procedures are too specific. Another commenter requested that proposed § 300.661 be revised to permit a State to determine its own procedures. Other commenters stated that the requirement that written decisions include findings of fact and conclusions and the reasons for the SEA's final decision is burdensome, too formal, and makes the complaint less amenable to resolution.

Discussion: The Secretary believes that proposed § 300.661(a)(2) should be retained. As noted in the preamble to the NPRM, "many complainants have not been consulted in connection with complaint resolutions under this program in instances in which their input could have been helpful in facilitating the complaint resolution. Thus, proposed § 300.661(a)(2) requires each SEA to have procedures for soliciting input from the complainant as part of its minimum complaint procedures." The Secretary believes that as a matter of course the SEA would consider additional information submitted by the public agency that is the subject of a complaint.

The Secretary believes that the provisions in proposed § 300.661(a)(4)(i) and § 300.661(a)(4)(ii), regarding the content of the SEA's written decision to the complainant, should be retained. These provisions do not prescribe the format or level of formality in which this information must be provided. Moreover, the Secretary believes that the information required is the minimum necessary to enable the Secretary to review the final decision of the State where such review has been requested.

Changes: None.

Comment: One commenter requested that the regulations be revised to clarify that either party to a complaint may request review by the Secretary. Another commenter requested that language be added to encourage local resolution of complaints. Another commenter requested a revision to indicate that the 60-day time limit for issuing a written decision does not begin until after all documents have been received by the SEA.

Discussion: The Secretary agrees that proposed § 300.661(d) should be revised to clarify that the public agency that is the subject of the complaint also has the right to request secretarial review.

The proposed regulations neither preclude nor discourage the use of informal or local complaint procedures as an alternative to the formal complaint procedures set forth in these regulations. Some States have pointed to the success of informal conflict resolution procedures as an alternative to the formal procedures set forth in §§ 300.660–300.662. Public agencies may wish to suggest that parents and other complainants use these alternative procedures. However, these alternative procedures may not be used to deny or delay the right of an individual or organization to file a complaint with the State.

The Secretary believes that the 60 day time limit begins on the date that the

complaint is received by the SEA. This requirement is consistent with § 300.671(a) (previously, 34 CFR 76.781(a)) and long-standing Department policy.

Changes: The requirement in proposed § 300.661(a)(1) (regarding the SEA's procedures to carry out an on-site investigation) has been revised to add the statement "if the SEA determines that such an investigation is necessary." (This statement was included in proposed § 300.660(c).) Section 300.661(d) now indicates that a public agency has the right to request secretarial review.

Filing a complaint (§ 300.662).

Comment: Several commenters requested that the regulations be revised to require greater specificity in the content of complaints that are filed under this part. In particular, one commenter suggested that the name and address of the complainant and involved student and the specific requirements of part B that have been violated be required. Commenters further suggested that a note be added to indicate that this requirement may be met by a "factual statement." One commenter requested that submission of anonymous complaints be permitted, and another requested that oral complaints be permitted.

Discussion: The Secretary does not believe that proposed § 300.662 should be revised to set forth additional content requirements for filing complaints under this part. Sufficient guidance is provided in these regulations, and some of the requested changes would be unduly burdensome upon parents and other complainants. The Secretary also does not believe that proposed § 300.662 should be revised to require that States resolve anonymous and non-written complaints. The Secretary believes that it is reasonable for States to require that complaints be written and signed as a part of an orderly complaint resolution process, and that States, at their option, may include these requirements. These provisions are not intended to preclude a State from also accepting and resolving oral complaints if the State chooses to do so.

Changes: None.

Technical Assistance To Support a Coordinated Agenda for the Southwestern Area of the U.S. (CASA) for Colonias; Notice of Funding Availability for Fiscal Year 1993

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Office of Community Planning and Development

[Docket No. N-92-3491; FR-3314-N-01]

NOFA for Technical Assistance To Support a Coordinated Agenda for the Southwestern Area of the U.S. (CASA) for Colonias

AGENCY: Office of the Assistant Secretary for Community Planning and Development, HUD.

ACTION: Notice of Funding Availability (NOFA) for Fiscal Year 1993.

SUMMARY: This NOFA announces the availability of $2.3 million in Community Development Technical Assistance Program funds to be used for the purpose of empowering residents of designated "colonias" in the States of California, New Mexico and Texas in their efforts to improve living standards and conditions within their communities. Technical assistance funds will be available for the development of programs for decent, affordable and energy-efficient housing; community water and sewer systems, including drainage systems and hook-up services to colonia residents; promotion of local economic development programs and projects including the establishment of state or federal (if applicable) Enterprise Zones within the colonias; and providing job training and self-employment programs for colonia youth and residents. These funds are to be awarded competitively as follows:

(1) A minimum of $1.5 million for the purpose of empowering colonia residents through the use of Community Development Block Grant (CDBG) funds to improve living conditions and standards within colonias. Eligible applicants include non-profit and for-profit organizations, states and units of general local government responsible for providing services in the colonias. Activities should be focused on technical assistance to finance business development which creates jobs and self-employment opportunities for colonia residents; and addressing problems affecting residents, such as the availability of energy-efficient affordable housing, adequate water and sewer services and drainage systems, platting and subdivision requirements, and other urgent community needs.

(2) A minimum of $800,000 for the purpose of coordinating federal, state and local program services available for colonia residents, including creation of local, "one-stop," service centers. Service centers would use local public or private facilities or mobile facilities to provide colonia residents with a variety of social and informational services funded in whole or in part with CDBG funds. Centers would also be used to coordinate services and programs available under the CDBG program and the Section 916 set-aside with other federal, state, local or private sector resources.

In the body of this NOFA is information concerning:

(1) The principal objectives of the two technical assistance competitions described above, the funding available, eligible applicants and activities, and factors for award;

(2) The application process, including how to apply and how selections will be made; and

(3) A checklist of application submission requirements.

DATES: The application due date will be specified in the application kit. Applicants will have at least 75 calendar days to prepare and submit their application. The 75-day response time will begin to run from the first date the application kit is available. The application kit will set out a specific date and hour deadline for submission of applications that will be enforced strictly. Applicants are encouraged to submit their materials early to avoid disqualification based upon failure to meet the stated application deadline.

EFFECTIVE DATE: Applications may be requested beginning September 29, 1992.

APPLICATION KIT: To obtain a copy of the application kit, contact: Processing and Control Branch, Office of Community Planning and Development, Department of Housing and Urban Development, 451 Seventh Street, SW., room 7255, Washington, DC 20410. Requests for application kits must be in writing, but requests may be faxed to: (202) 708–3363 (this is not a toll-free number). Requests for applications kits must include the applicant's name, mailing address (including zip code), telephone number (including area code), and must refer to "document FR–3314".

FOR FURTHER INFORMATION CONTACT: Barbara Dorf, Office of Community Planning and Development, Department of Housing and Urban Development, 451 Seventh Street, SW., room 7214, Washington, DC 20410. Telephone Number (202) 708–3176; TDD Number: (202) 708–2565. (These are not toll-free numbers.)

SUPPLEMENTARY INFORMATION:

Paperwork Reduction Act Statement

The information collection requirements contained in this notice have been approved by the Office of Management and Budget (OMB) under section 3504(h) of the Paperwork Reduction Act of 1980 (44 U.S.C. 3501–3520), and assigned OMB control number 2535–0084.

I. Purpose and Substantive Information

A. Authority

This competition is authorized under section 107(b)(5) of the Housing and Community Development Act of 1974 (42 U.S.C. 5301–5320) (the ACT). Program requirements (including eligible activities) applicable to awards made under this competition are contained in HUD regulations at 24 CFR 570.400 and 570.402, governing the Community Development Technical Assistance Program.

Note: Section 570.402 of the regulation was revised on August 26, 1991, 56 FR 41936–41940. All references in this NOFA to § 570.402 are to that section, as revised.

Any proposed technical assistance activities must meet the eligibility requirements established in the regulations and as limited by this NOFA.

For purposes of this NOFA:

The term "colonia" means any identifiable community that—

(1) Is in the State of California, New Mexico, or Texas;

(2) Is located within 150 miles of the United States-Mexico Border and if in a standard metropolitan statistical area, the population of the standard metropolitan statistical area cannot exceed 1,000,000 residents.

(3) Is designated as a colonia by the State or county in which it is located;

(4) Is determined to be a colonia on the basis of objective criteria, including lack of a potable water supply, lack of adequate sewage systems, and lack of decent, safe and sanitary housing; and

(5) Was in existence and generally recognized as a colonia before the date of enactment of the National Affordable Housing Act of 1990. [November 28, 1990]

This definition is substantially the same as the definition set forth in section 916(d) of the Cranston-Gonzalez National Affordable Housing Act (42 U.S.C. 5308 note).

The term "Enterprise Zone" means any area designated as such under state law or under the federal Enterprise Zones statute (if enacted).

B. Allocation Amount and Form of Award

This NOFA announces the availability of $2.3 million in Technical Assistance Program cooperative agreements to provide for coordinated and strategic

economic and community development and for affordable housing within "colonias" as defined in Section I.A. of this NOFA. HUD reserves the right to increase the amount of funds for the competitions held under this NOFA by up to $1 million per competition, should additional funds for the purpose of section 107(b)(5) of the Act become available before the time of award. These funds are to be awarded competitively in accordance with the following:

(1) For the $1.5 million competition, HUD will make available a minimum of $1.5 million for the purpose of empowering colonia residents through use of CDBG program and Section 916 funds to improve living conditions and standards within a designated colonia.

Subject to the receipt of qualifying applications, cooperative agreements in amounts up to $200,000 each, will be awarded to States, units of general local government and non-profit and for-profit organizations as specified in Section I.D. "Eligible Applicants".

This competition will be referred to in this document as the "$1.5 million competition".

(2) A minimum of $800,000 in Technical Assistance Program cooperative agreements will be made available for the purpose of coordinating CDBG and Section 916 funds with other Federal, State and local program resources and making services available for colonia residents in local "one-stop" service centers. The service centers would use local public or private facilities or mobile facilities to provide colonia residents with a variety of social and informational services convenient for their use.

Subject to the receipt of qualifying applications, one or more cooperative agreements will be awarded to states with a CDBG set-aside under section 916 of the National Affordable Housing Act of 1990 for colonias; and/or to non-profit and for-profit organizations qualified to provide technical assistance services to CDBG communities.

For this $800,000 competition, awards will be made in accordance with the following schedule:

Applicants may apply for funds to coordinate the delivery of CDBG funded programs and services made available to a colonia with other federal, state and local resources. Applicants who wish to coordinate services to colonias on a statewide basis may apply for a cooperative agreement in an amount up to $100,000 each for the state of California and up to $350,000 each for the states of New Mexico and Texas.

Applicants may apply for up to $800,000 in technical assistance program funds to provide coordinated delivery of services to colonias within all three states identified as eligible for assistance under this NOFA.

Section 107(b)(5) of the Act authorizes HUD to award funds for the purpose of providing technical assistance in planning and carrying out CDBG programs under Title I of the Act. Under each of these competitions, HUD will fund the applicants who best meet the criteria for the selection identified in this NOFA under the Factors For Award. HUD reserves the right to negotiate the final award amount and Statement of Work with all applicants. If HUD determines a smaller cooperative agreement amount than that requested would be appropriate to the proposed activities, HUD may reduce the amount of funding for an applicant. If HUD receives an insufficient number of applications in a given competition, or if funds remain after all acceptable applications have been funded, HUD may negotiate increased amounts of cooperative agreement awards with applicants selected for funding within any or each competition category in the NOFA.

C. Description of Technical Assistance Competition

The colonias along the U.S.-Mexico border are located in rural counties ranking among the poorest in the nation. These communities have existed since the 1960s, but conditions have become critical as the populations along the border area have continued to increase. It is estimated that as many as 200,000 people live in the four-county area of the Rio Grande Valley, and it is projected that by the year 2000, the population will increase to one-half million. In 1980, the thirty-county border region held an estimated 1.4 million people. By 1984, the growth of the population had reached 1.6 million, and estimates for the year 2000 call for a population in the region of 2.4 million. In many of the colonias throughout the border area, residents are predominantly hispanic, with incomes below the poverty level and there are no, or limited, economic development opportunities or job prospects for area residents. Four out of the five counties in the nation with the lowest per capita income are in this border region.

Aside from the high poverty rate, other factors continue to contribute to the problems facing colonia residents in the border region. These factors include: Unincorporated illegal subdivisions which inhibit or prevent the delivery of basic water and sewer services to many of these areas; a lack of natural resources and drought conditions; lack of adequate roads or drainage systems; lack of affordable housing; and a high birth rate and poor health care services. In many instances, these areas have "fallen through the cracks" because of a lack of common definition among federal, state and local programs, leaving these areas without a source of funds to provide decent affordable housing, potable water supplies and sewage systems, and economic development opportunities to improve income levels while providing stable long-term employment opportunities to residents of colonias throughout the region.

The Congress, by enacting section 916 of the National Affordable Housing Act of 1990, recognized the special needs of colonia residents and established a set-aside of Community Development Block Grant funds to address the community and economic development needs of residents of these areas.

Activities to be funded with CDBG funds included planning for water, sewer and housing activities, and payments for any charges levied against properties owned and occupied by low- and moderate-income persons to cover the cost of the public improvement—such as hook-up services. While Congress included the state of Arizona under the provisions of section 916, the State of Arizona has indicated to HUD that it has no colonias and has requested exemption for the provisions of section 916. HUD has honored the state's request and therefore has limited eligibility for this competition to the states of California, New Mexico and Texas.

The objectives of this technical assistance program are to:

(1) Produce improved living standards for the residents of colonias in the States of California, New Mexico and Texas through development of programs for decent, affordable, energy efficient housing; job training and self-employment for colonia residents and youth; local economic development programs and projects; community water, sewer and systems, including drainage systems and hook-up services; and energy systems for colonia residents. (The $1.5 million competition.)

(2) Assistance to create local service centers within colonias, either using existing or new local facilities, or to create mobile service centers for coordinated delivery of state, federal and local programs to residents of colonias. Activities may also include the implementation or design of mechanisms to facilitate or finance public works activities, including transportation, parks, hospital and

health care facilities or schools. (The $800,000 competition.)

D. Eligible Applicants

For the $1.5 million competition:

(1) Units of general local government eligible for CDBG funds under the Entitlement Program (24 CFR part 570, subpart D) which contain colonias as defined in this NOFA;

(2) Units of general local government receiving funds, or eligible to receive funds, under the State-administered Program for Non-entitlement Communities (24 CFR part 570, subpart I) in states with colonias as defined in this NOFA;

(3) The states of California, New Mexico and Texas, with a set-aside of funds under section 916 of the National Affordable Housing Act of 1990 for colonias; and

(4) Non-profit (including resident management councils and resident management corporations) and for-profit organizations qualified to provide services to the CDBG entities identified in paragraphs (1)–(3) above in the form of technical assistance in planning, developing or administering their CDBG/Title I-funded programs.

For the $800,000 competition:

(1) The states of California, New Mexico and Texas with a CDBG set-aside under section 916 of the National Affordable Housing Act of 1990 for colonias; and

(2) Non-profit and for-profit organizations qualified to provide technical assistance services to states, areas within states and CDBG communities in the Southwest Border region with areas designated as colonias as defined by this NOFA.

E. Program Requirements

This program is funded under the technical assistance program of section 107(b)(5) of title I of the Housing and Community Development Act of 1974. Technical assistance funds must be used for the provision of skills and knowledge to improve effectiveness in planning, developing and administering CDBG-assisted activities. Technical assistance activities funded under these competitions must be directed at implementation of programs for community and economic development or housing, or both, and coordination of services which are being, or are planned to be carried out (in whole or in part) with CDBG program funding provided by states or units of local government participating in the CDBG Entitlement Program or the State-administered Program for Non-Entitlement Communities. Applicants must establish a CDBG nexus between activities they propose to undertake in response to this NOFA and activities funded with CDBG funds that the technical assistance is proposed to assist.

(1) CDBG Nexus Eligibility Criterion for Entitlement Communities

A "CDBG nexus" exists if the technical assistance activities proposed by the applicant for funding through this NOFA are to be used by the awardee to develop, coordinate or implement specific community and economic development or housing programs, or both, or to coordinate services which are being, or are planned to be carried out, in whole or in part, with an entitlement city's or urban county's CDBG program funds, or with funds made available to an entitlement jurisdiction under the state's section 916 set-aside for colonias.

Proof of nexus shall consist of a statement signed by the Chief Executive Officer of the CDBG-funded community, or the Director of the agency administering the CDBG program funds, that identifies:

(a) The amount of CDBG program/Section 916 funds committed, or planned to be committed, to the activities for which the technical assistance is provided;

(b) The planned date the CDBG/Section 916-funded activities will commence and, where an amendment or other action is needed to carry out the funded activities, a statement of intent to effect the needed amendment or other action;

(c) The specific activities to be undertaken with the CDBG/Section 916 assistance;

(d) The location of the colonia or colonias to be assisted; and

(e) The relationship between the CDBG/Section 916 activities and the proposed strategic development and coordinated service technical assistance activities.

(2) CDBG Nexus for State Applicants

State applicants must establish a nexus between the technical assistance funded under this competition and the activities to be assisted in whole or in part with funds provided to units of general local government under the state's CDBG program or under the provisions of section 916 of the National Affordable Housing Act of 1990. A nexus exists where the technical assistance activities are directed to the development, planning, administration or implementation of specific CDBG/Section 916-assisted activities to improve the living standards for colonia residents.

Proof of nexus shall consist of a statement signed by the Director of the State-Administered CDBG Program for Non-Entitlement Communities, certifying that the technical assistance will be made available only in units of general local government which:

(a) Are undertaking, or have been approved to undertake, community, economic or housing development programs; or to coordinate service delivery activities within colonias with CDBG program/Section 916 funds;

(b) Are not currently using their CDBG funds to undertake programs or coordinate service delivery activities within colonias, but the state will grant a program amendment to permit such activities;

(c) Will be given a funding priority or a commitment of CDBG program/Section 916 funds for community, economic development, or housing programs, or for coordinating the delivery of services within colonias, in the state's next non-entitlement program or Section 916 set-aside funding round.

(d) Plan to submit an application for funding under Section 916 of the state's CDBG colonias set-aside.

The statement must also certify that where technical assistance is provided by the state with funds made available under this competition, the activities will be in addition to, or an enhancement of, the state's existing obligation to provide technical assistance to non-entitlement communities under the CDBG program, pursuant to the state's certification made in accordance with section 106(d)(2)(C)(ii) of the Housing and Community Development Act of 1974.

(3) CDBG Nexus for Non-Entitlement Community Applicants

A non-entitlement community must commit funds from a CDBG grant it currently is administering. If the community's current CDBG program grant does not authorize community, economic development or housing programs or coordinated service activities for colonias, the statement of CDBG funding commitment must be conditioned on receiving an amendment to the community's CDBG program to permit such activities. In this situation, the statement of the non-entitlement community must include a statement of intention to amend its CDBG program to permit such activities for the colonias in accordance with applicable state requirements.

If the non-entitlement community is proposing to effect a CDBG program amendment to permit community development, economic development,

housing or coordinated service activities for a colonia, the applicant must obtain a letter from the state indicating that the state will review and consider the amendment. The letter must be included with the application.

The CDBG nexus for non-entitlement community applicants may also be met if the unit of general local government applying for funds under this NOFA certifies that it will submit an application for CDBG funding under the State-Administered Program for Non-entitlement Communities or for Section 916 funding under the state's colonias set-aside.

(4) CDBG Nexus for Non-Profit and For-Profit Organizations

A CDBG nexus exists if the technical assistance activities proposed by the applicant for funding under this NOFA are to be used by states, entitlement communities or non-entitlement communities to plan, develop or administer programs funded under the Community Development Block Grant Program, or the CDBG set-aside for colonias established under Section 916 of the National Affordable Housing Act of 1990, or to prepare applications for assistance under the CDBG program or section 916. The submission requirements to indicate proof of CDBG nexus flow from the type of applicant to whom assistance is given, as follows:

(1) If a non-profit or for-profit organization is to provide technical assistance services to an entitlement community, the non-profit or for-profit organization must meet the proof of nexus requirements for entitlement communities (see item E.(1), above).

(2) If a state is to be provided with technical assistance services, the proof of nexus submission must meet the requirements for state applicants as described in item E.(2), above.

(3) If technical assistance services are to be provided to non-entitlement communities, the non-profit or for-profit organization must meet the proof of nexus requirements for non-entitlement communities as described in item E.(3), above.

Applicants that will be providing technical assistance services on a multi-state basis must receive proof of nexus from each state receiving assistance.

(5) Designation of Non-Profit and For-Profit Organizations as Technical Assistance Providers

A non-profit or for-profit applicant proposing to provide technical assistance to a community or to a state, or to an agency of the state, must obtain a letter from the state (or states, if proposing to provide assistance in all three states) or local governments, designating the non-profit or for-profit organization as a technical assistance provider. The letter must state specifically that the applicant is "designated" as a technical assistance provider to the state or local government (as appropriate) for the purposes of providing assistance to colonia residents to improve their economic and living environment. The letter of designation must be signed by the chief executive officer of the state or unit of general local government to receive the technical assistance services or by his or her authorized representative.

Designation letters should be clearly marked with the Request for Cooperative Agreement Application (RFCAA) number and the name of the applicant. (Failure to include the RFCAA number and the name of the applicant may result in the letter being misfiled or lost through no fault of the Department. This could prevent the applicant from receiving a cooperative agreement.)

(6) Language Proficiency and Experience in Providing Community and Economic Development Assistance in the Southwest Border Region

All applicants will be expected to demonstrate:

(a) Staff proficiency in the Spanish language, particularly dialects that may be prevalent in the colonias proposed to receive assistance under this competition;

(b) Familiarity with the customs and life styles of residents in communities designated as colonias and selected to receive technical assistance services;

(c) Familiarity and expert knowledge about the history and development of colonias in the states identified as eligible for the CDBG set-aside established in section 916 of the National Affordable Housing Act of 1990;

(d) Familiarity with subdivision development requirements, including platting requirements and issues, which have an impact upon the provision of water, sewer and other services to colonia residents, and expert knowledge concerning issue resolution; and

(e) Experience in providing technical assistance services to communities within the southwest border region, particularly communities designated as, or adjacent to, colonias.

(7) Requirements for CDBG Program Amendments

If a non-entitlement CDBG community in which the technical assistance is to be provided has a CDBG program for which assistance to colonias activities are not authorized, the required statement of CDBG funding commitment (described in the above section I.E., Program Requirements, of this NOFA) must be conditioned on an amendment of the CDBG program to permit these activities. The statement must include a statement of intent to effect the amendment in accordance with state CDBG program requirements and procedures.

In the case of a community funded under the State-administered CDBG program, HUD must also receive with the application a letter from the state indicating that the state will review and consider the amendment. Failure to receive this letter (if applicable) with the application will disqualify the applicant from further funding consideration.

F. Eligible Activities

Eligible technical assistance activities are specified in 24 CFR 570.402(d). The technical assistance must be for the provision of skills and knowledge to facilitate the planning, development and administration of CDBG-funded activities aimed at improving the living standards of colonias residents and coordinating resources with other federal, state or local program resources. Examples of activities applicants can undertake under each competition are identified below.

Activities Under the $1.5 Million Competition

Activities undertaken are to provide technical assistance services to implement a variety of community and economic development programs, projects or activities that would improve the living environment of colonias residents. Eligible technical assistance activities are specified in 24 CFR 570.402. Examples of the broad array of eligible activities are:

(1) For Economic Development Programs, Projects or Activities

- Identifying specific sites or locations in colonias to be targeted for economic development programs, projects or activities, including business development activities;
- Establishing public-service partnerships to finance economic and business development in colonias;
- Identifying sources of capital and securing startup and operating financing for new resident-owned micro and small businesses in colonias;
- Preparing cost estimates, feasibility studies, market analysis, or estimates of infrastructure requirements or other elements necessary to obtain economic and business development financing;

• Identifying and securing builders/developers to undertake the proposed economic or business development program, project or activity;

• Developing training programs to permit residents to colonias to obtain jobs resulting from the proposed economic or business development activities;

• Creating self-employment programs which include training and mentor programs for colonias residents participating in self-employment programs;

• Identifying financial intermediaries committed to economic development in colonias, and securing non-federal development capital for proposed economic development programs, projects or activities;

• Promoting private sector-funded incubators for micro and small business development within colonias;

• Identifying job opportunities for colonia residents with established companies and providing job training to meet the job skills required;

• Creating self-employment programs for colonia residents, including programs for youth entrepreneurs;

• Training residents to become economically self-sufficient by obtaining skills to become home construction workers, plumbers, electricians, carpenters, painters, etc.

(2) For Community Development Programs, Projects or Activities

• Addressing platting issues and requirements to remove impediments and barriers that prohibit implementing community and economic development activities, and creating affordable housing;

• Identifying colonias, or areas within colonias, where CDBG economic development activities would occur, and where creation of a state or federal (if applicable) Enterprise Zone would improve or assist the implementation of the CDBG-funded economic development activities;

• Creating Community Development Corporations to sponsor and undertake a variety of community development activities within a colonia;

• Developing plans and financing for public facilities such as community centers, meeting rooms, or recreation facilities within a colonia;

• Developing strategic plans to manage growth and development within a colonia;

• Providing for citizen participation to allow residents greater access and participation in developing and implementing community development programs, projects or activities;

• Devising financing systems to provide small water districts with the funds necessary to cover upfront costs for engineering, construction, operation and maintenance of community sewer, water, and energy systems;

• Developing mechanisms that permit colonia residents to pay for initiation of water and sewer services through installment payments, rather than a single up-front payment;

• Planning and designing residential and commercial streets and street lighting;

• Identifying models that can be used by colonia residents for the development of sewer and water systems, drainage systems, and street and road construction/maintenance;

• Streamlining government agency operations to create greater efficiency in the planning and use of funds for community and economic development in colonias;

• Providing technical assistance to community groups, organizations and residents in colonias to prepare applications for CDBG funds;

• Providing training to colonias residents to overcome language barriers that may inhibit residents from understanding and competing for funds made available under the CDBG program for colonias;

• Researching and clearing title to properties to permit construction of community and economic development or housing projects, or both, or related programs or activities.

• Providing technical assistance services to permit illegal subdivisions to be improved to meet state and local regulatory requirements, including meeting platting requirements so that building permits for CDBG/Section 916-funded community and economic development and/or housing projects, programs or activities can be legally issued.

(3) For Housing Programs, Projects or Activities

• Improving the administration of CDBG-funded HOME and HOPE 3 programs in colonias;

• Creating self-help housing programs in colonias as a means of providing more affordable, energy efficient housing for colonias residents;

• Establishing financing programs to enable colonia residents to own their own homes at an affordable price;

• Training colonia residents in new home construction techniques and rehabilitation methods for existing units, including energy efficient designs and renovations;

• Training colonia residents to become residential home builders, through on-the-job training and involvement in building and rehabilitation of housing within their colonias;

• Preparing documents necessary to obtain financing for construction and rehabilitation of low- and moderate-income housing in colonias;

• Identifying sites or areas suitable for prefab or mobile home manufacturers to locate within, and supply affordable housing to, colonia residents;

• Streamlining or eliminating government regulations to make housing more affordable to colonia residents;

• Creating homeownership opportunities for colonia residents through initiation of self-help housing construction programs and other residential ownership options;

• Training colonia residents in energy efficient construction and retrofit techniques and energy efficient use within the residences.

Activities Under the $800,000 Competition

• Activities undertaken by states and nonprofit and for-profit organizations qualified to provide technical assistance services are to provide technical assistance services to CDBG communities to coordinate federal, state and local resources for colonia residents and make services available to colonia residents in convenient "one-stop" centers. Eligible technical assistance activities are specified in 24 CFR 570.402. Examples of the broad array of eligible activities are:

• Identifying federal, state and local government regulations, whose elimination (even temporarily) would remove impediments to creating or expanding CDBG funded businesses, water and sewer systems, energy systems or housing; and preparing appropriate waiver requests to eliminate or ameliorate such restrictions;

• Identifying government-required fees, permits, or licensing charges whose elimination (even temporarily) would remove impediments to the creation or expansion of CDBG/Section 916-funded business opportunities, necessary infrastructure, or affordable housing in colonias in the southwest border region;

• Providing technical experts who would serve as "circuit riders" to colonias and who would provide technical assistance in the fields of engineering, finance, or other specialty areas for the planning and development of local water and sewer systems, housing projects, or business and commercial development in colonias;

- Addressing and resolving platting issues which would otherwise prevent the development or delivery of water or sewer services to colonia residents;
- Identifying sites in colonias that would serve as service centers where residents could conveniently seek available assistance from federal, state or local government and private sector agencies or organizations;
- Coordinating with local and state governments to target the selection of colonias to ensure a coordinated development agenda;
- Assisting communities in preparing applications for CDBG program funding, including funding under the Section 916 set-aside;
- Assisting communities in modifying their CHAS to include colonia developments.

II. Factors for Award

A. Rating Factors

HUD will use the following criteria to rate and rank applications received in response to this NOFA. The factors and maximum points for each competition are provided below. The total number of points for each competition is 100. Program policy criteria as identified in 24 CFR 570.402(f)(1)(ii) will not be used in reviewing and selecting applications for funding under the $1.5 million competition. Applications for the $800,000 competition will be rated and ranked in order by score by a HUD evaluation panel, after which the panel will apply the program policy criteria for geographic distribution, as identified in 24 CFR 570.402(f)(1)(ii)(A), in selecting applications for funding.

For the $1.5 Million Competition

(1) (30 points) The probable effectiveness of the application in meeting the needs of colonias and accomplishing program objectives. In rating this factor, HUD will consider:

(a) (12 of 30 points) The extent to which the applicant demonstrates an understanding of the problems facing colonia residents, as evidenced by the description of needs, rationale for, and feasibility of, the proposed statement of work; and the persuasiveness of the applicant's arguments.

(b) (10 of 30 points) The extent to which the applicant has an understanding of platting issues and problems which result from illegal subdivisions which impact CDBG/Section 916 activities, as evidenced by the rationale for, and the feasibility of, the proposed program of action to overcome the identified problems.

(c) (8 of 30 points) The extent to which the Statement of Work provided by the applicant demonstrates that activities are targeted to specific colonias and meet the CDBG nexus requirements as described in Section I, item E.

(2) (16 points) The soundness and cost-effectiveness of the proposed approach. In rating this factor, HUD will consider:

(a) (10 of 16 points) The demonstrated capability of the applicant to implement the proposed program of activities, as evidenced by the applicant's recent, relevant and successful experience in overcoming regulatory, statutory or administrative barriers that prohibit or inhibit the effective and coordinated delivery of services to low- and moderate-income residents.

(b) (6 of 16 points) The extent to which the proposed program of technical assistance services establishes realistic goals for the activities being undertaken, as described in the Statement of Work and supported by the applicant's discussion of how goals will be obtained.

(3) (48 points) The capability of the applicant to carry out the proposed activities in a timely and effective fashion. In rating this factor, HUD will consider:

(a) (5 of 48 points) The extent to which the applicant's organization and staff have recent, relevant and successful experience in providing community, economic development or housing development assistance in the southwest border area, and specifically have provided one or more of these forms of assistance to colonias in the region.

(b) (8 of 48 points) The applicant's knowledge of state and local laws relating to platting and subdivision issues and relevant, recent and successful experience in resolving issues which prevent or inhibit the delivery of programs and services to colonia residents.

(c) (27 of 48 points) The extent to which the applicant's staff has experience and expert knowledge in the following areas:

(i) (7 of 27 points) The extent to which the applicant organization and majority of the staff can demonstrate recent, relevant and successful experience in developing and implementing CDBG program activities in the areas of assistance proposed for funding in the applicant's Statement of Work.

(ii) (7 of 27 points) The extent to which the applicant's staff can demonstrate recent, relevant and successful experience in gaining the support and participation of low-income residents in the type of activities proposed in the Statement of Work.

(iii) (7 of 27 points) The extent to which the applicant's staff has conversational and written skills in the Spanish language, particularly Spanish as spoken in communities along the U.S.-Mexico border.

(iv) (6 of 27 points) The extent to which the applicant's organization and staff have recent, relevant and successful experience in securing private sector participation, and the participation of other federal, state and local entities in the development and implementation of community and economic development and housing activities.

(d) (8 of 48 points) The extent to which the proposed project management plan and budget-by-task presents a clear and feasible schedule for conducting program activities or tasks on time and within budget; provides for a reasonable allocation of program staff by skill and position for undertaking the work activities proposed; and provides appropriate procedures for coordinating activities among key parties during the term of the project.

(4) (6 points) The extent to which the results may be transferable or applicable to other CDBG program participants. In judging this factor, HUD will consider:

(a) (3 of 6 points) The extent to which proposed activities are likely to increase the capability of residents within colonias to apply for CDBG program funds made available under Section 916 of the National Affordable Housing Act of 1990 and successfully to implement CDBG-funded programs, projects or activities.

(b) (3 of 6 points) The extent to which the proposed activities are likely to increase the self-sufficiency of colonia residents, and the extent to which techniques applied could be transferred to other colonias in the region.

For the $800,000 Competition

(1) (28 points) The probable effectiveness of the application in meeting the needs of localities and accomplishing program objectives. In rating this factor, HUD will consider:

(a) (10 of 28 points) The extent to which the applicant demonstrates an understanding of the problems facing colonia residents, as evidenced by the rationale for, and feasibility of, the applicant's work program of activities for coordinating the delivery of available services and programs from federal, state and local sources—particularly CDBG funded activities.

(b) (11 of 28 points) The extent to which the proposed activities are likely to result in the creation and placement

of "one-stop" service centers within colonia, and are likely to provide coordinated delivery of CDBG program services with other services available from federal, state or local sources to colonia residents, as evidenced by the applicant's basis for establishing the goals and work activities in the Statement of Work.

(c) (7 of 28 points) The extent to which the applicant's Statement of Work demonstrates that proposed activities meet the CDBG nexus requirements as specified in Section I, item E.

(2) (36 points) The soundness and cost-effectiveness of the proposed approach. In rating this factor, HUD will consider:

(a) (12 of 36 points) The extent to which the applicant's staff has recent, relevant and successful experience in working with state and local governments (particularly state and local governments which are proposed to receive assistance in the Statement of Work) on CDBG-funded projects, programs or activities, and the justification provided by the applicant for the relevancy of the experience to activities proposed in the Statement of Work.

(b) (12 of 36 points) The extent to which the applicant's staff has relevant, recent and successful hands-on experience in resolving platting and subdivision issues which prevent or inhibit the delivery of services to colonia residents, particularly issues involving illegal subdivisions, platting and subdivision recording requirements, and state and local laws which have impact on the successful achievement of CDBG funded community and economic development and housing programs.

(c) (12 of 36 point) The extent to which the applicant can demonstrate that it has a commitment to form an effective partnership of federal agency, state and local officials to establish a coordinated resource-delivery system on a statewide or region-wide basis (as determined by the geographic coverage called for in the Statement of Work.)

(3) (31 points) The capability of the applicant to carry out the proposed activities in a timely and effective fashion. In rating this factor, HUD will consider:

(a) (8 of 31 points) The extent to which the applicant's staff has demonstrated conversational and written skills in the Spanish language, particularly Spanish as spoken in communities along the United States-Mexico border.

(b) (8 of 31 points) The demonstrated expert knowledge of the project manager and key staff in managing in-house staff, subcontractors and consultants to develop and implement economic and community development and housing programs, projects or activities, as evidenced by recent, relevant and successful experience.

(d) (15 of 31 points) The extent to which the project management plan delineates staff responsibilities by major task and sub-task; provides for a feasible schedule for completing tasks and meeting goals on time and within budget; and provides a reasonable allocation of staff by skill and position for the activities to be performed within the time proposed.

(4) (5 points) The extent to which the results may be transferable or applicable to other CDBG program participants, as determined by the extent to which the applicant's method for coordinating the delivery of federal, state and local resources is likely to be adopted successfully on a statewide or region-wide basis.

B. Selection Process

(1) The Statement of Work proposed by each applicant will be evaluated competitively within each competition, and rated using the factors for award specified in Section II A. After assigning points based upon the rating factors, a HUD evaluation panel will rank the applications in order by score. For the $1.5 million competition, HUD will fund all applications in rank order by score until all available funds have been expended. For the $800,000 competition, the HUD evaluation panel will rate and rank applications in order by score, after which the panel will apply the program policy criteria for geographic distribution as identified in 24 CFR 570.402(f)(1)(ii)(A) in selecting applications for funding.

(2) Applications will receive funding consideration provided they meet the CDBG nexus eligibility requirements and other program requirements specified in Section I.E., and receive rating scores that meet the following requirements:

For the $1.5 Million Competition

Application must receive a minimum score of 60 points for all rating factors. In addition, applicants must receive a minimum score of 5 rating points for factors 1(c), and 7 rating points for factor 1(b).

For the $800,000 Competition

Applicants must receive a minimum score of 60 points for all rating factors. In addition, applicants must receive a minimum score of 5 points for rating factor 1(c), minimum of 8 rating points under factor 2(b), and a minimum of 6 rating points under factor 3(a).

Applicants that do not meet these requirements will not be funded, even if adequate funds are available.

(3) HUD reserves the rights to fund all or a portion of the proposed activities identified in an application; to determine an appropriate amount of funds for the activities; or to reduce the amount of funding based upon the appropriateness of the proposed activities.

For the $800,000 competition, HUD reserves the right to reduce the amount of funding for geographic coverage should HUD elect to fund one or more applications that provide services on a region-wide basis; or to fund one or more applications that provide services on a statewide basis.

(4) If two or more applications have the same number of points and there are not sufficient funds to fund both, HUD will make a determination as follows:

For the $1.5 Million Competition

The application with the most points for factor (3) will be selected. If there is still a tie, the application with the most points for factor (1) will be selected.

For the $800,000 Competition

The application with the most points for factor (2) will be selected. If there is still a tie, the application with the most points for factor (3) will be selected.

(5) If the amount of funds remaining after funding as many of the highest ranking applications as possible is insufficient for the next highest ranking application, HUD will determine (based upon the proposed activities) the feasibility of funding part of the application and offering a smaller award amount to the applicant. If HUD determines that, given the proposed activities, a smaller award amount would make the activities infeasible, or if the applicant turns down the reduced award amount, HUD will make the same determination for the next highest ranking application until all applications within the funding range have been exhausted or available funds have been expended.

(6) If HUD receives an insufficient number of applications to expend all funds in a given category, or all funds set aside for this NOFA; or if funds remain after HUD approves all acceptable applications; or if more funds become available HUD may move funds from one category to another, or HUD may negotiate increased award amounts with applicants approved for funding.

(7) After all applications have been rated and ranked and awardees have been selected, funds available for this competition that are not used may be

made available for other technical assistance competitions.

C. Conditional Award Approvals

Before receiving an award, an applicant must:

(1) Provide proof of nexus that shall consist of a statement from the Director of the CDBG agency of each State or local government where technical assistance services will be provided. Each proof of nexus shall meet the nexus requirements specified in section I, item E to the satisfaction of HUD.

(2) Meet the requirements for designation as a technical assistance provider, to the satisfaction of HUD, as specified in section I., item E., if the applicant is a non-profit or for-profit organization.

(3) Meet the CDBG program amendment requirement if a local government is not currently authorized to undertake activities to benefit colonias. If such limitations exist, a conditional award may be made. The award will be subject to HUD's receiving, from the chief executive officer of the community, a certification that the program has been amended to permit the assistance to colonias as specified in this NOFA and for which the CDBG funding commitment was made. The program amendment must have received all required approvals by the state.

HUD must receive this certification no later than four months following notification of the conditional award, or the award will be withdrawn or the funding amount reduced.

If an applicant fails to meet these requirements in a manner satisfactory to HUD, HUD may offer a cooperative agreement to the next highest ranking applicant. If an alternative applicant fails to provide the required documents, HUD will make an offer to the next highest ranking applicant. An applicant offered a cooperative agreement will be expected to submit any required documents within 45 days of written notice of an offer of an award. Failure to comply within the 45-day period will disqualify the applicant from further funding consideration.

III. Application Submission Process

A. Obtaining Applications

For an application kit, contact the Processing and Control Branch, Office of Community Planning and Development, Department of Housing and Urban Development, 451 Seventh Street, SW., room 7253, Washington, DC 20410. Requests for application kits must be in writing, but the request may be faxed to (202) 708–3363. (This is not a toll-free number.) Please refer to "FR–3314", and provide the applicant's name, address (including zip code) and telephone number (including area code).

B. Submitting Applications and Deadline Date

Applications for funding under this NOFA must be complete and must be physically received in the place designated in the application kit for receipt, by the deadline date and time specified in the application kit. The application deadline in the application kit is firm as to date and hour. In the interest of fairness to all competing applicants, the Department will treat as ineligible for consideration any application that is received after the deadline. Applicants should take this practice into account and make early submission of their materials to avoid any risk of loss of eligibility brought about by unanticipated delays or other delivery-related problems.

IV. Checklist of Application Submission Requirements

A. Application Content

Applicants must complete and submit applications in accordance with instructions contained in the application kit.

The following is a checklist of the application contents that will be specified in the RFCAA:

(1) Transmittal letter;

(2) OMB Standard Forms 424 (Request for Federal Assistance) and 424B (Non-Construction Assurances);

(3) Statement of Work, including Budget-By-Task (Form HUD 40079) and Project Management System Baseline Plan (HUD 441.1 and accompanying narrative);

(4) Narrative statement addressing the factors for award;

(5) Organization plan;

(6) Letter of CDBG Commitment of Funds signed by the chief executive officer of the CDBG recipient community or the Director of the CDBG program (May be submitted later after selection.);

(7) Letter from chief executive officer of the community designating the technical assistance provider, where appropriate (May be submitted later after selection);

(8) Letter from the state indicating its willingness to review and consider an amendment to the community's CDBG program that would permit activities to assist colonias as set forth in the application, where appropriate. (May be submitted later after selection.)

B. Certifications and Exhibits

Applications must also include the following:

(1) Drug-Free Workplace Certification;

(2) Certification prohibiting excessive force against nonviolent civil rights demonstrators, pursuant to 42 U.S.C. 5304 (applies only to applicants that are units of general local government);

(3) Certification on HUD Form 2880 disclosing receipt of at least $200,000 in covered assistance during the fiscal year, pursuant to 24 CFR part 12, subpart C.

V. Corrections to Deficient Applications

After the submission deadline date, HUD will screen each application to determine whether it is complete. If an application lacks certain technical items or contains a technical error, such as an incorrect signatory, HUD will notify the applicant in writing that it has 14 calendar days from the date of HUD's written notification to cure the technical deficiency. If the applicant fails to submit the missing material within the 14-day cure period, HUD will disqualify the application.

This 14-day cure period applies only to non-substantive deficiencies or errors. Deficiencies capable of cure will involve only items not necessary for HUD to assess the merits of an application against the factors specified in this NOFA.

VI. Other Matters

A. Environmental Review

In accordance with 40 CFR 1508.4 of the regulations of the Council on Environmental Quality and 24 CFR 50.20(b) of the HUD regulations, the policies and procedures in this document relate only to the provision of technical assistance and therefore are categorically excluded from the requirements of the National Environmental Policy Act.

B. Federalism Impact

The General Counsel, as the Designated Official under section 6(a) of Executive Order 12612, Federalism, has determined that the policies and procedures contained in this notice will not have substantial direct effects on states or their political subdivisions, or the relationship between the federal government and the states, or on the distribution of power and responsibilities among the various levels of government. As a result, the notice is not subject to review under the Order. Specifically, the notice solicits participation in an effort to provide technical assistance that would promote

community and economic development, provide job training and self-employment opportunities, increase the supply of decent and affordable housing, and provide community water, sewer and energy systems for colonias in states designated in Section 916 of the National Affordable Housing Act of 1990 to receive CDBG funding set-asides, and provide for coordinated delivery of resources available to colonias from federal, state, local and private section sources. The notice does not impinge upon the relationships between the federal government and state or local governments.

C. Impact on the Family

The General Counsel, as the Designated Official under Executive Order 12606, The Family, has determined that this notice will likely have a beneficial impact on family formation, maintenance, and general well-being. The technical assistance to be provided by the funding under this NOFA is expected to help colonia residents to become self-sufficient by improving living conditions and standards. Since the impact on the family is beneficial, no further review is considered necessary.

D. Documentation and Public Access Requirements

Applicant/Recipient Disclosures; HUD Reform Act Responsibilities—Documentation and Public Access.

Pursuant to section 102 of the Department of Housing and Urban Development Reform Act of 1989 (42 U.S.C. 3537a) (Reform Act), HUD will ensure that documentation and other information pertaining to each application submitted under this NOFA are sufficient to indicate the basis upon which assistance was provided or denied. This material, including any letters of support, will be made available for public inspection for a five-year period beginning not less than 30 days after the award of the assistance. Material will be made available in accordance with the Freedom of Information Act (5 U.S.C. 552) and HUD's implementing regulations at 24 CFR part 15. In addition, HUD will include the recipients of assistance under this NOFA in a quarterly **Federal Register** notice of all recipients of HUD assistance awarded on a competitive basis. (See 24 CFR 12.14(a) and 12.16(b), and the notice published in the **Federal Register** on January 16, 1992 (57 FR 1942), for further information on these requirements.)

HUD responsibilities—disclosures. HUD will make available to the public for five years all applicant disclosure reports (HUD Form 2880) submitted in connection with this NOFA. Update reports (also Form 2880) will be made available, along with the applicant disclosure reports, but in no case for a period generally less than five years. All reports—both applicant disclosures and updates—will be made available in accordance with the Freedom of Information Act (5 U.S.C. 552) and HUD's implementing regulations at 24 CFR part 15. (See 24 CFR part 12, subpart C, and the notice published in the **Federal Register** on January 16, 1992 (57 FR 1942), for further information on these disclosure requirements.)

State and unit of general local government responsibilities—disclosures. States and units of general local government receiving assistance under this NOFA must make all applicant disclosure reports available to the public for three years. Required update reports must be made available along with the applicant disclosure reports, but in no case for a period less than three years. Each state and unit of general local government may use HUD Form 2880 to collect the disclosures, or may develop its own form. (See 24 CFR part 12, subpart C, and the notice published in the **Federal Register** on January 16, 1992 (57 FR 1942) for further information on these disclosure requirements.)

E. Prohibition Against Advance Information on Funding Decisions

HUD's regulation implementing section 103 of the HUD Reform Act was published on May 13, 1991 (56 FR 22088) and became effective on June 12, 1991. That regulation, codified as 24 CFR part 4, applies to the funding competition announced today. The requirements of the rule continue to apply until the announcement of the selection of successful applicants.

HUD employees involved in the review of applications and in the making of funding decisions are restrained by part 4 from providing advance information to any person (other than an authorized employee of HUD) concerning funding decisions, or from otherwise giving any applicant an unfair competitive advantage. Persons who apply for assistance in this competition should confine their inquiries to the subject areas permitted under 24 CFR part 4.

Applicants who have questions should contact the HUD Office of Ethics (202) 708–3815 (TDD/Voice). (This is not a toll-free number.) The Office of Ethics can provide information of a general nature to HUD employees, as well. However, a HUD employee who has specific program questions, such as whether particular subject matter can be discussed with persons outside the Department, should contact his or her Regional or Field Office Counsel, or Headquarters counsel for the program to which the question pertains.

F. Prohibition Against Lobbying of HUD Personnel

Section 112 of the HUD Reform Act added a new section 13 to the Department of Housing and Urban Development Act (42 U.S.C. 3531 *et seq.*). Section 13 contains two provisions dealing with efforts to influence HUD's decisions with respect to financial assistance. The first imposes disclosure requirements on those who are typically involved in these efforts—those who pay others to influence the award of assistance or the taking of a management action by the Department and those who are paid to provide the influence. The second restricts the payment of fees to those who are paid to influence the award of HUD assistance, if the fees are tied to the number of housing units received or are based on the amount of assistance received, or if they are contingent upon the receipt of assistance.

Section 13 was implemented by final rule published in the **Federal Register** on May 17, 1991 (56 FR 22912). If readers are involved in any efforts to influence the Department in these ways, they are urged to read the final rule, particularly the examples contained in Appendix A of the rule.

Any questions about the rule should be directed to the Office of Ethics, Room 2158, Department of Housing and Urban Development, 451 Seventh Street, SW., Washington, DC 20410–3000. Telephone: (202) 708–3815 (TDD/Voice) (This is not a toll-free number.) Forms necessary for compliance with the rule may be obtained from the local HUD office.

G. Prohibition Against Lobbying Activities

The use of funds awarded under this NOFA is subject to the disclosure requirements and prohibitions of section 319 of the Department of Interior and Related Agencies Appropriations Act for Fiscal Year 1990 (31 U.S.C. 1352) and the implementing regulations at 24 CFR part 87. These authorities prohibit recipients of federal contracts, grants, or loans from using appropriated funds for lobbying the Executive or Legislative Branches of the Federal Government in connection with a specific contract, grant, or loan. The prohibition also covers the awarding of contracts, grants, cooperative agreements, or loans unless the recipient has made an acceptable

certification regarding lobbying. Under 24 CFR part 87, applicants, recipients, and subrecipients of assistance exceeding $100,000 must certify that no federal funds have been or will be spent on lobbying activities in connection with the assistance.

Prompt Corrective Action; Rules of Practice for Hearings

AGENCIES: Board of Governors of the Federal Reserve System; Office of the Comptroller of the Currency, Treasury; Federal Deposit Insurance Corporation; and Office of Thrift Supervision, Treasury.

ACTION: Final rules.

SUMMARY: The Board of Governors of the Federal Reserve System (Board of Governors), the Office of the Comptroller of the Currency (OCC), the Federal Deposit Insurance Corporation (FDIC), and the Office of Thrift Supervision (OTS) (collectively "the agencies") have adopted final rules revising their regulations to implement for the institutions that they supervise the system of prompt corrective action established by section 38 of the Federal Deposit Insurance Act (FDI Act) as added by section 131 of the Federal Deposit Insurance Corporation Improvement Act of 1991 (FDICIA). Section 38 requires each Federal banking agency to implement prompt corrective action for the institutions that it regulates. The agencies have also revised their rules of practice for hearings to establish procedures for the issuance of directives and other actions required under prompt corrective action.

Section 38 requires or permits the agencies to take certain supervisory actions when an insured depository institution falls within one of five specifically enumerated capital categories. It also restricts or prohibits certain activities and requires the submission of a capital restoration plan when an insured institution becomes undercapitalized. The revisions adopted by the agencies are necessary to establish the capital levels at which institutions will be deemed to come within the five capital categories. The revisions also establish procedures for issuing and contesting prompt corrective action directives including directives requiring the dismissal of directors and senior executive officers.

The agencies sought public comment on this proposal in July 1992. The final rule reflects a number of changes to the original proposal to address concerns raised by the commenters.

EFFECTIVE DATE: December 19, 1992.

FOR FURTHER INFORMATION CONTACT:

Federal Reserve Board: Frederick M. Struble, Associate Director (202/452-3794), Norah Barger, Supervisory Financial Analyst (202/452-2402), Division of Banking Supervision and Regulation; Scott G. Alvarez, Associate General Counsel (202/452-3583), Gregory A. Baer, Senior Attorney (202/452-3236), Legal Division; Myron L. Kwast, Assistant Director, Division of Research and Statistics, Board of Governors of the Federal Reserve System. For the hearing impaired only, Telecommunication Device for the Deaf (TDD), Dorothea Thompson (202/452-3544), Board of Governors of the Federal Reserve System, 20th and C Streets, NW., Washington, DC 20551.

OTS: John Connolly, Program Manager, (202) 906-6465, Policy; Lorraine E. Waller, Counsel (Banking and Finance), (202) 906-6457, Deborah Dakin, Assistant Chief Counsel, (202) 906-6445, Regulations and Legislation Division, Office of Thrift Supervision, 1700 G Street, NW., Washington, DC 20552.

FDIC: Daniel M. Gautsch, Examination Specialist (202-898-6912), Stephen G. Pfeifer, Examination Specialist (202-898-8904), Division of Supervision; Valerie Jean Best, Counsel (202-898-3812), Claude A. Rollin, Counsel (202-898-3985), Legal Division, Federal Deposit Insurance Corporation, 550 17th Street, NW., Washington, DC 20429.

OCC: Kevin J. Bailey, Executive Assistant, Senior Deputy Comptroller for Bank Supervision Operations, (202) 874-5030; Daniel Berkland, National Bank Examiner, Special Supervision, (202) 874-4450; or Beth Kirby, Senior Attorney, Corporate Organization and Resolutions Division, (202) 874-5300, Office of Comptroller of the Currency.

SUPPLEMENTARY INFORMATION:

I. Background

In early July, the Board of Governors of the Federal Reserve System (Federal Reserve Board) (57 FR 29226, July 1, 1992), the Federal Deposit Insurance Corporation (FDIC) (57 FR 29662, July 6, 1992), the Office of the Comptroller of the Currency (OCC) (57 FR 29808, July 7, 1992), and the Office of Thrift Supervision (OTS) (57 FR 29826, July 7, 1992) proposed regulations to implement the provisions of section 131 of the Federal Deposit Insurance Corporation Improvement Act of 1991 (FDICIA) (Pub. L. 102-242), which is entitled "Prompt Corrective Action". Section 131 of FDICIA created a new statutory framework that applies to every insured depository institution a system of supervisory actions indexed to the capital level of the individual institution. The stated purpose of this statutory provision is to resolve the problems of insured depository institutions at the least possible long-term loss to the deposit insurance fund. The new framework is contained in section 38 of the FDI Act (12 U.S.C. 1831o) ("section 38"). This framework and the authority it confers on the Federal banking agencies are meant to supplement the existing supervisory authority vested in the agencies, and do not limit in any way the agencies' existing authority under other statutes or regulations to initiate supervisory actions to address capital deficiencies, unsafe or unsound conduct, practices, or conditions, or violations of law.

Section 38 requires the Federal banking agencies, within 9 months of the enactment of FDICIA, to promulgate final regulations necessary to carry out the purposes of that section. Under the statute, these regulations must become effective within one year after the date of enactment of FDICIA, or no later than December 19, 1992.

II. Summary of Final Rules

The agencies have received 92 comments from interested persons, and have reviewed the original proposal in light of those comments. As an initial matter, the commenters strongly supported the agencies' efforts to adopt uniform rules implementing the provisions of section 38. The agencies believe that a uniform approach to capital definitions and capital categories, as well as a uniform framework of procedures, will simplify the tasks facing bank and thrift management of monitoring and maintaining the capital levels of insured depository institutions, and will remove any competitive distortions that might

arise if different standards were applied to competing institutions. Accordingly, the agencies have adopted substantially the same rules.

The final rules that have been adopted by the agencies are substantially as originally proposed by the agencies, with modifications to address concerns and issues raised by the commenters. In particular, the final rules define the relevant capital measures for the categories of well-capitalized, adequately capitalized, undercapitalized, and significantly undercapitalized, to be the ratio of total capital to risk-weighted assets, the ratio of Tier 1 capital to risk-weighted assets, and the ratio of Tier 1 capital to total average assets (the leverage ratio).[1] The ratio of tangible equity to total assets has been adopted as the sole relevant capital measure for defining the critically undercapitalized category.

The capital thresholds that have been adopted for each of the five capital categories are the thresholds that were originally proposed by the agencies. Under the final rules, an institution will be deemed to be:

- *Well-capitalized* if the institution has a total risk-based capital ratio of 10.0 percent or greater, a Tier 1 risk-based capital ratio of 6.0 percent or greater, and a leverage ratio of 5.0 percent or greater, and the institution is not subject to an order, written agreement, capital directive, or prompt corrective action directive to meet and maintain a specific capital level for any capital measure;
- *Adequately capitalized* if the institution has a total risk-based capital ratio of 8.0 percent or greater, a Tier 1 risk-based capital ratio of 4.0 percent or greater, and a leverage ratio of 4.0 percent or greater (or a leverage ratio of 3.0 percent or greater if the institution is rated composite 1 in its most recent report of examination, subject to appropriate Federal banking agency guidelines), and the institution does not meet the definition of a well-capitalized institution;
- Undercapitalized if the institution has a total risk-based capital ratio that is less than 8.0 percent, a Tier 1 risk-based capital ratio that is less than 4.0 percent, or a leverage ratio that is less than 4.0 percent (or a leverage ratio that is less than 3.0 percent if the institution is rated composite 1 in its most recent report of examination, subject to appropriate Federal banking agency guidelines);
- Significantly undercapitalized if the institution has a total risk-based capital ratio that is less than 6.0 percent, a Tier 1 risk-based capital ratio that is less than 3.0 percent, or a leverage ratio that is less than 3.0 percent.
- Critically undercapitalized if the institution has a ratio of tangible equity to total assets that is equal to or less than 2.0 percent.

To the extent possible, the final rules define capital terms in the same way as they are defined under existing capital adequacy standards. The final rules also generally rely on the most recent Consolidated Report of Condition and Income (Call Report) [2] and examination report for determining the capital category of an institution, and provide that the appropriate banking agency will provide written notice to an institution in the event that the agency determines the capital category of the institution on the basis of other information. The final rules also establish a procedure for an institution to notify the appropriate agency in the event that a material event occurs that would result in the reclassification of the institution to a lower capital category. This procedure has been modified in several respects to address concerns raised by commenters. The final rules do not adopt a requirement that an institution calculate its capital position on a daily basis.

The final rules establish a uniform schedule for filing and reviewing capital restoration plans. In addition, the rules adopt several provisions clarifying certain aspects of the capital guarantee required to be made as part of an acceptable capital plan by companies that control an undercapitalized institution, including the limit on the liability of such companies.

The agencies have adopted uniform procedures for the issuance of directives by the appropriate agency under section 38. Under these procedures, an institution will generally be provided advance notice when the appropriate agency proposes that the institution take one or more of the actions committed to agency discretion under section 38. These procedures provide an opportunity for the institution to respond to the proposed agency action, or, where circumstances warrant immediate agency action, an opportunity for administrative review of the agency's action.

A separate procedure has been adopted in the case of proposals by the appropriate Federal banking agency to subject an institution to more stringent treatment based on supervisory factors other than capital. The proposed procedures were modified at the request of commenters to provide an informal hearing whether the treatment is based on a determination that the institution is in unsafe or unsound condition or based on an institution's failure to correct deficient ratings received in an examination. The final rules also implement the statutory requirement that officers and directors dismissed as a result of an agency order issued under section 38 be afforded agency review of the dismissal, including an opportunity for an informal hearing.

The final rules and the public comments are discussed in more detail below.

III. Summary of Statutory Framework

In the request for comment, the agencies provided a brief summary of the statutory framework established by section 38. That summary is reprinted here in order to give context to the agencies' final rules. The summary is not intended to be a complete description of the requirements of section 38, and insured institutions and other persons affected by section 38 should consult the provisions of section 38.

Section 38 provides a framework of supervisory actions based on the capital level of an insured depository institution. Section 38 establishes five capital categories: well capitalized, adequately capitalized, undercapitalized, significantly undercapitalized, and critically undercapitalized. The statute deems an insured depository institution to be:

"Well capitalized" if the institution significantly exceeds the required minimum level for each relevant capital measure;

"Adequately capitalized" if the institution meets the required minimum level for each relevant capital measure;

"Undercapitalized" if the institution fails to meet the required minimum level for any relevant capital measure;

"Significantly undercapitalized" if the institution is significantly below the required minimum level for any relevant capital measure; or,

"Critically undercapitalized" if the institution has a ratio of tangible equity to total assets of 2 percent or less, or otherwise fails to meet the critical capital level established pursuant to section 38 (c)(3)(A).

Section 38 requires the Federal banking agencies to specify, by regulation, the levels at which an institution would be within each of these five categories. The applicability

[1] For savings associations, all references to Tier 1 capital should be read as core capital, as defined in part 567 of the OTS's regulations, which is the thrift capital measure comparable to Tier 1 capital. 12 CFR part 567. In addition, all references to total average assets should be read as adjusted total assets, as defined in part 567 of the OTS's regulations.

[2] Savings associations report their capital levels on Thrift Financial Reports.

of supervisory actions provided in section 38 to an individual institution depends on the institution's classification within one of these five categories.[3]

A. Provisions Applicable to All Institutions

Section 38 prohibits an insured depository institution from declaring any dividends, making any other capital distribution, or paying a management fee to a controlling person if, following the distribution or payment, the institution would be within any of the three undercapitalized categories.[4] The statute provides a limited exception to this prohibition for stock redemptions that do not result in any decrease in an institution's capital and would improve the institution's financial condition, provided that the redemption has been approved by the institution's appropriate Federal banking agency after consultation with the FDIC.

B. Provisions Applicable to Undercapitalized Institutions

Institutions that are classified as undercapitalized are subject to additional mandatory supervisory actions. These include:

- Increased monitoring by the appropriate Federal banking agency for the institution and periodic review of the institution's efforts to restore its capital;
- A requirement that the institution submit, generally within 45 days, a capital restoration plan acceptable to the appropriate Federal banking agency for the institution and implement that plan;
- A restriction on growth of the institution's total assets; and
- A limitation on the institution's ability to make any acquisition, open any new branch offices, or engage in any new line of business without the prior approval of the appropriate Federal banking agency for the institution or the FDIC.

Section 38 also provides that the appropriate Federal banking agency for an undercapitalized institution may take any of a number of discretionary supervisory actions if the agency determines that any of these actions is necessary to resolve the problems of the institution at the least possible long-term cost to the deposit insurance fund. These discretionary supervisory actions include requiring the institution to raise additional capital, restricting transactions with affiliates, restricting interest rates paid by the institution on deposits, requiring replacement of senior executive officers and directors, restricting the activities of the institution and its affiliates, requiring divestiture of the institution or the sale of the institution to a willing purchaser, and any other supervisory action that the agency believes would better carry out the purpose of section 38. Because these discretionary actions are also applicable to significantly undercapitalized institutions (as well as to critically undercapitalized institutions), these actions are described more fully in the next section.

C. Provisions Applicable to Significantly Undercapitalized Institutions

Section 38 provides that significantly undercapitalized institutions are subject to the four mandatory provisions listed above that are applicable to undercapitalized institutions. Section 38 also restricts the ability of a significantly undercapitalized institution to pay bonuses or raises to senior executive officers of the institution. A significantly undercapitalized institution may pay bonuses and raises to senior executive officers of the institution with the prior written approval of the appropriate Federal banking agency, unless the institution has failed to submit an acceptable capital restoration plan. For so long as an institution has failed to submit an acceptable capital restoration plan, the institution is prohibited from paying any bonus or raise to any senior executive officer.

In addition to these mandatory requirements, section 38 specifies that the appropriate Federal banking agency shall impose one or more restrictions on an institution that is significantly undercapitalized. These discretionary actions include:

- Requiring the institution to sell enough additional capital, including voting shares, so that the institution would be adequately capitalized after the sale;
- Restricting transactions between the institution and its affiliates, including transactions with its insured depository institution affiliates;
- Restricting the interest rates paid on deposits collected by the institution to the prevailing rates in the region where the institution is located;
- Restricting the institution's asset growth or requiring the institution to reduce its total assets;
- Requiring the institution or any subsidiary of the institution to terminate, reduce or alter any activity that the agency determines poses excessive risk to the institution;
- Requiring the institution to hold a new election of its board of directors;
- Requiring the institution to dismiss any director or senior executive officer who had held office at the institution for more than 180 days immediately before the institution became undercapitalized if the agency deems such dismissal to be appropriate, and to employ new officers who may be subject to agency approval;
- Prohibiting the institution from accepting deposits from correspondent depository institutions;
- Prohibiting any bank holding company that controls the institution from making any dividend payment without prior approval of the Federal Reserve Board;
- Requiring the institution to accept an offer to be acquired by another institution or company, or requiring any company that controls the institution to divest the institution;
- Requiring the institution to divest or liquidate any subsidiary that is in danger of becoming insolvent and poses a significant risk to the institution, or that is likely to cause significant dissipation of the institution's assets or earnings;
- Requiring any company that controls the institution to divest or liquidate any affiliate of the institution (other than another insured depository institution) if the appropriate Federal banking agency for the holding company determines that the affiliate is in danger of becoming insolvent and poses a significant risk to the institution, or is likely to cause significant dissipation of the institution's assets or earnings; and
- Requiring the institution to take any other action that the agency determines would better carry out the purposes of section 38.

While the statute generally provides the agency with discretion to determine whether these actions are appropriate in connection with a particular institution, the statute establishes certain presumptions and requirements with respect to the agency's consideration of these actions. Section 38 requires that the appropriate agency take at least one of the above discretionary supervisory actions in connection with an institution that is significantly undercapitalized or critically undercapitalized. The statute also establishes a presumption that the agency require each significantly undercapitalized or critically undercapitalized institution to (1) be acquired by another institution or company or sell sufficient shares to restore the institution's capital to at least the minimum acceptable capital

---

[3] A savings association operating in accordance with a capital plan approved by the OTS before December 19, 1991, is subject to certain exceptions from provisions of section 38 (12 U.S.C. 1831o(o)(2)). However, neither section 38 nor this regulation in any way limits the authority of the OTS under any other provision of law to take supervisory actions to address unsafe or unsound practices, deficient capital levels, violations of law or regulation, unsafe or unsound conditions or other practices.

[4] The OTS intends that the permissibility of capital distributions will be determined by the prompt corrective action regulations. A savings association permitted to make a capital distribution under the prompt corrective action regulations may do so if the amount and type of distribution would be permitted under section 563.134 of the OTS's regulations. The OTS will review its capital distributions regulations and consider making amendments that may be necessary based on section 38 of the FDI Act.

level, (2) restrict transactions with affiliates of the institution, including transactions with depository institution affiliates, and (3) restrict the interest rates the institution pays on deposits. The agency must impose each of these three actions unless the agency determines that the action would not further the purpose of section 38.

As discussed above, each of the discretionary actions listed above may also be taken, by issuance of a prompt corrective action directive, in connection with undercapitalized institutions if a finding is made by the agency that the action is necessary to carry out the purposes of section 38. In addition, these discretionary actions may be taken in connection with any undercapitalized institution that fails to submit or implement in any material respect a capital restoration plan, as if the institution were a significantly undercapitalized institution. As noted above, the provision restricting the payment of bonuses and raises to senior executive officers applies to any undercapitalized institution that has failed to submit a capital restoration plan that is acceptable to the appropriate agency.

In addition to the discretionary actions discussed above, section 38 also provides that, where the appropriate agency finds it necessary to carry out the purposes of section 38, the agency may require, by issuance of a prompt corrective action directive, a significantly undercapitalized institution to comply with one or more of the restrictions established by the FDIC on the activities of critically undercapitalized institutions. The same actions may be taken in the case of an undercapitalized institution that has failed to submit or implement, in any material respect, an acceptable capital restoration plan.

D. Provisions Applicable to Critically Undercapitalized Institutions

Section 38 requires that an insured depository institution that is critically undercapitalized be placed in conservatorship (with the concurrence of the FDIC) or receivership within 90 days, unless the appropriate Federal banking agency for the institution and the FDIC concur that other action would better achieve the purposes of section 38. A determination by the agency to defer placing a critically undercapitalized institution in receivership or conservatorship must be reviewed every 90 days and must document the reasons the agency believes other action would better achieve the purposes of section 38.

The statute requires that the institution be placed in receivership if the institution continues to be critically undercapitalized on average during the fourth quarter after the institution initially became critically undercapitalized, unless certain specific statutory requirements are met. To be eligible for the exception, the institution must: (1) Have positive net worth, (2) be in substantial compliance with an approved capital restoration plan, (3) be profitable or have an upward trend in earnings, and (4) have reduced its ratio of nonperforming loans to total loans. In addition, the head of the appropriate Federal banking agency for the institution and the Chairperson of the FDIC must both certify that the institution is viable and not expected to fail.

Critically undercapitalized institutions are also prohibited, beginning 60 days after becoming critically undercapitalized, from making any payment of principal or interest on subordinated debt issued by the institution without the prior approval of the FDIC. Section 38 does not prevent unpaid interest from accruing on subordinated debt under the terms of the debt instrument.

Section 38(i) of the FDI Act also provides that the FDIC, by regulation or order, must restrict the activities of critically undercapitalized institutions. At a minimum, the FDIC must prohibit a critically undercapitalized institution from doing any of the following without the prior written approval of the FDIC:

- Entering into any material transaction other than in the usual course of business. Such activities include any investment, expansion, acquisition, sale of assets or other similar action where the institution would have to notify its appropriate Federal banking agency;
- Extending credit for any highly leveraged transaction (HLT);
- Amending the institution's charter or bylaws unless required to do so in order to carry out any other requirement of any law, regulation or order;
- Making any material change in its accounting methods;
- Engaging in any "covered transactions" within the meaning of section 23A(b) of the Federal Reserve Act (12 U.S.C. 371c), which concerns affiliate transactions;
- Paying excessive compensation or bonuses; and
- Paying interest on new or renewed liabilities at a rate which would increase the institution's weighted average cost of funds to a level significantly exceeding the prevailing rates in the institution's normal market areas.

Pursuant to section 38(j) of the FDI Act, none of these restrictions apply (1) to institutions in conservatorship for which the FDIC or RTC has been appointed the conservator or (2) to any bridge bank that is wholly owned by the FDIC or the RTC. Pursuant to section 38(o)(2) of the FDI Act, none of these restrictions shall apply, before July 1, 1994, to any insured savings association if:

(a) The savings association had submitted a plan meeting the requirements of section 5(t)(A)(ii) of the Home Owners' Loan Act (12 U.S.C. 1464(t)(A)(ii));

(b) The Director of OTS had accepted the plan; and

(c) The savings association remains in compliance with the plan or is operating under a written agreement with the appropriate Federal banking agency.

IV. Discussion of Final Rules and Public Comments

The agencies received a total of 92 comment letters from interested persons regarding the proposed rules implementing section 38. Sixty of the commenters were from banks, thrifts and bank and thrift holding companies, while nineteen were from industry trade associations and organizations. Eight were from Federal Reserve Banks. In addition, there were five from law firms and other organizations and individuals.

The comments provided a number of suggestions for clarifying or modifying the proposed rule. These are discussed below.

Many of the commenters supported the underlying purpose of prompt corrective action. However, several expressed concern that section 38 unduly restricts regulatory flexibility and discretion. Several commenters urged, as a general matter, that the agencies retain as much flexibility as possible in implementing the rules governing prompt corrective action and in administering the requirements of section 38. These commenters argued that capital alone is an inexact measure of the financial strength of an institution, and is only one of a number of measures that must be considered in determining the financial strength of an insured institution. Commenters argued that a narrow focus on capital levels to the exclusion of other indications of financial strength could result in unnecessary and counterproductive actions being taken against financially sound institutions. To avoid this result, many commenters argued that the agencies should adopt flexible rules that permit the agencies as much discretion as possible in determining when to take action under section 38 and what actions are appropriate.

The agencies have attempted to address this concern to the extent possible under the statute. Section 38 establishes a framework that is triggered by the capital levels of insured institutions, and subjects an insured institution that has capital below the regulatory minimum levels to several mandatory provisions that apply without any agency action. Section 38 also authorizes the agencies, in their discretion, to impose a number of additional requirements and proscriptions on an institution that is undercapitalized, significantly undercapitalized, or critically undercapitalized. The statute permits the agencies to tailor these discretionary supervisory actions to the specific problems faced by individual institutions, and the final rules retain this flexibility.

In addition, commenters generally were concerned that the agencies provide adequate procedural protections to insured institutions and individuals prior to taking any discretionary actions under section 38. The agencies have established procedures in the rule to give affected institutions and persons notice of, and a right to participate in the process for determining, discretionary actions taken by the agency under section 38. These procedures include the general right to advance notice of any action contemplated by the agency, and the right to provide the agency with any information that an affected institution or person believes should be considered by the agency in exercising its discretion under the statute. These procedures provide a mechanism for an institution to identify facts and circumstances that the agency should consider in determining appropriate action for that institution, and are intended to supplement informal discussions that ordinarily occur between an institution that has less than adequate capital and the institution's appropriate Federal banking agency.

A. Capital Measures

For purposes of defining each of the capital categories (except for the critically undercapitalized category), section 38(c) requires the agencies to prescribe capital standards that include a leverage limit and a risk-based capital requirement. The agencies may establish additional capital measures for these categories if additional capital measures would serve the purposes of section 38. In addition, section 38 permits the agencies to rescind the leverage limit or the risk-based capital measure if the Federal banking agencies concur that either measure is no longer an appropriate means for carrying out the purposes of section 38.

The agencies proposed to adopt the leverage limit and the total risk-based capital measure in defining the capital categories other than the critically undercapitalized category. In addition, the agencies proposed to adopt the Tier 1 risk-based capital ratio as a capital measure in defining these capital categories.

Most commenters supported or did not object to the proposal to adopt these three capital measures. Commenters expressed a strong preference for using capital measures and definitions that are currently in place in order to reduce the burden and costs associated with calculating the capital category of an institution.

Several commenters suggested that the agencies eliminate one or more of the proposed capital measures. In particular, a small number of commenters argued that the agencies should not adopt a leverage ratio as a capital measure. Several other commenters argued that the agencies should not establish a separate threshold for Tier 1 capital to risk-weighted assets. A few commenters argued that the agencies should rely solely on the ratio of Tier 1 capital to risk-weighted assets and should eliminate use of the ratio of total capital to risk-weighted assets and the leverage ratio. Finally, one commenter suggested that the agencies rely only on the leverage ratio for smaller institutions that are not internationally active, dropping the risk-based capital tests for these institutions.

The agencies have determined to adopt the three capital measures originally proposed for defining whether an institution is well-capitalized, adequately capitalized, undercapitalized, or significantly undercapitalized. Section 38 requires the agencies to employ a risk-based capital requirement and the leverage ratio as capital measures for each capital category unless the agencies all agree that these capital measures are no longer an appropriate means for carrying out the purposes of section 38. The agencies continue to believe that the ratio of total capital to risk-weighted assets represents an appropriate capital measure. In addition, the ratio of Tier 1 capital to total assets, which is a component of the total risk-weighted capital ratio, represents an important measure of the highest quality capital available to the institution to absorb losses. Both the total risk-weighted capital ratio and the Tier 1 risk-weighted capital ratios are recognized in the Basle Accord and are elements of the minimum capital adequacy standards currently employed by the Federal banking agencies.

The agencies have considered the suggestion of commenters that the leverage ratio be eliminated as an appropriate capital measure. The agencies do not believe that elimination of the leverage ratio is appropriate at this time. One of the rationales for retaining a leverage ratio after the risk-based capital measure was introduced was that the risk-based capital measure is focused on credit-related risk, and does not explicitly factor in other risks, particularly interest rate risk.

However, the agencies noted in the request for comment that revisions to the risk-based capital standards mandated by FDICIA may warrant review of the capital measures and thresholds specified under section 38 at a later date. Section 305 of FDICIA, which amends section 18 of the FDI Act, requires the agencies to revise their risk-based capital standards by no later than June 1993 to take into account interest rate risk, concentration of credit risk, and the risks of nontraditional activities and multi-family mortgages. The agencies intend to lower or eliminate the leverage capital component from the definitions of "well capitalized," "adequately capitalized," and "undercapitalized" after the risk-based capital standards have been revised by each Federal banking agency to take into account interest rate risk as required by section 305 of FDICIA and after experience has been gained with such standards. The agencies acknowledge the requirements of section 38(c) of the FDI Act and would comply with those requirements, to the extent they apply, before taking any such action.[5] Several commenters supported reconsideration of the need for the leverage ratio after completion of the review required by section 305.

B. Definition of Capital Terms

The agencies had proposed to adopt the same definitions of capital terms for purposes of the prompt corrective action

[5] Section 38(c) of the FDI Act requires that the capital standards prescribed under that section by each appropriate Federal banking agency shall include a leverage limit and a risk-based capital requirement, as well as any other additional relevant capital measures needed to carry out the purpose of section 38 and implemented by regulation. However, an appropriate Federal banking agency may, by regulation, rescind any relevant capital measure required by section 38, upon determining (with the concurrence of the other Federal banking agencies) that the measure is no longer an appropriate means for carrying out the purpose of section 38.

provisions of section 38 as are currently used under the capital adequacy guidelines or regulations adopted by the agencies. The commenters strongly favored this approach because it would reduce the burden and complexity that could result from the use of new or modified capital definitions, and would minimize the possibility that an institution may be uncertain regarding its capital levels for purposes of section 38. Accordingly, the final rules adopt the definitions of the various capital elements and terms currently used in the agencies' existing capital adequacy guidelines and regulations.

The agencies requested comment regarding the appropriate period for calculation of capital levels. Under current reporting requirements, as specified in the instructions to the Call Report, the level of capital of an institution is generally calculated as the ratio of the institution's quarter-end capital to the quarterly average of its total assets (in the case of the leverage ratio) or its quarter-end risk-weighted assets (in the case of the risk-based capital ratios).[6] The agencies sought comment on whether capital calculations should be based on the same period calculations for purposes of section 38. The agencies also requested comment on the feasibility of requiring institutions to make a daily calculation of various capital measures.

Commenters generally supported applying the same periods for capital calculations under section 38 as are currently used under the agencies' capital adequacy standards. The commenters also strongly objected to any requirement that capital calculations be required on a daily basis for purposes of implementing section 38. The commenters argued that daily calculations would substantially increase the reporting burden and costs for many institutions. In addition, commenters contended that daily calculations present a distorted picture of the capital position of an institution by focusing on individual daily events (such as a temporary increase in deposits in connection with a lock-box operation) and do not take account of related actions that occur within a reasonably short period or remedial actions that are readily available to the institution (such as a scheduled withdrawal of deposits from a lock-box account). The commenters argued that the calculation periods currently adopted by the agencies in their capital adequacy standards provide a more accurate and reliable estimation of the capital levels of institutions.

Based on these comments, the final rules use the same calculation periods for purposes of section 38 as are currently employed under the agencies' capital adequacy standards. The agencies have determined not to require the daily calculation of capital for purposes of section 38 at this time.

C. Specific Capital Levels for Five Capital Categories

The agencies proposed specific capital levels defining each capital category. Under the standards set forth in section 38, an institution is deemed to be adequately capitalized if it meets the required minimum level for each relevant capital measure. Thus, the agencies proposed to set the capital levels for the adequately capitalized category generally at the same levels as the minimum ratios established under the existing minimum capital adequacy rules and guidelines adopted by the agencies. These minimums are 8 percent for the total risk-based capital ratio, 4 percent for the Tier 1 risk-based capital ratio, and 4 percent for the Tier 1 leverage ratio (3 percent for composite 1-rated banks and savings associations, subject to appropriate Federal banking agency guidelines). An institution would have to meet all these minimums in order to be deemed adequately capitalized.

The statute provides specific guidance as to the capital level for defining a critically undercapitalized institution. Section 38 requires that a critically undercapitalized institution be defined by reference to the institution's ratio of tangible equity to total assets. The statute requires the agencies to establish the threshold ratio for defining a critically undercapitalized institution at no lower than 2 percent.

Taking the capital levels for the adequately capitalized and critically undercapitalized categories as benchmarks, the agencies proposed that the capital levels for the undercapitalized category be defined as any level under 8 percent for the total risk-based capital ratio, under 4 percent for the Tier 1 risk-based capital ratio, or under 4 percent for the Tier 1 leverage ratio (under 3 percent for composite 1-rated banks and savings associations, subject to appropriate Federal banking agency guidelines). An institution would be considered undercapitalized if it were below the specified capital level for any of the three capital measures.

Further, the capital levels for significantly undercapitalized institutions were defined as any level under 6 percent for the total risk-based capital ratio, under 3 percent for the Tier 1 risk-based capital ratio, or under 3 percent for the Tier 1 leverage ratio. An institution would be considered significantly undercapitalized if it were below the specified capital level for any of the three capital measures. Under the proposed definitions, an institution that is significantly undercapitalized also would be deemed to be undercapitalized. Similarly, an institution that is critically undercapitalized also would be deemed to be significantly undercapitalized and undercapitalized. The overlap between these categories is contemplated by the statute and has the effect of applying to significantly undercapitalized institutions and to critically undercapitalized institutions any provisions of section 38 that are applicable to undercapitalized institutions.

The agencies proposed establishing the minimum total risk-based capital level for the well capitalized category at 10 percent and setting the minimum leverage capital level for this category at 5 percent. To emphasize the importance the agencies place on Tier 1 capital, the agencies proposed that the minimum level for the Tier 1 risk-based capital ratio be set at 6 percent for the well capitalized category.

Many commenters indicated agreement with the capital thresholds proposed by the agencies. Several commenters were concerned that the levels be applied equally to institutions of all sizes. Other commenters argued that the capital levels set for the well-capitalized category were established at too high a level. These commenters noted that the standard for well capitalized institutions would require an institution to hold 25 percent more total risk-based capital, 50 percent more Tier 1 capital, and 66 percent more leverage capital than an adequately capitalized institution.

Commenters stated that they were particularly concerned about the well-capitalized levels because several of the newly proposed rules required by FDICIA impose new constraints on institutions that are not within the well-capitalized category. Commenters believe that these provisions will have the practical effect of establishing the well-capitalized category as the minimum acceptable capital category for most institutions. Several commenters argued that high capital thresholds for the well-capitalized category would have significant implications in the near term for the availability of credit in the

[6] Savings associations report their capital amounts on their Thrift Financial Reports based on end of the quarter total assets and total risk-weighted assets.

United States, as depository institutions attempt to meet the higher capital levels of the well-capitalized category through slower asset growth or shrinkage of assets. These commenters also argued that establishing high capital thresholds for this category would significantly impair the ability of domestic depository institutions to compete against foreign institutions that are not subject to this capital-based regulatory and supervisory framework. In order to address these potential effects, these commenters argued that the capital thresholds should be lowered, or phased-in over a period of time.

On the other hand, a few commenters argued that the capital levels proposed by the agencies were too low. In particular, these commenters contended that a higher threshold for the definition of the critically undercapitalized category was necessary in order to minimize potential losses to the federal deposit insurance funds. One commenter argued that, at the thresholds in the proposal, the number of institutions that would qualify for the well-capitalized category was too high and included a large number of institutions that had received unsatisfactory examination ratings. These commenters argued that higher thresholds for each of the capital categories would permit the agencies to initiate supervisory actions under section 38 against a greater number of institutions, thereby permitting action while an institution is still sufficiently healthy to reverse its deterioration.

After considering the comments, the agencies have determined at this time to adopt the capital thresholds as proposed. In the agencies' view the proposed thresholds strike a reasonable balance between the statutory requirements on the one hand, and the need to promote safe and sound banking conditions in a manner that gives due consideration to the international capital standards to which the United States and the other G–10 countries have agreed on the other hand. The agencies believe that such consideration is appropriate in view of the competitive pressures faced by U.S. banks operating in international markets with foreign banks adhering to these standards. In this regard, as with the capital adequacy standards currently adopted by the agencies, the thresholds adopted in the final rules under section 38 will apply to each insured depository institution, regardless of the size of the institution. Comparable thresholds are applied to insured branches of foreign banks.

In establishing these thresholds, the agencies recognize that capital ratios alone are not fully indicative of the capital strength of an institution. The agencies are aware, for example, that some poorly-rated depository institutions have capital ratios above the specified minimums for the well-capitalized and adequately capitalized categories. One reason that some poorly-rated institutions qualify as well capitalized for prompt corrective action purposes is that capital is a lagging indicator of problems of insured depository institutions. In part for this reason, examiners traditionally have reached judgments on an institution's capital needs by also taking into account a range of factors such as interest rate risk and concentration risk. As noted above, the agencies have under way initiatives mandated by FDICIA to review their risk-based capital standards to ensure that they take adequate account of such risks, and also have been engaged in a project under the Federal Financial Institutions Examination Council (FFIEC) to refine and improve procedures for assessing the reserving policies and practices of individual institutions. After those projects have been completed and improvements implemented and assessed, the agencies intend to revisit the question of how the specifications for the well-capitalized category may need to be modified or adjusted.

Several commenters argued that an institution that nominally has capital above the threshold for well-capitalized institutions should not be excluded from that category because the institution is subject to an agency order or directive to raise additional capital. These commenters argued that use of capital directives or agency orders to raise additional capital as a means of defining the well-capitalized category is not contemplated by section 38, and is not consistent with the statute's instruction that capital categories be defined by reference to the actual capital level of an institution.

To qualify as a well-capitalized institution under section 38, the capital levels of an institution must significantly exceed the required minimum level for each relevant capital category. The agencies believe that an institution that is subject to an agency order or directive to raise capital or to maintain capital at a higher capital level does not meet the statutory definition of a well-capitalized institution. Instead, institutions that have been ordered to raise capital or maintain a higher level of capital are subject to an agency determination that, given the particular circumstances and financial condition of the institution, the capital level of the institution is inadequate or minimally adequate. Accordingly, the agencies have adopted the definition of the well-capitalized category as proposed, and have retained the provision disqualifying from the well-capitalized category any institution that is subject to an agency order or directive to meet and maintain a specific capital category. The agencies have modified the language of this section to clarify that the provision applies only to written agreements, orders, capital directives, and prompt corrective action directives that are issued under certain provisions of the FDI Act, the International Lending Supervision Act, the Home Owners' Loan Act, or regulations implementing these laws.

D. Critically Undercapitalized Institutions

The statute requires that the critically undercapitalized category be based on the ratio of tangible equity to total assets of the institution. Section 38 requires that the minimum ratio for this category be established at a level of tangible equity that is no less than 2 percent of the institution's total assets, and that is no higher than the ratio equal to 65 percent of the required minimum level of capital under the leverage limit. The agencies may, by regulation, specify additional capital measures (such as a risk-based capital ratio) in defining the critically undercapitalized category. Any such measures may not, without the concurrence of the FDIC, be set at a level lower than the level specified by the FDIC for insured state-chartered banks that are not members of the Federal Reserve System.

The agencies proposed to define the level for the critically undercapitalized category as a ratio of tangible equity to total assets of 2 percent or less. The agencies did not propose to establish any additional capital measures for the critically undercapitalized category. The commenters that addressed these matters favored the capital level proposed by the agencies for this capital category and generally agreed that no additional capital measure was necessary to define this category. Accordingly, the final rules adopt the original proposal to define an institution as critically undercapitalized if the institution has a ratio of tangible equity to total assets of 2.0 percent or less.

Section 38 provides that the critically undercapitalized category must be defined by reference to the ratio of tangible equity to total assets of an institution. However, section 38 does not define the term "tangible equity." Moreover, the term is not currently defined by the Federal banking agencies

in connection with their capital adequacy standards or by the accounting profession. To implement this provision, the agencies had proposed to define the ratio of tangible equity to total assets in the same manner as the leverage ratio currently established by the agencies by regulation or guideline, which is the ratio of Tier 1 capital to total average assets.

A significant number of commenters argued that the agencies should modify the proposed definition of tangible equity to permit the inclusion of all forms of equity capital, in particular cumulative perpetual preferred stock. These commenters noted that the OCC recognizes the level of cumulative perpetual preferred stock in determining whether a national bank is insolvent for purposes of the National Bank Act.

In adopting the final rules, the agencies have determined to define tangible equity to include the core capital elements recognized in the calculation of Tier 1 capital. In addition, the final rule includes cumulative perpetual preferred stock issued by the institution and related surplus. The agencies recognize that cumulative perpetual preferred stock provides a cushion against losses suffered by the institution and provides protection to the deposit insurance funds. The agencies have determined not to include other instruments, however. The agencies are concerned that the inclusion of other types of instruments, in particular instruments that are hybrids of equity and debt, will distort the capital raising efforts of depository institutions and result in the development and issuance of instruments that, while providing some protection against loss, place a significant burden on the earnings of the institution over the life of the instrument and on the ability of the institution to raise additional capital.

Several commenters also argued that the agencies should not require the deduction of all intangible assets in determining whether an institution is critically undercapitalized. These commenters argued that many assets that are considered intangible in fact have significant value and serve as a ready and marketable source of liquidity to troubled institutions.

In determining whether equity is "tangible" for purposes of the final rule under section 38, the agencies have determined to require the deduction of all intangible assets with one exception.[7] The agencies have sought public comment on a proposal to amend their capital adequacy standards regarding inclusion of certain purchased mortgage servicing rights in the calculation of Tier 1 capital. This proposal is in response to section 475 of FDICIA, which requires the Federal banking agencies to determine whether a portion of certain purchased mortgage servicing rights should be included in the definition of "tangible capital."

To comply with this statutory provision, the agencies must determine whether certain purchased mortgage servicing rights have sufficient value to warrant a determination that these assets should not be treated as intangible assets for purposes of the calculation of tangible capital. The agencies believe that, to the extent that purchased mortgage servicing rights are determined under this statutory provision to be properly included in "tangible capital," these assets should be given identical treatment in the calculation of tangible equity under section 38.[8]

E. Notice of Capital Category

Under section 38, an institution becomes subject to certain mandatory provisions on the basis of the capital category of the institution. These mandatory provisions apply immediately without agency action. As noted above, an undercapitalized institution is immediately subject to a restriction on the payment of dividends and management fees, a limitation on asset growth and expansion, and an obligation to file an acceptable capital restoration plan. In addition to these requirements, an institution that is significantly undercapitalized or critically undercapitalized is subject to a limitation on the payment of bonuses or raises to senior executive officers. A number of other mandatory restrictions are imposed on critically undercapitalized institutions. Moreover, once an institution is deemed to be undercapitalized, significantly undercapitalized or critically undercapitalized, section 38 grants the appropriate Federal banking agency for the institution discretion to take a number of supervisory actions to address the problems of the institution.

The final rules include provisions for an institution and its appropriate Federal banking agency to determine the capital category of the institution, and, thereby to determine when the provisions of section 38 are applicable. Commenters supported the agencies' proposal to base capital calculations principally on the Call Report filed by each institution and on an institution's examination.

Accordingly, the final rules retain provisions that deem an institution to be aware of its capital category as of the date that the Call Report is required to be filed. Similarly, the institution is deemed to be notified of its capital category as of the date that the examination report is provided to the institution.

The final rules also retain the provision permitting the agencies to determine the capital category of an institution based on other information available to the agency, including information obtained in the applications process, through other reports filed by the institution under the banking laws or the securities laws, or in public announcements by the institution. The final rules provide that, in the event that the agency determines the capital category of the institution on the basis of other information, the agency must notify the institution in writing of its determination.

The agencies also requested comment on whether to require capital calculations to be made daily or monthly for purposes of applying the provisions of section 38. A significant number of commenters opposed any requirement that institutions make daily calculations of capital. A number of commenters also argued that daily calculations of capital would present a distorted view of the capital position of an institution because daily calculations emphasize the timing of events and do not permit consideration of offsetting events that are reasonably expected to occur at a later date. These commenters also argued that requiring institutions to calculate capital levels on a daily basis would be impractical, particularly for institutions with extensive branch networks or with foreign offices, and would impose significant added costs and burdens on insured institutions. As explained above, the agencies have not adopted provisions requiring institutions to make daily calculations or file daily reports of capital levels for purposes of section 38.

---

[7] For savings associations, pursuant to section 5(t) of the Home Owners' Loan Act (12 U.S.C. 1464(t)), enacted as part of the Financial Institutions Reform, Recovery and Enforcement Act of 1989, certain qualifying supervisory goodwill will also be included in "tangible equity."

[8] Several commenters argued that the definition of tangible equity should include investments in certain types of subsidiaries, which savings associations are required to deduct for purposes of their general capital calculations. The OTS has determined that investments in these subsidiaries will be included in the definition of tangible equity only to the extent permitted in the definition of Tier 1 capital under the Home Owners' Loan Act's transitional rule, which expires July 1, 1994, 12 U.S.C. 1464(t)(5)(D).

Several commenters argued that similar burden would result from the agencies' proposal to establish a procedure that requires an institution to notify the appropriate agency within 5 days of any change in the institution's capital position that would cause the institution to be within a different capital category. The agencies had proposed this notification procedure as a means of supplementing the use of Call Reports and periodic examinations for determining the capital category of insured institutions.

The agencies have made several revisions to the proposed notification procedures to address commenters' concerns. The final rules have been modified to require an institution to notify the appropriate agency only of material events that affect the capital position of the institution. The notice period has also been extended to 15 days from the 5 days originally proposed. The determination of whether the capital category of the institution has changed may be made by reference to the most recent Call Report or examination report.

The rule retains the original proposal that the capital category of the institution will not change until the appropriate agency has reviewed the data provided by the institution along with any explanation offered by the institution. Following review of this information, the agency will determine whether an adjustment to the capital category of the institution is appropriate.

Finally, in response to several comments, the rule has been modified to eliminate the requirement that the institution notify the agency of events that improve the capital level of the institution. Because an institution's capital category is based on the information filed in the most recent Call Report or report of examination, however, an institution that has improved its capital position prior to the time that a new Call Report has been filed or examination report completed would continue to be considered within the capital category reflected in the most recent Call Report or examination report unless the institution voluntarily sought a determination by the agency that the institution is in a different capital category.

The agencies believe that the revised notification procedures address the concerns raised by these commenters while at the same time still providing adequate notice to the appropriate Federal banking agency when an institution's capital category has changed between filing of Call Reports or examinations. The agencies believe that failure to recognize material events that occur during this period could result in delay in application of the supervisory requirements of section 38, including the mandatory provisions of the statute.

F. Procedures Governing Agency Action

1. In General

The final rules establish procedures governing four types of agency action that may be taken under section 38.[9] In three cases, the final rules generally require the appropriate agency to provide notice to an insured institution or company of proposed agency action and an opportunity for the institution or company to submit to the agency information that is relevant to the agency's decision before the agency takes final action. In particular, the final rules establish these procedures for: (1) Issuing a directive under section 38 that imposes requirements or restrictions committed to agency discretion on an undercapitalized institution or a company that controls an undercapitalized institution; (2) determining that an institution should be subject to more stringent treatment because the institution is in unsafe or unsound condition; and (3) determining that an institution should be subject to more stringent treatment because the agency deems the institution to be engaged in an unsafe or unsound practice based on the institution's failure to correct certain deficient ratings received in an examination. The final rules also establish a special procedure, as required by section 38, permitting senior executive officers and directors who have been dismissed from an institution as a result of an agency directive an opportunity to petition for reinstatement.

In establishing these procedures, the agencies have attempted to comply with the statutory mandate that the agencies take prompt action to resolve the problems of troubled institutions while also providing affected institutions, companies, and persons the opportunity to be heard at a meaningful time and in a meaningful manner.

2. Procedures for Issuing Prompt Corrective Action Directives

Section 38 imposes certain mandatory restrictions on institutions that are undercapitalized, significantly undercapitalized, or critically undercapitalized. The statute also provides the agencies with discretion to impose a number of supervisory requirements or restrictions on an insured institution that is undercapitalized, significantly undercapitalized or critically undercapitalized, as well as on any company that controls such an institution. These discretionary supervisory actions are described above. The system enacted in section 38 is based on Congress's belief that prompt action must be taken to resolve problems at insured depository institutions at an early enough stage to minimize costs to the federal deposit insurance funds, and ultimately the taxpayer.

The agencies do not believe that the purpose and mandate of section 38 are compromised by, as a general matter, providing institutions notice of proposed agency action under section 38 and an opportunity to submit relevant information to the agency for its consideration. Under the final rules, the appropriate agency will provide written notice to an institution or company prior to issuing a directive as a general matter. The notice must describe the action contemplated by the agency. The institution or company is then provided at least 14 calendar days to submit written arguments and evidence in response to the proposed agency action. Failure to file a timely response constitutes consent to the issuance of the directive and a waiver of the opportunity to appeal. The agency will consider the submission in determining whether to issue the directive.

The agencies reserve the right to issue directives that are effective immediately when the circumstances of a particular case indicate that immediate action is necessary to serve the purpose of prompt corrective action. In these cases, the final rules provide the institution an opportunity to seek modification or rescission of the directive on an expedited basis. An institution or company that appeals an immediately effective directive is required to file a written appeal within 14 days of receiving the notice, and the agency must consider the appeal within 60 days of receiving it.

The agencies believe that these procedures afford an adequate and fair opportunity for affected persons to present the agency with argument and information relevant to the agency's action. The procedures adhere to the mandate of section 38 that the agencies take prompt corrective action to resolve the problems of insured depository

[9] The agencies will not be required to grant administrative review if an institution, company, or person consents to the action to be taken by the agency either as initially proposed by the agencies or as modified by mutual agreement. Actions taken with such consent have the same legal affect and are enforceable to the same extent and by the same means as actions taken upon exhaustion of these procedures.

institutions at the least possible long-term loss to the deposit insurance fund while providing institutions with an opportunity for agency review.

Commenters raised various objections to the procedures proposed by the agencies for issuing directives under section 38. Some commenters stated that an oral hearing is required by principles of due process and fundamental fairness before an agency can issue a prompt corrective action directive. Certain other commenters expressed concern about the agencies' proposal to allow issuance of a directive without prior notice to the institution in limited cases; other commenters recommended that such an immediately effective directive be issued only after a determination by the agency head that exigent circumstances require immediate action.

The final rules do not adopt the suggestion of several commenters that the agencies provide for an oral hearing in connection with the issuance of a prompt corrective action directive. The agencies believe that the procedures for prior notice and an opportunity for submission of written argument and information are sufficient in light of the purpose and mandate of section 38. As explained above, the language and legislative history of section 38 indicate that Congress intended agency action under section 38 to be taken as promptly as possible. 12 U.S.C. 1831o(a)(2); see also S. Rep. No. 102–167, 102d Cong., 1st Sess. (1991) ("The prompt corrective action system will require regulators to act at the first sign of trouble.").

In addition, Congress clearly indicated those occasions when it believed that an oral hearing is appropriate in connection with actions taken under section 38. Congress gave no indication in either the statutory language or legislative history that it intended to require an oral hearing in connection with supervisory actions committed to agency discretion under section 38.

Finally, the agencies believe that the provision for written submissions prior to issuance of a directive affords adversely affected parties an opportunity to be heard "at a meaningful time and in a meaningful manner." *Mathews* v. *Eldridge*, 424 U.S. 319, 333 (1976); *see FDIC* v. *Mallen*, 486 U.S. 230 (1988) (upholding post-deprivation hearing in case of suspension or removal of a bank officer charged with a felony); *Federal Deposit Ins. Corp.* v. *Bank of Coushatta*, 930 F.2d 1122 (5th Cir. 1991), *cert. denied*, 112 S. Ct. 170 (1992) (affirming hearing procedures for FDIC capital directive).

In special cases where immediate action is necessary and prior notice has not been given, the institution is given prompt post-directive administrative review. The courts have found similar post-deprivation procedures to be adequate when necessary to protect the public interest. See *Mallen*, 486 U.S. at 243; *Soranno's Gasco, Inc.* v. *Morgan*, 874 F.2d 1310, 1317–18 (9th Cir. 1989) (power to suspend permit immediately is necessitated by state's interest in enforcing pollution control laws).

Several commenters argued that the 14-day deadline for submission of a response to a proposed directive was too short, favoring deadlines from 30 to 90 days. The final rule provides at least 14 days for submission of a response, but permits the agency to extend that period in individual cases as appropriate.

3. Dismissal of Directors or Senior Executive Officers

Section 38 provides that a director or senior executive officer who is dismissed by an institution in compliance with an agency directive may obtain review of the dismissal by filing, within ten days, a petition for reinstatement with the agency that ordered the dismissal. The statute also provides that the petitioner shall have the opportunity to submit written materials in support of the petition and to appear at a hearing before member(s) or designated employee(s) of the agency. Under the statute, the hearing shall occur within 30 days of the filing of the petition unless the petitioner requests a later date. Under the final rules, within 20 days of the closing of the hearing record, the presiding officer must make a recommendation to the agency regarding the petition for reinstatement, and the agency shall issue a decision within 60 days of the date of the closing of the hearing record.

The statute envisions a post-dismissal hearing procedure, as it refers to the appeal as a "petition for reinstatement" and sets a short time for agency decision following the hearing. Accordingly, the proposed regulation required that an institution ordered to dismiss a senior executive officer or director take that action immediately upon receiving a final directive requiring that action.

The agencies also proposed that any officer or director who is dismissed in compliance with an agency directive under section 38 be provided an opportunity to petition the agency for reinstatement within the statutorily prescribed period, and be afforded an opportunity for an informal agency hearing. The petitioner was provided the right to appear at the hearing, with counsel, and to submit written materials and present oral argument.

The proposed regulation also incorporated the statutory burden of proof imposed upon an officer or director seeking reinstatement. When the dismissal order is based upon an institution's capital category or its failure to submit or implement a capital restoration plan, the petitioner must prove that his or her continued employment would materially strengthen the institution's ability to become adequately capitalized. When the dismissal order is based upon a reclassification of an institution on grounds of unsafe or unsound condition or practice, the petitioner must prove that his or her continued employment would materially strengthen the institution's ability to correct the condition or practice. The agencies proposed to restrict the ability of an officer or director seeking reinstatement to challenge the capital category to which the institution has been assigned.

Commenters generally recognized that most of the procedures for review of a dismissal are set out in the statute and that the agency proposal adopted these statutory standards. Several commenters urged the agencies to amend the proposal to allow dismissed officers and directors to present, as a matter of right, oral testimony or witnesses at the agency hearing. The proposal permitted the presentation of oral testimony or witnesses only with the permission of the presiding officer. The commenters argued that the petitioner must meet a heavy burden of proof in order to be reinstated, and should be permitted to meet that burden through the presentation of oral testimony.

The agencies have decided to retain the provision providing that petitioners may present oral testimony and witnesses with the permission of the presiding officer without providing an absolute right to presentation of oral testimony. Under the proposed procedures, petitioners have the right to submit affidavits or other written statements from any person in making their case. In addition, petitioners may request permission of the presiding officer to present oral testimony or witnesses. Any decision by a presiding officer not to permit oral testimony is subject to review when the agency determines the action that is appropriate on the basis of the record compiled at the hearing.

Commenters also expressed concern that neither the statute nor the proposed rule requires an agency to identify any connection between the conduct of the officer or director and the financial deficiencies experienced by the insured

institution before dismissing or upholding the dismissal of the officer or director. Commenters urged that the agencies consider whether the conduct of an officer or director contributed to the troubled condition of the institution in deciding whether to dismiss the officer or director and in considering a petition for reinstatement.

The agencies note that the burden of proof necessary for reinstatement is established by statute for all petitions for reinstatement. The agencies do not have discretion to establish an alternative burden of proof for cases in which an officer or director believes that he or she has not contributed to the financial weakness of the institution. However, the agencies note that the statute does not limit the types of arguments or evidence that may be presented by a petitioner in meeting the statutory burden of proof. In this regard, the agencies believe that evidence concerning the past performance of the director or officer at the institution may be relevant to determining whether a director or officer would materially strengthen an institution's ability to address its problems. Accordingly, the final rules adopt the procedures for review of petitions for reinstatement as proposed by the agencies.

Finally, one commenter argued that a dismissed officer or director should be allowed to challenge the bank's capital category, since the bank's capital category is the basis for the dismissal. The agencies have decided not to adopt this restriction in the final rule.

4. More Stringent Treatment Based on Non-Capital Supervisory Criteria

In establishing a system of prompt corrective action based primarily on the capital level of each institution, Congress recognized that factors other than capital should in certain circumstances be used to assess the financial condition of an institution. In providing for more stringent treatment based on non-capital indications of financial condition, Congress appears to have had the same concern that underlies prompt corrective action generally: preventing loss to the deposit insurance funds. See S. Rep No. 102–167, 32–38 (giving regulators "flexibility to discipline institutions based on criteria other than capital * * * will help reduce deposit insurance losses * * *."). If actions taken based on criteria other than capital are to be effective, they must be taken promptly.

Section 38 provides that the appropriate Federal banking agency may, under certain circumstances, reclassify a well capitalized insured depository institution as adequately capitalized. Section 38 also permits the appropriate agency to require an adequately capitalized or undercapitalized institution to comply with the supervisory provisions as if the institution were in the next lower category (but not treat a significantly undercapitalized institution as critically undercapitalized) based on supervisory information other than the capital levels of the institution. (While the agencies recognize that these provisions are not strictly a reclassification of the institution in all cases, reclassification to the adequately capitalized category and treatment of an institution as if it were in the next lower capital category are referred to collectively in this document and in the final rules as a "reclassification.")

The statute provides that an institution may be reclassified if the appropriate Federal banking agency determines (after notice and opportunity for hearing) that [the institution] is in an unsafe or unsound condition or, pursuant to section 8(b) (8), deems the institution to be engaging in an unsafe or unsound practice. 12 U.S.C. 1831o(g). Section 8(b)(8) of the FDI Act was amended by FDICIA to provide that an institution may be deemed to be engaged in an unsafe or unsound practice if (1) the institution has received a less-than-satisfactory rating in its most recent examination report for assets, management, earnings or liquidity [10], and (2) the institution has not corrected the deficiency. 12 U.S.C. 1818(b)(8).

Relying on the statutory language, the proposed rule provided different procedures for review of reclassifications based on unsafe or unsound condition and those based on unsafe or unsound practice. In the case of unsafe or unsound condition, the proposed regulation provided for notice to the institution and an opportunity for an informal hearing prior to the reclassification; in the case of unsafe or unsound practice, the proposed regulation provided for notice to the institution, a 14-day period in which the institution could make a written submission objecting to the reclassification, and agency review of that submission prior to any reclassification.

Several commenters argued that the agencies should provide a formal administrative hearing in connection with reclassifications that are based on a finding that the institution is in unsafe or unsound condition. Commenters argued that the provision in section 38 requiring that this type of reclassification occur only "after notice and opportunity for hearing" indicates a Congressional intent that a full administrative hearing be given in these cases. Commenters also contended that principles of fundamental fairness require a full hearing in these cases.

The agencies do not believe that the statute or the principles of fairness require that a formal administrative hearing be afforded in the case of reclassifications based on a finding of unsafe and unsound condition. The courts have determined that the statutory language—"after notice and opportunity for hearing"—does not require a formal hearing. See, *e.g.*, *United States* v. *Florida East Coast Ry.*, 410 U.S. 224, 240 (1973) (use of the word "hearing" in statute "does not necessarily embrace either the right to present evidence orally and to cross-examine opposing witnesses, or the right to present oral argument to the agency's decisionmaker"). Where, as here, the statute does not contain the phrase "hearing on the record" and the legislative history does not indicate a Congressional intent to provide for a formal hearing, the agency may meet the statutory requirements by providing an informal hearing. See, *e.g.*, *Independent U.S. Tanker Owner Comm.* v. *Lewis*, 690 F.2d 908, 922 n.63 (D.C. Cir. 1982).

The final rules adopt the agencies' proposal to provide institutions with an opportunity for an informal hearing in connection with a reclassification based on the institution's condition. Under the procedures adopted by the agencies, an institution will be provided prior written notice of any intention by the agencies to reclassify the institution, along with an explanation of the reasons for the proposed reclassification. The institution is provided an opportunity to present written testimony and argument and an opportunity for an informal hearing prior to the reclassification. The informal hearing is available as a matter of right. At the informal hearing, the institution may present written and oral argument, written evidence and testimony, and, where appropriate, oral testimony.

The agencies believe that these procedures, which include an opportunity for an informal hearing, provide institutions with an adequate opportunity to be heard prior to agency action. These procedures also ensure that agency action in connection with an institution whose nominal capital levels do not provide an accurate indication of the condition of the institution, will be prompt, as mandated by section 38.

[10] For savings associations, the equivalent categories are the management, assets, risk, and operations components of the MACRO rating.

Several commenters objected to the agency proposal to establish a different procedure—without an opportunity for a hearing—for the reclassification of an institution that has received an unsatisfactory examination rating and failed to correct the deficiency. These commenters favored providing at least an informal hearing in the case of both types of reclassification. Commenters argued that the consequences of reclassification were identical, whether based on an examination rating or on a finding that the institution is in unsafe or unsound condition, and, therefore, a hearing should be provided in both cases.

Commenters also argued that the apparent difference in the wording of the statute in authorizing the two methods for reclassification of insured institutions did not indicate a Congressional intent to deprive institutions of a hearing in connection with a reclassification based on an examination rating. Rather, commenters argued that insured institutions should be afforded an opportunity for a hearing prior to reclassification based on an unsatisfactory examination rating because examinations are inherently subjective and the consequences to the institution of reclassification, particularly for an institution that is nominally adequately capitalized, could be significant. Accordingly, commenters contended that principles of fundamental fairness required that an opportunity for a hearing be provided prior to a reclassification based on an examination rating.

Following consideration of the comments, the agencies have modified the final rules to provide an opportunity for an informal hearing in the case of both types of reclassifications. The agencies believe that providing an opportunity for an informal hearing prior to reclassification based on an unsatisfactory examination rating will provide the institution with an adequate and meaningful opportunity to provide the agency with information and argument relevant to the agency's decision without substantially delaying the ability of the agencies to take prompt action as required by section 38.

The agencies do not believe that a formal hearing is required in connection with reclassifications based on an unsatisfactory examination rating. The statute does not require a formal hearing on the record in the case of these types of reclassifications. Instead, the statute grants the agencies significant discretion in reclassifying an institution that has received an unsatisfactory examination rating and failed to correct the deficiency.

In addition, the agencies believe that the availability of an informal hearing meets any requirement of fundamental fairness or due process when viewed in context. The examination rating that serves as the trigger for a reclassification is the result of a process that involves substantial participation by the affected institution. This participation includes an opportunity to provide all relevant information to the examiner, and to meet with the examiner with regard to issues that arise during the examination. Moreover, following the examination, each of the agencies provides an informal appeals process whereby an institution can seek review of an examiner's decision at a higher level of the agency. Thus, an institution that has been reclassified based on its examination ratings will have already been afforded substantial opportunity to present evidence and argument prior to any reclassification procedure.

The agencies also note that reclassification of an institution based on an examination rating is not an automatic result of receiving an unsatisfactory rating. Instead, each agency retains discretion to initiate the procedures for reclassification and will do so based on the facts of each case.

Finally, no restrictions or requirements become effective automatically as a result of reclassification. As commenters noted, section 38 does not make institutions that have been reclassified immediately subject to the mandatory provisions of section 38. Instead, section 38 authorizes the appropriate agency, in its discretion, to impose requirements or proscriptions contained in section 38.

Several commenters expressed concern that any use of the reclassification procedures would result in public disclosure of an institution's examination rating. Consequently, these commenters contended that the agencies should never reclassify an institution on the basis of ratings received in an examination report. Several other commenters argued that examination ratings are subjective in nature and should not serve as the basis of reclassification of an institution under section 38.

The agencies expect to use the reclassification provisions of section 38 when appropriate. The agencies believe that steps can be taken to prevent public disclosure of examination ratings, and that use of the reclassification provisions of section 38 is important to ensuring prompt corrective action. The agencies also believe that examination ratings are a proper basis for reclassification under section 38. As noted above, depository institutions participate in the examination process and are afforded an informal appeal of an examiner's judgment. Furthermore, reclassification based on a less-than-satisfactory rating is not automatic, and is left to the agency's discretion, with corresponding procedural protections.

A small number of commenters favored other changes to the reclassification procedures. In particular, one commenter urged that the period for filing a response to a proposed reclassification be lengthened from 14-days to 45 or 60 days. In light of the agencies' decision to provide an opportunity for an informal hearing in connection with reclassifications based on an examination rating, the agencies have determined not to lengthen the time within which an institution may provide its initial written response to a proposed reclassification.

Another commenter suggested delaying the effective date of any reclassification to allow the institution to adjust to new restrictions on its activities. The agencies believe that, because reclassification does not result in the automatic application of any mandatory provision under section 38, it is not necessary to delay the effective date of any reclassification.

Finally, one commenter requested that the agencies provide by regulation that the presiding officer at a hearing not be an individual that has served as an examiner of the institution. The agencies expect to select presiding officers that may render a qualified recommendation to the agency regarding whether reclassification is appropriate, and do not believe that it is necessary or appropriate to specify in the regulation the qualifications of the presiding officer.

5. Enforcement of Directives

Section 8 of the FDI Act, as amended by FDICIA, includes prompt corrective action directives issued pursuant to section 38 among the orders that may be enforced in the courts pursuant to section 8(i)(1), and also makes any depository institution, company, or institution-affiliated party that violates such a directive subject to civil money penalties pursuant to section 8(i)(2)(A). 12 U.S.C. 1818(i). The final rules adopt the proposed clarification that the failure of a depository institution to implement, in any material respect, a capital restoration plan, or the failure of a company having control of a depository institution to fulfill a

guarantee that the company has given in connection with a capital plan accepted by the appropriate Federal banking agency, will subject responsible parties to civil money penalties. Commenters did not object to this proposal.

G. Capital Restoration Plans

1. Information Required

Section 38 requires an institution that is undercapitalized, significantly undercapitalized, or critically undercapitalized to submit a plan to the appropriate Federal banking agency to restore the institution's capital at least to the minimum capital levels required for adequately capitalized institutions. The statute requires that this capital restoration plan be submitted in writing and specify:

(1) The steps the institution will take to become adequately capitalized;
(2) The levels of capital the institution expects to attain in each year that the plan is in effect;
(3) How the institution will comply with the restrictions and requirements imposed on the institution under section 38;
(4) The types and levels of activities in which the institution will engage; and
(5) Any other information required by the appropriate Federal banking agency.

Section 38 provides that the appropriate Federal banking agency may not accept a capital restoration plan unless the plan:

(1) Contains the information required by statute;
(2) Is based on realistic assumptions and is likely to succeed in restoring the institution's capital; and
(3) Would not appreciably increase the risk (including credit risk, interest-rate risk, and other types of risk) to which the institution is exposed.

The agencies did not propose to require by regulation any additional information in a capital restoration plan submitted under section 38, and the commenters generally agreed that the agencies should not impose additional reporting requirements by regulation. The commenters argued that the agencies could require additional information in cases in which circumstances warranted.

2. Schedule for Submission and Review of Capital Plans

The agencies proposed adopting the schedule for submission and review of capital restoration plans that is generally established in the statute. This schedule provided an institution with 45 days to submit a capital restoration plan after the institution has received notice or been deemed to have notice that the institution is undercapitalized, significantly undercapitalized or critically undercapitalized.[11] The proposal permitted the appropriate Federal banking agency to change this period in individual cases, provided that the agency notified the institution that a different schedule had been adopted.

The proposed schedule also required the appropriate Federal banking agency to review each capital restoration plan within 60 days of submission of the plan unless the agency extends the time for review. The agencies would be required to provide written notice to the institution regarding whether the agency had approved or rejected the capital plan. The agency would also provide a copy of each acceptable capital restoration plan, or amendments thereto, to the FDIC within 45 days of accepting the plan.

The commenters addressing this proposal generally supported adopting the schedule provided in section 38, without revision. Two commenters argued that the agencies should be required to review capital restoration plans in less than 60 days.

The final rules adopt the schedule for filing and review of capital restoration plans as proposed. The agencies have determined not to shorten the review period for capital plans as a general matter because the longer period will permit the agencies to discuss revisions to the plan with the institution before the agency is required to take final action on the plan. The agencies expect, however, not to delay action on capital plans, and to act on these plans well within the regulatory schedule.

3. Failure to Submit or Implement an Acceptable Capital Plan

Section 38 provides that an undercapitalized institution that fails to submit or implement, in any material respect, an acceptable capital plan shall be subject to the same restrictions applicable to an institution that is significantly undercapitalized. In the event that the appropriate Federal banking agency has disapproved an institution's capital restoration plan, the proposal would require the institution to submit a new capital restoration plan within a time specified by the appropriate Federal banking agency. During the period following notice of such disapproval and prior to approval by the agency of a new or revised capital plan, the statute treats the institution in the same manner as a significantly undercapitalized institution. Institutions that fail to submit any capital restoration plan within the required period also are subject to the provisions applicable to significantly undercapitalized institutions. Included in these provisions is the statutory prohibition on payment by the institution of any bonus or raise to any senior executive officer.

Several commenters argued that the rule should be revised to permit an undercapitalized institution that had submitted its original capital restoration plan in good faith an opportunity to formulate and submit a revised capital plan before becoming subject to the provisions applicable to significantly undercapitalized institutions. Commenters expressed concern that rejection of the capital plan by the institution's appropriate agency, and corresponding treatment of the institution as significantly undercapitalized, pre-supposes an unwillingness on the part of the institution to devise and implement an acceptable capital plan. Commenters argued that a capital restoration plan may be found by an agency to be unacceptable for reasons that are unrelated to the willingness or ability of the institution to devise an acceptable capital plan. For example, commenters were concerned that a capital plan may be rejected because an institution was unaware that the appropriate agency expected the institution to take certain steps in addition to the steps proposed by the institution, or because developments may have occurred during the period that the plan is under review by the agency that were not reasonably foreseeable by the institution at the time the plan was submitted.

As an initial matter, the agencies believe that it is important that an undercapitalized institution discuss the development of its capital restoration plan with the appropriate banking agency during the period that the plan is being developed. The agencies have adopted the maximum time periods permitted by section 38 for the formal submission and review of a capital restoration plan in order to permit an opportunity for informal discussions between institutions and the appropriate agency. The adoption of a schedule for formal action does not, and is not intended to, preclude informal discussions between the institution and the appropriate agency regarding the elements of the plan prior to the time that the plan is formally submitted.

[11] As discussed above, an institution is deemed to have been notified of its capital category on the date that it is required to file its Call Report, the date that the institution receives its final report of examination or inspection, or the date that the appropriate federal banking agency notifies the institution of the institution's capital category (based on an adjustment to capital reported by the institution or on other information obtained by the agency).

Further, as noted above, the agencies expect discussions to continue during the period that the agency reviews the plan. These discussions should eliminate the chances that a capital restoration plan will be rejected by the agency for a reason that is not anticipated by the institution.

In cases in which an undercapitalized institution nonetheless has failed to submit a capital restoration plan or a plan submitted by an institution is rejected by the appropriate agency, the statute provides that the institution is subject to the provisions applicable to significantly undercapitalized institutions. This treatment has two consequences under section 38.[12] First, the institution is subject to restrictions on its ability to pay bonuses or salary increases to the institution's senior executive officers. In this regard, section 38 specifically prohibits any institution that has failed to submit a capital restoration plan that is acceptable to its appropriate agency from paying any bonus or raise to its senior executive officers. The purpose of this restriction appears to be to prevent senior officers of an undercapitalized institution from receiving any increase in pay if the officers have not devised and submitted a capital restoration plan that the agency agrees will address the problems faced by the institution.

Second, the appropriate Federal banking agency for the institution is permitted to take, and must consider taking, a number of additional discretionary actions in connection with the institution. In determining whether to exercise its discretion to take additional supervisory actions, the agencies believe that they may consider the types of factors noted by the commenters, including events that have occurred after submission of the original plan, the efforts of management to devise a realistic and acceptable plan, and other factors.

In light of the statutory language and the ability of the agencies to consider the factors identified by commenters on a case-by-case basis in determining appropriate action that the agency should take, the agencies believe that it is appropriate to retain in the final rules the provision indicating that an undercapitalized institution is subject to the provisions applicable to significantly undercapitalized institutions in the event the institution has submitted a capital restoration plan that is rejected by the appropriate agency. Similarly, an undercapitalized institution that fails to implement, in any material respect, its capital restoration plan would immediately be subject to these same provisions upon the institution's failure to implement the plan.

4. Guarantee of Performance of Capital Restoration Plan

Section 38 provides that the appropriate agency may not accept a capital restoration plan submitted by an undercapitalized institution unless each company that controls the institution has guaranteed that the institution will comply with the plan until the institution has been adequately capitalized on average during each of four consecutive calendar quarters, and each such company has provided appropriate assurances of performance. This guarantee by any controlling company is independent of any liability of affiliates of the depository institution pursuant to the cross-guarantee provision of the FDI Act (12 U.S.C. 1815(e)).

The agencies proposed to implement the performance guarantee provision by providing that the agencies will not approve a capital restoration plan required to be submitted by an undercapitalized, significantly undercapitalized, or critically undercapitalized institution under section 38, unless each company that controls the institution submits a written guarantee of the plan.[13] The performance guarantee would include a commitment to take actions required by the capital plan, including, for example, assuring that competent management will be selected, restricting transactions between the institution and the controlling company, and discontinuing certain risky activities within the institution or an affiliate. This guarantee would also include assurances that the institution would fulfill any commitments to raise capital made in the plan. Each company that provides the financial guarantee would be jointly and severally liable for fulfillment of the guarantee, up to the statutory limit of liability. Failure of any company that controls an undercapitalized institution to provide the required guarantee causes the institution to become subject to the provisions of section 38 applicable to significantly undercapitalized institutions.

Section 38 also requires each company that controls an undercapitalized institution to provide adequate assurances that the institution will perform under its capital plan. Providing adequate assurances will include committing to take whatever steps are necessary to ensure that the capital restoration plan is fully implemented.

The agencies requested comment regarding whether it was appropriate to specify by regulation the types of performance assurances that would be required. In addition, the agencies proposed a number of clarifications to the capital guarantee in the original proposal.

Most of the commenters that addressed the guarantee provisions suggested that the agencies determine on a case-by-case basis, and not specify by regulation, the form of guarantee that would be acceptable and whether adequate assurances of performance had been given by companies that control an undercapitalized institution. At this time, the agencies agree with the commenters that the adequacy of a capital guarantee and of the assurances of performance should be determined on a case-by-case basis in connection with an agency's review of capital restoration plans, and not by regulation. This will provide the agencies and companies that control undercapitalized institutions with flexibility to devise guarantees that are appropriate for individual cases, and permit the agencies and the industry to gain experience with the types of assurances that are adequate. As the agencies and the industry gain experience in this area, the agencies will reconsider whether it is appropriate to establish regulatory requirements in this area.

The commenters generally did not object to the agencies' interpretation that each company that provides a performance guarantee under section 38 would be jointly and severally liable for fulfillment of the guarantee. However, several commenters requested clarification regarding whether companies that are intermediate shell holding companies would be permitted to fulfill their guarantee requirement by providing a certification that the parent of the intermediate companies would guarantee performance. Similarly, these commenters sought agency guidance regarding whether intermediate shell holding companies would be permitted to rely on the financial resources of the parent company or of a third party as adequate assurance of performance on the guarantee.

The agencies believe that a guarantee that is backed by the contractual pledge of resources of a parent company may, particularly in situations involving the ownership of an insured institution by a company through a wholly owned domestic shell holding company, satisfy

[12] As explained above, a significantly undercapitalized institution is subject to the same mandatory and discretionary provisions that apply to undercapitalized institutions.

[13] A capital restoration plan does not supersede an existing net worth maintenance agreement.

the requirements of section 38. In other situations, a third party guarantee made by a party with adequate financial resources may be satisfactory for purposes of section 38. The agencies will consider the type of guarantee that would be appropriate in multi-tier holding companies on a case-by-case basis. The agencies will also consider on a case-by-case basis the type of guarantee that is necessary in the case of a parent holding company that is a shell company or has limited resources.

Section 38 limits the aggregate liability under the capital performance guarantee of all companies that control a given insured depository institution to the lesser of:

(1) An amount equal to 5 percent of the institution's total assets at the time the institution became undercapitalized; or

(2) The amount necessary (or that would be necessary) to bring the institution into compliance with all capital standards applicable with respect to such institution as of the time the institution fails to comply with its capital restoration plan.

In incorporating this provision into the regulation, the agencies proposed to adopt the same definition of total assets for purposes of computing the first component of the limit on liability as would be used in determining the capital category of the institution. As discussed above, the commenters unanimously favored using the same definition of capital terms to the extent possible in implementing section 38, and argued against the use of definitions that would require daily calculation of risk-weighted assets or capital. The final rules rely on existing definitions and capital calculation procedures in implementing the capital guarantee provisions.

The agencies also proposed to clarify that the second component of the limit on liability refers to the amount necessary to restore the capital of the institution to the applicable minimum capital levels as those levels were defined at the time that the institution initially failed to comply with its capital plan. The amount of a capital guarantee would not change if the minimum capital adequacy standards changed after the time the institution initially failed to comply with its capital restoration plan. [14] The commenters that addressed this issue favored this approach, and the agencies have adopted the proposal in the final rules.

[14] Any modification of the minimum capital requirement for savings associations, required by FIRREA's transition schedules, is not a change of the minimum capital adequacy requirements for purposes of section 38 and this part.

The final rules also include the agencies' proposal for implementing the statutory provision that limits the duration of a guarantee of a capital plan. Under the proposal, the appropriate Federal banking agency would provide notice to the company that the guarantee has expired once the depository institution has remained adequately capitalized for four consecutive calendar quarters. This approach permits the agency and the institution to verify that the limit of liability under the guarantee has expired.

The final rules adopt provisions that make clear that expiration of a guarantee or fulfillment of a guarantee given by a company in connection with one capital restoration plan does not relieve the company from the obligation to guarantee another capital restoration plan that may be required at a future date for the same institution if it again becomes undercapitalized. Similarly, the fact that a company has, at one time, fulfilled a guarantee by providing resources to an institution up to the statutory limit would not reduce the amount of any guarantee of a future capital plan for the same institution. Moreover, the provision or fulfillment by a company of a guarantee for one institution does not affect the obligation of that company to guarantee a capital plan in connection with any other insured depository institution. Commenters generally did not disagree with these provisions.

One commenter asked that a company that has performed on a guarantee of a capital plan be granted a two-year grace period before being required to guarantee another plan by the same institution. The agencies do not believe that the statute contemplates such an exception.

5. Priority in Bankruptcy

In the original proposal for comment, the agencies noted that the FDIC will have a priority claim in any bankruptcy proceedings of a holding company that has guaranteed an institution's compliance with a capital restoration plan. The FDIC's claim against a holding company's estate would have priority over the claims of unsecured creditors and is provided for in section 507(a)(8) of Title 11 of the United States Code, as amended by the Crime Control Act of 1990, Public Law 101-647, 104 Stat. 4789. Sections 365(o) and 523(a)(12) of Title 11 of the United States Code, as amended by the Crime Control Act of 1990, also provide special protections for the FDIC. The agencies did not receive any comment on this matter.

6. Submission of Plans by Reclassified Institutions

Section 38(g) provides that an institution that has been reclassified to a different capital category as a result of an agency determination that the institution is in an unsafe or unsound condition or is engaged in an unsafe or unsound practice must describe the steps the institution will take to address these deficiencies. The final rules reflect this statutory requirement.

Section 38(g) also provides that an institution is not required to submit a capital restoration plan if the institution nominally has adequate capital but has, because of its condition or practices, been made subject to provisions applicable to an undercapitalized institution. The agencies requested comment on whether it was appropriate to require by regulation that all adequately capitalized institutions that are subject to provisions as if the institution were undercapitalized file a plan describing the steps that would be required to address its deficiencies. The commenters strongly urged that this provision not be adopted in the regulation and that the agencies reserve authority to require plans on a case-by-case basis. The agencies agree that these plans may not always be appropriate and have determined to consider the need for these plans on a case-by-case basis as provided in section 38.

7. Revised Capital Restoration Plans

The agencies requested comment regarding whether the final rules should require in all cases that an insured depository institution that is operating under a capital restoration plan that has been approved by the appropriate Federal banking agency must submit an additional or a revised capital restoration plan if the institution's capital classification changes. Commenters generally believed that an inflexible rule would result in requiring an institution to file capital plans more frequently than necessary to address the institution's problems. On the other hand, commenters agreed that the agencies had discretion under section 38 to require a capital plan in individual cases as appropriate.

The final rules do not adopt a regulatory requirement that an institution file a new or revised capital restoration plan in the event that the institution's capital category changes. Instead, the agencies have adopted a provision in the final rules retaining discretion to determine on a case-by-case basis that an institution must

submit a new or revised capital plan. Under the final rules, in the event that the agency determines that a new or revised plan must be submitted, the agency will provide notice to the institution.

H. Monitoring Undercapitalized Institutions.

Section 38 requires the agencies to monitor closely institutions that are undercapitalized, significantly undercapitalized, or critically undercapitalized. The agencies must also monitor compliance by these institutions with their capital restoration plans and with restrictions and requirements imposed under section 38. This monitoring will be carried out through review of the reports filed by the institution, examinations of the institution on an appropriate time schedule, and informal discussions with the institution regarding the steps that it is taking to improve its condition, develop and implement an acceptable capital restoration plan, and comply with applicable requirements.

As part of this monitoring program, the appropriate Federal agency will discuss with the institution any revisions that may need to be made by an institution to its capital plan. The appropriate agency also will discuss elimination of restrictions that are no longer needed as an institution successfully implements its capital plan and improves its financial condition. Once an institution has fulfilled its capital restoration plan and returned to at least the adequately capitalized category, directives issued pursuant to section 38 will be removed.

I. Other Matters

1. Definition of "Management Fee"

Section 38 of the FDI Act prohibits any institution from paying management fees to a controlling person if, following the payment of those fees, the institution would be undercapitalized. The agencies had proposed to define a management fee to be any payment for management services or advice, other than payments to individuals in their capacity as employees of the institution.

Commenters expressed concern that this definition could be interpreted to preclude payments for non-management services obtained from an affiliate, such as data processing services. In order to address this concern, one commenter, representing a group of insured institutions, suggested defining a management fee to be any payment made for the provision of management services or advice in connection with "supervisory, executive, managerial, or policymaking functions." The agencies believe that this formulation covers the types of fees identified by the statute without affecting fees paid for non-management services, which are not prohibited by the mandatory provisions of section 38.

The final rules generally adopt the language suggested by the commenter and define management fees to include any payment of money or provision of any other thing of value to a company or individual for the provision of management services or advice to the bank, or related overhead expenses, including payments related to supervisory, executive, managerial, or policymaking functions, other than compensation to an individual in the individual's capacity as an officer or employee of the bank. The definition does not include payments to a controlling person for such things as electronic data processing, trust activities, mortgage servicing, audit and accounting services, property management, or other similar service fees.

The agencies point out that while fees paid for nonmanagement services provided by an affiliate are not prohibited by the mandatory provisions of section 38, the agencies have discretion under several provisions of section 38 to restrict any fees paid to an affiliate by an undercapitalized institution or any transaction between the undercapitalized institution and an affiliate. The agencies also stress that all management fees and servicing fees paid by an insured institution to an affiliate are subject to the restrictions and requirements of sections 23A and 23B of the Federal Reserve Act (12 U.S.C. 371c, 371c–1), regardless of the institution's capital category under section 38. Sections 23A and 23B require that services that are provided to an insured institution be provided on terms that are at least as favorable to the insured institution as would be available from a third party.

2. Definition of "Control" and "Controlling Person"

The agencies requested comment regarding the definition of "control," particularly whether an exception should be provided for persons that have acquired control of an institution in a fiduciary capacity or in satisfaction of a debt previously contracted (DPC). The word "control" is used in two provisions of the regulation: first, in the definition of controlling person, noted below, and second, in the requirement that for any capital restoration plan to be acceptable, the plan must be guaranteed by each company having control of the institution.

Section 38 does not define the term "control." Section 3 of the FDI Act, however, adopts the definition of "control" contained in section 2 of the Bank Holding Company Act (BHC Act) (12 U.S.C. 1841(a)(2)). Under the BHC Act, a company controls an institution if the company owns or controls 25 percent or more of the voting securities of that institution, controls the board of directors of the institution; or exercises a controlling influence over the management or policies of the institution.

The BHC Act also provides exclusions for certain types of share ownership from the applicability of the control provisions. Section 2(a)(5)(A) of the BHC Act (12 U.S.C. 1841(a)(5)(A)) states that a bank or company is not deemed to be a bank holding company by virtue of its ownership or control of shares in a fiduciary capacity, provided that the bank or company does not retain sole right to vote the shares. Additionally, section 2(a)(5)(D) of the BHC Act (12 U.S.C. 1841(a)(5)(D)) permits a company to hold shares of a depository institution acquired DPC without being deemed to be a bank holding company, provided that the company disposes of the shares within two years (with the possibility of three one-year extensions).

The proposed rules noted that the FDI Act also contains a DPC exception. Section 5 of the Act (12 U.S.C. 1815), addresses the liability of commonly controlled depository institutions for "cross-guarantee" claims. Section 5(e)(7) of the FDI Act (12 U.S.C. 1815(e) (7)) contains an exception for the acquisition by an insured depository institution of shares of another depository institution in satisfaction of a debt previously contracted. That exception is conditioned on the requirement that all transactions between the controlling institution or any affiliate of the controlling institution and the subsidiary institution comply with the restrictions contained in sections 23A and 23B of the Federal Reserve Act.

The agencies requested comment on whether it would be appropriate under section 38 to provide, by regulation, an exception from the definition of "control" for shares held in a fiduciary capacity or for shares acquired DPC. The agencies also requested comment on whether, assuming there were an exception for shares acquired DPC, the exception should be subject to the conditions established in the FDI Act regarding compliance with sections 23A and 23B.

The agencies received 18 comment letters on this matter. All 18 comment letters supported the adoption of a definition of "control" similar to that found presently in the BHC Act. Seventeen comment letters also supported the adoption of fiduciary ownership and DPC exceptions from the definition of "control". Commenters strongly supported adopting these exceptions and argued that without these exceptions companies would be unlikely to hold stock from an insured institution in a fiduciary capacity or accept such stock as collateral for a loan because of the potential liability under section 38. Seven comment letters supported the inclusion of conditions similar to those contained in section 5(e)(7) of the FDI Act in the DPC exception, with one comment letter opposed.

The agencies have included in the final rules implementing section 38 a definition of the term "control" identical to that provided in section 2 of the BHC Act and an exception from that definition for shares held in a fiduciary capacity and for shares acquired DPC. Similar to section 2(a)(5)(A) of the BHC Act, the fiduciary exception is premised on the condition that the bank or company holding the shares not retain the sole right to vote the shares. The DPC exception in the final rule parallels section 2(a)(5)(D) of the BHC Act in that the shares held DPC must be disposed of within two years, with the possibility of three one-year extensions. The agencies did not consider it necessary to include conditions similar to those contained in the DPC exception to section 5 of the FDI Act (12 U.S.C. 1815(e)(7)) in the final rule.

Qualification for an exemption from the definition of control, however, does not exempt the depository institution whose shares are held by another company or depository institution from the provisions of section 38. Whether or not it is "controlled" by another entity, a depository institution whose stock is held DPC or in a fiduciary capacity will still be subject to all relevant provisions of section 38 in accordance with its capital category. For example, an undercapitalized institution whose stock is held DPC may not pay dividends.

The final rules add a definition of the term "controlling person." The term "controlling person" is defined as any person having control of an insured depository institution and any company controlled by that person. Thus, the prohibition on payment of management fees covers payment to any company, including a consulting firm, owned by the principal shareholder of an institution, and any servicing company owned by a bank holding company.

3. Restrictions on Advertising

The proposed rule limited an insured depository institution's use of its capital category for any purpose, except when permitted by the appropriate Federal banking agency or otherwise required by law. This provision was intended to restrict the ability of insured depository institutions to advertise their capital category.

The agencies received eleven comments in support of this limitation on use of the capital category. Twelve commenters objected and urged that financial institutions be allowed to advertise their capital category.

Some commenters expressed concern about the practicality of such a prohibition given that disclosure of the category may be required for purposes of risk-based deposit insurance premiums, brokered deposits, and interbank liabilities. Disclosure may also be necessary in securities filings.

The agencies recognize that disclosure may be appropriate under some circumstances. The prompt corrective action framework in section 38 was designed, however, to be a supervisory tool, not a marketing vehicle. The agencies have long held that capital levels are a lagging indicator of problems in financial institutions. An advertisement that cites a financial institution's capital category under section 38 could be misleading to the general public. Depositors, investors and other affected persons could improperly view the capital category designation as the regulator's definitive assessment of the insured depository institution's true financial condition.

Taking account of the concerns expressed by the commenters, the final rule has narrowed the disclosure restriction to prohibit the advertising of the capital category assigned to an institution pursuant to section 38. The final rule does not restrict advertising of the institution's capital levels or financial condition. The institution may not, however, describe itself in an advertisement or in promotional material as falling within the well capitalized category, as that category is defined by the Federal banking agencies pursuant to section 38. Nor may the institution advertise that its appropriate Federal banking agency has determined it to be well capitalized.

4. Applicability of Capital Categories to Bank Holding Companies and Savings and Loan Holding Companies

Section 38 applies capital-based prompt corrective action to insured depository institutions but not to holding companies that control such institutions. The commenters strongly urged the Federal Reserve Board and the OTS not to impose the framework of section 38 to bank holding companies and to savings and loan holding companies. Several commenters argued that the enactment of section 38 provided the agencies with an opportunity to eliminate the capital adequacy standards that are currently applicable to bank holding companies and savings and loan holding companies.

The Board and the OTS have determined not to apply section 38 to bank holding companies and savings and loan holding companies. The statute, by its terms, applies only to insured depository institutions, and Congress has provided no indication that it intended the framework to be extended. The agencies also have authority under a number of other statutory provisions to supervise the activities and financial condition of holding companies.

The agencies note, however, that, while the complete supervisory framework of section 38 does not govern holding companies, various provisions of section 38 apply to companies that control insured depository institutions. These provisions, including the provisions regarding guarantee of a capital restoration plan, appear to apply to holding companies regardless of the capital level of those holding companies. The Federal Reserve Board intends to consult with the Federal banking agency for each insured depository institution subsidiary of a bank holding company to monitor supervisory actions required under section 38, and, in the supervision of the holding company, to take appropriate action at the holding company level based on an assessment of these developments. In supervising savings and loan holding companies, the OTS will concentrate on ensuring that subsidiary savings associations are well managed and well capitalized and that transactions and relationships between savings associations and their holding companies satisfy fiduciary requirements and do not negatively affect the safety and soundness of the subsidiary associations. OTS will supervise holding companies in a manner consistent with the effectiveness of supervisory actions required under section 38 imposed upon subsidiary associations.

5. Restrictions on Activities of Critically Undercapitalized Institutions

Section 38(i) of the FDI Act provides that the FDIC must, by regulation or

order, restrict the activities of critically undercapitalized institutions. The activities that must be restricted are described above. FDICIA does not provide specific guidance on how to interpret and implement each of the restrictive provisions of section 38(i). Consequently, the FDIC considered a number of options.

The prohibition on entering into "any material transaction other than in the usual course of business" can be interpreted in a general fashion relying on outstanding case law in the area of securities disclosures. The concept of materiality also could be defined from an accounting perspective by establishing specific limits for determining materiality. For example, the FDIC could, by regulation, require that any prospective transaction other than one that is in the usual course of business that results or could result in a 5 percent change in an institution's tangible equity capital account or net income account would automatically be considered a material transaction requiring the FDIC's prior approval. Other transactions could be defined as material on a case by case basis. The FDIC solicited comment on how to define the terms "material" and "usual course of business" as well as what specific guidance, if any, should be provided by the FDIC to the banking industry.

The FDIC received two comments on the materiality issue. One respondent suggested the definition be based on market capitalization as opposed to a percentage based on equity capital. The range suggested was between 5 and 10 percent. The other respondent suggested that the denominator for defining a material transaction be based on 10 percent of total assets.

After consideration of the above comments, the FDIC has decided to define a material transaction on a case-by-case basis. The FDIC believes that defining a material transaction using a fixed percentage of capital or assets could be arbitrary and exclude those transactions that initially may be de minimus in amount or not easily subjected to a quantifiable measure but "material" in substance such as a proposal to engage in a new service-oriented activity. A fixed measurement also could be inconsistent with the statutory requirement that a material transaction includes those activities where the institution would have to notify its appropriate Federal banking agency.

The FDIC did not receive any comments on how to apply the phrase "usual course of business" or what specific guidance, if any, to provide to the banking industry. The FDIC intends to interpret this phrase to mean any activity currently engaged in by the specific institution. Therefore, any new activity not currently exercised by the specific institution, though permissible and approved by the appropriate regulator(s), would require the FDIC's prior written approval. For example, a critically undercapitalized institution that wishes to engage for the first time in commercial real estate lending and to establish a new commercial real estate loan department would be required to obtain the FDIC's prior written approval under this section.

The FDIC recognizes that the types of activities considered "usual" for a particular institution are contingent on its size, location, management expertise, business strategy, etc. Consequently, what may be "usual" for a large urban institution may not be "usual" for a smaller rural institution and vice versa. The FDIC believes that this definition of new activity is consistent with the statutory intent that troubled institutions should focus their attention on their existing problems and existing lines of business.

The FDIC proposed to define the term "highly leveraged transaction" by utilizing the interagency definition published in the **Federal Register** (57 FR 5040, February 11, 1992). Due to the uncertainty over whether the HLT definition will remain in effect, the FDIC has decided to adopt in the final rule an abbreviated definition for HLTs that will apply to critically undercapitalized institutions. The FDIC also intends to rely on existing generally accepted accounting principles when interpreting the restriction on making any "material change in accounting methods."

Section 39(c) of the FDI Act requires the Federal banking agencies to prescribe standards for determining when compensation paid to employees, directors and principal shareholders of insured depository institutions is excessive. An advance notice of proposed rulemaking was recently published in the **Federal Register** (52 FR 31336, July 15, 1992). The FDIC intends to interpret the restrictive provision in section 38(i)(2)(F) involving the payment of excessive compensation or bonuses in a manner that is consistent with the FDIC's actions in fulfilling the requirements of section 39(c) of the FDI Act. In the interim, the FDIC intends to enforce section 38(i) by requiring prior written approval of any change in the institution's compensation of any of its executive officers (as defined in Federal Regulation O (12 CFR part 215), directors and principal shareholders and will consider existing compensation levels on a case-by-case basis.

The provision that restricts "paying interest on new or renewed liabilities at a rate that would increase the institution's weighted average cost of funds to a level significantly exceeding the prevailing rates of interest on insured deposits in the institution's normal market areas" contains terms that are similar to those mandated by section 301 of FDICIA and the revisions of § 337.6 of the FDIC's regulations (12 CFR 337.6) as recently implemented by the FDIC. Specifically, the FDIC intends to interpret the phrase "significantly exceeding the prevailing rates" the same as defined in § 337.6. The prevailing effective yields of interest are the effective yields on insured deposits of comparable maturities offered by other insured depository institutions in the market area in which deposits are being solicited. A market area is any readily defined geographic area in which the rates offered by any one insured depository institution soliciting deposits in the area may affect the rates offered by other institutions soliciting deposits in the same area.

6. Application of Prompt Corrective Action to Insured Branches

Section 38(a)(2) of the FDI Act, as added by section 131 of FDICIA, provides that each appropriate Federal banking agency and the FDIC (acting in the FDIC's capacity as the insurer of depository institutions) shall take prompt corrective action to resolve the problems of insured depository institutions.

Section 3(c)(2) of the FDI Act defines the term "insured depository institution" as any bank or savings association the deposits of which are insured by the FDIC pursuant to the FDI Act. 12 U.S.C. 1813(c)(2). The term "bank" is defined, in section 3(a)(1) of the FDI Act, to include, *inter alia*, any "insured branch." 12 U.S.C. 1813(a)(1). Section 3(s)(3) defines the term "insured branch" to mean any branch (as defined in section 1(b)(3) of the International Banking Act of 1978) of a foreign bank any deposits in which are insured pursuant to the FDI Act. 12 U.S.C. 1813(s)(3).

The plain language of these statutory provisions requires the application of the prompt corrective action provisions to insured branches of foreign banks, including insured federal branches. Insured branches, however, are not required to maintain minimum capital levels under the FDIC's capital maintenance regulations, 12 CFR part 325. In fact, they are expressly excluded

from the definition of "insured depository institution" which is used in the FDIC's capital maintenance regulations. 12 CFR 325.2(f). Insured branches, however, are required to maintain a pledge of assets, pursuant to 12 CFR 346.19, and a certain volume of eligible assets, pursuant to 12 CFR 346.20.

Insured federal branches, likewise, are not required to maintain minimum capital levels under the OCC's capital maintenance regulations, 12 CFR part 3. See 50 FR 10215, March 14, 1985. In addition to the asset pledge and asset maintenance requirements to which all insured branches are subject, all federal branches are required by section 4 of the International Banking Act of 1978 (12 U.S.C. 3102(g)(2)) to establish capital equivalency deposits which generally must equal at least 5 percent of the branch's third party liabilities. Federal branches also may be required by the OCC to maintain a certain quantity of specified assets in the states in which they operate.

In an effort to promote competitive equality between insured federal and state branches of foreign banks, the OCC and the FDIC proposed a uniform definition of capital categories for all insured branches of foreign banks based upon the FDIC's asset pledge and asset maintenance requirements which apply to all insured branches.

The OCC and the FDIC recognize that the eligible assets and, more particularly, the pledge of assets are not perfect substitutes for capital. Nonetheless, the FDIC has long taken the position that the asset maintenance requirement is analogous to a domestic bank's required capital. Therefore, the OCC and the FDIC have decided to utilize FDIC's regulations governing the pledge of assets and the level of eligible assets to determine an insured branch's capital category.

For prompt corrective action purposes, an insured federal branch will be deemed:

"Well capitalized" if it:

1. Maintains the pledge of assets required under 12 CFR 346.19; and

2. Maintains the eligible assets prescribed under 12 CFR 346.20 at 108 percent or more of the preceding quarter's average book value of the insured branch's third-party liabilities; and

3. Has not received written notification from (1) the OCC to increase its capital equivalency deposit pursuant to 12 CFR 28.6(a), or to comply with the asset maintenance requirements pursuant to 12 CFR 2809 or (2) the FDIC to pledge additional assets pursuant to 12 CFR 346.19 or to maintain a higher ratio of eligible assets pursuant to 12 CFR 346.20.

"Adequately capitalized" if it:

1. Maintains the pledge of assets required under 12 CFR 346.19;

2. Maintains the eligible assets prescribed under 12 CFR 346.20 at 106 percent or more of the preceding quarter's average book value of the insured branch's third-party liabilities; and

3. Does not meet the definition of a "well capitalized" insured branch.

"Undercapitalized" if it:

1. Fails to maintain the pledge of assets required under 12 CFR 346.19; or

2. Fails to maintain the eligible assets prescribed under 12 CFR 346.20 at 106 percent or more of the preceding quarter's average book value of the insured branch's third-party liabilities.

"Significantly undercapitalized" if it fails to maintain the eligible assets prescribed under 12 CFR 346.20 at 104 percent or more of the preceding quarter's average book value of the insured branch's third-party liabilities.

"Critically undercapitalized" if it fails to maintain the eligible assets prescribed under 12 CFR 346.20 at 102 percent or more of the preceding quarter's average book value of the insured branch's third-party liabilities.

Section 38 of the FDI Act enumerates the corrective measures that the appropriate Federal banking agency may or must take against, and what restrictions apply to, institutions in each of the five capital categories. Some of the prescribed measures and applicable restrictions may not be practical or appropriate in dealing with insured branches of foreign banks.

Therefore, it is the intent of the OCC and the FDIC to apply to insured branches as many of the prompt corrective measures and restrictions as practical and appropriate, given the unique characteristics of insured branches.

Several respondents expressed the view that the prompt corrective action provisions in section 38 of the FDI Act should apply to insured branches of foreign banks and that the capital levels should be comparable with those for domestic banks. The FDIC and OCC, as the primary federal regulators of insured branches, concur with this approach. As a result, the prompt corrective action rules of the FDIC and OCC intend to accomplish this objective by using the asset pledge and asset maintenance tests noted above for purposes of determining an insured branch's capital category.

Regulatory Flexibility Act

Pursuant to section 605(b) of the Regulatory Flexibility Act, it is hereby certified that these final rules will not have a significant impact on a substantial number of small entities.

The final rules impose the minimum burdens necessary to implement the prompt corrective action provisions of section 131 of FDICIA for all insured depository institutions, regardless of size. The regulation requires each insured depository institution to monitor its capital levels and to report to the appropriate Federal banking agency any material event that would cause the institution to be classified within a lower capital category. In addition, the final rules require an institution that becomes undercapitalized, significantly undercapitalized, or critically undercapitalized to submit a capital restoration plan.

The filing of the capital plan is a requirement imposed by statute and occurs only when an institution initially becomes undercapitalized, significantly undercapitalized, or critically undercapitalized. In establishing a mechanism for gathering sufficient information to determine the appropriate capital category for each insured depository institution, the Federal banking agencies have attempted to reduce the burden imposed on such institutions by relying primarily on the Call Report that must already be filed and on reports of examination that would otherwise take place. No additional regular reporting requirement has been imposed.

Executive Order 12291

The OCC and OTS have determined that these final rules are not major regulations as defined in Executive Order 12291. These final rules implements section 131 of FDICIA, which established a new statutory framework for resolving the problems of insured depository institutions at the least long-term cost to the FDIC.

List of Subjects

12 CFR Part 6

Banks, Banking, Capital adequacy, National banks.

12 CFR Part 19

Administrative practice and procedure, Crime, Dismissals, Investigations, National banks, Penalties, Reclassification, Securities.

12 CFR Part 208

Accounting, Agriculture, Banks, banking, Confidential business

information, Currency, Federal Reserve System, Reporting and recordkeeping requirements, Securities.

12 CFR Part 263

Administrative practice and procedure, Federal Reserve System.

12 CFR Part 308

Administrative practice and procedure, claims, equal access to justice, lawyers, penalties.

12 CFR Part 325

Bank deposit insurance, Banks, Banking, Capital adequacy, Reporting and recordkeeping requirements, State nonmember banks, Savings associations.

12 CFR Part 565

Administrative practice and procedure, Capital, Savings associations.

FEDERAL RESERVE SYSTEM

12 CFR Parts 208 and 263

For the reasons outlined above, the Board of Governors amends 12 CFR parts 208 and 263 as set forth below:

PART 208—MEMBERSHIP OF STATE BANKING INSTITUTIONS IN THE FEDERAL RESERVE SYSTEM

1. The authority citation for 12 CFR part 208 is revised to read as follows:

Authority: Secs. 9, 11(a), 11(c), 19, 21, 25 and 25(a) of the Federal Reserve Act, as amended (12 U.S.C. 321–338, 248(a), 248(c), 461, 481–486, 601, and 611, respectively); secs. 4, 13(j) and 38 of the Federal Deposit Insurance Act, as amended (12 U.S.C. 1814, 1823(j), and 1831o, respectively); sec. 7(a) of the International Banking Act of 1978 (12 U.S.C. 3105); secs. 907–910 of the International Lending Supervision Act of 1983 (12 U.S.C. 3906–3909); secs. 2, 12(b), 12(g), 12(i), 15B(c) (5), 17, 17A, and 23 of the Securities Exchange Act of 1934 (15 U.S.C. 78b, 781(b), 1781(g), 781(i), 78o–4(c) (5), 78q, 78q–1, and 78w, respectively); sec. 5155 of the Revised Statutes (12 U.S.C. 36) as amended by the McFadden Act of 1927; and secs. 1101–1122 of the Financial Institutions Reform, Recovery, and Enforcement Act of 1989 (12 U.S.C. 3310 and 3331–3351).

Subpart A—General Provisions

2. The undesignated centerheading preceding § 208.1 is removed, §§ 208.1 through 208.19 are designated as subpart A to part 208, and the subpart A heading is added to read as set forth above.

3. Subpart B, comprising §§ 208.30 through 208.35, is added to part 208 to read as follows:

Subpart B—Prompt Corrective Action

Sec.

208.30 Authority, purpose, scope, other supervisory authority, and disclosure of capital categories.
208.31 Definitions.
208.32 Notice of capital category.
208.33 Capital measures and capital category definitions.
208.34 Capital restoration plans.
208.35 Mandatory and discretionary supervisory actions under section 38.

Subpart B—Prompt Corrective Action

§ 208.30 Authority, purpose, scope, other supervisory authority, and disclosure of capital categories.

(a) *Authority.* This subpart is issued by the Board of Governors of the Federal Reserve System (Board) pursuant to section 38 (section 38) of the Federal Deposit Insurance Act (FDI Act) as added by section 131 of the Federal Deposit Insurance Corporation Improvement Act of 1991 (Pub. L. 102–242, 105 Stat. 2236 (1991)) (12 U.S.C. 1831o.).

(b) *Purpose.* Section 38 of the FDI Act establishes a framework of supervisory actions for insured depository institutions that are not adequately capitalized. The principal purpose of this subpart is to define, for state member banks, the capital measures and capital levels that are used for determining the supervisory actions authorized under section 38 of the FDI Act. This subpart also establishes procedures for submission and review of capital restoration plans and for issuance and review of directives and orders pursuant to section 38.

(c) *Scope.* This subpart implements the provisions of section 38 of the FDI Act as they apply to state member banks. Certain of these provisions also apply to officers, directors and employees of state member banks. Other provisions apply to any company that controls a state member bank and to the affiliates of a state member bank.

(d) *Other supervisory authority.* Neither section 38 nor this subpart in any way limits the authority of the Board under any other provision of law to take supervisory actions to address unsafe or unsound practices, deficient capital levels, violations of law, unsafe or unsound conditions, or other practices. Action under section 38 of the FDI Act and this subpart may be taken independently of, in conjunction with, or in addition to any other enforcement action available to the Board, including issuance of cease and desist orders, capital directives, approval or denial of applications or notices, assessment of civil money penalties, or any other actions authorized by law.

(e) *Disclosure of capital categories.* The assignment of a bank under this subpart within a particular capital category is for purposes of implementing and applying the provisions of section 38. Unless permitted by the Board or otherwise required by law, no bank may state in any advertisement or promotional material its capital category under this subpart or that the Board or any other Federal banking agency has assigned the bank to a particular capital category.

§ 208.31 Definitions.

For purposes of this subpart, except as modified in this section or unless the context otherwise requires, the terms used have the same meanings as set forth in section 38 and section 3 of the FDI Act.

(a) (1) *Control* has the same meaning assigned to it in section 2 of the Bank Holding Company Act (12 U.S.C. 1841), and the term "controlled" shall be construed consistently with the term "control."

(2) *Exclusion for fiduciary ownership.* No insured depository institution or company controls another insured depository institution or company by virtue of its ownership or control of shares in a fiduciary capacity. Shares shall not be deemed to have been acquired in a fiduciary capacity if the acquiring insured depository institution or company has sole discretionary authority to exercise voting rights with respect thereto.

(3) *Exclusion for debts previously contracted.* No insured depository institution or company controls another insured depository institution or company by virtue of its ownership or control of shares acquired in securing or collecting a debt previously contracted in good faith, until two years after the date of acquisition. The two-year period may be extended at the discretion of the appropriate Federal banking agency for up to three one-year periods.

(b) *Controlling person* means any person having control of an insured depository institution and any company controlled by that person.

(c) *Leverage ratio* means the ratio of Tier 1 capital to average total consolidated assets, as calculated in accordance with the Board's Capital Adequacy Guidelines for State Member Banks: Tier 1 Leverage Measure (appendix B to part 208).

(d) *Management fee* means any payment of money or provision of any other thing of value to a company or individual for the provision of management services or advice to the bank or related overhead expenses.

including payments related to supervisory, executive, managerial, or policymaking functions, other than compensation to an individual in the individual's capacity as an officer or employee of the bank.

(e) *Risk-weighted assets* means total weighted risk assets, as calculated in accordance with the Board's Capital Adequacy Guidelines for State Member Banks: Risk-Based Measure (appendix A to part 208).

(f) *Tangible equity* means the amount of core capital elements in the Board's Capital Adequacy Guidelines for State Member Banks: Risk-Based Measure (appendix A to part 208), plus the amount of outstanding cumulative perpetual preferred stock (including related surplus), minus all intangible assets except purchased mortgage servicing rights to the extent that the Board determines pursuant to section 475 of the Federal Deposit Insurance Corporation Improvement Act of 1991 (12 U.S.C. 1828 note) that purchased mortgage servicing rights may be included in calculating the bank's Tier 1 capital.

(g) *Tier 1 capital* means the amount of Tier 1 capital as defined in the Board's Capital Adequacy Guidelines for State Member Banks: Risk-Based Measure (appendix A to part 208).

(h) *Tier 1 risk-based capital ratio* means the ratio of Tier 1 capital to weighted risk assets, as calculated in accordance with the Board's Capital Adequacy Guidelines for State Member Banks: Risk-Based Measure (appendix A to part 208).

(i) *Total assets* means quarterly average total assets as reported in a bank's Report of Condition and Income (Call Report), minus intangible assets as provided in the definition of tangible equity.

(j) *Total risk-based capital ratio* means the ratio of qualifying total capital to weighted risk assets, as calculated in accordance with the Board's Capital Adequacy Guidelines for State Member Banks: Risk-Based Measure (appendix A to part 208).

§ 208.32 Notice of capital category.

(a) *Effective date of determination of capital category.* A state member bank shall be deemed to be within a given capital category for purposes of section 38 of the FDI Act and this subpart as of the date the bank is notified of, or is deemed to have notice of, its capital category, pursuant to paragraph (b) of this section.

(b) *Notice of capital category.* A state member bank shall be deemed to have been notified of its capital levels and its capital category as of the most recent date:

(1) A Report of Condition and Income (Call Report) is required to be filed with the Board;

(2) A final report of examination is delivered to the bank; or

(3) Written notice is provided by the Board to the bank of its capital category for purposes of section 38 of the FDI Act and this subpart or that the bank's capital category has changed as provided in paragraph (c) of this section or § 208.33(c).

(c) *Adjustments to reported capital levels and capital category.—(1) Notice of adjustment by bank.* A state member bank shall provide the Board with written notice that an adjustment to the bank's capital category may have occurred no later than 15 calendar days following the date that any material event has occurred that would cause the bank to be placed in a lower capital category from the category assigned to the bank for purposes of section 38 and this subpart on the basis of the bank's most recent Call Report or report of examination.

(2) *Determination by the Board to change capital category.* After receiving notice pursuant to paragraph (c)(1) of this section, the Board shall determine whether to change the capital category of the bank and shall notify the bank of the Board's determination.

§ 208.33 Capital measures and capital category definitions.

(a) *Capital measures.* For purposes of section 38 and this subpart, the relevant capital measures shall be:

(1) The total risk-based capital ratio;

(2) The Tier 1 risk-based capital ratio; and

(3) The leverage ratio.

(b) *Capital categories.* For purposes of section 38 and this subpart, a state member bank shall be deemed to be:

(1) "Well capitalized" if the bank:

(i) Has a total risk-based capital ratio of 10.0 percent or greater; and

(ii) Has a Tier 1 risk-based capital ratio of 6.0 percent or greater; and

(iii) Has a leverage ratio of 5.0 percent or greater; and

(iv) Is not subject to any written agreement, order, capital directive, or prompt corrective action directive issued by the Board pursuant to section 8 of the FDI Act, the International Lending Supervision Act of 1983 (12 U.S.C. 3907), or section 38 of the FDI Act, or any regulation thereunder, to meet and maintain a specific capital level for any capital measure.

(2) "Adequately capitalized" if the bank:

(i) Has a total risk-based capital ratio of 8.0 percent or greater; and

(ii) Has a Tier 1 risk-based capital ratio of 4.0 percent or greater; and

(iii) Has—

(A) A leverage ratio of 4.0 percent or greater, or

(B) A leverage ratio of 3.0 percent or greater if the bank is rated composite 1 under the CAMEL rating system in the most recent examination of the bank and is not experiencing or anticipating significant growth; and

(iv) Does not meet the definition of a "well capitalized" bank.

(3) "Undercapitalized" if the bank:

(i) Has a total risk-based capital ratio that is less than 8.0 percent; or

(ii) Has a Tier 1 risk-based capital ratio that is less than 4.0 percent; or

(iii) (A) Except as provided in clause (B), has a leverage ratio that is less than 4.0 percent; or

(B) Has a leverage ratio that is less than 3.0 percent, if the bank is rated composite 1 under the CAMEL rating system in the most recent examination of the bank and is not experiencing or anticipating significant growth.

(4) "Significantly undercapitalized" if the bank has—

(i) A total risk-based capital ratio that is less than 6.0 percent; or

(ii) A Tier 1 risk-based capital ratio that is less than 3.0 percent; or

(iii) A leverage ratio that is less than 3.0 percent.

(5) "Critically undercapitalized" if the bank has a ratio of tangible equity to total assets that is equal to or less than 2.0 percent.

(c) *Reclassification based on supervisory criteria other than capital.* The Board may reclassify a well capitalized state member bank as adequately capitalized and may require an adequately capitalized or an undercapitalized state member bank to comply with certain mandatory or discretionary supervisory actions as if the bank were in the next lower capital category (except that the Board may not reclassify a significantly undercapitalized bank as critically undercapitalized) (each of these actions are hereinafter referred to generally as "reclassifications") in the following circumstances:

(1) *Unsafe or unsound condition.* The Board has determined, after notice and opportunity for hearing pursuant to § 263.203 of this chapter, that the bank is in unsafe or unsound condition; or

(2) *Unsafe or unsound practice.* The Board has determined, after notice and opportunity for hearing pursuant to § 263.203 of this chapter, that, in the most recent examination of the bank,

the bank received and has not corrected, a less-than-satisfactory rating for any of the categories of asset quality, management, earnings, or liquidity.

§ 208.34 Capital restoration plans.

(a) *Schedule for filing plan*—(1) *In general.* A state member bank shall file a written capital restoration plan with the appropriate Reserve Bank within 45 days of the date that the bank receives notice or is deemed to have notice that the bank is undercapitalized, significantly undercapitalized, or critically undercapitalized, unless the Board notifies the bank in writing that the plan is to be filed within a different period. An adequately capitalized bank that has been required pursuant to § 208.33(c) to comply with supervisory actions as if the bank were undercapitalized is not required to submit a capital restoration plan solely by virtue of the reclassification.

(2) *Additional capital restoration plans.* Notwithstanding paragraph (a)(1) of this section, a bank that has already submitted and is operating under a capital restoration plan approved under section 38 and this subpart is not required to submit an additional capital restoration plan based on a revised calculation of its capital measures or a reclassification of the institution under § 208.33(c) unless the Board notifies the bank that it must submit a new or revised capital plan. A bank that is notified that it must submit a new or revised capital restoration plan shall file the plan in writing with the appropriate Reserve Bank within 45 days of receiving such notice, unless the Board notifies the bank in writing that the plan is to be filed within a different period.

(b) *Contents of plan.* All financial data submitted in connection with a capital restoration plan shall be prepared in accordance with the instructions provided on the Call Report, unless the Board instructs otherwise. The capital restoration plan shall include all of the information required to be filed under section 38(e)(2) of the FDI Act. A bank that is required to submit a capital restoration plan as the result of a reclassification of the bank pursuant to § 208.33(c) shall include a description of the steps the bank will take to correct the unsafe or unsound condition or practice. No plan shall be accepted unless it includes any performance guarantee described in section 38(e)(2)(C) of that Act by each company that controls the bank.

(c) *Review of capital restoration plans.* Within 60 days after receiving a capital restoration plan under this subpart, the Board shall provide written notice to the bank of whether the plan has been approved. The Board may extend the time within which notice regarding approval of a plan shall be provided.

(d) *Disapproval of capital plan.* If a capital restoration plan is not approved by the Board, the bank shall submit a revised capital restoration plan within the time specified by the Board. Upon receiving notice that its capital restoration plan has not been approved, any undercapitalized state member bank (as defined in § 208.33(b)(3)) shall be subject to all of the provisions of section 38 and this subpart applicable to significantly undercapitalized institutions. These provisions shall be applicable until such time as a new or revised capital restoration plan submitted by the bank has been approved by the Board.

(e) *Failure to submit capital restoration plan.* A state member bank that is undercapitalized (as defined in § 208.33(b)(3)) and that fails to submit a written capital restoration plan within the period provided in this section shall, upon the expiration of that period, be subject to all of the provisions of section 38 and this subpart applicable to significantly undercapitalized institutions.

(f) *Failure to implement capital restoration plan.* Any undercapitalized state member bank that fails in any material respect to implement a capital restoration plan shall be subject to all of the provisions of section 38 and this subpart applicable to significantly undercapitalized institutions.

(g) *Amendment of capital plan.* A bank that has filed an approved capital restoration plan may, after prior written notice to and approval by the Board, amend the plan to reflect a change in circumstance. Until such time as a proposed amendment has been approved, the bank shall implement the capital restoration plan as approved prior to the proposed amendment.

(h) *Notice to FDIC.* Within 45 days of the effective date of Board approval of a capital restoration plan, or any amendment to a capital restoration plan, the Board shall provide a copy of the plan or amendment to the Federal Deposit Insurance Corporation.

(i) *Performance guarantee by companies that control a bank—(1) Limitation on Liability*—(i) *Amount limitation.* The aggregate liability under the guarantee provided under section 38 and this subpart for all companies that control a specific state member bank that is required to submit a capital restoration plan under this subpart shall be limited to the lesser of:

(A) An amount equal to 5.0 percent of the bank's total assets at the time the bank was notified or deemed to have notice that the bank was undercapitalized; or

(B) The amount necessary to restore the relevant capital measures of the bank to the levels required for the bank to be classified as adequately capitalized, as those capital measures and levels are defined at the time that the bank initially fails to comply with a capital restoration plan under this subpart.

(ii) *Limit on duration.* The guarantee and limit of liability under section 38 and this subpart shall expire after the Board notifies the bank that it has remained adequately capitalized for each of four consecutive calendar quarters. The expiration or fulfillment by a company of a guarantee of a capital restoration plan shall not limit the liability of the company under any guarantee required or provided in connection with any capital restoration plan filed by the same bank after expiration of the first guarantee.

(iii) *Collection on guarantee.* Each company that controls a given bank shall be jointly and severally liable for the guarantee for such bank as required under section 38 and this subpart, and the Board may require and collect payment of the full amount of that guarantee from any or all of the companies issuing the guarantee.

(2) *Failure to provide guarantee.* In the event that a bank that is controlled by any company submits a capital restoration plan that does not contain the guarantee required under section 38(e) (2) of the FDI Act, the bank shall, upon submission of the plan, be subject to the provisions of section 38 and this subpart that are applicable to banks that have not submitted an acceptable capital restoration plan.

(3) *Failure to perform guarantee.* Failure by any company that controls a bank to perform fully its guarantee of any capital plan shall constitute a material failure to implement the plan for purposes of section 38(f) of the FDI Act. Upon such failure, the bank shall be subject to the provisions of section 38 and this subpart that are applicable to banks that have failed in a material respect to implement a capital restoration plan.

§ 208.35 Mandatory and discretionary supervisory actions under section 38.

(a) *Mandatory supervisory actions—(1) Provisions applicable to all banks.* All state member banks are subject to the restrictions contained in section 38(d) of the FDI Act on payment of capital distributions and management fees.

(2) *Provisions applicable to undercapitalized, significantly undercapitalized, and critically undercapitalized banks.* Immediately upon receiving notice or being deemed to have notice, as provided in section § 208.32 or section § 208.34 of this subpart, that the bank is undercapitalized, significantly undercapitalized, or critically undercapitalized, the bank shall become subject to the provisions of section 38 of the FDI Act

(i) Restricting payment of capital distributions and management fees (section 38(d));

(ii) Requiring that the Board monitor the condition of the bank (section 38(e)(1));

(iii) Requiring submission of a capital restoration plan within the schedule established in this subpart (section 38(e)(2));

(iv) Restricting the growth of the bank's assets (section 38(e)(3)); and

(v) Requiring prior approval of certain expansion proposals (section 3(e)(4)).

(3) *Additional provisions applicable to significantly undercapitalized, and critically undercapitalized banks.* In addition to the provisions of section 38 of the FDI Act described in paragraph (a)(2) of this section, immediately upon receiving notice or being deemed to have notice, as provided in § 208.32 or § 208.34 of this subpart, that the bank is significantly undercapitalized, or critically undercapitalized, or that the bank is subject to the provisions applicable to institutions that are significantly undercapitalized because the bank failed to submit or implement in any material respect an acceptable capital restoration plan, the bank shall become subject to the provisions of section 38 of the FDI Act that restrict compensation paid to senior executive officers of the institution (section 38(f)(4)).

(4) *Additional provisions applicable to critically undercapitalized banks.* In addition to the provisions of section 38 of the FDI Act described in paragraphs (a) (2) and (3) of this section, immediately upon receiving notice or being deemed to have notice, as provided in § 208.32 of this subpart, that the bank is critically undercapitalized, the bank shall become subject to the provisions of section 38 of the FDI Act:

(i) Restricting the activities of the bank (section 38(h)(1)); and

(ii) Restricting payments on subordinated debt of the bank (section 38(h)(2)).

(b) *Discretionary supervisory actions.* In taking any action under section 38 that is within the Board's discretion to take in connection with: A state member bank that is deemed to be undercapitalized, significantly undercapitalized, or critically undercapitalized, or has been reclassified as undercapitalized, or significantly undercapitalized; an officer or director of such bank; or a company that controls such bank, the Board shall follow the procedures for issuing directives under §§ 263.202 and 263.204 of this chapter, unless otherwise provided in section 38 or this subpart.

Subparts C and D—[Reserved]

Subpart E—Interpretations

4. Subparts C and D are added to part 208 and reserved, the undesignated centerhead preceding section 208.116 is removed, §§ 208.116, 208.117, 208.122, and 208.124 through 208.128 are designated as subpart E of part 208, and the subpart E heading is added to read as set forth above.

PART 263—RULES OF PRACTICE FOR HEARINGS

1. The authority citation for 12 CFR Part 263 is revised to read as follows:

Authority: 5 U.S.C. 504; 12 U.S.C. 248, 324, 504, 505, 1817(j) , 1818, 1828(c), 1831o, 1847(b), 1847(d), 1884(b), 1972(2) (F), 3105, 3107, 3108, 3907, 3909; 15 U.S.C. 21, 78o-4, 78o-5, and 78u-2.

2. Section 263.50(b) is amended by removing the word "and" at the end of paragraph (b)(9), removing the period at the end of paragraph (b)(10) and adding in its place a semicolon, and by adding paragraphs (b)(11) through (b)(14) to read as follows:

§ 263.50 Purpose and scope.

* * * * *

(b) * * *

(11) Issuance of a prompt corrective action directive to a member bank under section 38 of the FDI Act (12 U.S.C. 1831o);

(12) Reclassification of a member bank on grounds of unsafe or unsound condition under section 38(g)(1) of the FDI Act (12 U.S.C. 1831o(g)(1));

(13) Reclassification of a member bank on grounds of unsafe and unsound practice under section 38(g)(1) of the FDI Act (12 U.S.C. 1831o(g)(1)); and

(14) Issuance of an order requiring a member bank to dismiss a director or senior executive officer under section 38 (e)(5) and 38(f)(2)(F)(ii) of the FDI Act (12 U.S.C. 1831o(e)(5) and 1831o(f)(2)(F)(ii)).

3. A new subpart H is added to part 263 to read as follows:

Subpart H—Issuance and Review of Orders Pursuant to Prompt Corrective Action Provisions of the Federal Deposit Insurance Act

Sec.

§ 263.201 Scope.
§ 263.202 Directives to take prompt corrective action.
§ 263.203 Procedures for reclassifying a state member bank based on criteria other than capital.
§ 263.204 Order to dismiss a director or senior executive officer.
§ 263.205 Enforcement of directives.

Subpart H—Issuance and Review of Orders Pursuant to Prompt Corrective Action Provisions of the Federal Deposit Insurance Act

§ 263.201 Scope.

(a) The rules and procedures set forth in this subpart apply to state member banks, companies that control state member banks or are affiliated with such banks, and senior executive officers and directors of state member banks that are subject to the provisions of section 38 of the Federal Deposit Insurance Act (section 38) and subpart B of part 208 of this chapter.

§ 263.202 Directives to take prompt regulatory action.

(a) *Notice of intent to issue directive.*—(1) *In general.* The Board shall provide an undercapitalized, significantly undercapitalized, or critically undercapitalized state member bank or, where appropriate, any company that controls the bank, prior written notice of the Board's intention to issue a directive requiring such bank or company to take actions or to follow proscriptions described in section 38 that are within the Board's discretion to require or impose under section 38 of the FDI Act, including sections 38(e)(5), (f)(2), (f)(3), or (f)(5). The bank shall have such time to respond to a proposed directive as provided by the Board under paragraph (c) of this section.

(2) *Immediate issuance of final directive.* If the Board finds it necessary in order to carry out the purposes of section 38 of the FDI Act, the Board may, without providing the notice prescribed in paragraph (a)(1) of this section, issue a directive requiring a state member bank or any company that controls a state member bank immediately to take actions or to follow proscriptions described in section 38 that are within the Board's discretion to require or impose under section 38 of the FDI Act, including section 38(e)(5), (f)(2), (f)(3), or (f)(5). A bank or company that is subject to such an immediately effective directive may submit a written

appeal of the directive to the Board. Such an appeal must be received by the Board within 14 calendar days of the issuance of the directive, unless the Board permits a longer period. The Board shall consider any such appeal, if filed in a timely matter, within 60 days of receiving the appeal. During such period of review, the directive shall remain in effect unless the Board, in its sole discretion, stays the effectiveness of the directive.

(b) *Contents of notice.* A notice of intention to issue a directive shall include:

(1) A statement of the bank's capital measures and capital levels;

(2) A description of the restrictions, prohibitions, or affirmative actions that the Board proposes to impose or require;

(3) The proposed date when such restrictions or prohibitions would be effective or the proposed date for completion of such affirmative actions; and

(4) The date by which the bank or company subject to the directive may file with the Board a written response to the notice.

(c) *Response to notice*—(1) *Time for response.* A bank or company may file a written response to a notice of intent to issue a directive within the time period set by the Board. The date shall be at least 14 calendar days from the date of the notice unless the Board determines that a shorter period is appropriate in light of the financial condition of the bank or other relevant circumstances.

(2) *Content of response.* The response should include:

(i) An explanation why the action proposed by the Board is not an appropriate exercise of discretion under section 38;

(ii) Any recommended modification of the proposed directive; and

(iii) Any other relevant information, mitigating circumstances, documentation, or other evidence in support of the position of the bank or company regarding the proposed directive.

(d) *Board consideration of response.* After considering the response, the Board may:

(1) Issue the directive as proposed or in modified form;

(2) Determine not to issue the directive and so notify the bank or company; or

(3) Seek additional information or clarification of the response from the bank or company, or any other relevant source.

(e) *Failure to file response.* Failure by a bank or company to file with the Board, within the specified time period, a written response to a proposed directive shall constitute a waiver of the opportunity to respond and shall constitute consent to the issuance of the directive.

(f) *Request for modification or rescission of directive.* Any bank or company that is subject to a directive under this subpart may, upon a change in circumstances, request in writing that the Board reconsider the terms of the directive, and may propose that the directive be rescinded or modified. Unless otherwise ordered by the Board, the directive shall continue in place while such request is pending before the Board.

§ 263.203 Procedures for reclassifying a state member bank based on criteria other than capital.

(a) *Reclassification based on unsafe or unsound condition or practice*—(1) *Issuance of notice of proposed reclassification*—(i) *Grounds for reclassification.* (A) Pursuant to § 208.33(c) of Regulation H (12 CFR 208.33(c)), the Board may reclassify a well capitalized bank as adequately capitalized or subject an adequately capitalized or undercapitalized institution to the supervisory actions applicable to the next lower capital category if:

(*1*) The Board determines that the bank is in unsafe or unsound condition; or

(*2*) The Board deems the bank to be engaged in an unsafe or unsound practice and not to have corrected the deficiency.

(B) Any action pursuant to this paragraph (a)(1)(i) shall hereinafter be referred to as "reclassification."

(ii) *Prior notice to institution.* Prior to taking action pursuant to § 208.33(c) of this chapter, the Board shall issue and serve on the bank a written notice of the Board's intention to reclassify the bank.

(2) *Contents of notice.* A notice of intention to reclassify a bank based on unsafe or unsound condition shall include:

(i) A statement of the bank's capital measures and capital levels and the category to which the bank would be reclassified;

(ii) The reasons for reclassification of the bank;

(iii) The date by which the bank subject to the notice of reclassification may file with the Board a written appeal of the proposed reclassification and a request for a hearing, which shall be at least 14 calendar days from the date of service of the notice unless the Board determines that a shorter period is appropriate in light of the financial condition of the bank or other relevant circumstances.

(3) *Response to notice of proposed reclassification.* A bank may file a written response to a notice of proposed reclassification within the time period set by the Board. The response should include:

(i) An explanation of why the bank is not in unsafe or unsound condition or otherwise should not be reclassified;

(ii) Any other relevant information, mitigating circumstances, documentation, or other evidence in support of the position of the bank or company regarding the reclassification.

(4) *Failure to file response.* Failure by a bank to file, within the specified time period, a written response with the Board to a notice of proposed reclassification shall constitute a waiver of the opportunity to respond and shall constitute consent to the reclassification.

(5) *Request for hearing and presentation of oral testimony or witnesses.* The response may include a request for an informal hearing before the Board or its designee under this section. If the bank desires to present oral testimony or witnesses at the hearing, the bank shall include a request to do so with the request for an informal hearing. A request to present oral testimony or witnesses shall specify the names of the witnesses and the general nature of their expected testimony. Failure to request a hearing shall constitute a waiver of any right to a hearing, and failure to request the opportunity to present oral testimony or witnesses shall constitute a waiver of any right to present oral testimony or witnesses.

(6) *Order for informal hearing.* Upon receipt of a timely written request that includes a request for a hearing, the Board shall issue an order directing an informal hearing to commence no later than 30 days after receipt of the request, unless the bank requests a later date. The hearing shall be held in Washington, DC or at such other place as may be designated by the Board, before a presiding officer(s) designated by the Board to conduct the hearing.

(7) *Hearing procedures.* (i) The bank shall have the right to introduce relevant written materials and to present oral argument at the hearing. The bank may introduce oral testimony and present witnesses only if expressly authorized by the Board or the presiding officer(s). Neither the provisions of the Administrative Procedure Act (5 U.S.C. 554–557) governing adjudications required by statute to be determined on the record nor the Uniform Rules of Practice and Procedure in subpart A of this part apply to an informal hearing

under this section unless the Board orders that such procedures shall apply.

(ii) The informal hearing shall be recorded, and a transcript shall be furnished to the bank upon request and payment of the cost thereof. Witnesses need not be sworn, unless specifically requested by a party or the presiding officer(s). The presiding officer(s) may ask questions of any witness.

(iii) The presiding officer(s) may order that the hearing be continued for a reasonable period (normally five business days) following completion of oral testimony or argument to allow additional written submissions to the hearing record.

(8) *Recommendation of presiding officers.* Within 20 calendar days following the date the hearing and the record on the proceeding are closed, the presiding officer(s) shall make a recommendation to the Board on the reclassification.

(9) *Time for decision.* Not later than 60 calendar days after the date the record is closed or the date of the response in a case where no hearing was requested, the Board will decide whether to reclassify the bank and notify the bank of the Board's decision.

(b) *Request for rescission of reclassification.* Any bank that has been reclassified under this section, may, upon a change in circumstances, request in writing that the Board reconsider the reclassification, and may propose that the reclassification be rescinded and that any directives issued in connection with the reclassification be modified, rescinded, or removed. Unless otherwise ordered by the Board, the bank shall remain subject to the reclassification and to any directives issued in connection with that reclassification while such request is pending before the Board.

§ 263.204 Order to dismiss a director or senior executive officer.

(a) *Service of notice.* When the Board issues and serves a directive on a state member bank pursuant to § 263.202 requiring the bank to dismiss from office any director or senior executive officer under section 38(f) (2) (F) (ii) of the FDI Act, the Board shall also serve a copy of the directive, or the relevant portions of the directive where appropriate, upon the person to be dismissed.

(b) *Response to directive*—(1) *Request for reinstatement.* A director or senior executive officer who has been served with a directive under paragraph (a) of this section (Respondent) may file a written request for reinstatement. The request for reinstetement shall be filed within 10 calendar days of the receipt of the directive by the Respondent, unless further time is allowed by the Board at the request of the Respondent.

(2) *Contents of request; informal hearing.* The request for reinstatement shall include reasons why the Respondent should be reinstated, and may include a request for an informal hearing before the Board or its designee under this section. If the Respondent desires to present oral testimony or witnesses at the hearing, the Respondent shall include a request to do so with the request for an informal hearing. The request to present oral testimony or witnesses shall specify the names of the witnesses and the general nature of their expected testimony. Failure to request a hearing shall constitute a waiver of any right to a hearing and failure to request the opportunity to present oral testimony or witnesses shall constitute a waiver of any right or opportunity to present oral testimony or witnesses.

(3) *Effective date.* Unless otherwise ordered by the Board, the dismissal shall remain in effect while a request for reinstatement is pending.

(c) *Order for informal hearing.* Upon receipt of a timely written request from a Respondent for an informal hearing on the portion of a directive requiring a bank to dismiss from office any director or senior executive officer, the Board shall issue an order directing an informal hearing to commence no later than 30 days after receipt of the request, unless the Respondent requests a later date. The hearing shall be held in Washington, D.C., or at such other place as may be designated by the Board, before a presiding officer(s) designated by the Board to conduct the hearing.

(d) *Hearing procedures.* (1) A Respondent may appear at the hearing personally or through counsel. A Respondent shall have the right to introduce relevant written materials and to present oral argument. A Respondent may introduce oral testimony and present witnesses only if expressly authorized by the Board or the presiding officer(s). Neither the provisions of the Administrative Procedure Act governing adjudications required by statute to be determined on the record nor the Uniform Rules of Practice and Procedure in subpart A of this part apply to an informal hearing under this section unless the Board orders that such procedures shall apply.

(2) The informal hearing shall be recorded, and a transcript shall be furnished to the Respondent upon request and payment of the cost thereof. Witnesses need not be sworn, unless specifically requested by a party or the presiding officer(s). The presiding officer(s) may ask questions of any witness.

(3) The presiding officer(s) may order that the hearing be continued for a reasonable period (normally five business days) following completion of oral testimony or argument to allow additional written submissions to the hearing record.

(e) *Standard for review.* A Respondent shall bear the burden of demonstrating that his or her continued employment by or service with the bank would materially strengthen the bank's ability:

(1) To become adequately capitalized, to the extent that the directive was issued as a result of the bank's capital level or failure to submit or implement a capital restoration plan; and

(2) To correct the unsafe or unsound condition or unsafe or unsound practice, to the extent that the directive was issued as a result of classification of the bank based on supervisory criteria other than capital, pursuant to section 38(g) of the FDI Act.

(f) *Recommendation of presiding officers.* Within 20 calendar days following the date the hearing and the record on the proceeding are closed, the presiding officer(s) shall make a recommendation to the Board concerning the Respondent's request for reinstatement with the bank.

(g) *Time for decision.* Not later than 60 calendar days after the date the record is closed or the date of the response in a case where no hearing was requested, the Board shall grant or deny the request for reinstatement and notify the Respondent of the Board's decision. If the Board denies the request for reinstatement, the Board shall set forth in the notification the reasons for the Board's action.

§ 263.205 Enforcement of directives.

(a) *Judicial remedies.* Whenever a state member bank or company that controls a state member bank fails to comply with a directive issued under section 38, the Board may seek enforcement of the directive in the appropriate United States district court pursuant to section 8(i) (1) of the FDI Act.

(b) *Administrative remedies*—(1) *Failure to comply with directive.* Pursuant to section 8(i) (2) (A) of the FDI Act, the Board may assess a civil money penalty against any state member bank or company that controls a state member bank that violates or otherwise fails to comply with any final directive issued under section 38 and against any institution-affiliated party who

participates in such violation or noncompliance.

(2) *Failure to implement capital restoration plan.* The failure of a bank to implement a capital restoration plan required under section 38, subpart B of Regulation H (12 CFR part 208, subpart B), or this subpart, or the failure of a company having control of a bank to fulfill a guarantee of a capital restoration plan made pursuant to section 38 (e) (2) of the FDI Act shall subject the bank or company to the assessment of civil money penalties pursuant to section 8(i) (2) (A) of the FDI Act.

(c) *Other enforcement action.* In addition to the actions described in paragraphs (a) and (b) of this section, the Board may seek enforcement of the provisions of section 38 or subpart B of Regulation H (12 CFR part 208, subpart B) through any other judicial or administrative proceeding authorized by law.

By order of the Board of Governors of the Federal Reserve System.

Dated: September 18, 1992.

William W. Wiles,

Secretary of the Board.

DEPARTMENT OF THE TREASURY

Office of the Comptroller of the Currency

12 CFR Parts 6 and 19

For the reasons set forth in the preamble, chapter I of title 12 of the Code of Federal Regulations is amended as set forth below:

1. Part 6 is added to read as follows:

PART 6—PROMPT CORRECTIVE ACTION

Subpart A—Capital Categories

Sec.

6.1 Authority, purpose, scope, and other supervisory authority.
6.2 Definitions.
6.3 Notice of capital category.
6.4 Capital measures and capital category definitions.
6.5 Capital restoration plans.
6.6 Mandatory and discretionary supervisory actions and section 38.

Subpart B—Directives To Take Prompt Corrective Action

6.20 Scope.
6.21 Notice of intent to issue a directive.
6.22 Response to notice.
6.23 Decision and issuance of a prompt corrective action directive.
6.24 Request for modification or rescission of directive.
6.25 Enforcement of directive.

Authority: 12 U.S.C. 93a, 1831o.

Subpart A—Capital Categories

§ 6.1 Authority, purpose, scope, and other supervisory authority.

(a) *Authority.* This part is issued by the Office of the Comptroller of the Currency (OCC) pursuant to section 38 (section 38) of the Federal Deposit Insurance Act (FDI Act) as added by section 131 of the Federal Deposit Insurance Corporation Improvement Act of 1991 (Pub. L. 102–242, 105 Stat. 2236 (1991)) (12 U.S.C. 1831o).

(b) *Purpose.* Section 38 of the FDI Act establishes a framework of supervisory actions for insured depository institutions that are not adequately capitalized. The principal purpose of this subpart is to define, for insured national banks, the capital measures and capital levels, and for insured federal branches, comparable asset-based measures and levels, that are used for determining the supervisory actions authorized under section 38 of the FDI Act. This part 6 also establishes procedures for submission and review of capital restoration plans and for issuance and review of directives and orders pursuant to section 38.

(c) *Scope.* This subpart implements the provisions of section 38 of the FDI Act as they apply to insured national banks and insured federal branches. Certain of these provisions also apply to officers, directors and employees of these insured institutions. Other provisions apply to any company that controls an insured national bank or insured federal branch and to the affiliates of an insured national bank or insured federal branch.

(d) *Other supervisory authority.* Neither section 38 nor this part in any way limits the authority of the OCC under any other provision of law to take supervisory actions to address unsafe or unsound practices, deficient capital levels, violations of law, unsafe or unsound conditions, or other practices. Action under section 38 of the FDI Act and this part may be taken independently of, in conjunction with, or in addition to any other enforcement action available to the OCC, including issuance of cease and desist orders, capital directives, approval or denial of applications or notices, assessment of civil money penalties, or any other actions authorized by law.

(e) *Disclosure of capital categories.* The assignment of an insured national bank or insured federal branch under this subpart within a particular capital category is for purposes of implementing and applying the provisions of section 38. Unless permitted by the OCC or otherwise required by law, no bank may state in any advertisement or promotional material its capital category under this subpart or that the OCC or any other federal banking agency has assigned the bank to a particular capital category.

§ 6.2 Definitions.

For purposes of section 38 and this part, the definitions related to capital in part 3 of this chapter shall apply. In addition, except as modified in this section or unless the context otherwise requires, the terms used in this subpart have the same meanings as set forth in section 38 and section 3 of the FDI Act.

(a) *Bank* means all insured national banks and all insured federal branches, except where otherwise provided in this subpart.

(b) (1) *Control* has the same meaning assigned to it in section 2 of the Bank Holding Company Act (12 U.S.C. 1841), and the term controlled shall be construed consistently with the term control.

(2) *Exclusion for fiduciary ownership.* No insured depository institution or company controls another insured depository institution or company by virtue of its ownership or control of shares in a fiduciary capacity. Shares shall not be deemed to have been acquired in a fiduciary capacity if the acquiring insured depository institution or company has sole discretionary authority to exercise voting rights with respect thereto.

(3) *Exclusion for debts previously contracted.* No insured depository institution or company controls another insured depository institution or company by virtue of its ownership or control of shares acquired in securing or collecting a debt previously contracted in good faith, until two years after the date of acquisition. The two-year period may be extended at the discretion of the appropriate federal banking agency for up to three one-year periods.

(c) *Controlling person* means any person having control of an insured depository institution and any company controlled by that person.

(d) *Leverage ratio* means the ratio of Tier 1 capital to adjusted total assets, as calculated in accordance with the OCC's Minimum Capital Ratios in part 3 of this chapter.

(e) *Management fee* means any payment of money or provision of any other thing of value to a company or individual for the provision of management services or advice to the bank or related overhead expenses, including payments related to supervisory, executive, managerial, or policymaking functions, other than compensation to an individual in the

individual's capacity as an officer or employee of the bank.

(f) *Risk-weighted assets* means total risk weighted assets, as calculated in accordance with the OCC's Minimum Capital Ratios in part 3 of this chapter.

(g) *Tangible equity* means the amount of Tier 1 capital elements in the OCC's Risk-Based Capital Guidelines (appendix A to part 3 of this chapter) plus the amount of outstanding cumulative perpetual preferred stock (including related surplus) minus all intangible assets except purchased mortgage servicing rights to the extent that the OCC determines pursuant to section 475 of the Federal Deposit Insurance Corporation Improvement Act of 1991 that purchased mortgage servicing rights may be included in calculating the bank's Tier 1 capital.

(h) *Tier 1 capital* means the amount of Tier 1 capital as defined in the OCC's Minimum Capital Ratios in part 3 of this chapter.

(i) *Tier 1 risk-based capital ratio* means the ratio of Tier 1 capital to risk weighted assets, as calculated in accordance with the OCC's Minimum Capital Ratios in part 3 of this chapter.

(j) *Total assets* means quarterly average total assets as reported in a bank's Consolidated Reports of Condition and Income (Call Report), minus intangible assets as provided in the definition of tangible equity. The OCC reserves the right to require a bank to compute and maintain its capital ratios on the basis of actual, rather than average, total assets when computing tangible equity.

(k) *Total risk-based capital ratio* means the ratio of qualifying total capital to risk-weighted assets, as calculated in accordance with the OCC's Minimum Capital Ratios in part 3 of this chapter.

§ 6.3 Notice of capital category.

(a) *Effective date of determination of capital category.* A bank shall be deemed to be within a given capital category for purposes of section 38 of the FDI Act and this part as of the date the bank is notified of, or is deemed to have notice of, its capital category pursuant to paragraph (b) of this section.

(b) *Notice of capital category.* A bank shall be deemed to have been notified of its capital levels and its capital category as of the most recent date:

(1) A Consolidated Report of Condition and Income (Call Report) is required to be filed with the OCC;

(2) A final report of examination is delivered to the bank; or

(3) Written notice is provided by the OCC to the bank of its capital category for purposes of section 38 of the FDI Act and this part or that the bank's capital category has changed as provided in paragraph (c) of this section or § 6.1 of this subpart and subpart M of part 19 of this chapter.

(c) *Adjustments to reported capital levels and capital category*—(1) *Notice of adjustment by bank.* A bank shall provide the OCC with written notice that an adjustment to the bank's capital category may have occurred no later than 15 calendar days following the date that any material event has occurred that would cause the bank to be placed in a lower capital category from the category assigned to the bank for purposes of section 38 and this part on the basis of the bank's most recent Call Report or report of examination.

(2) *Determination to change capital category.* After receiving notice pursuant to paragraph (c)(1) of this section, the OCC shall determine whether to change the capital category of the bank and shall notify the bank of the OCC's determination.

§ 6.4 Capital measures and capital category definitions.

(a) *Capital measures.* For purposes of section 38 and this part, the relevant capital measures shall be:

(1) The total risk-based capital ratio;

(2) The Tier 1 risk-based capital ratio;

(3) The leverage ratio.

(b) *Capital categories.* For purposes of the provisions of section 38 and this part, a bank shall be deemed to be:

(1) *Well capitalized* if the bank:

(i) Has a total risk-based capital ratio of 10.0 percent or greater; and

(ii) Has a Tier 1 risk-based capital ratio of 6.0 percent or greater; and

(iii) Has a leverage ratio of 5.0 percent or greater; and

(iv) Is not subject to any written agreement, order or capital directive, or prompt corrective action directive issued by the OCC pursuant to section 8 of the FDI Act, the International Lending Supervision Act of 1983 (12 U.S.C. 3907), or section 38 of the FDI Act, or any regulation thereunder, to meet and maintain a specific capital level for any capital measure.

(2) *Adequately capitalized* if the bank:

(i) Has a total risk-based capital ratio of 8.0 percent or greater; and

(ii) Has a Tier 1 risk-based capital ratio of 4.0 percent or greater; and

(iii) Has:

(A) A leverage ratio of 4.0 percent or greater; or

(B) A leverage ratio of 3.0 percent or greater if the bank is rated 1 in the most recent examination of the bank; and

(iv) Does not meet the definition of a well capitalized bank.

(3) *Undercapitalized* if the bank:

(i) Has a total risk-based capital ratio that is less than 8.0 percent; or

(ii) Has a Tier 1 risk-based capital ratio that is less than 4.0 percent; or

(iii) (A) Except as provided in paragraph (b)(3)(iii) (B) of this section, has a leverage ratio that is less than 4.0 percent; or

(B) If the bank is rated 1 in the most recent examination of the bank, has a leverage ratio that is less than 3.0 percent.

(4) *Significantly undercapitalized* if the bank has:

(i) A total risk-based capital ratio that is less than 6.0 percent; or

(ii) A Tier 1 risk-based capital ratio that is less than 3.0 percent; or

(iii) A leverage ratio that is less than 3.0 percent.

(5) *Critically undercapitalized* if the bank has a ratio of tangible equity to total assets that is equal to or less than 2.0 percent.

(c) *Capital categories for insured federal branches.* For purposes of the provisions of section 38 of the FDI Act and this part, an insured federal branch shall be deemed to be:

(1) *Well capitalized* if the insured federal branch:

(i) Maintains the pledge of assets required under 12 CFR 346.19; and

(ii) Maintains the eligible assets prescribed under 12 CFR 346.20 at 108 percent or more of the preceding quarter's average book value of the insured branch's third-party liabilities; and

(iii) Has not received written notification from:

(A) The OCC to increase its capital equivalency deposit pursuant to § 28.6(a) of this chapter, or to comply with asset maintenance requirements pursuant to § 28.9 of this chapter; or

(B) The FDIC to pledge additional assets pursuant to 12 CFR 346.19 or to maintain a higher ratio of eligible assets pursuant to 12 CFR 346.20.

(2) *Adequately Capitalized* if the insured federal branch:

(i) Maintains the pledge of assets prescribed under 12 CFR 346.19; and

(ii) Maintains the eligible assets prescribed under 12 CFR 346.20 at 106 percent or more of the preceding quarter's average book value of the insured branch's third-party liabilities; and

(iii) Does not meet the definition of a well capitalized insured federal branch.

(3) *Undercapitalized* if the insured federal branch:

(i) Fails to maintain the pledge of assets required under 12 CFR 346.19; or

(ii) Fails to maintain the eligible assets prescribed under 12 CFR 346.20 at

106 percent or more of the preceding quarter's average book value of the insured branch's third-party liabilities.

(4) *Significantly undercapitalized* if it fails to maintain the eligible assets prescribed under 12 CFR 346.20 at 104 percent or more of the preceding quarter's average book value of the insured federal branch's third-party liabilities.

(5) *Critically undercapitalized* if it fails to maintain the eligible assets prescribed under 12 CFR 346.20 at 102 percent or more of the preceding quarter's average book value of the insured federal branch's third-party liabilities.

(d) *Reclassification based on supervisory criteria other than capital.* The OCC may reclassify a well capitalized bank as adequately capitalized and may require an adequately capitalized or an undercapitalized bank to comply with certain mandatory or discretionary supervisory actions as if the bank were in the next lower capital category (except that the OCC may not reclassify a significantly undercapitalized bank as critically undercapitalized) (each of these actions are hereinafter referred to generally as reclassifications) in the following circumstances:

(1) *Unsafe or unsound condition.* The OCC has determined, after notice and opportunity for hearing pursuant to subpart M of part 19 of this chapter, that the bank is in unsafe or unsound condition; or

(2) *Unsafe or unsound practice.* The OCC has determined, after notice and opportunity for hearing pursuant to subpart M of part 19 of this chapter, that in the most recent examination of the bank, the bank received, and has not corrected a less-than-satisfactory rating for any of the categories of asset quality, management, earnings, or liquidity.

§ 6.5 Capital restoration plans.

(a) *Schedule for filing plan*—(1) *In general.* A bank shall file a written capital restoration plan with the OCC within 45 days of the date that the bank receives notice or is deemed to have notice that the bank is undercapitalized, significantly undercapitalized, or critically undercapitalized, unless the OCC notifies the bank in writing that the plan is to be filed within a different period. An adequately capitalized bank that has been required pursuant to § 6.4 and subpart M of part 19 of this chapter to comply with supervisory actions as if the bank were undercapitalized is not required to submit a capital restoration plan solely by virtue of the reclassification.

(2) *Additional capital restoration plans.* Notwithstanding paragraph (a)(1) of this section, a bank that has already submitted and is operating under a capital restoration plan approved under section 38 and this subpart is not required to submit an additional capital restoration plan based on a revised calculation of its capital measures or a reclassification of the institution under § 6.4 and subpart M of part 19 of this chapter unless the OCC notifies the bank that it must submit a new or revised capital plan. A bank that is notified that it must submit a new or revised capital restoration plan shall file the plan in writing with the OCC within 45 days of receiving such notice, unless the OCC notifies the bank in writing that the plan must be filed within a different period.

(b) *Contents of plan.* All financial data submitted in connection with a capital restoration plan shall be prepared in accordance with the instructions provided on the Call Report, unless the OCC instructs otherwise. The capital restoration plan shall include all of the information required to be filed under section 38(e)(2) of the FDI Act. A bank that is required to submit a capital restoration plan as the result of a reclassification of the bank, pursuant to § 6.4 and subpart M of part 19 of this chapter, shall include a description of the steps the bank will take to correct the unsafe or unsound condition or practice. No plan shall be accepted unless it includes any performance guarantee described in section 38(e)(2)(C) of that Act by each company that controls the bank.

(c) *Review of capital restoration plans.* Within 60 days after receiving a capital restoration plan under this subpart, the OCC shall provide written notice to the bank of whether the plan has been approved. The OCC may extend the time within which notice regarding approval of a plan shall be provided.

(d) *Disapproval of capital restoration plan.* If a capital restoration plan is not approved by the OCC, the bank shall submit a revised capital restoration plan within the time specified by the OCC. Upon receiving notice that its capital restoration plan has not been approved, any undercapitalized bank (as defined in § 6.4) shall be subject to all of the provisions of section 38 and this part applicable to significantly undercapitalized institutions. These provisions shall be applicable until such time as a new or revised capital restoration plan submitted by the bank has been approved by the OCC.

(e) *Failure to submit a capital restoration plan.* A bank that is undercapitalized (as defined in § 6.4) and that fails to submit a written capital restoration plan within the period provided in this section shall, upon the expiration of that period, be subject to all of the provisions of section 38 and this part applicable to significantly undercapitalized banks.

(f) *Failure to implement a capital restoration plan.* Any undercapitalized bank that fails, in any material respect, to implement a capital restoration plan shall be subject to all of the provisions of section 38 and this part applicable to significantly undercapitalized banks.

(g) *Amendment of capital restoration plan.* A bank that has submitted an approved capital restoration plan may, after prior written notice to and approval by the OCC, amend the plan to reflect a change in circumstance. Until such time as a proposed amendment has been approved, the bank shall implement the capital restoration plan as approved prior to the proposed amendment.

(h) *Notice to FDIC.* Within 45 days of the effective date of OCC approval of a capital restoration plan, or any amendment to a capital restoration plan, the OCC shall provide a copy of the plan or amendment to the Federal Deposit Insurance Corporation.

(i) *Performance guarantee by companies that control a bank*—(1) *Limitation on liability*—(i) *Amount limitation.* The aggregate liability under the guarantee provided under section 38 and this subpart for all companies that control a specific bank that is required to submit a capital restoration plan under this subpart shall be limited to the lesser of:

(A) An amount equal to 5.0 percent of the bank's total assets at the time the bank was notified or deemed to have notice that the bank was undercapitalized; or

(B) The amount necessary to restore the relevant capital measures of the bank to the levels required for the bank to be classified as adequately capitalized, as those capital measures and levels are defined at the time that the bank initially fails to comply with a capital restoration plan under this subpart.

(ii) *Limit on duration.* The guarantee and limit of liability under section 38 and this subpart shall expire after the OCC notifies the bank that it has remained adequately capitalized for each of four consecutive calendar quarters. The expiration or fulfillment by a company of a guarantee of a capital restoration plan shall not limit the liability of the company under any guarantee required or provided in

connection with any capital restoration plan filed by the same bank after expiration of the first guarantee.

(iii) *Collection on guarantee.* Each company that controls a given bank shall be jointly and severally liable for the guarantee for such bank as required under section 38 and this subpart, and the OCC may require payment of the full amount of that guarantee from any or all of the companies issuing the guarantee.

(2) *Failure to provide guarantee.* In the event that a bank that is controlled by any company submits a capital restoration plan that does not contain the guarantee required under section 38(e)(2) of the FDI Act, the bank shall, upon submission of the plan, be subject to the provisions of section 38 and this part that are applicable to banks that have not submitted an acceptable capital restoration plan.

(3) *Failure to perform guarantee.* Failure by any company that controls a bank to perform fully its guarantee of any capital plan shall constitute a material failure to implement the plan for purposes of section 38(f) of the FDI Act. Upon such failure, the bank shall be subject to the provisions of section 38 and this part that are applicable to banks that have failed in a material respect to implement a capital restoration plan.

(j) *Enforcement of capital restoration plan.* The failure of a bank to implement, in any material respect, a capital restoration plan required under section 38 and this section shall subject the bank to the assessment of civil money penalties pursuant to section 8(i)(2)(A) of the FDI Act.

§ 6.6 Mandatory and discretionary supervisory actions under section 38.

(a) *Mandatory supervisory actions*—(1) *Provisions applicable to all banks.* All banks are subject to the restrictions contained in section 38(d) of the FDI Act on payment of capital distributions and management fees.

(2) *Provisions applicable to undercapitalized, significantly undercapitalized, and critically undercapitalized banks.* Immediately upon receiving notice or being deemed to have notice, as provided in § 6.3, that the bank is undercapitalized, significantly undercapitalized, or critically undercapitalized, the bank shall become subject to the provisions of section 38 of the FDI Act—

(i) Restricting payment of capital distributions and management fees (section 38(d));

(ii) Requiring that the OCC monitor the condition of the bank (section 38(e)(1));

(iii) Requiring submission of a capital restoration plan within the schedule established in this subpart (section 38(e)(2));

(iv) Restricting the growth of the bank's assets (section 38(e)(3)); and

(v) Requiring prior approval of certain expansion proposals (section 38(e)(4)).

(3) *Additional provisions applicable to significantly undercapitalized, and critically undercapitalized banks.* In addition to the provisions of section 38 of the FDI Act described in paragraph (a)(2) of this section, immediately upon receiving notice or being deemed to have notice, as provided in this subpart, that the bank is significantly undercapitalized, or critically undercapitalized or that the bank is subject to the provisions applicable to institutions that are significantly undercapitalized because it has failed to submit or implement, in any material respect, an acceptable capital restoration plan, the bank shall become subject to the provisions of section 38 of the FDI Act that restrict compensation paid to senior executive officers of the institution (section 38(f)(4)).

(4) *Additional provisions applicable to critically undercapitalized banks.* In addition to the provisions of section 38 of the FDI Act described in paragraphs (a) (2) and (3) of this section, immediately upon receiving notice or being deemed to have notice, as provided in § 6.3, that the bank is critically undercapitalized, the bank shall become subject to the provisions of section 38 of the FDI Act—

(i) Restricting the activities of the bank (section 38(h)(1)); and

(ii) Restricting payments on subordinated debt of the bank (section 38(h)(2)).

(b) *Discretionary supervisory actions.* In taking any action under section 38 that is within the OCC's discretion to take in connection with a bank that is deemed to be undercapitalized, significantly undercapitalized, or critically undercapitalized, or has been reclassified as undercapitalized or significantly undercapitalized; an officer or director of such bank; or a company that controls such bank, the OCC shall follow the procedures for issuing directives under subpart B of this part and subpart N of part 19 of this chapter, unless otherwise provided in section 38 or this part.

Subpart B—Directives To Take Prompt Corrective Action

§ 6.20 Scope.

The rules and procedures set forth in this subpart apply to insured national banks, insured federal branches and senior executive officers and directors of banks that are subject to the provisions of section 38 of the Federal Deposit Insurance Act (section 38) and subpart A of this part.

§ 6.21 Notice of intent to issue a directive.

(a) *Notice of intent to issue a directive*—(1) *In general.* The OCC shall provide an undercapitalized, significantly undercapitalized, or critically undercapitalized bank prior written notice of the OCC's intention to issue a directive requiring such bank or company to take actions or to follow proscriptions described in section 38 that are within the OCC's discretion to require or impose under section 38 of the FDI Act, including section 38 (e)(5), (f)(2), (f)(3), or (f)(5). The bank shall have such time to respond to a proposed directive as provided under § 6.22.

(2) *Immediate issuance of final directive.* If the OCC finds it necessary in order to carry out the purposes of section 38 of the FDI Act, the OCC may, without providing the notice prescribed in paragraph (a)(1) of this section, issue a directive requiring a bank immediately to take actions or to follow proscriptions described in section 38 that are within the OCC's discretion to require or impose under section 38 of the FDI Act, including section 38 (e)(5), (f)(2), (f)(3), or (f)(5). A bank that is subject to such an immediately effective directive may submit a written appeal of the directive to the OCC. Such an appeal must be received by the OCC within 14 calendar days of the issuance of the directive, unless the OCC permits a longer period. The OCC shall consider any such appeal, if filed in a timely matter, within 60 days of receiving the appeal. During such period of review, the directive shall remain in effect unless the OCC, in its sole discretion, stays the effectiveness of the directive.

(b) *Contents of notice.* A notice of intention to issue a directive shall include:

(1) A statement of the bank's capital measures and capital levels;

(2) A description of the restrictions, prohibitions or affirmative actions that the OCC proposes to impose or require;

(3) The proposed date when such restrictions or prohibitions would be effective or the proposed date for completion of such affirmative actions; and

(4) The date by which the bank subject to the directive may file with the OCC a written response to the notice.

§ 6.22 Response to notice.

(a) *Time for response.* A bank may file a written response to a notice of intent

to issue a directive within the time period set by the OCC. The date shall be at least 14 calendar days from the date of the notice unless the OCC determines that a shorter period is appropriate in light of the financial condition of the bank or other relevant circumstances.

(b) *Content of response.* The response should include:

(1) An explanation why the action proposed by the OCC is not an appropriate exercise of discretion under section 38;

(2) Any recommended modification of the proposed directive; and

(3) Any other relevant information, mitigating circumstances, documentation, or other evidence in support of the position of the bank regarding the proposed directive.

(c) *Failure to file response.* Failure by a bank to file with the OCC, within the specified time period, a written response to a proposed directive shall constitute a waiver of the opportunity to respond and shall constitute consent to the issuance of the directive.

§ 6.23 Decision and issuance of a prompt corrective action directive.

(a) *OCC consideration of response.* After considering the response, the OCC may:

(1) Issue the directive as proposed or in modified form;

(2) Determine not to issue the directive and so notify the bank; or

(3) Seek additional information or clarification of the response from the bank, or any other relevant source.

§ 6.24 Request for modification or rescission of directive.

Any bank that is subject to a directive under this subpart may, upon a change in circumstances, request in writing that the OCC reconsider the terms of the directive, and may propose that the directive be rescinded or modified. Unless otherwise ordered by the OCC, the directive shall continue in place while such request is pending before the OCC.

§ 6.25 Enforcement of directive.

(a) *Judicial remedies.* Whenever a bank fails to comply with a directive issued under section 38, the OCC may seek enforcement of the directive in the appropriate United States district court pursuant to section 8(i)(1) of the FDI Act.

(b) *Administrative remedies.* Pursuant to section 8(i)(2)(A) of the FDI Act, the OCC may assess a civil money penalty against any bank that violates or otherwise fails to comply with any final directive issued under section 38 and against any institution-affiliated party who participates in such violation or noncompliance.

(c) *Other enforcement action.* In addition to the actions described in paragraphs (a) and (b) of this section, the OCC may seek enforcement of the provisions of section 38 or this part through any other judicial or administrative proceeding authorized by law.

PART 19—[AMENDED]

2. The authority citation for part 19 of this chapter is revised to read as follows:

Authority: 5 U.S.C. 504, 554–557; 12 U.S.C. 93(b), 164, 505, 1817, 1818, 1820, 1831o, 1972, 3102, 3108(a), and 3909; 15 U.S.C. 78(h) and (i), 78o–4(c), 78o–5, 78q–1, 78u, 78u–2, 78u–3, and 78w; and 31 U.S.C. 330.

3. Part 19 is amended by adding subparts M and N to read as follows:

Subpart M—Procedures for Reclassifying a Bank Based on Criteria Other Than Capital

Sec.

19.220 Scope.

19.221 Reclassification of a bank based on unsafe or unsound condition or practice.

19.222 Request for rescission of reclassification.

Subpart N—Order To Dismiss a Director or Senior Executive Officer

19.230 Scope.

19.231 Order to dismiss a director or senior executive officer.

Subpart M—Procedures for Reclassifying a Bank Based on Criteria Other Than Capital

§ 19.220 Scope.

This subpart applies to the procedures afforded to any bank that has been reclassified to a lower capital category by a notice or order issued by the OCC pursuant to section 38 of the Federal Deposit Insurance Act and this part.

§ 19.221 Reclassification of a bank based on unsafe or unsound condition or practice.

(a) *Issuance of notice of proposed reclassification—(1) Grounds for reclassification.* (i) Pursuant to § 6.4 of this chapter, the OCC may reclassify a well capitalized bank as adequately capitalized or subject an adequately capitalized bank or undercapitalized bank to the supervisory actions applicable to the next lower capital category if:

(A) The OCC determines that the bank is in an unsafe or unsound condition; or

(B) The OCC deems the bank to be engaging in an unsafe or unsound practice and not to have corrected the deficiency.

(ii) Any action pursuant to this paragraph (a)(1) shall hereinafter be referred to as "reclassification."

(2) *Prior notice to institution.* Prior to taking action pursuant to § 6.4 of this chapter, the OCC shall issue and serve on the bank a written notice of the OCC's intention to reclassify the bank.

(b) *Contents of notice.* A notice of intention to reclassify a bank based on unsafe or unsound condition will include:

(1) A statement of the bank's capital measures and capital levels and the category to which the bank would be reclassified;

(2) The reasons for reclassification of the bank;

(3) The date by which the bank subject to the notice of reclassification may file with the OCC a written appeal of the proposed reclassification and a request for a hearing, which shall be at least 14 calendar days from the date of service of the notice unless the OCC determines that a shorter period is appropriate in light of the financial condition of the bank or other relevant circumstances.

(c) *Response to notice of proposed reclassification.* A bank may file a written response to a notice of proposed reclassification within the time period set by the OCC. The response should include:

(1) An explanation of why the bank is not in unsafe or unsound condition or otherwise should not be reclassified;

(2) Any other relevant information, mitigating circumstances, documentation, or other evidence in support of the position of the bank or company regarding the reclassification.

(d) *Failure to file response.* Failure by a bank to file, within the specified time period, a written response with the OCC to a notice of proposed reclassification shall constitute a waiver of the opportunity to respond and shall constitute consent to the reclassification.

(e) *Request for hearing and presentation of oral testimony or witnesses.* The response may include a request for an informal hearing before the OCC under this section. If the bank desires to present oral testimony or witnesses at the hearing, the bank shall include a request to do so with the request for an informal hearing. A request to present oral testimony or witnesses shall specify the names of the witnesses and the general nature of their expected testimony. Failure to request a hearing shall constitute a waiver of any right to a hearing, and failure to request the opportunity to present oral testimony or witnesses shall constitute a

waiver of any right to present oral testimony or witnesses.

(f) *Order for informal hearing.* Upon receipt of a timely written request that includes a request for a hearing, the OCC shall issue an order directing an informal hearing to commence no later than 30 days after receipt of the request, unless the OCC allows further time at the request of the bank. The hearing shall be held in Washington, DC or at such other place as may be designated by the OCC, before a presiding officer(s) designated by the OCC to conduct the hearing.

(g) *Hearing procedures.* (1) The bank shall have the right to introduce relevant written materials and to present oral argument at the hearing. The bank may introduce oral testimony and present witnesses only if expressly authorized by the OCC or the presiding officer(s). Neither the provisions of the Administrative Procedure Act (5 U.S.C. 554–557) governing adjudications required by statute to be determined on the record nor the Uniform Rules of Practice and Procedure in subpart A of this part apply to an informal hearing under this section unless the OCC orders that such procedures shall apply.

(2) The informal hearing shall be recorded, and a transcript furnished to the bank upon request and payment of the cost thereof. Witnesses need not be sworn, unless specifically requested by a party or the presiding officer(s). The presiding officer(s) may ask questions of any witness.

(3) The presiding officer(s) may order that the hearing be continued for a reasonable period (normally five business days) following completion of oral testimony or argument to allow additional written submissions to the hearing record.

(h) *Recommendation of presiding officer(s).* Within 20 calendar days following the date the hearing and the record on the proceeding are closed, the presiding officer(s) shall make a recommendation to the OCC on the reclassification.

(i) *Time for decision.* Not later than 60 calendar days after the date the record is closed or the date of the response in a case where no hearing was requested, the OCC will decide whether to reclassify the bank and notify the bank of the OCC's decision.

§ 19.222 Request for rescission of reclassification.

Any bank that has been reclassified under part 6 of this chapter and this subpart, may, upon a change in circumstances, request in writing that the OCC reconsider the reclassification, and may propose that the reclassification be rescinded and that any directives issued in connection with the reclassification be modified, rescinded, or removed. Unless otherwise ordered by the OCC, the bank shall remain subject to the reclassification and to any directives issued in connection with that reclassification while such request is pending before the OCC.

Subpart N—Order To Dismiss a Director or Senior Executive Officer

§ 19.230 Scope.

This subpart applies to informal hearings afforded to any director or senior executive officer dismissed pursuant to an order issued under 12 U.S.C. 1831o and part 6 of this chapter.

§ 19.231 Order to dismiss a director or senior executive officer.

(a) *Service of notice.* When the OCC issues and serves a directive on a bank pursuant to subpart B of part 6 of this chapter requiring the bank to dismiss from office any director or senior executive officer under section 38(f)(2)(F)(ii) of the FDI Act, the OCC shall also serve a copy of the directive, or the relevant portions of the directive where appropriate, upon the person to be dismissed.

(b) *Response to directive—(1) Request for reinstatement.* A director or senior executive officer who has been served with a directive under paragraph (a) of this section (Respondent) may file a written request for reinstatement. The request for reinstatement shall be filed within 10 calendar days of the receipt of the directive by the Respondent, unless further time is allowed by the OCC at the request of the Respondent.

(2) *Contents of request; informal hearing.* The request for reinstatement shall include reasons why the Respondent should be reinstated, and may include a request for an informal hearing before the OCC or its designee under this section. If the Respondent desires to present oral testimony or witnesses at the hearing, the Respondent shall include a request to do so with the request for an informal hearing. The request to present oral testimony or witnesses shall specify the names of the witnesses and the general nature of their expected testimony. Failure to request a hearing shall constitute a waiver of any right to a hearing and failure to request the opportunity to present oral testimony or witnesses shall constitute a waiver of any right or opportunity to present oral testimony or witnesses.

(3) *Effective date.* Unless otherwise ordered by the OCC, the dismissal shall remain in effect while a request for reinstatement is pending.

(c) *Order for informal hearing.* Upon receipt of a timely written request from a Respondent for an informal hearing on the portion of a directive requiring a bank to dismiss from office any director or senior executive officer, the OCC shall issue an order directing an informal hearing to commence no later than 30 days after receipt of the request, unless the Respondent requests a later date. The hearing shall be held in Washington, DC, or at such other place as may be designated by the OCC, before a presiding officer(s) designated by the OCC to conduct the hearing.

(d) *Hearing procedures.* (1) A Respondent may appear at the hearing personally or through counsel. A Respondent shall have the right to introduce relevant written materials and to present oral argument. A Respondent may introduce oral testimony and present witnesses only if expressly authorized by the OCC or the presiding officer(s). Neither the provisions of the Administrative Procedure Act governing adjudications required by statute to be determined on the record nor the Uniform Rules of Practice and Procedure in subpart A of this part apply to an informal hearing under this section unless the OCC orders that such procedures shall apply.

(2) The informal hearing shall be recorded, and a transcript furnished to the Respondent upon request and payment of the cost thereof. Witnesses need not be sworn, unless specifically requested by a party or the presiding officer(s). The presiding officer(s) may ask questions of any witness.

(3) The presiding officer(s) may order that the hearing be continued for a reasonable period (normally five business days) following completion of oral testimony or argument to allow additional written submissions to the hearing record.

(e) *Standard for review.* A Respondent shall bear the burden of demonstrating that his or her continued employment by or service with the bank would materially strengthen the bank's ability:

(1) To become adequately capitalized, to the extent that the directive was issued as a result of the bank's capital level or failure to submit or implement a capital restoration plan; and

(2) To correct the unsafe or unsound condition or unsafe or unsound practice, to the extent that the directive was issued as a result of classification of the bank based on supervisory criteria other than capital, pursuant to section 38(g) of the FDI Act.

(f) *Recommendation of presiding officer.* Within 20 calendar days following the date the hearing and the record on the proceeding are closed, the presiding officer(s) shall make a recommendation to the OCC concerning the Respondent's request for reinstatement with the bank.

(g) *Time for decision.* Not later than 60 calendar days after the date the record is closed or the date of the response in a case where no hearing was requested, the OCC shall grant or deny the request for reinstatement and notify the Respondent of the OCC's decision. If the OCC denies the request for reinstatement, the OCC shall set forth in the notification the reasons for the OCC's action.

Dated: September 11, 1992.

Stephen R. Steinbrink,

Acting Comptroller of the Currency.

FEDERAL DEPOSIT INSURANCE CORPORATION

12 CFR Parts 308 and 325

For the reasons set forth in the preamble, the Board of Directors of the Federal Deposit Insurance Corporation amends parts 308 and 325 of title 12 of the Code of Federal Regulations as follows:

PART 308—RULES OF PRACTICE AND PROCEDURE

1. The authority citation for part 308 is revised to read as follows:

Authority: 5 U.S.C. 504; 5 U.S.C. 554–557; 12 U.S.C. 1815(e), 1817(a)-and 1818(j), 1818, 1820, 1828(j), 1829, 1831i, 1831o; 15 U.S.C. 781(h), 78m, 78n(a), 78n(c), 78n(d), 78n(f), 78o, 78o-4(c)(5), 78p, 78q, 78q-1, 78s.

2. Part 308 is amended by adding a new subpart Q to read as follows:

Subpart Q—Issuance and Review of Orders Pursuant to the Prompt Corrective Action Provisions of the Federal Deposit Insurance Act

Sec.

308.200 Scope.
308.201 Directives to take prompt corrective action.
308.202 Procedures for reclassifying a bank based on criteria other than capital.
308.203 Order to dismiss a director or senior executive officer.
308.204 Enforcement of directives.

Subpart Q—Issuance and Review of Orders Pursuant to the Prompt Corrective Action Provisions of the Federal Deposit Insurance Act

§ 308.200 Scope.

The rules and procedures set forth in this subpart apply to banks, insured branches of foreign banks and senior executive officers and directors of banks that are subject to the provisions of section 38 of the Federal Deposit Insurance Act (section 38) (12 U.S.C. 1831o) and subpart 9 of Part 325 of this chapter.

§ 308.201 Directives to take prompt corrective action.

(a) *Notice of intent to issue directive.*—(1) *In general.* The FDIC shall provide an undercapitalized, significantly undercapitalized, or critically undercapitalized bank prior written notice of the FDIC's intention to issue a directive requiring such bank to take actions or to follow proscriptions described in section 38 that are within the FDIC's discretion to require or impose under section 38 of the FDI Act, including sections 38 (e)(5), (f)(2), (f)(3), or (f)(5). The bank shall have such time to respond to a proposed directive as provided by the FDIC under paragraph (c) of this section.

(2) *Immediate issuance of final directive.* If the FDIC finds it necessary in order to carry out the purposes of section 38 of the FDI Act, the FDIC may, without providing the notice prescribed in paragraph (a)(1) of this section, issue a directive requiring a bank immediately to take actions or to follow proscriptions described in section 38 that are within the FDIC's discretion to require or impose under section 38 of the FDI Act, including section 38 (e)(5), (f)(2), (f)(3), or (f)(5). A bank that is subject to such an immediately effective directive may submit a written appeal of the directive to the FDIC. Such an appeal must be received by the FDIC within 14 calendar days of the issuance of the directive, unless the FDIC permits a longer period. The FDIC shall consider any such appeal, if filed in a timely matter, within 60 days of receiving the appeal. During such period of review, the directive shall remain in effect unless the FDIC, in its sole discretion, stays the effectiveness of the directive.

(b) *Contents of notice.* A notice of intention to issue a directive shall include:

(1) A statement of the bank's capital measures and capital levels;

(2) A description of the restrictions, prohibitions or affirmative actions that the FDIC proposes to impose or require;

(3) The proposed date when such restrictions or prohibitions would be effective or the proposed date for completion of such affirmative actions; and

(4) The date by which the bank subject to the directive may file with the FDIC a written response to the notice.

(c) *Response to notice.*—(1) *Time for response.* A bank may file a written response to a notice of intent to issue a directive within the time period set by the FDIC. The date shall be at least 14 calendar days from the date of the notice unless the FDIC determines that a shorter period is appropriate in light of the financial condition of the bank or other relevant circumstances.

(2) *Content of response.* The response should include:

(i) An explanation why the action proposed by the FDIC is not an appropriate exercise of discretion under section 38;

(ii) Any recommended modification of the proposed directive; and

(iii) Any other relevant information, mitigating circumstances, documentation, or other evidence in support of the position of the bank regarding the proposed directive.

(d) *FDIC consideration of response.* After considering the response, the FDIC may:

(1) Issue the directive as proposed or in modified form;

(2) Determine not to issue the directive and so notify the bank; or

(3) Seek additional information or clarification of the response from the bank or any other relevant source.

(e) *Failure to file response.* Failure by a bank to file with the FDIC, within the specified time period, a written response to a proposed directive shall constitute a waiver of the opportunity to respond and shall constitute consent to the issuance of the directive.

(f) *Request for modification or rescission of directive.* Any bank that is subject to a directive under this subpart may, upon a change in circumstances, request in writing that the FDIC reconsider the terms of the directive, and may propose that the directive be rescinded or modified. Unless otherwise ordered by the FDIC, the directive shall continue in place while such request is pending before the FDIC.

§ 308.202 Procedures for reclassifying a bank based on criteria other than capital.

(a) *Reclassification based on unsafe or unsound condition or practice.*—(1) *Issuance of notice of proposed reclassification.*—(i) *Grounds for reclassification.* (A) Pursuant to § 325.103(d) of this chapter, the FDIC may reclassify a well capitalized bank as adequately capitalized or subject an adequately capitalized or undercapitalized institution to the supervisory actions applicable to the next lower capital category if:

(*1*) The FDIC determines that the bank is in unsafe or unsound condition; or

(*2*) The FDIC, pursuant to section 8(b)(8) of the FDI Act (12 U.S.C. 1818(b)(8)), deems the bank to be

engaged in an unsafe or unsound practice and not to have corrected the deficiency.

(B) Any action pursuant to this paragraph (a)(1)(i) shall hereinafter be referred to as "reclassification."

(ii) *Prior notice to institution.* Prior to taking action pursuant to § 325.103(d) of this chapter, the FDIC shall issue and serve on the bank a written notice of the FDIC's intention to reclassify the bank.

(2) *Contents of notice.* A notice of intention to reclassify a bank based on unsafe or unsound condition shall include:

(i) A statement of the bank's capital measures and capital levels and the category to which the bank would be reclassified;

(ii) The reasons for reclassification of the bank;

(iii) The date by which the bank subject to the notice of reclassification may file with the FDIC a written appeal of the proposed reclassification and a request for a hearing, which shall be at least 14 calendar days from the date of service of the notice unless the FDIC determines that a shorter period is appropriate in light of the financial condition of the bank or other relevant circumstances.

(3) *Response to notice of proposed reclassification.* A bank may file a written response to a notice of proposed reclassification within the time period set by the FDIC. The response should include:

(i) An explanation of why the bank is not in an unsafe or unsound condition or otherwise should not be reclassified; and

(ii) Any other relevant information, mitigating circumstances, documentation, or other evidence in support of the position of the bank regarding the reclassification.

(4) *Failure to file response.* Failure by a bank to file, within the specified time period, a written response with the FDIC to a notice of proposed reclassification shall constitute a waiver of the opportunity to respond and shall constitute consent to the reclassification.

(5) *Request for hearing and presentation of oral testimony or witnesses.* The response may include a request for an informal hearing before the FDIC under this section. If the bank desires to present oral testimony or witnesses at the hearing, the bank shall include a request to do so with the request for an informal hearing. A request to present oral testimony or witnesses shall specify the names of the witnesses and the general nature of their expected testimony. Failure to request a hearing shall constitute a waiver of any right to a hearing, and failure to request the opportunity to present oral testimony or witnesses shall constitute a waiver of any right to present oral testimony or witnesses.

(6) *Order for informal hearing.* Upon receipt of a timely written request that includes a request for a hearing, the FDIC shall issue an order directing an informal hearing to commence no later than 30 days after receipt of the request, unless the bank requests a later date. The hearing shall be held in Washington, DC or at such other place as may be designated by the FDIC, before a presiding officer(s) designated by the FDIC to conduct the hearing.

(7) *Hearing procedures.* (i) The bank shall have the right to introduce relevant written materials and to present oral argument at the hearing. The bank may introduce oral testimony and present witnesses only if expressly authorized by the FDIC or the presiding officer(s). Neither the provisions of the Administrative Procedure Act (5 U.S.C. 554–557) governing adjudications required by statute to be determined on the record nor the Uniform Rules of Practice and Procedure in this part apply to an informal hearing under this section unless the FDIC orders that such procedures shall apply.

(ii) The informal hearing shall be recorded, and a transcript shall be furnished to the bank upon request and payment of the cost thereof. Witnesses need not be sworn, unless specifically requested by a party or the presiding officer(s). The presiding officer(s) may ask questions of any witness.

(iii) The presiding officer(s) may order that the hearing be continued for a reasonable period (normally five business days) following completion of oral testimony or argument to allow additional written submissions to the hearing record.

(8) *Recommendation of presiding officers.* Within 20 calendar days following the date the hearing and the record on the proceeding are closed, the presiding officer(s) shall make a recommendation to the FDIC on the reclassification.

(9) *Time for decision.* Not later than 60 calendar days after the date the record is closed or the date of the response in a case where no hearing was requested, the FDIC will decide whether to reclassify the bank and notify the bank of the FDIC's decision.

(b) *Request for rescission of reclassification.* Any bank that has been reclassified under this section, may, upon a change in circumstances, request in writing that the FDIC reconsider the reclassification, and may propose that the reclassification be rescinded and that any directives issued in connection with the reclassification be modified, rescinded, or removed. Unless otherwise ordered by the FDIC, the bank shall remain subject to the reclassification and to any directives issued in connection with that reclassification while such request is pending before the FDIC.

§ 308.203 Order to dismiss a director or senior executive officer.

(a) *Service of notice.* When the FDIC issues and serves a directive on a bank pursuant to § 308.201 of this part requiring the bank to dismiss from office any director or senior executive officer under § 38(f)(2)(F)(ii) of the FDI Act, the FDIC shall also serve a copy of the directive, or the relevant portions of the directive where appropriate, upon the person to be dismissed.

(b) *Response to directive.*—(1) *Request for reinstatement.* A director or senior executive officer who has been served with a directive under paragraph (a) of this section (Respondent) may file a written request for reinstatement. The request for reinstatement shall be filed within 10 calendar days of the receipt of the directive by the Respondent, unless further time is allowed by the FDIC at the request of the Respondent.

(2) *Contents of request; informal hearing.* The request for reinstatement shall include reasons why the Respondent should be reinstated, and may include a request for an informal hearing before the FDIC under this section. If the Respondent desires to present oral testimony or witnesses at the hearing, the Respondent shall include a request to do so with the request for an informal hearing. The request to present oral testimony or witnesses shall specify the names of the witnesses and the general nature of their expected testimony. Failure to request a hearing shall constitute a waiver of any right to a hearing and failure to request the opportunity to present oral testimony or witnesses shall constitute a waiver of any right or opportunity to present oral testimony or witnesses.

(3) *Effective date.* Unless otherwise ordered by the FDIC, the dismissal shall remain in effect while a request for reinstatement is pending.

(c) *Order for informal hearing.* Upon receipt of a timely written request from a Respondent for an informal hearing on the portion of a directive requiring a bank to dismiss from office any director or senior executive officer, the FDIC shall issue an order directing an informal hearing to commence no later than 30 days after receipt of the request, unless the Respondent requests a later

date. The hearing shall be held in Washington, DC, or at such other place as may be designated by the FDIC, before a presiding officer(s) designated by the FDIC to conduct the hearing.

(d) *Hearing procedures.*—(1) A Respondent may appear at the hearing personally or through counsel. A Respondent shall have the right to introduce relevant written materials and to present oral argument. A Respondent may introduce oral testimony and present witnesses only if expressly authorized by the FDIC or the presiding officer(s). Neither the provisions of the Administrative Procedure Act governing adjudications required by statute to be determined on the record nor the Uniform Rules of Practice and Procedure in this part apply to an informal hearing under this section unless the FDIC orders that such procedures shall apply.

(2) The informal hearing shall be recorded, and a transcript shall be furnished to the Respondent upon request and payment of the cost thereof. Witnesses need not be sworn, unless specifically requested by a party or the presiding officer(s). The presiding officer(s) may ask questions of any witness.

(3) The presiding officer(s) may order that the hearing be continued for a reasonable period (normally five business days) following completion of oral testimony or argument to allow additional written submissions to the hearing record.

(e) *Standard for review.* A Respondent shall bear the burden of demonstrating that his or her continued employment by or service with the bank would materially strengthen the bank's ability:

(1) To become adequately capitalized, to the extent that the directive was issued as a result of the bank's capital level or failure to submit or implement a capital restoration plan; and

(2) To correct the unsafe or unsound condition or unsafe or unsound practice, to the extent that the directive was issued as a result of classification of the bank based on supervisory criteria other than capital, pursuant to section 38(g) of the FDI Act.

(f) *Recommendation of presiding officers.* Within 20 calendar days following the date the hearing and the record on the proceeding are closed, the presiding officer(s) shall make a recommendation to the FDIC concerning the Respondent's request for reinstatement with the bank.

(g) *Time for decision.* Not later than 60 calendar days after the date the record is closed or the date of the response in a case where no hearing was requested, the FDIC shall grant or deny the request for reinstatement and notify the Respondent of the FDIC's decision. If the FDIC denies the request for reinstatement, the FDIC shall set forth in the notification the reasons for the FDIC's action.

§ 308.204 Enforcement of directives.

(a) *Judicial remedies.* Whenever a bank fails to comply with a directive issued under section 38, the FDIC may seek enforcement of the directive in the appropriate United States district court pursuant to section 8(i)(1) of the FDI Act (12 U.S.C. 1818(i)(1)).

(b) *Administrative remedies*—(1) *Failure to comply with directive.* Pursuant to section 8(i)(2)(A) of the FDI Act, the FDIC may assess a civil money penalty against any bank that violates or otherwise fails to comply with any final directive issued under section 38 and against any institution-affiliated party who participates in such violation or noncompliance.

(2) *Failure to implement capital restoration plan.* The failure of a bank to implement a capital restoration plan required under section 38, or subpart B of part 325 of this chapter, or the failure of a company having control of a bank to fulfill a guarantee of a capital restoration plan made pursuant to section 38(e)(2) of the FDI Act shall subject the bank to the assessment of civil money penalties pursuant to section 8(i)(2)(A) of the FDI Act.

(c) *Other enforcement action.* In addition to the actions described in paragraphs (a) and (b) of this section, the FDIC may seek enforcement of the provisions of section 38 or subpart B of part 325 of this chapter through any other judicial or administrative proceeding authorized by law.

PART 325—CAPITAL MAINTENANCE

1. The authority citation for part 325 is revised to read as follows:

Authority: 12 U.S.C. 1815(a), 1815(b), 1816, 1818(a), 1818(b), 1818(c), 1818(t), 1819(Tenth), 1828(c), 1828(d), 1828(i), 1828(n), 1828(o), 1831o; 3907, 3909; Pub. L. 102–233, 105 Stat. 1761, 1790 (12 U.S.C. 1831n note); Pub. L. 102–242, 105 Stat. 2236, 2386 (12 U.S.C. 1828 note).

Subpart A—Minimum Capital Requirements

2. Part 325 is amended by designating §§ 325.1 through 325.6 as subpart A and adding the subpart heading to read as set forth above.

3. Appendixes A and B to part 325 are redesignated as appendixes A and B to subpart A of part 325 and the appendix headings are revised to read as follows:

Appendix A to Subpart A of Part 325—Statement of Policy on Risk-Based Capital

Appendix B to Subpart A of Part 325—Statement of Policy on Capital Adequacy

4. Section 325.2 is amended by redesignating paragraphs (e), (f), (g), (h), (i), (j), (k), (l), (m), (n) and (o) as paragraphs (h), (i), (j), (m), (n), (o), (p), (r), (t), (v) and (x), respectively, and by adding new paragraphs (e), (f), (g), (k), (l), (q), (s), (u) and (w) to read as follows:

§ 325.2 Definitions.

* * * * *

(e)(1) *Control* has the same meaning assigned to it in section 2 of the Bank Holding Company Act (12 U.S.C. 1841), and the term *controlled* shall be construed consistently with the term *control.*

(2) *Exclusion for fiduciary ownership.* No insured depository institution or company controls another insured depository institution or company by virtue of its ownership or control of shares in a fiduciary capacity. Shares shall not be deemed to have been acquired in a fiduciary capacity if the acquiring insured depository institution or company has sole discretionary authority to exercise voting rights with respect thereto.

(3) *Exclusion for debts previously contracted.* No insured depository institution or company controls another insured depository institution or company by virtue of its ownership or control of shares acquired in securing or collecting a debt previously contracted in good faith, until two years after the date of acquisition. The two-year period may be extended at the discretion of the appropriate federal banking agency for up to three one-year periods.

(f) *Controlling person* means any person having control of an insured depository institution and any company controlled by that person.

(g)(1) *Highly leveraged transaction* means an extension of credit to or investment in a business by an insured depository institution where the financing transaction involves a buyout, acquisition, or recapitalization of an existing business and one of the following criteria is met:

(i) The transaction results in a liabilities-to-assets leverage ratio higher than 75 percent; or

(ii) The transaction at least doubles the subject company's liabilities and results in a liabilities-to-assets leverage ratio higher than 50 percent; or

(iii) The transaction is designated an HLT by a syndication agent or a federal bank regulator.

(2) Notwithstanding paragraph (g)(1) of this section, loans and exposures to any obligor in which the total financing package, including all obligations held by all participants is $20 million or more, or such lower level as the FDIC may establish by order on a case-by-case basis, will be excluded from this definition.

* * * * *

(k) *Leverage ratio* means the ratio of Tier 1 capital to total assets, as calculated under this part.

(l) *Management fee* means any payment of money or provision of any other thing of value to a company or individual for the provision of management services or advice to the bank or related overhead expenses, including payments related to supervisory, executive, managerial, or policymaking functions, other than compensation to an individual in the individual's capacity as an officer or employee of the bank.

* * * * *

(q) *Risk-weighted assets* means total risk-weighted assets, as calculated in accordance with the FDIC's Statement of Policy on Risk-Based Capital (appendix A to subpart A of part 325).

* * * * *

(s) *Tangible equity* means the amount of core capital elements as defined in section I.A.1 of the FDIC's Statement of Policy on Risk-based Capital (appendix A to subpart A of part 325), plus the amount of outstanding cumulative perpetual preferred stock (including related surplus), minus all intangible assets except purchased mortgage servicing rights to the extent that the FDIC determines pursuant to section 475 of the Federal Deposit Insurance Corporation Improvement Act of 1991 (12 U.S.C. 1828 note) and § 325.5(f) of this part that purchased mortgage servicing rights may be included in calculating the bank's Tier 1 capital.

* * * * *

(u) *Tier 1 risk-based capital ratio* means the ratio of Tier 1 capital to risk-weighted assets, as calculated in accordance with the FDIC's Statement of Policy on Risk-Based Capital (appendix A to subpart A of part 325).

* * * * *

(w) *Total risk-based capital ratio* means the ratio of qualifying total capital to risk-weighted assets, as calculated in accordance with the FDIC's Statement of Policy on Risk-Based Capital (appendix A to subpart A of part 325).

* * * * *

5. Part 325 is amended by adding a new subpart B to read as follows:

Subpart B—Prompt Corrective Action

Sec.

325.101 Authority, purpose, scope, other supervisory authority, and disclosure of capital categories.
325.102 Notice of capital category.
325.103 Capital measures and capital category definitions.
325.104 Capital restoration plans.
325.105 Mandatory and discretionary supervisory actions under section 38.

Subpart B—Prompt Corrective Action

§ 325.101 Authority, purpose, scope, other supervisory authority, and disclosure of capital categories.

(a) *Authority.* This subpart is issued by the FDIC pursuant to section 38 (section 38) of the Federal Deposit Insurance Act (FDI Act), as added by section 131 of the Federal Deposit Insurance Corporation Improvement Act of 1991 (Pub. L. 102–242, 105 Stat. 2236 (1991)) (12 U.S.C. 1831o).

(b) *Purpose.* Section 38 of the FDI Act establishes a framework of supervisory actions for insured depository institutions that are not adequately capitalized. The principal purpose of this subpart is to define, for FDIC-insured state-chartered nonmember banks, the capital measures and capital levels, and for insured branches of foreign banks, comparable asset-based measures and levels, that are used for determining the supervisory actions authorized under section 38 of the FDI Act. This subpart also establishes procedures for submission and review of capital restoration plans and for issuance and review of directives and orders pursuant to section 38.

(c) *Scope.* This subpart implements the provisions of section 38 of the FDI Act as they apply to FDIC-insured state-chartered nonmember banks and insured branches of foreign banks for which the FDIC is the appropriate Federal banking agency. Certain of these provisions also apply to officers, directors and employees of those insured institutions. In addition, certain provisions of this subpart apply to all insured depository institutions that are deemed critically undercapitalized.

(d) *Other supervisory authority.* Neither section 38 nor this subpart in any way limits the authority of the FDIC under any other provision of law to take supervisory actions to address unsafe or unsound practices, deficient capital levels, violations of law, unsafe or unsound conditions, or other practices. Action under section 38 of the FDI Act and this subpart may be taken independently of, in conjunction with or in addition to any other enforcement action available to the FDIC, including issuance of cease and desist orders, capital directives, approval or denial of applications or notices, assessment of civil money penalties, or any other actions authorized by law.

(e) *Disclosure of capital categories.* The assignment of a bank or insured branch under this subpart within a particular capital category is for purposes of implementing and applying the provisions of section 38. Unless permitted by the FDIC or otherwise required by law, no bank may state in any advertisement or promotional material its capital category under this subpart or that the FDIC or any other federal banking agency has assigned the bank to a particular capital category.

§ 325.102 Notice of capital category.

(a) *Effective date of determination of capital category.* A bank shall be deemed to be within a given capital category for purposes of section 38 of the FDI Act and this subpart as of the date the bank is notified of, or is deemed to have notice of, its capital category, pursuant to paragraph (b) of this section.

(b) *Notice of capital category.* A bank shall be deemed to have been notified of its capital levels and its capital category as of the most recent date:

(1) A Consolidated Report of Condition and Income (Call Report) is required to be filed with the FDIC;

(2) A final report of examination is delivered to the bank; or

(3) Written notice is provided by the FDIC to the bank of its capital category for purposes of section 38 of the FDI Act and this subpart or that the bank's capital category has changed as provided in § 325.103(d).

(c) *Adjustments to reported capital levels and capital category*—(1) *Notice of adjustment by bank.* A bank shall provide the appropriate FDIC regional director with written notice that an adjustment to the bank's capital category may have occurred no later than 15 calendar days following the date that any material event has occurred that would cause the bank to be placed in a lower capital category from the category assigned to the bank for purposes of section 38 and this subpart on the basis of the bank's most recent Call Report or report of examination.

(2) *Determination by the FDIC to change capital category.* After receiving notice pursuant to paragraph (c)(1) of this section, the FDIC shall determine whether to change the capital category

of the bank and shall notify the bank of the FDIC's determination.

§ 325.103 Capital measures and capital category definitions.

(a) *Capital measures.* For purposes of section 38 and this subpart, the relevant capital measures shall be:

(1) The total risk-based capital ratio;

(2) The Tier 1 risk-based capital ratio; and

(3) The leverage ratio.

(b) *Capital categories.* For purposes of section 38 and this subpart, a bank shall be deemed to be:

(1) *Well capitalized* if the bank:

(i) Has a total risk-based capital ratio of 10.0 percent or greater; and

(ii) Has a Tier 1 risk-based capital ratio of 6.0 percent or greater; and

(iii) Has a leverage ratio of 5.0 percent or greater; and

(iv) Is not subject to any written agreement, order, capital directive, or prompt corrective action directive issued by the FDIC pursuant to section 8 of the FDI Act (12 U.S.C. 1818), the International Lending Supervision Act of 1983 (12 U.S.C. 3907), or section 38 of the FDI Act (12 U.S.C. 1831o), or any regulation thereunder, to meet and maintain a specific capital level for any capital measure.

(2) *Adequately capitalized* if the bank:

(i) Has a total risk-based capital ratio of 8.0 percent or greater; and

(ii) Has a Tier 1 risk-based capital ratio of 4.0 percent or greater; and

(iii) Has:

(A) A leverage ratio of 4.0 percent or greater; or

(B) A leverage ratio of 3.0 percent or greater if the bank is rated composite 1 under the CAMEL rating system in the most recent examination of the bank and is not experiencing or anticipating significant growth; and

(iv) Does not meet the definition of a *well capitalized* bank.

(3) *Undercapitalized* if the bank:

(i) Has a total risk-based capital ratio that is less than 8.0 percent; or

(ii) Has a Tier 1 risk-based capital ratio that is less than 4.0 percent; or

(iii)(A) Except as provided in paragraph (b)(3)(iii)(B) of this section, has a leverage ratio that is less than 4.0 percent; or

(B) Has a leverage ratio that is less than 3.0 percent if the bank is rated composite 1 under the CAMEL rating system in the most recent examination of the bank and is not experiencing or anticipating significant growth.

(4) *Significantly undercapitalized* if the bank has:

(i) A total risk-based capital ratio that is less than 6.0 percent; or

(ii)A Tier 1 risk-based capital ratio that is less than 3.0 percent; or

(iii) A leverage ratio that is less than 3.0 percent.

(5) *Critically undercapitalized* if the insured depository institution has a ratio of tangible equity to total assets that is equal to or less than 2.0 percent.

(c) *Capital categories for insured branches of foreign banks.* For purposes of the provisions of section 38 and this subpart, a insured branch of a foreign bank shall be deemed to be:

(1) *Well capitalized* if the insured branch:

(i) Maintains the pledge of assets required under 12 CFR 346.19; and

(ii) Maintains the eligible assets prescribed under 12 CFR 346.20 at 108 percent or more of the preceding quarter's average book value of the insured branch's third-party liabilities; and

(iii) Has not received written notification from:

(A) The OCC to increase its capital equivalency deposit pursuant to 12 CFR 28.6(a), or to comply with asset maintenance requirements pursuant to 12 CFR 28.9; or

(B) The FDIC to pledge additional assets pursuant to 12 CFR 346.19 or to maintain a higher ratio of eligible assets pursuant to 12 CFR 346.20.

(2) *Adequately capitalized* if the insured branch:

(i) Maintains the pledge of assets required under 12 CFR 346.19; and

(ii) Maintains the eligible assets prescribed under 12 CFR 346.20 at 106 percent or more of the preceding quarter's average book value of the insured branch's third-party liabilities; and

(iii) Does not meet the definition of a *well capitalized* insured branch.

(3) *Undercapitalized* if the insured branch:

(i) Fails to maintain the pledge of assets required under 12 CFR 346.19; or

(ii) Fails to maintain the eligible assets prescribed under 12 CFR 346.20 at 106 percent or more of the preceding quarter's average book value of the insured branch's third-party liabilities.

(4) *Significantly undercapitalized* if it fails to maintain the eligible assets prescribed under 12 CFR 346.20 at 104 percent or more of the preceding quarter's average book value of the insured branch's third-party liabilities.

(5) *Critically undercapitalized* if the insured depository institution fails to maintain the eligible assets prescribed under 12 CFR 346.20 at 102 percent or more of the preceding quarter's average book value of the insured branch's third-party liabilities.

(d) *Reclassifications based on supervisory criteria other than capital.* The FDIC may reclassify a well capitalized bank as adequately capitalized and may require an adequately capitalized bank or an undercapitalized bank to comply with certain mandatory or discretionary supervisory actions as if the bank were in the next lower capital category (except that the FDIC may not reclassify a significantly undercapitalized bank as critically undercapitalized) (each of these actions are hereinafter referred to generally as "reclassifications") in the following circumstances:

(1) *Unsafe or unsound condition.* The FDIC has determined, after notice and opportunity for hearing pursuant to § 308.202(a) of this chapter, that the bank is in unsafe or unsound condition; or

(2) *Unsafe or unsound practice.* The FDIC has determined, after notice and opportunity for hearing pursuant to § 308.202(a) of this chapter, that, in the most recent examination of the bank, the bank received and has not corrected a less-than-satisfactory rating for any of the categories of asset quality, management, earnings, or liquidity.

§ 325.104 Capital restoration plans.

(a) *Schedule for filing plan*—(1) *In general.* A bank shall file a written capital restoration plan with the appropriate FDIC regional director within 45 days of the date that the bank receives notice or is deemed to have notice that the bank is undercapitalized, significantly undercapitalized, or critically undercapitalized, unless the FDIC notifies the bank in writing that the plan is to be filed within a different period. An adequately capitalized bank that has been required pursuant to § 325.103(d) of this subpart to comply with supervisory actions as if the bank were undercapitalized is not required to submit a capital restoration plan solely by virtue of the reclassification.

(2) *Additional capital restoration plans.* A. Notwithstanding paragraph (a)(1) of this section, a bank that has already submitted and is operating under a capital restoration plan approved under section 38 and this subpart is not required to submit an additional capital restoration plan based on a revised calculation of its capital measures or a reclassification of the institution under § 325.103 unless the FDIC notifies the bank that it must submit a new or revised capital plan. A bank that is notified that it must submit a new or revised capital restoration plan shall file the plan in writing with the appropriate FDIC regional director

within 45 days of receiving such notice, unless the FDIC notifies the bank in writing that the plan must be filed within a different period.

(b) *Contents of plan.* All financial data submitted in connection with a capital restoration plan shall be prepared in accordance with the instructions provided on the Call Report, unless the FDIC instructs otherwise. The capital restoration plan shall include all of the information required to be filed under section 38(e)(2) of the FDI Act. A bank that is required to submit a capital restoration plan as a result of a reclassification of the bank pursuant to § 325.103(d) of this subpart shall include a description of the steps the bank will take to correct the unsafe or unsound condition or practice. No plan shall be accepted unless it includes any performance guarantee described in section 38(e)(2)(C) of the FDI Act by each company that controls the bank.

(c) *Review of capital restoration plans.* Within 60 days after receiving a capital restoration plan under this subpart, the FDIC shall provide written notice to the bank of whether the plan has been approved. The FDIC may extend the time within which notice regarding approval of a plan shall be provided.

(d) *Disapproval of capital plan.* If a capital restoration plan is not approved by the FDIC, the bank shall submit a revised capital restoration plan within the time specified by the FDIC. Upon receiving notice that its capital restoration plan has not been approved, any undercapitalized bank (as defined in § 325.103(b) of this subpart) shall be subject to all of the provisions of section 38 and this subpart applicable to significantly undercapitalized institutions. These provisions shall be applicable until such time as a new or revised capital restoration plan submitted by the bank has been approved by the FDIC.

(e) *Failure to submit capital restoration plan.* A bank that is undercapitalized (as defined in § 325.103(b) of this subpart) and that fails to submit a written capital restoration plan within the period provided in this section shall, upon the expiration of that period, be subject to all of the provisions of section 38 and this subpart applicable to significantly undercapitalized institutions.

(f) *Failure to implement capital restoration plan.* Any undercapitalized bank that fails in any material respect to implement a capital restoration plan shall be subject to all of the provisions of section 38 and this subpart applicable to significantly undercapitalized institutions.

(g) *Amendment of capital restoration plan.* A bank that has filed an approved capital restoration plan may, after prior written notice to and approval by the FDIC, amend the plan to reflect a change in circumstance. Until such time as a proposed amendment has been approved, the bank shall implement the capital restoration plan as approved prior to the proposed amendment.

(h) *Performance guarantee by companies that control a bank*—(1) *Limitation on liability*—(i) *Amount limitation.* The aggregate liability under the guarantee provided under section 38 and this subpart for all companies that control a specific bank that is required to submit a capital restoration plan under this subpart shall be limited to the lesser of:

(A) An amount equal to 5.0 percent of the bank's total assets at the time the bank was notified or deemed to have notice that the bank was undercapitalized; or

(B) The amount necessary to restore the relevant capital measures of the bank to the levels required for the bank to be classified as adequately capitalized, as those capital measures and levels are defined at the time that the bank initially fails to comply with a capital restoration plan under this subpart.

(ii) *Limit on duration.* The guarantee and limit of liability under section 38 and this subpart shall expire after the FDIC notifies the bank that it has remained adequately capitalized for each of four consecutive calendar quarters. The expiration or fulfillment by a company of a guarantee of a capital restoration plan shall not limit the liability of the company under any guarantee required or provided in connection with any capital restoration plan filed by the same bank after expiration of the first guarantee.

(iii) *Collection on guarantee.* Each company that controls a given bank shall be jointly and severally liable for the guarantee for such bank as required under section 38 and this subpart, and the FDIC may require and collect payment of the full amount of that guarantee from any or all of the companies issuing the guarantee.

(2) *Failure to provide guarantee.* In the event that a bank that is controlled by any company submits a capital restoration plan that does not contain the guarantee required under section 38(e)(2) of the FDI Act, the bank shall, upon submission of the plan, be subject to the provisions of section 38 and this subpart that are applicable to banks that have not submitted an acceptable capital restoration plan.

(3) *Failure to perform guarantee.* Failure by any company that controls a bank to perform fully its guarantee of any capital plan shall constitute a material failure to implement the plan for purposes of section 38(f) of the FDI Act. Upon such failure, the bank shall be subject to the provisions of section 38 and this subpart that are applicable to banks that have failed in a material respect to implement a capital restoration plan.

§ 325.105 Mandatory and discretionary supervisory actions under section 38.

(a) *Mandatory supervisory actions*—(1) *Provisions applicable to all banks.* All banks are subject to the restrictions contained in section 38(d) of the FDI Act on payment of capital distributions and management fees.

(2) *Provisions applicable to undercapitalized, significantly undercapitalized, and critically undercapitalized banks.* Immediately upon receiving notice or being deemed to have notice, as provided in § 325.102 of this subpart, that the bank is undercapitalized, significantly undercapitalized, or critically undercapitalized, the bank shall become subject to the provisions of section 38 of the FDI Act:

(i) Restricting payment of capital distributions and management fees (section 38(d));

(ii) Requiring that the FDIC monitor the condition of the bank (section 38(e)(1));

(iii) Requiring submission of a capital restoration plan within the schedule established in this subpart (section 38(e)(2));

(iv) Restricting the growth of the bank's assets (section 38(e)(3)); and

(v) Requiring prior approval of certain expansion proposals (section 38(e)(4)).

(3) *Additional provisions applicable to significantly undercapitalized, and critically undercapitalized banks.* In addition to the provisions of section 38 of the FDI Act described in paragraph (a)(2) of this section, immediately upon receiving notice or being deemed to have notice, as provided in § 325.102 of this subpart, that the bank is significantly undercapitalized, or critically undercapitalized, or that the bank is subject to the provisions applicable to institutions that are significantly undercapitalized because the bank failed to submit or implement in any material respect an acceptable capital restoration plan, the bank shall become subject to the provisions of section 38 of the FDI Act that restrict compensation paid to senior executive

officers of the institution (section 38(f)(4)).

(4) *Additional provisions applicable to critically undercapitalized institutions.* (i) In addition to the provisions of section 38 of the FDI Act described in paragraphs (a)(2) and (a)(3) of this section, immediately upon receiving notice or being deemed to have notice, as provided in § 325.102 of this subpart, that the insured depository institution is critically undercapitalized, the institution is prohibited from doing any of the following without the FDIC's prior written approval:

(A) Entering into any material transaction other than in the usual course of business, including any investment, expansion, acquisition, sale of assets, or other similar action with respect to which the depository institution is required to provide notice to the appropriate Federal banking agency;

(B) Extending credit for any highly leveraged transaction;

(C) Amending the institution's charter or bylaws, except to the extent necessary to carry out any other requirement of any law, regulation, or order;

(D) Making any material change in accounting methods;

(E) Engaging in any covered transaction (as defined in section 23A(b) of the Federal Reserve Act (12 U.S.C. 371c(b));

(F) Paying excessive compensation or bonuses;

(G) Paying interest on new or renewed liabilities at a rate that would increase the institution's weighted average cost of funds to a level significantly exceeding the prevailing rates of interest on insured deposits in the institution's normal market areas; and

(H) Making any principal or interest payment on subordinated debt beginning 60 days after becoming critically undercapitalized except that this restriction shall not apply, until July 15, 1996, with respect to any subordinated debt outstanding on July 15, 1991, and not extended or otherwise renegotiated after July 15, 1991.

(ii) In addition, the FDIC may further restrict the activities of any critically undercapitalized institution to carry out the purposes of section 38 of the FDI Act.

(5) *Exception for certain savings associations.* The restrictions in paragraph (a)(4) of this section shall not apply, before July 1, 1994, to any insured savings association if:

(i) The savings association had submitted a plan meeting the requirements of section 5(t)(6)(A)(ii) of the Home Owners' Loan Act (12 U.S.C. 1464(t)(6)(A)(ii)) prior to December 19, 1991;

(ii) The Director of OTS had accepted the plan prior to December 19, 1991; and

(iii) The savings association remains in compliance with the plan or is operating under a written agreement with the appropriate federal banking agency.

(b) *Discretionary supervisory actions.* In taking any action under section 38 that is within the FDIC's discretion to take in connection with:

(1) An insured depository institution that is deemed to be undercapitalized, significantly undercapitalized, or critically undercapitalized, or has been reclassified as undercapitalized, or significantly undercapitalized; or

(2) An officer or director of such institution, the FDIC shall follow the procedures for issuing directives under §§ 308.201 and 308.203 of this chapter, unless otherwise provided in section 38 or this subpart.

By order of the Board of Directors.

Dated at Washington, DC, this 15th day of September, 1992.

Federal Deposit Insurance Corporation.

Robert E. Feldman,

Deputy Executive Secretary.

DEPARTMENT OF THE TREASURY

Office of Thrift Supervision

12 CFR Part 565

Accordingly, the Office of Thrift Supervision hereby amends subchapter D, chapter V, title 12, Code of Federal Regulations, by adding part 565 as set forth below.

SUBCHAPTER D—REGULATIONS APPLICABLE TO ALL SAVINGS ASSOCIATIONS

1. A new part 565 is added to read as follows:

PART 565–PROMPT CORRECTIVE ACTION

Sec.

565.1 Authority, purpose, scope, other supervisory authority, and disclosure of capital categories.
565.2 Definitions.
565.3 Notice of capital category.
565.4 Capital measures and capital category definitions.
565.5 Capital restoration plans.
565.6 Mandatory and discretionary supervisory actions under section 38.
565.7 Directives to take prompt corrective action.
565.8 Procedures for reclassifying a savings association based on criteria other than capital.
565.9 Order to dismiss a director or senior executive officer.
565.10 Enforcement of directives.

Authority: 12 U.S.C. 1831o.

§ 565.1 Authority, purpose, scope, other Supervisory authority, and disclosure of capital categories.

(a) *Authority.* This part is issued by the OTS pursuant to section 38 (section 38) of the Federal Deposit Insurance Act (FDI Act) as added by section 131 of the Federal Deposit Insurance Corporation Improvement Act of 1991 (Pub. L. 102–242, 105 Stat. 2236 (1991)) (12 U.S.C. 1831o).

(b) *Purpose.* Section 38 of the FDI Act establishes a framework of supervisory actions for insured depository institutions that are not adequately capitalized. The principal purpose of this part is to define, for savings associations, the capital measures and capital levels that are used for determining the supervisory actions authorized under section 38 of the FDI Act. This part also establishes procedures for submission and review of capital restoration plans and for issuance and review of directives and orders pursuant to section 38.

(c) *Scope.* This part implements the provisions of section 38 of the FDI Act as they apply to savings associations. Certain of these provisions also apply to officers, directors and employees of savings associations. Other provisions apply to any company that controls a savings association and to the affiliates of a savings association.

(d) *Other supervisory authority.* Neither section 38 nor this part in any way limits the authority of the OTS under any other provision of law to take supervisory actions to address unsafe or unsound practices, deficient capital levels, violations of law, unsafe or unsound conditions, or other practices. Action under section 38 of the FDI Act and this part may be taken independently of, in conjunction with, or in addition to any other enforcement action available to the OTS, including issuance of cease and desist orders, capital directives, approval or denial of applications or notices, assessment of civil money penalties, or any other actions authorized by law.

(e) *Disclosure of capital categories.* The assignment of a savings association under this part within a particular capital category is for purposes of implementing and applying the provisions of section 38. Unless permitted by the OTS or otherwise required by law, no savings association may state in any advertisement or promotional material its capital category under this subpart or that the OTS or any other federal banking agency has assigned the savings association to a particular category.

§ 565.2 Definitions.

For purposes of this part, except as modified in this section or unless the context otherwise requires, the terms used in this part have the same meanings as set forth in sections 38 and 3 of the FDI Act.

(a)(1) *Control* has the same meaning assigned to it in section 2 of the Bank Holding Company Act (12 U.S.C. 1841), and the term "controlled" shall be construed consistently with the term "control."

(2) *Exclusion for fiduciary ownership.* No insured depository institution or company controls another insured depository institution or company by virtue of its ownership or control of shares in a fiduciary capacity. Shares shall not be deemed to have been acquired in a fiduciary capacity if the acquiring insured depository institution or company has sole discretionary authority to exercise voting rights with respect thereto.

(3) *Exclusion for debts previously contracted.* No insured depository institution or company controls another insured depository institution or company by virtue of its ownership or control of shares acquired in securing or collecting a debt previously contracted in good faith, until two years after the date of acquisition. The two-year period may be extended at the discretion of the appropriate federal banking agency for up to three one-year periods.

(b) *Controlling person* means any person having control of an insured depository institution and any company controlled by that person.

(c) *Leverage ratio* means the ratio of Tier 1 capital to adjusted total assets, as calculated in accordance with part 567 of this subchapter.

(d) *Management fee* means any payment of money or provision of any other thing of value to a company or individual for the provision of management services or advice to the savings association or related overhead expenses, including payments related to supervisory, executive, managerial or policymaking functions, other than compensation to an individual in the individual's capacity as an officer or employee of the savings association.

(e) *Risk-weighted assets* means total risk-weighted assets, as calculated in accordance with part 567 of this subchapter.

(f) *Tangible equity* means the amount of a savings association's core capital as defined in part 567 of this subchapter plus the amount of outstanding cumulative perpetual preferred stock (including related surplus), minus all intangible assets not previously deducted except:

(1) Purchased mortgage servicing rights to the extent that the OTS determines pursuant to section 475 of FDICIA that purchased mortgage servicing rights may be included in calculating the savings association's core capital; and

(2) Qualifying supervisory goodwill authorized for inclusion in core capital pursuant to 12 CFR Part 567.

(g) *Tier 1 capital* means the amount of core capital as defined in part 567 of this subchapter.

(h) *Tier 1 risk-based capital ratio* means the ratio of Tier 1 capital to risk-weighted assets, as calculated in accordance with part 567 of this subchapter.

(i) *Total assets,* for purposes of § 565.4(b)(5), means adjusted total assets as calculated in accordance with part 567 of this subchapter, minus intangible assets as provided in the definition of tangible equity.

(j) *Total risk-based capital ratio* means the ratio of total capital to risk-weighted assets, as calculated in accordance with part 567 of this subchapter.

§ 565.3 Notice of capital category.

(a) *Effective date of determination of capital category.* A savings association shall be deemed to be within a given capital category for purposes of section 38 of the FDI Act and this part as of the date the savings association is notified of, or is deemed to have notice of, its capital category, pursuant to paragraph (b) of this section.

(b) *Notice of capital category.* A savings association shall be deemed to have been notified of its capital levels and its capital category as of the most recent date:

(1) A Thrift Financial Report (TFR) is required to be filed with the OTS;

(2) A final report of examination is delivered to the savings association; or

(3) Written notice is provided by the OTS to the savings association of its capital category for purposes of section 38 of the FDI Act and this part or that the savings association's capital category has changed as provided in paragraph (c) of this section or § 565.4(c).

(c) *Adjustments to reported capital levels and category—*(1) *Notice of adjustment by savings association.* A savings association shall provide the OTS with written notice that an adjustment to the savings association's capital category may have occurred no later than 15 calendar days following the date that any material event has occurred that would cause the savings association to be placed in a lower capital category from the category assigned to the savings association for purposes of section 38 and this part on the basis of the savings association's most recent TFR or report of examination.

(2) *Determination by the OTS to change capital category.* After receiving notice pursuant to paragraph (c)(1) of this section, the OTS shall determine whether to change the capital category of the savings association and shall notify the savings association of the OTS's determination.

§ 565.4 Capital measures and capital category definitions.

(a) *Capital measures.* For purposes of section 38 and this part, the relevant capital measures shall be:

(1) The total risk-based capital ratio;

(2) The Tier 1 risk-based capital ratio and

(3) The leverage ratio.

(b) *Capital categories.* For purposes of section 38 and this part, a savings association shall be deemed to be:

(1) *Well capitalized* if the savings association:

(i) Has a total risk-based capital ratio of 10.0 percent or greater; and

(ii) Has a Tier 1 risk-based capital ratio of 6.0 percent or greater; and

(iii) Has a leverage ratio of 5.0 percent or greater; and

(iv) Is not subject to any written agreement, order, capital directive, or prompt corrective action directive issued by the OTS pursuant to section 8 of the FDI Act, the International Lending Supervision Act of 1983 (5 U.S.C. 3907), the Home Owners' Loan Act (12 U.S.C. 1464(t)(6)(A)(ii)), or section 38 of the FDI Act, or any regulation thereunder, to meet and maintain a specific capital level for any capital measure.

(2) *Adequately capitalized* if the savings association:

(i) Has a total risk-based capital ratio of 8.0 percent or greater; and

(ii) Has a Tier 1 risk-based capital ratio of 4.0 percent or greater; and

(iii) Has:

(A) A leverage ratio of 4.0 percent or greater; or

(B) A leverage ratio of 3.0 percent or greater if the savings association is rated composite 1 under the MACRO rating system in the most recent examination of the savings association; and

(iv) Does not meet the definition of a *well capitalized* savings association.

(3) *Undercapitalized* if the savings association:

(i) Has a total risk-based capital ratio that is less than 8.0 percent; or

(ii) Has a Tier 1 risk-based capital ratio that is less than 4.0 percent; or

(iii) (A) Except as provided in paragraph (b)(3)(iii) (B) of this section, has a leverage ratio that is less than 4.0 percent; or

(B) Has a leverage ratio that is less than 3.0 percent if the savings association is rated composite 1 under the MACRO rating system in the most recent examination of the savings association.

(4) *Significantly undercapitalized* if the savings association has:

(i) A total risk-based capital ratio that is less than 6.0 percent; or

(ii) A Tier 1 risk-based capital ratio that is less than 3.0 percent; or

(iii) A leverage ratio that is less than 3.0 percent.

(5) *Critically undercapitalized* if the savings association has a ratio of tangible equity to total assets that is equal to or less than 2.0 percent.

(c) *Reclassification based on supervisory criteria other than capital.* The OTS may reclassify a well capitalized savings association as adequately capitalized and may require an adequately capitalized or undercapitalized savings association to comply with certain mandatory or discretionary supervisory actions as if the savings association were in the next lower capital category (except that the OTS may not reclassify a significantly undercapitalized savings association as critically undercapitalized) (each of these actions are hereinafter referred to generally as "reclassifications") in the following circumstances:

(1) *Unsafe or unsound condition.* The OTS has determined, after notice and opportunity for hearing pursuant to § 565.8(a) of this part, that the savings association is in an unsafe or unsound condition; or

(2) *Unsafe or unsound practice.* The OTS has determined, after notice and opportunity for hearing pursuant to § 565.8(a) of this part, that, in the most recent examination of the savings association, the savings association received, and has not corrected, a less-than-satisfactory rating for any of the equivalent MACRO rating categories for asset quality, management, earnings, or liquidity.

§ 565.5 Capital restoration plans.

(a) *Schedule for filing plan*—(1) *In general.* A savings association shall file a written capital restoration plan with the appropriate Regional Office within 45 days of the date that the savings association receives notice or is deemed to have notice that the savings association is undercapitalized, significantly undercapitalized, or critically undercapitalized, unless the OTS notifies the savings association in writing that the plan is to be filed within a different period. An adequately capitalized savings association that has been required pursuant to § 565.4(c) to comply with supervisory actions as if the savings association were undercapitalized is not required to submit a capital restoration plan solely by virtue of the reclassification.

(2) *Additional capital restoration plans.* Notwithstanding paragraph (a)(1) of this section, a savings association that has already submitted and is operating under a capital restoration plan approved under section 38 and this part is not required to submit an additional capital restoration plan based on a revised calculation of its capital measures or a reclassification of the institution under § 565.4(c) unless the OTS notifies the savings association that it must submit a new or revised capital plan. A savings association that is notified that it must submit a new or revised capital restoration plan shall file the plan in writing with the appropriate Regional Office within 45 days of receiving such notice, unless the OTS notifies the savings association in writing that the plan is to be filed within a different period.

(b) *Contents of plan.* All financial data submitted in connection with a capital restoration plan shall be prepared in accordance with the instructions provided on the TFR, unless the OTS instructs otherwise. The capital restoration plan shall include all of the information required to be filed under section 38(e)(2) of the FDI Act. A savings association that is required to submit a capital restoration plan as the result of a reclassification of the savings association pursuant to § 565.4(c) of this part shall include a description of the steps the savings association will take to correct the unsafe or unsound condition or practice. No plan shall be accepted unless it includes any performance guarantee described in section 38(e)(2)(C) of the FDI Act by each company that controls the savings association.

(c) *Review of capital restoration plans.* Within 60 days after receiving a capital restoration plan under this part, the OTS shall provide written notice to the savings association of whether the plan has been approved. The OTS may extend the time within which notice regarding approval of a plan shall be provided.

(d) *Disapproval of capital plan.* If a capital restoration plan is not approved by the OTS, the savings association shall submit a revised capital restoration plan, when directed to do so, within the time specified by the OTS. Upon receiving notice that its capital restoration plan has not been approved, any undercapitalized savings association (as defined in § 565.4(b)(3) of this part) shall be subject to all of the provisions of section 38 and this part applicable to significantly undercapitalized institutions. These provisions shall be applicable until such time as a new or revised capital restoration plan submitted by the savings association has been approved by the OTS.

(e) *Failure to submit a capital restoration plan.* A savings association that is undercapitalized (as defined in § 565.4(b)(3) of this part) and that fails to submit a written capital restoration plan within the period provided in this section shall, upon the expiration of that period, be subject to all of the provisions of section 38 and this part applicable to significantly undercapitalized institutions.

(f) *Failure to implement a capital restoration plan.* Any undercapitalized savings association that fails in any material respect to implement a capital restoration plan shall be subject to all of the provisions of section 38 and this part applicable to significantly undercapitalized institutions.

(g) *Amendment of capital plan.* A savings association that has filed an approved capital restoration plan may, after prior written notice to and approval by the OTS, amend the plan to reflect a change in circumstance. Until such time as a proposed amendment has been approved, the savings association shall implement the capital restoration plan as approved prior to the proposed amendment.

(h) *Notice to FDIC.* Within 45 days of the effective date of OTS approval of a capital restoration plan, or any amendment to a capital restoration plan, the OTS shall provide a copy of the plan or amendment to the FDIC.

(i) *Performance guarantee by companies that control a savings association.*—(1) *Limitation on liability.*—(i) *Amount limitation.* The aggregate liability under the guarantee provided under section 38 and this part for all companies that control a specific savings association that is required to submit a capital restoration plan under this part shall be limited to the lesser of:

(A) An amount equal to 5.0 percent of the savings association's total assets at the time the savings association was notified or deemed to have notice that the savings association was undercapitalized; or

(B) The amount necessary to restore the relevant capital measures of the savings association to the levels required for the savings association to

be classified as adequately capitalized, as those capital measures and levels are defined at the time that the savings association initially fails to comply with a capital restoration plan under this part.

(ii) *Limit on duration.* The guarantee and limit of liability under section 38 and this part shall expire after the OTS notifies the savings association that it has remained adequately capitalized for each of four consecutive calendar quarters. The expiration or fulfillment by a company of a guarantee of a capital restoration plan shall not limit the liability of the company under any guarantee required or provided in connection with any capital restoration plan filed by the same savings association after expiration of the first guarantee.

(iii) *Collection on guarantee.* Each company that controls a given savings association shall be jointly and severally liable for the guarantee for such savings association as required under section 38 and this part, and the OTS may require and collect payment of the full amount of that guarantee from any or all of the companies issuing the guarantee.

(2) *Failure to provide guarantee.* In the event that a savings association that is controlled by any company submits a capital restoration plan that does not contain the guarantee required under section 38(e)(2) of the FDI Act, the savings association shall, upon submission of the plan, be subject to the provisions of section 38 and this part that are applicable to savings associations that have not submitted an acceptable capital restoration plan.

(3) *Failure to perform guarantee.* Failure by any company that controls a savings association to perform fully its guarantee of any capital plan shall constitute a material failure to implement the plan for purposes of section 38(f) of the FDI Act. Upon such failure, the savings association shall be subject to the provisions of section 38 and this part that are applicable to savings associations that have failed in a material respect to implement a capital restoration plan.

§ 565.6 Mandatory and discretionary supervisory actions under section 38.

(a) *Mandatory supervisory actions.*—(1) *Provisions applicable to all savings associations.* All savings associations are subject to the restrictions contained in section 38(d) of the FDI Act on payment of capital distributions and management fees.

(2) *Provisions applicable to undercapitalized, significantly undercapitalized, and critically undercapitalized savings associations.* Immediately upon receiving notice or being deemed to have notice, as provided in § 565.3 or § 565.5 of this part, that the savings association is undercapitalized, significantly undercapitalized, or critically undercapitalized, the savings association shall become subject to the provisions of section 38 of the FDI Act:

(i) Restricting payment of capital distributions and management fees (section 38(d));

(ii) Requiring that the OTS monitor the condition of the savings association (section 38(e)(1));

(iii) Requiring submission of a capital restoration plan within the schedule established in this part (section 38(e)(2));

(iv) Restricting the growth of the savings association's assets (section 38(e)(3)); and

(v) Requiring prior approval of certain expansion proposals (section 38(e)(4)).

(3) *Additional provisions applicable to significantly undercapitalized, and critically undercapitalized savings associations.* In addition to the provisions of section 38 of the FDI Act described in paragraph (a)(2) of this section, immediately upon receiving notice or being deemed to have notice, as provided in § 565.3 or § 565.5 of this part, that the savings association is significantly undercapitalized, or critically undercapitalized, or that the savings association is subject to the provisions applicable to institutions that are significantly undercapitalized because the savings association failed to submit or implement in any material respect an acceptable capital restoration plan, the savings association shall become subject to the provisions of section 38 of the FDI Act that restrict compensation paid to senior executive officers of the institution (section 38(f)(4)).

(4) *Additional provisions applicable to critically undercapitalized savings associations.* In addition to the provisions of section 38 of the FDI Act described in paragraphs (a)(2) and (a)(3) of this section, immediately upon receiving notice or being deemed to have notice, as provided in § 565.3 of this part, that the savings association is critically undercapitalized, the savings association shall become subject to the provisions of section 38 of the FDI Act:

(i) Restricting the activities of the savings association (section 38(h)(1)); and

(ii) Restricting payments on subordinated debt of the savings association (section 38(h)(2)).

(b) *Discretionary supervisory actions.* In taking any action under section 38 that is within the OTS's discretion to take in connection with: A savings association that is deemed to be undercapitalized, significantly undercapitalized or critically undercapitalized, or has been reclassified as undercapitalized, or significantly undercapitalized; an officer or director of such savings association; or a company that controls such savings association, the OTS shall follow the procedures for issuing directives under §§ 565.7 and 565.9 of this part unless otherwise provided in section 38 or this part.

§ 565.7 Directives to take prompt corrective action.

(a) *Notice of intent to issue a directive.*—(1) *In general.* The OTS shall provide an undercapitalized, significantly undercapitalized, or critically undercapitalized savings association or, where appropriate, any company that controls the savings association, prior written notice of the OTS's intention to issue a directive requiring such savings association or company to take actions or to follow proscriptions described in section 38 that are within the OTS's discretion to require or impose under section 38 of the FDI Act, including sections 38(e)(5), (f)(2), (f)(3), or (f)(5). The savings association shall have such time to respond to a proposed directive as provided by the OTS under paragraph (c) of this section.

(2) *Immediate issuance of final directive.* If the OTS finds it necessary in order to carry out the purposes of section 38 of the FDI Act, the OTS may, without providing the notice prescribed in paragraph (a)(1) of this section, issue a directive requiring a savings association or any company that controls a savings association immediately to take actions or to follow proscriptions described in section 38 that are within the OTS's discretion to require or impose under section 38 of the FDI Act, including section 38(e)(5), (f)(2), (f)(3), or (f)(5). A savings association or company that is subject to such an immediately effective directive may submit a written appeal of the directive to the OTS. Such an appeal must be received by the OTS within 14 calendar days of the issuance of the directive, unless the OTS permits a longer period. The OTS shall consider any such appeal, if filed in a timely matter, within 60 days of receiving the appeal. During such period of review, the directive shall remain in effect unless the OTS, in its sole discretion, stays the effectiveness of the directive.

(b) *Contents of notice.* A notice of intention to issue a directive shall include:

(1) A statement of the savings association's capital measures and capital levels;

(2) A description of the restrictions, prohibitions or affirmative actions that the OTS proposes to impose or require;

(3) The proposed date when such restrictions or prohibitions would be effective or the proposed date for completion of such affirmative actions; and

(4) The date by which the savings association or company subject to the directive may file with the OTS a written response to the notice.

(c) *Response to notice.*—(1) *Time for response.* A savings association or company may file a written response to a notice of intent to issue a directive within the time period set by the OTS. The date shall be at least 14 calendar days from the date of the notice unless the OTS determines that a shorter period is appropriate in light of the financial condition of the savings association or other relevant circumstances.

(2) *Content of response.* The response should include:

(i) An explanation why the action proposed by the OTS is not an appropriate exercise of discretion under section 38;

(ii) Any recommended modification of the proposed directive; and

(iii) Any other relevant information, mitigating circumstances, documentation, or other evidence in support of the position of the savings association or company regarding the proposed directive.

(d) *OTS consideration of response.* After considering the response, the OTS may:

(1) Issue the directive as proposed or in modified form;

(2) Determine not to issue the directive and so notify the savings association or company; or

(3) Seek additional information or clarification of the response from the savings association or company, or any other relevant source.

(e) *Failure to file response.* Failure by a savings association or company to file with the OTS, within the specified time period, a written response to a proposed directive shall constitute a waiver of the opportunity to respond and shall constitute consent to the issuance of the directive.

(f) *Request for modification or rescission of directive.* Any savings association or company that is subject to a directive under this part may, upon a change in circumstances, request in writing that the OTS reconsider the terms of the directive, and may propose that the directive be rescinded or modified. Unless otherwise ordered by the OTS, the directive shall continue in place while such request is pending before the OTS.

§ 565.8 Procedures for reclassifying a savings association based on criteria other than capital.

(a) *Reclassification based on unsafe or unsound condition or practice*—(1) *Issuance of notice of proposed reclassification*—(i) *Grounds for reclassification.* (A) Pursuant to § 565.4(c) of this part, the OTS may reclassify a well capitalized savings association as adequately capitalized or subject an adequately capitalized or undercapitalized institution to the supervisory actions applicable to the next lower capital category if:

(*1*) The OTS determines that the savings association is in unsafe or unsound condition; or

(*2*) The OTS deems the savings association to be engaged in an unsafe or unsound practice and not to have corrected the deficiency.

(B) Any action pursuant to this paragraph (a)(1)(i) shall hereinafter be referred to as "reclassification."

(ii) *Prior notice to institution.* Prior to taking action pursuant to § 565.4(c)(1), the OTS shall issue and serve on the savings association a written notice of the OTS's intention to reclassify the savings association.

(2) *Contents of notice.* A notice of intention to reclassify a savings association based on unsafe or unsound condition shall include:

(i) A statement of the savings association's capital measures and capital levels and the category to which the savings association would be reclassified;

(ii) The reasons for reclassification of the savings association;

(iii) The date by which the savings association subject to the notice of reclassification may file with the OTS a written appeal of the proposed reclassification and a request for a hearing, which shall be at least 14 calendar days from the date of service of the notice unless the OTS determines that a shorter period is appropriate in light of the financial condition of the savings association or other relevant circumstances.

(3) *Response to notice of proposed reclassification.* A savings association may file a written response to a notice of proposed reclassification within the time period set by the OTS. The response should include:

(i) An explanation of why the savings association is not in unsafe or unsound condition or otherwise should not be reclassified; and

(ii) Any other relevant information, mitigating circumstances, documentation, or other evidence in support of the position of the savings association or company regarding the reclassification.

(4) *Failure to file response.* Failure by a savings association to file, within the specified time period, a written response with the OTS to a notice of proposed reclassification shall constitute a waiver of the opportunity to respond and shall constitute consent to the reclassification.

(5) *Request for hearing and presentation of oral testimony or witnesses.* The response may include a request for an informal hearing before the OTS or its designee under this section. If the savings association desires to present oral testimony or witnesses at the hearing, the savings association shall include a request to do so with the request for an informal hearing. A request to present oral testimony or witnesses shall specify the names of the witnesses and the general nature of their expected testimony. Failure to request a hearing shall constitute a waiver of any right to a hearing, and failure to request the opportunity to present oral testimony or witnesses shall constitute a waiver of any right to present oral testimony or witnesses.

(6) *Order for informal hearing.* Upon receipt of a timely written request that includes a request for a hearing, the OTS shall issue an order directing an informal hearing to commence no later than 30 days after receipt of the request, unless the OTS allows further time at the request of the savings association. The hearing shall be held in Washington, DC or at such other place as may be designated by the OTS, before a presiding officer(s) designated by the OTS to conduct the hearing.

(7) *Hearing procedures.* (i) The savings association shall have the right to introduce relevant written materials and to present oral argument at the hearing. The savings association may introduce oral testimony and present witnesses only if expressly authorized by the OTS or the presiding officer(s). Neither the provisions of the Administrative Procedure Act (5 U.S.C. 554–557) governing adjudications required by statute to be determined on the record nor part 509 of this chapter apply to an informal hearing under this section unless the OTS orders that such procedures shall apply.

(ii) The informal hearing shall be recorded and a transcript furnished to the savings association upon request and payment of the cost thereof. Witnesses need not be sworn, unless specifically requested by a party or the presiding officer(s). The presiding officer(s) may ask questions of any witness.

(iii) The presiding officer(s) may order that the hearing be continued for a reasonable period (normally five business days) following completion of oral testimony or argument to allow additional written submissions to the hearing record.

(8) *Recommendation of presiding officers.* Within 20 calendar days following the date the hearing and the record on the proceeding are closed, the presiding officer(s) shall make a recommendation to the OTS on the reclassification.

(9) *Time for decision.* Not later than 60 calendar days after the date the record is closed or the date of the response in a case where no hearing was requested, the OTS will decide whether to reclassify the savings association and notify the savings association of the OTS's decision.

(b) *Request for rescission of reclassification.* Any savings association that has been reclassified under this section, may, upon a change in circumstances, request in writing that the OTS reconsider the reclassification, and may propose that the reclassification be rescinded and that any directives issued in connection with the reclassification be modified, rescinded, or removed. Unless otherwise ordered by the OTS, the savings association shall remain subject to the reclassification and to any directives issued in connection with that reclassification while such request is pending before the OTS.

§ 565.9 Order to dismiss a director or senior executive officer.

(a) *Service of notice.* When the OTS issues and serves a directive on a savings association pursuant to section 565.8 requiring the savings association to dismiss any director or senior executive officer under section 38(f)(2)(F)(ii) of the FDI Act, the OTS shall also serve a copy of the directive, or the relevant portions of the directive where appropriate, upon the person to be dismissed.

(b) *Response to directive*—(1) *Request for reinstatement.* A director or senior executive officer who has been served with a directive under paragraph (a) of this section (Respondent) may file a written request for reinstatement. The request for reinstatement shall be filed within 10 calendar days of the receipt of the directive by the Respondent, unless further time is allowed by the OTS at the request of the Respondent.

(2) *Contents of request; informal hearing.* The request for reinstatement should include reasons why the Respondent should be reinstated, and may include a request for an informal hearing before the OTS or its designee under this section. If the Respondent desires to present oral testimony or witnesses at the hearing, the Respondent shall include a request to do so with the request for an informal hearing. The request to present oral testimony or witnesses shall specify the names of the witnesses and the general nature of their expected testimony. Failure to request a hearing shall constitute a waiver of any right to a hearing and failure to request the opportunity to present oral testimony or witnesses shall constitute a waiver of any right or opportunity to present oral testimony or witnesses.

(3) *Effective date.* Unless otherwise ordered by the OTS, the dismissal shall remain in effect while a request for reinstatement is pending.

(c) *Order for informal hearing.* Upon receipt of a timely written request from a Respondent for an informal hearing on the portion of a directive requiring a savings association to dismiss from office any director or senior executive officer, the OTS shall issue an order directing an informal hearing to commence no later than 30 days after receipt of the request, unless the Respondent requests a later date. The hearing shall be held in Washington, DC, or at such other place as may be designated by the OTS, before a presiding officer(s) designated by the OTS to conduct the hearing.

(d) *Hearing procedures.* (1) A Respondent may appear at the hearing personally or through counsel. A Respondent shall have the right to introduce relevant written materials and to present oral argument. A Respondent may introduce oral testimony and present witnesses only if expressly authorized by the OTS or the presiding officer(s). Neither the provisions of the Administrative Procedure Act governing adjudications required by statute to be determined on the record nor part 509 of this chapter apply to an informal hearing under this section unless the OTS orders that such procedures shall apply.

(2) The informal hearing shall be recorded and a transcript furnished to the Respondent upon request and payment of the cost thereof. Witnesses need not be sworn, unless specifically requested by a party or the presiding officer(s). The presiding officer(s) may ask questions of any witness.

(3) The presiding officer(s) may order that the hearing be continued for a reasonable period (normally five business days) following completion of oral testimony or argument to allow additional written submissions to the hearing record.

(e) *Standard for review.* A Respondent shall bear the burden of demonstrating that his or her continued employment by or service with the savings association would materially strengthen the savings association's ability:

(1) To become adequately capitalized, to the extent that the directive was issued as a result of the savings association's capital level or failure to submit or implement a capital restoration plan; and

(2) To correct the unsafe or unsound condition or unsafe or unsound practice, to the extent that the directive was issued as a result of classification of the savings association based on supervisory criteria other than capital, pursuant to section 38(g) of the FDI Act.

(f) *Recommendation of presiding officers.* Within 20 calendar days following the date the hearing and the record on the proceeding are closed, the presiding officer(s) shall make a recommendation to the OTS concerning the Respondent's request for reinstatement with the savings association.

(g) *Time for decision.* Not later than 60 calendar days after the date the record is closed or the date of the response in a case where no hearing has been requested, the OTS shall grant or deny the request for reinstatement and notify the Respondent of the OTS's decision. If the OTS denies the request for reinstatement, the OTS shall set forth in the notification the reasons for the OTS's action.

§ 565.10 Enforcement of directives.

(a) *Judicial remedies.* Whenever a savings association or company that controls a savings association fails to comply with a directive issued under section 38, the OTS may seek enforcement of the directive in the appropriate United States district court pursuant to section 8(i)(1) of the FDI Act.

(b) *Administrative remedies*—(1) *Failure to comply with directive.* Pursuant to section 8(i)(2)(A) of the FDI Act, the OTS may assess a civil money penalty against any savings association or company that controls a savings association that violates or otherwise fails to comply with any final directive issued under section 38 and against any

institution-affiliated party who participates in such violation or noncompliance.

(2) *Failure to implement capital restoration plan.* The failure of a savings association to implement a capital restoration plan required under section 38, or this part, or the failure of a company having control of a savings association to fulfill a guarantee of a capital restoration plan made pursuant to section 38(e)(2) of the FDI Act shall subject the savings association or company to the assessment of civil money penalties pursuant to section 8(i)(2)(A) of the FDI Act.

(c) *Other enforcement action.* In addition to the actions described in paragraphs (a) and (b) of this section, the OTS may seek enforcement of the provisions of section 38 or this part through any other judicial or administrative proceeding authorized by law.

Dated: September 16, 1992.

By the Office of Thrift Supervision.

Timothy Ryan,

Director.

Coast Guard

33 CFR Part 155

Discharge Removal Equipment for Vessels Carrying Oil; Proposed Rule

DEPARTMENT OF TRANSPORTATION

Coast Guard

33 CFR Part 155

[CGD 90-068]

RIN 2115-AD66

Discharge Removal Equipment for Vessels Carrying Oil

AGENCY: Coast Guard, DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: The Coast Guard proposes to establish regulations requiring vessels carrying oil in bulk as cargo to carry discharge removal equipment to contain and remove on-deck oil spills, install spill prevention coamings, and install emergency towing arrangements. The proposed regulations would implement provisions of the Federal Water Pollution Control Act, as amended by the Oil Pollution Act of 1990. The purpose of these regulations is to reduce the risk of oil spills, improve vessel oil spill response capabilities, and minimize the impact of oil spills on the environment. Proposed requirements for vessels to carry equipment for the removal of discharges of hazardous substances will be the subject of a separate rulemaking.

DATES: Comments must be received on or before October 29, 1992.

ADDRESSES: Comments may be mailed to the Executive Secretary, Marine Safety Council (G-LRA/3406) (CGD 90-068), U.S. Coast Guard Headquarters, 2100 Second Street SW., Washington, DC 20593-0001, or may be delivered to Room 3406 at the above address between 8 a.m. and 3 p.m., Monday through Friday, except Federal holidays. The telephone number is (202) 267-1477.

The Executive Secretary maintains the public docket for this rulemaking. Comments will become part of this docket and will be available for inspection or copying at Room 3406, U.S. Coast Guard Headquarters.

A copy of the material listed in "Incorporation by Reference" of this preamble is available for inspection at Room B-731, U.S. Coast Guard Headquarters.

FOR FURTHER INFORMATION CONTACT: Frank Wood, Project Manager, Oil Pollution Act (OPA 90) Staff, (202) 267-6739. This telephone is equipped to record messages on a 24-hour basis.

SUPPLEMENTARY INFORMATION:

Request for Comments

The Coast guard encourages interested persons to participate in this rulemaking by submitting written views, data, or arguments. Persons submitting comments should include their name and address, identify this rulemaking (CGD 90-068) and the specific section of this proposal to which each comment applies, and give the basis for each comment. Persons wanting acknowledgment of receipt of comments should enclose a stamped, self-addressed postcard or envelope.

The Coast Guard will consider all comments received during the comment period. It may change this proposal in view of the comments.

The Coast Guard plans no public hearing at this time. Persons may request a public hearing by writing to the Marine Safety Council at the address under "ADDRESSES." If the Coast Guard determines that the opportunity for oral presentations will aid this rulemaking, it will hold a public hearing at a time and place announced by a later notice in the **Federal Register**.

Drafting Information

The principal persons involved in drafting this document are Frank Wood, Project Manager, OPA 90 Staff, and Joan Tilghman, Project Counsel, OPA 90 Staff.

Statutory Authority and Background

In recent years, #several catastrophic oil spills have threatened the marine environment along the coastal areas of the United States. Among these spills were the EXXON VALDEZ in Prince William Sound, the AMERICAN TRADER in California's coastal waters, the PRESIDENTE RIVERA in the Delaware River, and the MEGA BORG in the Gulf of Mexico. The spills resulted in extensive damage to the marine environment, including the loss of fish and wildlife. In response to these disasters and others, Congress passed the Oil Pollution Act of 1990 (OPA 90) (Pub. L. 101-380, August 18, 1990).

Section 4202(a)(6) of OPA 90 amended section 311(j) of the Federal Water Pollution Control Act (FWPCA) (33 U.S.C. 1321) by adding a new paragraph (6) to require vessels that are operating on the navigable waters of the U.S. and that are carrying oil or a hazardous substance in bulk as cargo to carry appropriate discharge removal equipment on board. This equipment must employ the best technology economically feasible and be compatible with the safe operation of the vessel.

The President delegated the authority to implement this provision to the Secretary of Transportation in Executive Order 12777 (3 CFR, 1991 Comp.; 56 FR 54757) published in the **Federal Register** on October 22, 1991. The Secretary further delegated the authority to the Commandant of the Coast Guard in 49 CFR 1.46(m) on March 3, 1992.

Because the statutory requirements for vessels to carry discharge removal equipment for oil spills and to have oil spill response plans are related, the Coast Guard has considered both rulemakings concurrently. The Coast Guard is limiting this rulemaking to requirements for vessels carrying oil because of the statutory deadline for these vessels to submit response plans. For vessels that carry hazardous substances in bulk as cargo, regulations requiring carriage of discharge removal equipment will be the subject of a separate rulemaking.

Section 311(a)(8) of the FWPCA defines "remove or removal" as the "containment and removal of the oil or hazardous substances from the water and shorelines or the taking of such other actions as may be necessary to minimize or mitigate damage to the public health or welfare." For purposes of this proposed rule, removal equipment includes salvage equipment, lightering equipment, towing arrangements, sorbents, and other equipment that may be used to minimize or mitigate environmental damage from oil spills.

Section 311(j)(6) requirements apply to all vessels certificated as tank vessels under 46 CFR chapter I, subchapter D, all other certificated vessels that are permitted to carry limited quantities of oil as defined in section 311(a)(1) of the FWPCA, and any uninspected vessel, including foreign flag vessels, that carry oil in bulk as cargo or cargo residue. As used in this proposed rule, oil includes, but is not limited to, petroleum, fuel oil, sludge, oil refuse, and oil mixed with waste other than dredge spoils. This definition includes animal and vegetable oils.

Regulatory History

The Coast Guard published an advance notice of proposed rulemaking (ANPRM) on August 30, 1991 (56 FR 43534). In the ANPRM, the Coast Guard raised 59 questions for public comment and gave notice of a workshop scheduled for November 14, 1991. The Coast Guard received 147 comments on the questions posed on removal equipment in the ANPRM, and considered all of the comments in drafting the proposed rule.

The majority of the comments on the ANPRM stated that removal equipment should be carried on board vessels that carry oil in bulk as cargo. Comments on the type and amount of equipment to be carried ranged from extensive

containment and removal equipment for off-ship deployment to sorbents and mops for on-deck cleanup.

Many comments interpreted the statutory requirement to carry removal equipment as a requirement to carry booms and skimmers. A few comments proposed that self-inflating boom be installed on board vessels for remote deployment by crew members. Most agreed that anchoring boom in deep water was difficult, if not impossible. One suggested the use of sea anchors to maintain the boom in deep water. The majority indicated that, regardless of the equipment required, crew members should remain on board the vessel during an oil spill response and leave off-ship response to shore-based responders.

Comments varied regarding equipment capabilities. Suggested capabilities ranged from containment of the entire cargo to containment of deck spills of less than 10 barrels.

The public workshop was held in Washington, DC on November 14, 1991, with 196 participants. The Coast Guard prepared papers to focus discussion. The issue paper presented on requirements for vessel-carried equipment focused on the following: (1) Requirements for equipment for use on board the vessel to remove on-deck spills, assist in damage control and salvage, and lighter "over the top" to control the source of the discharge; (2) requirements for booms and skimmers on board vessels that transit remote areas or areas where contracted resources are not available; (3) deploying, securing, and maintaining containment booms, particularly in deep water, without physically tending booms from workboats in other than ideal conditions; and (4) warehousing removal equipment, specifically booms and skimmers, on board vessels for deployment by spill response contractors.

The discussions were generally consistent with comments to the ANPRM, but they clarified several options and better defined areas of agreement. Most participants identified emergency towing gear as appropriate equipment that should be required aboard tankers to facilitate assistance by a rescue vessel. (Under 46 U.S.C. 2101, "*tanker* means a self-propelled tank vessel constructed or adapted primarily to carry oil or hazardous material in bulk in the cargo spaces.") Although tankers often use single point mooring connections or the vessel's anchor chain for on-board towing capability, these connections are often unrigged and require considerable effort by the ship's crew to make the tanker ready for towing. The discussions did not address a design or specific requirements for an emergency towing package.

There was no agreement that it was appropriate to carry high-capacity, over-the-top lightering equipment aboard a vessel. Some participants recommended that tankers not carry high-capacity pumps on board for lightering or emergency cargo transfer because of safety concerns for the crew. Others expressed the opinion that only trained professionals should provide salvage and lightering equipment.

In response to an ANPRM question about boom technology, no one was able to verify proven technology for deploying and maintaining containment boom, particularly in deep water, in other than ideal conditions, without physically tending it from dedicated workboats. The majority of participants did not recommend requiring a boom that is designed for automatic deployment over the side and remote tending by the crew.

Most participants advised against warehousing removal equipment, such as booms and skimmers, aboard a vessel for deployment by contracted personnel. However, a minority of participants felt that warehoused containment boom might provide the only readily available source of equipment in some incidents, and the boom may significantly enhance an initial response effort. No one recommended that vessels carry portable storage tanks on board.

The Coast Guard taped the workshop proceedings and considered all comments in preparing the proposed rule. Audio tapes and a summary of the proceedings are available for review and copying in the public docket.

Because of the diversity of views and the absence of clearly preferable solutions, the Coast Guard published a notice of intent to form a negotiated rulemaking committee on November 18, 1991 (56 FR 58202) . Based on the comments received on this notice, the Coast Guard established the Oil Spill Response Plan Negotiated Rulemaking Committee (the Committee). A notice announcing the establishment of the Committee was published on January 10, 1992 (57 FR 1139). The Committee sessions were held between January 8 and March 27, 1992, in Washington, DC.

In forming the Committee, the Coast Guard brought together representatives from various interests that would be affected by the proposed rules on vessel response plans and the proposed rules on carriage and inspection of discharge removal equipment. A Coast Guard representative was a member of the Committee. The Coast Guard used the information gathered from the public in comments to the ANPRM and from discussions at the public workshop that was held on November 14, 1991, to narrow the focus of the Committee discussions. The Coast Guard developed and identified issue-related questions for resolution by the Committee.

The Coast Guard agreed in the organizational protocols to consider the written statement of the Committee as the basis of this NPRM, consistent with the Coast Guard's legal obligations, and to draft the proposed regulations and preambles with the same substance and effect as the Committee statement. The consensus recommendations included in the Committee statement reflect the agreement of all Committee members, including the Coast Guard. The Coast Guard used the Committee consensus recommendations in drafting this proposed rule and identified the recommendations in the preamble discussion of the proposed rule. The Committee statement is filed in the public docket.

Committee Recommendations and Discussion of Proposed Regulations

In discussing requirements for vessels to carry discharge removal equipment, the Committee made recommendations concerning vessels to which the rules should apply. The Committee recommended that vessels that carry oil as primary cargo be separated into four categories: tankers, offshore tank barges, coastal tank barges, and inland tank barges. For the purposes of this proposed rule, a tanker is a self-propelled vessel engaged in the carriage of oil in bulk as cargo that has a Certificate of Inspection issued under 46 CFR chapter I, subchapter D, a Certificate of Compliance, or a Tank Vessel Examination letter. The definition of "tanker" includes integrated tug-barges (ITBs) that are designed for push-mode only.

An offshore tank barge is defined as any tank barge that is certificated under 46 CFR chapter I, subchapter D, for navigation in waters more than 20 nautical miles offshore in any ocean or the Gulf of Mexico, any tank barge in Great Lakes service, or any foreign flag tank barge. The definition of offshore tank barge includes ITBs that are designed for dual-mode navigation.

A coastal tank barge is any tank barge that is certificated under 46 CFR chapter I, subchapter D, for coastwise service. The definition of coastal tank barge includes ITBs that are designed for dual-mode navigation. An inland tank barge is any tank barge certificated

under 46 CFR chapter I, subchapter D, for river service or lakes, bays, and sounds service.

In addition to these vessel categories, the Committee discussed applying requirements for vessel-carried equipment to vessels that carry oil in bulk as secondary cargo. Vessels that carry oil as secondary cargo are those that are not principally engaged in the carriage of oil in bulk as cargo, but that are certificated under subchapters H or I and permitted to carry limited quantities of oil in bulk, and similar foreign flag vessels. Although the Committee did not make a recommendation concerning vessels that carry oil as secondary cargo, the Coast Guard is proposing vessel-carried equipment requirements for these vessels.

Discharge Removal Equipment for On-Deck Spills

In discussing on-deck spills, the Committee first considered the amount of oil that the equipment should be able to contain and remove from the deck of the vessel. The Committee recommended that ocean-going and coastal vessels less than 400 feet long carry equipment capable of containing and removing a spill of at least seven barrels (42 U.S. gallons/barrel) of oil from the deck of the vessel. For ocean-going and coastal vessels 400 feet long or longer, the Committee recommended that the vessel carry equipment capable of containing and removing a spill of at least 12 barrels of oil. For inland tank barges, the Committee recommended that the tank barge have equipment available that is capable of containing and removing a spill of at least one barrel of oil. The Committee derived these proposed volumes from suggestions in the public comments to the ANPRM.

Under the proposed rule, tankers, offshore tank barges, and coastal tank barges will be subject to the same requirements for equipment carriage for on-deck spills. The equipment specifically recommended by the Committee for onboard carriage includes non-sparking hand shovels and scoops, non-sparking portable pumps, sorbents, containers for holding recovered waste, personal protective clothing, and emulsifiers to clean the deck. The Coast Guard recognizes that emulsifiers may be necessary to remove oil from the deck to make the deck less slippery and safer for crew members. However, the Coast Guard emphasizes that emulsions and oily residue must be retained on board until the emulsions and oily residue can be safely discharged into a suitable receiving vessel or facility. It is illegal to discharge emulsions and oily residue into the marine environment.

Because most on-deck spills are small, sorbents, portable pumps and hand tools are the most effective equipment for containing and removing them. The Committee recommended that portable pumps be rigged and ready for use on the vessel during transfer operations in case an on-deck spill occurs. The Committee also recommended that containers, scoops, buckets, and shovels be required on deck to aid the crew in removing and containing the waste from the on-deck spill; and that protective clothing be available to protect the crew members or other responders who will be removing the on-deck spill.

The proposed requirements for inland tank barges differ from tankers, offshore tank barges, and coastal tank barges because inland tank barges are typically unmanned and have little or no secure stowage capacity for carried equipment. Therefore, for inland tank barges, the Committee recommended that the equipment for containment and removal of on-deck spills be immediately available for use on board the barge during cargo transfer operations, but not necessarily carried on board. The proposed rule would allow the vessel owner or operator to rely on equipment available at a facility, provided its use for vessel spills has been prearranged by contract or other means approved by the Coast Guard.

Although the Committee made no recommendation on requiring vessels carrying oil as secondary cargo to carry discharge removal equipment, the Coast Guard is proposing equipment carriage requirements for vessels carrying oil as secondary cargo because on-deck spills on these vessels also pose a risk to the environment. Under the proposed rule, the equipment must be capable of removing on-deck spills of at least one-half barrel.

Except as noted, the proposed rules for vessels to carry equipment to remove on-deck spills reflect the recommendations of the Committee.

Deck Edge Coamings for On-Deck Spills

In addition to recommending equipment carriage to remove on-deck spills, the Committee recommended that tankers install deck-edge coamings sufficient to contain on-deck spills of 7 barrels for vessels under 400 feet, and 12 barrels for vessels 400 feet and over, with the vessel on an even keel. The Committee did not recommend that offshore and coastal tank barges install deck-edge coamings, but did agree that the Coast Guard should publish deck-edge coaming requirements for these barges for public comment. The Committee made no recommendations with respect to deck coamings on inland tank barges. The Coast Guard reviewed the Committee's recommendation in light of existing coaming regulations (33 CFR 155.310), and is proposing requirements for deck-edge coamings that support the Committee's recommendation.

Existing 33 CFR 155.310 applies to all tank vessels, as "tank vessel" is defined in 33 CFR 154.105, of 250 barrel capacity or larger that carry oil or hazardous materials, regardless of service and overall length. Section 155.310 requires tank vessels other than tank barges to install a fixed container or enclosed deck area around the manifolds and transfer connections, the capacities of which range from one-half barrel to four barrels, depending upon the pipe sizes within the contained area.

This existing regulation requires that tank barges either (1) install the same containers or enclosures as required for other tank vessels, or (2) have a smaller container at the manifolds and transfer connections and install deck coamings sufficient to contain a one-half barrel spill per cargo hatch, manifold, and transfer connection within the enclosed deck area, under all expected conditions of vessel list and trim encountered during the loading operation. Coaming height for tank barges must be at least four inches but not more than eight inches. Under these regulations, it is not necessary for tank barges to locate the coamings along the deck edge, although this appears to be the common practice for many barges.

The proposed rule reflects the Committee's recommendation for installation of deck-edge coamings to contain oil on deck and prevent its discharge into navigable waters. However, the Committee's recommendation that the coaming be sufficient to contain a spill of 7 or 12 barrels of oil, depending on the length of the vessel, with the vessel on an even keel, could result in a coaming only a fraction of an inch high. Although a low-profile coaming may be sufficient to contain these spills on a vessel on an even keel, it would be insufficient to contain them with the vessel under even modest degrees of heel and trim.

Rather than proposing new requirements that are less protective of the environment than existing regulations, the Coast Guard proposes that the rules for deck-edge coamings be consistent with the requirements of 33 CFR 155.310, with respect to coaming height and with respect to conditions of heel and trim during loading, transfer, and discharge operations. The Coast

Guard proposes that two new paragraphs be added to 33 CFR 155.310 that require tankers and offshore and coastal tank barges carrying oil as cargo to install a peripheral coaming enclosing the cargo transfer connections, manifolds, and cargo hatches. The Coast Guard believes that this proposal reflects the substance and effect of the Committee's recommendation.

Although the Committee recommended that the requirement for deck-edge coamings apply to tankers, the Coast Guard proposes that these requirements be consistent with 33 CFR 155.310 with respect to vessel applicability and that they include offshore tank barges and coastal tank barges. The Coast Guard also proposes that these requirements apply to tankers and offshore and coastal tank barges that carry 250 barrels of oil or more, irrespective of length overall.

This proposed regulation would impose a new requirement on tankers, offshore tank barges, and coastal tank barges to install deck-edge coamings within 3 years of the publication date of the final rule. It would also eliminate the currently available option for offshore and coastal tank barges that carry oil to choose between compliance with the tanker requirements in paragraph (a) of 33 CFR 155.310 or the barge requirements in paragraph (b) of the same section. The Coast Guard is not proposing that inland tank barges install deck-edge coamings. Inland tank barges that carry oil will continue to have the option to choose between compliance with the requirements in paragraph (a) or the requirements in paragraph (b) of 33 CFR 155.310.

On-Water Containment and Removal Equipment

The Committee discussed whether vessels should warehouse equipment on board for use by shore-based response personnel. Suggestions for the types of equipment to be warehoused included sorbents, booms, and skimmers.

The Committee considered the issues of stowage, maintenance, equipment compatibility, and the crew safety in determining if warehousing was appropriate or economically feasible. One advantage of carrying response equipment aboard the vessel is that the equipment is readily available in the event of a discharge. The Committee considered and rejected requirements for the vessel's crew to be deployed off the vessel or to use this equipment in on-water recovery. It is the Coast Guard's position that the crew's primary responsibilities are the safety of the vessel and containment of the cargo. Deploying crew members over the side of the vessel may jeopardize their safety and the safety of the vessel.

The Committee also considered the requirements for vessel response plans to determine whether response requirements could be better met with shore-based equipment or vessel-carried equipment. The Committee did not recommend that vessels warehouse equipment on board, but agreed to set on-scene planning criteria for on-water containment and removal of spilled oil. Vessel owners or operators could meet these planning criteria with carried equipment or rapid mobilization of shore-based equipment.

Consistent with the Committee's recommendation, the Coast Guard is not proposing warehousing equipment on board for responses to discharges off the ship. Although some vessel operators do carry removal equipment on board, the Coast Guard does not believe that requiring all vessels to warehouse oil spill response equipment is practical, economically feasible, or always compatible with the safe operation of the vessel.

Internal Cargo Transfer Capability

The Committee recommended that if the vessel's existing cargo piping system is designed to facilitate cargo transfer in the event of damage to the vessel or the piping system, the vessel should not be required to carry additional hoses or reducers. However, the Committee recommended that all other tankers, offshore tank barges, and coastal tank barges carry hoses and reducers to facilitate internal transfer of cargo. Requiring vessels to have equipment that is appropriate and readily available could facilitate containment of the cargo on the vessel.

Several Committee members indicated that requiring hoses and reducers on board should not have a significant economic impact on tanker owners or operators because most tankers already have protected or redundant piping systems. Finally, the Committee did not recommend that inland tank barges carry additional hoses and reducers. The proposed rule reflects the Committee recommendations.

Lightering Equipment

The Committee discussed the possibility of requiring tankers, offshore tank barges, and coastal tank barges to carry high-capacity, portable, submersible pumps to facilitate both lightering and salvage operations and the intraship transfer of cargo. The Committee recognized the value of these pumps in lightering, but also recognized that pumping equipment is often available from shore-based locations. Several Committee members expressed concern that requiring these pumps to be carried on board the vessel was not economically feasible. Further, the pumps may be incompatible with the safe operation of the vessel if the pumps are employed before adequate stability information is available.

The Committee agreed that, before using pumps to transfer liquid cargo, the vessel's crew must be able to assess damage and have access to the vessel's calculated damage stability and residual structural strength characteristics. Considering the time required to adequately assess damage and perform the necessary stability calculations, some members noted that the difference in availability of pumps carried on board and those brought from shore may not be significant.

The Committee members recommended that a vessel develop an emergency lightering plan to identify the availability and location of necessary lightering resources, including fenders, transfer hoses and connections, portable pumps, lightering and mooring masters, and vessel and barge brokers. Further, the Committee recommended that lightering equipment not be required aboard vessels, but be available from shore-based locations to meet regulatory guidelines.

The Committee recommended that requirements for lightering plans be addressed in a separate rulemaking on vessel response plans (CGD 91–034). The proposed rule on vessel response plans incorporates the Committee recommendations.

Spill Tracking Devices

The Committee agreed that it would be desirable for vessels to carry a simple, spill tracking device. The tracking device would be deployed by the vessel at the time of the discharge to facilitate location of the leading edge of the spill by first responders for 12–24 hours, even in darkness and adverse weather.

The Coast Guard Research and Development (R&D) Center has evaluated several buoy designs for tracking oil spills. However, most were designed for satellite tracking, used more sophisticated technology, and were powered for longer periods of time than was recommended by the Committee for this application.

The Committee recommended that, within two years of the date of the final rule, the R&D Center undertake and complete research, development, and evaluation of a suitable design for a simple spill tracking device. Some

Committee members suggested that the Coast Guard evaluation include, as one of the potential designs, a device with the following characteristics:

(1) A 4–6 meter vertical component with a one-foot diameter radar reflector.

(2) A strobe light was a 24 hour battery.

(3) A counterweight capable of maintaining the device in a vertical position.

(4) A float capable of supporting the entire assembly.

The Committee recommended that the Coast Guard consider using OPA 90 title VII funds to conduct this research, and that tankers and offshore tank barges carry a device that is approved by the Coast Guard no later than 3 years after the publication of the final rule.

Based on the Committee's recommendation, the Coast Guard R&D Center will reevaluate tracking devices and determine if a device with these characteristics would be suitable. If this evaluation identifies a suitable device, the Coast Guard may propose in a separate rulemaking that tankers and offshore tank barges carry the device.

The Coast Guard invites public comment on a reliable practical device to facilitate the location of the leading edge of an oil spill.

Damage Stability Information

The Committee recommended that an owner or operator of a tanker, offshore tank barge, or coastal tank barge have prearranged, prompt access to computerized on-board or shore-based damage stability and residual structural strength calculation programs. The Committee stressed the importance of requiring an owner or operator to maintain vessel strength and stability characteristics on file in the program. Damage stability information is important in developing an effective response when hull failure, groundings, or strandings occur. The Committee recommended that the means of access to this program be identified in the vessel response plan. The proposed rule incorporates these recommendations.

Emergency Towing Capability for Certain Tank Barges

The Committee recommended that offshore and coastal tank barges carry an emergency tow wire rigged and ready for use.

Coast Guard policy has been to distinguish between integrated tug-barges (ITBs) that are designed for push-mode and those designed for dual-mode operation (capable of being pushed or towed). Previously, the Coast Guard has regulated these two designs separately. The Coast Guard invites public comment on emergency towing package requirements for ITBs.

Emergency Towing Capability for Tankers

The Coast Guard issued Navigation and Inspection Circular (NVIC) No. 8–89 on January 8, 1990, endorsing International Maritime Organization (IMO) Resolution A.535(13), Recommendations on Emergency Towing Requirements for Tankers, dated November 17, 1983. NVIC No. 8–89 is an official recommendation. The NVIC has no regulatory authority and cannot be enforced. The salient points of the Resolution include applicability provisions, and provisions for towing system components and connecting fittings.

First, the Resolution recommends strongpoints, chafing chains, and fairleads at the bow and stern of a vessel. Second, it requires fittings to facilitate passing the towing pennant from the rescue vessel using the rescue vessel's power. The Resolution recommends installation of these emergency towing components on all tankers greater than 50,000 deadweight tons (dwt) built after adoption of the Resolution, and on tankers greater than 100,000 dwt built before adoption of the Resolution. It requires installation on tankers built before the date of adoption (November 17, 1983) at the first drydocking, but not later than five years after adoption.

Some Committee members strongly recommended that the Coast Guard adopt the provisions of IMO Resolution A.535(13) in the proposed regulations. Adopting these provisions as regulation would go beyond the existing NVIC and make compliance mandatory and enforceable. Proponents of this position argued that the Resolution is an international standard that was developed by the International Maritime Organization, of which the United States is a member. Therefore, any regulations derived from the Resolution would be more readily enforceable, particularly with respect to foreign flag tankers, than regulations imposed unilaterally by the United States without international consensus.

Other Committee members proposed alternative regulations that would require a towing arrangement similar to that installed on many Trans Alaska Pipeline System (TAPS)-trade tankers. The Committee could not achieve a consensus on minimum emergency towing requirements and was unable to recommend one option. As a result, the Committee developed two regulatory options and recommended that both be published for comment in the NPRM.

Under the first option (Option 1), the Committee recommended that the applicability of the IMO towing requirements be extended. The Committee recommended that all tankers between 20,000 dwt and 50,000 dwt be required to install a strongpoint, fairlead, and chafing chain on one end of the vessel. The Committee also recommended that all tankers 50,000 dwt or greater, irrespective of their construction date, be required to install strongpoints, fairleads, and chafing chains on both ends of the vessel.

Further under Option 1, the Committee discussed modifying the phase-in period for the IMO provisions, and recommended that all tankers of 20,000 dwt and greater be required to install the emergency towing arrangements within three years of the date of the final regulation.

Proponents of the alternative option felt that IMO Resolution A.535(13) was not sufficient to facilitate connection between the rescuing and the rescued vessel in adverse weather. Consequently, these members recommended a second regulatory option.

Option 2 combines features of the IMO-recommended towing package and the requirements included in the Prince William Sound Emergency Towing Package, as identified in the Prince William Sound Tanker Spill Prevention and Response Plan, Volume 2. Towing packages containing features of these two standards are currently installed on many Trans-Alaska Pipeline System (TAPS) trade tankers that transit Prince William Sound, Alaska.

Under Option 2, tankers of 20,000 dwt and above would be required to comply with the recommendations of IMO Resolution A.535(13) regarding the provisions for strongpoints, fairleads, and chafing chains. In addition, Option 2 would require that tankers have on one end a 400 foot long towing wire pendant; a 600 foot long, floating, polypropylene pickup line; and a floating pickup buoy. The towing wire pendant would be constructed of 2½ to 3 inch diameter, 6×37 to 6×41, extra-improved plow steel, IWRC (independent wire rope core), galvanized wire. This option would also require that vessels preconnect and store the chafing chain, pendant wire, and polypropylene line to facilitate the deployment of the pendant by no more than three crew members on a vessel with no power (deadship).

The proponents of Option 2 argued that requiring the tanker to provide a pendant wire and pickup line would facilitate the connection between the tanker and the rescue vessel,

particularly in adverse weather, and minimize the need for tanker crew to rig and deploy the towing arrangement. The proponents of Option 1 argued that the crew of a rescue vessel (typically a tug) would prefer to use the tug's main tow wire than rely on a tanker's emergency wire which the tug crew neither inspected nor maintained.

To reach consensus, proponents of Option 1 recommended that the Coast Guard, in conjunction with the international shipping and salvage community, promote the evaluation and design of an emergency towing package to facilitate a rescue vessel taking a tanker under tow with minimum involvement by the tanker crew in rigging and deploying the towing arrangement. These Committee members recommended that the evaluation consider maintenance, costs, and retrofitting requirements. Under this option, the Coast Guard would propose that the Maritime Safety Committee (MSC) of IMO consider within a 2 year period the design and evaluation of a towing package, which could then be recommended to the Assembly for adoption.

The proponents of the second option agreed that there should be an evaluation, but recommended that within 18 months, the Coast Guard complete a study to evaluate recommended components of the combined towing package and promulgate minimum standards. The regulation would set out minimum design and performance specifications for a system that would provide for storage and facilitate the deployment of an emergency towing arrangement on a vessel without power. The regulations would require installation of the emergency towing arrangement on at least one end of the vessel. The towing arrangement would include a chafing chain, pre-rigged or designed for deployment without the crew physically handling it.

The proponents of the second option made further recommendations. First, they recommended that the approved system be required on all new tankers of 20,000 dwt and above and on existing tankers of 50,000 dwt and above within three years of the date of the regulation establishing the standards (approximately 4 years after the publication of the final rule for this rulemaking). Second, they recommended that the Coast Guard, supported by the involved shipping and towing industry who participated in the evaluation, forward minimum specifications to the IMO and propose that the Assembly update and reissue IMO Resolution A.535(13) to include the regulations for pendant-wire carriage arrangements. Finally, option 2 proponents recommended grandfathering emergency towing arrangements that are already installed on vessels engaged in the TAPS trade. The Coast Guard interprets this to apply to arrangements that are consistent with the arrangements identified in the Prince William Sound Tanker Spill Prevention and Response Plan, Volume 2, so long as they were maintained on board the tanker.

The Coast Guard has included draft regulatory language that would implement Option 2 in § 155.235 and is proceeding with further study and evaluation of these requirements. Comments that will aid this study are solicited. Any recommendation resulting from the evaluation would be the subject of future rulemaking. It should be noted that the effective date for paragraph (b) under Option 2 would be established by this separate rulemaking.

The Committee recommended that existing single hull vessels scheduled to be taken out of service before age thirty (calculated from the keel laying date, as defined in 46 CFR 30.10–37), rather than comply with the requirements of IMO Draft Regulation 13G of Annex I of MARPOL 73/78, be exempt from requirements to install the emergency towing equipment for 5 years after the date of the final regulation, if they are 20 years old or older as of the publication date of the final rule. The Committee made this recommendation to eliminate the cost of upgrading vessels whose deactivation was planned.

There is no practicable regulatory means of exempting some 20 year old tankers, but not others, on the basis of an owner/operator's discretionary schedule to deactivate a tanker or continue it in service. Therefore, in § 155.235 of the proposed rule, five-year phase-in periods are proposed for all tankers 20 year old or older as of the date the final rule is published. The Coast Guard requests comments on this provision because older vessels which benefit from this lengthened phase-in period probably pose a similar risk to the environment, and may pose a greater risk, than newer tankers whose proposed phase-in period is 3 years.

The Committee recommended that the Coast Guard publish both alternatives in the notice of proposed rulemaking. Section 155.235 of the proposed rule incorporates this recommendation, and presents both options for public comment.

Incorporation by Reference

The following material would be incorporated by reference in § 155.140: IMO Resolution A.535(13), Recommendations on Emergency Towing Arrangements for Tankers, dated November 17, 1983. Copies of the material are available for inspection where indicated under "ADDRESSES." Copies of the material are available at the addresses in § 155.140.

Regulatory Evaluation

This proposal is not major under Executive Order 12291. This proposed regulation is significant under the Department of Transportation Regulatory Policies and Procedures (44 FR 11040; February 26, 1979) because of substantial public interest in the proposed rule. A draft Regulatory Evaluation is available in the docket for inspection or copying where indicated under "ADDRESSES."

The Coast Guard does not expect this proposal to impose substantial new costs on tanker owners and operators for acquiring discharge-removal equipment to carry on board. The proposed equipment for containing and removing on-deck spills includes deck-edge coamings, athwartship barriers, sorbents, hand scoops, mops, buckets, and small portable pumps. Tankers already are in substantial compliance with the proposed requirements for on-board equipment. For owners or operators of offshore and coastal barges, the annualized costs of on-board spill response equipment is approximately $0.01 million; and for owners and operators of inland barges, $0.09 million. (Under the proposed rule, inland tank barges are not required to install deck-edge coamings.) The annualized costs of this equipment for vessels carrying oil in bulk as secondary cargo will amount to $0.5 million. The present value costs of the discharge removal equipment for the period 1993–2015 is $0.12 million for coastal and offshore barges, $.838 million for inland barges, and $4.45 million for secondary cargo carriers.

Proposed requirements for source control equipment (hoses) will impose an annualized cost of $7.37 million on tankers and $.72 million on offshore and coastal barges. The present value costs for source control are $73.66 million for tankers and $7.19 million for coastal and offshore barges.

Annual costs of the damage stability and structural strength calculation programs will be approximately $0.69 million for tankers and $0.09 million for offshore and coastal barges. The present value costs of the damage stability calculation programs are $5.8 million for tankers and $1 million for coastal and offshore barges.

The Coast Guard projects that the annualized cost of equipping tankers with an emergency towing package will be about $6.66 million. The annualized cost of equipping offshore and coastal tank barges will be about $1.84 million. The present value cost of the towing equipment is $62.85 million for tankers and $18 million for coastal and offshore barges.

The total annualized costs of this proposed regulation are $17.97 million, which amount to a per barrel cost of $0.003 to consumers. The total present value cost of the proposed rule is $142.43 million for tankers, $.838 million for inland barges, $26.31 million for coastal and offshore barges, and $4.45 million for secondary cargo carriers. The total present value cost for the proposed rule is $174.028 million. Therefore, this proposal will not result in annual costs of $100 million or more; will have no significant adverse effects on competition, employment, or other aspects of the economy; and will not result in a major increase in costs and prices.

The major benefit of the proposed rule is that it will reduce the risk of oil spills, improve vessel oil spill response capabilities, and mitigate oil spill damage to the environment by helping to ensure that on-deck spills will be contained on the vessel and removed quickly. Further, the proposed emergency towing package requirements will minimize the risk of a spill from a disabled or drifting vessel. Monetary benefits cannot be calculated for an emergency towing package. The benefit is the satisfaction of an international resolution and the ability to quickly and safely rig a tow for a stricken or disabled vessel and, thereby, prevent some of the problems that precipitated the breakup of the AMOCO CADIZ.

The Coast Guard estimates that the proposed requirements for equipment to contain on-deck spills will prevent 477.7 barrels of oil from spilling into the marine environment of the U.S. from 1992 to 2015. This amount includes 12.2 barrels for oceangoing and coastal barges, 21.6 barrels for inland barges, and 443.9 barrels for secondary carriers. The requirements for source control equipment for tank vessels will prevent 2,082 barrels of oil from spilling. The total amount of oil prevented from spilling is estimated to be 2,559.7 barrels over the 23 year period. To compare the costs and benefits of the proposed rule over the next twenty-three years in terms of cost per barrel prevented from spilling, we have discounted the number of barrels that would not be spilled.

It is estimated that the requirements for equipment to contain on-deck spills will prevent 158.67 discounted barrels of oil from spilling, using a 10% discount rate. This estimate includes 1 barrel for oceangoing and coastal barges, 1.77 barrels for inland barges, and 155.9 barrels for secondary carriers. The requirements for source control equipment are estimated to prevent 754 discounted barrels of oil from spilling. The total discounted barrels prevented from spilling over the twenty-three year period is 912.67. Based on the discount rate, we calculate the present value cost per barrel prevented from spilling to be $190,680.

One alternative to the proposed rule is requiring inland tank barges to install deck-edge coamings. The annualized costs of this provision would have been $1.54 million, with a present value cost of $17.66. The Coast Guard rejected this alternative because coamings on inland barges pose safety problems during barge operations and may be costly for older barges with external frames.

A second alternative is to require warehoused equipment on board tank vessels. The present value cost of this requirement would be $666 million over the period 1993–2015. Although some vessel operators do carry removal equipment on board, the Coast Guard rejected this alternative because requiring all vessels to warehouse oil spill response equipment is not practical, economically feasible, or always compatible with the safe operation of the vessel. At the recommendation of the Committee, the Coast Guard decided to propose strict response requirements and allow the vessel owner or operator to decide how best to meet these requirements with warehoused or shore-based equipment. The proposed rules do not preclude the vessel owner or operator from deciding what equipment should be carried on board.

Finally, the Coast Guard considered requiring pumps on board tankships to facilitate lightering and salvage operations and the intraship transfer of cargo. The annualized cost of the pump requirement would be $41.53 million, and the net present value cost for the period 1993–2015 would be $288.69 million. The Coast Guard rejected this alternative because pumps may be incompatible with the safe operation of the vessel. The Coast Guard recognizes the value of these pumps in lightering, but also recognizes that pumping equipment is often available from shore-based locations. Considering the time required to adequately assess damage and perform the necessary stability calculations, the difference in availability of pumps carried on board and those brought from shore may not be significant.

Small Entities

Under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*), the Coast Guard must consider whether this proposal will have a significant economic impact on a substantial number of small entities. "Small entities" include independently owned and operated small businesses that are not dominant in their field and that otherwise qualify as "small business concerns" under section 3 of the Small Business Act (15 U.S.C. 632). "Small entities" also includes small, not-for-profit organizations and small governmental jurisdictions.

Most of the small businesses in the marine transportation industry are inland barges and vessels which carry oil in bulk as secondary cargo. This rule imposes costs of less than $0.1 million annually for inland barges and approximately $500,000 annually for secondary vessel industries, with annual costs per company of less than $250 for inland barge companies and less than $1,000 for secondary vessel companies. For barge and secondary vessel owners and operators, the Coast Guard expects the cost burden for equipment to be considerably less than the costs for tankers. Ninety-six percent or $17.38 million of the total annualized costs will be paid by the tanker industry.

The Coast Guard certifies under 5 U.S.C. 605(b) that this proposal, if adopted, will not have a significant economic impact on a substantial number of small entities. If, however, you think that your business qualifies as a small entity and that this proposal will have a significant economic impact on your business, please submit a comment (see "**ADDRESSES**") explaining why you think your business qualifies and in what way and to what degree this proposal, alone or in combination with other Coast Guard rulemaking initiatives under OPA 90, will economically affect your business.

Collection of Information

Under the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*), the Office of Management and Budget (OMB) reviews each proposed regulation that contains a collection of information requirement to determine whether the practical value of the information is worth the burden imposed by its collection. Collection of information requirements include reporting, recordkeeping, notification, and other similar requirements. The proposed rule contains no new collection of information requirement.

Federalism

The Coast Guard has analyzed this proposed rule under the principals and criteria contained in Executive Order 12612, Federalism, and has determined that this proposal does not have sufficient federalism implications to warrant the preparation of a Federalism Assessment. This proposed rule would establish regulations requiring certain vessels to carry discharge removal equipment. In *Ray* v. *Atlantic Richfield*, (435 U.S. 51, 98 S.Ct. 988, [1978]), the Supreme Court found that vessel design and equipment standards fall within the exclusive province of the Federal Government. The OPA 90 Conference Report explicitly says that provisions in section 1018 of OPA 90 preserving certain State authority are not meant to disturb this Supreme Court decision (House Conf. Rep., p. 122). Therefore, the Coast Guard intends this final rule to preempt State action addressing the same subject matter.

Environmental Impact

The Coast Guard has prepared a preliminary Environmental Assessment (EA) for this action under the Council on Environmental Quality regulations (40 CFR parts 1500–1800), and Coast Guard policy (COMDTINST M16475.1B) implementing the National Environmental Policy Act (NEPA). The EA discusses the environmental consequences of the proposed action and alternatives, including a no-action alternative. The preliminary EA is available in the docket. After receipt of all comments to this proposed rulemaking action and comments to the EA, the Coast Guard will make a final decision whether to draft an Environmental Impact Statement (EIS).

List of Subjects in 33 CFR Part 155

Hazardous substances, Incorporation by reference, Oil pollution, Reporting and recordkeeping requirements.

For the reasons set out in the preamble, the Coast Guard proposes to amend 33 CFR part 155 as follows:

PART 155—OIL OR HAZARDOUS MATERIAL POLLUTION PREVENTION REGULATIONS FOR VESSELS

1. The authority citation for part 155 is revised to read as follows:

Authority: 33 U.S.C. 1231, 1321(j)(1)(C), (j)(5), and (j)(6); sec. 2, E.O. 12777, 56 FR 54757; 49 CFR 1.46. Sections 155.100 through 155.130, 155.350 through 155.400, 155.430, 155.440, and 155.470 also issued under 33 U.S.C. 1903(b), and sections 155.830 and 155.880 issued under 33 U.S.C. 2735.

Supart A—[Amended]

2. Section 155.140 is added to subpart A to read as follows:

§ 155.140 Incorporation by reference.

(a) Certain material is incorporated by reference in this part with the approval of the Director of the Federal Register in accordance with 5 U.S.C. 552(a) and 1 CFR part 51. To enforce any edition other than that specified in paragraph (b) of this section, the Coast Guard must publish a notice of change in the **Federal Register** and the materials must be available to the public. All approved material is on file at the Office of the Federal Register, 800 North Capitol Street NW., Washington, DC, 20002 and at the U.S. Coast Guard, Marine Environmental Protection Division (G–MEP), 2100 Second Street SW., Washington, DC 20593–0001, and is available from the sources indicated in paragraph (b) of this section.

(b) The material approved for incorporation by reference in this part and the sections affected are:

International Maritime Organization (IMO)

Resolution A.535(13), Recommendations on Emergency Towing Requirements for Tankers, November 17, 1983..... 155.235

3. The table of contents for subpart B is amended by adding entries for §§ 155.200 through 155.240 and revising the entry for § 155.310 to read as follows:

Subpart B—Vessel Equipment

155.200 Definitions.
155.205 Discharge-removal equipment for vessels 400 feet or greater in length.
155.210 Discharge-removal equipment for vessels less than 400 feet in length.
155.215 Discharge-removal equipment for inland tank barges.
155.220 Discharge-removal equipment for vessel carrying oil as a secondary cargo.
155.225 Internal cargo transfer capability.
155.230 Emergency towing capability for tank barges.
155.235 Emergency towing capability for tankers.
155.240 Damage stability information.
155.310 Containment of oil and hazardous material cargo discharges.

* * * * *

4. Sections 155.200 through 155.240 are added to subpart B to read as follows:

§ 155.200 Definitions.

As used in this subpart:

Coastal tank barge means a tank barge, including dual-mode integrated tug-barges, certificated under 46 CFR chapter I, subchapter D, for coastwise service.

Inland tank barge means a tank barge certificated under 46 CFR chapter I, subchapter D, for river service or lakes, bays, and sounds service.

Offshore tank barge means a tank barge, including dual-mode integrated tug-barges, certificated under 46 CFR Chapter I, subchapter D, for ocean service or Great Lakes service, or any foreign flag tank barge.

Tanker means a self-propelled vessel, including push-mode integrated tug-barges, with the principle purpose of carrying oil in bulk as cargo and that has a Certificate of Inspection issued under 46 CFR chapter I, subchapter D, a Certificate of Compliance, or a Tank Vessel Examination letter.

Vessel carrying oil as secondary cargo means a vessel carrying oil pursuant to a permit under 46 CFR 30.01–5, 46 CFR 70.05–30, or 46 CFR 90.05–35 or pursuant to an International Oil Pollution Prevention (IOPP) or Noxious Liquid Substance (NLS) certificate required by §§ 151.33 or 151.35 of this chapter; or any uninspected vessel that carries oil in bulk as cargo.

§ 155.205 Discharge-removal equipment for vessels 400 feet or greater in length.

(a) Tankers, offshore tank barges, and coastal tank barges with an overall length of 400 feet or more must carry appropriate equipment and supplies for the containment and removal of on-deck oil cargo spills of at least 12 barrels.

(b) The equipment and supplies must include—

(1) Sorbents;

(2) Non-sparking hand scoops, shovels, and buckets;

(3) Containers suitable for holding recovered waste;

(4) Emulsifiers for deck cleaning;

(5) Protective clothing; and

(6) Non-sparking portable pumps and hoses.

(c) During cargo transfer operations, the equipment and supplies must remain ready, and pumps and hoses must be rigged, for immediate use.

§ 155.210 Discharge-removal equipment for vessels less than 400 feet in length.

(a) Tankers, offshore tank barges, and coastal tank barges with an overall length of less than 400 feet must carry appropriate equipment and supplies for the containment and removal of on-deck oil cargo spills of at least 7 barrels.

(b) The equipment and supplies must include—

(1) Sorbents;

(2) Non-sparking hand scoops, shovels, and buckets;

(3) Containers suitable for holding recovered waste;

(4) Emulsifiers for deck cleaning;

(5) Protective clothing; and

(6) Non-sparking portable pumps and hoses.

(c) During cargo transfer operations, the equipment and supplies must remain ready, and pumps and hoses must be rigged, for immediate use.

§ 155.215 Discharge-removal equipment for inland tank barges.

(a) During cargo transfer operations, inland tank barges must have appropriate equipment and supplies ready for immediate use to control and remove on-deck oil cargo spills of at least one barrel.

(b) The equipment and supplies must include—

(1) Sorbents;

(2) Non-sparking hand scoops, shovels, and buckets;

(3) Containers suitable for holding recovered waste;

(4) Emulsifiers for deck cleaning;

(5) Protective clothing; and

(c) The tank barge owner or operator may rely on facility-provided equipment if the equipment availability has been pre-arranged by contract or other means approved by the Coast Guard.

§ 155.220 Discharge-removal equipment for vessels carrying oil as secondary cargo.

(a) Vessels carrying oil as secondary cargo must carry appropriate equipment and supplies for the containment and removal of on-deck oil cargo spills of at least one-half barrel.

(b) The equipment and supplies must include—

(1) Sorbents;

(2) Non-sparking hand scoops, shovels, and buckets;

(3) Containers suitable for holding recovered waste;

(4) Emulsifiers for deck cleaning;

(5) Protective clothing.

(c) The equipment and supplies must be ready for immediate use during cargo transfer operations.

§ 155.225 Internal cargo transfer capability.

Tankers, offshore tank barges, and coastal tank barges must carry suitable hoses and reducers for internal transfer of cargo to tanks or other spaces within the cargo block, unless the vessel's installed cargo piping system is capable of performing this function.

§ 155.230 Emergency towing capability for tank barges.

(a) Offshore and coastal tank barges must carry an emergency tow wire or tow line rigged and ready for use.

(b) The emergency tow wire or tow line must have the same towing characteristics as the primary tow wire or tow line.

§ 155.235 Emergency towing capability for tankers.

OPTION 1 FOR § 155.235

(a) Except as provided in paragraph (c) of this section, by [*Insert date 3 years after the effective date of the final rule.*], all tankers of 20,000 deadweight tons (dwt) or more but less than 50,000 dwt must comply with the emergency towing provisions of sections 2.2 through 2.7 of IMO Resolution A.535(13) on at least one end of the vessel.

(b) Except as provided in paragraph (c) of this section, by [*Insert date 3 years after the effective date of the final rule.*], all tankers of 50,000 dwt or more must comply with the emergency towing provisions of sections 2.2 through 2.7 of IMO Resolution A.535(13) on both ends of the vessel.

(c) Tankers that are at least 20 years old (calculated from the keel laying date, as defined in 46 CFR 30.10–37) as of [*Insert the effective date of the final rule.*] must comply with the requirements of paragraphs (a) and (b) of this section by [*Insert date 5 years from the effective date of the final rule.*].

OPTION 2 FOR § 155.235

(a) By [*Insert date 3 years after the effective date of the final rule.*], all tankers of 20,000 deadweight tons (dwt) or more must comply with the emergency towing provisions of sections 2.2 through 2.7 of IMO Resolution A.535(13) on both ends of the vessel.

(b) All tankers of 20,000 dwt or more, constructed after [*Insert the effective date of the final rule.*], must be fitted on at least one end of the vessel with—

(1) A 400 foot long towing wire pendant constructed of 2½ to 3 inch diameter, 6×37 to 6×41, extra-improved plow steel, IWRC, galvanized wire;

(2) A 600 foot long, floating, polypropylene pickup line; and

(3) A floating pickup buoy.

(c) The equipment required in paragraph (b) of this section must be preconnected and stored in a manner that will facilitate the deployment of the pendant on a vessel with no power (deadship) by no more than three crew members.

(d) Tankers of 50,000 dwt or more, delivered before [*Insert the effective date of the final rule.*], must comply with the provisions of paragraph (b) of this section by [*Insert date 3 years after the effective date of the final rule.*].

(e) Tankers engaged in the Trans-Alaska Pipeline System (TAPS) trade and fitted with the emergency towing package described in paragraph (b) of this section as of [*Insert the effective date of the final rule.*] are exempted from the requirements in paragraphs (a) and (c) of this section as long as the emergency towing package is maintained on board the tanker.

(f) Tankers that are at least 20 years old (calculated from the keel laying date, as defined in 46 CFR 30.10–37 as of [*Insert the effective date of the final rule.*] must comply with the requirements of paragraphs (a) through (d) of this section by [*Insert date five years from the effective date of the final rule.*].

§ 155.240 Damage stability information.

(a) Owners or operators of tankers, offshore tank barges, and coastal tank barges shall ensure that their vessels have prearranged, prompt access to computerized onboard or shore-based damage stability and residual structural strength calculation programs.

(b) Vessel baseline strength and stability characteristics must be pre-entered into such programs and be consistent with the vessel's existing configuration.

(c) Access to the calculation program must be available 24 hours a day.

(d) The means of access to the calculation program must be identified in the vessel response plan required in subpart D of this part.

5. In § 155.310, the section heading and paragraph (b) introductory text are revised and paragraphs (c) and (d) are added to read as follows:

§ 155.310 Containment of oil and hazardous material cargo discharges.

* * * * *

(b) An offshore or coastal tank barge with a capacity of 250 or more barrels that is carrying hazardous material as cargo, and an inland barge with the capacity of 250 or more barrels that is carrying oil or a hazardous material as cargo must meet paragraph (a) of this section or be equipped with—

* * * * * *

(c) In addition to the requirements of paragraphs (a) and (b) of this section, by [*Insert date 3 years after the effective date of the final rule.*], all tankers and offshore and coastal tank barges with a capacity of 250 or more barrels that are carrying oil as cargo must have peripheral coamings, including port and starboard deck-edge coamings and

forward and aft athwarships coamings, completely enclosing the cargo deck area, cargo hatches, manifolds, transfer connections, and any other openings where cargo may overflow or leak.

(1) Coamings must be at least 4 inches high except in the aft corners.

(2) In the aft corners (port and starboard) of a vessel, the coamings must be at least 8 inches high and extend—

(i) Forward at least 14 feet from each corner; and

(ii) Inboard at least 8 feet from each corner.

(3) Each area enclosed by the coaming required under this paragraphs must have—

(i) A means of draining or removing oil from the enclosed deck area without discharging oil into the water; and

(ii) A mechanical means of closing each drain and scupper in the enclosed deck-area.

(4) For tankships, as "tankship" is defined in 46 CFR 30.10–67, the coaming or other barrier required in 46 CFR 32.56–15 may serve as the aft athwarships coaming if the tankship is otherwise in compliance with the requirements of this paragraph(s).

(d) In addition to the requirements of paragraphs (a) and (b) of this section, an offshore or coastal tank barge, as defined in § 155.200, with a capacity of 250 or more barrels that is carrying oil as cargo must have—

(1) A fixed or portable container under each oil loading manifold and each oil transfer connection within the coaming, that holds at least one-half barrel;

(2) A mechanical means of closing each drain and scupper within the coaming; and

(3) A means of draining or removing discharged oil from the fixed or portable container and from within the coamings without discharging the oil into the water.

Dated: September 23, 1992.

J.W. Kime,

Admiral, U.S. Coast Guard, Commandant.

Part VI

Department of Transportation

Federal Aviation Administration

14 CFR Part 121

Aircraft and Proposed Advisory Circular on Ground Deicing and Anti-Icing Program; Interim Final Rule and Notice

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 121

[Docket No. 26930; Amendment No. 121-231]

RIN 212-AE51

Aircraft Ground Deicing and Anti-Icing Program

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Interim final rule; request for comments.

SUMMARY: This amendment establishes a requirement for part 121 certificate holders to develop an FAA-approved ground deicing/anti-icing program.

This rule is necessary because several accidents and the 1992 International Conference on Airplane Ground Deicing indicate that, under present procedures, the pilot in command may be unable to effectively determine whether the aircraft's critical surfaces are free of all frost, ice, or snow prior to attempting a takeoff.

The rule is intended to provide an added level of safety to flight operations in adverse weather conditions. This rule and associated airport and air traffic control procedures will provide enhanced procedures for safe takeoffs during adverse weather conditions.

DATES: This interim final rule is effective November 1, 1992. Additional comments must be received not later than April 15, 1993.

ADDRESSES: Comments on this interim final rule should be mailed, in triplicate, to: Federal Aviation Administration, Office of the Chief Counsel, Attention: Rules Docket (AGC-10), Docket No. 26930, 800 Independence Ave., SW., Washington, DC 20591. Comments delivered must be marked Docket No. 26930. Comments may be examined in room 915G weekdays between 8:30 a.m. and 5 p.m., except on Federal holidays.

FOR FURTHER INFORMATION CONTACT: Larry Youngblut, Flight Standards Service, Regulations Branch, AFS-240, Federal Aviation Administration, 800 Independence Avenue, SW., Washington, DC 20591, telephone (202) 267-3755.

SUPPLEMENTARY INFORMATION:

Background

On July 23, 1992 (47 FR 32846) the FAA published a Notice of Proposed Rulemaking that would establish requirements for part 121 certificate holders to develop and comply with an FAA-approved ground deicing/anti-icing program. The proposed rule was developed in response to a number of airplane accidents caused in part by icing and to recommendations from an international conference on deicing/anti-icing that considered measures that could be taken to prevent such accidents.

Section 121.629(a) of the Federal Aviation Regulations (14 CFR 121.629(a)) states, in pertinent part, that no person may dispatch or release an aircraft when, in the opinion of the pilot in command or aircraft dispatcher, icing conditions are expected or met that might adversely affect the safety of flight. Section 121.629(b) states, in pertinent part, that no person may take off an aircraft when frost, ice, or snow is adhering to the wings, control surfaces, or propellers of the aircraft. These requirements, which have been virtually unchanged for over 40 years, are based on what is commonly referred to as the "clean aircraft concept." The basis of this concept is that the presence of even minute amounts of frost, ice, or snow (referred to as "contamintion") on particular aircraft surfaces, can cause degradation of aircraft performance and changes in aircraft flight characteristics.

Under the Federal Aviation Regulations, in icing conditions, as in all other conditions, ultimate responsibility for determining whether the aircraft is free of contamination—which is necessary for the aircraft to be airworthy—resets with the pilot in command. When conditions conducive to the formation of frost, ice, or snow or aircraft surfaces exist at the time of takeoff, or it is suspected that these contaminants are adhering to aircraft surfaces, common practice developed by the North American and European aviation communities over many years of operational experience is to deice and/or anti-ice the aircraft before takeoff.

Deicing is a procedure by which frost, ice, or snow is removed from the aircraft in order to provide clean surfaces. Anti-icing is a precautionary procedure which provides protection against the formation of frost or ice and accumulation of snow to treated surfaces of the aircraft for a limited period of time. Two principal types of deicing/anti-icing fluids are used. Type I fluids are unthickened fluids that are normally applied as a mixture of glycol and water. These fluids mainly provide protection against refreezing when no delays or only short delays occur between deicing and takeoff. Type II fluids are thickened fluids. They provide protection against refreezing for longer periods and can be used when longer delays can be anticipated. Type II fluid is used extensively in Canada and Europe, but is used less often in the United States. Type II fluid provides longer holdover times. Holdover time is the estimated time deicing/anti-icing fluid will prevent the formation of frost or ice and the accumulation of snow on the protected surfaces of an aircraft.

According to the National Transportation Safety Board (NTSB), in the last 23 years there have been 15 accidents related to the failure to deice aircraft adequately before takeoff. In all of these accidents, contamination on the aircraft surfaces during takeoff was the cause or a contributing cause of the accident. On March 22, 1992, USAir flight 405 crashed on takeoff from La Guardia Airport in a snowstorm during nighttime operations. While the NTSB has not yet issued a probable cause finding for this accident, the FAA has proceeded on the assumption that the accident was caused, at least in part, by icing. The airplane had been deiced approximately 35 minutes before takeoff.

As a result of this and earlier accidents, the FAA mounted a sharply focused effort to address the issues surrounding ground deicing before the winter of 1992/1993. On May 28 and 29, 1992, the FAA held the International Conference on Airplane Ground Deicing in Reston, Virginia. The conference brought together leading experts from all over the world to share information on ground deicing/anti-icing of transport category airplanes and to recommend actions for preventing accidents caused by icing, and for continuing improvement of flight safety under adverse weather conditions.

The two-day conference was attended by representatives from air carriers and air carrier associations, crewmember associations, manufacturers and manufacturing associations, airport operators, and air traffic controllers and other FAA personnel, as well as by scientific experts on weather, deicing fluids, and deicing equipment. Over 800 people attended the conference. Areas covered by working groups at the conference were aircraft design; ground deicing and anti-icing systems; air traffic control and sequencing; deicing personnel, procedures, and training; and ice detection, recognition, and crew training.

Two major recommendations, which support this rulemaking, made by the working groups are: (1) Critical aircraft surfaces must be kept free of frost, ice, and snow; and (2) Each air carrier should have an approved aircraft deicing program that will ensure full

compliance with the clean aircraft concept. The program should include ground deicing procedures, a comprehensive training program for flight crewmembers, holdover timetables to be used as guidelines, and criteria for determining if a pretakeoff check after deicing is needed.

The FAA based the proposed rule on these recommendations and accident history. As proposed, the rule would require part 121 certificate holders to develop and comply with an FAA-approved ground deicing/anti-icing program that includes procedures that must be followed whenever ground conditions exist that might result in frost, ice, or snow adhering to the aircraft surfaces, unless it uses the alternate check procedures described below under "Implementation of Program." The program is intended to provide the pilot in command with more complete information, training procedures, and ground support, which he or she needs for deciding if takeoff can be safely accomplished. Each program would include a detailed description of how the certificate holder determines that ground deicing/anti-icing procedures must be in effect, who is responsible for deciding that such procedures must be in effect, the operational procedures for implementing ground deicing, and the specific duties and responsibilities of each operational position or group responsible for getting the aircraft safely airborne while such procedures are in effect.

To be approved, each ground deicing/anti-icing program would have to cover at least the following areas:

(1) Ground training and testing requirements for all flight crewmembers and qualification requirements for all other personnel the certificate holder uses in implementing the approved ground deicing/anti-icing program.

(2) Procedures for the use of holdover times.

(3) Deicing/anti-icing and accompanying checking procedures.

Differences between the proposed rule and the final rule involve pretakeoff check requirements, short term training and qualification/testing requirements, implementation plans, use of holdover timetables, definitional changes, and flight with underwing frost under certain conditions. These changes are discussed in the "Discussion of Comments" section of this preamble.

This rule, when implemented, will ensure that the FAA and part 121 certificate holders have taken every practical step possible to improve safety in icing conditions before the 1992/1993 winter season. In this regard, the FAA is aware that part 121 certificate holders have already, under the leadership of the ATA, taken steps to develop a standard model industry training program that would meet the goals of this rulemaking.

NTSB Recommendations

As a result of accident investigations, the NTSB has issued 30 safety recommendations that address issues involving aircraft ground icing and deicing.

These recommendations cover such subjects as informing operators about the characteristics of deicing/anti-icing fluids; informing flight crews about ice formation after deicing; reviewing information that air carrier operators provide to flight crews on runway contamination and engine anti-ice during ground operations; requiring flight crew checks before takeoff if takeoff is delayed following deicing; emphasizing to air carrier maintenance departments the importance of maintaining ground support equipment; and requiring air carrier training programs to cover the effect of wing leading edge contamination on aerodynamic performance.

This final rule as well as previous FAA actions address these recommendations. Previous actions included dissemination of advisory circulars, bulletins, memoranda, informative articles, and notices related to winter operations, as well as publishing Air Carrier Operations Bulletins, Maintenance Bulletins, and Maintenance Action Notices. These materials were intended to impress upon operators the dangers of aircraft wing and control surface contamination and the need to assist the pilot in determining if the aircraft is free of contamination before takeoff.

Long-Term FAA Actions

The problem of airplane ground deicing/anti-icing is much broader than just the issue of the last-minute decision of a pilot in command on whether to attempt a takeoff. Airport and air traffic control procedures, airplane design, pilot awareness training, airplane performance characteristics, and other factors have been considered in NTSB recommendations, and many of them were addressed at the Reston conference. The FAA and the aviation industry are continuing their efforts to address these and other related issues. Efforts in some areas, such as airport and air traffic control procedures, are already underway and will continue during this rulemaking. Other issues, such as the effects of airplane design and their interaction with wing contamination and pilot flying technique, for example, require research. The potential value of aircraft type specific pilot training on procedures for use during ground icing conditions will also be studied, either by the FAA alone or as joint government/industry projects. Many aspects of aircraft design, performance characteristics, handling qualities, and flying technique must be examined along with their interactions, in order to fully understand why the accident history appears to reflect an imbalance among accident rates experienced by different aircraft designs.

Discussion of Comments

Additional Comment Period

A number of commenters object to the 15-day comment period and the rush to place this rule in effect before the 1992–1993 winter season. As discussed elsewhere in this preamble and as was discussed in the NPRM, the FAA has determined that it is in the interest of aviation safety to establish additional ground deicing/anti-icing rules before this winter. The International Conference on Airplane Ground Deicing in general supports the FAA's decision. Nevertheless, the FAA recognizes that less than four months have elapsed between the International Conference and this final rule and that the general public had only 15 days to comment on the NPRM. Therefore, the FAA has determined that it is in the public interest to make this an interim final rule and provide an additional comment period to obtain comments on the actual implementation of this rule this winter. All comments received before April 15, 1993 will be carefully considered. If warranted, the FAA will make changes to the rule before the next winter season.

Comments should identify the regulatory docket number to the Rules Docket address specified above. Commenters wishing the FAA to acknowledge receipt of their comments must include a preaddressed, stamped postcard on which the following statement is made: "Comments to Docket No. 26930." The postcard will be date stamped and mailed to the commenter.

General

Over 40 comments were submitted by associations representing airlines, pilots, and dispatchers and by parts 121 and 135 certificate holders, the NTSB, and other interested individuals. While most of the commenters generally favor FAA action to improve aviation safety in potential icing conditions, virtually all of

the commenters make recommendations in specific areas, and a number of commenters express concern that the FAA's short timetable could lead to less than the most effective regulatory action. As indicated, several commenters asked that the comment period be extended. The FAA has carefully considered all of the comments received and has modified the proposal in some instances. A full discussion of comments and FAA responses follows.

Applicability and Justification

Several commenters questioned the applicability of the proposed rule to part 121 certificate holders. A number of commenters (including the National Transportation Safety Board) state that the proposed requirements should also apply to operations under parts 125 and 135. These commenters state that icing conditions apply equally to smaller aircraft and larger aircraft, and that there should be no difference in the level of safety required. One commenter states that since all aircraft are required to comply with the clean aircraft concept, the required deicing program should apply to operations under parts 91, 125, and 135. Several commenters stated that the supporting data cited by the FAA justifies the proposed rule's applicability to turbojet aircraft but not to turbopropeller aircraft, and one commenter states that most jet or turbine powered aircraft have operated safely under current rules and recommends that the proposed rule should only address specific aircraft types that have a history of icing related problems. A few commenters suggest that the proposed rule is an overreaction by FAA, since the accidents cited in the supporting data can be explained and distinguished in a way that could lead the FAA to conclude that better monitoring of compliance with existing regulations would address any problems that exist.

Several commenters state that it is unfair to U.S. carriers for the proposed rule not to apply to foreign air carriers. One foreign air carrier states that it and other foreign operators that use Type II fluids could be adversely affected, apparently on the assumption that its takeoff could be delayed to allow the takeoff of a U.S. aircraft that must take off within five minutes after the aircraft has been determined to be free of frost, ice, and snow (see § 121.629 (c)(4) and (d)).

FAA Response

The intent of this interim final rule is to put in place before this winter a rule to improve safety during icing conditions. The FAA determined that limiting the rule's application to operations under part 121 would have the most far-reaching impact. The FAA will continue to study part 125 and 135 operations to determine if future rulemaking is required. Although most icing related accidents have involved turbojet aircraft, the FAA believes part 121 turbopropeller aircraft should be included in this rule since the very real potential for problems in icing conditions exists and there does not appear to be any technical reason for saying that turbopropeller aircraft are immune from wing contamination related icing accidents. The FAA believes, as stated in the preamble to the proposed rule, that this rule is needed based on the accidents discussed and on the recommendations of the Reston Conference described previously in this preamble. These recommendations were not limited to specific aircraft types.

As to the comments that part 129 foreign air carriers will have an unfair advantage, while the FAA does not believe that foreign air carriers will have any significant competitive advantage, the FAA, as stated in the NPRM, will request that the ICAO initiate a review of deicing and anti-icing procedures used by all air carriers. The FAA will continue to work aggressively with other nations' civil aviation authorities to learn from their safety regulatory experiences and to share those of the U.S. so that we all may develop and adopt the most effective and efficient regulations to improve the safety of all aircraft during icing conditions.

The FAA does not envision a situation in which a foreign operator would be adversely affected by a U.S. operator who is subject to this rule because, in the circumstances described above, normal air traffic control procedures would be observed.

In any case, the FAA solicits continued information from anyone who sees specific instances in which a competitive advantage has been obtained by any air carrier as a result of the application of this rule. The competitive effect of the FAA's rules is an important consideration, and, if there is an adverse result on competition, the FAA would consider amendments that do not degrade the overall level of safety achieved by this rule.

Note on Terminology Change

(1) The notice of proposed rulemaking provided alternative conditions for taking off after expiration of a holdover time. One condition was that a takeoff could occur after a "pretakeoff inspection" determines that the aircraft is clean. This procedure is more properly called a "check," since airworthiness related "inspections" are usually performed by certified mechanics, and this procedure will in most instances be performed by the flight crew. Therefore, throughout this document the term "pretakeoff contamination check" is used, even when referring to the NPRM.

(2) The notice of proposed rulemaking in proposed § 121.629(d) provided an alternative procedure for certificate holders that do not have an approved anti-icing/deicing program. Throughout this document the paragraph (d) procedure is referred to as an "outside-the-aircraft check."

In addition, this document uses two terms "aircraft deicing/anti-icing procedure" and "pretakeoff check", which were not used in the NPRM. These terms are discussed and explained later in this section of the preamble.

The Use of Holdover Times

Over half of the commenters to the NPRM address the issue of the use of holdover times. The majority of these comments concern the following issues: (1) appropriateness of holdover times being specific either to a certificate holder or to an aircraft type; (2) use of holdover times as mandatory rather than as guidelines; (3) determining or changing holdover times.

General Discussion of Holdover Times

This rule requires certificate holders to develop holdover times with data acceptable to the Administrator. The only holdover time date currently readily available to the industry and acceptable to the FAA is that developed by the Society of Automotive Engineers (SAE) and the International Organization for Standardization (ISO). Certificate holders may develop other tables; however, certificate holders should be aware that the FAA may need considerable time to verify the acceptability of newly developed tables.

Holdover times developed by the SAE/ISO have been compiled into tables that are specific to fluid type, Type I or Type II, rather than being specific to any particular aircraft type. The tables use outside air temperature (OAT) ranges, fluid concentrations or freezing point (FP) limitations, and the general type of contamination existing, (i.e., frost, freezing fog, snow, freezing rain, and rain on a cold soaked wing) to determine an approximate holdover time range. See figure 1 reproduced from the draft FAA advisory circular, "*Pilots Guide to Large Aircraft Ground Deicing.*"

The tables specifically state that "the responsibility for the application of these data remains with the user". The tables caution they are for use in departure planning only and shall be used in conjunction with pretakeoff check procedures. These tables only provide approximate time ranges and are subject to individual interpretation. The FAA has determined that takeoff after exceeding any maximum holdover time in a certificate holder's table, for the existing weather conditions, is permitted only when other actions are taken.

It should be noted that the FAA and the SAE have initiated studies to develop more precise holdover timetables and as new data becomes available new tables will be developed and made available to the industry.

BILLING CODE 4910-13-M

Table 1. Guideline for Holdover Times Anticipated by SAE Type II and ISO Type II Fluid Mixtures as a Function of Weather Conditions and OAT.

CAUTION! THIS TABLE IS FOR USE IN DEPARTURE PLANNING ONLY. IT SHOULD BE USED IN CONJUNCTION WITH PRE-TAKEOFF CHECK PROCEDURES.

OAT		Type II Fluid Concentration Neat-Fluid /Water [% by Volume]	Approximate Holdover Times Anticipated Under Various Weather Conditions (hours: minutes)

A specific discussion of comments on the three major issues and FAA responses follows.

• *Certificate Holder or Aircraft Specific Holdover Times*

Several commenters object to the proposed language of § 121.629(c)(3) which states that an approved deicing program must include "the certificate holder's holdover times, specific to each aircraft type * * *." These commenters state that holdover time should not be aircraft type specific. Most of these commenters also believe that holdover times should be standard for all certificate holders. One commenter states that holdover times, while not aircraft type specific, are specific to the type of fluid used and that the FAA should establish "not to exceed" times when aircraft are dependent on Type I fluids.

FAA Response

As previously stated, the only holdover timetables readily available to the industry and acceptable to the FAA are those developed by the SAE/ISO and these holdover times are not aircraft type specific. Because holdover times are generally given as acceptable ranges, however, it is quite conceivable that a rational analysis could lead to an acceptable deicing program in which type-specific holdover times are provided within the ranges of acceptable holdover times given in the SAE/ISO tables. The language in the final rule, therefore, does not prohibit the use of type-specific holdover times, but they are not required.

• *Mandatory vs. Guideline Holdover Times*

Several commenters state that holdover times were developed to be used as guidelines and not as mandatory times. One commenter states that the holdover time guidance provided in current and proposed advisory circulars is too general to be of real use, and that the FAA should immediately commission SAE to "recalibrate" its charts to match standard National Weather Service reporting criteria.

FAA Response

As stated above, each certificate holder must develop its own holdover times with data acceptable to the Administrator and if the maximum holdover time developed by the certificate holder is exceeded, other actions must be accomplished before the aircraft can take off. The FAA will continue to work with the National Weather Service to enhance reporting criteria in order to provide flight crewmembers with current information required in the use of holdover timetables.

• *Determining or Changing Holdover Times*

Two commenters (the Airline Dispatchers Federation and an individual dispatcher) state that the proposed rule does not adequately reflect the role of the dispatcher under existing part 121 rules. These commenters recommend that the dispatcher's role be reflected in the rule language and that the dispatcher and pilot in command must work together in determining holdover times. One suggests that the dispatcher is in a better position to enforce holdover times than is the pilot in command. Several commenters suggest that the proposed rule language places an unreasonable burden on the pilot in command, particularly in a case where a pilot in command would be expected to

increase or decrease the determined holdover time based on changing conditions. Commenters suggest that it would be better to establish at each airport one central agency to determine and revise as appropriate holdover times for all certificate holders operating at that airport.

FAA Response

The information required to determine or change the proper holdover time includes outside air temperature, type and concentration of fluid, weather conditions, and time the last application of fluid began. This information is most readily available to the pilot in command, allowing him or her to determine quickly from the holdover timetable the appropriate holdover time. The certificate holder's program may include holdover time coordination with the dispatcher; however, the information required to determine or change the proper holdover time may be available only to the pilot in command.

Type I and Type II Fluids

A number of commenters expressed views on the potential uses of Types I and II fluids under the proposed rule. Several commenters recommend that the FAA mandate or at least encourage the use of Type II fluids. Others raised questions about the use of Type II fluids, ranging from potential environmental problems (dealt with elsewhere in this preamble) to higher cost and limited availability for the 1992/1993 winter. One commenter questions whether Type II fluids are better in most situations and states that Type II usage in Europe is declining.

FAA Response

Each specific certificate holder determines the type of fluids used in its operations. As stated in the NPRM and in this preamble, each type fluid has its benefits and intended usage. All the information presently available to the FAA indicates that there is no availability problem associated with Type II fluids and that their use continues to grow in Europe and Canada.

Pretakeoff Contamination Check

A number of commenters raise questions concerning the proposed pretakeoff contamination check defined in proposed § 121.629(c)(4) and the optional outside the aircraft check in proposed § 129.629(d). The most frequently raised concern is that the proposed five-minute limitation in § 121.629(c)(4) and (d) is impractical because most airports do not now have a facility at a location near enough to the end of the takeoff runway to perform these checks.

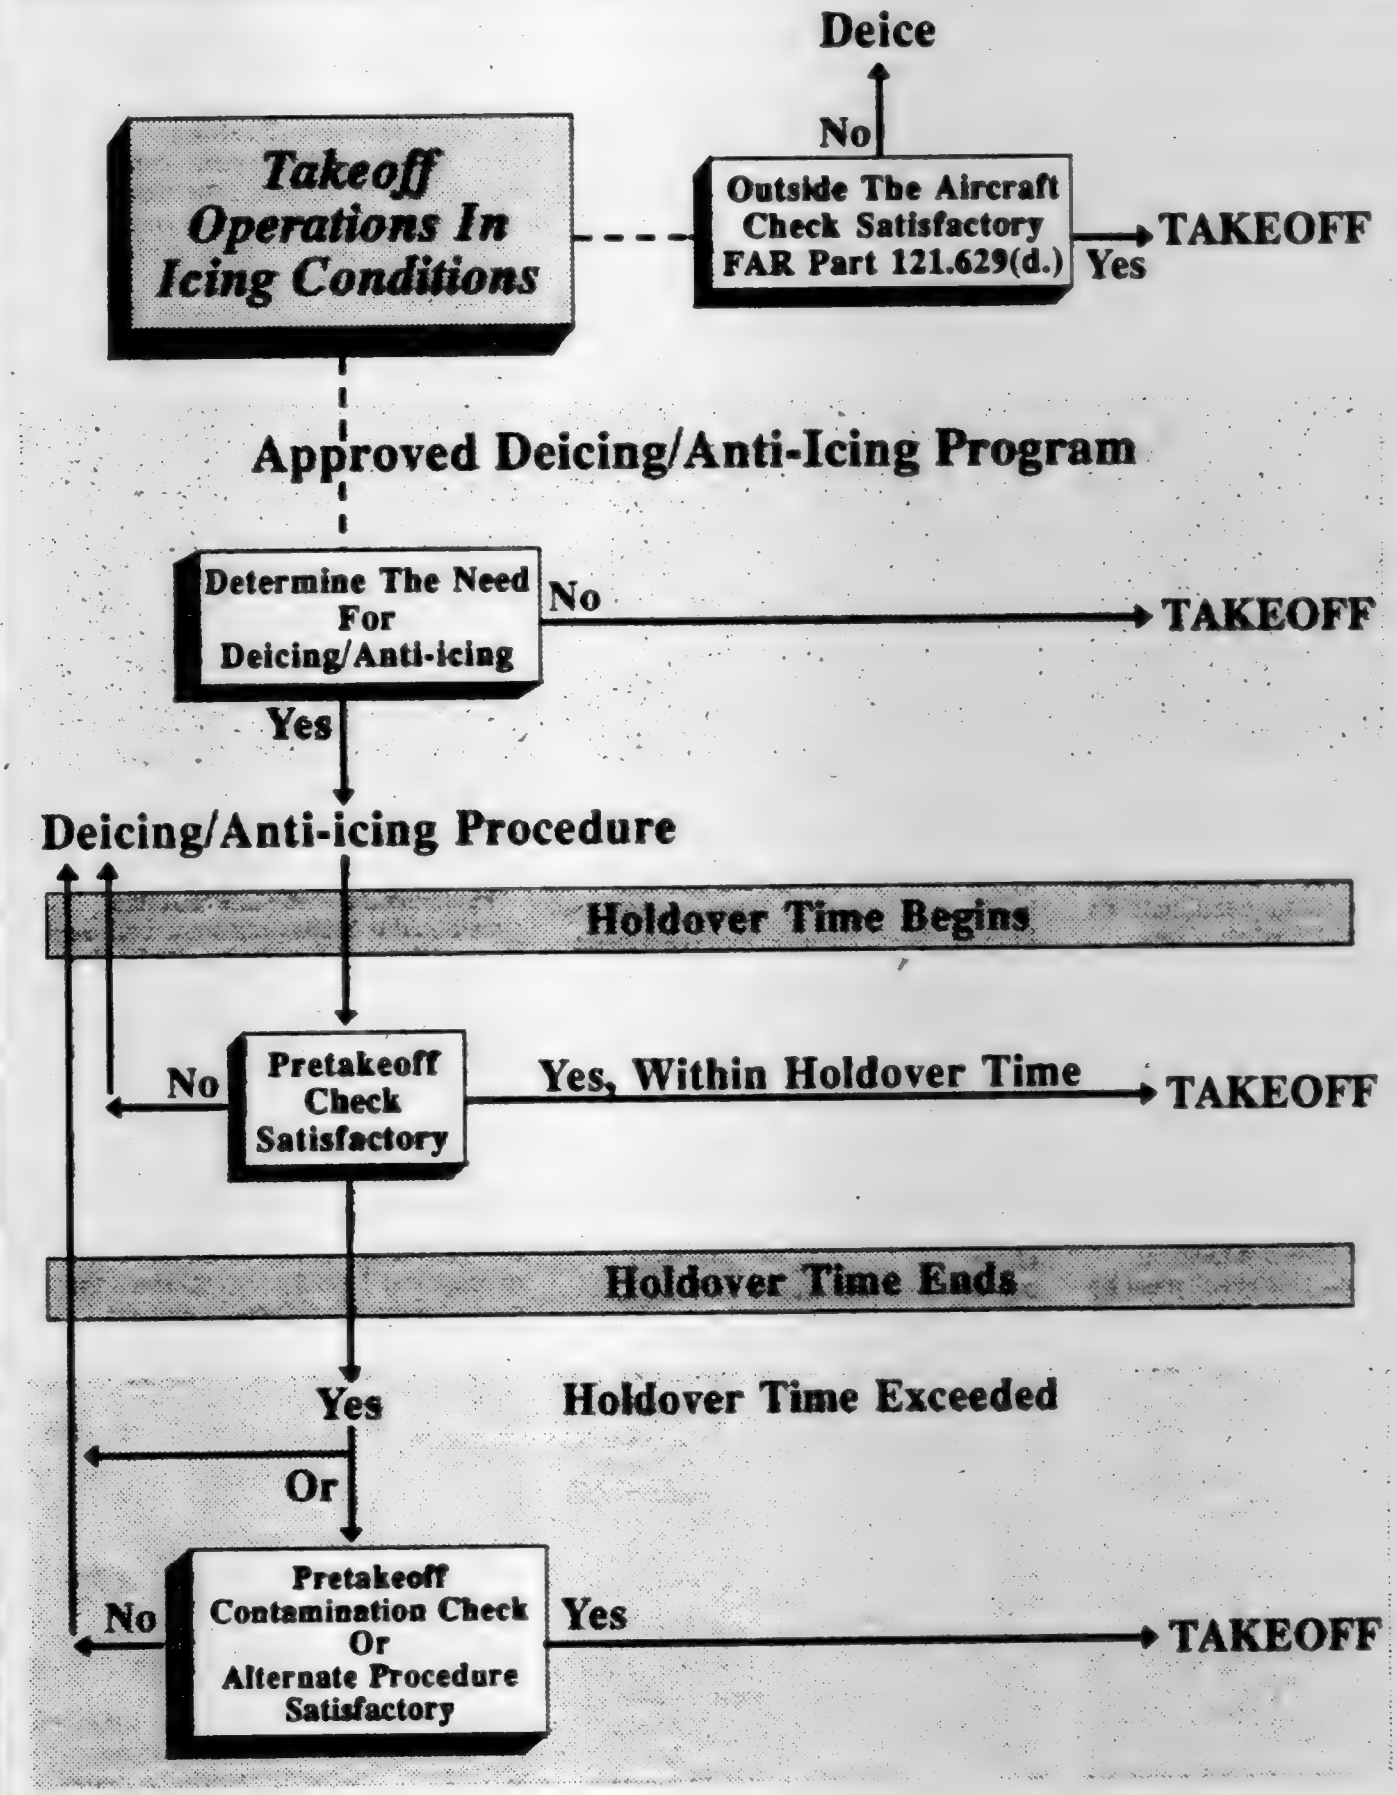
Other concerns are: (1) Pretakeoff contamination checks with the engines running (particularly propeller driven aircraft) are inherently unsafe; (2) a pretakeoff contamination check should be required following ground operations in all icing condition operations, not just when holdover times are exceeded; (3) checks from within the aircraft should be allowed in all cases according to some commenters and should never be allowed according to others.

FAA Response

Section 121.629(c)(3) and (c)(4) of the proposed rule would allow a takeoff after the expiration of a holdover time if a check conducted within five minutes prior to takeoff determines that the wings, control surfaces, and other critical surfaces are free of frost, ice, or snow, and if the check is "accomplished from outside the aircraft unless the program specifies otherwise." Section 121.629(d) of the proposed rule would also allow for a check that must be conducted within five minutes prior to takeoff as an optional alternative for a certificate holder who does not have a deicing program but this check must be accomplished from outside the aircraft.

Some commenters have confused the pretakeoff contamination check referenced in proposed § 121.629(c)(3) and (c)(4) with the outside-the-aircraft check that is required by § 121.629(d). The following describes the different procedures, and checks contained in the final rule. (See Figure 2)

BILLING CODE 4910-13-M



BILLING CODE 4910-13-C

(1) *Aircraft deicing/anti-icing procedure.* This procedure is completed by ground personnel. The procedure includes checking wings, control surfaces, propellers, engine inlets, and other critical surfaces as defined in the aircraft manufacturer's maintenance manual or Advisory Circular (AC) 121–XXX Aircraft Ground Deicing and Anti-Icing Program and is an integral part of the deicing process. It is referenced in the beginning of § 121.629(c)(4).

(2) *Pretakeoff check.* This check is completed any time the aircraft is deiced or anti-iced and is integral to the use of holdover times. It is accomplished within the holdover time, and normally is accomplished by the flight crew from inside the aircraft. The aircraft's wings or representative aircraft surfaces are checked for contamination. For clarification, and to be consistent with the intended use of holdover timetables, this check is included in § 121.629(c)(4).

(3) *Pretakeoff contamination check.* This check is to determine the condition of an aircraft after the maximum holdover time has been exceeded. This check may be performed from either the inside or the outside of the aircraft depending upon type of aircraft, lighting conditions, and weather conditions, as specified in the certificate holder's approved program. When the pretakeoff contamination check is used, it must be accomplished within five minutes of beginning the takeoff. The aircraft's wings, control surfaces, and other critical surfaces, as defined in the certificate holder's program, must be checked.

(4) *Part 121.629(d) outside-the-aircraft check.* This check is required only if a certificate holder does not have an approved program. This check must be accomplished from outside the aircraft within five minutes of beginning the takeoff. The aircraft's wings, control surfaces, and other critical surfaces, as defined in the manufacturer's AFM, must be checked.

These checks are not substitutes for an Airworthiness Directive requirements.

With respect to the concerns commenters raise about the practicability of the five minute limitation on pretakeoff contamination checks under § 121.629(c)(4) or outside-the-aircraft checks under § 121.629(d), the FAA recognizes that in many situations neither of the checks may be viable at certain airports, at certain peak departure times, and during certain weather conditions. Over the long term, as airport remote deicing and checking facilities are built or expanded, those checks may become more feasible. However, the FAA points out that the five minute limitation arises only in two situations. One is when a certificate holder does not have an approved ground deicing/anti-icing program. The other is after a maximum holdover time is exceeded.

The FAA assumes that a certificate holder will elect not to have an approved ground deicing/anti-icing program only if it concludes that it would be more cost effective to operate without such a program. In electing not to have an approved program the certificate holder has taken into consideration the possibility that it would have to delay or even cancel flights in icing conditions. As a practical matter, the FAA does not expect that such a certificate holder's operations under this rule will differ significantly from its past operations.

The outside-the-aircraft check conducted within five minutes of beginning takeoff is the only alternative means of operating in icing conditions in the absence of an approved program under paragraph (c). That is, even if a certificate holder was to use the deicing facilities of another certificate holder who has an approved program, the first certificate holder could not use the holdover times of the deicing certificate holder. This is because the five-minute limitation under § 121.629(d) recognizes that pilots who operate without an operator approved program, as compared to pilots who operate under an approved program, may lack proper training and the knowledge to effectively determine whether the aircraft is free of contamination prior to takeoff. Proper training includes reviewing precipitation categories, fluid characteristics and concentrations, coordination procedures and check requirements. Without the proper training provided under an approved program the pilot in command who is in possession of a holdover time could easily make an uninformed decision in attempting to takeoff. Therefore, in the absence of an approved program under paragraph (c), paragraph (d) requires the aircraft to be checked from outside the aircraft within five minutes of beginning takeoff.

With respect to certificate holders that have an approved ground deicing/anti-icing program, where a maximum holdover time is exceeded there are three alternatives available. The aircraft can be redeiced and a new holdover time established. The aircraft can takeoff if the certificate holder has obtained approval of an alternate procedure (e.g. a new technology) that is capable of determining that the wings, etc., are clean. The third alternative is to accomplish a pretakeoff contamination check and begin the takeoff within five minutes of completing the check. Thus, if the takeoff could not be initiated within the five minute limitation, and if no alternate procedure has been established, the worse case scenario for the certificate holder is that the aircraft must be redeiced and a new holdover time established. Given the goals of this rulemaking, the FAA does not consider the potential delay to be unacceptable given the risks of taking off when there would be considerable uncertainty about the possibility of aircraft surface contamination.

Inspections for Specific Airplane Types by Airworthiness Directive (AD)

The NPRM preamble pointed out that the FAA had previously issued ADs requiring a tactile inspection any time ground icing conditions might exist for certain airplanes without wing leading edge devices (i.e., airplanes commonly referred to as "hard wing"). FAA invited comments on the need for a similar mandatory requirement for any other airplane types. Several commenters address this request, but none recommend additional airplane types.

Most commenters state that this problem, if it exists (and some believe it does not), should be dealt with by the FAA as it has been in the past by issuance of an AD when warranted. One commenter states that the FAA's belief that non-slatted wings are more susceptible to loss of lift than wings with leading edge slats is not supported by any known aerodynamic data. One commenter recommends that the significance of airplane design be recognized by adding "or on an aircraft" to proposed § 121.639(c)(1)(i) since the design of the aircraft could make it susceptible to contamination while conditions at the airport may not be such that frost, ice, or snow may reasonably be expected to adhere to the aircraft.

FAA Response

As in the past, aircraft specific requirements will be dealt with by the issuance of ADs. Commenters did not indicate any additional aircraft types that warrant a mandatory tactile inspection at this time. Any manufacturer that does not agree that an AD is warranted when proposed may state its objections during the course of that rulemaking.

Deicing programs for aircraft not covered by an AD may voluntarily include a tactile inspection of an aircraft's wing; this could be done immediately after deicing is accomplished or to determine if deicing

is even necessary. Certificate holders should specify in their deicing/anti-icing program any intended use of tactile inspections. As to adding "or on an aircraft" to § 121.629(c)(1)(i), the FAA has determined that the words "at an airport" should be deleted so that the paragraph includes any conditions where frost, ice, or snow may reasonably be expected to adhere to the aircraft.

Takeoff Decision

Several commenters express concern that nothing in the proposed rulemaking should change the existing policy that places the ultimate responsibility for a takeoff on the pilot in command. Two commenters believe that the dispatcher's role in releasing an aircraft, possibly including the determination of holdover times jointly with the pilot in command, should be spelled out in the final rule language.

FAA Response

The FAA agrees that nothing in this rule changes § 91.3(a) which states that "The pilot in command of an aircraft is directly responsible for, and is the final authority as to, the operation of that aircraft." As stated in the preamble to the NPRM, the new approach taken by this rulemaking is to give the pilot in command additional guidance and certificate holder-developed procedures and, under certain conditions, ground personnel support, in determining the aircraft's airworthiness in potential icing conditions. While this rule will ensure that the pilot in command and supporting personnel receive additional training and that the certificate holder establishes additional procedures for potential icing situations, the ultimate authority and responsibility for the operation of the aircraft remain with the pilot in command.

The FAA does not agree that the role of the dispatcher needs to be further addressed in § 121.629(c). Paragraph (c) states clearly that "no person may dispatch * * * an aircraft any time conditions are such that frost, ice, or snow may reasonably be expected to adhere to the aircraft, unless the certificate holder has an approved deicing program and unless the dispatch, release, and takeoff comply with that program." Thus, the dispatcher is part of the team that will initially determine whether it is safe for a flight to be dispatched in existing and anticipated icing conditions. As discussed elsewhere in this preamble, a dispatcher might not have all or the most current icing and weather information that becomes available to the pilot in command, and that is used by the pilot in command in initially determining and possibly changing a holdover time.

Training of Flight Crewmembers and Other Personnel

A number of commenters express concerns with the proposed training provisions of the certificate holder's approved deicing program. The most significant concerns deal with the short time available to train and qualify affected personnel, training requirements for ground personnel employed by contractors rather than by certificate holders, and the need to ensure that FAA's principal operations inspectors are themselves trained. Commenters also make a few specific training recommendations. Each of these areas and others are specifically addressed below.

• *Training and Qualification Deadline*

Several commenters state that it is impractical to train and complete testing or qualification before November 1, 1992, particularly for ground personnel who work for contractors and not directly for the certificate holder. Suggested solutions are: to require only written notice of new procedures to affected persons before November 1, 1992; to require training only, with testing or qualification delayed until the next scheduled recurrent training program; and to develop a universal training program that could be used for all ground personnel.

One commenter stated its concern that FAA's principal operations inspectors are themselves in need of more effective training if they are to determine the adequacy of a proposed program.

FAA Response

The FAA agrees that it would be impractical to complete both formal training and testing for flight crewmembers and formal training and qualification for other affected personnel before November 1, 1992. Therefore, in order to complete flight crewmember training and testing and training and qualification for other affected personnel for this first year, the FAA will allow certificate holders maximum flexibility in providing the required training and testing/qualifications (e.g., take home brochures, video tapes, self-grading quizzes, or other appropriate review materials). With respect to the training and qualification of persons who work for contractors, the FAA believes that certificate holders must be held responsible for these personnel as they are for their own employees. For those contract personnel who do not normally provide deicing/anti-icing service to the certificate holder, proper deicing/anti-icing procedures and supervision must be assured by a trained flight crewmember, mechanic, or other person employed by the certificate holder using the procedures authorized in their approved program. While training of FAA principal operations inspectors is addressed later in this preamble under the "Program Implementation" section, FAA agrees that thorough and better training of all personnel in government and industry is vital to reducing the incidence of icing-related accidents.

Certificate holders who cannot complete training and qualification of their personnel before the effective date of this rule have the option of using the alternative procedure in § 121.629(d).

• *Dispatcher Training*

The Airline Dispatchers Federation recommends that dispatchers be specifically included in § 121.629(c)(2)(iii) to ensure that dispatchers are trained so that they can carry out with the pilot in command and with Air Traffic Control (ATC), the duties imposed by §§ 121.99, 121.533(c)(d), and 121.535(c)(d).

FAA Response

Section 121.629(c)(2) specifically identifies "aircraft dispatchers" as one of the groups of personnel covered by the term "all other affected personnel." It is not, therefore, necessary to identify dispatchers specifically in the list of areas to be covered under § 121.629(c)(2).

• *Training Program Content*

The Airline Pilots Association (ALPA) states that Advisory Circular (AC) 20–117 has not been as widely distributed to pilots or incorporated into specific training programs as the FAA originally intended, and recommends that approved deicing training programs mandate that all pertinent advisory circulars become an integral part of the training program. Fokker Aircraft recommends that pilot training programs emphasize again the effect of airframe icing on the aircraft's ability to fly. Fokker recommends that training programs include a takeoff technique, recommended by it and other aircraft manufacturers that during ground icing conditions pilots should use a slower rate of rotation to a lower pitch angle. Fokker also recommends that an air carrier's ground deicing program address the advantages of Type II fluids and the disadvantage of Type I fluids in detail.

FAA Response

One of the major areas included in this rule is training of all those personnel involved in the ground deicing/anti-icing process. Each certificate holder in its approved program must include all the applicable material and guidance regarding deicing/anti-icing operations to ensure its personnel are properly trained. The FAA is developing a new Advisory Circular to provide additional guidance to certificate holders. In addition, the following documents are excellent sources for obtaining guidance material:

Advisory Circular 20-117, "Hazards Following Ground Deicing and Ground Operations in Conditions Conducive to Aircraft Icing"

International Standard Organization (ISO) 11075, "Aircraft Deicing/Anti-icing Newtonian Fluids ISO Type I"

ISO 11076, "Aircraft Deicing/Anti-icing Methods with Fluids"

ISO 11077, "Deicing/Anti-icing Self-Propelled Vehicles—Functional Requirements"

ISO 11078, "Aircraft Deicing/Anti-icing Non-Newtonian Fluids ISO Type II"

Society of Automotive Engineers (SAE) Aerospace Recommended Practice (ARP) 4737, "Aircraft Deicing/Anti-icing Methods with Fluids, for Large Transport Aircraft"

FAA Order 8400.10, Air Transportation Operations Inspector's Handbook, Volume 4, chapter 8, Sections 1 and 2.

The FAA also agrees that pilot training for ground icing conditions should include recognition of changes in aircraft handling characteristics and instruction on the takeoff techniques to use, such as decreasing the rotation rate and reducing the angle of rotation of different aircraft types. The FAA plans to work with aircraft manufacturers and industry associations to develop appropriate training material as early as possible.

Airport/ATC Roles

Two commenters state that deicing/anti-icing programs should be jointly developed and implemented by air carriers and airports to ensure fair and uniform procedures and to reduce the burden on air carriers. One commenter discusses a number of airport responsibilities that relate to deicing, for example, ensuring that any materials used will not cause harm or endanger aircraft or their systems, and ensuring that these materials are disposed of properly. This commenter recommends that airports meet with air carriers in developing sound deicing programs.

Other commenters say that the role of ATC must be fully coordinated with that of the air carriers and airports to ensure the proper use of holdover times, to prevent delays after deicing, and to ensure a smooth traffic flow during icing conditions. ATC should also be aware of the differences related to deicing procedures for Part 121 and 135 operations and ensure that both types of operations are treated fairly.

One commenter states that many airports are already developing deicing/anti-icing programs and that these may not be compatible with the proposed rule or part 121 programs under development. Another commenter states that if airports, air carriers, and ATC were to coordinate their efforts, it would be difficult to implement any programs before the November 1, 1992 deadline.

Some commenters provide specific recommendations for airports and ATC in implementing deicing programs. One commenter says that airports should make provisions for end-of-the-runway deicing to reduce delays. Another says that the FAA should review ATC responsibilities related to flow times, take-off and landing sequencing in adverse weather conditions.

FAA Response

The FAA agrees that involvement of airport operators and ATC is essential to increasing aviation safety in potential icing conditions. Officials in FAA's Flight Standards Service have been working with ATC and FAA's airport offices throughout the course of this rulemaking. This effort is short term to ensure the maximum possible effort for this winter and long term to deal with actions that cannot be accomplished quickly. The FAA also agrees that certificate holders should coordinate their deicing/anti-icing programs with the operators of each specific airport where they will be using their deicing program.

Prevention of Delays

Some commenters express concern about delays resulting from deicing, checking, and re-deicing. This could create gridlock in air traffic flow and be extremely costly to airlines and inconvenient for passengers. Commenters also argue that the proposed rule poses a disadvantage to domestic carriers who would face delays from checking requirements while foreign carriers will be able to depart without such delays; this, it is suggested, would create competitive inequality for U.S. carriers and lead to an erosion of revenue for these carriers. Alternatively, one commenter says that the proposal would force foreign airports to deal with disruption to traffic flows due to U.S. carrier deicing and check requirements; this could result in discrimination against U.S. carriers.

Two commenters recommend utilizing gate-hold procedures to reduce delays between deicing and takeoff. In addition, one commenter recommends that the FAA re-examine the Enroute Spacing Program to allow aircraft to be released immediately when cleared.

One commenter recommends that to reduce competitive inequality the FAA should hold discussions with Joint Airworthiness authorities about compatible standards and practices.

FAA Response

The FAA recognizes that there may be some additional delays resulting from this rule if airplanes return for redeicing or if a pretakeoff contamination check is accomplished. However, most weather-related delays already occur under the existing rule and, as discussed under the "Economic Evaluation" section of this preamble, the FAA does not believe that the delay costs associated with this amendment will be significant. As discussed in the preamble to the proposed rule, while this rule does not directly affect operations of foreign air carriers, the FAA will continue to work aggressively with other nations' civil aviation authorities and will request that ICAO initiate a review of pretakeoff deicing and checking procedures used by all air carriers. In the meantime, as is discussed more fully under "International Trade Impact Statement," the FAA does not believe that the competitive disadvantage to U.S. operators is significant.

Underwing Frost

Several commenters express concern that the proposed rule language could lead to rescinding previous FAA policy that allows takeoffs with a small amount of frost on the underside of the wing in the area of fuel tanks when consistent with the aircraft manufacturer's operating and servicing instructions.

FAA Response

The FAA does not intend to change its policy of permitting takeoff with small amounts of frost on the underwings of airplanes caused by cold soaked fuel within aircraft manufacturer established limits accepted by FAA aircraft certification offices and stated in aircraft maintenance manuals and aircraft flight manuals. Language has been added to the final rule to make it clear that takeoffs with frost under the wing in the area of the fuel tanks are

permitted if authorized by the Administrator. Affected certificate holders should include the type of aircraft involved and justification for these operations, including manufacturer supplied data showing how these operations are safely accomplished, as part of their proposed deicing program.

Program Implementation

Some commenters state that implementation of deicing programs should be done by a central organization to ensure uniform standards. One supports an industry-wide solution, rather than delegating the approval of each program to the local level. One commenter states that the rule provides too much discretion to local FAA offices in approving deicing plans which could cause operational discrepancies among carriers and airports. This commenter recommends that the FAA provide comprehensive guidance to local offices in developing deicing programs. Another commenter says that, because the timeline for compliance is so short, implementation should be flexible and determined locally.

Another commenter recommends that the FAA monitor implementation of FAA-approved deicing programs this winter. In addition, the FAA should continue to address actions designed to reduce the time that airplanes are exposed to icing conditions between deicing/anti-icing and takeoff (e.g., aircraft design, deicing/anti-icing technology, air traffic control).

Another commenter recommends that the FAA provide inspectors for post-deicing checks and this could be funded by the aviation trust fund. One commenter is against locating deicing program requirements in current operations specifications; minor modifications to deicing practices will require specifications amendments, resulting in delays. This commenter recommends that FAR 121.629 mandate that air carriers have approved programs in place and follow these programs (which would be monitored by each carrier's principal operations inspector). Details of an approved deicing program should be outlined in an Advisory Circular that facilitates getting as much implemented as possible by November 1, 1992. Several other commenters support using an advisory circular either in addition to or instead of a rule.

One commenter discusses the safety problems for passengers who must walk through deicing fluid in ramp areas to board aircraft; this could also damage the interior of the aircraft.

Two commenters discuss their products related to deicing and express interest in collaborating with the FAA in using these products. One product is a detection system for overwing clear ice or measurement of contamination on the surface. Another product is an anti-icing product. This latter commenter also maintains that the proposed rule could adversely affect its patent as well as its ability to compete with foreign producers of Type II fluids; and that the FAA should shape the rule so as not to diminish the value of the patent nor impede the marketing of the product.

FAA Response

The FAA has conducted and continues to provide training in this area for all principal operations inspectors and principal maintenance inspectors. In addition to this training to facilitate the review of certificate holder programs, the FAA has appointed regional coordinators who will assist local inspectors and who will forward issues to the FAA Headquarters that cannot be resolved locally. The FAA, besides developing Inspector Handbook guidance, is also developing an Advisory Circular that provides guidance to certificate holders and principal inspectors.

The FAA will be closely monitoring the implementation of this rule and, as stated previously, will continue to work with all involved parties to smoothly implement the requirements of this rule.

As previously stated in this preamble, it is ultimately the responsibility of each pilot in command to determine whether his or her aircraft is free of contamination and thus airworthy. The responsibility for checks after deicing cannot be delegated to the FAA. Each certificate holder's operations specifications should refer to the specific locations in the certificate holder's manuals that contain its approved deicing/anti-icing program. The whole program does not have to be physically included with the certificate holder's operations specifications. Finally, ACs provide examples and one method of complying with regulations. They are not mandatory.

The ramp area safety issues mentioned should be addressed in each certificate holder's program.

The FAA encourages innovation to solve the problem of identifying contamination on the aircraft surface and § 121.629(c)(3)(ii) provides an alternate procedure for obtaining approval by the Administrator of an appropriate innovative approach. Also, the FAA does not recommend which type of fluid a certificate holder should use, Type I or Type II, and does not recommend any particular company's product in this rule.

As stated previously in the "Applicability and Justification" section of this preamble, the FAA has determined that all part 121 turboprop aircraft should be included in this rulemaking and will continue to analyze operations under other parts to determine if future rulemaking is required.

Miscellaneous

Other general comments about the proposed rule include discussions of the accidents cited in the NPRM. One commenter says that NTSB accident statistics related to icing problems do not address the thousands of successful takeoffs made annually during icing conditions. Another commenter says that the NTSB investigation of the 1982 Air Florida accident shows that improper engine thrust was the main cause and that perhaps icing problems alone were not the problem. Another commenter says that in the section of the NPRM entitled "Part 121 Passenger Carrier Benefits Section," paragraph (2) should clarify that the five mentioned accidents involved large passenger-carrying air carriers.

One commenter says that the FAA should include in the docket any studies that it relied upon to reach its conclusions in the NPRM, such as the conclusion that non-slatted wing aircraft are more susceptible to lift loss than slatted aircraft.

FAA Response

The NTSB's recommendations are based on its accident investigations and its other studies and thus do, in effect, consider successful operations. Also the NTSB in its investigation of the Air Florida accident cites as one of the probable causes the flight crew's decision to take off with snow and ice on the aircraft's airfoil surfaces.

The FAA has included in the docket a summary of wind tunnel tests of hard leading edge wings and slatted leading edge wings completed by the NASA Lewis Research Center, though the difference in accident history of these designs may not be fully explained by design differences. Pilot techniques, including rotation rates and angles, are also important factors to be considered in assessing stall propensity, along with the rotation speed and the initially computed climb speed. One factor alone has not been isolated as the major explanation for differences in accident rates which have been experienced.

Cost

The comments in this section are separated into subject categories: Delay costs, deicing fluid costs, international trade impact, training and personnel costs, and other costs.

Comments on Delay Costs

One commenter states that the cost of implementing the proposed rule should be calculated including input from the part 121 air carriers and should include estimated delay costs using air carrier data and input.

Another commenter states that checking the upper surfaces of a B–747 would be impractical, would cause delays, and would impose severe restrictions on the departing aircraft flow. The commenter also states that such a requirement would preclude their ad hoc charter operations from many airports during adverse weather, thus imposing a severe economic penalty on them.

Another commenter states that some elements of the proposed rule, as confirmed by the FAA in the NPRM, may not be amenable to accurate cost analysis. The impact on flight delays is difficult to project on short notice, and would require a study beyond the range of the 15-day comment period provided by FAA. The commenter describes a worse case scenario in which approved deicing programs are not completed, and numerous carriers at a large airport are attempting to perform external checks on a 5-minute cycle. This would effectively close the airport under conditions which were previously negotiable. The expense of airport closures is extremely high, as passengers have to be accommodated over a period of a day or more, and airport and crew rotations have to be unscrambled.

A commenter states that they are unable to provide cost data related to specific provisions of the rule in the time permitted for comments. They point out the differences between passenger carriers and integrated express carriers such as UPS. A single aircraft missing the national sort requires them to charter up to thirty executive jets to make their service commitment. In light of the nature of the business, they believe the FAA cost estimates are grossly understated.

One commenter stated that airports will experience various degrees of gridlock from airplanes requiring external checks or returning to be deiced. The increase in delays is estimated to be ten fold during freezing precipitation. During 1991/1992, the commenter claims it suffered 802 deicing delays. It estimated that 700 of these occurred during periods of precipitation. They believe that this could explode to 7,000 delays in 1992/1993. These delays could produce external checking and equipment costs of $30 million.

FAA's Response

The NPRM requested cost information, including estimated delay costs, from part 121 air carriers. Reliable information from commenters is considered in this evaluation.

The proposed rule could increase delays by requiring longer and more detailed inspections of airplane surfaces. However, it would provide flexibility by allowing either the use of an approved deicing program or an outside check five minutes before takeoff. In some instances, the proposed rule could decrease delays. For example, if the pilot decides to return for re-deicing, an outside check could reveal that the airplane surface is actually clear of ice, thereby avoiding a needless deicing.

There are two types of delays: (1) Delays due to the existing rule and (2) delays due to the proposed rule. In either case, an airplane may not take off if its surface is contaminated. The cost information that the commenter provided does not differentiate between these two types of delays, nor does the commenter explain how it arrived at these estimates.

Consequently, the FAA is not able to respond to the specific cost estimates provided by the commenters. However, the FAA does agree with the commenters to the extent that their estimates demonstrate that delay costs could increase.

Deicing Fluid Costs

One commenter believes that the costs are very conservative and do not present a true total, and that, regardless of the cost, the traveling public will ultimately pay for it. The commenter indicates that delays are the same regardless of the type of fluid since delays could result from weather, staff, equipment failure, etc." Also, the type fluid used does not matter because ground holdover times can expire with either fluid. Type II fluids may be beneficial for long term/overnight requirements, but is very costly and impractical for the average ground time of a turn-around type operation that is less than 3-4 hours on the ground.

Another commenter states that carriers have committed from $1–5 million each for plans to acquire new anti-icing equipment and convert old deicing equipment for application of Type II fluids. In addition, the total cost of Type II fluids applied is 3–4 times the cost of Type I fluids. The commenter also states that of the two glycols (ethylene and propylene glycol), ethylene glycol appears to be the most cost effective product due to the fact that there are more suppliers of ethylene glycol; therefore, the competitive influences in the marketplace dictate a lower cost. Ethylene glycol is an inherently less costly molecule to manufacture than propylene glycol. Consequently, by focusing on overall cost effectiveness, and because the possibility exists that propylene glycol may be applied in undiluted form in circumstances where it is not recommended by the aircraft manufacturer, economic and safety considerations give ethylene glycol a preference.

One commenter believes that the FAA concludes erroneously that this is not a major rule. This commenter believes that the shift from Type I to Type II fluids will increase airline unit fluid costs by the difference in price between Type II and Type I fluids, and may also result in a requirement for increased fluid volume. Competition will be lessened because the FAA's encouragement of the use of Type II fluid will likely inhibit and possibly preclude this commenter's entry into the airline market, thereby negating the competitive restraint which Type I anti-adhesion Airborne 99 would otherwise have on Type II pricing.

In addition to the above problems, the commenter states that the NPRM does not fully address the potential adverse effects specified in 5 U.S.C. 601 which specifies the following additional concerns: Employment, investment, productivity innovation, and the ability of U.S. based enterprises to compete with foreign-based enterprises in domestic or foreign export markets. For example, some deicing fluids have the potential to improve airport productivity by providing prolonged anti-icing protection through prevention of ice adhesion. In the event that aircraft were delayed on the taxiway beyond the nonformation holdover time of their Type II fluids, they would presumably have to be brought back to the deicing facility for another treatment.

The commenter also states that if the FAA promulgates the proposed rule, it will effectively define anti-icing as the use of Type II thickened fluids. This will create a major barrier both to the use of existing alternative anti-icing systems like Airborne 99 and to the development of innovative new anti-icing technologies. Also, the commenter states that if the proposed regulation in any

way unnecessarily impedes the marketing of the commenter's products, foreign suppliers of Type II fluids will receive an improper benefit from the reduced domestic investment.

FAA's Response

The FAA disagrees with the commenters for several reasons. First, the rule does not mandate the usage of Type II fluid. Second, the holdover tables of the final rule do not differ from the current industry standards enough to cause a significant shift in deicing fluid usage. Third, the FAA recognizes the increasing acceptance of Type II fluid among U.S. carriers. This acceptance is the result of an already wide acceptance by European and Canadian carriers. One of the advantages of using Type II fluid is its longer holdover time. Another advantage is that less fluid is required than Type I fluid.

International Trade Impact

A commenter states that unlike the reasonably uniform levels of safety and economic cost sharing between domestic and foreign air carriers in the aircraft security program, no such attempt has been made with this program. This virtually assures inequalities in airline costs not to mention foreign government cooperation. This issue will pose significant problems for U.S. supplemental air carriers attempting to take advantage of opportunity markets. Accordingly, alternatives must be found to prevent U.S. carriers from suffering even further from regulations of this type.

The commenter further argues that in the International Trade Impact discussion of the docket, a case is made that average costs would increase approximately 4 cents per round trip ticket. Although this might be true for a carrier operating to a scheduled location where ongoing training would be possible, this is not true for operators taking advantage of unscheduled opportunities. In these instances the costs could be prohibitive. As an example, a typical round trip cost between the East Coast and Europe might be $36,000. If it were possible, and enough lead time given, an individual could be sent ahead of the aircraft, conduct training, and assure compliance with the current NPRM. The cost of compliance would be approximately $2,500, or approximately a 14 percent increase. This increase would pose a significant economic burden on a carrier that might operate to a particular location once every 2–5 years. This seems unreasonable and contrary to the assurances that a "competitive disadvantage" is remote as stated in the NPRM.

Another commenter questions the reasoning that domestic carriers should bear the training and equipment costs of the proposed rule, while foreign carriers do not.

Another commenter states that the FAA misunderstands the competitive issues involved in a rule exempting foreign carriers. As suggested above, pretakeoff contamination checking requirements imposed by the rule could introduce serious delays for U.S. carriers. If, under these circumstances, foreign carriers could depart from the same airport without the delays and confusion, passengers and shippers would rush to those carriers if consistent with their travel or shipping needs.

They go on to say that it is not the out-of-pocket costs of the proposed rule which make the most significant difference in international competition; it is the potential perception by laymen that foreign carriers can safely depart without delay under conditions requiring domestic carriers to take delays. The unfair bias will apply under the proposal both at domestic origins as well as foreign ones. The FAA must not create this inequality leading to erosion of U.S. carrier revenues.

FAA's Response

While it is true that foreign air carriers would not incur costs imposed by the proposed rule, they would hardly have a competitive advantage. This is because the cost of compliance incurred by U.S. air carriers is expected to be offset by an increase in aviation safety both real and perceived by the flying public. The expected increase of 4 cents in cost of an average international round trip ticket would not be high enough to lower the demand of travel from U.S. and foreign consumers. The United States has always been perceived as pioneers in aeronautical engineering and especially aviation safety. The rule continues that track record.

In addressing another comment, any air carrier engaged in non-scheduled services does not compete in the same market as scheduled air carriers. Therefore, no adverse impact is expected to be incurred by U.S. scheduled air carriers.

Training and Personnel Costs

One commenter argues that during winter months, they visit 50 cities in North America that are subjected to severe, moderate, or light winter conditions. They argue that the cost per day to send a qualified person to verify that each deicing contractor meets the requirements of the proposed rule is at or above $500 per day not including travel expense.

One commenter states that their flight crewmembers receive ground training on the subjects of deicing/anti-icing and the effects of ice, snow and frost on aircraft performance. These subjects are included in all of the initial and recurrent courses in their approved training program.

A commenter states that up to 20,000 personnel would be covered by the training and qualification testing requirement at the larger companies. This commenter also questions the FAA estimate of training costs. The proposed rule could require initial and recurrent training and qualification costs for over 100,000 employees. A first estimate is one-half day of training for each employee each year, which would indicate over $20 million per year. The present value of 10 years training costs at this rate would exceed FAA's estimate of total cost.

One commenter estimates the annual cost of additional training for flight crewmembers and other affected personnel, as required by the rule, to be $2.5 million.

FAA's Response

The NPRM does not require that each air carrier send a qualified person to verify that each deicing contractor meets the requirements of the proposed rule, therefore, the air carrier would not be required to incur this cost.

Information available to the FAA indicates that air carriers already provide initial and recurrent training in the subject areas of ground deicing and anti-icing. The FAA calculated the incremental cost of added training associated with the requirements of the proposed rule.

The FAA has calculated an initial cost of training for the proposed rule. In subsequent years, however, the added training should be incorporated as a part of the current training that is already taking place. The FAA does not expect any additional future training cost because air carrier employees are routinely provided on-going training to keep them up to date on a number of aviation related issues and practices. The additional procedures required by this rule will likely be a continuation of existing training.

Other Cost Comments

A commenter argues that gate returns for re-deicing will be extremely costly as equipment needed for re-deicing will be in use. This same commenter questions whether the FAA considered a percentage factor of accidents to actual

take-offs made in the 15 year time frame involving ice, snow, and frost or freezing conditions.

Another commenter argues that the FAA has clouded the main issue of deicing/anti-icing costs with cost diagnostics, international trade impact, etc. They argue that these issues are very small contributory items and should not be the concern of the FAA.

One commenter believes that it will cost at least $450 million "to deal with space and environmental issues at the 30 airports required by the FAA to submit de-icing plans."

FAA's Response

The cost of any airplane returning for another re-deicing is not a cost of the current rule since it mandates that no aircraft may take off if ice, snow, or frost is adhering to the surfaces. The FAA recognizes that the proposed rule could result in more airplanes being redeiced due to improved detection procedures. However, the cost of these additional redeicings is difficult to estimate.

There may be some costs associated with dealing with space and environmental issues. The FAA is not convinced that these estimates would be considered reasonable because many variables will affect the final cost outcome. For example, some air carriers are already shifting to Type II fluids and would have switched regardless of the final rule. In addition, flow control procedures at some airports might negate the need for additional space. That is, airplanes as a result of this final rule may line up in queue at the gate instead of the taxiway.

Finally, the FAA is required by mandates from Congress, the President, and the Office of Management and Budget to address the impact that FAA regulations have on small businesses and on international trade. Thus, these topics are very much the concern of the FAA.

Rule Language Changes

The following is a paragraph by paragraph description of significant changes in the final rule language that have been discussed in this preamble. In addition minor editorial changes have been made.

In § 121.629(b) the following sentence has been added: "Takeoffs with frost under the wing in the area of the fuel tanks may be authorized by the Administrator."

In § 121.629(c) the following changes are made:

In paragraph (c)(1)(i) the words "at an airport" are deleted.

In the introductory paragraph of paragraph (c)(3) the words "times, specific to each aircraft type" are deleted and the word "timetables" inserted; the words "the final application of" are added to the description of holdover times; and the words "wings, control surfaces, propellers, engine inlets, and other critical surfaces" are deleted.

In § 121.629 (c)(3)(i) the word "inspection" is replaced by "contamination check" and in § 121.629(c) (3)(i) and (ii) the phrase "as defined in the certificate holder's program" is inserted after "critical surfaces." In § 121.629(c)(3) (i), (ii), and (iii) the words "propellers, engine inlets" are deleted.

In § 121.629(c)(4) the term "pretakeoff check" and the following definition of this term are added: "A pretakeoff check is a check of the aircraft's wings or representative aircraft surfaces for frost, ice, or snow within the aircraft's holdover time." In addition in paragraph (c)(4) the term "pretakeoff inspection" is changed to "pretakeoff contamination check."

Environmental Analysis

This rule is a federal action that is subject to the National Environmental Policy Act (NEPA). Under applicable guidelines of the President's Council on Environmental Quality and agency procedures implementing NEPA, the FAA normally prepares an environmental assessment (EA) to determine the need for an environmental impact statement (EIS) or whether a finding of no significant impact (FONSI) would be appropriate. (40 CFR 1501.3; FAA Order 1050.1D appendix 7. par. 3(a)). In the NPRM the FAA invited comments on any environmental issues associated with the proposed rule, and specifically requested comments on the following: (1) Whether the proposed rule will increase the use of Type I deicing fluid, (2) whether the proposed rule will encourage the use of Type II deicing fluid, (3) the impact, if any, of using these deicing fluids on taxiways "just prior to takeoff," and (4) containment methods currently used that can be adapted to other locations on an airport. Only a few commenters address these environmental issues and most of these commenters focus more on the effect of Federal, State, and local environmental requirements and the lack of local facilities, than on the questions of the potential environmental impact of deicing fluids. A summary of the comments received, the FAA's response and the findings of the FAA's Environmental Assessment follow.

Some commenters say that both Type I and Type II fluids cause environmental problems. One commenter says that the rule would require increased use of Type I fluids to clean aircraft wings prior to Type II application, and that this combination is environmentally hazardous.

One commenter questions what it characterizes as discussions in the United States that Type II fluids are less environmentally acceptable than Type I fluids since, as this commenter points out, both are based on glycols.

Another commenter questions whether airports have the facilities to collect and recycle deicing fluids at takeoff points.

Two commenters believe that environmental constraints will inhibit the operation of remote deicing facilities and recommend that the FAA seek relief from EPA reporting requirements for remote facilities for one to two years. Alternatively, one commenter recommends that the FAA petition the EPA to raise the reportable quantity of ethylene glycol (Type I) from one pound to 1,000 pounds or to exempt the airline industry from all ethylene glycol reporting due to critical safety requirements.

Other commenters also recommend that air carriers be exempt from state and local environmental regulations, which may be even more restrictive than EPA regulations.

One commenter recommends that current environmental constraints be reviewed and additional flexibility for deicing operations be provided in order for the rule's objectives to be met.

One commenter provides recommendations to reduce the discharge of deicing fluids into streams and states that an environmental impact statement should be required where such discharge seems likely.

FAA Response

An Environmental Assessment (EA) that supports a Finding of No Significant Impact (FONSI) is included in the docket for this rulemaking. The EA discusses in detail the potential effect of this rule and addresses in general terms the issues raised by the comments summarized above. The following discussion addresses the major issues raised by commenters.

Presently § 121.629(b) states that no person may takeoff an aircraft when frost, snow, or ice is adhering to the wings, control surfaces, or propellers of the aircraft. As the NPRM preamble, this preamble, and the EA point out, this rule is necessary because several accidents, and recommendations of the 1992

Conference on Airplane Ground Deicing, which was held as a result of these accidents, indicate that under present procedures, the pilot in command may be unable to determine effectively whether the aircraft's critical surfaces are free of all frost, ice, or snow prior to attempting a takeoff. This rule addresses this problem by requiring increased training of appropriate personnel, the use of holdover times, and additional checks of the aircraft's surfaces, all of which are to ensure that an aircraft does not take off if critical aircraft surfaces are contaminated. In essence, this interim final rule, which is necessary before the winter of 1992–1993, requires certain certificate holders to develop a program that will provide the pilot in command with more complete information which he or she needs for deciding whether takeoff can be safely accomplished. Concern with the environmental impacts of this rule emanate principally from the chemical composition of deicing fluids e.g. ethylene glycol has been listed as a hazardous air pollutant under Title III of the Clean Air Act Amendments of 1990. While this rule does not mandate additional use of either Type I or Type II fluids, it could accelerate somewhat the existing trend for U.S. air carriers to follow the European and Canadian practice of increased use of Type II fluids because of the longer holdover times associated with Type II fluids. However, although Type II fluid has a higher biochemical oxygen demand (BOD) that impacts surface water and the fish and other marine life than Type I fluid, it requires approximately 50% less fluid to effectively deice and anti-ice a typical aircraft. Also the use of Type II fluids will significantly reduce the number of redeicings that would be required if Type I fluids were used. These factors along with improved ATC and airport procedures should reduce the use of deicing/anti-icing fluids over the long term.

With respect to the potential environmental effects of both type fluids, as the EA discusses, because of their low volatilities, low ecotoxicities, low toxicity to humans, and biodegradibility, no additional impacts are expected over those already experienced for deicing/anti-icing operations carried out under the current regulations.

With respect to the issues of reporting requirements, relief from state and local environmental requirements, and the availability of collection/recycling facilities, certificate holders that presently use deicing fluids and the operators of airports at which these fluids are used must already comply with all of these requirements when they are applicable. Since this rule requires no additional use of fluids than currently required under the existing clean aircraft requirement, if there are increases in the use of fluids that trigger environmental requirements, those requirements must be met by the airport operator, certificate holder, or other appropriate party, as they would under the present rule. If any of these requirements, or the lack of facilities limit the use of deicing/anti-icing fluids, the result would be that the certificate holder would have to find another means of ensuring that the critical aircraft surfaces are clean before a takeoff is attempted or discontinue operations. Nonetheless, as part of its long term efforts, the FAA will work with certificate holders and with airport operators to monitor the actual and potential environmental effects of this rule and help address any problems that might arise.

Paperwork Reduction Act

Information collection requirements in the amendment to § 121.629 have been approved by the Office of Management and Budget (OMB) under the provisions of the Paperwork Reduction Act of 1980 (Pub. L. 96–511) and have been assigned OMB Control Number 2120–0567.

Regulatory Evaluation Summary

This section summarizes the regulatory evaluation prepared by the FAA. The regulatory evaluation provides more detailed information on estimates of the potential economic consequences of this rule. This summary and the evaluation quantify, to the extent practicable, the estimated costs of the rule to the private sector, consumers, and Federal, State, and local governments, and also the anticipated benefits.

Executive Order 12291, dated February 17, 1981, directs Federal agencies to promulgate new regulations or modify existing regulations only if potential benefits to society for each regulatory change outweigh potential costs. The order also requires the preparation of a Regulatory Impact Analysis of all "major" rules except those responding to emergency situations or other narrowly defined exigencies. A " major" rule is one that is likely to result in an annual effect on the economy of $100 million or more, a major increase in consumer costs, or a significant adverse effect on competition.

The FAA has determined that this rule is not "major" as defined in the executive order. Therefore, a full regulatory impact analysis, which includes the identification and evaluation of cost-reducing alternatives to the rule, has not been prepared. Instead, the agency has prepared a more concise document termed a "regulatory evaluation," which analyzes only this rule without identifying alternatives. In addition to a summary of the regulatory evaluation, this section also contains a final regulatory flexibility determination required by the 1980 Regulatory Flexibility Act (Pub. L. 96–354) and an international trade impact assessment. If the reader desires more detailed economic information than this summary contains, then he or she should consult the regulatory evaluation contained in the docket.

Costs

This rule will increase costs to the industry and to society in five ways. First, airlines will have to develop a deicing program and the FAA will have to approve it. Second, flight and ground crews will have to be trained for and tested in the new procedures. Third, pretakeoff contamination check procedures will have to be implemented. Fourth, airlines, as an option, could purchase additional deicing equipment to deice closer to the takeoff point. Finally, air carriers and passengers could experience an increase in delays.

The total costs are separated into two categories—small and large air carriers. This was done because this rule will impact small carriers differently than it will large carriers.

Small and Large Part 121 Air Carriers

Small carriers are defined as those that own or operate nine or fewer aircraft under part 121. FAA information indicates that of the 53 part 121 air carriers, 31 are large and 22 are small. Of the 4,151 airplanes that are operated under part 121, small air carriers operate approximately 114 or 2.7 percent and large air carriers operate 4,037 or 97.3 percent.

The number of employees at large and small part 121 air carriers was estimated by allocating the total number of employees based on the number of airplanes that these carriers operate. Based upon information provided by the Airline Transport Association (ATA), approximately 20,000 pilots, 30,000 copilots, 10,000 engineers, and 20,000 mechanics work for part 121 air carriers. If the number of employees at large and small carriers is directly related to the number of airplanes that air carriers operate, then large part 121 carriers have 97.3 percent of the total number of

employees in each category and small carriers have 2.7 percent.

Deicing Program

The FAA expects that the industry will develop a generic deicing program as a normal course of business. This generic industry program is expected to have an initial development cost of $7,200. After the program is developed, each air carrier will likely modify the program for its own operations. The initial cost of the program refinement to all 31 large air carriers will be $224,000 and $5,100 to all 22 small air carriers.

Each air carrier's program will have to be approved and reviewed by the principal operations inspectors assigned to each of the air carriers. The FAA estimates that its initial or first year cost will be $15,300 for the review of all programs.

Training and Qualification Testing

Each certification operator that has a deicing program will be required to provide training for all personnel involved with deicing. The FAA estimates that the initial cost of training will be $8.04 million for large air carriers and $80,400 for small air carriers for a total of $8.1 million. Recurrent training is also required. However, the incremental cost of recurring training will be minimal because the air carrier employees are routinely provided on-going training and materials to keep them up to date on a number of aviation related issues and practices.

This final rule also requires testing for flight crewmembers and qualification for all other personnel concerning the specific requirements of the program and each person's responsibilities and duties under it. The recurrent qualification testing will require an additional 15 minutes per individual. The total annual cost will be $2.03 million ($2.01 million to large firms plus $20,109 to small firms). The initial cost associated with qualification testing is expected to be minimal.

Pretakeoff Contamination Checks

Pretakeoff contamination checks will be implemented under this rule. The program must provide that takeoff after the expiration of the holdover time will be permitted only when one of several conditions such as a pretakeoff contamination check takes place. For purposes of this analysis, the check will be made by individuals who operate the additional deicing equipment that will be purchased for redeicing airplanes at the runway. Thus, the cost of a check is incorporated in the labor costs associated with the additional deicing equipment.

Additional Deicing Equipment

Another cost component associated with the rule is deicing equipment, which consists of the capital equipment, operating and maintenance costs, and labor costs. The total one-time cost of the deicing equipment for all affected airports is estimated to be $10,720,000 to provide 67 portable deicing stations at 28 airports. The total recurring annual maintenance and operating costs at all affected airports will be $1,288,400. The FAA estimates the total recurring annual labor cost at all affected airports to be approximately $139,500.

The total undiscounted cost associated with deicing equipment over the next 10 years will be $25 million. This 10 year-cost is comprised of a one time cost of $10,720,000 for capital equipment, $12,864,000 maintenance and operating costs, and $1,395,000 in labor costs.

Delay Costs

In the NPRM, the FAA stated that delays could not be reliably estimated at that time. The Agency then presented a general step-by-step procedure to estimate potential delay costs. Comments from the industry were not useful in calculating these costs. Even though no additional data have been made available, the FAA has made an estimate of potential delay costs imposed by this rule. This estimate, however, as will be discussed later, should be viewed with its limitations.

As stated previously, after a holdover time has been exceeded a pretakeoff contamination check is one of the options available under this rule. Hence, the rule could increase air carrier delays during ice and snow conditions. Increased delays will increase costs to air carrier operators and passengers.

The FAA expects the pretakeoff contamination check to require between 5 to 15 minutes to complete. The regulatory evaluation assumes for the purposes of this estimate a delay of 10 minutes. The value of passenger time is estimated at $39 per passenger per hour and air carrier operating costs at $1,800 per hour. The delay cost estimate was based on 49 of the largest U.S. airports, for which the FAA had both icing and departure data. These 49 airports account for approximately two-thirds of part 121 operations.

The FAA has estimated a range of air carrier delay costs based on different assumptions about the number of aircraft receiving a pretakeoff contamination check. These estimates are based on data from the past three winters on delays that occurred during snow and ice conditions at U.S. airports. The lower of the two estimates measures delay costs to air carrier operators and passengers who were delayed 20 minutes or more due to snow and ice conditions. By looking only at departures with snow and ice delays of 20 or more minutes, the FAA tried to estimate those airplanes that exceeded their holdover times and would then undergo a 10 minute pretakeoff contamination check. The higher estimate assumes that all departures during snow and icing conditions experience a 10 minute pretakeoff contamination check delay.

Scenario One: This scenario represents the low end of the delay cost estimate. It measures delay costs to air carrier operators and passengers when all part 121 airplane departures that are delayed 20 minutes or more due to snow and ice conditions conduct a pretakeoff contamination check. Each pretakeoff contamination check is assumed to take 10 minutes. The 10-year discounted air carrier delay cost, assuming all aircraft experiencing a 20 minute delay during snow and ice conditions receive a pretakeoff check, is $15 million (discounted).

Scenario Two: The second scenario represents the high cost estimate. It measures delay costs to air carrier operators and passengers due to 10-minute pretakeoff checks for all part 121 departures during icing or snowing conditions. This estimate of the incremental air carrier delay costs is $41 million (discounted).

These estimates omit three critical factors that are needed to determine the total impact of the rule. First is the potential system impacts or "ripple effect" on air carrier delays. The FAA attempted to estimate the cost of this effect; however, it was unsuccessful due to the extreme complexity. Second, the potential decrease in delays due to a shift towards Type II deicing fluids is difficult to estimate because the data is not available to make this estimate. The third factor omitted from the delay cost estimate is the delays due to ice adhering to the surfaces of the aircraft. The estimated number of existing delays represents delays that occurred due to snow and ice (e.g., runway closures, poor braking action, etc.). The presence of delays due to snow and ice does not necessarily mean that snow or ice was adhering to the surfaces of the aircraft.

Re-deicing Delay Costs

The costs and benefits of this rule are a result of the increased checking for and detection of ice adhering to the surface of an airplane. This increased detection could result in additional

delays due to redeicing, though redeicing of contaminated airplanes is already a result of the existing rule. The exact number of delays that occurs as a result of having to return for redeicing cannot be determined at this time due to lack of data. The data needed to measure this cost would be the number of air carriers that have taken off with ice contamination. The FAA has no such measure. However, since Scenario Two above assumes that all future departures for part 121 airplanes will be delayed due to the new procedures of this rule, some of the potential re-deicing costs have been accounted for. In short, this scenario assumes that there would be delays due to pretakeoff contamination checks for all departures during ice and snow conditions. This is a worst case scenario for three reasons. First, not all airplanes would undergo such pretakeoff contamination checks because they would depart before their respective holdover times expire. Second, some airplanes would have alternate procedures to determine if the aircraft is free of contamination. Third, some aircraft would return for redeicing/anti-icing rather than accomplish a pretakeoff contamination check.

The total cost of the final rule is estimated to be between $52 million and $78 million (discounted). Of this total, air carriers would incur non-delay costs of $37 million and delay costs of between $15 million and $41 million.

Benefits

The benefit of the rule is enhanced safety. This safety will be achieved by ensuring that airplanes do not take off with contamination on the surfaces. The analytical approach employed to estimate the potential monetary benefits (safety) of achieving this goal focuses on two existing practices. First, the final rule will implement procedures (pretakeoff contamination checks) that will help prevent airplanes from taking off with ice on surfaces of the aircraft. Second, the final rule will ensure that aircraft that need deicing are actually deiced. Most of the benefits would come from the improved checking procedures (i.e., a formalized deicing/anti-icing procedure that includes standardized holdover tables). Under the current rule, the pilot would perform a visual contamination check before departure. Under this rule, the pilot will spend more time with better information to correctly ascertain whether ice is or is not on the surfaces of that aircraft. The remaining benefits will be derived from deicings due to contamination detected at the time of the check. The FAA cannot estimate the frequency of these occurrences.

The FAA expects the rule to generate total potential safety benefits over the next ten years estimated at $218 million ($1991). On a discounted basis, total potential benefits will amount to an estimated $131 million. This discounted total estimate of benefits is comprised of $125 million for significantly reducing the likelihood of ice-related accidents for passenger-carrying part 121 airplanes and $6 million for part 121 cargo airplanes.

Part 121 Passenger Carrier Benefits

Under the current rule, it is the responsibility of the pilot to decide whether ice, frost, or snow has accumulated on the structure of an airplane. This decision can be very difficult to make, especially when the airplane is sitting at the end of a runway waiting to take off during inclement weather. It is at these times that the likelihood of the pilot making the wrong decision is greatest. The benefits of the rule will come from reducing the likelihood of a pilot making the wrong decision.

Over the past 15 years, there have been five passenger-carrying air carrier accidents where ice, frost, or snow accumulations on the airplane was the primary factor. These accidents resulted in 135 fatalities and 66 serious injuries. In addition, four of the airplanes were destroyed and the other sustained substantial damage.

Based on historical accident and casualty rates, the FAA expects that over the next 10 years, approximately 4 accidents would occur, with 131 fatalities and 64 serious injuries. The present value dollar benefits of preventing these accidents and casualties is estimated to be $166 million (discounted 10 years, 10 percent).

The FAA has attempted to develop a rule that will be effective in preventing all accidents by incorporating program development, training, testing, capital equipment, maintenance, etc. There is some uncertainty, however, as to how effective these components will be. It is conceivable that some aircraft could pass through the system due, in part, to human error and adverse whether conditions, thereby, reducing the effectiveness of the rule. While the actual effectiveness rate would be lower than 100 percent, the FAA estimates that a rate of 75 percent would reflect the reality of correcting a problem that is influenced by a multitude of factors (whether, human error, etc.). Multiplying the $166 million benefits by the 75 percent effectiveness rate results in adjusted benefits of $125 million ($166 million × .75).

Part 121 Cargo Carrier Benefits

The rule will also potentially reduce accidents among large part 121 cargo aircraft. Over the past eight years, there have been three accidents involving large cargo aircraft. These three accidents resulted in two facilities and two serious injuries. Two of the aircraft were substantially damaged and one was destroyed.

Based on these rates the FAA estimates that over the next ten years, there will be approximately 2 accidents, 1 fatality, and 1 serious injury. The estimated value of preventing these accidents is estimated to be $8.4 million (discounted). Multiplying the $8.4 million in cargo benefits by the 75 percent effectiveness rate results in adjusted benefits of $6 million ($8.4 million × .75).

Summary of Benefits

In conclusion, the rule will enhance air carrier safety under conditions of ground icing. The rule will reduce pilot error related to taking off with ice on the airframe by using holdover times and pretakeoff contamination checks. The rule is expected to generate potential total part 121 passenger and cargo carrier benefits of $131 million ($125 million + $6 million).

Benefit-Cost Comparison

The present value cost of the rule, which now includes delay costs, is estimated to range between $52 million and $78 million over the next 10 years. These costs also include program development, training, qualification testing, and capital expenditures. These estimates also do not include the cost of overseas operations.

The benefits of the rule are estimated to be $131 million (discounted) over the next decade. These benefits are derived from preventing accidents due to reduced risk during ground icing conditions.

While the FAA has estimated the cost of delays, it was not able to estimate the ripple effect of those delays nor the effect of increased usage of Type II fluids. However, if the present value cost of the ripple effect of delays ranges between $53 million and $79 million, this rule will still be cost beneficial.

International Trade Impact

The rule is not expected to have a significant incremental impact on international trade. This assessment is based on the belief that while U.S. part 121 operators are expected to incur total

compliance costs of $122 million (undiscounted), they will not be placed at a competitive trade disadvantage.

The average cost of an international round trip airplane ticket is approximately $650. With a potential average cost increase of 4 cents per round trip ticket representing less than one-hundredth of a percent of the total cost of a ticket (without consideration of potential delay costs), the likelihood of U.S. air carriers being placed at a competitive trade disadvantage becomes extremely remote. For a now detailed analysis, the reader is referred to the full international trade impact assessment contained in the docket.

Final Regulatory Flexibility Determination

The Regulatory Flexibility Act of 1980 (RFA) was enacted by Congress to ensure that small entities (small business and small not-for-profit organizations that are independently owned and operated, and small government jurisdictions) are not unnecessarily and disproportionately burdened by Federal regulations. The RFA requires regulatory agencies to review rules that may have "a significant economic impact on a substantial number of small entities." A substantial number of small entities means a number that is not less than eleven and that is more than one-third of the small entities subject to a proposed or existing rule.

The final rule potentially impacts operators of an aircraft for hire with nine aircraft owned but not necessarily operated. Of the 53 active U.S. commercial domestic carriers, the FAA has identified 22 that own or operate nine or fewer aircraft under part 121. The FAA has determined that this is a substantial number since all 22 of these small entities are expected to be affected by the final rule.

To determine whether there is a significant cost impact on small part 121 operators, the annualized cost of the rule must exceed the annualized cost threshold established by FAA Order 2100.14A. The threshold established by the Order for scheduled operators of aircraft for hire falls under two categories. The first category is scheduled operators whose entire fleet has a seating capacity of over 60. The cost threshold for these operators is $112,600. The second category is other scheduled operators with seating capacities less than 60. Their cost threshold is $62,900.

The FAA estimated the annualized cost of the rule to an individual small operator to be $20,800. This number was derived by first summing the undiscounted costs for small operators. These costs are:

Initial Program Development	$5,145
Initial Training	80,436
Qualification Testing	180,981
Initial Capital	289,440
Recurring Maintenance & Operating Costs	384,990
Potential Delay Costs ($69,265,870 x .027)	1,870,178
Total Undiscounted Costs	$2,811,170

The delay costs for small entities were estimated by multiplying the potential $70 million in undiscounted delay costs (high end of cost range) by the 2.7 percent of part 121 carriers that are small. This gives a cost of $1.9 million ($69,265,870 x .027).

The total undiscounted cost, $2.8 million, is then divided by the 22 small operators to get a $127,780 average undiscounted cost for any single small operator. This number is then multiplied by a capital recovery factor of .16275 (10% interest rate for 10 years) to give an annualized cost of $20,800.

The $20,800 annualized cost does not exceed the $62,900 cost threshold prescribed above. Thus, the final rule will not impose a significant cost on a substantial number of small part 121 operators.

Federalism Implications

The regulations herein will not have substantial direct effects on the states, on the relationship between the national government and the states, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this regulation will not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

Conclusion

For the reasons discussed in the preamble, and based on the findings in the Regulatory Flexibility Determination and the International Trade Impact Analysis, the FAA has determined that this regulation is not major under Executive Order 12291. In addition, the FAA certifies that this regulation will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. This regulation is considered significant under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979). A final regulatory evaluation of the regulation, including a final Regulatory Flexibility Determination and International Trade Impact Analysis, has been placed in the docket. A copy may be obtained by contacting the person identified under **"FOR FURTHER INFORMATION CONTACT."**

Air carriers, Air safety, Air transportation, Aircraft, Airmen, Aviation safety, Charter flights, Safety, Transportation.

The Amendment

In consideration of the foregoing, the Federal Aviation Administration amends part 121 of the Federal Aviation Regulations (14 CFR part 121) as follows:

PART 121—CERTIFICATION AND OPERATIONS: DOMESTIC, FLAG, AND SUPPLEMENTAL AIR CARRIERS AND COMMERCIAL OPERATORS OF LARGE AIRCRAFT

1. The authority citation for part 121 continues to read as follows:

Authority: 49 U.S.C. App. 1354(a), 1355, 1356, 1357, 1401, 1421–1430, 1472, 1485, and 1502; 49 U.S.C. 106(g).

2. Section 121.629 is amended by revising paragraph (b) and by adding new paragraphs (c) and (d) to read as follows:

§ 121.629 Operation in icing conditions.

* * * * *

(b) No person may take off an aircraft when frost, ice, or snow is adhering to the wings, control surfaces, propellers, engine inlets, or other critical surfaces of the aircraft or when the takeoff would not be in compliance with paragraph (c) of this section. Takeoffs with frost under the wing in the area of the fuel tanks may be authorized by the Administrator.

(c) Except as provided in paragraph (d) of this section, no person may dispatch, release, or take off an aircraft any time conditions are such that frost, ice, or snow may reasonably be expected to adhere to the aircraft, unless the certificate holder has an approved ground deicing/anti-icing program in its operations specifications and unless the dispatch, release, and takeoff comply with that program. The approved ground deicing/anti-icing program must include at least the following items:

(1) A detailed description of—

(i) How the certificate holder determines that conditions are such that frost, ice, or snow may reasonably be expected to adhere to the aircraft and that ground deicing/anti-icing

operational procedures must be in effect;

(ii) Who is responsible for deciding that ground deicing/anti-icing operational procedures must be in effect;

(iii) The procedures for implementing ground deicing/anti-icing operational procedures;

(iv) The specific duties and responsibilities of each operational position or group responsible for getting the aircraft safely airborne while ground deicing/anti-icing operational procedures are in effect.

(2) Initial and annual recurrent ground training and testing for flight crewmembers and qualification for all other affected personnel (e.g., aircraft dispatchers, ground crews, contract personnel) concerning the specific requirements of the approved program and each person's responsibilities and duties under the approved program, specifically covering the following areas:

(i) The use of holdover times.

(ii) Aircraft deicing/anti-icing procedures, including inspection and check procedures and responsibilities.

(iii) Communications procedures.

(iv) Aircraft surface contamination (i.e., adherence of frost, ice, or snow) and critical area identification, and how contamination adversely affects aircraft performance and flight characteristics.

(v) Types and characteristics of deicing/anti-icing fluids.

(vi) Cold weather preflight inspection procedures.

(vii) Techniques for recognizing contamination on the aircraft.

(3) The certificate holder's holdover timetables and the procedures for the use of these tables by the certificate holder's personnel. Holdover time is the estimated time deicing/anti-icing fluid will prevent the formation of frost or ice and the accumulation of snow on the protected surfaces of an aircraft. Holdover time begins when the final application of deicing/anti-icing fluid commences and expires when the deicing/anti-icing fluid applied to the aircraft loses its effectiveness. The holdover times must be supported by data acceptable to the Administrator. The certificate holder's program must include procedures for flight crewmembers to increase or decrease the determined holdover time in changing conditions. The program must provide that takeoff after exceeding any maximum holdover time in the certificate holder's holdover timetable is permitted only when at least one of the following conditions exists:

(i) A pretakeoff contamination check, as defined in paragraph (c)(4) of this section, determines that the wings, control surfaces, and other critical surfaces, as defined in the certificate holder's program, are free of frost, ice, or snow.

(ii) It is otherwise determined by an alternate procedure approved by the Administrator in accordance with the certificate holder's approved program that the wings, control surfaces, and other critical surfaces, as defined in the certificate holder's program, are free of frost, ice, or snow.

(iii) The wings, control surfaces, and other critical surfaces are redeiced and a new holdover time is determined.

(4) Aircraft deicing/anti-icing procedures and responsibilities, pretakeoff check procedures and responsibilities, and pretakeoff contamination check procedures and responsibilities. A pretakeoff check is a check of the aircraft's wings or representative aircraft surfaces for frost, ice, or snow within the aircraft's holdover time. A pretakeoff contamination check is a check to make sure the wings, control surfaces, and other critical surfaces, as defined in the certificate holder's program, are free of frost, ice, and snow. It must be conducted within five minutes prior to beginning take off. This check must be accomplished from outside the aircraft unless the program specifies otherwise.

(d) A certificate holder may continue to operate under this section without a program as required in paragraph (c) of this section, if it includes in its operations specifications a requirement that, any time conditions are such that frost, ice, or snow may reasonably be expected to adhere to the aircraft, no aircraft will take off unless it has been checked to ensure that the wings, control surfaces, and other critical surfaces are free of frost, ice, and snow. The check must occur within five minutes prior to beginning takeoff. This check must be accomplished from outside the aircraft.

Issued in Washington, DC on September 24, 1992.

Thomas C. Richards,

Administrator.

BILLING CODE 4910-03-M

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

[AC No. 121-XX]

Proposed Advisory Circular on Ground Deicing and Anti-Icing Program

AGENCY: Federal Aviation Administration, DOT.

ACTION: Request for comments on proposed advisory circular.

SUMMARY: Proposed advisory circular (AC) 121-xx Ground Deicing and Anti-Icing Program, provides guidance about the program elements that should be incorporated in an air carrier's approved ground deicing and anti-icing program. This AC would provide guidance about one method of complying with the requirements of revised Federal Aviation Regulation (FAR) section 121.629.

DATES: Comments must be received on or before October 14, 1992.

ADDRESSES: Written comments are invited on all aspects of the proposed AC. Commenters must identify file number AC 121-xx, Ground Deicing and Anti-Icing Program. Send all comments on the proposed AC to the following location: Federal Aviation Administration, Flight Standards Service, Air Carrier Branch (Attention: AFS-220), 800 Independence Avenue, SW., Washington, DC 20591.

FOR FURTHER INFORMATION CONTACT: Katherine Hakala, Flight Standards Service, Air Carrier Branch, AFS-220, 800 Independence Avenue, SW., Washington, DC 20591; telephone: (202) 267-3762 (8 a.m. to 4:30 p.m. e.s.t.).

SUPPLEMENTARY INFORMATION: The guidance in this AC provides one method, but not the only method, of complying with the requirements of revised FAR 121.629. This guidance material supplements the interim final rule, FAR 121.629 published elsewhere in this issue of the **Federal Register**, 14 CFR 121.629. Due to the impending winter season and the critical safety nature of this proposed AC, it is published in its entirety in order to allow commenters expedient access to the document.

Issued in Washington, DC, on September 23, 1992.

William J. White,

Deputy Director, Flight Standards Service.

Ground Deicing and Anti-Icing Program AC No: 121-XX

1. Purpose.

This advisory circular (AC) provides one means, but not the only means, for obtaining approval of a Ground Deicing and Anti-Icing Program, and for ensuring compliance with Federal Aviation Regulations (FAR) Section 121.629.

2. Related FAR Sections.

121.105, 121.107, 121.123, 121.125, 121.127, 121.135, 121.363(b), 121.365, 121.367, 121.369, 121.375, 121.383(a)(3), 121.401, 121.403, 121.405, 121.415, 121.418, 121.419, 121.422, 121.427, 121.433, 121.463, 121.533, 121.537, 121.539, 121.629, and Special Federal Aviation Regulation (SFAR) No. 58.

3. Background.

a. Accidents Related to Icing.

According to information received in 1992 from the National Transportation Safety Board (NTSB), in the last 23 years there have been 15 accidents related to the failure to deice and/or anti-ice aircraft adequately before takeoff. On March 22, 1992, a U.S. air carrier crashed on takeoff from LaGuardia Airport in a snowstorm during nighttime operations. While the NTSB has not yet issued a probable cause finding for this accident, the FAA has proceeded on the assumption that the accident was caused, at least in part, by icing.

b. Reassessment of Icing Procedures.

Prior to the LaGuardia accident, the FAA and the aviation community in general had placed priority on emphasizing the need during icing conditions for the pilot-in-command (PIC) to ensure a "clean aircraft" before takeoff. The FAA believed that pilot education appeared key to combatting the threat of wing icing. Although the FAA still believes the PIC must ultimately make the decision on whether or not to take off, based on a thorough understanding of factors involved in aircraft icing, the FAA believes that certificate holders who conduct their operations under FAR part 121 must provide their PIC's with pertinent information and operator-developed procedures and criteria in order to make a proper decision.

c. Content of this AC.

Accordingly, this AC provides guidance about the program elements that should be incorporated in an air carrier's approved ground deicing and anti-icing program and provides guidance and suggestions about one method, but not the only method, of complying with all pertinent regulations.

4. Definitions

The terms used in this AC are not defined in FAR part 1, but are defined herein for better understanding of this material as follows:

a. *Holdover Time* is defined as the estimated time the application of deicing or anti-icing fluid will prevent the formation of frost or ice, and the accumulation of snow on the treated surfaces of an aircraft. Holdover time begins when the final application of deicing/anti-icing fluid commences, and it expires when the deicing/anti-icing fluid applied to the aircraft loses its effectiveness.

b. *Deicing* is a procedure by which frost, ice, or snow is removed from the aircraft in order to provide clean surfaces.

c. *Anti-Icing* is a precautionary procedure that provides protection against the formation of frost or ice and accumulation of snow on treated surfaces of the aircraft for a limited period of time.

5. Related Reading Material

The following material should be useful in developing training program subject material and instructions and procedures for incorporation in the certificate holder's manuals: AC 20-117, "Hazards Following Ground Deicing and Operations in Conditions Conducive to Aircraft Icing"; FAA publication, "Winter Operations Guidance for Air Carriers and Other Adverse Weather Topics"; and the following publications of the Society of Automotive Engineers (SAE): AMS 1424, "Deicing/Anti-Icing Fluid, Aircraft, Newtonian—SAE Type I"; AMS 1428, "Fluid, Aircraft Deicing/

Anti-Icing, Non-Newtonian, Pseudo-Plastic, SAE Type II"; and ARP 4737, "Aircraft Deicing/Anti-Icing Methods with Fluids, for Large Transport Aircraft"; AC 120–XX, "Pilot Guide—Large Aircraft Ground Deicing"; International Standards Organization (ISO) publications: ISO 11075, "Aerospace—Aircraft de-icing/anti-icing newtonian fluids ISO type I"; ISO 11076, "Aerospace—Aircraft de-icing/anti-icing methods with fluids"; ISO 11077, "Aerospace—De-icing/anti-icing self propelled vehicles—Functional requirements"; ISO 11078, "Aerospace—Aircraft de-icing/anti-icing non-newtonian fluids ISO type II."

6. Program Elements

A certificate holder's ground deicing and anti-icing program, as approved under FAR 121.629(c), should encompass at least the elements that follow (see paragraph 7 and following for detailed discussion of these elements):

a. Management plan detailing operational responsibilities and procedures.

b. Holdover timetables and procedures for their use.

c. Aircraft deicing/anti-icing procedures and responsibilities, pretakeoff check procedures and responsibilities, and pretakeoff contamination check procedures and responsibilities.

d. Initial and recurrent ground training and testing for flight crewmembers and qualification for all other affected personnel.

7. Management Plan

FAR 121.533, 121.535, and 121.537 state, respectively, that each domestic, flag, and supplemental air carrier and commercial operator is responsible for operational control. In order to properly exercise operational control (when conditions at an airport are such that frost, ice, or snow may reasonably be expected to adhere to its aircraft) the certificate holder should develop, coordinate with other affected parties, implement, and use a management plan to ensure proper execution of its approved deicing/anti-icing program. An operator's management plan should identify the manager responsible for the overall deicing/anti-icing program, identify each subordinate manager, and describe each manager's functions and responsibilities under the applicable FAR which are needed to properly manage the certificate holder's deicing/anti-icing program. The plan should encompass at least the elements discussed in the following paragraphs:

a. Operations

Determine the management position responsible for ensuring that all necessary elements of the management plan and the deicing/anti-icing program have been developed, properly integrated, and coordinated; that the plan and program have been disseminated to all those persons who have duties, responsibilities and functions to perform in accordance with them; and that adequate management oversight of the program continues to be maintained. The following actions should be taken:

(1) Determine who (position description) will be responsible, at each airport where operations are expected to be conducted in conditions conducive to ground icing, for deciding that ground deicing/anti-icing operational procedures are to be executed and when.

(2) Detail the functions, duties, responsibilities, instructions, and procedures to be used by flight crewmembers, aircraft dispatchers, and management personnel for safely dispatching or releasing the particular type aircraft used in its operations while ground deicing/anti-icing operational procedures are in effect. The program should contain a detailed description of how the certificate holder determines that the conditions at an airport are such that frost, ice, or snow may reasonably be expected to adhere to the aircraft; and that ground deicing/anti-icing operational procedures must be in effect.

(3) Determine who (position description) will be responsible for coordinating the applicable portions of the management plan and the deicing/anti-icing program with the managers of the air traffic control tower (ATCT) and the airport.

(4) Determine who (position description) will be authorized to enter into agreements with the manager of the ATCT at each airport regarding particular gate hold procedures during icing conditions; and with the airport manager at each airport regarding aircraft secondary deicing/anti-icing locations and aircraft pretakeoff checking locations.

(5) Ensure that a detailed description of the deicing/anti-icing program is incorporated in the certificate holder's manuals (for the use and guidance of flight, ground operations, and management personnel) in conducting its operations under icing conditions.

b. Maintenance.

Determine who is responsible for ensuring that sufficient competent personnel and adequate facilities and equipment are available (at each airport where operations are expected to be conducted under conditions conducive to ground icing) for the proper deicing and anti-icing of the certificate holder's aircraft. The following actions should be taken:

(1) Ensure that all necessary maintenance elements of the management plan and the deicing/anti-icing program have been developed, properly integrated, and coordinated; that the maintenance plan and program have been disseminated to all those persons who have duties, responsibilities, and functions to perform in accordance with them; and that adequate management oversight of the program continues to be maintained.

(2) Detail the functions, duties, responsibilities, instructions, and procedures to be used by its ground personnel, maintenance personnel, and management personnel for safely dispatching or releasing the particular type aircraft used in its operations while ground deicing/anti-icing operational procedures are in effect.

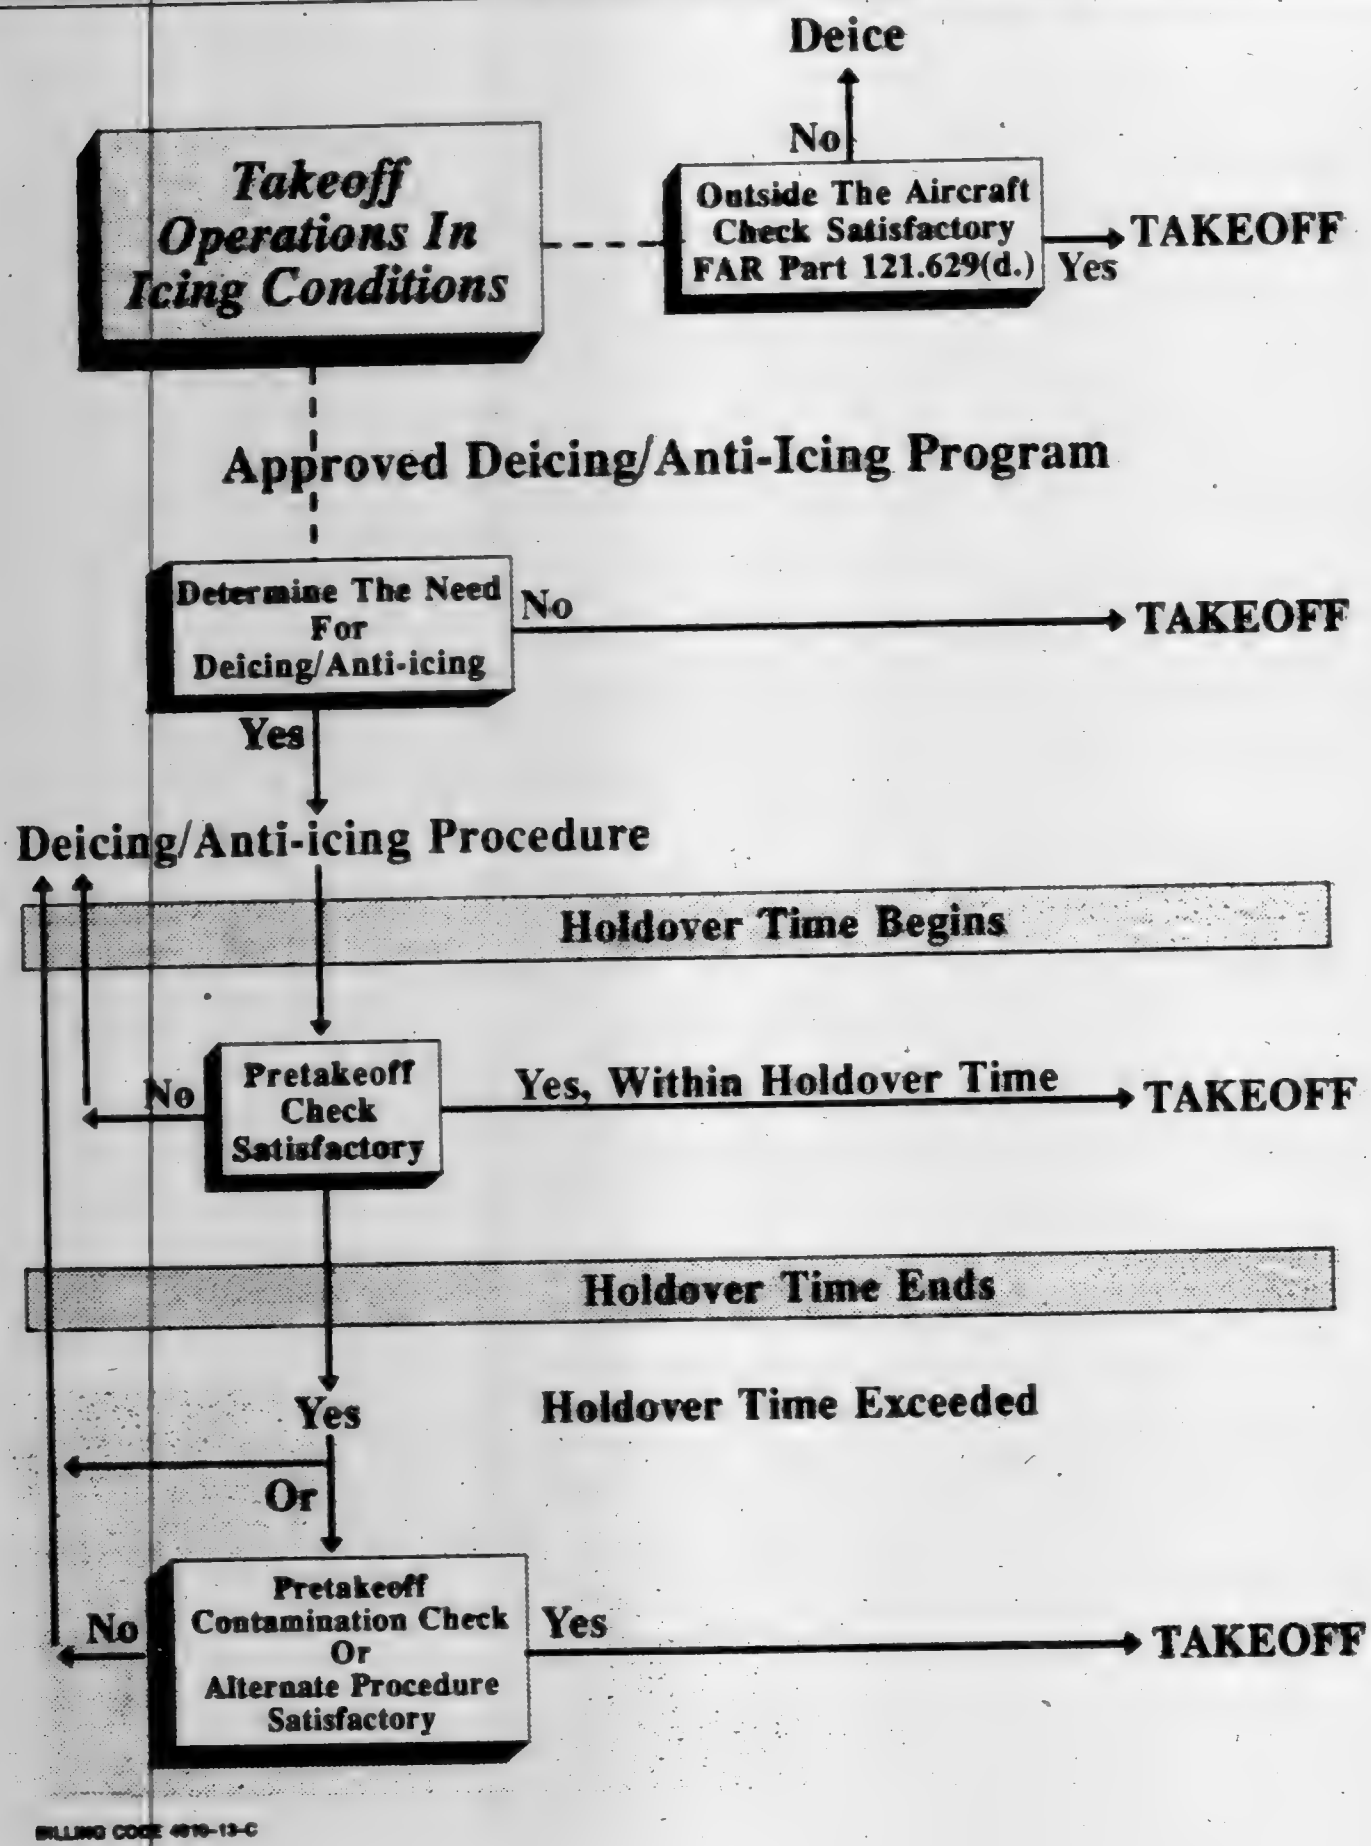
(3) Ensure that a detailed description of the maintenance portion of the deicing/anti-icing program is incorporated in the certificate holder's manuals (for the use and guidance of maintenance, ground, and management personnel) in conducting its operations under icing conditions.

8. Holdover Timetables and Procedures for Their Use.

FAR 121.629(c)(3) requires that the deicing/anti-icing program include holdover timetables and the procedures for the use of these tables by the certificate holder's personnel. The program should also include procedures to be followed in the event that the certificate holder's established maximum holdover times are exceeded. Each of these areas is discussed in the following paragraphs and illustrated in figure 1.

Note: Use of the holdover timetables requires a pretakeoff check by the flightcrew. These holdover timetables must be available for use of the flightcrew in the cockpit.

BILLING CODE 4910-13-M



BILLING CODE 4910-13-C

a. Responsibilities and Procedures.

The certificate holder's program should define operational responsibilities and contain procedures for the flightcrew, aircraft dispatchers or flight followers, and maintenance and ground personnel applicable to the use of holdover times and resultant actions if the certificate holder's maximum holdover time is exceeded. These procedures should include gate procedures, communication between ground crew and flightcrew to establish the start of holdover time and to relay other pertinent information regarding the deicing/anti-icing process, flight crewmember use of the pertinent holdover timetables, and coordination with air traffic control (ATC).

b. Development of Holdover Timetables.

Each certificate holder is required under FAR 121.629(c)(3) to develop holdover timetables for use by its personnel. These timetables are required to be supported by data acceptable to the Administrator. Currently, the only acceptable data is that developed by the Society of Automotive Engineers (SAE) and the International Standards Organization (ISO). ARP 4737, "Aircraft Deicing/Anti-Icing Methods with Fluids, for Large Transport Aircraft," and ISO 11076, "Aerospace—Aircraft deicing/anti-icing methods with fluids," contain the tables that are currently considered acceptable for use by the certificate holders to develop their holdover timetables. Holdover times in excess of those specified in the current editions of the SAE/ISO holdover timetables are not acceptable; however, the certificate holder may require the use of more conservative times than those specified in the SAE/ISO tables. Appendix A of this AC contains the holdover timetables extracted from the current SAE/ISO documents.

c. Use of Holdover Timetables

Holdover times are only an estimate of the time of effectiveness for deicing/anti-icing fluids and are based on a number of variables. FAR section 121.629(c)(4) requires a pretakeoff check of the wings or representative surfaces to be completed by the flightcrew prior to takeoff and within the holdover time range. Air carrier manuals should contain detailed procedures regarding the use of the timetables in their operations. FAR section 121.629(c)(3) requires that the certificate holder's program contain procedures for flight crewmembers to increase or decrease the determined holdover time in changing conditions. Weather conditions that could result in a change to the determined holdover times include, but are not limited to, a significant rise in the ambient temperature to well above freezing, the end of precipitation, or other changes in temperature or precipitation type or intensity. Procedures should consider the certificate holder's capability to disseminate information, in real time, concerning changing weather conditions. Additional guidance regarding holdover timetables is contained in AC 20–117, "Hazards Following Ground Deicing and Ground Operations in Conditions Conducive to Aircraft Icing"; AC 120–XX, "Pilot Guide—Large Aircraft Ground Deicing"; SAE ARP 4737, "Aircraft Deicing/Anti-icing Methods with Fluids, for Large Transport Aircraft"; and ISO 11076, "Aerospace—Aircraft de-icing/anti-icing methods with fluids."

d. Takeoff After the Holdover Time is Exceeded

Under FAR § 121.629(c), takeoff after the maximum holdover time has been exceeded is permitted only if one or more of the following actions has been taken. The certificate holder's program should detail actions to be accomplished if the holdover time is exceeded.

(1) A pretakeoff contamination check is made to ensure that wings, control surfaces and other critical surfaces, as defined in the certificate holder's program, are free of frost, ice or snow. The operator's program should include detailed guidelines and criteria for flightcrew and ground personnel to follow to accomplish this checking requirement. This check is accomplished within five minutes before beginning takeoff and is generally conducted from outside the aircraft, unless the program specifies otherwise. Factors determining whether or not the check can be accomplished from within the aircraft include the ability of the flightcrew to see aircraft surfaces, lighting conditions, weather conditions and other factors which determine the ability to assess the condition of the aircraft; or

(2) It is otherwise determined by an alternate procedure, that wings, control surfaces, and other critical surfaces (as defined in the certificate holder's program) are free of frost, ice, or snow. Other means or determinations consist of procedures, techniques or equipment (such as wing icing sensors) to establish that critical surfaces are not contaminated. These means or determinations should be detailed and approved in the operator's program; or

(3) The wings, control surfaces, and other critical surfaces have been re-deiced and a new holdover time has been established. Coordination procedures should be detailed for the accomplishment of this re-deicing.

9. Aircraft Deicing Anti-Icing Procedures and Responsibilities, Pretakeoff Check Procedures and Responsibilities, and Pretakeoff Contamination Check Procedures and Responsibilities

Certificate holders' manuals should contain detailed procedures for the deicing and anti-icing process specific to each aircraft type. Certificate holders should have aircraft-specific instructions and checking guidelines and procedures for the use of their flight crewmembers and other personnel to determine whether or not aircraft critical surfaces are free of contaminants.

a. Identification of Critical Aircraft Surfaces

The critical aircraft surfaces which should be clear of contaminants before takeoff should be described in the aircraft manufacturers' maintenance manual or other manufacturer-developed documents, such as service or operations bulletins.

(1) Generally, the following should be considered to be critical aircraft surfaces, if the aircraft manufacturer information is not available:

(a) Before engine start, pitot heads, static ports, ram-air intakes for engine control and flight instruments, other kinds of instrument sensor pickup points, fuel vents, propellers and engine inlets.

(b) Wings, empennage, and control surfaces.

(c) Fuselage upper surfaces on center-engine aircraft.

(2) Certificate holders should list in the flight manual or the operations manual, for each type of aircraft used in their operations, the critical surfaces which should be checked on flight-crewmember-conducted, external-aircraft, preflight inspections and pretakeoff checks or pretakeoff contamination checks.

(3) Critical surfaces should be defined for the use of ground personnel for the conduct of required checks following deicing/anti-icing and the pretakeoff contamination check, when required.

b. Identification of Representative Aircraft Surfaces

Certificate holders should list in the flight manual or the operations manual, for each type of aircraft used in their operations, the representative surfaces which may be checked, in lieu of the critical aircraft surfaces, by flight

crewmembers in the conduct of pretakeoff checks.

(1) Some aircraft manufacturers have identified certain aircraft surfaces which the flightcrew can readily observe during day and night operations to determine whether or not ice, frost or snow is accumulating or forming on that surface, and, by using it as a representative surface, can make a reasoned judgement regarding whether or not ice is adhering to other aircraft surfaces. Certificate-holder operational experience can also be used to define representative surfaces. In the absence of this information, the following guidelines should be considered in identifying a representative aircraft surface:

(a) The surface can be clearly seen from inside the cockpit, and it is close enough to the viewer to be able to determine whether or not ice, frost, or snow is forming or accumulating on the surface.

(b) The surface should be unheated.

(c) The surface should have been treated with deicing/anti-icing fluid during the time that fluid was applied to the other aircraft surfaces; however, it is recognized that it is industry practice not to apply Type II fluid forward of the leading edge of the wings, and that Type I fluid may be applied only to the wing surfaces, without being applied to areas visible from the cockpit. Designation of representative surfaces is not limited to treated surfaces.

(d) Surfaces such as propeller spinners and windshield wipers should also be considered.

c. Techniques for Recognizing Contamination on Aircraft Critical or Representative Surfaces.

Certificate holders should have aircraft-specific techniques for the use of their flight crewmembers and other personnel to recognize contamination on critical or representative aircraft surfaces when the certificate holder has procedures for the conduct of preflight external aircraft icing checks, inside- and outside-the-aircraft pretakeoff checks, and pretakeoff contamination checks. Some indications for loss of effectiveness of deicing/anti-icing fluid or contamination on aircraft surfaces include progressive surface freezing or snow accumulation, or random snow accumulation or dulling of surface reflectivity (loss of gloss) caused by the gradual deterioration of the fluid to slush. Deicing/anti-icing fluid manufacturers should also be consulted for information on the fluid characteristics and indications that the fluid is losing its effectiveness.

d. Types of Icing Checks

FAR 121.629 identifies three different icing checks or procedures (to follow ground deicing/anti-icing) which may be required to be accomplished under an opertor's approved deicing/anti-icing program:

(1) *Aircraft deicing/anti-icing procedure.* Certificate holders should have procedures which ensure that, following aircraft deicing and anti-icing fluid application, a preflight external-aircraft icing check of the critical aircraft surfaces has been conducted by qualified ground personnel; this check determines whether or not the critical surfaces are free of frost, ice or snow before push-back or taxi; and the results of the check are communicated to the PIC by an acceptable means.

(2) *Pretakeoff check.* This check is required under FAR 121.629(c)(4) any time that ground icing conditions exist and the aircraft has been deiced/anti-iced and a holdover time is established. It is accomplished within the holdover time range, and normally is accomplished by the flightcrew from inside the cockpit. The aircraft's wings or representative aircraft surfaces are checked for contamination prior to takeoff. The surfaces to be checked are determined by manufacturer data, carrier operational experience, or guidance contained in this AC. The pretakeoff check is integral to the use of holdover times. Because of the variables involved in the determination of holdover times, it is necessary for the flightcrew to look outside the aircraft to assess current weather or other situational conditions, and the aircraft condition, and not rely on the holdover times as the sole determinant that the aircraft is free of contaminants.

(3) *Pretakeoff contamination check.* FAR 121.629(c)(3)(i) requires that certificate holders must have aircraft-specific procedures for use by flight crewmembers and qualified ground personnel to ensure that the aircraft wings, control surfaces, and other critical surfaces remain free of frost, ice, or snow when a holdover time has been exceeded. The pretakeoff contamination check, conducted within 5 minutes of takeoff, is one of three alternative actions to be taken if a holdover time is exceeded. The following should be considered in the development of the procedures.

(a) Certificate holders who operate hardwing airplanes with aft, fuselage-mounted, turbine-powered engines (excluding turbo-propeller-powered engines) should conduct this pretakeoff contamination check from outside the airplane. Because of the difficulty in detecting contaminants on these airplanes, the pretakeoff contamination check should include a physical (tactile) check of selected portions of the wing leading edges and the upper wing surfaces.

(b) Operators of other aircraft may conduct this check from inside or outside the aircraft as specified in the certificate holder's program. Certificate holders should consider the following in the development of guidelines to be used in conjunction with the techniques for flight crewmember recognition of contamination of critical aircraft surfaces and the procedures for conducting pretakeoff contamination checks inside the aircraft.

1. Can enough of the critical surfaces be seen to accurately determine whether or not they are free of contaminants? This determination should consider the aircraft type, the method of conducting the check—that is, from the cockpit or cabin; lighting; and atmospheric conditions.

2. Does the certificate holder have procedures to recognize, and have flight crewmembers been properly trained to recognize changes in weather conditions to allow the PIC to ascertain whether or not the critical aircraft surfaces could reasonably be expected to remain free of contaminates?

10. Initial and Recurrent Ground Training, Testing and Qualification

a. General/All Personnel.

The operator's training program should include initial and annual recurrent ground training, testing for flight crewmembers and qualification for all affected personnel concerning the specific requirements of the program and the duties, responsibilities, and functions detailed in the program. The effective date of FAR section 121.629 requires that initial program training, testing and qualification be completed prior to November 1, 1992. The FAA will allow maximum flexibility in providing the required training, testing, and qualification for this first winter season. Initial training and testing can be accomplished through the issue of bulletins, manual revisions, self-grading quizzes or other review materials. Receipt of training documents will satisfy the testing requirement for this initial winter season. Formal testing will be accomplished in the next recurrent training cycle. On-the-job qualification for ground personnel should include those elements specific to the final deicing/anti-icing rule to include use of holdover times, fluid application, and checking procedures.

b. Operations Ground Training

The following represents the recommended content for a certificate holder's operations ground training program in accordance with the general requirements of FAR section 121.415. Flight crewmembers and other operations personnel should receive training on at least the following subjects:

(1) *The use of holdover times.* Holdover times are a range of times derived from an analysis of airline service experience and the laboratory testing results of the freeze points of particular types of fluids (currently Type I and Type II) under various temperatures, fluid concentrations, and humidity conditions. A discussion of holdover times should include the following:

(a) Source of holdover time data.

(b) Precipitation category (for example, fog, drizzle, rain, snow).

1. Precipitation intensity.

2. Duration of precipitation.

3. Relationship of precipitation change to holdover time.

(c) Relationship of holdover time to particular fluid concentrations for both Type I and Type II fluids.

(d) Identification of when holdover time begins and ends.

(e) Communication procedures reference holdover times.

1. Communication between ground personnel and the flightcrew to determine the start of holdover time, and the particular holdover timetable to be used. Communications from the ground crew to the cockpit crew should consist of the following information:

(aa) Fluid type (for example, Type I or Type II).

(bb) Fluid/water mix ratio.

(cc) Start time of final fluid application/beginning of holdover time.

(dd) Accomplishment of post-deicing/anti-icing check.

2. ATC Coordination.

3. Dispatch or flight following coordination.

4. Means for obtaining most current weather information.

(f) Use of holdover times for the cockpit crew. A pretakeoff check is an integral part of the use of holdover times.

(g) Procedures when holdover time is exceeded.

1. Pretakeoff contamination check.

2. Alternate means to determine whether or not surfaces are free of frost, ice or snow.

3. Re-deice and establish new holdover time.

(2) *Aircraft deicing/anti-icing procedures including checks to detect contaminated surfaces, and responsibilities.*—(a) *Deicing* is a procedure by which frost, ice, or snow is removed from the aircraft in order to provide clean surfaces. The procedure can be accomplished by the use of fluids or mechanical means.

(b) *Anti-Icing* is a procedure by which the application of certain types of anti-icing fluids provides protection against the formation of frost or ice and accumulation of snow on treated surfaces of the aircraft for a limited period of time (holdover time).

(c) *Deicing/Anti-Icing* is a combination of the two procedures above. It can be performed in one or two steps.

1. One-step deicing/anti-icing is carried out with an anti-icing fluid. The fluid used to deice the aircraft remains on aircraft surfaces to provide limited anti-ice capability.

2. Two-step deicing/anti-icing consists of two distinct steps. The first step (deicing) is followed by the second step (anti-icing) as a separate fluid application. Anti-icing fluid is applied to protect the relevant surfaces, thus providing maximum possible anti-ice capability (holdover time).

(d) Safety requirements during fluid application.

(e) Deicing/anti-icing fluid application procedures.

(f) Remote deicing procedures. 1. Aircraft-specific considerations.

2. Location-specific procedures.

(g) *Contractor Deicing.* Many certificate holders will utilize contract services, such as aircraft servicing vendors, fixed base operators, or other air carriers to perform deicing/anti-icing. Operations training should include flightcrew supervisory responsibilities for certificate holders who engage in supplemental operations, who employ contractor deicing/anti-icing services, and who are unable to arrange for the training and qualification of the contractor personnel in advance of operations into airports where these contractor services are to be performed.

(h) *Deicing/Anti-Icing Checking Procedures and Responsibilities.* The training program should have aircraft-specific surface contamination checking guidelines to include the following:

1. *Types of Checks Required.* Each certificate holder should detail the types of checks required and the methods for accomplishing these checks. This will include procedural steps for the conduct of the check as well as the location, and personnel, deicing equipment, and lighting, if applicable, required to accomplish the check.

(aa) Flightcrew preflight inspection/cold weather preflight inspection procedures. This is the normal walk-around preflight inspection conducted by the flightcrew. This inspection should be used to note any aircraft surface contamination and direct any required deicing/anti-icing operations.

(bb) Aircraft deicing/anti-icing procedures include a check performed by qualified ground personnel after the deicing/anti-icing fluid application as an integral part of that process.

(cc) A pretakeoff check is performed prior to takeoff and within the holdover time. This is a check normally conducted from inside the cockpit. Identification of representative surfaces and continual assessment of environmental and other situational conditions should be included in the operator's program.

(dd) Pretakeoff contamination check. Check accomplished after the holdover time has been exceeded and within 5 minutes prior to takeoff. Each carrier will define the content of the pretakeoff contamination check. The check could be conducted from inside or outside the aircraft, depending upon such factors as atmospheric condition, lighting conditions, aircraft type and ability of the crew to see the relevant aircraft surfaces.

(ee) PIC responsibility. The PIC's responsibility is to make the decision on whether or not to make the takeoff based on operator developed guidance and procedures.

2. Identification of critical surfaces or representative surfaces to be checked/inspected during each type of check.

3. Techniques for recognizing contamination on the aircraft.

4. Communications procedures to include communications between ground personnel and the flightcrew, and communications with ATC and company station personnel to coordinate requirements for aircraft pretakeoff contamination check.

(3) *Aircraft surface contamination and critical area identification, and how contamination adversely affects aircraft performance and flight characteristics.*—(a) *Aircraft Ground Icing Conditions.* Certificate holders should ensure that a description of the following conditions is incorporated in the procedures for implementing ground deicing/anti-icing operational procedures. Also, certificate holders should ensure that those persons who have responsibilities under the deicing/anti-icing program for determining whether or not ground deicing/anti-icing procedures should be in effect, understand that under at least the following conditions, frost, ice, or snow

may reasonably be expected to adhere to the aircraft.

1. *In-flight Ice Accumulation.* Certificate holders should have procedures which ensure that the flightcrews of arriving flights report occurrences of in-flight icing to the person responsible for executing the certificate holder's deicing/anti-icing program at each airport where the certificate holder conducts its operations. This is a problem when flights are scheduled for short turnaround times—for example, for 30 minutes or less, and when ambient temperatures on the ground are at or below freezing.

2. *Freezing Precipitation.* Snow, sleet, freezing rain, drizzle, or hail which adheres to aircraft surfaces.

3. *Frost.* (including hoarfrost) is a crystallized deposit, formed from water vapor on surfaces which are at or below 0 °C (32 °F).

4. *Freezing Fog.* Clouds of supercooled water droplets that form a deposit of ice on objects in cold weather conditions.

5. *Snow.* Precipitation in the form of small ice crystals or flakes which may accumulate on or adhere to aircraft surfaces.

6. *Freezing Rain.* Water condensed from atmospheric vapor falling to earth in supercooled drops, forming ice on objects.

7. *Rain or High Humidity (on Cold-Soaked Wing).* Water forming ice or frost on the wing surface when the temperature of the aircraft wing surface is at or below 0 °C (32 °F). Certain aircraft, such as McDonnell Douglas Models DC–9–80 series and MD–88 series airplanes, are currently susceptible to the formation of frost or ice on their wings' upper surfaces when cold-soaked fuel is in the main wing fuel tanks, and the aircraft are exposed to conditions of high humidity, rain, drizzle, or fog at ambient temperatures well above freezing.

8. *Underwing Frost.* Takeoff with frost under the wing in the area of the fuel tanks (caused by cold-soaked fuel) within limits established by the aircraft manufacturer, accepted by FAA aircraft certification offices and stated in aircraft maintenance and flight manuals, may be permitted.

(b) *Critical Aircraft Surfaces.* Certificate holders should identify for each type of aircraft used in their operations, the critical surfaces which should be checked on flight-crewmember-conducted, preflight, external-aircraft icing checks and pretakeoff checks or pretakeoff contamination checks. Information from the aircraft manufacturer (or from this AC, if the subject information is not available from the aircraft manufacturer) should be used to determine the critical surfaces for each aircraft type.

(c) *Representative Aircraft Surfaces.* Certificate holders should identify for each type of aircraft used in their operations, the representative aircraft surfaces which should be checked on flight-crewmember-conducted pretakeoff checks. Information from the aircraft manufacturer, or information developed from carrier operating experience, should be used to determine representative surfaces. In the absence of such information, information from this AC can be used to determine representative aircraft surfaces.

(d) *Effects of Frost, Ice, Snow, and Slush on Aircraft Performance, Stability, and Control.* The certificate holder should obtain this information from the manufacturer of each type of aircraft it uses in its operations and should ensure that its flight crewmembers, aircraft dispatchers, and management personnel understand these effects. Accident data and NASA studies have confirmed some aircraft manufacturer data that the effects of wing contamination may be significantly more pronounced for hard-leading-edge (hard-wing) airplanes than for slatted-leading-edge (slatted-wing) airplanes. According to McDonnell Douglas, the presence of even minute amounts of ice or other contaminates (equivalent to medium grit sandpaper) on the leading edges or upper surfaces of the wings of a DC–9–10 series airplane results in significant loss of wing lift, which causes the airplane to stall at lower-than-normal angles of attack during takeoff. The discussion of these effects should include, but is not limited to, the following subjects:

1. Increased drag/weight.
2. Tendency for rapid pitch-up during rotation or wing roll off.
3. Loss of lift.
4. Stall occurs at lower-than-normal angle of attack.
5. Buffet or stall occurs before activation of stall warning.
6. Decreased effectiveness of flight controls.

(4) *Types, purpose, characteristics, and capabilities of deicing and anti-icing fluids.* Deicing and anti-icing fluids with differing characteristics and capabilities exist; they may undergo improvements, and new types of fluids may be developed. Certificate holders should ensure that their flight crewmembers, aircraft dispatchers, and management personnel generally understand the purpose and capabilities of the fluids used in the deicing/anti-icing program; and that their flight crewmembers are generally knowledgeable of the characteristics of each type of fluid. Certificate holders should refer to the following SAE publications for additional information on specific deicing and anti-icing methods and procedures and on fluid characteristics and capabilities: AMS 1424, "Deicing/Anti-Icing Fluid, Aircraft, Newtonian—SAE Type I"; AMS 1428, "Fluid, Aircraft Deicing/Anti-Icing, Non-Newtonian, Pseudo-Plastic, SAE Type II"; and ARP 4737, "Aircraft Deicing/Anti-Icing Methods with Fluids, for Large Transport Aircraft"; and the following ISO documents: ISO 11075, "Aerospace—Aircraft de-icing/Anti-icing newtonian fluids ISO type I"; ISO 11076,"Aerospace—Aircraft de-icing/anti-icing methods with fluids"; ISO 11077, "Aerospace—de-icing/anti-icing self propelled vehicles—Functional requirements"; ISO 11078, "Aerospace—Aircraft de-icing/anti-icing non-newtonian fluids ISO type II."
Certificate holders should ensure that at least the following subjects are discussed:

(a) Deicing fluids:

1. Heated water.
2. Newtonian fluid (SAE/ISO Type I) (see Caution).
3. Mixtures of water and SAE/ISO Type I fluid.
4. Mixtures of water and SAE/ISO Type II fluid.

Note: Deicing fluid should be applied heated to assure maximum efficiency.

(b) Anti-icing fluids:

1. Newtonian fluid (SAE/ISO Type I) (see Caution).
2. Mixtures of water and SAE/ISO Type I fluid.
3. Non-Newtonian fluid (SAE/ISO Type II).
4. Mixtures of water and SAE/ISO Type II fluid.

Note: SAE/ISO Type II anti-icing fluid is normally applied cold on clean aircraft surfaces, but may be applied heated. Cold SAE/ISO Type II fluid normally provides longer anti-icing protection. SAE/ISO Type I anti-icing fluid should be applied heated.

Caution: SAE/ISO Type I fluids supplied as concentrates for dilution with water prior to use should not be used undiluted. This is due to adverse aerodynamic effects of propylene glycol based fluids and the freeze point characteristics of ethylene glycol-based fluid.

(c) *Fluid Characteristics.*

1.*Type I Fluids.*

(aa) Unthickened.

(bb) Limited holdover time.

(cc) Applied to form thin liquid film on wing.

2. *Type II Fluids.*
(aa) Thickened.
(bb) Longer holdover times in comparison to those of Type I fluids.
(cc) Application results in a thick liquid film (a gel-like consistency) on wing.
(dd) Wind flow over the wing (shear) causes the fluid to progressively flow off the wing during takeoff.
3. *Deicing/Anti-Icing Fluids Handling/Performance Implications.* The type fluid used and how completely the fluid flows off the wing during takeoff determines the effects of the following handling/performance factors. The aircraft manufacturer may also provide performance information regarding the use of the different deicing/anti-icing fluids.
(aa) Increased rotation speeds/ increased field length.
(bb) Increased control (elevator) pressures on takeoff.
(cc) Increased stall speeds/reduced stall margins.
(dd) Lift loss at climbout/increased pitch attitude.
(ee) Increased drag during acceleration/increased field length.
(ff) Increased drag during climb.
(gg) For Type II fluids, fluid build-up on the runway takeoff end may significantly reduce runway coefficient of friction.

c. Maintenance and Ground Personnel Training

At least the following subjects for ground personnel (for example, maintenance mechanic, ramp agent, contractors) should be discussed.
(1) *Effects of frost, ice, snow, and slush on aircraft surfaces.* This discussion is intended to provide ground personnel with an understanding of the critical effect the presence of ice and snow on flight surfaces can have, and should include, but is not limited to, the following:
(a) Loss of Lift.
(b) Increased drag/weight.
(c) Decreased control.
(d) Aircraft-specific areas.
1. Engine foreign object damage (FOD) potential.
2. Pam-air intakes.
3. Instrument pickup points.
4. Leading edge device (LED) aircraft (slots, slats and flaps) and non-LED aircraft.
(2) *Fluid characteristics and capabilities.* Deicing/anti-icing fluids with differing properties exist and may continue to be developed. To the extent that they are being utilized by an air carrier, they should be addressed in training programs:
(a) General fluid descriptions.
(b) Composition and appearance.
(c) Health precautions/environmental considerations.
(d) Differences between Type I and Type II deicing/anti-icing fluids.
(e) Purpose for each type.
(f) Capabilities.
(g) Shearing characteristics in storage and handling.
(h) Fluid application methods.
(3) *Holdover times.* A discussion of holdover times should include the following:
(a) Source of holdover time data.
(b) Precipitation category.
1. Precipitation intensity.
2. Duration of precipitation.
3. Relationship of precipitation change to holdover time.
(c) Relationship of holdover time to particular fluid concentrations for Type I and Type II fluids.
(d) Identification of when holdover time begins and ends.
(e) Communication procedures between ground personnel and flightcrew to determine the start of holdover times.
(4) *Equipment.* An understanding of the capabilities of the deicing equipment and the qualifications for operation are necessary. The equipment portion of the training program should include the following:
(a) Description of various equipment types.
(b) Operation of the equipment.
(5) *Preflight check.* (a) In the pre-departure sequence, ground deicing may be initiated at one or more of the following times:
1. On overnight aircraft, if appropriate.
2. At the gate, following checking by the cockpit crew and a request for deicing.
3. After a normal preflight by ground personnel or the flightcrew and after the crew is on board the aircraft.
(b) In each case, the preflight and the decision on whether or not to deice/ anti-ice should be based on appropriate consideration of the circumstances and should include the following:
1. Weather conducive to ice formation or snow accumulation.
2. Aircraft critical areas (general and aircraft-specific).

Note: For aircraft-specific items, refer to the aircraft operating manual.

(6) *Deicing/anti-icing procedures.* Ground personnel should be knowledgeable of deicing and anti-icing application procedures:
(a) One-step deice and two-step deice/anti-ice process.
(b) Communications from the ground crew to the cockpit crew should provide the following information:
1. Fluid type.
2. Fluid/water mix ratio.
3. Start time of final deice/anti-ice application.
4. Post-application check accomplished.
(c) Safety requirements and emergency procedures.
(d) Deicing/anti-icing prior to aircrew arrival.
(e) Normal aircrew deicing procedures.
(f) Remote deicing procedures.
1. Aircraft-specific considerations.
2. Location-specific procedures.
3. Safety precautions.
(g) Post-application check. An integral part of a ground personnel training program is the check following deicing to determine that all critical surfaces have had snow, ice or frost removed.
(7) *Pretakeoff contamination check.* This check is accomplished when the holdover time has been exceeded and within 5 minutes of takeoff. Each carrier will define the content of the pretakeoff contamination check. The check could be conducted from inside the aircraft by the flightcrew or from outside the aircraft by qualified ground personnel. Training for ground personnel should include the following:
(a) When the check is required.
(b) The necessary resources, personnel, devices and standards to properly accomplish the check.
(c) Where the check will take place.
(8) *Contractor deicing.* Many certificate holders will utilize parties other than themselves to perform deicing. The second party with whom they reach an agreement to provide deicing services could be another carrier, a fixed-base operator or some other service provider at an airport. Training for deicing services from other than the carrier should include the following:
(a) An approved contract training program and application of standards that meet the carrier's own training and application criteria.
(b) Train-the-trainer program (the carrier trains the contract deicing personnel or designated trainer).
(c) Alternate airport procedures where contract service agreements are not present.
(d) Guidance that the cockpit crew will hold contractor to their own airline standards.
(9) *Ground Personnel Qualification/ Quality Assurance.* Air carrier ground deicing programs must have a set standard to judge a person's qualification as a ground deicing person and a quality assurance program to

monitor and maintain a high level of competence.

(a) The program should be tailored to the individual airline with each air carrier maintaining its own quality assurance responsibility.

(b) The program should have a tracking system that ensures that all required training has been satisfactorily completed and recorded for all ground personnel in the deicing process. Also, a name list of qualified deicing personnel should be made available to all managers responsible for deicing at their location.

(c) An ongoing review plan is needed to evaluate the effectiveness of the training received by the deicing personnel, and there must be an adequate number of people trained each year to foster the success of the program. Recurrent training will be a step in that process.

11. Outside-the-Aircraft Check in Lieu of an Approved Ground Deicing/Anti-Icing Program

A certificate holder may continue to operate without an approved ground deicing/anti-icing program if it has procedures and properly trained personnel for the conduct of an outside-the-aircraft check in accordance with FAR sections 121.629(d), 121.135(b)(2), 121.415(g), 121.165, and 121.123. The authorization for the conduct of this check in lieu of an approved program will be contained in the certificate holder's operations specifications (OpSpecs). As stated in FAR 121.629(d), this check is accomplished when conditions are such that frost, ice, or snow may reasonably be expected to adhere to the aircraft. Under FAR 121.629(d) the check is required to be completed within 5 minutes prior to beginning takeoff and is accomplished from outside the aircraft. Certificate holders' manuals and training programs should detail procedures for the conduct of this check.

Appendix A

Note: This appendix contains holdover timetable data extracted from "SAE Aerospace Recommended Practice"; ARP 4737, "Aircraft Deicing/Anti-Icing Methods with Fluids, for Large Transport Aircraft"; and ISO 11076, "Aerospace—Aircraft de-icing/anti-icing methods with fluids." These excerpts are included to provide the holdover times that are acceptable for use in developing a carrier's holdover timetables. The certificate holder should consult the referenced SAE and ISO documents for complete information for development of timetables and procedures for their use.

Part VII

Department of Energy

Monitored Retrievable Storage (MRS) Facility, License Application Annotated Outline; Transmittal to NRC; Notice

DEPARTMENT OF ENERGY

Transmittal of Monitored Retrievable Storage (MRS) Facility Annotated Outline for the Preparation of a License Application, Revision 1, to U.S. Nuclear Regulatory Commission (NRC)

AGENCY: Department of Energy.

ACTION: Notice.

SUMMARY: The Department of Energy (DOE) transmitted the Monitored Retrievable Storage (MRS) Facility Annotated Outline for the Preparation of a License Application, Revision 1, dated August 31, 1992, to the NRC for information and guidance on September 10, 1992. The annotated outline process is the basis for developing a license application before the NRC, if any, for the MRS program. The annotated outline process is iterative, with revisions to be developed in consultation with the NRC.

FOR FURTHER INFORMATION CONTACT: For further information and to obtain a copy of the annotated outline, contact Priscilla Bunton, RW–331, Office of Civilian Radioactive Waste Management, U.S. Department of Energy, 1000 Independence Avenue SW., Washington, DC 20585, (202) 586–8365.

Issued in Washington, DC on September 21, 1992.

John W. Bartlett,

Director, Office of Civilian Radioactive Waste Management.

Title 3—

The President

Proclamation 6478 of September 26, 1992

Child Health Day, 1992

By the President of the United States of America

A Proclamation

On Child Health Day, we pause as a Nation to assess our children's state of health and to reaffirm our commitment to providing every young American with the best possible start in life, beginning with high quality prenatal care throughout pregnancy for expectant mothers and extending through each child's formative years.

When we examine history, one area of child health that has been marked by remarkable improvement is that of communicable childhood diseases. Over the years scientists and physicians have developed the means to protect children from diseases that, in the past, killed or disabled thousands of boys and girls. Through the practice of childhood immunization, the United States helped to lead the way in eliminating smallpox worldwide by 1980. Heartened by such progress, we aimed to rid the United States of another contagious and potentially devastating disease, measles, by 1990. Unfortunately, however, we remain short of that goal.

Despite the existence of effective childhood vaccines for measles and eight other contagious diseases, more than 50,000 cases of measles were reported in the United States from 1989 to 1991. Out of these cases, 160 persons died.

Such a tragic toll is all the more intolerable because it is preventable. Through a series of vaccinations beginning as early as birth, children can be protected against not only measles but also mumps, rubella, polio, diphtheria, pertussis (whooping cough), tetanus, hepatitis B, and *Haemophilus influenzae* Type B. While as many as 5 in 10 infants and toddlers are receiving all of their recommended childhood immunizations on time, thousands of other children remain at risk of contracting life-threatening or disabling illnesses.

To encourage parents to fulfill their responsibility to have their children immunized and to expand access to vaccinations, the Department of Health and Human Services is moving forward with a concerted immunization initiative. Building on several local pilot programs that were developed in 1991, this initiative will increase the number of vaccinated preschoolers through education programs aimed at parents, through the integration of services, and through the enlistment of teachers, local health clinics, and other concerned individuals and organizations.

All of us who care about children—especially parents and grandparents but also educators, public officials, and health care providers—must renew our commitment to ensuring that every American preschooler is protected through age-appropriate immunizations. Doing so is vital to the well-being of our children and to the future of our Nation.

The Congress, by joint resolution approved May 18, 1928, as amended (36 U.S.C. 143), has called for the designation of the first Monday in October as "Child Health Day" and has requested the President to issue a proclamation in observance of this day.

NOW, THEREFORE, I, GEORGE BUSH, President of the United States of America, do hereby proclaim Monday, October 5, 1992, as Child Health Day. I urge all Americans to join me in renewing our commitment to protecting the lives of this Nation's youngest citizens.

IN WITNESS WHEREOF, I have hereunto set my hand this twenty-sixth day of September, in the year of our Lord nineteen hundred and ninety-two, and of the Independence of the United States of America the two hundred and seventeenth.

Proclamation 6479 of September 26, 1992

Leif Erikson Day, 1992

By the President of the United States of America

A Proclamation

When we Americans commemorate the voyages of Leif Erikson, the daring Norse navigator who explored the North American coast some 1,000 years ago, we celebrate the enduring spirit of discovery—a spirit that is leading us to ever new frontiers in learning and commerce. As we remember "Leif the Lucky," the brave son of Iceland and grandson of Norway, we also celebrate the close, cordial ties that exist between the United States and the Nordic countries. Those ties have been strengthened and enriched over the years by the outstanding contributions of Nordic-Americans, who take special interest in this annual observance of Leif Erikson Day.

Last year descendants of early Norse explorers reenacted the voyages of Leif Erikson by sailing replicas of Viking ships from Norway to Iceland, Greenland, and North America. The success of this tribute to "1,000 Years of Discovery" rekindled feelings of friendship on both sides of the Atlantic and reaffirmed our admiration for all those who continue to chart new realms of knowledge and human endeavor—from pioneers in science and technology to the courageous peoples who, for the first time in decades or perhaps for the first time ever, are beginning to reap the rewards of democracy and free enterprise.

At a time when relations between Europe and America are being renewed and strengthened in light of the new, post-Cold War era, the Nordic countries have an important role to play in fostering continued transatlantic cooperation, including an open trading system and mutual support of democratic reform. Likewise, Americans who trace their roots to the Nordic countries—Denmark, Finland, Iceland, Norway, and Sweden—provide a living link between continents, much as their ancestors did nearly a millennium ago.

In recognition of the legendary achievements of Leif Erikson and in honor of our Nordic-American heritage, the Congress, by joint resolution approved on September 2, 1964 (78 Stat. 849, 36 U.S.C. 169c), designated October 9 of each year as "Leif Erikson Day" and requested the President to issue a proclamation in observance of this day.

NOW, THEREFORE, I, GEORGE BUSH, President of the United States of America, do hereby proclaim October 9, 1992, as Leif Erikson Day. I invite all Americans to observe this day with appropriate programs and activities.

IN WITNESS WHEREOF, I have hereunto set my hand this twenty-sixth day of September, in the year of our Lord nineteen hundred and ninety-two, and of the Independence of the United States of America the two hundred and seventeenth.

Proclamation 6480 of September 26, 1992

Fire Prevention Week, 1992

By the President of the United States of America

A Proclamation

Despite all that we have learned about fire prevention and safety, residential fires remain our Nation's number one fire problem. Fires in the home account for four out of every five fire-related deaths, three out of every four fire-related injuries, and almost half of all fire-related property losses.

The vast majority of fire-related deaths occur in homes that do not have a working smoke detector. Because the early warning provided by such a device can dramatically increase one's chances of surviving a fire, it is imperative that homeowners not only install but also maintain smoke detectors in recommended areas of the home. During the past quarter-century, home fire protection has improved dramatically with the installation of at least one smoke detector in most homes. Yet, more Americans must avail themselves of this lifesaving technology, and those in homes with smoke detectors must be sure to test and service them regularly.

To convey that message nationwide, the United States Fire Administration and the National Fire Protection Association have dedicated this year's Fire Prevention Week activities to the theme, "Test Your Detector—It's Sound Advice!" I urge Americans to pay heed to fire safety throughout the year and especially during this first week of October. Homeowners should walk through their homes and be certain that there are enough smoke detectors—one on each level, including the basement, and one outside each sleeping area. Smoke detectors should be tested often to ensure that they are working properly, and batteries should be replaced at least once a year.

As we observe Fire Prevention Week, let us also recognize the members of the public and private organizations that are working toward our shared goal of fire safety, including the American Burn Association, the Congressional Fire Services Institute, the Fire Marshals Association of North America, the International Association of Arson Investigators, the International Association of Black Professional Fire Fighters, the International Association of Fire Chiefs, the International Association of Fire Fighters, the International Association of Fire Service Instructors, the National Association of State Fire Marshals, and the National Volunteer Fire Council.

Most important, let us offer special thanks to our Nation's volunteer and career fire fighters. These brave men and women put their lives on the line every day in order to protect the lives and property of their fellow citizens. Last year alone, 105 fire fighters made the ultimate sacrifice in the line of duty. Our Nation will honor them on Sunday, October 11, 1992, during the National Fallen Fire Fighters Memorial Service at the National Fire Academy in Emmitsburg, Maryland. All Americans are invited to join in praying for these heroic individuals and their bereaved families and friends.

NOW, THEREFORE, I, GEORGE BUSH, President of the United States of America, by virtue of the authority vested in me by the Constitution and laws of the United States, do hereby proclaim the week of October 4 through October 10, 1992, as Fire Prevention Week. I urge all Americans to participate in fire prevention activities in their homes, schools, and places of work—this week and throughout the year.

IN WITNESS WHEREOF, I have hereunto set my hand this twenty-sixth day of September, in the year of our Lord nineteen hundred and ninety-two, and of the Independence of the United States of America the two hundred and seventeenth.

George Bush

Proclamation 6481 of September 27, 1992

White Cane Safety Day, 1992

By the President of the United States of America

A Proclamation

The white cane is a simple yet very useful device that enables persons with visual impairments to enjoy greater mobility and independence in their daily lives. This tool also has great symbolic value, for it is a tangible reminder of the courage, determination, and achievements of persons with disabilities.

As we recognize the accomplishments of Americans who use the white cane, it is fitting that we also recognize the importance of promoting their safety. For Americans who are not blind or visually impaired, this means taking responsibility as careful, courteous drivers and pedestrians.

Americans who use the white cane deserve not only the respect and courtesy of others but also the right to equal opportunity. The Americans with Disabilities Act (ADA) that I signed 2 years ago affirmed the rights of persons with disabilities and strengthened our Nation's commitment to eliminating the physical and attitudinal barriers that, in the past, prevented these individuals from participating fully in the mainstream of American life. Today the United States is providing a model for the world as we work toward full and harmonious implementation of the ADA.

In order to ensure that every American is prepared for the opportunities that life offers, we are also working through the AMERICA 2000 program to promote lifelong learning and achievement. The many Americans who have obtained training in use of the white cane have demonstrated their appreciation of the value of learning far beyond the traditional classroom, and their efforts should challenge and inspire others.

Recognizing the importance of the white cane to Americans with visual impairments, the Congress, in 1964, by Public Law 88–628, designated October 15 of each year as "White Cane Safety Day" and requested the President to issue annually a proclamation in observance of this day.

NOW, THEREFORE, I, GEORGE BUSH, President of the United States of America, do hereby proclaim October 15, 1992, as White Cane Safety Day. I encourage all Americans to observe this day with appropriate programs and activities in recognition of the interests and achievements of persons who use the white cane.

IN WITNESS WHEREOF, I have hereunto set my hand this twenty-seventh day of September, in the year of our Lord nineteen hundred and ninety-two, and of the Independence of the United States of America the two hundred and seventeenth.

LIST OF PUBLIC LAWS

This is a continuing list of public bills from the current session of Congress which have become Federal laws. It may be used in conjunction with "P L U S" (Public Laws Update Service) on 202–523–6641. The text of laws is not published in the **Federal Register** but may be ordered in individual pamphlet form (referred to as "slip laws") from the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402 (phone, 202–512–2470).

H.R. 5620/P.L. 102–368

Dire Emergency Supplemental Appropriations Act, 1992, Including Disaster Assistance To Meet the Present Emergencies Arising From the Consequences of Hurricane Andrew, Typhoon Omar, Hurricane Iniki, and Other Natural Disasters, and Additional Assistance to Distressed Communities. (Sept. 23, 1992; 106 Stat. 1117; 46 pages) Price: $1.50

H.J. Res. 413/P.L. 102–369

To designate September 13, 1992, as "Commodore John Barry Day". (Sept. 24, 1992; 106 Stat. 1163; 2 pages) Price: $1.00

S.J. Res. 303/P.L. 102–370

To designate October 1992 as "National Breast Cancer Awareness Month". (Sept. 24, 1992; 106 Stat. 1165; 2 pages) Price: $1.00

FEDERAL REGISTER Published daily, Monday through Friday, (not published on Saturdays, Sundays, or on official holidays), by the Office of the Federal Register, National Archives and Records Administration, Washington, DC 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

The **Federal Register** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders and Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The seal of the National Archives and Records Administration authenticates this issue of the **Federal Register** as the official serial publication established under the Federal Register Act. 44 U.S.C. 1507 provides that the contents of the **Federal Register** shall be judicially noticed.

The **Federal Register** will be furnished by mail to subscribers for $340 per year in paper form; $195 per year in microfiche form; or $37,500 per year for the magnetic tape. Six-month subscriptions are also available at one-half the annual rate. The charge for individual copies in paper or microfiche form is $1.50 for each issue, or $1.50 for each group of pages as actually bound, or $175.00 per magnetic tape. Remit check or money order, made payable to the Superintendent of Documents. Mail to: New Orders, Superintendent of Documents, P.O. Box 371954, Pittsburgh, PA 15250–7954, or charge to your GPO Deposit Account or VISA or Mastercard.

There are no restrictions on the republication of material appearing in the **Federal Register.**

How To Cite This Publication: Use the volume number and the page number. Example: 57 FR 12345.

Rules and Regulations

Federal Register
Vol. 57, No. 190
Wednesday, September 30, 1992

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.
The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each week.

OFFICE OF PERSONNEL MANAGEMENT

5 CFR Part 532

RIN 3206-AE86

Prevailing Rate Systems

AGENCY: Office of Personnel Management.

ACTION: Final rule.

SUMMARY: The Office of Personnel Management (OPM) is issuing a final rule to redefine the survey area of the Puerto Rico appropriated fund wage area. The final regulations improve the capability of the Department of Defense, the lead agency for the Puerto Rico survey, to conduct the survey and will result in Federal Wage System (FWS) pay rates that are more representative of prevailing rates in the work locations of FWS employees in Puerto Rico.

EFFECTIVE DATE: October 30, 1992.

FOR FURTHER INFORMATION CONTACT: Allan Summers, (202) 606-2848.

SUPPLEMENTARY INFORMATION: On May 8, 1992, OPM published a proposed rule to redefine the survey area for the Puerto Rico appropriated fund wage area (57 FR 19820). Under the proposal, the four municipios in the Ponce area—Juana Diaz, Penuelas, Ponce, and Villalba Municipios—would be deleted from the survey area, and Humacao Municipio, which is located near the host activity at the Roosevelt Roads Naval Complex, would be added. No comments were received during the 60-day comment period. The proposed rule, therefore, is being adopted as a final rule.

Executive Order 12291, Federal Regulation

I have determined that this is not a major rule as defined under section 1(b) of Executive Order 12291, Federal Regulation.

Regulatory Flexibility Act

I certify that these regulations will not have a significant economic impact on a substantial number of small entities because they will affect only Federal employees and agencies.

List of Subjects in 5 CFR Part 532

Administrative practice and procedure, Government employees, Wages.

U.S. Office of Personnel Management.

Douglas A. Brook,
Acting Director.

Accordingly, OPM is amending 5 CFR part 532 as follows:

PART 532—PREVAILING RATE SYSTEMS

1. The authority for part 532 continues to read as follows:

Authority: 5 U.S.C. 5343, 5346; § 532.707 also issued under 5 U.S.C. 552, Freedom of Information Act, Pub. L. 92-502.

2. Appendix C to subpart B is amended by revising the wage area listing for Puerto Rico to read as follows:

Appendix C to Subpart B of Part 532—Appropriated Fund Wage and Survey Areas

* * * * *

Puerto Rico

Survey Area

Puerto Rico (Municipios):
San Juan
Bayamon
Canovanas
Carolina
Catano
Guaynabo
Humacao
Loiza
Toa Baja
Trujillo Alto

Area of Application: Puerto Rico

BILLING CODE 6325-01-M

DEPARTMENT OF AGRICULTURE

Federal Crop Insurance Corporation

7 CFR Part 401

General Crop Insurance Regulations; Wheat, Barley, and Oat Endorsements

AGENCY: Federal Crop Insurance Corporation, USDA.

ACTION: Notice of extension of sales closing date (acceptance of applications).

SUMMARY: The Federal Crop Insurance Corporation (FCIC) herewith gives notice of its determination with respect to the acceptance of applications for wheat, barley, and oat crop insurance for all counties with a September 30, sales closing date, effective for the 1993 crop year only. This action is necessary in order to treat all producers equitably who are required to carry crop insurance protection in order to obtain certain benefits under the provisions of the Food, Agriculture, Conservation, and Trade Act of 1990 and the Dire Emergency Supplemental Appropriation Act for Fiscal Year 1992. The intended effect of this notice is to advise all interested parties with respect to the acceptance of applications, and to comply with the provisions of the General Crop Insurance Regulations (7 CFR part 401), with respect to the Manager's authority to extend the date for accepting applications for crop insurance.

EFFECTIVE DATE: September 30, 1992.

FOR FURTHER INFORMATION CONTACT: Peter F. Cole, Secretary, Federal Crop Insurance Corporation, U.S. Department of Agriculture, Washington, DC 20250, telephone (202) 254-8314.

SUPPLEMENTARY INFORMATION: The provisions of the Food, Agriculture, Conservation, and Trade Act of 1990 (1990 Act) and Dire Emergency Supplemental Appropriation Act for Fiscal Year 1992, requires that, subject to certain limitations in the 1990 Act, in order to be eligible to receive certain benefits, a producer must agree to obtain multi-peril crop insurance under the Federal Crop Insurance Act (7 U.S.C. 1501 *et seq.*), and to furnish evidence of such insurance coverage to the county office of the Agricultural Stabilization and Conservation Service (ASCS).

Under its regulations for insuring crops, FCIC requires that applications for crop insurance protection must be filed on or before the sales closing date. The Wheat Endorsement (7 CFR 401.101), the Barley Endorsement (7 CFR 401.103), and the Oat Endorsement (7 CFR 401.105), have sales closing dates established on a geographic basis: September 30, and October 31, for fall seeded crops.

ASCS recently advised that the sign-up period for disaster payments under the 1990 Act would be open through October 31, 1992. It would be inequitable to require that all producers who sign up for disaster payments on or before September 30 obtain crop insurance but not make the same requirement for those producers who submit their disaster application on October 1 or 2. FCIC has determined that no adverse selection will result from extending the sales closing date to October 31, 1992.

Under the provisions of the General Crop Insurance Regulations (7 CFR 401.8), the sales closing date for accepting applications may be extended by notice in the **Federal Register** upon determination that no adverse selectivity will result from such extension.

Notice

Accordingly, pursuant to the authority contained in 7 CFR 401.8, the Federal Crop Insurance Corporation herewith gives notice that applications will be accepted up to the close of business on October 31, 1992, effective for the 1993 crop year only.

Authority: 7 U.S.C. 1506, 1516.

Done in Washington, DC on September 22, 1992.

David Bracht,

Associate Manager, Federal Crop Insurance Corporation.

7 CFR Part 401

General Crop Insurance Regulations; Rye Endorsement and Sugarcane Endorsement

AGENCY: Federal Crop Insurance Corporation, USDA.

ACTION: Notice of extension of sales closing date (Acceptance of Applications).

SUMMARY: The Federal Crop Insurance Corporation (FCIC) herewith gives notice of its determination with respect to the acceptance of applications and crop reports for rye and sugarcane crop insurance for all counties with a September 30, sales closing date, effective for the 1993 crop year only. This action is necessary in order to treat all producers equitable who are required to carry crop insurance protection in order to obtain certain benefits under the provisions of the Food, Agriculture, Conservation, and Trade Act of 1990 and the Dire Emergency Supplemental Appropriation Act for Fiscal Year 1992. The intended effect of this notice is to extend the date for accepting applications for multi-peril crop insurance for Rye and Sugarcane and to comply with the provisions of the General Crop Insurance Regulations.

EFFECTIVE DATE: September 30, 1992.

FOR FURTHER INFORMATION CONTACT: Peter F. Cole, Secretary, Federal Crop Insurance Corporation, U.S. Department of Agriculture, Washington, DC 20250, telephone (202) 254–8314.

SUPPLEMENTARY INFORMATION: The provisions of the Food, Agriculture, Conservation, and Trade Act of 1990 (1990 Act) and Dire Emergency Supplemental Appropriation Act for Fiscal Year 1992, requires that, subject to certain limitations in the 1990 Act, in order to be eligible to receive certain benefits, a producer must agree to obtain multi-peril crop insurance under the Federal Crop Insurance Act (7 U.S.C. 1501 *et seq.*).

Under its regulations for insuring crops, FCIC requires that applications for crop insurance protection must be filed on or before the sales closing date. The Rye Endorsement (7 CFR 401.106) and the Sugarcane Endorsement (7 CFR 401.133) have a sales closing date of September 30.

ASCS recently advised that the sign-up period for disaster payments under the 1990 Act would be open through October 2, 1992, for Phase II sign up and from October 13, 1992 through February 12, 1993, for Phase III sign up. It would be inequitable to require that certain producers who sign up for disaster payments on or before September 30 obtain crop insurance but not make the same requirement for those producers who submit their disaster application in later disaster sign-up periods. FCIC has determined that no adverse selection will result from extending the sales closing date to October 31, 1992.

Under the provisions of the General Crop Insurance Regulations (7 CFR 401.8), the sales closing date for accepting applications may be extended by notice in the **Federal Register** upon determination that no adverse selectivity will result from such extension.

Accordingly, pursuant to the authority contained in 7 CFR 401.8, the Federal Crop Insurance Corporation herewith gives notice that crop insurance applications for crop insurance for Rye and Sugarcane crops will be accepted up to the close of business on October 31, 1992, effective for the 1993 crop year only.

Authority: 7 U.S.C. 1506, 1516.

Done in Washington, DC on September 25, 1992.

David Bracht,

Associate Manager, Federal Crop Insurance Corporation.

7 CFR Part 406

Nursery Crop Insurance Regulations

AGENCY: Federal Crop Insurance Corporation, USDA.

ACTION: Notice of extension of sales closing date (acceptance of applications).

SUMMARY: The Federal Crop Insurance Corporation (FCIC) herewith gives notice of its determination with respect to the acceptance of applications and crop reports for nursery crop insurance for all counties with a September 30, sales closing date, effective for the 1993 crop year only. This action is necessary in order to treat all producers equitable who are required to carry crop insurance protection in order to obtain certain benefits under the provisions of the Food, Agriculture, Conservation, and Trade Act of 1990 and the Dire Emergency Supplemental Appropriation Act for Fiscal Year 1992. The intended effect of this notice is to extend the date for accepting applications for multi-peril crop insurance for Nursery and to comply with the provisions of the General Crop Insurance Regulations.

EFFECTIVE DATE: September 30, 1992.

FOR FURTHER INFORMATION CONTACT: Peter F. Cole, Secretary, Federal Crop Insurance Corporation, U.S. Department of Agriculture, Washington, DC 20250, telephone (202) 254–8314.

SUPPLEMENTARY INFORMATION: The provisions of the Food, Agriculture, Conservation, and Trade Act of 1990 (1990 Act) and Dire Emergency Supplemental Appropriation Act for Fiscal Year 1992, requires that, subject to certain limitations in the 1990 Act, in order to be eligible to receive certain benefits, a producer must agree to obtain multi-peril crop insurance under the Federal Crop Insurance Act (7 U.S.C. 1501 *et seq.*).

Under its regulations for insuring crops, FCIC requires that applications for crop insurance protection must be filed on or before the sales closing date. The Nursery Crop Insurance Policy (7 CFR part 406) has a September 30, sales closing date.

ASCS recently advised that the sign-up period for disaster payments under the 1990 Act would be open through October 2, 1993, for Phase II sign up and from October 13, 1992 through February 12, 1993, for Phase III sign up. It would be inequitable to require that certain producers who sign up for disaster payments on or before September 30 obtain crop insurance but not make the same requirement for those producers who submit their disaster application in later disaster sign-up periods. FCIC has determined that no adverse selection will result from extending the sales closing date to October 31, 1992.

Under the provisions of the General Crop Insurance Regulations (7 CFR 401.8), the sales closing date for accepting applications may be extended by notice in the **Federal Register** upon determination that no adverse selectivity will result from such extension.

Accordingly, pursuant to the authority contained in 7 CFR 401.8, the Federal Crop Insurance Corporation herewith gives notice that nursery crop insurance applications for crop insurance for Nursery will be accepted up to the close of business on October 31, 1992, effective for the 1993 crop year only.

Authority: 7 U.S.C. 1506, 1516.

Done in Washington, DC on September 25, 1992.

David Bracht,

Associate Manager, Federal Crop Insurance Corporation.

7 CFR Part 422

Potato Crop Insurance Regulations

AGENCY: Federal Crop Insurance Corporation, USDA.

ACTION: Notice of extension of sales closing date (acceptance of applications).

SUMMARY: The Federal Crop Insurance Corporation (FCIC) herewith gives notice of its determination with respect to the acceptance of applications for potato crop insurance for all counties with a September 30, sales closing date, effective for the 1993 crop year only. This action is necessary in order to treat all producers equitably who are required to carry crop insurance protection in order to obtain certain benefits under the provisions of the Food, Agriculture, Conservation and Trade Act of 1990 and the Dire Emergency Supplemental Appropriation Act for Fiscal Year 1992. The intended effect of this notice is to extend the date for accepting applications for multi-peril crop insurance potatoes and to comply with the provisions of the General Crop Insurance Regulations.

EFFECTIVE DATE: September 30, 1992.

FOR FURTHER INFORMATION CONTACT: Peter F. Cole, Secretary, Federal Crop Insurance Corporation, U.S. Department of Agriculture, Washington, DC 20250, telephone (202) 254-8314.

SUPPLEMENTARY INFORMATION: The provisions of the Food, Agriculture, Conservation, and Trade Act of 1990 (1990 Act) and Dire Emergency Supplemental Appropriation Act for Fiscal Year 1992, requires that, subject to certain limitations in the 1990 Act, in order to be eligible to receive certain benefits, a producer must agree to obtain multi-peril crop insurance under the Federal Crop Insurance Act (7 U.S.C. 1501 *et seq.*).

Under its regulations for insuring crops, FCIC requires that applications for crop insurance protection must be filed on or before the sales closing date. The Potato Crop Insurance Policy (7 CFR part 422) has sales closing dates established on a geographic basis: September 30, November 30, December 31, February 28, and April 15.

ASCS recently advised that the sign-up period for disaster payments under the 1990 Act would be open through October 2, 1992, for Phase II sign up and from October 13, 1992 through February 12, 1993, Phase III sign up. It would be inequitable to require that all producers who sign up for disaster payments on or before September 30 obtain crop insurance but not make the same requirement for those producers who submit their disaster application in later disaster sign-up periods. FCIC has determined that no adverse selection will result from extending the sales closing date to October 31, 1992.

Under the provisions of the Potato Crop Insurance Regulations (7 CFR 422.7), the sales closing date for accepting applications may be extended by notice in the **Federal Register** upon determination that no adverse selectivity will result from such extension.

Accordingly, pursuant to the authority contained in 7 CFR 422.7, the Federal Crop Insurance Corporation herewith gives notice that potato crop insurance applications for all counties with a September 30, 1992, sales closing date, will be accepted up to the close of business on October 31, 1992, effective for the 1993 crop year only.

Authority: 7 U.S.C. 1506, 1516.

Done in Washington, DC on September 24, 1992.

David Bracht,

Associate Manager, Federal Crop Insurance Corporation.

BILLING CODE 3410-08-M

DEPARTMENT OF COMMERCE

Bureau of Export Administration

15 CFR Parts 772 and 773

[Docket No. 920824-2224]

Special Chemical License Procedure; Revisions

AGENCY: Bureau of Export Administration, Commerce.

ACTION: Final rule.

SUMMARY: The Bureau of Export Administration (BXA) is amending the Export Administration Regulations (EAR) by revising the Special Chemical License procedure. This procedure authorizes exports of certain chemicals and chemical and biological equipment described in the provisions in the EAR on proliferation controls (§ 778.8) to approved consignees in Country Groups Q, T, V, W, and Y (except Iran, Iraq, and Syria). Prior to the publication of this rule, the Special Chemical License procedure was restricted to consignees that were subsidiaries or affiliates under the effective control of the U.S. exporter.

This rule amends the EAR by allowing commodities to be exported under the Special Chemical License procedure directly to unaffiliated consignees for their own use or consumption, as well as to consignees that are controlled subsidiaries or affiliates of the U.S. exporter. The result will be substantially increased flexibility for exporters, without detriment to the non-proliferation objectives of the control program.

EFFECTIVE DATE: This rule is effective October 30, 1992.

FOR FURTHER INFORMATION CONTACT: Debbie Kappler, Office of Export Licensing, Bureau of Export Administration, Telephone: (202) 377-5400.

SUPPLEMENTARY INFORMATION:

Background

On October 24, 1991 (56 FR 55068) the Bureau of Export Administration

published an interim rule that added a new Special Chemical License that authorized exports of certain chemicals and chemical and biological equipment described in § 778.8 to approved consignees in Country Groups Q, T, V, W, and Y (except Iran, Iraq, and Syria). That interim rule provided that only consignees that were subsidiaries or affiliates under the effective control of the U.S. exporter were eligible to be approved for this procedure. In addition, consignees who imported commodities under this procedure were prohibited from reselling, transferring, or reexporting the commodities to any destination that requires a validated license, without prior written authorization from the Office of Export Licensing (OEL). The approved consignees could resell only to end-users that had been approved in advance by OEL.

BXA received comments on that rule from seven companies. A few commenters stated that the Special Chemical License procedure would be of some help in reducing the paperwork burden because individual validated licenses were no longer needed for many of their exports of chemicals and chemical and biological equipment, and that it could be a benefit to exporters shipping large, predictable quantities of chemicals and equipment to foreign subsidiaries. One commenter also added that the U.S. chemical industry has a significant number of investments abroad in an increasing number of countries outside the Australia Group, and this procedure permits these companies greater flexibility in servicing their foreign investments.

A few commenters specifically requested that distributors be eligible to receive commodities under the Special Chemical License procedure because much of their business is with distributors who are not directly affiliated with the U.S. company. BXA is not making this change, because there would be no effective way to monitor actual end-use. The majority of the commenters expressed concern that this rule posed a competitive disadvantage for many smaller U.S. exporters who may not have subsidiaries or affiliates abroad, and suggested that this procedure be expanded to allow direct shipments of commodities for use or consumption by consignees not affiliated with the U.S. exporter. In addition, they noted that they could not service customers in industries that pose no proliferation risk, such as household chemicals and semiconductor manufacture.

The intent of the Special Chemical License procedure is to eliminate the burden of obtaining an individual validated license for each shipment of chemicals and equipment for those companies exporting large quantities of these kinds of commodities to benign end-uses. BXA is sympathetic to the fact that not all companies that have large volumes of exports of chemicals or chemical and biological equipment sell only to subsidiaries or affiliates aboard. Many sell directly to end-users that are not affiliates. BXA also believes that the safeguards described in the Special Chemical License procedure are adequate to protect against diversion when all recipients have been preapproved. Therefore, the Bureau of Export Administration is amending the Export Administration Regulations to authorize shipments made under the Special Chemical License procedure directly to approved unaffiliated consignees for their own use or consumption, as well as to consignees that are controlled subsidiaries or affiliates of the U.S. exporter.

Rulemaking Requirements

1. This rule is consistent with Executive Orders 12291 and 12661.

2. This rule revises collections of information requirements subject to the Paperwork Reduction Act (PRA) of 1980 (44 U.S.C. 3501 *et seq.*), that have been approved by the Office of Management and Budget (OMB) under control numbers 0694–0005, 0694–0007, 0694–0050, and 0694–0067. This rule amending these information collection requirements and a request for approval for the new requirements are being submitted to OMB for review under the PRA. As revised, these collections are estimated to average 15 hours per respondent. This includes the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding this burden estimate or any other aspect of the data requirements, including suggestions for reducing the burden, to the Office of Security and Management Support, Bureau of Export Administration, U.S. Department of Commerce, Washington, DC 20230; and to the Office of Information and Regulatory Affairs, Office of Management and Budget, Washington, DC 20503—ATTN: Paperwork Reduction Project (0694–0067).

3. This rule does not contain policies with Federalism implications sufficient to warrant preparation of a Federalism assessment under Executive Order 12612.

4. Because a notice of proposed rulemaking and an opportunity for public comment are not required to be given for this rule by section 553 of the Administrative Procedure Act (5 U.S.C. 553) or by any other law, under sections 603(a) and 604(a) no initial or final Regulatory Flexibility Analysis has to be or will be prepared.

5. The provisions of the Administrative Procedure Act, 5 U.S.C. 553, requiring notice of proposed rulemaking, the opportunity for public participation, and a delay in effective date, are inapplicable because this regulation involves a foreign and military affairs function of the United States. No other law requires that a notice of proposed rulemaking and an opportunity for public comment be given for this rule.

Therefore, this regulation is issued in final form. Although there is no formal comment period, public comments on this regulation are welcome on a continuing basis. Comments should be submitted to Nancy Crowe, Office of Technology and Policy Analysis, Bureau of Export Administration, Department of Commerce, P.O. Box 273, Washington, DC 20044.

List of Subjects in 15 CFR Parts 772 and 773

Exports, Reporting and recordkeeping requirements.

Accordingly, parts 772 and 773 of the Export Administration Regulations (15 CFR parts 730–799) are amended as follows:

1. The authority citation for 15 CFR part 772 continues to read as follows:

Authority: Public Law 90–351, 82 Stat. 197 (18 U.S.C. 2510 *et seq.*), as amended; sec. 101, Public Law 93–153, 87 Stat. 576 (30 U.S.C. 185), as amended; sec. 103, Public Law 94–163, 89 Stat. 877 (42 U.S.C. 6212), as amended; secs. 201 and 201(11)(e), Public Law 94–258, 90 Stat. 309 (10 U.S.C. 7420 and 7430(e)), as amended; Public Law 95–223, 91 Stat. 1626 (50 U.S.C. 1701 *et seq.*); Public Law 95–242, 92 Stat. 120 (22 U.S.C. 3201 *et seq.* and 42 U.S.C. 2139a); sec. 208, Public Law 95–372, 92 Stat. 668 (43 U.S.C. 1354); Public Law 96–72, 93 Stat. 503 (50 U.S.C. App. 2401 *et seq.*), as amended; sec. 125, Public Law 99–64, 99 Stat. 156 (46 U.S.C. 466c); E.O. 11912 of April 13, 1976 (41 FR 15825, April 15, 1976); E.O. 12002 of July 7, 1977 (42 FR 35623, July 7, 1977), as amended; E.O. 12058 of May 11, 1978 (43 FR 20947, May 16, 1978); E.O. 12214 of May 2, 1980 (45 FR 29783, May 6, 1980); E.O. 12730 of September 30, 1990 (55 FR 40373, October 2, 1990), as continued by Notice of September 26, 1991 (56 FR 49385, September 27, 1991); and E.O. 12735 of November 16, 1990 (55 FR 48587, November 20, 1990), as continued by Notice of November 14, 1991 (56 FR 58171, November 15, 1991).

2. The authority citation for 15 CFR part 773 continues to read as follows:

Authority: Public Law 90–351, 82 Stat. 197 (18 U.S.C. 2510 *et seq.*), as amended; Public Law 95–223, 91 Stat. 1626 (50 U.S.C. 1701 *et seq.*); Public Law 95–242, 92 Stat. 120 (22 U.S.C. 3201 *et seq.* and 42 U.S.C. 2139a); Public Law 96–72, 93 Stat. 503 (50 U.S.C. App. 2401 *et seq.*), as amended; E.O. 12002 of July 7, 1977 (42 FR 35623, July 7, 1977), as amended; E.O. 12058 of May 11, 1978 (43 FR 20947, May 16, 1978); E.O. 12214 of May 2, 1980 (45 FR 29783, May 6, 1980); E.O. 12730 of September 30, 1990 (55 FR 40373, October 2, 1990), as continued by Notice of September 26, 1991 (56 FR 49385, September 27, 1991); and E.O. 12735 of November 16, 1990 (55 FR 48587), November 20, 1990), as continued by Notice of November 14, 1991 (56 FR 58171, November 15, 1991).

PART 772—[AMENDED]

3. Section 772.2 is amended:

a. By revising paragraph (b)(4); and

b. By removing paragraph (b)(7), to read as follows:

§ 772.2 Types of validated licenses.

* * * * *

(b) * * *

(4) A "Special Chemical License" (§ 773.9 of this subchapter) authorizes the shipment by approved exporters of certain chemicals and chemical and biological equipment to approved consignees in Country Groups Q, T, V, W, and Y (except Iran, Iraq, and Syria) during a two-year period. Licenses may be extended once by amendment for a second two-year period.

* * * * *

PART 773—[AMENDED]

4. Section 773. 9 is revised to read as follows:

§ 773.9 Special Chemical License.

A Special Chemical License procedure is established that authorizes exports of certain chemicals and chemical and biological equipment. This procedure is intended to provide parties who ship significant amounts of these commodities with an alternative to filing applications for individual validated licenses, when exporting to their controlled subsidiaries or affiliates abroad that have been approved by OEL or to unaffiliated foreign consignees, approved by OEL, that are the actual end-users of the commodities.

(a) *Eligible commodities.* The following commodities may be authorized for export or reexport under this § 773.9:

(1) Precursor and intermediate chemicals controlled under ECCNs 1C60C and 1C64E; and

(2) Chemical and biological equipment controlled under ECCNs 1B70E, 1B71E, and 1C65E.

(b) *Eligible destinations.* Exports and reexports may be authorized under this § 773.9 to any destination except Country Groups S and Z, Iran, Iraq, and Syria.

(c) *Eligible consignees.* The Office of Export Licensing (OEL) may authorize shipments to two kinds of consignees under the Special Chemical License procedure:

(1) A consignee that is a subsidiary or other affiliate under the effective control of the U.S. exporter. "Effective control" consists of the authority, ability, and intent of the U.S. exporter to establish the general policies or to control the day-to-day operations of the consignee in a manner that will ensure compliance with the requirements of the license; or

(2) A consignee not affiliated with the U.S. exporter that will import the commodities for its own use or consumption.

(d) *Qualification of applicants.* There is not an automatic privilege to participate in this procedure. Only those firms that demonstrate the ability to adhere to the requirements of this procedure may participate. Among the factors that OEL will consider in evaluating the qualifications of applicants are the following:

(1) Whether there is adverse information on the applicant's compliance with U.S. export controls;

(2) Whether the applicant demonstrates sufficient knowledge and expertise in applying the provisions of this subchapter (the Export Administration Regulations);

(3) Whether the applicant demonstrates that there is a sufficient volume of business with the consignees identified on the application to justify the use of this Special Chemical License procedure.

(e) *Consignees must be approved by OEL*—(1) *Exports.* Exports under this § 773.9 may be made only to consignees specifically authorized by the Office of Export Licensing (OEL) to import commodities under this special licensing procedure. Paragraph (f)(1)(iii) of this section requires license applications to submit to OEL a list of consignees designated to import commodities under this procedure. Commodities exported under this procedure must be solely for use or consumption by the authorized consignee, except that OEL may specifically authorize consignees that are controlled subsidiaries or affiliates of the U.S. exporter to resell, transfer, or reexport such commodities to approved end-users.

(2) *Resales, transfers, or reexports.* Consignees that import commodities under this special licensing procedure are prohibited from transferring or reselling the commodities, or reexporting them to a destination that requires a validated license, unless prior written authorization is obtained from OEL. OEL may authorize consignees that are controlled subsidiaries or affiliates of the U.S. exporter to transfer, resell, or reexport commodities imported under this procedure to end-users approved on the license. Applicants who wish to obtain such authorization for their controlled subsidiaries or affiliates are required by paragraph (f)(1)(iv) of this section to submit a separate list of end-users for each subsidiary or affiliate that intends to resell, transfer, or reexport commodities that have been imported under this procedure. Only actual end-users may be identified; this Special Chemical License does not authorize transfers from a consignee to a party that will resell, transfer, or reexport the commodities.

(f) *Application procedures*—(1) *Documents required.* Each application to export or reexport commodities under this § 773.9 must include the following document:

(i) Form BXA–622P, Application for Export License.

(ii) Form BXA–6052P, Statement by Foreign Consignee in Support of Special License Application in triplicate. This form must be submitted for each foreign consignee—this form is not required for customers of foreign consignees that are controlled subsidiaries or affiliates of the U.S. exporter. Insert "Special Chemical License" in Item 2 of the form.

(iii) List of foreign consignees designated to import commodities under this procedure (indicate the extent of control by the applicant for foreign consignees that are controlled subsidiaries or affiliates of the applicant).

(iv) List of end-users (and their complete addresses) to whom the commodities exported under this procedure will be resold, transferred, or reexported by the foreign consignees that are controlled subsidiaries or affiliates of the U.S. exporter. A separate list of end-users is required for each subsidiary or affiliate that intends to resell, transfer, or reexport commodities that were imported under this procedure. The list should be in triplicate, on letterhead, attached to the consignee's Form BXA–6052P, and should indicate the estimated annual quantity of each chemical included in ECCN 1C60B or 1C64E.

(2) *Preparation of documents*—(i) *Form BXA–622P, Application for Export License.* The applicant shall prepare and submit the application in accordance with the provisions of § 772.4 of this subchapter, except that the applicant shall follow the instructions furnished in Supplement No. 5 to this part 773. The instructions for certain items in Supplement No. 5 to this part 773, are not appropriate for this Special Chemical License procedure. Applicants should use the following instructions, instead:

(A) Item 4: Enter, "Special Chemical License".

(B) Item 6: Enter "See Attached List" and label the attached list as "Attachment Item 6: Consignees". The list must include each consignee alphabetically by country. Complete addresses (city, street, etc.) must be furnished for each consignee. Post Office boxes are not acceptable. This list must be submitted in duplicate. The extent of control by the applicant must be indicated for each consignee that is a controlled subsidiary or affiliate of the applicant. For each end-user consignee, indicate the estimated annual quantity of each chemical included in ECCN 1C60B or 1C64E.

(C) Item 9(b): (*1*) Enter "See Attached List" and label the attached list as "Attachment Item 9(b): Product Description". List the commodities proposed for export under the license in estimated descending order based on the anticipated export volume by value and indicate the appropriate Export Control Classification Number (ECCN) from the Commerce Control List (CCL) for each commodity. This list should be provided in duplicate or on Form BXA–622P–A.

(*2*) Enter the following statement at the bottom of the attachment to Item 9(b):

Except as authorized by OEL, commodities excluded from the Special Chemical License procedure set forth in § 773.9, or excluded under this license, will not be exported to any consignee in any destination under this license.

(ii) *Form BXA–6052P, Statement by Foreign Consignee in Support of Special License Application.* Form BXA–6052P should be completed in accordance with the instructions contained in Supplement No. 6 to this part 773, except that the phrase "Special Chemical License" should be inserted in Item 2 and, when the consignee is a controlled subsidiary or affiliate of the U.S. exporter, a list of actual end-users and their addresses must be provided where Item 5 calls for a list of countries. Each consignee must sign a Form BXA–6052P. Three originals (or single sheet copies printed back-to-back) of Form BXA–6052P shall be manually signed by the consignee or by a responsible official of the consignee who is authorized to bind the consignee to all of the items, undertakings, and commitments set forth on the Form. All copies shall be co-signed by the applicant and submitted with the application to OEL. Each Form BXA–6052P shall contain the following information or certifications on the form or on an attachment to the form, as appropriate:

(A) Notice restricting transfer, resale, or reexport. Each Form BXA–6052P shall include a certification that no commodities received under the license will be transferred or resold, or reexported to a destination that requires a validated license, unless the new party (end-user) has been approved by OEL, and that in no case will the commodities be transferred, resold, or reexported to a party who is not, in fact, the end-user.

(B) Each consignee must describe the scope of activities under the license in sufficient detail for OEL to determine whether the commodities imported under the license are intended for use or consumption by the consignee only, for transfer or resale, or both. Only controlled subsidiaries or affiliates of the applicant are eligible to import commodities that are intended for transfer or resale. If any of the commodities are intended for transfer or resale, the controlled subsidiary or affiliate must attach the list of end-users required by § 773.9(f)(1)(iv).

(g) *Action on applications.*—(1) *Approved of applications.* When an application or a portion of an application is approved under this procedure, the Office of Export Licensing will issue an export license authorizing the export of commodities covered during the validity period, subject to the provisions of this subchapter (the Export Administration Regulations) and to the terms and provisions of the license.

(i) *Validity period.* Licenses authorizing exports under this § 773.9 will be valid for two years from the last day of the month in which they are issued and may be extended once by amendment for a two-year period. Thereafter, a new application must be submitted.

(ii) *License number.* The license number will be indicated immediately below the validation stamp. The license number will consist of the letters "SC" followed by four digits. Each consignee is then given a three-digit designation number. The "SC" license number and the three-digit consignee designation number are noted on the validated BXA–6052P forms. The license authorization number for exports to consignees is the combination of the four-digit "SC" number and the three-digit consignee designation number. Exporters are required to use the complete license number when preparing Shipper's Export Declarations or other export documents or when communicating (after issuance) with the Office of Export Licensing.

(2) *Appliations returned without action.* When an application is returned without action, the application, together with related documents, will be returned to the applicant with Form BXA–851, Advice on Application Returned Without Action (RWA). This document will state the reason for return of the license application and will explain the deficiencies or additional information required for OEL to reconsider the application. Resubmissions must be made within 120 days of the RWA to be considered. Thereafter, a new application will be required.

(3) *Rejected applications.* When the Office of Export Licensing intends to reject an application, it will notify the applicant in writing and give the reasons for the intended rejection in accordance with the provisions of § 770.13(j) of this subchapter. The applicant may apply for an individual or other appropriate type of validated license for transactions that would have been covered by the rejected license application.

(h) *Action on Form BXA–6052P.*—(1) *Approval.* Concurrently with the approval of a license application under this § 773.9 or the approval of an amendment adding a consignee, two validated copies will be sent to the license holder. One copy is to be retained by the license holder and one copy is to be sent by the license holder to the approved consignee.

(2) *Rejection.* If a consignee is not approved, the Form will be returned to the applicant/license holder with a rider stating the reason for this action.

(3) *Notice to approved consignee.* A letter of transmittal for each approved Form BXA–6052P must be sent by the exporter to each approved consignee and must include (or have attached) the following:

(i) A description of recordkeeping requirements applicable to the activities of the consignee;

(ii) Information to each consignee that is a controlled subsidiary or affiliate of the U.S. exporter, and is authorized to transfer, resell, or reexport on the approved Form BXA–6052P, of the restrictions on any commodities imported under the license, including the

approved list of end-users eligible to receive such commodities; and

(iii) A description of any special conditions or restrictions on the license applicable to the consignee.

(i) *Amendments*—(1) *Forms.* All requests for amendment of licenses issued under this § 773.9 must be submitted on Form BXA–685P, Request for Amendment Action, in accordance with the requirements of § 772.11 of this subchapter.

(2) *Changes that require an amendment*—(i) *Extension of validity period.* A license issued under this § 773.9 is valid for two years. The validity period may be extended for an additional two years by submitting Form BXA–685P, and the following certification:

I (we) certify that all the facts and intentions set forth in our previously submitted application remain the same except (enter the word "none" or specify the changes).

(ii) *Addition of consignees.* If the license holder wishes to add a new consignee, a Form BXA–6052P must be submitted with the Form BXA–685P, in accordance with § 772.11 of this subchapter.

(iii) *Deletion of consignees.* The license holder may amend a license issued under this section to remove one or more consignees.

(iv) *Change of name*—(A) *License holder.* If the license holder changes the firm name, the change must be submitted on Form BXA–685P. The license holder must send a copy of the newly validated Form BXA–685P to all consignees and inform them to attach the copy to their validated Form BXA–6052P.

(B) *Consignee.* If a consignee changes its name, the license holder must submit the change on Form BXA–685P to be accompanied by a new Form BXA–6052P from the consignee.

(v) *Change of address.* If a consignee moves from one country to another, the license holder must submit Form BXA–685P, indicating the new address, and a ne. Form BXA–6052P showing the new address.

(vi) *Adding new commodities.* A license holder must submit Form BXA–685P to request the addition of commodities not covered by the license application or previous amendments thereto.

(vii) *Addition of new end-users.* When a consignee that is a controlled subsidiary or affiliate of the U.S. exporter wishes to add new end-users, the license holder must submit Form BXA–685P identifying the new end-users and for each new end-user, the estimated annual quantity of each chemical included in ECCN 1C60B or 1C64E.

(j) *Export clearance*—(1) *Value of shipments.* There is no value limitation on shipments under the Special Chemical License procedure. However, the value of each shipment must be shown on the Shipper's Export Declaration.

(2) *Shipper's Export Declaration.* The Shipper's Export Declaration covering an export made under a Special Chemical License shall be prepared in accordance with standard instructions. Although the Special Chemical License may describe the commodities in broad terms, commodity descriptions on the Declaration shall be specific.

(i) The description shall: (A) Conform to the applicable Commerce Control List description, and cite the Export Control Classification Number in parentheses beneath the Schedule B number;

(B) Incorporate any additional information where required by Schedule B (e.g., the type, size, or name of the specific commodity).

(ii) Firms authorized to file summary SED reports to the U.S. Census Bureau may, at the request of the Office of Export Licensing (OEL), be required to submit for OEL inspection copies of such reports applicable to exports under a Special Chemical License.

(3) *Mail shipments.* Shipments by mail shall be made in accordance with the instructions contained in § 786.1(b) of this subchapter.

(4) *Destination control statement.* The U.S. exporter shall enter one of the destination control statements contained in § 786.6 (d)(1) or (d)(2) of this subchapter on the commercial invoice and bill of lading or airway-bill covering exports under the Special Chemical License procedure.

(k) *Notification of consignee by exporter.* The U.S. exporter shall notify each consignee that no commodities imported under the Special Chemical License procedure may be transferred or resold, or reexported to a destination that requires a validated license, without prior written authorization from OEL. OEL may authorize consignees that are controlled subsidiaries or affiliates of the U.S. exporter to transfer, resell, or reexport commodities imported under this procedure to end-users approved on the license.

(l) *Reexport notification requirements.* Unless specifically exempted on the license or subsequently in writing by OEL, all approved consignees (controlled subsidiaries or affiliates of the U.S. exporter) not located in a country listed in Supplement No. 2 or 8 to this part 773, when reselling commodities received under this procedure to pre-approved end-users in countries listed in Supplement No. 5 to part 778, of this subchapter, must notify these end-users on the commercial invoice (or by such other means specifically approved by OEL) of the restrictions on unauthorized reexports. The notice shall read as follows:

These commodities were authorized for export from the United States under a Special Chemical License procedure on the condition that they may not be reexported without prior approval from the United States authorities. This prior approval is not required for reexports to NATO member countries, Australia, Austria, Ireland, Japan, New Zealand, and Switzerland.

(m) *Reporting requirement for changed facts.* Consistent with the provisions of § 772.6(e) of this subchapter, the licensee shall report to BXA within 30 days of any material or substantive change in type or increase in quantity of any chemical controlled by ECCN 1C60B or 1C64E that is supplied to any end-user under this license. Minor, routine changes need not be reported. Compliance with this requirement to report does not relieve the licensee of any other obligation under this subchapter (the Export Administration Regulations).

(n) *Recordkeeping requirements.* The license holder and consignees must maintain records of all transactions under the license in accordance with the recordkeeping requirements of § 787.13 of this subchapter. The license holder, any approved consignees, or any approved end-user of a controlled subsidiary or affiliate of the license holder may be requested to produce records of transactions conducted under the Special Chemical License procedure for inspection and copying by an authorized agent, official, or employee of the Bureau of Export Administration, the U.S. Customs Service, or the U.S. Government in accordance with the provisions of § 787.13(f) of this subchapter.

(o) *Exceptions.* In the event that the license holder or an approved consignee is unable to meet any of the requirements of the Special Chemical License procedure, but believes that unusual circumstances warrant a waiver or an exception of one or more of these requirements, the license holder, and only the license holder, may consult with or write to OEL, explaining the circumstances in full, and submit a written request for a waiver or exception.

Dated: September 24, 1992.

James M. LeMunyon,

Acting Assistant Secretary for Export Administration.

BILLING CODE 3510-DT-M

DEPARTMENT OF THE TREASURY

Internal Revenue Service

26 CFR Parts 1 and 602

[TD 8439]

RIN 1545-AH22

Treatment of Transactions Between Partners and Partnerships

AGENCY: Internal Revenue Service, Treasury.

ACTION: Final regulations.

SUMMARY: This document contains final regulations relating to the treatment of transactions between partners and partnerships and, in some instances, between partners themselves, under section 707 of the Internal Revenue Code. Changes to the applicable law were made by the Tax Reform Act of 1984. The final regulations affect partnerships and their partners, and are necessary to provide them with guidance needed to comply with the applicable tax law.

DATES: These regulations are effective April 24, 1991, and apply to transactions with respect to which all transfers considered part of a sale occur after April 24, 1991.

FOR FURTHER INFORMATION CONTACT: Susan T. Eilavitch or J. Scott Hargis at (202) 622-3050 (not a toll-free number).

SUPPLEMENTARY INFORMATION:

Paperwork Reduction Act

The collection of information requirement contained in these final regulations has been reviewed and approved by the Office of Management and Budget in accordance with the Paperwork Reduction Act of 1980 (44 U.S.C. 3504(h)) under control number 1545-1243. The estimated annual burden per respondent varies from 15 minutes to 25 minutes, depending on individual circumstances, with an estimated average of 20 minutes.

These estimates are an approximation of the average time expected to be necessary for a collection of information. They are based on such information as is available to the Internal Revenue Service. Individual respondents may require greater or less time, depending on their particular circumstances.

Comments concerning the accuracy of this burden estimate and suggestions for reducing this burden should be directed to the Internal Revenue Service, Attn: IRS Reports Clearance Officer, T:FP, Washington, DC 20224 and to the Office of Management and Budget, Attn: Desk Officer for the Department of the Treasury, Office of Information and Regulatory Affairs, Washington, DC 20503.

Introduction

This document adds new regulations § 1.707-0 and §§ 1.707-2 through 1.707-9 to the Income Tax Regulations (26 CFR part 1) under section 707(a)(2) of the Internal Revenue Code (the Code). No change is made to existing § 1.707-1.

Background

On April 25, 1991, a notice of proposed rulemaking relating to the treatment of transactions between partners and partnerships was published in the **Federal Register** (56 FR 19055). Written comments were received and a public hearing was held on September 23, 1991. After full consideration of the comments and the statements made at the public hearing, the proposed regulations are adopted as revised by this Treasury decision.

Explanation of Provisions

I. Enactment of Section 707(a)(2)

Section 707(a)(2)(B) of the Code grants the Secretary broad regulatory authority to identify those transactions that, though structured as contributions and distributions under sections 721 and 731, are more properly treated under section 707(a) as sales or exchanges between a partnership and a partner acting in a capacity other than as a member of the partnership. Section 707(a)(2)(A), in relevant part, grants broad regulatory authority to treat a transfer of property by a partner to a partnership and a related direct or indirect allocation and distribution to the partner as a sale or exchange if the transfers are properly viewed together as occurring between a partnership and a partner acting in a capacity other than as a partner. The final regulations apply to contributions and distributions described in section 707(a)(2)(A) and transfers described in section 707(a)(2)(B) of the Code.

II. General Rules Regarding Disguised Sales to Partnership

A. Tax Consequences

The final and proposed regulations provide that if a contribution and related distribution are treated as a disguised sale, the contribution and distribution will be treated as a sale or exchange between the partnership and a person acting in a capacity other than as a member of the partnership for all purposes of the Code. Moreover, if the consideration treated as transferred to a partner pursuant to a sale is less than the fair market value of the property transferred to the partnership, the transfer will be treated as a sale in part and a contribution in part.

In the case of non-simultaneous transfers, comments proposed that, absent a contractual or legal obligation to make the subsequent transfer, the disguised sale recharacterization should be deemed to occur at the time of the subsequent transfer. Careful consideration was given to various alternatives for implementing a later sale approach. The theoretical basis of the approach of the proposed regulations, however, is more consistent with disguised sale principles and the legislative directive to prevent taxpayers from inappropriately deferring or avoiding tax on the sale of property. For example, any later sale approach would most likely generate a different amount of gain than that inherent in the property at the date of the original transfer. See H.R. Rep. No. 432 (Pt. 2), 98th Cong., 2d Sess. 1218, 1220 (1984) (H.R. Rep.); S. Prt. No. 169 (Vol. I), 98th Cong., 2d Sess. 224-25, 230 (1984) (S. Prt.).

In addition, any later sale approach would require complex rules and operate in a complex manner. The complexity of any later sale approach stems from the difficulty of determining the value of the transferred property and the basis attributable to that property on the later date. Each of the suggested later sale approaches addressed this difficulty by adopting some recharacterization of the subsequent transfer. The recharacterizations considered were to treat the subsequent transfer as (1) a partial redemption of the partner's interest in the partnership on the later date, (2) a deemed distribution of property on the later date, or (3) a sale of some or all of the partnership interest to the other partners on the later date. If any of these approaches were adopted, rules would have to be provided to coordinate with the other provisions of subchapter K, including the distribution provisions of section 731 and section 733, the basis adjustment provisions of section 734, and the provisions relating to disproportionate distributions of section 751 assets.

For these reasons, the final regulations retain the rules of the proposed regulations relating to non-simultaneous transfers. Accordingly, if a

transfer to a partner that is part of a disguised sale occurs subsequent to the partner's transfer of property to the partnership, the partner will be treated as if he or she received an obligation of the partnership as consideration for the property on the date the partnership acquired ownership of the property.

Comments requested that the regulations detail the collateral tax consequences of disguised sale recharacterization. These regulations are intended to provide rules that determine when a disguised sale has taken place rather than to resolve in detail the varying tax issues arising from sale recharacterization. Since the tax principles and rules that generally apply to sales apply to transactions characterized as sales under these regulations, the Service and the Treasury believe that it is unnecessary to address the various collateral consequences in the final regulations. Collateral consequences will be addressed in subsequent guidance to the extent the Service deems appropriate.

Comments also questioned the absence of anti-abuse rules directed at specific situations, such as related party transactions. The Service and the Treasury believe that general tax principles adequately address these issues. Other comments questioned whether transfers caused by a termination of a partnership under section 708(b)(1)(B) could result in disguised sale treatment under these regulations. The final regulations clarify that such transfers are disregarded for purposes of the disguised sale rules.

B. Facts and Circumstances Test

The final regulations retain the facts and circumstances approach of the proposed regulations. In addition, the final regulations retain the list of factors that, among others, tend to indicate the existence of a disguised sale.

C. Presumptions Related to the Timing of Transfers

The final regulations follow the proposed regulations by providing that transfers between a partnership and a partner that are made within two years of each other are presumed to be a sale (unless one of the exceptions applicable to guaranteed payments for capital, reasonable preferred returns or operating cash flow distributions applies), and transfers made more than two years apart are presumed not to be a sale. Each of these presumptions may be rebutted only by facts and circumstances that clearly establish the contrary. The presumptions are intended to establish which party has the burden of going forward in litigation. In addition, the regulations require that the party against whom the presumption runs must clearly establish that the transaction is or is not a disguised sale as the case may be. Thus, a mere preponderance of evidence (the standard of persuasion that would apply in the absence of the clearly establish requirement) will not suffice.

D. Multiple Property Transfers

In response to comments, the rule contained in the proposed regulations requiring a partner contributing multiple properties to a partnership to allocate the amount realized among the properties based on their values has been deleted. Thus, the final regulations do not provide special rules for the allocation of amounts realized in these transactions.

E. Mixing Bowl Example

The proposed regulations contain an example showing that the Service can rebut the presumption for transfers more than two years apart where, among other facts, more than one partner contributes property to a partnership, the partnership agreement provides for cross-allocations with respect to the contributed properties, and one partner receives a liquidating distribution of the property contributed by the other partner. See Prop. Reg. § 1.707–3(g) *Example 8.* The final regulations retain the mixing bowl example without change, notwithstanding the submission of numerous comments requesting more specific guidance. See § 1.707–3(f) *Example 8.* The example was written to illustrate the facts and circumstances test. The Service and the Treasury emphasize that the example relies on a confluence of factors and is not intended to provide bright-line guidance or to indicate whether the result might change if one or more of the enumerated factors were changed or eliminated.

F. Other Examples

The final regulations provide minor clarification to some of the other examples in § 1.707–3(f), but without adding new facts that would alter the results stated in the proposed regulations.

III. Special Rules Applicable to Certain Distributions

The final regulations adopt, with certain modifications, the special rules applicable to guaranteed payments and preferred returns contained in the proposed regulations. In addition, the final regulations provide greater flexibility with respect to the rules applicable to operating cash flow distributions and reimbursements of preformation expenditures.

A. Guaranteed Payments for Capital

In many cases, a legitimate guaranteed payment for capital is not subject to the entrepreneurial risks of partnership operations and would be treated as part of a sale if the payment were tested under the general rules of § 1.707–3. Accordingly, the final regulations retain the rule of the proposed regulations that a legitimate guaranteed payment for capital is excepted from the general rule and is not treated as part of a sale of property.

Further, the proposed and final regulations provide that a transfer that is characterized by the parties as a guaranteed payment for capital and that is reasonable within the meaning of § 1.707–4(a)(3) will be presumed to be, in fact, a guaranteed payment for capital. A transfer that is characterized by the parties as a guaranteed payment for capital and that is not reasonable will be presumed not to be a guaranteed payment for capital. Each presumption can be rebutted only by facts and circumstances that clearly establish the contrary. If a transfer characterized by the parties as a guaranteed payment for capital is not respected as such, the transfer is subject to the general rules of the final regulations, including the presumptions for transfers made less than or more than two years apart. The final regulations do not provide explicitly that a distribution properly characterized as a guaranteed payment for services is not treated as part of a sale. Although distributions of this type are not specifically excepted from the regulations and are subject to any applicable presumption, guaranteed payments for services should not be considered part of a sale of property under the facts and circumstances test, because they are not related to a transfer of property by a partner. Similarly, a transfer of money that represents a bona fide loan or a transfer of money in repayment of a bona fide loan should not be considered part of a sale of property under the facts and circumstances test.

B. Reasonable Preferred Returns

The final regulations retain the rule of the proposed regulations that a transfer of money that is characterized by the parties as a preferred return and that is reasonable within the meaning of § 1.707–4(a)(3) is presumed not to be part of a sale unless the facts and circumstances clearly establish that the transfer is part of a sale.

C. Operating Cash Flow Distributions

The final regulations retain the rule that provides that transfers of money to a partner during a taxable year that do not exceed the partner's interest in net operating cash flow are presumed not to be part of a sale unless the facts and circumstances clearly establish that the transfers are part of a sale. For this purpose, a partner's interest in a net operating cash flow distribution is determined based on the lesser of the partner's percentage interest in overall partnership profits for the year or the partner's percentage interest in overall partnership profits for the life of the partnership. The final regulations also retain the safe harbor allowing a partner, in any taxable year of the partnership, to use the partner's smallest percentage interest in any material item of partnership income or gain that may be realized in the three-year period beginning with such taxable year.

D. Modifications Made by the Final Regulations to the Special Rules Applicable to Guaranteed Payments, Preferred Returns, and Operating Cash Flow Distributions.

In response to comments, the final regulations have modified the special rules for guaranteed payments, preferred returns, and operating cash flow distributions to provide greater flexibility in their application. Under the proposed and final regulations, a distribution that is characterized as a guaranteed payment for capital or a preferred return is reasonable if the distribution is made pursuant to a written provision of the partnership agreement and is reasonable in amount. The proposed regulations provide, generally, that a distribution is reasonable in amount if the sum of the guaranteed payment for capital and preferred return does not exceed the amount determined by multiplying the partner's unreturned capital balance at the beginning of the taxable year by a specified percentage. The final regulations modify the determination of whether a distribution is reasonable in amount by permitting the partner to choose to replace, in that calculation, its beginning-of-the-year unreturned capital balance with a weighted average capital balance for the year and by clarifying the rule's application where a guaranteed payment or preferred return is compounded more frequently than annually.

Comments also criticize *Example 2* of § 1.707–4(a)(4) of the proposed regulations which describes a distribution determined not to be a guaranteed payment for capital. The final regulations retain the example, but clarify that the non-contributing partner, D, funds entirely the guaranteed payment to C (i.e., is obligated to contribute any shortfall to the partnership necessary to make payment to the contributing partner, C, even in the event of a partnership liquidation). The example also clarifies that had the partnership (or D) purchased the property from C in an installment sale, a market rate of interest would have resulted in payments approximately equal to the guaranteed payments.

In further response to comments, the final regulations clarify the presumption regarding operating cash flow distributions. In determining the net cash flow of a partnership, the final regulations provide that the starting taxable income or loss figure is increased by tax exempt interest and is decreased by capital expenditures only when made other than from reserves or from borrowings the proceeds of which are not included in operating cash flow. If a transfer of operating cash flow exceeds the amount allowed under the operating cash flow presumption, the transfer will qualify for the presumption up to the amount allowed under the presumption. The excess or portion of the transfer that does not qualify as an operating cash flow distribution is tested under the facts and circumstances test, subject to any presumptions that may apply.

The final regulations also modify the proposed regulations to provide that accumulated guaranteed payments for capital, preferred returns, and operating cash flow distributions that meet the requirements for a favorable presumption remain subject to that favorable presumption if paid in subsequent years. As a result of this change, the rule of the proposed regulations regarding distributions within 75 days of year end is no longer necessary and has been deleted.

E. Reimbursement of Preformation Expenditures

The proposed regulations provide that transfers made to reimburse partners for certain capital expenditures incurred within one year prior to contributing property to a partnership are excepted from the rules of § 1.707–3(a) of the proposed regulations. The final regulations extend this exception to expenditures incurred within two years of the transfer by the partner to the partnership. The final regulations retain the proposed rule that reimbursements of capital expenditures are excepted from disguised sale treatment if they do not exceed 20 percent of the fair market value of the property. In the case of a reimbursement that exceeds 20 percent of the value, the final regulations allow the reimbursement to qualify for this exception to the extent of 20 percent of value. Under an alternative rule included in the final regulations, 100 percent of the reimbursements of capital expenditures are excepted from disguised sale treatment if the value of the property contributed by the partner does not exceed 120 percent of the partner's basis in the contributed property.

F. Discretion To Provide Other Exceptions

The final regulations provide that the Commissioner may by revenue ruling or other published guidance except other types of transfers or payments to a partner from treatment as part of a sale. This provision is intended to increase the Commissioner's ability to provide guidance that accommodates reasonable and customary business practices.

IV. Special Rules Relating to Liabilities

A. In General

The final regulations retain the proposed regulation's concept of debt incurred in anticipation of a transfer. Thus, the final regulations continue to distinguish between qualified and nonqualified liabilities. Under the proposed and final regulations, a partnership's assumption of (or taking subject to) a nonqualified liability is treated as part of a sale. In contrast, the assumption of (or taking subject to) a qualified liability is treated as part of a sale only to the extent the partner is otherwise treated as having sold a portion of the property.

The proposed regulations include in the definition of qualified liabilities certain liabilities incurred in the ordinary course of a trade or business in which the property transferred was used, but only if substantially all of the assets of the business are transferred. Comments questioned the necessity for, and application of, the requirement that substantially all of the assets of the business be contributed. The final regulations replace the substantially all requirement with a requirement that the partner must transfer to the partnership all the assets related to that trade or business other than assets that are not material to a continuation of the trade or business. See § 1.705–5(f) *Example 4.*

In response to comments, the final regulations clarify the definition of a qualified liability in two other respects. The final regulations clarify that a qualified liability need only encumber the transferred property throughout the

two-year period prior to the transfer. The final regulations also provide that, consistent with section 7701(g), the fair market value limitation contained in § 1.707–5(a)(6)(ii) of the proposed regulations applies only with respect to recourse liabilities.

New examples have been added to § 1.707–5(f) to illustrate further the substantive rules.

B. Partner's Share of Liability

The final regulations adopt the proposed rule providing that a partner's share of a recourse liability equals the partner's share of the liability under section 752 and the corresponding regulations. The final regulations, however, depart from the proposed rule for determining a partner's share of a nonrecourse liability. The final regulations provide that a partner's share of a nonrecourse liability is determined by applying the same percentage used to determine the partner's share of the excess nonrecourse liability under section 1.752–3(a)(3) (the so-called third-tier allocation rule).

The final regulations change the proposed rule regarding a partner's share of a nonrecourse liability in response to comments and in an effort to achieve greater simplicity. The Service and the Treasury did not adopt the nonrecoruse debt allocation rules provided in section 752 and the regulations thereunder in their entirety, because this approach would tend to produce an inverse relationship between the gain inherent in the contributed property and the extent to which a disguised sale of the property results from the encumbrance.

C. Multiple Liabilities Assumed in Connection With a Plan

The proposed regulations allow the netting of nonqualified liabilities in connection with an integrated plan, but do not allow the netting of nonqualified liabilities with qualified liabilities. The comments criticized this limited netting rule as treating a transferor of appreciated property subject to a nonqualified liability less favorably if the co-transferor's property were encumbered with a qualified liability than if the co-transferor's property were encumbered with a nonqualified liability. In response, the final regulations expand the precontribution netting rule to allow the netting of nonqualified liabilities with qualified as well as nonqualified liabilities assumed or taken subject to in connection with an integrated transaction.

D. Refinancing

The proposed regulations provide that certain partnership debt incurred to refinance other partnership debt will be treated as that other debt. Comments suggested that a similar refinancing rule is needed in situations in which a partner refinances debt prior to a transfer to the partnership. In response to these comments, the final regulations provide that the same refinancing rule applies both to a refinancing by a partner prior to transfer of property to a partnership and to a refinancing of partnership debt.

E. Tiered Partnerships and Other Related Persons

The final regulations include a liability tacking rule for tiered partnerships. The final regulations clarify that if a lower-tier partnership succeeds to a liability of an upper-tier partnership, the liability in the lower-tier partnership retains the same characterization as qualified or nonqualified that it had in the upper-tier partnership. Under the final regulations, the Commissioner may by guidance published in the Internal Revenue Bulletin provide that a similar rule applies in the case of transactions between other related parties.

V. Outbound Transactions Involving a Disguised Sale of Property by a Partnership to a Partner

Section 1.707–6 of the proposed and final regulations provide rules relating to disguised sales by a partnership to a partner. The rules are similar to the rules provided in §§ 1.707–3 and 1.707–5 for disguised sales by a partner to a partnership. However, the final regulations expand the definition of qualified liability in the context of outbound transactions, so that a partnership liability is qualified if it has been in existence for more than two years regardless of whether it has encumbered partnership property during that period.

VI. Disclosure

The proposed and final regulations provide that certain transactions are to be reported by partners and partnerships on Internal Revenue Service Form 8275 or on a statement attached to the partner's return. (Meeting the disclosure requirements of these final regulations does not necessarily satisfy the disclosure requirements of section 6662 of the Code and the regulations proposed thereunder (regarding the penalty for underpayment of tax), if that section is otherwise applicable.) The proposed regulations require disclosure in three situations. Because the final regulations modify the rules for allocation of nonrecourse liabilities, disclosure is no longer required in this situation. The final regulations thus require disclosure in only two situations: (1) When certain transfers to a partner are made within two years of a transfer of property by the partner to the partnership; and (2) when debt is incurred within two years of the earlier of a written agreement to transfer or of a transfer of the property that secures the debt, if the debt, nevertheless, is treated as a qualified liability. Similar disclosure rules are provided in the case of outbound transactions under § 1.707–6 of the final regulations. A further modification of the disclosure rules is contained in § 1.707–8(c) of the final regulations. The final regulations now permit disclosure by the partnership rather than by each transferor separately if more than one partner transfers property to a partnership pursuant to a plan.

VII. Effective Dates

The final regulations apply to transactions with respect to which all transfers considered part of a sale occur after April 24, 1991. However, pursuant to Notice 92–46 published in the Internal Revenue Bulletin, a partnership and its partners may apply the proposed regulations instead of the final regulations to any transaction with respect to which all transfers considered part of a sale occur after April 24, 1991, if at least one of the transfers considered part of a sale occurs before November 30, 1992. The final regulations state that a determination of disguised sale treatment for the period between the effective date of section 707(a)(2) of the Code and April 24, 1991, is to be made based on the statutory language and the guidance provided in the legislative history of section 707(a)(2).

Special Analyses

It has been determined that these regulations are not major rules as defined in Executive Order 12291. Therefore, a Regulatory Impact Analysis is not required. It has also been determined that section 553(b) of the Administrative Procedure Act (5 U.S.C. chapter 5) and the Regulatory Flexibility Act (5 U.S.C. chapter 6) do not apply to these regulations, and, therefore, a final Regulatory Flexibility Analysis is not required. Pursuant to section 7805(f) of the Internal Revenue Code, the notice of proposed rulemaking for these regulations was submitted to the Chief Counsel for Advocacy of the Small

Business Administration for comment on its impact on small business.

Drafting Information

The principal authors of these final regulations are David R. Haglund and Susan T. Edlavitch of the Office of Assistant Chief Counsel (Passthroughs and Special Industries). However, personnel from other offices of the Internal Revenue Service and the Treasury Department participated in their development.

List of Subjects

26 CFR 1.701–1 through 1.771–1

Income taxes, Reporting and recordkeeping requirements.

26 CFR Part 602

Reporting and recordkeeping requirements.

Adoption of Amendments to the Regulations

Accordingly, 26 CFR parts 1 and 602 are amended as follows:

PART 1—INCOME TAX; TAXABLE YEARS BEGINNING AFTER DECEMBER 31, 1953

Paragraph 1. The authority citation for part 1 is amended by adding the following citation:

Authority: 26 U.S.C. 7805 * * * Sections 1.707–2 through 1.707–9 also issued under 26 U.S.C. 707(a)(2). * * *

Par. 2. Section 1.707–0 and §§ 1.707–2 through 1.707–9 are added to read as follows:

§ 1.707–0 Table of contents.

This section lists the captions that appear in §§ 1.707–1 through 1.707–9.

Section 1.707–1 Transactions Between Partner and Partnership

(a) Partner not acting in capacity as partner.
(b) Certain sales or exchanges of property with respect to controlled partnerships.
(1) Losses disallowed.
(2) Gains treated as ordinary income.
(3) Ownership of a capital or profits interest.
(c) Guaranteed payments.

Section 1.707–2 Disguised Payments for Services. [Reserved]

Section 1.707–3 Disguised Sales of Property to Partnership; General Rules

(a) Treatment of transfers as a sale.
(1) In general.
(2) Definition and timing of sale.
(3) Application of disguised sale rules.
(4) Deemed terminations under section 708.
(b) Transfers treated as a sale.
(1) In general.
(2) Facts and circumstances.
(c) Transfers made within two years presumed to be a sale.
(1) In general.
(2) Disclosure of transfers made within two years.
(d) Transfers made more than two years apart presumed not to be a sale.
(e) Scope.
(f) Examples.

Section 1.707–4 Disguised Sales of Property to Partnership; Special Rules Applicable to Guaranteed Payments, Preferred Returns, Operating Cash Flow Distributions, and Reimbursements of Preformation Expenditures

(a) Guaranteed payments and preferred returns.
(1) Guaranteed payment not treated as part of a sale.
(i) In general.
(ii) Reasonable guaranteed payments.
(iii) Unreasonable guaranteed payments.
(2) Presumption regarding reasonable preferred returns.
(3) Definition of reasonable preferred returns and guaranteed payments.
(i) In general.
(ii) Reasonable amount.
(4) Examples.
(b) Presumption regarding operating cash flow distributions.
(1) In general.
(2) Operating cash flow distributions.
(i) In general.
(ii) Operating cash flow safe harbor.
(iii) Tiered partnerships.
(c) Accumulation of guaranteed payments, preferred returns, and operating cash flow distributions.
(d) Exception for reimbursements of preformation expenditures.
(e) Other exceptions.

Section 1.707–5 Disguised Sales of Property to Partnership; Special Rules Relating to Liabilities

(a) Liability assumed or taken subject to by partnership.
(1) In general.
(2) Partner's share of liability.
(i) Recourse liability.
(ii) Nonrecourse liability.
(3) Reduction of partner's share of liability.
(4) Special rule applicable to transfers of encumbered property to a partnership by more than one partner pursuant to a plan.
(5) Special rule applicable to qualified liabilities.
(6) Qualified liability of a partner defined.
(7) Liability incurred within two years of transfer presumed to be in anticipation of the transfer.
(i) In general.
(ii) Disclosure of transfers of property subject to liabilities incurred within two years of the transfer.
(b) Treatment of debt-financed transfers of consideration by partnerships.
(1) In general.
(2) Partner's allocable share of liability.
(i) In general.
(ii) Debt-financed transfers made pursuant to a plan.
(A) In general.
(B) Special rule.
(iii) Reduction of partner's share of liability.
(c) Refinancings.
(d) Share of liability where assumption accompanied by transfer of money.
(e) Tiered partnerships and other related persons.
(f) Examples.

Section 1.707–6 Disguised Sales of Property by Partnership to Partner; General Rules

(a) In general.

Section 1.707–9 Effective Dates and Transitional Rules

(a) Sections 1.707–3 through 1.707–6.
(1) In general.
(2) Transfers occurring on or before April 24, 1991.
(3) Effective date of section 73 of the Tax Reform Act of 1984.
(b) Section 1.707–8 disclosure of certain information.

§ 1.707–2 Disguised payments for services. [Reserved]

§ 1.707–3 Disguised sales of property to partnership; general rules.

(a) *Treatment of transfers as a sale—*
(1) *In general.* Except as otherwise provided in this section, if a transfer of property by a partner to a partnership and one or more transfers of money or other consideration by the partnership to that partner are described in paragraph (b)(1) of this section, the transfers are treated as a sale of property, in whole or in part, to the partnership.

(2) *Definition and timing of sale.* For purposes of §§ 1.707–3 through 1.707–5, the use of the term sale (or any variation of that word) to refer to a transfer of property by a partner to a partnership and a transfer of consideration by a partnership to a partner means a sale or exchange of that property, in whole or in part, to the partnership by the partner acting in a capacity other than as a member of the partnership, rather than a contribution and distribution to which sections 721 and 731, respectively, apply. A transfer that is treated as a sale under paragraph (a)(1) this section is treated as a sale for all purposes of the Internal Revenue Code (*e.g.*, sections 453, 483, 1001, 1012, 1031 and 1274). The sale is considered to take place on the date that, under general principles of Federal tax law, the partnership is considered the owner of the property. If

the transfer of money or other consideration from the partnership to the partner occurs after the transfer of property to the partnership; the partner and the partnership are treated as if, on the date of the sale, the partnership transferred to the partner an obligation to transfer to the partner money or other consideration.

(3) *Application of disguised sale rules.* If a person purports to transfer property to a partnership in a capacity as a partner, the rules of this section apply for purposes of determining whether the property was transferred in a disguised sale, even if it is determined after the application of the rules of this section that such person is not a partner. If after the application of the rules of this section to a purported transfer of property to a partnership, it is determined that no partnership exists because the property was actually sold, or it is otherwise determined that the contributed property is not owned by the partnership for tax purposes, the transferor of the property is treated as having sold the property to the person (or persons) that acquired ownership of the property for tax purposes.

(4) *Deemed terminations under section 708.* In applying the rules of this section, transfers resulting from a termination of a partnership under section 708(b)(1)(B) are disregarded.

(b) *Transfers treated as a sale*—(1) *In general.* A transfer of property (excluding money or an obligation to contribute money) by a partner to a partnership and a transfer of money or other consideration (including the assumption of or the taking subject to a liability) by the partnership to the partner constitute a sale of property, in whole or in part, by the partner to the partnership only if based on all the facts and circumstances—

(i) The transfer of money or other consideration would not have been made but for the transfer of property; and

(ii) In cases in which the transfers are not made simultaneously, the subsequent transfer is not dependent on the entrepreneurial risks of partnership operations.

(2) *Facts and circumstances.* The determination of whether a transfer of property by a partner to the partnership and a transfer of money or other consideration by the partnership to the partner constitute a sale, in whole or in part, under paragraph (b)(1) of this section is made based on all the facts and circumstances in each case. The weight to be given each of the facts and circumstances will depend on the particular case. Generally, the facts and circumstances existing on the date of the earliest of such transfers are the ones considered in determining whether a sale exists under paragraph (b)(1) of this section. Among the facts and circumstances that may tend to prove the existence of a sale under paragraph (b)(1) of this section are the following:

(i) That the timing and amount of a subsequent transfer are determinable with reasonable certainty at the time of an earlier transfer;

(ii) That the transferor has a legally enforceable right to the subsequent transfer;

(iii) That the partner's right to receive the transfer of money or other consideration is secured in any manner, taking into account the period during which it is secured;

(iv) That any person has made or is legally obligated to make contributions to the partnership in order to permit the partnership to make the transfer of money or other consideration;

(v) That any person has loaned or has agreed to loan the partnership the money or other consideration required to enable the partnership to make the transfer, taking into account whether any such lending obligation is subject to contingencies related to the results of partnership operations;

(vi) That a partnership has incurred or is obligated to incur debt to acquire the money or other consideration necessary to permit it to make the transfer, taking into account the likelihood that the partnership will be able to incur that debt (considering such factors as whether any person has agreed to guarantee or otherwise assume personal liability for that debt);

(vii) That the partnership holds money or other liquid assets, beyond the reasonable needs of the business, that are expected to be available to make the transfer (taking into account the income that will be earned from those assets);

(viii) That partnership distributions, allocation or control of partnership operations is designed to effect an exchange of the burdens and benefits of ownership of property;

(ix) That the transfer of money or other consideration by the partnership to the partner is disproportionately large in relationship to the partner's general and continuing interest in partnership profits; and

(x) That the partner has no obligation to return or repay the money or other consideration to the partnership, or has such an obligation but it is likely to become due at such a distant point in the future that the present value of that obligation is small in relation to the amount of money or other consideration transferred by the partnership to the partner.

(c) *Transfers made within two years presumed to be a sale*—(1) *In general.* For purposes of this section, if within a two-year period a partner transfers property to a partnership and the partnership transfers money or other consideration to the partner (without regard to the order of the transfers), the transfers are presumed to be a sale of the property to the partnership unless the facts and circumstances clearly establish that the transfers do not constitute a sale.

(2) *Disclosure of transfers made within two years.* Disclosure to the Internal Revenue Service in accordance with § 1.707–8 is required if—

(i) A partner transfers property to a partnership and the partnership transfers money or other consideration to the partner with a two-year period (without regard to the order of the transfers);

(ii) The partner treats the transfers other than as a sale for tax purposes; and

(iii) The transfer of money or other consideration to the partner is not presumed to be a guaranteed payment for capital under § 1.707–4(a)(1)(ii), is not a reasonable preferred return within the meaning of § 1.707–4(a)(3), and is not an operating cash flow distribution within the meaning of § 1.707–4(b)(2).

(d) *Transfers made more than two years apart presumed not to be a sale.* For purposes of this section, if a transfer of money or other consideration to a partner by a partnership and the transfer of property to the partnership by that partner are more than two years apart, the transfers are presumed not to be a sale of the property to the partnership unless the facts and circumstances clearly establish that the transfers constitute a sale.

(e) *Scope.* This section and § § 1.707–4 through 1.707–9 apply to contributions and distributions of property described in section 707(a)(2)(A) and transfers described in section 707(a)(2)(B) of the Internal Revenue Code.

(f) *Examples.* The following examples illustrate the application of this section.

Example 1. Treatment of simultaneous transfers as a sale. A transfers property X to partnership AB on April 9, 1992, in exchange for an interest in the partnership. At the time of the transfer, property X has a fair market value of $4,000,000 and an adjusted tax basis of $1,200,000. Immediately after the transfer, the partnership transfers $3,000,000 in cash to A. Assume that, under this section, the partnership's transfer of cash to A is treated as part of a sale of property X to the partnership. Because the amount of cash A receives on April 9, 1992, does not equal the fair market value of the property, A is considered to have sold a portion of property

X with a value of $3,000,000 to the partnership in exchange for the cash. Accordingly, A must recognize $2,100,000 of gain ($3,000,000 amount realized less $900,000 adjusted tax basis ($1,200,000 multiplied by $3,000,000/$4,000,000)). Assuming A receives no other transfers that are treated as consideration for the sale of the property under this section, A is considered to have contributed to the partnership, in A's capacity as a partner, $1,000,000 of the fair market value of the property with an adjusted tax basis of $300,000.

Example 2. Treatment of transfers at different times as a sale. (i) The facts are the same as in *Example 1*, except that the $3,000,000 is transferred to A one year after A's transfer of property X to the partnership. Assume that under this section the partnership's transfer of cash to A is treated as part of a sale of property X to the partnership. Assume also that the applicable Federal short-term rate for April, 1992, is 10 percent, compounded semiannually.

(ii) Under paragraph (a)(2) of this section, A and the partnership are treated as if, on April 9, 1992, A sold a portion of property X to the partnership in exchange for an obligation to transfer $3,000,000 to A one year later. Section 1274 applies to this obligation because it does not bear interest and is payable more than six months after the date of the sale. As a result, A's amount realized from the receipt of the partnership's obligation will be the imputed principal amount of the partnership's obligation to transfer $3,000,000 to A, which equals $2,721,088 (the present value on April 9, 1992, of a $3,000,000 payment due one year later, determined using a discount rate of 10 percent, compounded semiannually). Therefore, A's amount realized from the receipt of the partnership's obligation is $2,721,088 (without regard to whether the sale is reported under the installment method). A is therefore considered to have sold only $2,721,088 of the fair market value of property X. The remainder of the $3,000,000 payment ($278,912) is characterized in accordance with the provisions of section 1272. Accordingly, A must recognize $1,904,761 of gain ($2,721,088 amount realized less $816,327 adjusted tax basis ($1,200,000 multiplied by $2,721,088/$4,000,000)) on the sale of property X to the partnership. The gain is reportable under the installment method of section 453 if the sale is otherwise eligible. Assuming A receives no other transfers that are treated as consideration for the sale of property under this section, A is considered to have contributed to the partnership, in A's capacity as a partner, $1,278,912 of the fair market value of property X with an adjusted tax basis of $383,673.

Example 3. Operation of presumption for transfers within two years. (i) C transfers undeveloped land to the CD partnership in exchange for an interest in the partnership. The partnership intends to construct a building on the land. At the time the land is transferred to the partnership, it is unencumbered and has an adjusted tax basis of $500,000 and a fair market value of $1,000,000. The partnership agreement provides that upon completing construction of the building the partnership will distribute $900,000 to C.

(ii) If, within two years of C's transfer of land to the partnership, a transfer is made to C pursuant to the provision requiring a distribution upon completion of the building, the transfer is presumed to be, under paragraph (c) of this section, part of a sale of the land to the partnership. C may rebut the presumption that the transfer is part of a sale if the facts and circumstances clearly establish that—

(A) The transfer to C would have been made without regard to C's transfer of land to the partnership; or

(B) The partnership's obligation or ability to make this transfer to C depends, at the time of the transfer to the partnership, on the entrepreneurial risks of partnership operations.

(iii) For example, if the partnership will be able to fund the transfer of cash to C only to the extent that permanent loan proceeds exceed the cost of constructing the building, the fact that excess permanent loan proceeds will be available only if the cost to complete the building is significantly less than the amount projected by a reasonable budget would be evidence that the transfer to C is not part of a sale. Similarly, a condition that limits the amount of the permanent loan to the cost of constructing the building (and thereby limits the partnership's ability to make a transfer to C) unless all or a substantial portion of the building is leased would be evidence that the transfer to C is not part of a sale, if a significant risk exists that the partnership may not be able to lease the building to that extent. Another factor that may prove that the transfer of cash to C is not part of a sale would be that, at the time the land is transferred to the partnership, no lender has committed to make a permanent loan to fund the transfer of cash to C.

(iv) Facts indicating that the transfer of cash to C is not part of a sale, however, may be offset by other factors. An offsetting factor to restrictions on the permanent loan proceeds may be that the permanent loan is to be a recourse loan and certain conditions to the loan are likely to be waived by the lender because of the creditworthiness of the partners or the value of the partnership's other assets. Similarly, the factor that no lender has committed to fund the transfer of cash to C may be offset by facts establishing that the partnership is obligated to attempt to obtain such a loan and that its ability to obtain such a loan is not significantly dependent on the value that will be added by successful completion of the building, or that the partnership reasonably anticipates that it will have (and will utilize) an alternative source to fund the transfer of cash to C if the permanent loan proceeds are inadequate.

Example 4. Operation of presumption for transfers within two years. E is a partner in the equal EF partnership. The partnership owns two parcels of unimproved real property (*parcels 1 and 2*). Parcels 1 and 2 are unencumbered. Parcel 1 has a fair market value of $500,000, and parcel 2 has a fair market value of $1,500,000. E transfers additional unencumbered, unimproved real property (*parcel 3*) with a fair market value of $1,000,000 to the partnership in exchange for an increased interest in partnership profits of 66⅔ percent. Immediately after this transfer, the partnership sells parcel 1 for $500,000 in a transaction not in the ordinary course of business. The partnership transfers the proceeds of the sale $333,333 to E and $166,667 to F in accordance with their respective partnership interests. The transfer of $333,333 to E is presumed to be, in accordance with paragraph (c) of this section, a sale, in part, of parcel 3 to the partnership. However, the facts of this example clearly establish that $250,000 of the transfer to E is not part of a sale of parcel 3 to the partnership because E would have been distributed $250,000 from the sale of parcel 1 whether or not E had transferred parcel 3 to the partnership. The transfer to E exceeds by $83,333 ($333,333 minus $250,000) the amount of the distribution that would have been made to E if E had not transferred parcel 3 to the partnership. Therefore, $83,333 of the transfer is presumed to be part of a sale of a portion of parcel 3 to the partnership by E.

Example 5. Operation of presumption for transfers more than two years apart. (i) G transfers undeveloped land to the GH partnership in exchange for an interest in the partnership. At the time the land is transferred to the partnership, it is unencumbered and has an adjusted tax basis of $500,000 and a fair market value of $1,000,000. H contributes $1,000,000 in cash in exchange for an interest in the partnership. Under the partnership agreement, the partnership is obligated to construct a building on the land. The projected construction cost is $5,000,000, which the partnership plans to fund with its $1,000,000 in cash and the proceeds of a construction loan secured by the land and improvements.

(ii) Shortly before G's transfer of the land to the partnership, the partnership secures commitments from lending institutions for construction and permanent financing. To obtain the construction loan, H guarantees completion of the building for a cost of $5,000,000. The partnership is not obligated to reimburse or indemnify H if H must make payment on the completion guarantee. The permanent loan will be funded upon completion of the building, which is expected to occur two years after G's transfer of the land. The amount of the permanent loan is to equal the lesser of $5,000,000 or 80 percent of the appraised value of the improved property at the time the permanent loan is closed. Under the partnership agreement, the partnership is obligated to apply the proceeds of the permanent loan to retire the construction loan and to hold any excess proceeds for transfer to G 25 months after G's transfer of the land to the partnership. The appraised value of the improved property at the time the permanent loan is closed is expected to exceed $5,000,000 only if the partnership is able to lease a substantial portion of the improvements by that time, and there is a significant risk that the partnership will not be able to achieve a satisfactory occupancy level. The partnership completes construction of the building for the projected cost of $5,000,000 approximately two years after G's transfer of the land. Shortly thereafter, the permanent loan is funded in the amount of $5,000,000. At the time of funding the land and building have an

appraised value of $7,000,000. The partnership transfers the $1,000,000 excess permanent loan proceeds to G 25 months after G's transfer of the land to the partnership.

(iii) G's transfer of the land to the partnership and the partnership's transfer of $1,000,000 to G occurred more than two years apart. In accordance with paragraph (d) of this section, those transfers are presumed not to be a sale unless the facts and circumstances clearly establish that the transfers constitute a sale of the property, in whole or part, to the partnership. The transfer of $1,000,000 to G would not have been made but for G's transfer of the land to the partnership. In addition, at the time G transferred the land to the partnership, G had a legally enforceable right to receive a transfer from the partnership at a specified time an amount that equals the excess of the permanent loan proceeds over $4,000,000. In this case, however, there was a significant risk that the appraised value of the property would be insufficient to support a permanent loan in excess of $4,000,000 because of the risk that the partnership would not be able to achieve a sufficient occupancy level. Therefore, the facts of this example indicate that at the time G transferred the land to the partnership the subsequent transfer of $1,000,000 to G depended on the entrepreneurial risks of partnership operations. Accordingly, G's transfer of the land to the partnership is not treated as part of a sale.

Example 6. Rebuttal of presumption for transfers more than two years apart. The facts are the same as in *Example 5*, except that the partnership is able to secure a commitment for a permanent loan in the amount of $5,000,000 without regard to the appraised value of the improved property at the time the permanent loan is funded. Under these facts, at the time that G transferred the land to the partnership the subsequent transfer of $1,000,000 to G was not dependent on the entrepreneurial risks of partnership operations, because during the period before the permanent loan is funded, the permanent lender's obligation to make a loan in the amount necessary to fund the transfer is not subject to the contingencies related to the risks of partnership operations, and after the permanent loan is funded, the partnership holds liquid assets sufficient to make the transfer. Therefore, the facts and circumstances clearly establish that G's transfer of the land to the partnership is part of a sale.

Example 7. Operation of presumption for transfers more than two years apart. The facts are the same as in *Example 6*, except that H does not guarantee either that the improvements will be completed or that the cost to the partnership of completing the improvements will not exceed $5,000,000. Under these facts, if there is a significant risk that the improvements will not be completed, G's transfer of the land to the partnership will not be treated as part of a sale because the lender is required to make the permanent loan if the improvements are not completed. Similarly, the transfers will not be treated as a sale to the extent that there is a significant risk that the cost of constructing the improvements will exceed $5,000,000, because, in the absence of a guarantee of the cost of the improvements by H, the $5,000,000 proceeds of the permanent loan might not be sufficient to retire the construction loan and fund the transfer to G. In either case, the transfer of cash to G would be dependent on the entrepreneurial risks of partnership operations.

Example 8. Rebuttal of presumption for transfers more than two years apart. (i) On February 1, 1992, I, J, and K form partnership IJK. On formation of the partnership, I transfers an unencumbered office building with a fair market value of $50,000,000 and an adjusted tax basis of $20,000,000 to the partnership, and J and K each transfer United States government securities with a fair market value and an adjusted tax basis of $25,000,000 to the partnership. Substantially all of the rentable space in the office building is leased on a long-term basis. The partnership agreement provides that all items of income, gain, loss, and deduction from the office building are to be allocated 45 percent to J, 45 percent to K, and 10 percent to I. The partnership agreement also provides that all items of income, gain, loss, and deduction from the government securities are to be allocated 90 percent to I, 5 percent to J, and 5 percent to K. The partnership agreement requires that cash flow from the office building and government securities be allocated between partners in the same manner as the items of income, gain, loss, and deduction from those properties are allocated between them. The partnership agreement complies with the requirements of § 1.704–1(b)(2)(ii)(*b*). It is not expected that the partnership will need to resort to the government securities or the cash flow therefrom to operate the office building. At the time the partnership is formed, I, J, and K contemplated that I's interest in the partnership would be liquidated sometime after January 31, 1994, in exchange for a transfer of the government securities and cash (if necessary). On March 1, 1995, the partnership transfers cash and the government securities to I in liquidation of I's interest in the partnership. The cash transferred to I represents the excess of I's share of the appreciation in the office building since the formation of the partnership over J's and K's share of the appreciation in the government securities since they are acquired by the partnership.

(ii) I's transfer of the office building to the partnership and the partnership's transfer of the government securities and cash to I occurred more than two years apart. Therefore, those transfers are presumed not to be a sale unless the facts and circumstances clearly establish that the transfers constitute a sale. Absent I's transfer of the office building to the partnership, I would not have received the government securities from the partnership. The facts including the amount and nature of partnership assets) indicate that, at the time that I transferred the office building to the partnership, the timing of the transfer of the government securities to I was anticipated and was not dependent on the entrepreneurial risks of partnership operations. Moreover, the facts indicate that the partnership allocations were designed to effect an exchange of the burdens and benefits of ownership of the government securities in anticipation of the transfer of those securities to I and those burdens and benefits were effectively shifted to I on formation of the partnership. Accordingly, the facts and circumstances clearly establish that I sold the office building to the partnership on February 1, 1992, in exchange for the partnership's obligation to transfer the government securities to I and to make certain other cash transfers to I.

§ 1.707–4 Disguised sales of property to partnership; special rules applicable to guaranteed payments, preferred returns, operating cash flow distributions, and reimbursements of preformation expenditures.

(a) *Guaranteed payments and preferred returns*—(1) *Guaranteed payment not treated as part of a sale*—(i) *In general.* A guaranteed payment for capital made to a partner is not treated as part of a sale of property under § 1.707–3(a) (relating to treatment of transfers as a sale). A party's characterization of a payment as a guaranteed payment for capital will not control in determining whether a payment is, in fact, a guaranteed payment for capital. The term *guaranteed payment for capital* means any payment to a partner by a partnership that is determined without regard to partnership income and is for the use of that partner's capital. See section 707(c). For this purpose, one or more payments are not made for the use of a partner's capital if the payments are designed to liquidate all or part of the partner's interest in property contributed to the partnership rather than to provide the partner with a return on an investment in the partnership.

(ii) *Reasonable guaranteed payments.* Notwithstanding the presumption set forth in § 1.707–3(c) (relating to transfers made within two years of each other), for purposes of section 707(a)(2) and the regulations thereunder a transfer of money to a partner that is characterized by the parties as a guaranteed payment for capital, is determined without regard to the income of the partnership and is reasonable (within the meaning of paragraph (a)(3) of this section) is presumed to be a guaranteed payment for capital unless the facts and circumstances clearly establish that the transfer is not a guaranteed payment for capital and is part of a sale.

(iii) *Unreasonable guaranteed payments.* A transfer of money to a partner that is characterized by the parties as a guaranteed payment for capital but that is not reasonable (within the meaning of paragraph (a)(3) of this section) is presumed not to be a

guaranteed payment for capital unless the facts and circumstances clearly establish that the transfer is a guaranteed payment for capital. A transfer that is not a guaranteed payment for capital is subject to the rules of § 1.707–3.

(2) *Presumption regarding reasonable preferred returns.* Notwithstanding the presumption set forth in § 1.707–3(c) (relating to transfers made within two years of each other), a transfer of money to a partner that is characterized by the parties as a preferred return and that is reasonable (within the meaning of paragraph (a)(3) of this section) is presumed not to be part of a sale of property to the partnership unless the facts and circumstances (including the likelihood and expected timing of the subsequent allocation of income or gain to support the preferred return) clearly establish that the transfer is part of a sale. The term *preferred return* means a preferential distribution of partnership cash flow to a partner with respect to capital contributed to the partnership by the partner that will be matched, to the extent available, by an allocation of income or gain.

(3) *Definition of reasonable preferred returns and guaranteed payments*—(i) *In general.* A transfer of money to a partner that is characterized as a preferred return or guaranteed payment for capital is reasonable only to the extent that the transfer is made to the partner pursuant to a written provision of a partnership agreement that provides for payment for the use of capital in a reasonable amount, and only to the extent that the payment is made for the use of capital after the date on which that provision is added to the partnership agreement.

(ii) *Reasonable amount.* A transfer of money that is made to a partner during any partnership taxable year and is characterized as a preferred return or guaranteed payment for capital is reasonable in amount if the sum of any preferred return and any guaranteed payment for capital that is payable for that year does not exceed the amount determined by multiplying either the partner's unreturned capital at the beginning of the year or, at the partner's option, the partner's weighted average capital balance for the year (with either amount appropriately adjusted, taking into account the relevant compounding periods, to reflect any unpaid preferred return or guaranteed payment for capital that is payable to the partner) by the safe harbor interest rate for that year. The safe harbor interest rate for a partnership's taxable year equals 150 percent of the highest applicable federal rate, at the appropriate compounding period or periods, in effect at any time from the time that the right to the preferred return or guaranteed payment for capital is first established pursuant to a binding, written agreement among the partners through the end of the taxable year. A partner's unreturned capital equals the excess of the aggregate amount of money and the fair market value of other consideration (net of liabilities) contributed by the partner to the partnership over the aggregate amount of money and the fair market value of other consideration (net of liabilities) distributed by the partnership to the partner other than transfers of money that are presumed to be guaranteed payments for capital under paragraph (a)(1)(ii) of this section, transfers of money that are reasonable preferred returns within the meaning of this paragraph (a)(3), and operating cash flow distributions within the meaning of paragraph (b)(2) of this section.

(4) *Examples.* The following examples illustrate the application of paragraph (a) of this section:

Example 1. Transfer presumed to be a guaranteed payment. (i) A transfers property with a fair market value of $100,000 to partnership AB. At the time of A's transfer, the partnership agreement is amended to provide that A is to receive a guaranteed payment for the use of A's capital of 10 percent (compounded annually) of the fair market value of the transferred property in each of the three years following the transfer. The partnership agreement provides that partnership net taxable income and loss will be allocated equally between partners A and B, and that partnership cash flow will be distributed in accordance with the allocation of partnership net taxable income and loss. The partnership would be allowed a deduction in the year paid if the transfers made to A are treated as guaranteed payments under section 707(c). Under the partnership agreement, that deduction would be allocated in the same manner as any other item of partnership deduction. The partnership agreement complies with the requirements of § 1.704–1(b)(2)(ii)(*b*). The partnership agreement does not provide for the payment of a preferred return and, other than the guaranteed payment to be paid to A, no transfer is expected to be made during the three year period following A's transfer that is not an operating cash flow distribution (within the meaning of paragraph (b)(2) of this section). Assume that the highest applicable federal rate in effect at the time of A's transfer is eight percent compounded annually.

(ii) The transfer of money to be made to A under the partnership agreement is characterized by the parties as a guaranteed payment for capital and is determined without regard to the income of the partnership. The transfer is also reasonable within the meaning of § 1.707–4(a)(3). The transfer, therefore, is presumed to be a guaranteed payment for capital. The presumption set forth in § 1.707–3(c) (relating to transfers made within two years of each other) thus does not apply to this transfer. The transfer will not be treated as part of a sale of property to the partnership unless the facts and circumstances clearly establish that the transfer is not a guaranteed payment for capital but is part of a sale.

(iii) The presumption that the transfer is a guaranteed payment for capital is not rebutted, because there are no facts indicating that the transfer is not a guaranteed payment for the use of capital.

Example 2. Transfers characterized as guaranteed payments treated as part of a sale. (i) C and D form partnership CD. C transfers property with a fair market value of $100,000 and an adjusted tax basis of $20,000 in exchange for a partnership interest. D is responsible for managing the day-to-day operations of the partnership and makes no capital contribution to the partnership upon its formation. The partnership agreement provides that C is to receive payments characterized as guaranteed payments and determined without regard to partnership income of $8,333 per year for the first four years of partnership operations for the use of C's capital. In addition, the partnership agreement provides that—

(A) Partnership net taxable income and loss will be allocated 75 percent to C and 25 percent to D; and

(B) All partnership cash flow (determined prior to consideration of the guaranteed payment) will be distributed 75 percent to C and 25 percent to D except that guaranteed payments that the partnership is obligated to make to C are payable solely out of D's share of the partnership's cash flow.

(ii) If D's share of the partnership's cash flow is not sufficient to make the guaranteed payment to C, then D is obligated to contribute any shortfall to the partnership, even in the event the partnership is liquidated. Thus, the effect of the guaranteed payment arrangement is that the guaranteed payment to C is funded entirely by D. The partnership agreement complies with the requirements of § 1.704–1(b)(2)(ii)(*b*). Assume that, at the time the partnership is formed, the partnership or D could borrow $25,000 pursuant to a loan requiring equal payments of principal and interest over a four-year term at the current market interest rate of approximately 12 percent (compounded annually). Assume that the highest applicable federal rate in effect at the time the partnership is formed is 10 percent compounded annually.

(iii) The transfer of money to be made to C under the partnership agreement is characterized by the parties as a guaranteed payment for capital and is determined without regard to the income of the partnership. The transfer is also reasonable within the meaning of § 1.707–4(a)(3). The transfer, therefore, is presumed to be a guaranteed payment for capital. The presumption set forth in § 1.707–3(c) (relating to transfers made within two years of each other) thus does not apply to this transfer. The transfer will not be treated as part of a sale of property to the partnership unless the facts and circumstances clearly establish that

the transfer is not a guaranteed payment for capital and is part of a sale.

(iv) For the first four years of partnership operations, the total guaranteed payments made to C under the partnership agreement will equal $33,332. If the characterization of those payments as guaranteed payments for capital within the meaning of section 707(c) were respected, C would be allocated $24,999 of the deductions that would be claimed by the partnership for those payments, thereby leaving the balance in C's capital account approximately $25,000 less than it would have been if the guaranteed payments had not been made. The guaranteed payments thus have the effect of offsetting approximately $25,000 of the credit made to C's capital account for the property transferred to the partnership by C. C's resulting capital account is approximately equivalent to the capital account C would have had if C had only contributed 75 percent of the property to the partnership. Furthermore, the effect of D's funding the guaranteed payment to C (either through reduced distributions of cash flow to D or additional contributions) is that D's capital account is approximately equivalent to the capital account D would have had if D had contributed 25 percent of the property (or contributed cash so that the partnership could purchase the 25 percent). Moreover, a $25,000 loan requiring equal payments of principal and interest over a four-year term at the current market interest rate of 12 percent (compounded annually), would have resulted in annual payments of principal and interest of $8,230.86. Consequently, the guaranteed payments effectively place the partners in the same economic position that they would have been in had D purchased a one-quarter interest in the property from C financed at the current market rate of interest, and then C and D each contributed their share of the property to the partnership. In view of the burden the guaranteed payments place on D's right to transfers of partnership cash flow and D's legal obligation to make contributions to the partnership to the extent necessary to fund the guaranteed payments, D has effectively purchased through the partnership a one-quarter interest in the property from C.

(v) Under these facts, the presumption that the transfers to C are guaranteed payments for capital is rebutted, because the facts and circumstances clearly establish that the transfers are part of a sale and not guaranteed payments for capital. Under § 1.707–3(a), C and the partnership are treated as if C sold a one-quarter interest in the property to the partnership in exchange for a promissory note evidencing the partnership's obligation to make the guaranteed payments.

(b) *Presumption regarding operating cash flow distributions*—(1) *In general.* Notwithstanding the presumption set forth in § 1.707–3(c) (relating to transfers made within two years of each other), an operating cash flow distribution is presumed not to be part of a sale of property to the partnership unless the facts and circumstances clearly establish that the transfer is part of a sale.

(2) *Operating cash flow distributions*—(i) *In general.* One or more transfers of money by the partnership to a partner during a taxable year of the partnership are operating cash flow distributions for purposes of paragraph (b)(1) of this section to the extent that those transfers are not presumed to be guaranteed payments for capital under paragraph (a)(1)(ii) of this section, are not reasonable preferred returns within the meaning of paragraph (a)(3) of this section, are not characterized by the parties as distributions to the partner acting in a capacity other than as a partner, and to the extent they do not exceed the product of the net cash flow of the partnership from operations for the year multiplied by the lesser of the partner's percentage interest in overall partnership profits for that year or the partner's percentage interest in overall partnership profits for the life of the partnership. For purposes of the preceding sentence, the net cash flow of the partnership from operations for a taxable year is an amount equal to the taxable income or loss of the partnership arising in the ordinary course of the partnership's business and investment activities, increased by tax exempt interest, depreciation, amortization, cost recovery allowances and other noncash charges deducted in determining such taxable income and decreased by—

(A) Principal payments made on any partnership indebtedness;

(B) Property replacement or contingency reserves actually established by the partnership;

(C) Capital expenditures when made other than from reserves or from borrowings the proceeds of which are not included in operating cash flow; and

(D) Any other cash expenditures (including preferred returns) not deducted in determining such taxable income or loss.

(ii) *Operating cash flow safe harbor.* For any taxable year, in determining a partner's operating cash flow distributions for the year, the partner may use the partner's smallest percentage interest under the terms of the partnership agreement in any material item of partnership income or gain that may be realized by the partnership in the three-year period beginning with such taxable year. This provision is merely intended to provide taxpayers with a safe harbor and is not intended to preclude a taxpayer from using a different percentage under the rules of paragraph (b)(2)(i) of this section.

(iii) *Tiered partnerships.* In the case of tiered partnerships, the upper-tier partnership must take into account its share of the net cash flow from operations of the lower-tier partnership applying principles similar to those described in paragraph (b)(2)(i) of this section, so that the amount of the upper-tier partnership's operating cash flow distributions is neither overstated nor understated.

(c) *Accumulation of guaranteed payments, preferred returns, and operating cash flow distributions.* Guaranteed payments for capital, preferred returns, and operating cash flow distributions presumed not to be part of a sale under the rules of paragraphs (a) and (b) of this section do not lose the benefit of the presumption by reason of being retained for distribution in a later year.

(d) *Exception for reimbursements of preformation expenditures.* A transfer of money or other consideration by the partnership to a partner is not treated as part of a sale of property by the partner to the partnership under § 1.707–3(a) (relating to treatment of transfers as a sale) to the extent that the transfer to the partner by the partnership is made to reimburse the partner for, and does not exceed the amount of, capital expenditures that—

(1) Are incurred during the two-year period preceding the transfer by the partner to the partnership; and

(2) Are incurred by the partner with respect to—

(i) Partnership organization and syndication costs described in section 709; or

(ii) Property contributed to the partnership by the partner, but only to the extent the reimbursed capital expenditures do not exceed 20 percent of the fair market value of such property at the time of the contribution. However, the 20 percent of fair market value limitation of this paragraph (d)(2)(ii) does not apply if the fair market value of the contributed property does not exceed 120 percent of the partner's adjusted basis in the contributed property at the time of contribution.

(e) *Other exceptions.* The Commissioner may provide by guidance published in the Internal Revenue Bulletin that other payments or transfers to a partner are not treated as part of a sale for purposes of section 707(a)(2) and the regulations thereunder.

§ 1.707–5 Disguised sales of property to partnership; special rules relating to liabilities.

(a) *Liability assumed or taken subject to by partnership*—(1) *In general.* For

purposes of this section and §§ 1.707–3 and 1.707–4, if a partnership assumes or takes property subject to a qualified liability (as defined in paragraph (a)(6) of this section) of a partner, the partnership is treated as transferring consideration to the partner only to the extent provided in paragraph (a)(5) of this section. By contrast, if the partnership assumes or takes property subject to a liability of the partner other than a qualified liability, the partnership is treated as transferring consideration to the partner to the extent that the amount of the liability exceeds the partner's share of that liability immediately after the partnership assumes or takes subject to the liability as provided in paragraphs (a) (2), (3) and (4) of this section.

(2) *Partner's share of liability.* A partner's share of any liability of the partnership is determined under the following rules:

(i) *Recourse liability.* A partner's share of a recourse liability of the partnership equals the partner's share of the liability under the rules of section 752 and the regulations thereunder. A partnership liability is a recourse liability to the extent that the obligation is a recourse liability under § 1.752–1(a)(1) or would be treated as a recourse liability under that section if it were treated as a partnership liability for purposes of that section.

(ii) *Nonrecourse liability.* A partner's share of a nonrecourse liability of the partnership is determined by applying the same percentage used to determine the partner's share of the excess nonrecourse liability under § 1.752–3(a)(3). A partnership liability is a nonrecourse liability of the partnership to the extent that the obligation is a nonrecourse liability under § 1.752–1(a)(2) or would be a nonrecourse liability of the partnership under § 1.752–1(a)(2) if it were treated as a partnership liability for purposes of that section.

(3) *Reduction of partner's share of liability.* For purposes of this section, a partner's share of a liability, immediately after a partnership assumes or takes subject to the liability, is determined by taking into account a subsequent reduction in the partner's share if—

(i) At the time that the partnership assumes or takes subject to a liability, it is anticipated that the transferring partner's share of the liability will be subsequently reduced; and

(ii) The reduction of the partner's share of the liability is part of a plan that has as one of its principal purposes minimizing the extent to which the assumption of or taking subject to the liability is treated as part of a sale under § 1.707–3.

(4) *Special rule applicable to transfers of encumbered property to a partnership by more than one partner pursuant to a plan.* For purposes of paragraph (a)(1) of this section, if the partnership assumes or takes property or properties subject to the liabilities of more than one partner pursuant to a plan, a partner's share of the liabilities assumed or taken subject to by the partnership pursuant to that plan immediately after the transfers equals the sum of that partner's shares of the liabilities (other than that partner's qualified liabilities, as defined in paragraph (a)(6) of this section) assumed or taken subject to by the partnership pursuant to the plan. This paragraph (a)(4) does not apply to any liability assumed or taken subject to by the partnership with a principal purpose of reducing the extent to which any other liability assumed or taken subject to by the partnership is treated as a transfer of consideration under paragraph (a)(1) of this section.

(5) *Special rule applicable to qualified liabilities.* (i) If a transfer of property by a partner to a partnership is not otherwise treated as part of a sale, the partnership's assumption of or taking subject to a qualified liability in connection with a transfer of property is not treated as part of a sale. If a transfer of property by a partner to the partnership is treated as part of a sale without regard to the partnership's assumption of or taking subject to a qualified liability (as defined in paragraph (a)(6) of this section) in connection with the transfer of property, the partnership's assumption of or taking subject to that liability is treated as a transfer of consideration made pursuant to a sale of such property to the partnership only to the extent of the lesser of—

(A) The amount of consideration that the partnership would be treated as transferring to the partner under paragraph (a)(1) of this section if the liability were not a qualified liability; or

(B) The amount obtained by multiplying the amount of the qualified liability by the partner's net equity percentage with respect to that property.

(ii) A partner's net equity percentage with respect to an item of property equals the percentage determined by dividing—

(A) The aggregate transfers of money or other consideration to the partner by the partnership (other than any transfer described in this paragraph (a)(5)) that are treated as proceeds realized from the sale of the transferred property; by

(B) The excess of the fair market value of the property at the time it is transferred to the partnership over any qualified liability encumbering the property or, in the case of any qualified liability described in paragraph (a)(6)(i) (C) or (D) of this section, that is properly allocable to the property.

(6) *Qualified liability of a partner defined.* A liability assumed or taken subject to by a partnership in connection with a transfer of property to the partnership by a partner is qualified liability of the partner only to the extend—

(i) The liability is—

(A) A liability that was incurred by the partner more than two years prior to the earlier of the date the partner agrees in writing to transfers the property or the date the partner transfers the property to the partnership and that has encumbered the transferred property throughout that two-year period;

(B) A liability that was not incurred in anticipation of the transfer of the property to a partnership, buy that was incurred by the partner within the two-year period prior to the earlier of the date the partner agrees in writing to transfer the property or the date the partner transfers the property to the partnership and that has encumbered the transferred property since it was incurred (see paragraph (a)(7) of this section for further rules regarding a liability incurred within two years of a property transfer or of a written agreement to transfer);

(C) A liability that is allocable under the rules of § 1.163–8T to capital expenditures with respect to the property; or

(D) A liability that was incurred in the ordinary course of the trade or business in which property transferred to the partnership was used or held but only if all the assets related to that trade or business are transferred other than assets that are not material to a continuation of the trade or business; and

(ii) If the liability is a recourse liability, the amount of the liability does not exceed the fair market value of the transferred property (less the amount of any other liabilities that are senior in priority and that either encumber such property or are liabilities described in paragraph (a)(6)(i) (C) or (D) of this section) at the time of the transfer.

(7) *Liability incurred within two years of transfer presumed to be in anticipation of the transfer*—(i) *In general.* For purposes of this section, if within a two-year period a partner incurs a liability (other than a liability described in paragraph (a)(6)(i) (C) or (D) of this section) and transfers property to a partnership or agrees in

writing to transfer the property, and in connection with the transfer the partnership assumes or takes the property subject to the liability, the liability is presumed to be incurred in anticipation of the transfer unless the facts and circumstances clearly establish that the liability was not incurred in anticipation of the transfer.

(ii) *Disclosure of transfers of property subject to liabilities incurred within two years of the transfer.* If a partner treats a liability assumed or taken subject to by a partnership as a qualified liability under paragraph (a)(6)(i)(B) of this section, such treatment is to be disclosed to the Internal Revenue Service in accordance with § 1.707–8.

(b) *Treatment of debt-financed transfers of consideration by partnerships*—(1) *In general.* For purposes of § 1.707–3, if a partner transfers property to a partnership, and the partnership incurs a liability and all or a portion of the proceeds of that liability are allocable under § 1.163–8T to a transfer of money or other consideration to the partner made within 90 days of incurring the liability, the transfer of money or other consideration to the partner is taken into account only to the extent that the amount of money or the fair market value of the other consideration transferred exceeds that partner's allocable share of the partnership liability.

(2) *Partner's allocable share of liability*—(i) *In general.* A partner's allocable share of a partnership liability for purposes of paragraph (b)(1) of this section equals the amount obtained by multiplying the partner's share of the liability as described in paragraph (a)(2) of this section by the fraction determined by dividing—

(A) The portion of the liability that is allocable under § 1.163–8T to the money or other property transferred to the partner; by

(B) The total amount of the liability.

(ii) *Debt-financed transfers made pursuant to a plan.*—(A) *In general.* Except as provided in paragraph (b)(2)(iii) of this section, if a partnership transfers to more than one partner pursuant to a plan all or a portion of the proceeds of one or more partnership liabilities, paragraph (b)(1) of this section is applied by treating all of the liabilities incurred pursuant to the plan as one liability, and each partner's allocable share of those liabilities equals the amount obtained by multiplying the sum of the partner's shares of each of the respective liabilities (as defined in paragraph (a)(2) of this section) by the fraction obtained by dividing—

(*1*) The portion of those liabilities that is allocable under § 1.163–8T to the money or other consideration transferred to the partners pursuant to the plan; by

(*2*) The total amount of those liabilities.

(B) *Special rule.* Paragraph (b)(2)(ii)(A) of this section does not apply to any transfer of money or other property to a partner that is made with a principal purpose of reducing the extent to which any transfer is taken into account under paragraph (b)(1) of this section.

(iii) *Reduction of partner's share of liability.* For purposes of paragraph (b)(2) of this section, a partner's share of a liability, immediately after the partnership assumes or takes subject to the liability, is determined by taking into account a subsequent reduction in the partner's share if—

(A) It is anticipated that the partner's share of the liability that is allocable to a transfer of money or other consideration to the partner will be reduced subsequent to the transfer; and

(B) The reduction of the partner's share of the liability is part of a plan that has as one of its principal purposes minimizing the extent to which the partnership's distribution of the proceeds of the borrowing is treated as part of a sale.

(c) *Refinancings.* To the extent that the proceeds of a partner or partnership liability (the *refinancing debt*) are allocable under the rules of § 1.163–8T to payments discharging all or part of any other liability of that partner or of the partnership, as the case may be, the refinancing debt is treated as the other liability for purposes of applying the rules of this section.

(d) *Share of liability where assumption accompanied by transfer of money.* For purposes of § § 1.707–3 through 1.707–5, if pursuant to a plan a partner pays or contributes money to the partnership and the partnership assumes or takes subject to one or more liabilities (other than qualified liabilities) of the partner, the amount of those liabilities that the partnership is treated as assuming or taking subject to is reduced (but not below zero) by the money transferred.

(e) *Tiered partnerships and other related persons.* If a lower-tier partnership succeeds to a liability of an upper-tier partnership, the liability in the lower-tier partnership retains the characterization as qualified or nonqualified that it had under these rules in the upper-tier partnership. A similar rule applies to other related party transactions involving liabilities to the extent provided by guidance published in the Internal Revenue Bulletin.

(f) *Examples.* The following examples illustrate the application of this section.

Example 1. Partnership's assumption of nonrecourse liability encumbering transferred property. (i) A and B form partnership AB, which will engage in renting office space. A transfers $500,000 in cash to the partnership, and B transfers an office building to the partnership. At the time it is transferred to the partnership, the office building has a fair market value of $1,000,000, an adjusted basis of $400,000, and is encumbered by a $500,000 liability, which B incurred 12 months earlier to finance the acquisition of other property. No facts rebut the presumption that the liability was incurred in anticipation of the transfer of the property to the partnership. Assume that this liability is a nonrecourse liability of the partnership within the meaning of section 752 and the regulations thereunder. The partnership agreement provides that partnership items will be allocated equally between A and B, including excess nonrecourse deductions under § 1.752–3(a)(3). The partnership agreement complies with the requirements of § 1.704–1(b)(2)(ii)(*b*).

(ii) The nonrecourse liability secured by the office building is not a qualified liability within the meaning of paragraph (a)(6) of this section. B would be allocated 50 percent of the excess nonrecourse liability under the partnership agreement. Accordingly, immediately after the partnership's assumption of that liability, B's share of the liability equals $250,000, which is equal to B's 50 percent share of the excess nonrecourse liability of the partnership as determined in accordance with B's share of partnership profits under § 1.752–3(a)(3).

(iii) The partnership's taking subject to the liability encumbering the office building is treated as a transfer of $250,000 of consideration to B (the amount by which the liability ($500,000) exceeds B's share of that liability immediately after taking subject to $250,000)). B is treated as having sold $250,000 of the fair market value of the office building to the partnership in exchange for the partnership's taking subject to a $250,000 liability. This results in a gain of $150,000 ($250,000 minus ($250,000/$1,000,000 multiplied by $400,000)).

Example 2. Partnership's assumption of recourse liability encumbering transferred property. (i) C transfers property Y to a partnership. At the time of its transfer to the partnership, property Y has a fair market value of $10,000,000 and is subject to an $8,000,000 liability that C incurred, immediately before transferring property Y to the partnership, in order to finance other expenditures. Upon the transfer of property Y to the partnership, the partnership assumed the liability encumbering that property. The partnership assumed this liability solely to acquire property Y. Under section 752 and the regulations thereunder, immediately after the partnership's assumption of the liability encumbering property Y, the liability is a recourse liability of the partnership and C's share of that liability is $7,000,000.

(ii) Under the facts of this example, the liability encumbering property Y is not a qualified liability.

Accordingly, the partnership's assumption of the liability results in a transfer of consideration to C in connection with C's transfer of property Y to the partnership in the amount of $1,000,000 (the excess of the liability assumed by the partnership ($8,000,000) over C's share of the liability immediately after the assumption ($7,000,000)). See paragraphs (a) (1) and (2) of this section.

Example 3. Subsequent reduction of transferring partner's share of liability. (i) The facts are the same as in Example 2. In addition, property Y is a fully leased office building, the rental income from property Y is sufficient to meet debt service, and the remaining term of the liability is ten years. It is anticipated that, three years after the partnership's assumption of the liability, C's share of the liability under section 752 will be reduced to zero because of a shift in the allocation of partnership losses pursuant to the terms of the partnership agreement. Under the partnership agreement, this shift in the allocation of partnership losses is dependent solely on the passage of time.

(ii) Under paragraph (a)(3) of this section, if the reduction in C's share of the liability was anticipated at the time of C's transfer, and the reduction was part of a plan that has as one of its principal purposes minimizing the extent of sale treatment under § 1.707–3 (*i.e.*, a principal purpose of allocating a large percentage of losses to C in the first three years when losses were not likely to be realized was to minimize the extent to which C's transfer would be treated as part of a sale), C's share of the liability immediately after the assumption is treated as equal to C's reduced share.

Example 4. Trade payables as qualified liabilities. (i) D and E form partnership DE which will engage in a consulting business that requires no overhead and minimal cash on hand for daily operating expenses. Previously, D and E, as individual sole proprietors, operated separate consulting businesses. D and E each transfer to the partnership sufficient cash to cover daily operating expenses together with the goodwill and trade payables related to each sole proprietorship. Due to uncertainty over the collection rate on the trade receivables related to their sole proprietorships, D and E agree that none of the trade receivables will be transferred to the partnership.

(ii) Under the facts of this example, all the assets related to the consulting business (other than the trade receivables) together with the trade payables were transferred to partnership DE. The trade receivables retained by D and E are not material to a continuation of the trade or business by the partnership because D and E contributed sufficient cash to cover daily operating expenses. Accordingly, the trade payables transferred to the partnership constitute qualified liability under paragraph (a)(6) of this section.

Example 5. Partnership's assumption of a qualified liability as sole consideration. (i) F transfers property Z to a partnership. At the time of its transfer to the partnership, property Z has a fair market value of $165,000 and an adjusted tax basis of $75,000. Also, at the time of the transfer, property Z is subject to a $75,000 liability that F incurred more than two years before transferring property Z to the partnership. The liability has been secured by property Z since it was incurred by F. Upon the transfer of property Z to the partnership, the partnership assumed the liability encumbering that property. The partnership made no other transfers to F in consideration for the transfer of property Z to the partnership. Assume that, under section 752 and the regulations thereunder, immediately after the partnership's assumption of the liability encumbering property Z, the liability is a recourse liability of the partnership and F's share of that liability is $25,000.

(ii) The $75,000 liability secured by property Z is a qualified liability of F because F incurred the liability more than two years prior to the assumption of the liability by the partnership and the liability has encumbered property Z for more than two years prior to that assumption. *See* paragraph (a)(6) of this section. Therefore, since no other transfer to F was made as consideration for the transfer of property Z, under paragraph (a)(5) of this section, the partnership's assumption of the qualified liability of F encumbering property Z is not treated as part of a sale.

Example 6. Partnership's assumption of a qualified liability in addition to other consideration. (i) The facts are the same as in *Example 5*, except that the partnership makes a transfer to D of $30,000 in money that is consideration for F's transfer of property Z to the partnership under § 1.707–3.

(ii) As in *Example 5*, the $75,000 liability secured by property Z is a qualified liability of F. Since the partnership transferred $30,000 to F in addition to assuming the qualified liability under paragraph (a)(5) of this section, the partnership's assumption of this qualified liability is treated as a transfer of additional consideration to F to the extent of the lesser of—

(A) The amount that the partnership would be treated as transferring to F if the liability were not a qualified liability ($50,000 (*i.e.*, the excess of the $75,000 qualified liability over F's $25,000 share of that liability)); or

(B) The amount obtained by multiplying the qualified liability ($75,000) by F's net equity percentage with respect to property Z (one-third).

(iii) F's net equity percentage with respect to property Z equals the fraction determined by dividing—

(A) The aggregate amount of money or other consideration (other than the qualified liability) transferred to F and treated as part of a sale of property Z under § 1.707–3(a) ($30,000 transfer of money); by

(B) F's net equity in property Z ($90,000 (*i.e.*, the excess of the $165,000 fair market value over the $75,000 qualified liability)).

(iv) Accordingly, the partnership's assumption of the qualified liability of F encumbering property Z is treated as a transfer of $25,000 (one-third of $75,000) of consideration to F pursuant to a sale. Therefore, F is treated as having sold $55,000 of the fair market value of property Z to the partnership in exchange for $30,000 in money and the partnership's assumption of $25,000 of the qualified liability. Accordingly, F must recognize $30,000 of gain on the sale (the excess of the $55,000 amount realized over $25,000 of F's adjusted basis for property Z (*i.e.*, one-third of F's adjusted basis for the property, because F is treated as having sold one-third of the property to the partnership)).

Example 7. Partnership's assumptions of liabilities encumbering properties transferred pursuant to a plan. (i) Pursuant to a plan, G and H transfer property 1 and property 2, respectively, to an existing partnership in exchange for interests in the partnership. At the time the properties are transferred to the partnership, property 1 has a fair market value of $10,000 and an adjusted tax basis of $6,000, and property 2 has a fair market value of $10,000 and an adjusted tax basis of $4,000. At the time properties 1 and 2 are transferred to the partnership, a $6,000 nonrecourse liability (*liability 1*) is secured by property 1 and a $7,000 recourse liability of F (*liability 2*) is secured by property 2. Properties 1 and 2 are transferred to the partnership, and the partnership takes subject to liability 1 and assumes liability 2. G and H incurred liabilities 1 and 2 immediately prior to transferring properties 1 and 2 to the partnership and used the proceeds for personal expenditures. The liabilities are not qualified liabilities. Assume that G and H are each allocated $2,000 of liability 1 in accordance with § 1.707–5(a)(2)(ii) (which determines a partner's share of a nonrecourse liability). Assume further that G's share of liability 2 is $3,500 and H's share is $0 in accordance with § 1.707–5(a)(2)(i) (which determines a partner's share of a recourse liability).

(ii) G and H transferred properties 1 and 2 to the partnership pursuant to a plan. Accordingly, the partnership's taking subject to liability 1 is treated as a transfer of only $500 of consideration to G, (the amount by which liability 1 ($6,000) exceeds G's share of liabilities 1 and 2 ($5,500)), and the partnership's assumption of liability 2 is treated as a transfer of only $5,000 of consideration to H (the amount by which liability 2 ($7,000) exceeds H's share of liabilities 1 and 2 ($2,000)). G is treated under the rule in § 1.707–3 as having sold $500 of the fair market value of property 1 in exchange for the partnership's taking subject to liability 1 and H is treated as having sold $5,000 of the fair market value of property 2 in exchange for the assumption of liability 2.

Example 8. Partnership's assumption of liability pursuant to a plan to avoid sale treatment of partnership assumption of another liability. (i) The facts are the same as in *Example 7*, except that—

(A) H transferred the proceeds of liability 2 to the partnership; and

(B) H incurred liability 2 in an attempt to reduce the extent to which the partnership's taking subject to liability 1 would be treated as a transfer of consideration to G (and thereby reduce the portion of G's transfer of property 1 to the partnership that would be treated as part of a sale).

(ii) Because the partnership assumed liability 2 with a principal purpose of reducing the extent to which the partnership's

taking subject to liability 1 would be treated as a transfer of consideration to G, liability 2 is ignored in applying paragraph (a)(3) of this section. Accordingly, the partnership's taking subject to liability 1 is treated as a transfer of $4,000 of consideration to G (the amount by which liability 1 ($6,000) exceeds G's share of liability 1 ($2,000)). On the other hand, the partnership's assumption of liability 2 is not treated as a transfer of any consideration to H because H's share of that liability equals $7,000 as a result of H's transfer of $7,000 in money to the partnership.

Example 9. Partnership's assumptions of qualified liabilities encumbering properties transferred pursuant to a plan in addition to other consideration. (i) Pursuant to a plan, I transfers property 1 and J transfers property 2 plus $10,000 in cash to partnership IJ in exchange for equal interests in the partnership. At the time the properties are transferred to the partnership, property 1 has a fair market value of $100,000, an adjusted tax basis of $5,000, and is encumbered by a qualified liability of $50,000 (*liability 1*). Property 2 has a fair market value of $100,000, an adjusted tax basis of $5,000, and is encumbered by a qualified liability of $70,000 (*liability 2*). Pursuant to the plan, the partnership transferred to I $10,000 in cash. That amount is consideration for I's transfer of property 1 to the partnership under § 1.707–3. In accordance with § 1.707–5(a)(2), I and J are each allocated $25,000 of liability 1 and $35,000 of liability 2.

(ii) Because the partnership transferred $10,000 to I as consideration for the transfer of property, under § 1.707–5(a)(5), the partnership's assumption of liability 1 is treated as a transfer of additional consideration to I, even though liability 1 is a qualified liability, to the extent of the lesser of—

(A) The amount that the partnership would be treated as transferring to I if the liability were not a qualified liability; or

(B) The amount obtained by multiplying the qualified liability by I's net equity percentage with respect to property 1.

(iii) Because I and J transferred properties 1 and 2 to the partnership pursuant to a plan, treating I's qualified liability as a nonqualified liability under § 1.707–5(a)(5)(i)(A) enables I to apply the special rule applicable to transfers of encumbered property to a partnership by more than one partner pursuant to a plan under § 1.707–5(a)(4). Under this alternative test, the partnership's assumption of liability 1 encumbering property 1 is treated as a transfer of zero ($0) additional consideration to I pursuant to a sale. This is because the amount of liability 1 ($50,000) does not exceed the sum of I's share of liability 1 treated as a nonqualified liability ($25,000) and I's share of liability 2 ($35,000)).

(iv) The alternative under § 1.707–5(a)(5)(i)(B) is the amount obtained by multiplying the qualified liability ($50,000) by I's net equity percentage with respect to property 1. I's net equity percentage with respect to property 1 equals one-fifth, the fraction determined by dividing—

(A) The aggregate amount of money or other consideration (other than the qualified liability) transferred to I and treated as part of a sale of property 1 under § 1.707–3(a) (the $10,000 transfer of money; by

(B) I's net equity in property 1 ($50,000 *i.e.*, the excess of the $100,000 fair market value over the $50,000 qualified liability).

(v) Under this alternative test, the partnership's assumption of the qualified liability encumbering property 1 is treated as a transfer of $10,000 (one-fifth of the $50,000 qualified liability) of additional consideration to I pursuant to a sale.

(vi) Applying § 1.707–5(a)(5) to these facts, the partnership's assumption of liability 1 is treated as a transfer of additional consideration to I to the extent of the lesser of—

(A) zero; or

(B) $10,000.

(vii) Therefore, the partnership's assumption of I's qualified liability encumbering property 1 is not treated as a transfer of any additional consideration to I pursuant to a sale, and I is treated as having only received $10,000 of the fair market value of property 1 to the partnership in exchange for $10,000 in cash. Accordingly, I must recognize $9,500 of gain on the sale, that is, the excess of the $10,000 amount realized over $500 of I's adjusted tax basis for property 1 (one-tenth of I's adjusted tax basis for the property, because I is treated as having sold one-tenth of the property to the partnership). Since no other transfer to J was made as consideration for the transfer of property 2, the partnership's assumption of the qualified liability of J encumbering property 2 is not treated as part of a sale.

Example 10. Treatment of debt-financed transfers of consideration by partnership. (i) K transfers property Z to partnership KL in exchange for an interest therein on April 9, 1992. On September 13, 1992, the partnership incurs a liability of $20,000. On November 17, 1992, the partnership transfers $20,000 to K, and $10,000 of this transfer is allocable under the rules of § 1.163–8T to proceeds of the partnership liability incurred on September 13, 1992. The remaining $10,000 is paid from other partnership funds. Assume that, under section 752 and the corresponding regulations, the $20,000 liability incurred on September 13, 1992, is a recourse liability of the partnership and K's share of that liability is $10,000 on November 17, 1992.

(ii) Because a portion of the transfer made to K on November 17, 1992, is allocable under § 1.163–8T to proceeds of a partnership liability that was incurred by the partnership within 90 days of that transfer, K is required to take the transfer into account in applying the rules of this section and § 1.707–3 only to the extent that the amount of the transfer exceeds K's allocable share of the liability used to fund the transfer. K's allocable share of the $20,000 liability used to fund $10,000 of the transfer to K is $5,000 (K's share of the liability ($10,000) multiplied by the fraction obtained by dividing—

(A) The amount of the liability that is allocable to the distribution to K ($10,000); by

(B) The total amount of such liability ($20,000)).

(iii) Therefore, K is required to take into account only $15,000 of the $20,000 partnership transfer to K for purposes of this section and § 1.707–3. Under these facts, assuming the within-two-year presumption is not rebutted, this $15,000 transfer will be treated under the rule in § 1.707–3 as part of a sale by K of property Z to the partnership.

Example 11. Borrowing against pool of receivables. (i) M generates receivables which have an adjusted basis of zero in the ordinary course of its business. For M to use receivables as security for a loan, a commercial lender requires M to transfer the receivables to a partnership in which M has a 90 percent interest. In January, 1992, M transfers to the partnership receivables with a face value of $100,000. N (who is not related to M) transfers $10,000 cash to the partnership in exchange for a 10 percent interest. The partnership borrows $80,000, secured by the receivables, and makes a distribution of $72,000 of the proceeds to M and $8,000 of the proceeds to N within 90 days of incurring the liability. M's share of the liability under § 1.707–5(a)(2) is $72,000 (90 percent × $80,000).

(ii) Because the transfer of the loan proceeds to M is allocable under § 1.163–8T to proceeds of a partnership loan that was incurred by the partnership within 90 days of that transfer, M is required to take the transfer into account in applying the rules of this section and § 1.707–3 only to the extent that the amount of the transfer ($72,000) exceeds M's allocable share of the liability used to fund the transfer. Because the distribution was a debt-financed transfer pursuant to a plan, M's allocable share of the liability is $72,000 ($72,000 × $80,000/80,000) under § 1.707–5(b)(2)(ii). Therefore, M is not required to take into account any of the loan proceeds for purposes of this section and § 1.707–3.

(iii) When the receivables are collected, M must be allocated the gain on the contributed receivables under section 704(c). However, the lender permits the partnership to distribute cash to the partners only to the extent of the value of new receivables contributed to the partnership. In 1993, M contributes additional receivables and receives a distribution of cash. The taxable income recognized by the partnership on the receivables is taxable income of the partnership arising in the ordinary course of the partnership's activities. To the extent the distribution does not exceed 90 percent (M's percentage interest in overall partnership profits) of the partnership's operating cash flow under § 1.707–4(b), the distribution to M is presumed not to be a part of a sale of receivables by M to the partnership, and the presumption is not rebutted under these facts.

§ 1.707–6 Disguised sales of property by partnership to partner; general rules.

(a) *In general.* Rules similar to those provided in § 1.707–3 apply in determining whether a transfer of property by a partnership to a partner and one or more transfers of money or other consideration by that partner to the partnership are treated as a sale of property, in whole or in part, to the partner.

(b) *Special rules relating to liabilities*—(1) *In general.* Rules similar

to those provided in § 1.707–5 apply to determine the extent to which an assumption of or taking subject to a liability by a partner, in connection with a transfer of property by a partnership, is considered part of a sale. Accordingly, if a partner assumes or takes property subject to a qualified liability (as defined in paragraph (b)(2) of this section) of a partnership, the partner is treated as transferring consideration to the partnership only to the extent provided in paragraph (b). If the partner assumes or takes subject to a liability that is not a qualified liability, the amount treated as consideration transferred to the partnership is the amount that the liability assumed or taken subject to by the partner exceeds the partner's share of that liability (determined under the rules of § 1.707–5(a)(2)) immediately before the transfer. Similar to the rules provided in § 1.707–5(a)(4), if more than one partner assumes or takes subject to a liability pursuant to a plan, the amount that is treated as a transfer of consideration by each partner is the amount by which all of the liabilities (other than qualified liabilities) assumed or taken subject to by the partner pursuant to the plan exceed the partner's share of all of those liabilities immediately before the assumption or taking subject to. This paragraph (b)(1) does not apply to any liability assumed or taken subject to by a partner with a principal purpose of reducing the extent to which any other liability assumed or taken subject to by a partner is treated as a transfer of consideration under this paragraph (b).

(2) *Qualified liabilities.* (i) If a transfer of property by a partnership to a partner is not otherwise treated as part of a sale, the partner's assumption of or taking subject to a qualified liability is not treated as part of a sale. If a transfer of property by a partnership to the partner is treated as part of a sale without regard to the partner's assumption of or taking subject to a qualified liability, the partner's assumption of or taking subject to that liability is treated as a transfer of consideration made pursuant to a sale of such property to the partner only to the extent of the lesser of—

(A) The amount of consideration that the partner would be treated as transferring to the partnership under paragraph (b) of this section if the liability were not a qualified liability; or

(B) The amount obtained by multiplying the amount of the liability at the time of its assumption or taking subject to by the partnership's net equity percentage with respect to that property.

(ii) A partnership's net equity percentage with respect to an item of property encumbered by a qualified liability equals the percentage determined by dividing—

(A) The aggregate transfers to the partnership from the partner (other than any transfer described in this paragraph (b)(2)) that are treated as the proceeds realized from the sale of the transferred property to the partner; by

(B) The excess of the fair market value of the property at the time it is transferred to the partner over any qualified liabilities of the partnership that are assumed or taken subject to by the partner at that time.

(iii) For purposes of this section, the definition of a qualified liability is that provided in § 1.707–5(a)(6) with the following exceptions—

(A) In applying the definition, the qualified liability is one that is originally an obligation of the partnership and is assumed or taken subject to by the partner in connection with a transfer of property to the partner; and

(B) If the liability was incurred by the partnership more than two years prior to the earlier of the date the partnership agrees in writing to transfer the property or the date the partnership transfers the property to the partner, that liability is a qualified liability whether or not it has encumbered the transferred property throughout the two-year period.

(c) *Disclosure rules.* Similar to the rules provided in §§ 1.707–3(c)(2) and 1.707–5(a)(7)(ii), a partnership is to disclose to the Internal Revenue Service, in accordance with § 1.707–8, the facts in the following circumstances:

(1) When a partnership transfers property to a partner and the partner transfers money or other consideration to the partnership within a two-year period (without regard to the order of the transfers) and the partnership treats the transfers as other than a sale for tax purposes; and

(2) When a partner assumes or takes subject to a liability of a partnership in connection with a transfer of property by the partnership to the partner, and the partnership incurred the liability within the two-year period prior to the earlier of the date the partnership agrees in writing to the transfer of property or the date the partnership transfers the property, and the partnership treats the liability as a qualified liability under rules similar to § 1.707–5(a)(6)(i)(B).

(d) *Examples.* The following examples illustrate the rules of this section.

Example 1. Sale of property by partnership to partner. (i) A is a member of a partnership. The partnership transfers property X to A. At the time of the transfer, property X has a fair market value of $1,000,000. One year after the transfer, A transfers $1,100,000 to the partnership. Assume that under the rules of section 1274 the imputed principal amount of an obligation to transfer $1,100,000 one year after the transfer of property X is $1,000,000 on the date of the transfer.

(ii) Since the transfer of $1,100,000 to the partnership by A is made within two years of the transfer of property X to A, under rules similar to those provided in § 1.707–3(c), the transfers are presumed to be a sale unless the facts and circumstances clearly establish otherwise. If no facts exist that would rebut this presumption, on the date that the partnership transfers property X to A, the partnership is treated as having sold property X to A in exchange for A's obligation to transfer $1,100,000 to the partnership one year later.

Example 2. Assumption of liability by partner. (i) B is a member of an existing partnership. The partnership transfers property Y to B. On the date of the transfer, property Y has a fair market value of $1,000,000 and is encumbered by a nonrecourse liability of $600,000. B takes the property subject to the liability. The partnership incurred the nonrecourse liability six months prior to the transfer of property Y to B and used the proceeds to purchase an unrelated asset. Assume that, under rule of § 1.707–5(a)(2)(ii) (which determines a partner's share of a nonrecourse liability), B's share of the nonrecourse liability immediately before the transfer of property Y was $100,000.

(ii) The liability is not allocable under the rules of § 1.163–8T to capital expenditures with respect to the property transferred to B and was not incurred in the ordinary course of the trade or business in which the property transferred to the partner was used or held. Since the partnership incurred the nonrecourse liability within two years of the transfer to B, under rules similar to those provided in § 1.707–5(a)(5), the liability is presumed to be incurred in anticipation of the transfer unless the facts and circumstances clearly establish the contrary. Assuming no facts exist to rebut this presumption, the liability taken subject to by B is not a qualified liability. The partnership is treated as having received, on the date of the transfer of property Y to B, $500,000 ($600,000 liability assumed by B less B's share of the $100,000 liability immediately prior to the transfer) as consideration for the sale of one-half ($500,000/$1,000,000) of property Y to B. The partnership is also treated as having distributed to B, in B's capacity as a partner, the other one-half of property Y.

§ 1.707–7 Disguised sales of partnership interests. [Reserved]

§ 1.707–8 Disclosure of certain information.

(a) *In general.* The disclosure referred to in § 1.707–3(c)(2) (regarding certain transfers made within two years of each other), § 1.707–5(a)(7)(ii) (regarding a liability incurred within two years prior to a transfer of property), and § 1.707–6(c) (relating to transfers of property from a partnership to a partner in situations analogous to those listed

above) is to be made in accordance with paragraph (b) of this section.

(b) *Method of providing disclosure.* Disclosure is to be made on a completed Form 8275 or on a statement attached to the return of the transferor of property for the taxable year of the transfer that includes the following:

(1) A caption identifying the statement as disclosure under section 707;

(2) An identification of the item (or group of items) with respect to which disclosure is made;

(3) The amount of each item; and

(4) The facts affecting the potential tax treatment of the item (or items) under section 707.

(c) *Disclosure by certain partnerships.* If more than one partner transfers property to a partnership pursuant to a plan, the disclosure required by this section may be made by the partnership on behalf of all the transferors rather than by each transferor separately.

§ 1.707-9 Effective dates and transitional rules.

(a) *Sections 1.707-3 through 1.707-6*—(1) *In general.* Except as provided in paragraph (a)(3) of this section, §§ 1.707-3 through 1.707-6 apply to any transaction with respect to which all transfers that are part of a sale of an item of property occur after April 24, 1991.

(2) *Transfers occurring on or before April 24, 1991.* Except as otherwise provided in paragraph (a)(3) of this section, in the case of any transaction with respect to which one or more of the transfers occurs on or before April 24, 1991, the determination of whether the transaction is a disguised sale of property (including a partnership interest) under section 707(a)(2) is to be made on the basis of the statute and the guidance provided regarding that provision in the legislative history of section 73 of the Tax Reform Act of 1984 (Pub. L. 98-369, 98 Stat. 494). See H.R. Rep. No. 861, 98th Cong., 2d Sess. 859-62 (1984); S. Prt. No. 169 (Vol. I), 98th Cong., 2d Sess. 223-32 (1984); H.R. Rep. No. 432 (Pt. 2), 98th Cong., 2d Sess. 1216-21 (1984).

(3) *Effective date of section 73 of the Tax Reform Act of 1984.* Sections 1.707-3 through 1.707-6 do not apply to any transfer of money or other consideration to which section 73(a) of the Tax Reform Act of 1984 (Pub. L. 98-369, 98 Stat. 494) does not apply pursuant to section 73(b) of that Act.

(b) *Section 1.707-8 disclosure of certain information.* The disclosure provisions described in § 1.707-8 apply to transactions with respect to which all transfers that are part of a sale of property occur after September 30, 1992.

PART 602—OMB CONTROL NUMBERS UNDER THE PAPERWORK REDUCTION ACT

Par. 3. The authority citation for part 602 continues to read as follows:

Authority: 26 U.S.C. 7805.

Par. 4. Section 602.101(c) is amended by adding the following entries in the table:

§ 602.101 OMB Control Numbers.

* * * * *

(c) * * *

CFR part or section where identified and described	Current OMB control number
* * * * *	
1.707-3(c)(2)	1545-1243

Arbitrage Restrictions on Tax-Exempt Bonds; Correction

AGENCY: Internal Revenue Service, Treasury.

ACTION: Correction to final and temporary regulations.

SUMMARY: This document contains corrections to Treasury Decision 8418, which was published in the **Federal Register** for Monday, May 18, 1992 (57 FR 20971). The final and temporary regulations relate to the arbitrage rebate requirements applicable to tax-exempt bonds issued by States and local governments under section 103 of the Internal Revenue Code.

EFFECTIVE DATE: May 18, 1992.

FOR FURTHER INFORMATION CONTACT: William P. Cejudo (202) 622-7750 (not a toll-free number).

SUPPLEMENTARY INFORMATION:

Background

The final and temporary regulations that are the subject of these corrections provide rules under section 148 concerning the use of proceeds of state and local bonds to acquire higher yielding investments.

Need for Correction

As published, T.D. 8418 contains errors which may prove to be misleading and are in need of clarification.

Correction of Publication

Accordingly, the publication of final and temporary regulations (T.D. 8418), which was the subject of FR Doc. 92-11321, is corrected as follows:

1. On page 20971, column 1, in the preamble under the heading "*Paperwork Reduction Act*", last line of that column, the language "1545-1303." is corrected to read "1545-1301. All of these paperwork requirements will be consolidated under control number 1545-1098.".

2. On page 20973, column 2, in the preamble under the heading "2. *Special Allocation Rules for Working Capital Expenditures*" paragraph 2, lines 10 through 13, the language "a refunded issue, amounts from a bona fide debt service fund, and extraordinary non-periodic legal judgments. In addition, the special" is corrected to read "a refunded issue and amounts from a bona fide debt service fund. In addition, the special".

3. On page 20977, column 2, under the authority citation, lines 8 and 9, remove the language, "Section 1.149(d)-1T also issued under 26 U.S.C. 148(f) and (i).".

§ 1.148-0 [Corrected]

4. On page 20978, column 3, § 1.148-0(b)(3), last line of that paragraph, the language "1989, or issued after June 14, 1989." is corrected to read "1989, or issued after June 14, 1989; provided that the provisions of 26 CFR 1.148-9T (c) and (h) (as contained in the CFR edition revised as of April 1, 1991) generally apply to any bond that is issued on or before June 17, 1992.".

5. On page 20981, column 3, § 1.148-0(d), the table of contents for § 1.148-9 is corrected by removing the entries for paragraphs (h) and (h)(1) through (h)(3).

§ 1.148-1 [Corrected]

6. On page 20982, column 2, § 1.148-1(a), lines 11 through 13, the language "OT for scope and effective date. See § 1.148-6 for 6 month temporary investment exception. See § 1.148-7 for" is corrected to read "0 for scope and effective date. See § 1.148-6 for expenditure exceptions. See § 1.148-7 for".

§ 1.148–2 [Corrected]

7. On page 20984, column 3, § 1.148–2(c)(1), the formula "FV = PV(1 + i)" is corrected to read "FV = PV(1 + i)^n".

8. On page 20985, column 2, § 1.148–2(c)(2), paragraph (i) of *Example 2*, second line from the bottom of that paragraph, the language "the first installment computation is the same" is corrected to read "the first installment computation date is the same".

9. On page 20986, column 2, § 1.148–2(d)(2), ninth line from the bottom of the column, the language "there are bid and asked prices). The bid" is corrected to read "there are bid and asked prices). If the price paid to purchase an obligation of the type described in the proviso clause of the preceding sentence is higher than the mean of the bid and asked prices, that higher price may be treated as the fair market value of the obligation if that obligation is purchased in a bona fide arm's length transaction without regard to any amount paid to reduce the yield on the obligation. The bid".

10. On page 20986, column 3, § 1.148–2(d)(4), beginning in line 4, the last sentence "See paragraph (e)(2)(iii)(B) of this section for special rule determining this present value." is removed.

§ 1.148–3 [Corrected]

11. On page 20989, column 3, § 1.148–3(b)(7)(iv)(B), lines 4 through 8, the language "value is an amount equal to the sum of the issue price for the bond, determined under § 1.148–6(c), and the amount of accrued original issue discount, determined under section 1288(a)." is corrected to read "value is an amount equal to the present value of the bond."

12. On page 20995, column 1, § 1.148–3(c)(7), under *Example 2*, lines 7 through 11, the language "September 15, 1991, is the issue price of the bonds, plus any accrued original issue discount. See paragraph (b)(7)(iv)(A) of this section. The aggregate early retirement value of the bonds is par plus accrued interest" is corrected to read "September 15, 1991, is par plus accrued interest".

13. On page 21003, column 2, § 1.148–3(d)(4), paragraph (ii)(A) of *Example 9*, lines 3 and 4, the language "All the proceeds of the bonds are expended by that date." is removed.

14. On page 21005, column 3, § 1.148–3(d)(4), paragraph (ii)(G) of *Example 11*, the first line in the table is corrected to read as follows:

Date	Debt service	Guarantee	PV (7.1485008956 percent)
9/01/88		$144,497.67	$144,497.67

* * * * *

§ 1.148–4 [Corrected]

15. On page 21008, column 2, § 1.148–4(c)(5), line 1, the language "(5) *Safe harbors for purchases of*" is corrected to read "(5) *Safe harbor for purchases of*".

16. On page 21009, column 2, § 1.148–4(d)(3)(ii), lines 3 and 4, the language "in paragraphs (d) (3) (ii) (A) and (d) (3) (ii) (B) of this section may be" is corrected to read "in paragraphs (d) (3) (ii) (B) and (d) (3) (ii) (C) of this section may be".

17. On page 21011, column 1, § 1.148–4(e)(6)(i)(A), third line from the bottom of that paragraph, the language "issue, the present value of that bond" is corrected to read "the issue, the present value of that bond".

§ 1.148–5 [Corrected]

18. On page 21012, column 1, § 1.148–5(c)(1)(iii), seventh and eighth lines from the bottom of paragraph, the language "described in paragraph (c) (1) (ii) (A) or (c) (1) (ii) (C) of this section that is" is corrected to read "described in paragraph (c)(1)(ii)(A) of the section that is".

§ 1.148–6 [Corrected]

19. On page 21017, column 1, § 1.148–6(i)(2), seventh line from the bottom of that paragraph, the language "148(f)(4)(c) (viii) or (viii) for any period" is corrected to read "148(f)(4)(C) (vii) or (viii) for any period".

§ 1.148–8 [Corrected]

20. On page 21021, column 3, § 1.148–8(c)(3), lines 3 and 4, the language "determined under this paragraph (c) exceed the fair market value of the bond" is corrected to read "determined under this paragraph (c) be less than the fair market value of the bond".

21. On page 21021, column 3, § 1.148–8(d)(3), fifth line from the bottom of that column, the language "§ 1.103–13(b)(5)(viii), or section 143(g)(2)." is corrected to read "§ 1.103–13(b)(5)(viii), section 143(g)(2) or § 1.148–10(b).".

22. On page 21023, column 2, § 1.148–8(e)(13), line 4, the language "and is not purchased pursuant an" is corrected to read "and is not purchased pursuant to an".

23. On page 21023, column 2, § 1.148–8(e)(14), line 3, the language "an issue, a contract entered into for the" is corrected to read "to an issue, a contract entered into for the".

24. On page 21023, column 2, § 1.148–8(e)(14), line 5, the language "the issue (and elated amounts) from" is corrected to read "the issue (and related amounts) from".

25. On page 21024, column 1, § 1.148–8(h)(4), line 3, the language "§§ 1.148–0T(b)(2)(ii)(C) and 1.148–3" is corrected to read "§§ 1.148–0(b)(2)(ii)(C) and 1.148–3".

§ 1.148–9 [Corrected]

26. On page 21024, bottom of column 1 and top of column 2, § 1.148–9, remove paragraph (h).

27. On page 21025, column 2, in instructional "**Par. 7.**", line 1, the language "**Par. 7.** A new 1.148–11 is added to" is corrected read "**Par. 7.** A new § 1.148–11 is added to".

§ 1.148–11 [Corrected]

28. On page 21026, column 1, § 1.148–11(b)(2)(i), lines 2 and 3, the language "issue is not refunding issue if the proceeds of the issue are used to pay" is corrected to read "issue is not a refunding issue as a result of the use of the proceeds of the issue to pay".

29. On page 21026, column 1, § 1.148–11(b)(2)(i)(C), lines 2 and 3, the language "expenditure (as defined in § 1.148–4(d)(3)(ii))." is corrected to read "expenditure under § 1.148–4(d)(3)(ii)(C).".

30. On page 21026, column 3, § 1.148–11(c)(1)(i)(A) is corrected to read as follows:

* * * * *

"(A) The amounts are reasonably expected by the issuer to become available to be used either for investment for a period of more than 6 months from their date of receipt or for payment of debt service on the prior issue or any other issue (whether or not so used); and"

* * * * *

31. On page 21028, column 1, § 1.148–11(e)(2)(i), seventh line from the top of the column, the language "complies with § 1.148–4(e); provided that" is corrected to read "complies with § 1.148–4 provided that".

32. On page 21028, column 1, § 1.148–11(e)(2)(ii), line 14, the language "with § 1.148–4(e); provided that the" is corrected to read "with § 1.148–4; provided that the".

33. On page 21028, column 3, § 1.148–11(f)(2)(vii), last line of that paragraph, the language "defined in § 1.103–13(b)(12) is 13 months." is corrected to read "defined in § 1.103–13(b)(12)) is 13 months.".

34. On page 21028, column 3, § 1.148–11(f)(3), line 3, the language "may elect

to waive any temporary" is corrected to read "may waive any temporary".

35. On page 21029, column 1, § 1.148 11(g), second and fourth lines from the bottom of that paragraph, the reference "149(d)(3)(v)" is corrected to read "149(d)(3)(A)(v)(II)" in both locations.

36. On page 21030, column 2, § 1.148–11(j)(5), line 2, the language "*allocations*. This paragraph (j) does not" is corrected to read "*allocations*. Except for purposes of section 149(d(3)(A)(i), this paragraph (j) does not".

37. On page 21030, column 2, § 1.148–11(j)(5), last line, the language "permit re-allocations of the 1980 issue." is corrected to read "permit allocations of the 1980 issue under section 148.".

§ 1.148–13T [Corrected]

38. On page 21031, column 1, § 1.148–13T(b)(1), last line of that paragraph, the language "date and" is corrected to read "date; and".

39. On page 21031, column 1, immediately before instructional paragraph 10, a new instructional "**Par. 9A.**" is added to read as follows:

"**Par. 9A.** Section 1.149(d)–1T is removed."

§ 1.149(d)–1 [Corrected]

40. On page 21031, column 2, § 1.149(d)–1(d)(2), second line from the bottom of that paragraph, the language "§ 1.148–0T(b)(2)(ii) for bonds to which" is corrected to read "§ 1.148–0(b)(2)(ii) for bonds to which".

41. On page 21031, column 2, immediately before instructional paragraph 11, instructional "**Par. 10A.**" is added to read as follows:

"**Par. 10A.** Sections 1.150–0T and 1.150–1T are removed."

§ 602.101 [Corrected]

42. On pages 21632 and 21633, bottom of column 3 and continue on the top of column 1 of the next page, § 602.101(c), the entries in the table are corrected to read as follows:

BILLING CODE 4830–01–M

DEPARTMENT OF THE INTERIOR

Minerals Management Service

30 CFR Part 243

RIN 1010–AB13

Revision of Regulation Governing Suspension of Decisions and Orders Pending Appeal

AGENCY: Minerals Management Service (MMS), Interior.

ACTION: Final rule.

SUMMARY: The Minerals Management Service (MMS) of the Department of the Interior is amending its regulations governing administrative appeals from decisions and orders issued by its Royalty Management Program (RMP). The changes eliminate unnecessary steps in the process appellants must undertake to obtain a stay of an appealed MMS decision or order; clarify the administrative appeals process; clarify the requirements for securing unpaid amounts owed the Government pending appeal; and establish a wider range of acceptable surety instruments. The intent and effects of the rule are to reduce administrative burden and costs for both industry and the Federal Government while protecting the interests of Federal and Indian mineral lessors during the pendency of an appeal.

EFFECTIVE DATE: September 30, 1992.

ADDRESSES: Information on the types of surety instruments and the format for surety instruments may be obtained from the Chief, Accounts Receivable and Followup Section (ARFUS). The address for courier delivery is Chief, ARFUS, Minerals Management Service, Royalty Management Program, Denver Federal Center, Building 85, room A–212, Denver, Colorado 80225, or for U.S. Postal Service delivery is Chief, ARFUS, Minerals Management Service, Royalty Management Program, P.O. Box 5810, Denver, Colorado 80217. The telephone number is (303) 231–3401, (FTS) 326–3401, or FAX (303) 231–3711.

FOR FURTHER INFORMATION CONTACT: Dennis C. Whitcomb, Chief, Rules and Procedures Branch, Minerals Management Service, Royalty Management Program, Denver Federal Center, Building 85, P.O. Box 25165, Mail Stop 3910, Denver, Colorado 80225, at (303) 231–3432 or (FTS) 326–3432.

SUPPLEMENTARY INFORMATION: The principal author of this rulemaking is Connie G. Bartram of the Royalty Management Program, Fiscal Accounting Division, Lakewood, Colorado.

I. Background

In the Notice of Proposed Rulemaking (55 FR 6401, February 23, 1990), MMS explained how RMP issues decisions and orders that are subject to administrative appeal to the Director, MMS, pursuant to 30 CFR part 290 (1990). These decisions and orders relate to royalties and other payments due on oil and gas, geothermal, coal, and other solid mineral leases on Federal and Indian lands. These decisions and orders include orders for payments of royalty deficiencies, rentals, interest, penalties (other than penalties assessed under the Federal Oil and Gas Royalty Management Act of 1982 (FOGRMA)), royalty-in-kind contract payments, or other assessments. Some of these decisions or orders are issued by RMP's Royalty Valuation and Standards Division regarding transportation and processing allowances which may be deducted in determining the royalty value of oil, gas, and other minerals produced under Federal and Indian leases. Other decisions and orders are issued by: Fiscal Accounting Division to collect interest and liquidated damages, and to follow-up on delinquent balances; Production Accounting Division to enforce the reporting of production and royalty amounts; and Royalty Compliance Division to collect royalty and other underpayments and enforce access to records required for audit. All of the decisions and orders are necessary to enforce the regulations. In cases where the Director issues or concurs in RMP decisions or orders, an appeal to the Director is precluded (30 CFR 290.2).

The MMS currently has regulations at 30 CFR 243.2 addressing the effectiveness of RMP decisions or orders pending administrative appeal. These regulations provide:

> Compliance with any orders or decisions issued by the Royalty Management Program after August 12, 1983, including payments of additional royalty, rentals, bonuses, penalties or other assessments, shall not be suspended by reason of an appeal having been taken

unless such suspension is authorized in writing by the Director, MMS (or by the Deputy Assistant Secretary for Indian Affairs when Indian lands are involved), and then only upon a determination, at the discretion of the Director, MMS, or Deputy Associate [sic] Secretary for Indian Affairs, that such suspension will not be detrimental to the lessor and upon submission and acceptance of a bond deemed adequate to indemnify the lessor from loss or damage.

At the time the rule was issued in 1984, it was MMS's interpretation that most decisions and orders would not be suspended pending the administrative appeal requested by the appellant. The term "appellant" covers the lessee, payor, reporter, operator, or other party adversely affected by an order or decision issued by MMS. In other words, lessees, payors, reporters, and operators generally were required to pay disputed amounts pending the administrative appeal process, subject to refund if the appellant prevailed. However, in 1986, the Interior Board of Land Appeals (IBLA) construed 30 CFR 243.2 to mean that unless there were special circumstances resulting in detriment to the lessor, the Director was required to stay effectiveness of decisions and orders pending appeal, provided the appellant posted an adequate surety instrument (*Marathon Oil Company*, 90 IBLA 236 (1986)). The MMS has followed IBLA's interpretation since 1986 and, upon request from appellants, has stayed orders that otherwise would have required payment of hundreds of millions of dollars in royalty and other payments during the appeal process. For fluids (oil, gas, and geothermal) leases, the surety instrument is filed with MMS. When coal or other solid mineral leases are involved, the surety instrument held by the Bureau of Land Management (BLM) is increased to cover unpaid royalties, rents, interest, and other mineral-related revenues. Exceptions to this procedure are when BLM has no surety instrument on the lease, the appellant requests to file a separate surety instrument with MMS, or the appellant is not the lessee of record. In these cases, a surety instrument must be provided to MMS pending the appeal. The purpose of this rulemaking is to clarify the regulations regarding suspension of RMP decisions and orders pending appeal.

II. Comments Received on Proposed Rule

As stated above, MMS published a Notice of Proposed Rulemaking in the **Federal Register** on February 23, 1990 (55 FR 6401). The proposed rule provided for a 60-day public comment period ending on April 24, 1990, which was extended to May 24, 1990, by notice in the **Federal Register** on April 3, 1990 (55 FR 12386). During the comment period, 16 commenters submitted written responses which are addressed in this section. The MMS did not receive comments from State or Indian representatives.

(a) Several commenters declared that the administrative appeals process required by MMS is too long. In this regard, some commenters have suggested that appeals to the Director typically take 6 to 8 months for routine cases and often take 2 to 3 years on complex cases. Also, appeals to IBLA typically take 12 to 18 months for routine cases and as long as 5 years to review some appeals. The commenter concluded that the MMS administrative appeals process is not efficient and is very costly to the appellant because the party is required either to pay the disputed amount and seek a refund without interest if it prevails in the appeal or to pay the cost of a surety instrument that is posted during the appeal process. Consequently, the commenter recommended that MMS amend the existing regulations to provide that if an administrative appeal is brought and not completed in 1 year from the time the lessee's briefing is completed or the parties have jointly agreed to an extension of that time, the appellant can abandon the administrative appeals process without prejudice and seek judicial review.

Response: The administrative appeals process is being evaluated to expedite the appeal through the Department. Any changes to the appeals process would need to be made through separate rulemaking and are not a part of this action. Moreover, MMS cannot dictate the IBLA process in these rules; IBLA would need to issue its own regulations establishing time limits. As a result, MMS cannot establish a time period for the total administrative review and the final Department decision.

(b) Several commenters objected to the proposed provision under 30 CFR 243.2(a) (1990) that states:

> Suspension of an order or decision requiring the payment of a specified amount of money shall be contingent upon the appellant's submission within a time period to be prescribed by MMS of an MMS-specified surety deemed adequate to indemnify the lessor from loss or damage * * *.

One of these commenters argued that the preamble to the proposed rulemaking suggests that the suspension pending appeal aspect of the proposal follows the decision in *Marathon Oil Company*, 90 IBLA 236 (1986), yet the total proposal stops well short of the changes in Agency procedures needed.

The commenter further stated that 5 U.S.C. 704 (the Administrative Procedure Act) permits MMS to require administrative appeals, but with the proviso that the action under review be inoperative while the appeal is pending. The commenter maintains that there is no authority that allows MMS to condition administrative appeals by requiring a surety instrument to be posted before an appeal will be considered. The commenter states MMS requires an appellant to take all available administrative appeals but without having the action in dispute stayed, unless an MMS-specified surety instrument is posted, and argues that this procedure is not authorized by the Administrative Procedure Act.

In conclusion, the commenter stated the Secretary of the Interior has the authority, subject to certain well-recognized court-imposed limitations, to require that a party exhaust administrative remedies before seeking judicial review of MMS action. However, if the Secretary elects to exercise that authority, the commenter argues that the Secretary lacks any authority to limit the circumstances under which the effectiveness of an action is suspended pending appeal.

Response: The requirement for the appellant to furnish a surety instrument deemed adequate to indemnify the lessor from loss or damage is critical to stay an order or decision requiring payment. The MMS is required to file a quarterly report with the U.S. Department of the Treasury (Treasury) on unpaid accounts receivable amounts and the length of time the amounts have been outstanding. The Treasury reviews the MMS report to determine if MMS' suspended receivables are fully secured, and thereby will indemnify the lessor from loss. The MMS believes the surety instrument procedure does not constitute a final agency action under the Administrative Procedure Act, 5 U.S.C. 704. The commenters provided no legal support for their argument that a requirement to post a surety instrument as a condition to pursuing an administrative appeal makes an intermediate agency action final.

(c) Many commenters objected to the proposed requirements under 30 CFR 243.2(a) that stated:

> If a decision or order does not require payment of a specific amount of money, but requires recalculation of an obligation followed by payment, suspension of the decision or order is contingent upon the appellant's submission, within the time period prescribed by MMS, of an MMS-

specified surety in an amount MMS determines to reasonably approximate the amount deemed to be owed * * *.

The commenters suggested that in situations where MMS believes some systemic problem exists and does not require payment of a specific amount of money, but requires lessee recalculation of its royalty obligation followed by payment, the regulation should be amended to delete the requirement of a surety instrument altogether. Furthermore, the commenter suggests that because restructured accounting requirements are inherently speculative, the imposition of any surety instrument requirements should be postponed until MMS quantifies the amount in dispute.

Response: The MMS has reconsidered this provision and amended the final regulations to require a surety instrument only when an order or decision requires the payment of a specified amount of money, including an estimated bill which specifies an amount required to be paid.

(d) Several commenters contended that suspension of an order should be automatic at the time an appeal is filed. In this regard, one commenter stated that MMS should take necessary action to determine whether or not it will allow a stay prior to issuing an order and should include such notice in the order to ensure certainty for the appellant. Also, the commenter claims that such a procedure would prevent wasted effort by the appellant in obtaining a surety instrument for an appeal that is denied. Where a stay is denied, the commenter argues that the appellant should be allowed to bypass the administrative appeals process and seek judicial review, without prejudice, in order to expedite resolution and limit the loss of interest, should the appellant ultimately prevail.

Response: The MMS agrees with the comments and has clarified the regulations at 30 CFR 243.2(a), accordingly. The final regulations provide that an order automatically is suspended upon filing the notice of appeal in 30 CFR 290 unless MMS notifies the party at the time of the decision or order that any order will not be suspended. The suspension is conditioned on the provision of an adequate surety instrument, where applicable.

(e) Most of the commenters requested that MMS establish alternate forms of surety instruments under 30 CFR 243.2(b) in addition to those specified in the regulations. The proposed regulations provided:

For purposes of this section, an "MMS-specified surety" means either an MMS-specified "administrative appeal bond" or an MMS-specified "irrevocable letter of credit" * * * The MMS will not accept any other type of surety.

Several commenters believed that MMS should recognize any type of surety instrument that meets the MMS objective of lessor indemnification. Commenters argued that lessees should be given the flexibility to choose a surety instrument type most suitable for their situation. One commenter stated other types of surety instruments are accepted as financial warranties by Government Agencies. For example, the Colorado Board of Reclamation requires for a mining permit any one or more of the following: (1) A surety bond issued by a corporate surety; (2) a letter of credit issued by a bank; (3) a certificate of deposit; (4) a deed of trust as security agreement encumbering real or personal property and creating a lien in favor of the lessor; (5) assurance that a sufficient fund will be created; and (6) a financial statement for the lessee's most recent fiscal year certified by an independent accountant showing evidence of financial stability.

The commenter went on to suggest that other methods could be used where MMS permits an appellant to meet its surety obligation by posting a surety instrument on a case-by-case basis or by posting a single national bond. Also, the commenter believed that the existing lease bonds established by lessees should already be sufficient to cover royalty obligations and no additional surety instrument should be required. As a final recommendation, the commenter urged MMS to extend appellants the flexibility to select from a wider range of surety instrument options.

Response: In the preamble to the proposed regulations, MMS stated that it was studying the use of alternative surety instruments and would like comments on the feasibility of establishing interest-bearing escrow accounts at financial institutions, submitting Treasury bonds or notes to be held by MMS, or any other alternatives. The MMS studied various forms of surety instruments including the alternatives suggested in the public comments. Consideration was given to the relative cost to the appellant in obtaining different forms of surety coverage, the importance of the appellant providing a surety instrument timely, the protection afforded to the lessor, and the burden on MMS in administering various types of surety instruments. For example, one surety form MMS studied was interest-bearing Treasury book-entry bonds and notes deposited with the Federal Reserve Bank. After conferring with Federal Reserve Bank officials, MMS is adding Treasury book-entry bonds and notes to 30 CFR 243.2(b).

A surety instrument type that was recommended in the public comments and found to be a workable alternative to the administrative appeal bond and the irrevocable letter of credit was the certificate of deposit. The MMS will accept the certificate of deposit as a surety instrument on the appeal if it is in book-entry form. This type of surety instrument must be issued by an acceptable financial institution, must be interest-bearing, readily available to the appellant, and must afford acceptable protection to the lessor. Accordingly, MMS is adding this form of surety instrument to 30 CFR 243.2(b). However, if either the letter of credit or the certificate of deposit is not issued by a bank with an acceptable bank rating or confirmed by a bank with an acceptable rating, the appellant must submit another surety instrument.

In response to the comment that MMS should allow the appellant to meet its surety obligation on a case-by-case basis or post a single nationwide bond, MMS believes a separate surety instrument is required for each appeal unless the amount under appeal is properly secured by another posted surety instrument. The appellant may post a single administrative bond or letter of credit that covers multiple bills for collection that are under appeal. The single surety instrument must list in detail all bills with the amount. The single surety instrument will be amended annually to either add new bills under appeal or remove bills that have been adjudicated. The single surety instrument will only be updated once a year to minimize the administrative burden to the appellant and MMS. New bills under appeal during the year would require a separate surety instrument until they could be covered by the single surety instrument.

Finally, in response to the comment that existing lease bonds posted by lessees should already be sufficient to cover royalty obligations and no additional surety instrument should be required, the MMS disagrees with the statement for appeal amounts greater than $1,000. The lease bonds for onshore Federal and Indian leases may be insufficient to cover disputed amounts under appeal and may also be used to cover lease reclamation expenses. The Offshore Federal lease bonds are focused on recovery of minimal lease abandonment costs and only nominal amounts of unpaid royalties. Accordingly, the bonds would not be adequate to cover amounts under an

appeal. As a result, MMS has rejected the recommendations to allow existing lease bonds to cover the surety requirement necessary for the appeal, except for minor amounts under appeal of $1,000 or less on fluids (oil, gas, and geothermal) leases. In those cases, MMS, will allow existing lease bonds to cover the surety requirement. For coal and other solid mineral leases, MMS will require that BLM lease surety instruments be increased to cover royalty obligations in accordance with established procedures. In cases where there is no lease surety instrument, or the appellant chooses to provide a separate surety instrument to MMS, or the appellant is not the lessee of record, then an "MMS-specified surety instrument" is required.

(f) One commenter stated that 30 CFR 243.2(c) should be revised to ensure that MMS is required to furnish the amended or updated surety instrument amount to the appellant within a timeframe that would allow the appellant to update the surety instrument. The commenter recommended that MMS should furnish the amended amount to the appellant within 30 days of the expiration date of the surety instrument. This would allow the appellant to complete the administrative processing necessary to meet MMS requirements.

Response: The procedure currently used by MMS to update surety instrument amounts is to notify the appellant 45 days prior to the expiration date of the current surety instrument. MMS' notice is not required by the regulations, and its failure to provide the notice will not relieve the appellant of the duty to update its surety instrument. Also, appellants have suggested that an automatic renewal clause in the posted surety instrument would eliminate the burden on the appellant and MMS to meet deadlines to update surety instruments due to expire. The MMS agrees with this initiative and § 243.2(b)(1) requires an automatic renewal clause in new letters of credit and certificates of deposit.

(g) One commenter objected to the proposed requirement under 30 CFR 243.2(d) that stated:

> An appeal from an order or decision requiring payment of money shall be dismissed by the Director, MMS, or the Assistant Secretary for Indian Affairs, if the appellant fails to make the required payment of fails to submit adequate surety * * *. If an appeal is dismissed pursuant to this paragraph, the decision or order shall be deemed final and any monies owed will be due and payable with no further right of administrative review pursuant to 30 CFR part 290 or 43 CFR part 4.

The commenter believed that there would be factual disputes as to whether a particular party failed to make the required payment or failed what constitutes the required payment or adequate surety instrument under the regulation. To be fair to the appellant, the commenter stated that MMS's dismissal of an appeal for failure to prepay should not be foreclosed and the appellant should have the right to appeal the dismissal. It was recommended that the appeal be limited to the question of whether the appellant had failed to make the required payment or to submit an adequate surety instrument.

Response: The MMS has reconsidered this issue and determined that the Director generally should continue to consider an administrative appeal even if the appellant fails to provide an adequate surety instrument. However, in such an event, for oil and gas leases MMS may pursue a civil in penalty in accordance with section 109 of FOGRMA, 30 U.S.C. 1719, and MMS regulations at 30 CFR 241.20 and 241.51, for failure to either pay or comply with the regulatory requirement to post an adequate surety instrument in order to obtain suspension of an order. The MMS also will take appropriate enforcement action for coal and other leases not covered by FOGRMA.

(h) Concern was expressed with the proposal under 30 CFR 243.2(e) when Indian lands are involved. In particular, many commenters objected to the discussion in the preamble of the proposed rule that stated:

> A situation where MMS might not stay an order to pay is where an Indian lessor would suffer substantial hardship if payments were not made for an extended period of time. The MMS anticipates that these situations would be unusual.

The commenters concluded that even though the preamble to the proposal states that MMS anticipates that the suspension denial situation would be unusual, the proposed rule itself states no grounds for such a denial. As such, the commenters urged MMS to adopt specific language stating that where an appellant has filed a timely appeal, the MMS will deny suspension only to avoid irreparable harm to the lessor.

Response: The MMS agrees with the commenter's recommendation. The final rule in paragraph (d) has been changed to state that MMS or the Deputy Commissioner of Indian Affairs may deny a stay of an order only when an Indian lessor would suffer irreparable harm. The MMS will consult with the BIA, through a mutually agreed-upon process to determine when an Indian lessor would suffer irreparable harm.

(i) Most of the commenters objected to the proposed requirement under 30 CFR 243.2 that stated:

> An MMS order which may be appealed pursuant to 30 CFR part 290 either to the Director, MMS, the Assistant Secretary for Indian Affairs, or the Interior Board of Land Appeals must be appealed in order to exhaust administrative remedies unless the order has been made effective. * * *

One commenter believed that the proposed rule requiring an appellant to exhaust administrative remedies in all circumstances should be eliminated. They argued that it is not the law and has never been the law, and that in *McKart* v. *U.S.* (395 U.S. 194, 89 S. Ct. 1657, 1665 (1969)), the Supreme Court noted that the central purpose of the exhaustion of remedies doctrine is to avoid hindering the judicial review process by failure of the litigant to allow the Agency to make a factual record, or to exercise its discretion or apply its expertise. Furthermore, it argued that courts have refused to require exhaustion of remedies in certain well-established situations, for example: (1) Where the question on appeal is solely one of statutory interpretation; (2) where the administrative process would be futile; (3) where the administrative remedies are inadequate; and (4) where the Agency has had an opportunity to exercise its expertise and has done so.

The commenter recommended that MMS abandon the mandatory exhaustion of remedies portion of the rulemaking and leave administrative appeals a choice wholly up to the appellant. On the other hand, if MMS elects to require the appellant to follow the administrative process before seeking judicial review, MMS should allow certain well-established, court-imposed exceptions.

Response: The MMS believes that the requirement for exhaustion of administrative remedies has resulted in well-considered administrative decision making and has saved substantial time and costs to both Federal courts and litigants in matters which otherwise would have been the subject of extended judicial proceedings. Reversing the longstanding policy on exhaustion of administrative remedies would only burden the courts with many cases which are now resolved at the administrative level. The majority of administrative decisions do not result in actions for judicial review. Therefore, the requirement for exhaustion of administrative remedies will be continued.

The requirement to exhaust administrative remedies has been eliminated already with respect to one royalty-related issue. The Bureau of Land Management (BLM) regulations at 43 CFR 3451.2(e) provide that when BLM gives notice to a coal lessee that its lease terms are being readjusted from a cents-per-ton basis to an ad valorem basis, the readjusted lease terms are effective on the readjustment date even if the lessee appeals the propriety of BLM's readjustment determination through BLM's procedures. Consequently, as of the readjustment date, the lessee is required to pay royalty in accordance with the MMS regulations in 30 CFR part 206 on the value of coal production. If the lessee continues to pay royalty at the cents-per-ton rate and fails to pay royalty in accordance with its readjusted lease terms, and MMS issues an order requiring the lessee to pay the additional royalties, because 43 CFR 3451.2(e) makes the readjustment final, the lessee will not be permitted to appeal or post a surety instrument for the difference in royalties between the cents-per-ton rate and the minimum value required under 30 CFR part 206. However, if the lessee disputes how MMS is calculating value under 30 CFR part 206, it will be permitted to appeal and post a surety instrument with respect to that component of the additional royalty. By way of illustration, assume the cents-per-ton rate was $.50. After readjustment, the lessee fails to pay its additional royalties and MMS orders it to pay its percentage royalty on a value of $16 per ton. The lessee believes the value should only be $15 per ton under 30 CFR part 206. The lessee may appeal to the MMS Director and post a surety instrument only with respect to the dispute between the $15 and $16 value. It must pay the difference between $.50 per ton and the percentage royalty based on a $15 per ton value pending its appeal to the MMS Director. This limitation on what is subject to appeal to the MMS Director is stated in § 243.2(a).

(j) One commenter recommended under 30 CFR 243.3 that the title of Assistant Secretary for Land and Minerals Management be added as an authority that can issue a decision or order which would be a final action for judicial review.

Response: The MMS agrees with the comment and the final rule is amended accordingly.

III. Conclusion

The MMS is amending 30 CFR 243.2 to reflect clearly how RMP decisions and orders will be suspended pending administrative appeal, provided the appeal is timely filed and the appellant submits a surety instrument. Also, in those cases where a surety instrument is not filed, the appellant may be subject to civil penalties for failure to either pay or post the required surety instrument to suspend the decision and order pending administrative appeal. The rule provides that decisions and orders issued by RMP, including, but not limited to, orders for payments of additional royalty, rentals, interest, penalties, royalty-in-kind contract payments, or other assessments, will be suspended by reason of an appeal having been taken pursuant to 30 CFR part 290. Unless the Director, or the Director's delegate, notifies the appellant in writing that the decision or order will not be suspended pending appeal at the time RMP issues the decision or order, it is suspended by reason of an appeal having been taken. Under the final rule, MMS would continue its current practice and stay RMP decisions and orders pending appeal unless there are unusual circumstances. A situation where MMS might not stay an order to pay is where an Indian lessor would suffer irreparable harm if payments were not made for an extended period of time. The MMS anticipates that these situations would be unusual.

The final regulation provides further that suspension of a decision or order requiring the payment of a specified amount of money in excess of $1,000 is contingent upon the appellant's submission, within the time period MMS prescribes, of an MMS-specified surety instrument. For example, an order to a lessee to pay a specified amount of underpaid royalties could not be suspended unless the lessee posted an adequate surety instrument. Of course, an appellant also could pay the disputed amount pending appeal, subject to refund without interest in accordance with MMS refund procedures.

The type of surety instrument that is acceptable depends on what type of lease is involved. In paragraph (b) of § 243.2, MMS defines an "MMS-specified surety instrument" for fluids (oil, gas, and geothermal) leases as including an MMS-specified "administrative appeal bond," an MMS-specified irrevocable letter of credit, Treasury book-entry bonds or notes, and bank book-entry certificates of deposit. An "MMS-specified surety instrument" for coal and other solid mineral leases will continue to be the BLM lease surety instrument which must be increased to cover disputed royalty obligations which are the subject of the appeal, as necessary. The MMS practice of using the BLM surety instrument to suspend MMS decisions and orders pending appeal for other than fluids leases was effective with the December 19, 1988, Memorandum of Understanding between MMS, BLM, and the Bureau of Indian Affairs. The MMS is continuing this practice in the final rule. However, if BLM has no lease surety coverage, or the appellant chooses to provide a separate surety instrument to MMS, or the appellant is not the lessee of record, then an "MMS-specified surety instrument" is required.

The new rule continues the practice of using Form MMS–4326, "administrative appeal bond," as an acceptable surety instrument. The bond must be issued by a qualified surety company approved by the Treasury. Letters of credit are also acceptable. The form used for the letter of credit which is acceptable to MMS may be obtained from the person named in the **FOR FURTHER INFORMATION CONTACT** section of this final rule.

Treasury bonds or notes must be book-entry only. The bank book-entry certificate of deposit must be issued by a financial institution acceptable to MMS.

The MMS has millions of dollars of existing surety instruments. These surety instruments will be accepted until their expiration date at which time they must be updated to comply with the new requirements.

Under the new rules, MMS will accept a single surety instrument that covers multiple amounts under appeal. The surety instrument must be amended annually to either add new amounts or remove amounts that have been adjudicated. New amounts under appeal during each year would require a separate surety instrument until covered by the single surety instrument at the annual amendment.

The "MMS-specified surety instrument" for RMP is subject to approval by the bond-approving officer. The designated bond-approving officer for RMP is the Associate Director for Royalty Management or delegated officials. The MMS will provide the appellants in writing with information and standard forms on "MMS-specified surety instrument" requirements.

To evaluate the adequacy of bank instruments and the financial security provided, MMS has established a procedure to use a bankrating service. The RMP currently uses the Keefe Bankwatch rating service. Acceptable minimum ratings are: "C" for any bank used for surety instruments under $1 million, a "B/C" rating for surety instruments between $1 million and $10

million, and a "B" rating for surety instruments over $10 million. If the bank issuing the surety instrument either does not meet the bankrating level or falls below the rating for the amount of the required coverage, the bank may have an acceptable bank confirm the surety instrument. The appellant may also choose to submit another surety type that is acceptable to MMS. A satisfactory replacement surety instrument must be submitted to MMS after written notice to avoid collection on the existing surety instrument. The MMS will publish a notice in the **Federal Register** when there is a change in the bankrating service used by RMP.

Paragraph § 243.2(c) provides that the bond, letter of credit, Treasury book-entry bond or note, or bank book-entry certificate of deposit must be adequate to cover the amount owed plus interest accrued to date, as well as the estimated interest that will accrue for 1 additional year. The Treasury book-entry bond or note must be for an amount equal to 120 percent of the required surety amount to allow for market fluctuations. If the administrative appeal process continues more than 1 year, then the appellant would be required to increase the amount of the existing surety instrument, extend the surety period, or submit a new surety instrument, as necessary to cover estimated interest that will accrue for 1 additional year. This procedure continues existing MMS practice for appeals applicable to fluids (oil, gas, and geothermal) leases. As explained above, MMS will use existing BLM lease surety instruments for appeals applicable to coal and other solid mineral leases increased to cover royalty obligations, as necessary. These surety instruments must also be increased annually to cover additional interest.

These regulations reaffirm the Department's intent that, in the usual case, a lessee, payor, reporter, operator, or other party receiving an RMP decision or order is required to pursue an administrative appeal before seeking judicial review. Under the Department's rules in 43 CFR 4.21 (1990), RMP decisions or orders on appeal to IBLA are suspended pending review of the matter by IBLA unless other regulations provide otherwise. Paragraph § 243.2(e) provides that generally RMP decisions and orders continue to be suspended pending IBLA review provided the appellant maintains adequate surety coverage. This paragraph applies the surety coverage requirements of § 243.2 to appeals to IBLA. In some situations, as discussed above, the Director could deny a stay pending IBLA administrative review provided that the Director so notifies the appellant in writing. Under paragraph § 243.2(d), if the Director makes a decision or order immediately effective, then the appellant's rights to such further administrative review or judicial review are provided in 43 CFR part 4.

The final rule also adds two new §§ 243.2(e) and 243.2(f) for purposes of clarification and procedural efficiency. The new § 243.2(e) provides that final actions of the Department of the Interior with respect to MMS orders will be suspended pending judicial review under 5 U.S.C. 705 if the plaintiff seeking review submits or maintains a surety instrument in accordance with § 243.2. Thus, the same surety instruments submitted as security pending administrative appeal may be continued in effect for purposes of a suspension pending judicial review. Final actions of the Department within the meaning of this subsection include decisions of the IBLA, decisions of the Assistant Secretary for Land and Minerals Management or the Assistant Secretary for Indian Affairs (which are not appealable to the IBLA), decisions of the Director of the Office of Hearings and Appeals or the Secretary, or MMS decisions or orders which have been made effective pending further administrative appeal under § 243.2(a) where the appellant chooses to seek immediate judicial review rather than to pursue further administrative appeal.

An exception exists for any particular case where the Department may, in view of unusual circumstances, seek to make particular action effective pending judicial review, in which case the Government will notify the court that it will not agree to suspension of the effectiveness of the decision pending judicial review. In that event, the court will determine whether the particular decision will be effective pending review, or be suspended on such conditions as the court may find appropriate.

The new § 243.2(f) sets forth the circumstances under which MMS will seek to collect against the surety instrument. This largely reflects and clarifies existing law. If the MMS Director decides an administrative appeal adversely to the appellant, and the appellant neither pays the amount due nor pursues an appeal to the IBLA (and maintains an adequate surety instrument pending that appeal), the agency will collect against the surety instrument. Similarly, if the IBLA, the Director of the Office of Hearings and Appeals, an Assistant Secretary, or the Secretary decides a case in MMS' favor, and the appellant neither pays the amount due nor seeks judicial review and maintains an adequate surety instrument in effect, the MMS will collect against the surety instrument. Likewise, if a court on judicial review rules in the Department's favor (in a final nonappealable decision) and the appellant/plaintiff fails to pay the amount due, MMS will collect against the surety instrument. Finally, if an appellant fails to increase the amount of the surety instrument as required under § 243.2(c), or otherwise fails to maintain an adequate surety instrument in effect as required by this rule, the agency will collect against the surety instrument.

The MMS is also adding a new 30 CFR 243.3 to restate that recipients of orders generally must exhaust their administrative remedies before seeking judicial review of MMS orders. If the Director pursuant to § 243.2, or if IBLA pursuant to 43 CFR 4.21, denies a suspension of an order pending appeal, then the recipient may seek either further administrative review or immediate judicial review of that order. No further exhaustion of administrative remedies is required. Because orders approved by Secretarial officers also are final actions for the Department, as discussed above, they too are subject to immediate judicial review. However, § 243.3 clarifies that if an MMS order is not a final action, then that order must be appealed administratively before seeking judicial review. This is in accordance with well-established case law and corresponds with IBLA's rules at 43 CFR 4.21(b) (see *McKart* v. *United States*, 395 U.S. 185 (1969)).

IV. Other Issues

(a) Decisions by the Director or Secretarial Officers

While most RMP decisions and orders are subject to review by the Director and then IBLA, there are exceptions. The regulations at 30 CFR part 290 provide that if the Director issues or expressly approves an RMP decision or order, then the matter is not subject to appeal to the Director and must go to IBLA for administrative review. In those situations, paragraph § 243.2(d)(1) establishes the applicable criteria for suspension of the decision or order pending IBLA review. In those instances where the Director of the Office of Hearings and Appeals or the Secretary takes jurisdiction of an appeal pursuant to 43 CFR 4.5, and grants a further suspension of the effectiveness of the decision or order under review, paragraph (d)(2) establishes the criteria for surety coverage.

Some RMP decisions or orders may be issued or approved by a Secretarial officer such as an Assistant Secretary. In those situations, the decision or order is final for the Department and not subject to administrative review within the Department *(Blue Star, Inc.*, 41 IBLA 333 (1979); *Marathon Oil Co.*, 108 IBLA 177 (1989)). If a lessee or other payor seeks judicial review of such a decision or order, then the stay issue is governed by the Administrative Procedure Act, 5 U.S.C. 704 and 705.

(b) Indian Leases

Under the existing rules in § 243.2, suspensions of decisions and orders involving Indian leases are issued by the Deputy Commissioner of Indian Affairs. Because suspensions are now routinely issued, the final rule provides for MMS to suspend decisions or orders involving Indian leases. As noted above, MMS may deny suspension in appropriate circumstances for Indian leases and will continue to consult with the Deputy Commissioner of Indian Affairs on matters involving Indian leases.

V. Effective Date

Pursuant to the provisions of 5 U.S.C. 553(d), the Department finds that there is good cause to make this final rule effective on the date of publication. The MMS expects to issue many orders before September 30, 1992, and it will benefit persons who appeal such orders if they can take advantage of the expanded surety instrument provisions of these rules. Also, the new rules will reduce the burdens on appellants by eliminating the requirement to provide surety instruments for appeals of small amounts and eliminating the requirement to provide surety instruments for appeals of certain orders to perform restructured accountings.

VI. Procedural Matters

Executive Order No. 12291 and Regulatory Flexibility Act

The Department has determined that this document is not a major rule under Executive Order 12291 and certifies that this document will not have a significant economic effect on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 et seq.). The changes included in this rulemaking are clarifying amendments only and not substantive changes. There would be no additional reporting or other requirements from industry because the requirement currently exists in MMS regulations.

Executive Order No. 12630

The Department certifies that the rule does not represent a governmental action capable of interference with constitutionally protected property rights. Thus, a Takings Implication Assessment need not be prepared pursuant to Executive Order 12630, "Government Action and Interference with Constitutionally Protected Property Rights."

Executive Order 12778

The Department has certified to the Office of Management and Budget that these final regulations meet the applicable standards provided in sections 2(a) and 2(b)(2) of Executive Order 12778.

Paperwork Reduction Act of 1980

This rule does not contain information collection requirements which require approval by the Office of Management and Budget under 44 U.S.C. 3501 et seq.

National Environmental Policy Act of 1969

The Department has determined that this action does not constitute a major Federal action significantly affecting the quality of the human environment. Therefore, an environmental impact statement is not required under the National Environmental Policy Act of 1969 (42 U.S.C. 4332(2)(C)).

List of Subjects in 30 CFR Part 243

Coal, Continental shelf, Geothermal energy, Government contracts, Indian lands, Mineral royalties, Natural gas, Petroleum, Public lands—mineral resources.

Dated: November 8, 1991.

Richard Roldan,

Deputy Assistant Secretary, Land and Minerals Management.

For the reasons set out in the preamble, 30 CFR part 243 is amended as set forth below:

PART 243—APPEALS, ROYALTY MANAGEMENT PROGRAM

Subpart A—General Provisions

1. The authority citation for part 243 is revised to read as follows:

Authority: 5 U.S.C. 301 et seq.; 25 U.S.C. 396 et seq.; 25 U.S.C. 396a et seq.; 25 U.S.C. 2101 et seq.; 30 U.S.C. 181 et seq.; 30 U.S.C. 351 et seq.; 30 U.S.C. 1001 et seq.; 30 U.S.C. 1701 et seq.; 31 U.S.C. 9701; 43 U.S.C. 1301 et seq.; 43 U.S.C. 1331 et seq.; and 43 U.S.C. 1801 et seq.

2. Section 243.2 is revised to read as follows:

§ 243.2 Suspension of orders or decisions pending appeal.

(a) Compliance with any orders or decisions issued by the Royalty Management Program (RMP) of the Minerals Management Service (MMS), including orders for payments of royalty deficiencies (other than orders to pay additional royalties for the difference between a cents-per-ton royalty clause and an ad volorem royalty clause pursuant to the terms of coal leases following readjustment by the Bureau of Land Management (BLM)), rentals, interest, penalties (other than civil penalties provided for under section 109 of the Federal Oil and Gas Royalty Management Act of 1982, 30 U.S.C. 1719, and implemented in 30 CFR 241.51), royalty-in-kind contract payments, or other assessments, shall be suspended by reason of an appeal having been taken pursuant to 30 CFR part 290 unless the Director, MMS, notifies the appellant in writing that the decision or order shall not be suspended pending appeal. Unless the amount under appeal is $1,000 or less, suspension of an order or decision requiring the payment of a specified amount of money shall be contingent upon the appellant's submission within a time period prescribed by MMS of an MMS-specified surety instrument deemed adequate to indemnify the lessor from loss or damage. Nothing in this paragraph shall be construed to prohibit an appellant from paying any demanded amount pending appeal. If the appeal is granted in whole or in part, the appellant will be entitled to a refund of the amount paid, without interest, in accordance with MMS refund procedures.

(b)(1) For purposes of this section, an "MMS-specified surety instrument" for fluids (oil, gas, and geothermal) leases means either: An MMS-specified administrative appeal bond; an MMS-specified irrevocable letter of credit; Treasury book-entry bond or note; or financial institution book-entry certificate of deposit. The "MMS-specified surety instrument" shall be in a form specified by MMS instructions or approved by MMS. A bond must be issued by a qualified surety company which has been approved by the Department of the Treasury. An irrevocable letter of credit or a certificate of deposit must be from a financial institution acceptable to MMS with a minimum 1-year period of coverage subject to automatic renewal up to 5 years. The MMS will use a bankrating service to determine whether a financial institution has an acceptable rating to provide a surety instrument

deemed adequate to indemnify the lessor from loss or damage. The MMS will accept only an "MMS-specified surety instrument" as qualified in this paragraph and in paragraph (c) of this section. The MMS will accept a single surety instrument that covers multiple amounts under appeal. The single surety instrument must be amended annually to either add new amounts or remove amounts that have been adjudicated. New amounts under appeal each year require a separate surety instrument until covered by the single surety instrument during the annual amendment.

(2) For purposes of this section, an "MMS-specified surety instrument" for other than fluids (oil, gas, and geothermal) leases, is the BLM lease surety instrument which must be increased at the request of MMS to cover royalty and interest obligations. However, if BLM has no lease surety instrument coverage, or the appellant chooses to provide a separate surety instrument to MMS, or the appellant is not the lessee of record, then an "MMS-specified surety instrument" in accordance with paragraph (b)(1) of this section is required.

(3) The "MMS-specified surety instrument" for RMP is subject to approval by a bond-approving officer. The designated bond-approving officer for RMP is the Associate Director for Royalty Management or delegated officials. The MMS will provide in writing to the appellant information and standard forms on "MMS-specified surety instrument" requirements.

(c)(1) The amount of the bond, letter of credit, Treasury book-entry bond or note, or financial institution book-entry certificate of deposit will be determined by MMS and will include the principal amount owed plus any accrued interest owed and projected interest for a 1-year period. In the case of Treasury book-entry bonds or notes, the amount must be equal to 120 percent of the required surety amount.

(2) If a decision on the appeal is not made within 1 year from the date the appeal is filed, appellants who submitted a bond shall amend the bond amount to cover additional estimated interest for another 1-year period. Appellants who submitted a letter of credit, a Treasury book-entry bond or note, or a financial institution book-entry certificate of deposit shall submit, at least 10 calendar days prior to the expiration date, a new surety instrument or an amendment to the existing surety instrument for an additional 1-year period of time with an increase in the amount to cover estimated interest for a 1-year period. In all cases, MMS will determine the additional estimated interest and amended surety instrument amount. If a surety instrument is not amended to include the additional interest coverage at least 10 calendar days prior to the expiration date of the surety instrument, MMS may make a demand against and collect from the surety. The collection against the surety will include the principal amount owed plus accrued interest.

(d)(1) An MMS decision or order that is appealed to the Interior Board of Land Appeals pursuant to 30 CFR part 290 and 43 CFR part 4, shall be suspended pending appeal if the appellant submits or maintains a surety instrument in accordance with the provisions of this section, unless the Director or the Deputy Commissioner of Indian Affairs (when Indian lands are involved) notifies the appellant in writing at the time the decision or order is issued that it will not be suspended pending appeal. The Director or the Deputy Commissioner of Indian Affairs may deny suspension of an appeal to avoid irreparable harm to the lessor.

(2) In any case where the Director of the Office of Hearings and Appeals or the Secretary takes jurisdiction of an administrative appeal involving a Royalty Management Program decision or order pursuant to 43 CFR part 4.5 and grants a suspension of effectiveness of the decision or order subject to the submission of an adequate surety instrument, the appellant must maintain that surety instrument in accordance with the requirements of this section.

(e) An Interior Board of Land Appeals decision, other final action of the Department of the Interior regarding a Royalty Management Program decision or order, or a Royalty Management Program decision or order which is made effective pending appeal under paragraph (a), which is the subject of an action for judicial review in a United States District Court of competent jurisdiction will be suspended pending judicial review pursuant to 5 U.S.C. 705 if the plaintiff seeking review submits or maintains a surety instrument in accordance with the provisions of this section, unless the Government notifies the court that it will not agree to a suspension of the effectiveness of the decision or order pending judicial review.

(f) The MMS may initiate collection against a surety instrument if: (1) The MMS Director decides an administrative appeal adversely to the appellant, and the appellant fails either to pay the disputed amount or pursue a further administrative appeal and maintain an adequate surety instrument pending such appeal;

(2) The Interior Board of Land Appeals, the Director of the Office of Hearings and Appeals, an Assistant Secretary, or the Secretary decides an administrative appeal adversely to the appellant, and the appellant fails either to pay the disputed amount or pursue judicial review and maintain an adequate surety instrument pending such judicial review, in accordance with paragraph (e);

(3) A court of competent jurisdiction issues a final nonappealable decision adverse to the appellant/plaintiff and the appellant/plaintiff fails to pay the disputed amount; or

(4) The appellant fails to increase the amount of the surety instrument as required under paragraph (c) or otherwise fails to maintain an adequate surety instrument in effect.

3. A new § 243.3 is added under subpart A to read as follows:

§ 243.3 Exhaustion of administrative remedies.

In order to exhaust administrative remedies, a decision or order of MMS' Royalty Management Program must be appealed pursuant to 30 CFR part 290 to the Director (or the Deputy Commissioner of Indian Affairs when Indian lands are involved), and subsequently to the Interior Board of Land Appeals under 30 CFR part 290.7 and 43 CFR part 4 unless the order has been made effective by the Director, or by the Assistant Secretary for Land and Minerals Management, or by the Assistant Secretary for Indian Affairs, or by the Interior Board of Land Appeals pursuant to 43 CFR part 4, as applicable.

BILLING CODE 4310-MR-M

DEPARTMENT OF THE TREASURY

Fiscal Service

31 CFR Part 211

RIN 1510-AA33

Delivery of Checks and Warrants to Addresses Outside the United States, Its Territories and Possessions

AGENCY: Financial Management Service, Fiscal Service, Treasury.

ACTION: Final rule; revision.

SUMMARY: This final rule revises the regulations governing the delivery of checks outside the United States by removing the reference to the former People's Republic of Albania. With the resumption of diplomatic relations, there is reasonable assurance that payees

residing in Albania will receive and be able to negotiate checks for full value.

EFFECTIVE DATE: September 30, 1992.

FOR FURTHER INFORMATION CONTACT: William S. Mehr, Chief, Support Service Section, Product Integrity Division, Financial Management Service, Department of the Treasury, Washington, DC 20227, (202) 874–6932.

SUPPLEMENTARY INFORMATION: The United States resumed diplomatic relations with the Republic of Albania on March 15, 1991. There is reasonable assurance that payees living in Albania will receive checks or warrants drawn against funds of the United States, its agencies or instrumentalities thereof, and will be able to negotiate the same for full value. For this reason, 31 CFR 211.1(a) is being revised to delete the reference to the People's Republic of Albania.

Because this rule removes a restriction on the delivery of checks and warrants to a foreign country, the Department of the Treasury has determined that notice of proposed rulemaking, public procedure and a delayed effective date are not required pursuant to 5 U.S.C. 553(a)(1), 5 U.S.C. 553(b)(B), and 5 U.S.C. 553(d)(1). This rule is not subject to the Regulatory Flexibility Act, 5 U.S.C. 601 *et seq.*, because no notice of proposed rulemaking is required under 5 U.S.C. 553 or any other law.

Because this rule involves a foreign affairs function of the United States, it is not subject to Executive Order 12291. Accordingly, a regulatory impact analysis is not required.

List of Subjects in 31 CFR Part 211

Checks, Foreign banking.

For the reasons set out in the preamble, 31 CFR part 211 is amended as set forth below.

PART 211—DELIVERY OF CHECKS AND WARRANTS TO ADDRESSES OUTSIDE THE UNITED STATES, ITS TERRITORIES AND POSSESSIONS

1. The authority citation for part 211 continues to read as follows:

Authority: 31 U.S.C. 127 and 5 U.S.C. 301.

2. Section 211.1(a) is revised to read as follows:

§ 211.1 Withholding delivery of checks.

(a) It is hereby determined that postal, transportation or banking facilities in general or local conditions in the Republic of Cuba, Democratic Kampuchea, the Democratic People's Republic of Korea (North Korea), and the Socialist Republic of Vietnam are such that there is not a reasonable assurance that a payee in those areas will actually receive checks or warrants drawn against funds of the United States, or agencies or instrumentalities thereof, and be able to negotiate the same for full value:

* * * * *

Russell D. Morris,

Commissioner.

BILLING CODE 4810–35–M

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 266

[EPA/OSW–FR–92; SWH–FRL–4513–9]

Burning of Hazardous Waste in Boilers and Industrial Furnaces

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule; technical amendments and corrections.

SUMMARY: On August 27, 1991 (56 FR 42504) and August 25, 1992 (57 FR 38558), the Environmental Protection Agency (EPA) published several technical amendments, clarifications, and corrections to the final rule for boilers and industrial furnaces burning hazardous waste. Today's notice provides clarifications to the final rule by reinstating language deleted due to an administrative error and corrects two errors appearing in the August 25, 1992 amendments.

DATES: The effective dates of the regulations, August 21, 1991 for the regulations published at (56 FR 42504), and August 11, 1992 for the regulations published at (57 FR 38558), remain unchanged. The reinstatement of § 266.103(c) (1) and (3) is effective August 21, 1991. The technical corrections to (57 FR 38558) are effective August 11, 1992.

FOR FURTHER INFORMATION CONTACT: For general information, contact the RCRA Hotline at (800) 424–9346 (toll-free) or (703) 920–9810. For more specific aspects of the rule, contact Shiva Garg, Office of Solid Waste (OS–322W), U.S. Environmental Protection Agency, 401 M Street, SW., Washington, DC 20460, phone (703) 308–8459.

SUPPLEMENTARY INFORMATION:

Background

On August 27, 1991 at 56 FR 42504, EPA published a final rule that amended 40 CFR part 266 and other regulations. In § 266.103, paragraphs (c)(1) and (c)(3), EPA set out the text only of paragraph (c)(3)(i) and the introductory text of paragraph (c)(1). Due to an administrative error, the amendatory instructions resulted in paragraphs (c)(1) (i) through (xiii) and (c)(3) (ii) and (iii) of § 266.103 being deleted from the 1992 edition of title 40 of the Code of Federal Regulations (40 CFR). This document clarifies that paragraphs (c)(1) (i) through (xiii) and (c)(3) (ii) and (iii) of § 266.103 remain in effect, and are regarded by EPA to have been in effect continuously in the form published in 1991 edition of 40 CFR part 266. The Agency published another final rule at 57 FR 38558 (August 25, 1992) which amended § 266.103(c)(1) again, effective August 11, 1992. These amendments still remain in effect. For the sake of clarity, this document republishes § 266.103(c)(1) in its entirety as it became effective on August 11, 1992 after the last amendments, and § 266.103(c)(3) as it continues to remain in effect from August 21, 1991.

Today's document also corrects two errors in the August 25, 1992 final rule, effective August 11, 1992.

List of Subjects in 40 CFR Part 266

Energy, Hazardous waste, Petroleum, Recycling, Reporting and recordkeeping requirements.

Dated: September 21, 1992.

Don R. Clay,

Assistant Administrator for Solid Waste and Emergency Response.

A. Technical Corrections

On August 25, 1992, EPA published several technical clarification amendments and corrections to the final BIF rule. Today's notice corrects two errors published in that notice.

I. In rule document number 92–20202, beginning on page 38558 in the **Federal Register** published on Tuesday, August 25, 1992, the following corrections are made:

PART 266—[AMENDED]

1. On page 38566, third column, in line 7 of amendment 11 to Appendix IX of Part 266, change "g/m ^{3}" to "μg/m ^{3}".

2. On page 38566, third column, in line 7 of amendment 12 to Appendix IX of Part 266, change "g/m ^{3}" to "μg/m ^{3}".

B. Technical Clarifications

For the reasons set out in the preamble, 40 CFR part 266 is amended as follows:

PART 266—STANDARDS FOR THE MANAGEMENT OF SPECIFIC HAZARDOUS WASTES AND SPECIFIC TYPES OF HAZARDOUS WASTE MANAGEMENT FACILITIES

I. In part 266:

1. The authority citation for part 266 continues to read as follows:

Authority: Sections 1006, 2002(a), 3004, and 3014 of the Solid Waste Disposal Act, as amended by the Resource Conservation and Recovery Act of 1976, as amended (42 U.S.C. 6905, 6912(a), 6924, and 6934).

2. As discussed in the preamble, § 266.103, paragraphs (c)(1) and (c)(3) are revised to read as follows:

§ 266.103 Interim status standards for burners.

* * * * *

(c) * * *

(1) *Limits on operating conditions.* The owner or operator shall establish limits on the following parameters based on operations during the compliance test (under procedures prescribed in paragraph (c)(4)(iv) of this section) or as otherwise specified and include these limits with the certification of compliance. The boiler or industrial furnace must be operated in accordance with these operating limits and the applicable emissions standards of §§ 266.104(b) through (e), 266.105, 266.106, 266.107, and 266.103(a)(5)(i)(D) at all times when there is hazardous waste in the unit.

(i) Feed rate of total hazardous waste and (unless complying with the Tier I or adjusted Tier I metals feed rate screening limits under § 266.106(b) or (e)), pumpable hazardous waste;

(ii) Feed rate of each metal in the following feedstreams:

(A) Total feedstreams, except that:

(*1*) Facilities that comply with Tier I or Adjusted Tier I metals feed rate screening limits may set their operating limits at the metals feed rate screening limits determined under § 266.106(b) or (e); and

(*2*) Industrial furnaces that must comply with the alternative metals implementation approach under paragraph (c)(3)(ii) of this section must specify limits on the concentration of each metal in the collected particulate matter in lieu of feed rate limits for total feedsteams;

(B) Total hazardous waste feed (unless complying with the Tier I or Adjusted Tier I metals feed rate screening limits under § 266.106(b) or (e)); and

(C) Total pumpable hazardous waste feed (unless complying with the Tier I or Adjusted Tier I metals feed rate screening limits under § 266.106(b) or (e));

(iii) Total feed rate of chlorine and chloride in total feed streams, except that facilities that comply with Tier I or Adjusted Tier I feed rate screening limits may set their operating limits at the total chlorine and chloride feed rate screening limits determined under § 266.107(b)(1) or (e);

(iv) Total feed rate of ash in total feed streams, except that the ash feed rate for cement kilns and light-weight aggregate kilns is not limited;

(v) Carbon monoxide concentration, and where required, hydrocarbon concentration in stack gas. When complying with the CO controls of § 266.104(b), the CO limit is 100 ppmv, and when complying with the HC controls of § 266.104(c), the HC limit is 20 ppmv. When complying with the CO controls of § 266.104(c), the CO limit is established based on the compliance test;

(vi) Maximum production rate of the device in appropriate units when producing normal product, unless complying with the Tier I or Adjusted Tier I feed rate screening limits for chlorine under § 266.107(b)(1) or (e) and for all metals under § 266.106(b) or (e), and the uncontrolled particulate emissions do not exceed the standard under § 266.105;

(vii) Maximum combustion chamber temperature where the temperature measurement is as close to the combustion zone as possible and is upstream of any quench water injection (unless complying with the Tier I or Adjusted Tier I metals feed rate screening limits under § 266.106(b) or (e));

(viii) Maximum flue gas temperature entering a particulate matter control device (unless complying with Tier I or Adjusted Tier I metals feed rate screening limits under § 266.106(b) or (e) and the total chlorine and chloride feed rate screening limits under § 266.107(b) or (e));

(ix) For systems using wet scrubbers, including wet ionizing scrubbers (unless complying with Tier I or Adjusted Tier I metals feed rate screening limits under § 266.106 (b) or (e) and the total chlorine and chloride feed rate screening limits under § 266.107(b)(1) or (e)):

(A) Minimum liquid to flue gas ration;

(B) Minimum scrubber blowdown from the system or maximum suspended solids content of scrubber water; and

(C) Minimum pH level of the scrubber water;

(x) For systems using venturi scrubbers, the minimum differential gas pressure across the venturi (unless complying with the Tier I or Adjusted Tier I metals feed rate screening limits under § 266.106(b) or (e) and the total chlorine and chloride feed rate screening limits under § 266.107(b)(1) or (e));

(xi) For systems using dry scrubbers (unless complying with the Tier I or Adjusted Tier I metals feed rate screening limits under § 266.106(b) or (e) and the total chlorine and chloride feed rate screening limits under § 266.107(b)(1) or (e)):

(A) Minimum caustic feed rate; and

(B) Maximum flue gas flow rate;

(xii) For systems using wet ionizing scrubbers or electrostatic precipitators (unless complying with the Tier I or Adjusted Tier I metals feed rate screening limits under § 266.106(b) or (e) and the total chlorine and chloride feed rate screening limits under § 266.107(b)(1) or (e)):

(A) Minimum electrical power in kilovolt amperes (kVA) to the precipitator plates; and

(B) Maximum flue gas flow rate;

(xiii) For systems using fabric filters (baghouses), the minimum pressure drop (unless complying with the Tier I or Adjusted Tier I metal feed rate screening limits under § 266.106(b) or (e) and the total chlorine and chloride feed rate screening limits under § 266.107(b)(1) or (e)).

* * * * *

(3) *Compliance testing.*—(i) *General.* Compliance testing must be conducted under conditions for which the owner or operator has submitted a certification of precompliance under paragraph (b) of this section and under conditions established in the notification of compliance testing required by paragraph (c)(2) of this section. The owner or operator may seek approval on a case-by-case basis to use compliance test data from one unit in lieu of testing a similar onsite unit. To support the request, the owner or operator must provide a comparison of the hazardous waste burned and other feedstreams, and the design, operation, and maintenance of both the tested unit and the similar unit. The Director shall provide a written approval to use compliance test data in lieu of testing a similar unit if he finds that the hazardous wastes, the devices, and the operating conditions are sufficiently similar, and the data from the other compliance test is adequate to meet the requirements of § 266.103(c).

(ii) *Special requirements for industrial furnaces that recycle collected PM.* Owners and operators of industrial furnaces that recycle back into the furnace particulate matter (PM) from the air pollution control system must comply with one of the following procedures for testing to determine compliance with the metals standards of § 266.106(c) or (d):

(A) The special testing requirements prescribed in "Alternative Method for Implementing Metals Controls" in appendix IX of this part; or

(B) Stack emissions testing for a minimum of 6 hours each day while hazardous waste is burned during

interim status. The testing must be conducted when burning normal hazardous waste for that day at normal feed rates for that day and when the air pollution control system is operated under normal conditions. During interim status, hazardous waste analysis for metals content must be sufficient for the owner or operator to determine if changes in metals content may affect the ability of the facility to meet the metals emissions standards established under § 266.106(c) or (d). Under this option, operating limits (under paragraph (c)(1) of this section) must be established during compliance testing under paragraph (c)(3) of this section only on the following parameters;

(*1*) Feed rate of total hazardous waste;

(*2*) Total feed rate of chlorine and chloride in total feed streams;

(*3*) Total feed rate of ash in total feed streams, except that the ash feed rate for cement kilns and light-weight aggregate kilns is not limited;

(*4*) Carbon monoxide concentration, and where required, hydrocarbon concentration in stack gas;

(*5*) Maximum production rate of the device in appropriate units when producing normal product; or

(C) Conduct compliance testing to determine compliance with the metals standards to establish limits on the operating parameters of paragraph (c)(1) of this section only after the kiln system has been conditioned to enable it to reach equilibrium with respect to metals fed into the system and metals emissions. During conditioning, hazardous waste and raw materials having the same metals content as will be fed during the compliance test must be fed at the feed rates that will be fed during the compliance test.

(iii) *Conduct of compliance testing.* (A) If compliance with all applicable emissions standards of §§ 266.104 through 266.107 is not demonstrated simultaneously during a set of test runs, the operating conditions of additional test runs required to demonstrate compliance with remaining emissions standards must be as close as possible to the original operating conditions.

(B) Prior to obtaining test data for purposes of demonstrating compliance with the applicable emissions standards of §§ 266.104 through 266.107 or establishing limits on operating parameters under this section, the facility must operate under compliance test conditions for a sufficient period to reach steady-state operations. Industrial furnaces that recycle collected particulate matter back into the furnace and that comply with paragraphs (c)(3)(ii)(A) or (B) of this section, however, need not reach steady state conditions with respect to the flow of metals in the system prior to beginning compliance testing for metals.

(C) Compliance test data on the level of an operating parameter for which a limit must be established in the certification of compliance must be obtained during emissions sampling for the pollutant(s) (i.e., metals, PM, HCl/Cl_2, organic compounds) for which the parameter must be established as specified by paragraph (c)(1) of this section.

BILLING CODE 6560-50-M

GENERAL SERVICES ADMINISTRATION

41 CFR Part 302-6

[FTR Amendment 27]

RIN 3090-AE69

Federal Travel Regulation; Increase in Maximum Reimbursement Limitations for Real Estate Sale and Purchase Expenses

AGENCY: Federal Supply Service, GSA.

ACTION: Final rule.

SUMMARY: This final rule amends the Federal Travel Regulation (FTR) to increase the maximum dollar limitations on reimbursement for allowable real estate sale and purchase expenses incident to a change of official station. Section 5724a(a)(4)(B) of title 5, United States Code requires that the dollar limitations be updated effective October 1 of each year based on the percent change, if any, in the Consumer Price Index for All Urban Consumers, United States City Average, Housing Component, for December of the preceding year over December of the second preceding year. This final rule will have a favorable impact on Federal employees authorized to relocate in the interest of the Government since it increases relocation allowance maximums.

EFFECTIVE DATE: This final rule is effective October 1, 1992, and applies to employees whose effective date of transfer is on or after October 1, 1992. For purposes of this regulation, the effective date of transfer is the date on which the employee reports for duty at the new official station.

FOR FURTHER INFORMATION CONTACT: Robert A. Clauson,Transportation Management Division (FBX), Washington, DC 20406,telephone FTS or commercial (703) 305-5253.

SUPPLEMENTARY INFORMATION: This final rule makes the annual adjustment to the maximum reimbursement limitations for the sale and purchase of an employee's residence when the employee transfers in the interest of the Government. The total amount of expenses that may be reimbursed in connection with the sale of a residence shall not exceed 10 percent of the actual sale price or $20,799, whichever is the lesser amount. The total amount of expenses that may be reimbursed in connection with the purchase of a residence shall not exceed 5 percent of the purchase price or $10,399, whichever is the lesser amount.

The General Services Administration (GSA) has determined that this rule is not a major rule for the purposes of Executive Order 12291 of February 17, 1981, because it is not likely to result in an annual effect on the economy of $100 million or more; a major increase in costs to consumers or others; or significant adverse effects. GSA has based all administrative decisions underlying this rule on adequate information concerning the need for, and consequences of, this rule; has determined that the potential benefits to society from this rule outweigh the potential costs and has maximized the net benefits; and has chosen the alternative approach involving the least net cost to society.

List of Subjects in 41 CFR Part 302-6

Government employees, Relocation allowances and entitlements, Transfers.

For the reasons set out in the preamble, 41 CFR part 302-6 is amended to read as follows:

PART 302-6—ALLOWANCE FOR EXPENSES INCURRED IN CONNECTION WITH RESIDENCE TRANSACTIONS

1. The authority citation for part 302-6 continues to read as follows:

Authority: 5 U.S.C. 5721-5734; 20 U.S.C. 905(a); E.O. 11609, 36 FR 13747, 3 CFR, 1971-1975 Comp., p. 586.

§ 302-6.2 [Amended]

2. Section 302-6.2 is amended by removing the amount "$20,115" in paragraph (g)(1), and adding in its place the amount "$20,799"; and by removing the amount "$10,057" in paragraph (g)(2) and adding in its place the amount "$10,399".

Dated: August 26, 1992.

Richard G. Austin,

Administrator of General Services.

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Part 73

[MM Docket No. 90-651; RM-7544]

Radio Broadcasting Services; Bald Knob and Clarendon, AR

AGENCY: Federal Communications Commission.

ACTION: Final rule.

SUMMARY: On reconsideration, the Commission grants the request of John Paul Capps and Elizabeth Capps, d/b/a Capps Radio Company, to substitute Channel 296C3 for Channel 296A at Bald Knob, Arkansas, and modify the license for Station KKSY(FM), as requested. Additionally, in order to accommodate the modification at Bald Knob, Channel 281A is substituted for Channel 297A at Clarendon, Arkansas, and the construction permit issued to B & H Broadcasting Co. for Station KXRC(FM) is modified accordingly. The proposal was previously denied based upon the Commission's determination that the proposal would not fully comply with the requirements of Section 73.315 of its Rules. See 56 FR 66827, December 26, 1991. Coordinates for Channel 296C3 at Bald Knob are 35–11–10 and 91–46–13. Coordinates for Channel 281A at Clarendon are 34–37–19 and 91–22–46. With this action, the proceeding is terminated.

EFFECTIVE DATE: November 9, 1992.

FOR FURTHER INFORMATION CONTACT: Nancy Joyner, Mass Media Bureau, (202) 634–6530.

SUPPLEMENTARY INFORMATION: This is a synopsis of the Commission's Memorandum Opinion and Order, MM Docket No. 90–651, adopted August 31, 1992, and released September 24, 1992. The full text of this Commission decision is available for inspection and copying during normal business hours in the FCC Dockets Branch (room 230), 1919 M Street, NW., Washington, DC. The complete text of this decision may also be purchased from the Commission's copy contractors, Downtown Copy Center, (202) 452–1422, 1990 M Street, NW., suite 640, Washington, DC 20036.

BILLING CODE 6712–01–M

DEPARTMENT OF TRANSPORTATION

Federal Highway Administration

49 CFR Part 391

Qualification of Drivers; Vision Waivers

AGENCY: Federal Highway Administration (FHWA), DOT.

ACTION: Extension of waiver application period.

SUMMARY: The FHWA announces its decision to extend the time it will accept vision waiver applications from September 21, 1992 to December 31, 1992. This action will allow the agency to enroll a larger number of waived drivers in its research program while affording those drivers an opportunity for continued or enhanced employment. A larger sample size of vision deficient drivers will ensure a desirable level of confidence in the subsequent statistical analysis.

DATES: Vision waiver applications must be received on or before December 31, 1992.

ADDRESSES: Applications must be submitted to the Vision Waiver Program, 400 Seventh Street, SW., Washington, DC 20590.

FOR FURTHER INFORMATION CONTACT: Mr. Neill L. Thomas or Ms. Sandra L. Zywokarte, (202) 366–2981, Office of Motor Carrier Standards, or Mr. Paul L. Brennan, Office of Chief Counsel, (202) 366–0834, Federal Highway Administration, Department of Transportation, 400 Seventh Street, SW., Washington, DC 20590. Office hours are from 7:45 a.m. to 4:15 p.m., e.t., Monday through Friday, except legal holidays.

SUPPLEMENTARY INFORMATION: On March 25, 1992, the FHWA published its notice of intent to accept applications from drivers of commercial motor vehicles (CMV) for waivers of certain vision requirements contained in the Federal Motor Carrier Safety Regulations (FMCSRS). See 57 FR 10295. The public was notified that the FHWA

would accept such applications until September 21, 1992.

The FHWA did not obtain a sufficient number of applications by September 21 to ensure an adequate sample size for the vision waiver research program. The validity of this research effort is directly related to its sample size. The FHWA, therefore, is extending the time it will accept vision waiver applications to December 31, 1992. We believe that this additional time will enable the FHWA to issue a sufficient number of vision waivers necessary to generate statistical data that will produce a desirable level of confidence.

Authority: 49 U.S.C. app. 2505; 49 U.S.C. 504 and 3102; 49 CFR 1.48.

Issued on: September 23, 1992.

T.D. Larson,

Administrator.

BILLING CODE 4910-22-M

Proposed Rules

Federal Register
Vol. 57, No. 190
Wednesday, September 30, 1992

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

OFFICE OF PERSONNEL MANAGEMENT

5 CFR Part 532

RIN 3206-AF16

Prevailing Rate Systems

AGENCY: Office of Personnel Management.

ACTION: Proposed rule.

SUMMARY: The Office of Personnel Management is issuing a proposed rule to authorize a special schedule practice for U.S. civil service prevailing rate (wage) employees in the Commonwealth of the Northern Mariana Islands (CNMI)—a practice consistent with the special schedules authorized in the other U.S. insular areas of Guam, Midway, American Samoa, and the U.S. Virgin Islands. No change in pay rates is involved, since the proposed special schedule practice would authorize rates identical to those on the foreign area schedule from which the employees are currently paid. The Department of the Interior, which has four authorized wage positions at the American Memorial Park on Saipan, CNMI, would be assigned lead agency responsibility for establishing and issuing this schedule. This change is necessary because the pay of wage employees in CNMI is now based on the foreign area wage schedule—a schedule no longer applicable since the change in status of CNMI from territory to commonwealth (part of the United States).

DATES: Comments must be submitted on or before November 30, 1992.

ADDRESSES: Send or deliver comments to Barbara L. Fiss, Assistant Director for Compensation Policy, Personnel Systems and Oversight Group, U.S. Office of Personnel Management, room 6H31, 1900 E Street, NW., Washington, DC 20415.

FOR FURTHER INFORMATION CONTACT: Paul Shields, (202) 606-2848.

SUPPLEMENTARY INFORMATION: The use of the foreign area schedule to set the wages for these employees dates back to the period when the Northern Mariana Islands were part of the Trust Territory of the Pacific Islands (TTPI), a United Nations Trusteeship administered by the United States. With implementation of the "Covenant to Establish a Commonwealth of the Northern Mariana Islands in Political Union with the United States," the trusteeship agreement was terminated, and in December 1990, the United Nations terminated the TTPI. Under the Covenant, U.S. Federal law applies to CNMI.

This amendment also would put in regulation the entitlement to post differentials for wage employees recruited from outside of the insular area where employed—an entitlement previously described in Federal Personnel Manual Supplement 532-1.

A number of administrative changes in the regulatory descriptions of foreign and insular area special schedules are also included. Specifically, the amended regulations would: (1) Split treatment of the foreign area schedule and the related special schedules into separate sections, (2) adopt the term "insular areas" to cover U.S. territories, possessions, and associated commonwealths (not otherwise surveyed—e.g., Puerto Rico), (3) change "will" to "shall" in § 532.255, (4) delete the production facilitating chart in § 532.255 because that chart is now shown in § 532.263 (production facilitating special schedules), and (5) remove the reference in § 532.259 to the U.S. Virgin Islands transition that ended in fiscal year 1990.

The Federal Prevailing Rate Advisory Committee has reviewed and concurred in these changes.

Executive Order 12291, Federal Regulation

I have determined that this is not a major rule as defined under section 1(b) or Executive Order 12291, Federal Regulation.

Regulatory Flexibility Act

I certify that these regulations would not have a significant economic impact on a substantial number of small entities because they would affect only Federal agencies and employees.

List of Subjects in 5 CFR Part 532

Administrative practice and procedure, Government employees, Wages.

U.S. Office of Personnel Management.

Douglas A. Brook,

Acting Director.

Accordingly, OPM proposes to amend 5 CFR part 532 as follows:

PART 532—PREVAILING RATE SYSTEMS

1. The authority for part 532 continues to read as follows:

Authority: 5 U.S.C. 5343, 5346; § 532.707 also issued under 5 U.S.C. 552, Freedom of Information Act, Pub. L. 92-502.

2. Section 532.255 is amended by revising the heading and paragraph (a), removing the word "will" where it appears in the introductory text to paragraph (b) and in paragraphs (c) and (d) and inserting in its place the word "shall", and by revising paragraph (e) to read as follows:

§ 532.255 Regular appropriated fund wage schedules in foreign areas.

(a) The Department of Defense shall establish and issue regular appropriated fund wage schedules for U.S. citizens who are employees in foreign areas. These wage schedules shall provide rates of pay for nonsupervisory, leader, supervisory, and production facilitating employees.

* * * * *

(e) Pay schedules for production facilitating positions shall be established in accordance with the table in § 532.263(c) of this subpart.

3. Section 532.259 is revised to read as follows:

§ 532.259 Special appropriated fund wage schedules for U.S. insular areas.

(a) Lead agencies shall establish and issue special wage schedules for U.S. civil service wage employees in certain U.S. insular areas. The Department of Defense is the lead agency for Guam, Midway, and the U.S. Virgin Islands. The Department of Transportation is the lead agency for American Samoa. The Department of the Interior is the lead agency for the Commonwealth of the Northern Mariana Islands. These schedules shall provide rates of pay for nonsupervisory, leader, supervisory, and production facilitating employees.

(b) Special schedules shall be established at the same time and with rates identical to the foreign area appropriated fund wage schedules established under § 532.255 of this subpart.

(c) Wage employees recruited from outside the insular area where employed, who meet the same eligibility requirements as those specified for General Schedule employees in § 591.209 of subpart B of part 591, are also paid as a part of basic pay a differential for recruitment and retention purposes. The differential rate shall be that established for General Schedule employees in appendix B of subpart B of part 591 and shall be adjusted effective concurrently with the special schedules.

[FR Doc. 92–23655 Filed 9–29–92; 8:45 am]

BILLING CODE 6325–01–M

5 CFR Part 532

RIN 3620–AF11

Prevailing Rate Systems

AGENCY: Office of Personnel Management.

ACTION: Proposed rule.

SUMMARY: The Office of Personnel Management (OPM) is issuing a proposed rule to add San Patricio County, Texas, as an area of application to the Nueces, Texas, Federal Wage System (FWS) Nonappropriated Fund (NAF) wage area for pay-setting purposes. The Department of Navy recently commissioned a Naval Base in Ingelside, Texas. Ingelside Naval Base is located in San Patricio County, which is not currently defined for NAF pay-setting purposes. The intent of this action is to assign San Patricio County to the proper NAF wage area for pay-setting purposes.

DATES: Comments must be received on or before October 30, 1992.

ADDRESSES: Send or deliver written comments to Barbara L. Fiss, Assistant Director for Compensation Policy, Personnel Systems and Oversight Group, U.S. Office of Personnel Management, room 6H31, 1900 E Street NW., Washington, DC 20415.

FOR FURTHER INFORMATION CONTACT: Brenda Roberts (202) 606–2848.

SUPPLEMENTARY INFORMATION: The Department of Defense notified OPM that the Department of Navy recently commissioned a Naval Base in Ingelside, Texas; and anticipates hiring FWS NAF employees. The Ingelside Naval Base is located in San Patricio County, which is not currently defined for NAF pay-setting purposes. Navy does not anticipate that the Ingelside Naval Base will employ the minimum of 26 employees required to establish an FWS NAF wage area. Thus, San Patricio County must be defined as an area of application to an existing wage area in accordance with the criteria in § 532.219 of title 5, Code of Federal Regulations.

Geographically, the Ingelside Naval Base in San Patricio County is closest (approximately 10 miles) to the Corpus Christi Naval Air Station in Nueces County, the survey area for the Nueces, Texas, wage area. San Patricio County is also contiguous to Nueces County. The next closest survey area is approximately 140 miles distant in Bexar County, Texas. Transportation facilities and commuting patterns for workers also favor definition to Nueces County rather than to Bexar County. In addition, the Office of Management and Budget has defined San Patricio and Nueces Counties as jointly forming the Corpus Christi, Texas, Metropolitan Statistical Area.

The Federal Prevailing Rate Advisory Committee reviewed this issue and recommended, by consensus, the addition of San Patricio County to the Nueces, Texas, area of application.

Executive Order 12291, Federal Regulation

I have determined that this is not a major rule as defined under section 1(b) of Executive Order 12291, Federal Regulation.

Regulatory Flexibility Act

I certify that these regulations would not have a significant economic impact on a substantial number of small entities because they would affect only Federal agencies and employees.

List of Subjects in 5 CFR Part 532

Administrative practice and procedure, Government employees, Wages.

U.S. Office of Personnel Management.

Douglas A. Brook,

Acting Director.

Accordingly, OPM proposes to amend 5 CFR part 532 as follows:

PART 532—PREVAILING RATE SYSTEMS

1. The authority citation for part 532 continues to read as follows:

BILLING CODE 6325–01–M

DEPARTMENT OF AGRICULTURE

Packers and Stockyards Administration

9 CFR Parts 201 and 203

Regulations and Policy Statements under the Packers and Stockyards Act: Trade Practices, Scale Test Instructions, Advertising Allowance Guidelines

AGENCY: Packers and Stockyards Administration, USDA.

ACTION: Proposed rule; review of existing regulations.

SUMMARY: The Agency is currently reviewing all regulations and policy statements issued under the provisions of the Packers and Stockyards (P&S) Act. A review of 16 priority regulations and policy statements has been completed. As a result of the priority review, this document proposes to remove six regulations, amend one regulation and one policy statement, and retain seven regulations and one policy statement in their present form.

DATES: Comments must be submitted on or before November 30, 1992.

ADDRESSES: Comments may be mailed to the Administrator, Packers and Stockyards Administration, room 3039, South Building, U.S. Department of Agriculture, Washington, DC 20250. Comments received may be inspected during normal business hours in the Office of the Administrator.

FOR FURTHER INFORMATION CONTACT: Harold W. Davis, Director, Livestock Marketing Division, (202) 720–6951, or Kenneth Stricklin, Packer and Poultry Division, (202) 720–7363.

SUPPLEMENTARY INFORMATION: The Agency proposes to remove § 201.64

which prohibits market agencies selling on commission from guaranteeing a price to the livestock consignor. Such guarantees have been considered an unfair and deceptive practice because they cause selling agencies to compete for consignments on the basis of price guarantees instead of usual and customary stockyard services. However, the prohibition against price guarantees restricts the ability of selling agencies to compete with other types of marketing businesses which are not affected by this regulation.

Structural changes in the livestock marketing industry have altered the importance of this regulation. Market agencies selling on commission are only one of several marketing alternatives available to most livestock sellers today. Other alternatives include packer and dealer buying stations and direct purchases by packers, dealers and producers. Removal of § 201.64 will permit selling agencies to compete more effectively in the overall market structure.

Market agencies selling on commission are prohibited from employing packers or persons employed to purchase livestock for a packer by § 201.66. This regulation was intended to prohibit less than arm's length transactions between a packer and selling agency, thereby avoiding any conflict of interest. While this regulation eliminates a potential conflict of interest, it also restricts potential buying power in some instances. Since dealers and order buyers are permitted to be employed by a selling agency, except in key positions, we can see no viable reason to continue to exclude packer employees from employment by a selling agency under similar circumstances. Concerns regarding potential conflicts of interest are addressed under § 201.56 by restricting employment in specific key positions. Further, provisions of the P&S Act which prohibit unfair and deceptive practices would make any unfair advantage gained from such employment unlawful. The Agency proposes to remove § 201.66.

The Agency proposes to remove §§ 201.72–1, 201.78–1, 201.106–1, 201.106–2 of the regulations issued under the P&S Act. These regulations provide detailed procedures and instructions for testing scales subject to the provisions of the P&S Act. They are outdated since National Bureau of Standards (now National Institute of Standards and Technology) Handbook 44, "Specifications, Tolerances and Other Technical Requirements for Weighing and Measuring Devices", has been incorporated in § 201.71. In some instances, these regulations are in conflict with the current requirements. While such instructions, as contained in the regulations, are helpful in assisting subject scale owners to obtain proper and adequate tests of their scales, it is not necessary that such instructions be in the form of regulations.

Under the provisions of § 201.56, market agencies selling on commission are prohibited from purchasing livestock out of consignments for speculative resale. This regulation also specifies conditions under which livestock can be purchased out of consignment to fill orders and requires disclosure to the consignor in such transactions. As proposed herein, § 201.56 would be amended to permit selling agencies, their owners, officers, agents and employees (except specified key employees) to purchase livestock out of consignment for any purpose provided the livestock is first offered for sale in an open, competitive manner to other available buyers. This proposal limits the definition of key employees to the auctioneer, weighmaster and commission salesman. Such key employees will be prohibited from purchasing livestock out of consignment for any purpose for their own account.

The proposed change in § 201.56 will permit selling agencies to market livestock in a manner that best represents the interest of the livestock seller without unnecessarily restricting purchases from consignments. These proposed changes will provide greater flexibility and allow market mechanisms an opportunity to work with less regulatory intervention.

It is also proposed that policy statement § 203.14 be amended. This policy statement serves as a guideline for meat packers with respect to the use of advertising allowances and other promotional services in connection with product marketing. It is recommended that several of the examples used in the guidelines be eliminated to provide clarity and user friendliness. By doing so, the Agency will be consistent with the FTC who amended their guidelines in August 1990 by eliminating several examples of how to implement promotional programs. The guidelines use examples as to how meat packers can either promote products or notify customers of promotions. They do not state the exact manner as to how a packer implements a particular promotional plan. A review of the examples has revealed that, although they have not resulted in needless litigation, they are too complex, too detailed, and too many.

A review of the following regulations and statements of general policy has been completed and it was determined that each should be retained in its present form:

§ 201.11 Suspended registrant, officer, agents, and employees.
§ 201.42 Custodial accounts for trust funds.
§ 201.43 Payment and accounting for livestock and live poultry.
§ 201.67 Packers not to own or finance selling agencies.
§ 201.72 Scales; testing of.
§ 201.97 Annual reports.
§ 201.99 Purchase of livestock by packers on a carcass grade, carcass weight, or grade and weight basis.
§ 203.10 Statement with respect to insolvency; definition of current assets and current liabilities.

In the process of reviewing these regulations, it was determined that they were necessary to the efficient and effective enforcement of the P&S Act and to the orderly conduct of the marketing system. In each instance the regulations were deemed to be fashioned to maximize the benefits to society, and in each instance, the benefits outweigh the enforcement and compliance costs. The absence of any of the regulations would be detrimental to industry and could result in increased litigation. None of the regulations have a significant economic impact or pose a hinderance to economic growth.

The changes proposed in §§ 201.56 and 203.14 do not impose or change any recordkeeping or information collection requirements. Existing requirements in these regulations have been previously approved by OMB under Control No. 0590–0001.

As provided by the Regulatory Flexibility Act, it is hereby certified that these rules will not have a significant economic impact on a substantial number of small entities and a statement explaining the reasons for the certification is set forth in the following paragraph and is being provided to the Chief Counsel for Advocacy of the Small Business Administration.

While these proposed amended rules impact small entities, they will not have a significant economic impact on any entity, large or small. The primary effect of these proposed rules is to remove restrictions which will provide greater flexibility for market mechanisms to work and provide clarity and consistency with other regulations and guidelines. Although the primary effect is to remove restrictions, the proposed changes further restrict purchases by auctioneers, salesmen, and weighmasters to eliminate conflicts of interest in fulfilling their fiduciary

responsibilities in consignment transactions.

These proposed amendments to rules are not major rules for the purposes of E.O. 12291. The proposed amendments do not impose any new paperwork requirements; do not have implications of Federalism under the Criteria of E.O. 12612; and do not impact on family formation under the Criteria of E.O. 12606.

These proposed amendments to rules have been reviewed under Executive Order 12778, Civil Justice Reform. These amendments to rules are not intended to have retroactive effect. These amendments to rules would not preempt any State or local laws, regulations, or policies, unless they present an irreconcilable conflict with these amendments to rules. Prior to judicial challenge of these amendments to rules, a party must be first found by the Secretary to be in violation of the P&S Act and in violation of the accompanying regulations. Second, the party must appeal that finding and the validity of the regulation to the Secretary in the course of the administrative proceeding. Only after taking these steps, the party may challenge the regulation in a court of competent jurisdiction.

List of Subjects in 9 CFR Parts 201 and 203

Advertising allowances, Market Agency employees, Price guarantees, Purchases from consignment, Scale test instructions.

Done at Washington, DC, this 24th day of September 1992.

Virgil M. Rosendale,

Administrator, Packers and Stockyards Administration.

For reasons set forth in the preamble, the Packers and Stockyards Administration proposes to amend 9 CFR parts 201 and 203 as follows:

1. The authority citation for parts 201 and 203 continues to read as follows:

Authority: 7 U.S.C. 204, 228; 7 C.F.R. 2.17(e), 2.56.

PART 201—[AMENDED]

2. Remove § 201.64.
3. Remove § 201.66.
4. Remove § 201.72–1.
5. Remove § 201.78–1.
6. Remove § 201.106–1.
7. Remove § 201.106–2.
8. Revise § § 201.56 and 203.14 to read as follows:

§ 201.56 Market agencies selling on commission; purchases from consignment.

(a) *Livestock to be sold openly at highest available bid.* Every market agency engaged in the business of selling livestock on a commission or agency basis shall sell the livestock consigned to it openly, at the highest available bid, and in such a manner as to best promote the interest of each consignor.

(b) *Purchases from consignment.* No market agency engaged in the business of selling livestock on a commission basis shall purchase livestock from consignments, and no such market agency shall permit its owners, officers, agents, employees or any firm in which such market agency or its owners, officers, agents, or employees have an ownership or financial interest to purchase livestock consigned to such market agency, without first offering the livestock for sale in an open and competitive manner to other available buyers, and then only at a price higher than the highest available bid on such livestock.

(c) *Key employees not to purchase livestock out of consignments.* No market agency engaged in selling livestock on commission shall permit its auctioneers, weighmasters, or salesmen to purchase livestock out of consignment for any purpose for their own account, either directly or indirectly.

(d) *Purchase from consignments: disclosure required.* When a market agency purchases consigned livestock or sells consigned livestock to any owner, officer, agent, employee, or any business in which such market agency, owner, officer, agent, or employee has an ownership or financial interest, the market agency shall disclose on the account of sale the name of the buyer and the nature of the relationship existing between the market agency and the buyer.

(Approved by the Office of Management and Budget under control number 0590–0001)

PART 203—[AMENDED]

§ 203.14 Statement with respect to advertising allowances and other merchandising payments and services.

The Guidelines

1. *Who is a customer?* (a) A "customer" is a person who buys for resale directly from the packer, or through the packer's agent or broker; and in addition, a customer is any buyer of the packer's product for resale who purchases from or through a wholesaler or other intermediate reseller.

(Note.—In determining whether a packer has fulfilled its obligations toward its customers, the Packers and Stockyards Administration will recognize that there may be some exceptions to this general definition of "customer." For example, the purchaser of distress merchandise would not be considered a "customer" simply on the basis of such purchase. Similarly, a retailer who purchases solely from other retailers or one who makes only sporadic purchases, or one who does not regularly sell the packer's product or who is a type of retail outlet not usually selling such products will not be considered a "customer" of the packer unless the packer has been put on notice that such retailer is selling its product.)

(b) "Competing customers" are all businesses that compete in the resale of the packer's products of like grade and quality at the same functional level of distribution, regardless of whether they purchase direct from the packer or through some intermediary.

Example: A packer sells directly to some independent retailers, sells to the headquarters of chains and of retailer-owned cooperatives, and also sells to wholesalers. The direct-buying independent retailers, the headquarters of chains and of retailer-owned cooperatives, and the wholesalers' independent retailer customers are customers of the packer. Individual retail outlets which are part of the chains or members of the retailer-owned cooperatives are not customers of the packer.

2. *Definition of services.* "Services" are any kind of advertising or promotion of a packer's product, including but not limited to, cooperative advertising, handbills, window and floor displays, demonstrators and demonstrations, customer coupons, and point of purchase activity.

3. *Need for a plan.* If a packer makes payments or furnishes services, it should do so under a plan that meets several requirements. If there are many competing customers to be considered, or if the plan is at all complex, the packer would be well advised to put its plan in writing. The requirements are:

(a) Proportionally equal terms—The payments or services under the plan should be made available to all competing customers on proportionally equal terms. This means that payments or services should be made proportionately on some basis that is fair to all customers who compete in the resale of the packer's products. No single way to achieve the proper proportion is prescribed, and any method that treats competing customers on proportionally equal terms may be used. Generally, this can best be done by basing the payments made or the services furnished on the dollar volume or on the quantity of goods purchased during a specified period. Other methods which are fair to all competing customers are also acceptable.

Example 1: A packer may properly offer to pay a specified part (say 50 percent) of the cost of local advertising up to an amount equal to a set percentage (such as 5 percent) of the dollar volume of such purchases during a specified time.

Example 2: A packer may properly place in reserve for each customer a specified amount of money for each unit purchased and use it to reimburse those customers for the cost of advertising and promoting the packer's product during a specified time.

Example 3: A packer's plan should not provide an allowance on a basis that has rates graduated with the amount of goods

purchased, as for instance, 1 percent of the first $1,000 purchases per month, 2 percent on second $1,000 per month, and 3 percent on all over that.

(b) Packer's duty to inform—The packer should take reasonable action, in good faith, to inform all its competing customers of the availability of its promotional program. Such notification should include all the relevant details of the offer in time to enable customers to make an informed judgment whether to participate. Where such one-step notification is impracticable, the packer may, in lieu thereof, maintain a continuing program of first notifying all competing customers of the types of promotions offered by the packer and a specific source for the customer to contact in order to receive full and timely notice of all relevant details of the packer's promotions. Such notice should also inform all competing customers that the packer offers advertising allowances and/or other promotional assistance that are usable in a practical business sense by all retailers regardless of size. When a customer indicates its desire to be put on the notification list, the packer should keep that customer advised of all promotions available in its area as long as the customer so desires. The packer may make the required notification by any means it chooses; but in order to show later that it gave notice to a certain customer, it is in a better position to do so if it was given in writing or a record was prepared at the time of notification showing date, person notified, and contents of notification.

If more direct methods of notification are impracticable, a packer may employ one or more of the following methods, the sufficiency of which will depend upon the complexity of its own distribution system. Different packers may find that different notification methods are most effective for them:

(1) The packer may enter into contracts with its wholesaler, distributors or other third parties which conform to the requirements of item 5, infra.

(2) The packer may place appropriate announcements on product containers or inside thereof with conspicuous notice of such enclosure on the outside.

(3) The packer may publish notice of the availability and essential features of a promotional plan in a publication of general distribution in the trade.

Example 1: A packer has a wholesaler-oriented plan directed to wholesalers distributing its products to retailing customers. It should notify all the competing wholesalers distributing its products of the availability of this plan, but the packer is not required to notify retailing customers.

Example 2: A packer who sells on a direct basis to some retailers in an area, and to other retailers in the area through wholesalers, has a plan for the promotion of its products at the retail level. If the packer directly notifies not only all competing direct purchasing retailers but also all competing retailers purchasing through the wholesalers as to the availability, terms and conditions of the plan, the packer is not required to notify its wholesalers.

Example 3: A packer regularly engages in promotional programs and the competing customers include large direct purchasing retailers and smaller customers who purchase through wholesalers. The packer may encourage, but not coerce, the retailer purchasing through a wholesaler to designate a wholesaler as its agent for receiving notice of, collecting, and using promotional allowances for the customer. If a wholesaler or other intermediary by written agreement with a retailer is actually authorized to collect promotional payments from suppliers, the packer may assume that notice of and payment under a promotional plan to such wholesaler or intermediary constitutes notice and payment to the retailer.

(A packer should not rely on a written agreement authorizing an intermediary to receive notice of and/or payment under a promotional plan for a retailer if the packer knows, or should know, that the retailer was coerced into signing the agreement. In addition, a packer should assume that an intermediary is not authorized to receive notice of and/or payment under a promotional plan for a retailer unless there is a written authorization signed by such retailer.)

(c) Availability to all competing customers—The plan should be such that all types of competing customers may participate. It should not be tailored to favor or discriminate against a particular customer or class of customers but should, in its terms, be usable in a practical business sense by all competing customers. This may require offering all such customers more than one way to participate in the plan or offering alternative terms and conditions to customers for whom the basic plan is not usable and suitable. The packer should not, either expressly or by the way the plan operates, eliminate some competing customers, although it may offer alternative plans designed for different customer classes. If it offers alternative plans, all of the plans offered should provide the same proportionate equality and the packer should inform competing customers of the various alternative plans.

When a packer, in good faith, offers a basic plan, including alternatives, which is reasonably fair and nondiscriminatory and refrains from taking any steps which would prevent any customer, or class of customers, from participating in its program, it shall be deemed to have satisfied its obligation to make its plan functionally available to all customers, and the failure of any customer or customers to participate in the program shall not be deemed to place the packer in violation of the provisions of the Packers and Stockyards Act.

Example 1: A packer offers a plan of short-term store displays of varying sizes, including some which are suitable for each of its competing customers and at the same time are small enough so that each customer may make use of the promotion in a practical business sense. The plan also calls for uniform, reasonable certification of performance by the retailer. Because they are reluctant to process a reasonable amount of paperwork, some small retailers do not participate. This fact is not deemed to place a packer in violation of Item 3(c) and it is under no obligation to provide additional alternatives.

Example 2: A packer offers a plan for cooperative advertising on radio, television, or in newspapers of general circulation.[1] Because the purchases of some of its customers are too small, this offer is not "functionally available" to them. The packer should offer them alterative(s) on proportionally equal terms that are usable by them and suitable for their business.

(d) Need to understand terms—In informing customers of the details of a plan, the packer should provide them sufficient information to give a clear understanding of the exact terms of the offer, including all alternatives, and the conditions upon which payment will be made or services furnished.

(e) Checking customer's use of payments—The packer should take reasonable precautions to see that services it is paying for are furnished and also that it is not overpaying for them. Moreover, the customer should expend the allowance solely for the purpose for which it was given. If the packer knows or should know that what it pays or furnishes is not being properly used by some customers, the improper payments or services should be discontinued.[2]

A packer who, in good faith, takes reasonable and prudent measures to verify the performance of its competing customers will be deemed to have satisfied its obligations under the Act. Also, a packer who, in good faith, concludes a promotional agreement with wholesalers or other intermediaries and who otherwise conforms to the standards of Item 5 shall be deemed to have satisfied this obligation. If a packer has taken such steps, the fact that a particular customer has retained an allowance in excess of the cost, or approximate cost if the actual cost is not known, of services performed by the customer shall not alone be deemed to place a packer in violation of the Act.

(When customers may have different but closely related costs in furnishing services that are difficult to determine such as the cost for distributing coupons from a bulletin board or using a window banner, the packer may furnish to each customer the same payment if it has a reasonable relationship to the cost of providing the service or is not grossly in excess thereof.)

4. *Competing customers.* The packer is required to provide in its plan only for those customers who compete with each other in the resale of the packer's products of like grade and quality. Therefore a packer should make available to all competing wholesalers any plan providing promotional payments or services to wholesalers, and similarly should

---

[1] In order to avoid the tailoring of promotional programs that discriminate against particular customers or class of customers, the packer in offering to pay allowances for newspaper advertising should offer to pay the same percentage of the cost of newspaper advertising for all competing customers in a newspaper of the customer's choice, or at least in those newspapers that meet the requirements for second-class mail privileges.

[2] The granting of allowances or payments that have little or no relationship to cost or approximate cost of the service provided by the retailer may be considered a violation of section 202 of the Act.

make available to all competing retailers any plan providing promotional payments or services to retailers. With these requirements met, a packer can limit the area of its promotion. However, this section is not intended to deal with the question of a packer's liability for use of an area promotion where the effect may be to injure the packer's competition.

5. *Wholesaler or third party performance of packer's obligations.* A packer may, in good faith, enter into written agreements with intermediaries, such as wholesalers, distributors or other third parties, including promoters of tripartite promotional plans, which provide that such intermediaries will perform all or part of the packer's obligations under this part. However, the interposition of intermediaries between the packer and its customers does not relieve the packer of its ultimate responsibility of compliance with the provisions of the Packers and Stockyards Act. The packer, in order to demonstrate its good faith effort to discharge its obligations under this part, should include in any such agreement provisions that the intermediary will:

(1) Give notice to the packer's customers in conformity with the standards set forth in items 3(b) and (d), supra;

(2) Check customer performance in conformity with the standards set forth in item 3(e), supra;

(3) Implement the plan in a manner which will insure its functional availability to the packer's customers in conformity with the standards set forth in item 3(c), supra (This must be done whether the plan is one devised by the packer itself or by the intermediary for use by the packer's customers.); and

(4) Provide certification in writing and at reasonable intervals that the packer's customers have been and are being treated in conformity with the agreement.

A packer who negotiates such agreements with its wholesalers, distributors or third party promoters will be considered by the Administration to have justified its "good faith" obligations under this section only if it accompanies such agreements with the following supplementary measures: At regular intervals the packer takes affirmative steps to verify that its customers are receiving the proportionally equal treatment to which they are entitled by making spot checks designed to reach a representative cross section of its customers. Whenever such spot checks indicate that the agreements are not being implemented in such a way that its customers are receiving such proportionally equal treatment, the packer takes immediate steps to expand or to supplement such agreements in a manner reasonably designed to eliminate the repetition or continuation of any such discriminations in the future.

Intermediaries, subject to the Packers and Stockyards Act, administering promotional assistance programs on behalf of a packer may be in violation of the provisions of the Packers and Stockyards Act, if they have agreed to perform the packer's obligations under the Act with respect to a program which they have represented to be usable and suitable for all the packer's competing customers if it should later develop that the program was not offered to all or, if offered, was not usable or suitable, or was otherwise administered in a discriminatory manner.

6. *Customer's liability.* A customer, subject to the Packers and Stockyards Act, who knows, or should know, that it is receiving payments or services which are not available on proportionally equal terms to its competitors engaged in the resale of the same packer's products may be in violation of the provisions of the Act. Also, customers (subject to the Packers and Stockyards Act) that make unauthorized deductions from purchase invoices for alleged advertising or other promotional allowances may be proceeded against under the provisions of the Act.

Example: A customer subject to the Act should not induce or receive an allowance in excess of that offered in the packer's advertising plan by billing the packer at "vendor rates" or for any other amount in excess of that authorized in the packer's promotion program.

7. *Meeting competition.* A packer charged with discrimination under the provisions of the Packers and Stockyards Act may defend its actions by showing that the payments were made or the services were furnished in good faith to meet equally high payments made by a competing packer to the particular customer, or to meet equivalent services furnished by a competing packer to the particular customer. This defense, however, is subject to important limitations. For instance, it is insufficient to defend solely on the basis that competition in a particular market is very keen, requiring that special allowances be given to some customers if a packer is "to be competitive."

8. *Cost justification.* If is no defense to a charge of unlawful discrimination in the payment of an allowance or the furnishing of a service for a packer to show that such payment or service could be justified through savings in the cost of manufacture, sale, or delivery. (Approved by the Office of Management and Budget under control number 0590–0001)

BILLING CODE 3410-KD-M

FEDERAL ELECTION COMMISSION

11 CFR Parts 109, 110 and 114

[Notice 1992–16]

Independent Expenditures; Corporate and Labor Organization Expenditures

AGENCY: Federal Election Commission.

ACTION: Change in MCFL public hearing time.

SUMMARY: On July 29, 1992, the Commission published proposed regulations that would implement the Supreme Court's opinion in *Federal Election Commission* v. *Massachusetts Citizens for Life, Inc.*, 479 U.S. 238 (1986). See 57 FR 33548. The Notice of Proposed Rulemaking announced that a public hearing would be held on October 14 and 15, 1992 at 10 a.m. The Commission has decided to change the starting time for the public hearing to 9:30 a.m. on both days. The additional time is necessary to accommodate all the witnesses who wish to testify.

DATES: The Commission will hold the hearing on October 14, 1992 at 9:30 a.m. and on October 15, 1992 at 9:30 a.m.

ADDRESSES: The hearing will be held at the Federal Election Commission, Ninth Floor Hearing Room, 999 E Street, NW., Washington, DC.

FOR FURTHER INFORMATION CONTACT: Ms. Susan E. Propper, Assistant General Counsel, 999 E Street, NW., Washington, DC 20463, (202) 219–3690 or toll free (800) 424–9530.

Dated: September 24, 1992.

Scott E. Thomas,

Vice Chairman, Federal Election Commission.

BILLING CODE 6715-01-M

DEPARTMENT OF THE TREASURY

Bureau of Alcohol, Tobacco and Firearms

27 CFR Part 9

[Notice No. 757; 92F–014P]

Texas High Plains Viticultural Area

AGENCY: Bureau of Alcohol, Tobacco and Firearms (ATF), Department of the Treasury.

ACTION: Notice of proposed rulemaking.

SUMMARY: The Bureau of Alcohol, Tobacco and Firearms (ATF) is considering the establishment of a viticultural area located in Northwest Texas to be known as "Texas High Plains." This proposal is the result of a petition filed by Clinton M. McPherson of Lubbock, Texas.

ATF believes that the establishment of viticultural areas and the subsequent use of viticultural area names as appellations of origin in wine labeling and advertising allows wineries to designate the specific areas where the grapes used to make the wine were grown and enables consumers to better identify the wines they purchase.

DATES: Written comments must be received by November 16, 1992.

ADDRESSES: Send written comments to: Chief, Wine and Beer Branch; Bureau of Alcohol, Tobacco and Firearms; P.O. Box 50221; Washington, DC 20091–0221; Attn: Notice No. 757.

FOR FURTHER INFORMATION CONTACT: Marjorie D. Ruhf, Wine and Beer Branch, Bureau of Alcohol, Tobacco and Firearms, 650 Massachusetts Avenue NW., Washington, DC 20226 (202–927–8230).

SUPPLEMENTARY INFORMATION:

Background

On August 23, 1978, ATF published Treasury Decision ATF–53 (43 FR 37672, 54624) revising regulations in 27 CFR part 4. These regulations allow the establishment of definite American viticultural areas. The regulations also allow the name of an approved viticultural area to be used as an appellation of origin in the labeling and advertising of wine.

On October 2, 1979, ATF published Treasury Decision ATF–60 (44 FR 56692) which added a new part 9 to 27 CFR, providing for the listing of approved American viticultural areas. Section 4.25a(e)(1), title 27, CFR, defines an American viticultural area as a delimited grape-growing region distinguishable by geographical features, the boundaries of which have been delineated in subpart C of part 9. Section 4.25a(e)(2) outlines the procedure for proposing an American viticultural area. Any interested person may petition ATF to establish a grape-growing region as a viticultural area. The petition should include:

(a) Evidence that the name of the proposed viticultural area is locally and/or nationally known as referring to the area specified in the petition;

(b) Historical or current evidence that the boundaries of the viticultural area are as specified in the petition;

(c) Evidence relating to the geographical features (climate, soil, elevation, physical features, etc.) which distinguish the viticultural features of the proposed area from surrounding areas;

(d) A description of the specific boundaries of the viticultural area, based on features which can be found on United States Geological Survey (U.S.G.S.) maps of the largest applicable scale; and

(e) A copy of the appropriate U.S.G.S. map(s) with the boundaries prominently marked.

Petition

ATF has received a petition from Clinton M. McPherson proposing to establish a viticultural area in the Texas panhandle to be known as "Texas High Plains." The proposed viticultural area contains approximately 8 million acres of flat, intensively cultivated land with cotton, sorghum and wheat the predominant crops, irrigated from the Ogallala aquifer. The elevation is from 3,000 to 4,000 feet above sea level. Vineyards presently occupy approximately 2,000 acres, but the petitioner maintains that there is growing interest in viticulture in the area. There are presently 4 wineries active within the proposed area. Nearly half of all commercial wine grapes grown in Texas are grown in the proposed area. The petitioner states many wines from Texas High Plains grapes are achieving high acclaims in national and international competitions. He attributes the excellent quality to the Texas High Plains' high elevation, cool nights, rich soils, dry, disease free conditions, and constant breezes.

Evidence of Name

The petitioner submitted evidence that the name "Texas High Plains" is used to refer to a large portion of the Texas panhandle and that the area specified in the petition is within the larger area locally or nationally known by that name. The evidence includes:

A Texas Highway Department poster which shows a map of the State of Texas, with a shaded area in the northwest portion of the state designated as the Texas High Plains. The east and west boundaries of the shaded area agree with the proposed boundaries, though the shaded area extends further to the north and south than the proposed area.

The Wine Spectator, February 29, 1992, edition contains an article entitled "Dawn of New Texas Wine" which refers to the "High Plains around Lubbock, where many of the best wine grapes grow".

The Texas Monthly, September, 1991, edition describes a vast area in northwest Texas known as the High Plains region.

The Los Angeles Times, June 1, 1987, edition carried an article titled "Texas Wine: Taste it and Believe It" which described several wineries on the "Texas high plains"—Pheasant Ridge and Llano Estacado, both within the proposed area.

Spirit magazine, September, 1986, edition carried an article titled "The Wine Industry—Coming of Age in Texas?" which referred to the High Plains as an area in which the soil would be compatible with European vines.

Evidence of Boundaries

Evidence that the boundaries of the proposed area are as specified in the petition includes the following:

The Fall, 1991, Market Report, a publication of the Texas Wine Marketing Research Institute, Texas Tech University, contains a map of the grape growing regions in Texas as broken down by counties. The western boundary agrees with that proposed, but the area shown on the map extends further to the north and slightly further to the east and south.

The 1986–87 Texas Almanac and State Industrial Guide published a map of the "vegetational areas" of Texas, showing the High Plains as a somewhat larger area than the one proposed, interrupted by a strip of "rolling plains" along the northern boundary of the proposed area.

The Texas Water Plan, published by the Texas Water Development Board in November, 1968, contains a map showing Texas climatological divisions, including the High Plains. The eastern boundary agrees with that proposed, but the area shown on the map extends further to the west, north and south.

According to the petitioner, the proposed boundaries omit portions of the larger area known as the "Texas High Plains" because they have been found to be unsuitable for commercial viticulture. The petitioner reports that, over the last 20 years, observers have found that risk of freeze damage became intolerable along the New Mexico border (the western boundary of the proposed area) and to the north of the proposed boundaries. This change in the minimum temperature during winter coincides roughly with the 4,000 foot elevation of these areas, higher than most of the proposed area.

In many of the narrative descriptions and maps submitted with the petition, an escarpment called the "Caprock" is used as the eastern boundary of the Texas High Plains. Since this escarpment is not represented on the U.S.G.S. maps as a single line, the petitioner has selected the 3,000 foot contour line as the eastern boundary for the proposed area. This contour line runs to the west of the escarpment; in some places it appears to be as much as 15 miles to the west.

The southern boundary of the proposed area was chosen by the petitioner because, he states, it corresponds to changes in temperature, soil type and wind which alter the growing conditions significantly. His evidence will be discussed further in the sections on soil and climate.

Viticultural History

Records of the Texas Agricultural Experiment Station in Lubbock show studies were done between 1909 and 1937 on the adaptability of many grape cultivars, including *vitis vinifera*, at the station. In the 1950s and '60s, French-American hybrids, American and

vinifera cultivars were planted in research plots at Texas Tech University, also in Lubbock. As a result of this work, commercial viticulture began in the area in 1945, and was expanded in the 1960s and again in 1973. Llano Estacado, the first winery in the area, had its first crush in 1976. Three more wineries have been developed in the Texas High Plains since then: Pheasant Ridge, Teysha and La Escarbada XIT.

In a report on the 1985 Lone Star State Wine Competition, Greater Lubbock, in its November, 1985, issue, noted that wineries within the proposed area won the only gold medal awarded, 60% of the silver medals, and nearly 40% of the bronze medals in the statewide competition. The Los Angeles Times, Monday, June 1, 1987, article, "Texas Wine: Taste It and Believe It" mentioned awards won by Llano Estacado and Pheasant Ridge at the 1986 San Francisco Fair and Wine Competition, competing against nearly 2,000 other wines, "including a bunch from California."

Geographical Features

The petitioner provided the following evidence relating to features which he contends distinguish the proposed viticultural area from the surrounding areas:

Topography

The petition states that the proposed area is distinguished from the surrounding area in part by its elevation. According to the petitioner, the most pronounced change in terrain occurs at the proposed eastern boundary of the area where an escarpment "provides an east facing wall 200–1,000 feet high along the entire east boundary of the proposed appellation, separating the Texas High Plains from the Rolling Plains to the east." The proposed area is described in the Texas Almanac as the "largest level plain of its kind in the United States." The high plains rise gradually from 3,000 feet in the east to more than 400 feet in spots along the New Mexico border.

Underlying the Texas High Plains is the Ogallala Aquifer. The Texas Almanac notes that this is an important source of irrigation water for crops grown in the area. The area has no major rivers, but there are numerous "playas" (small intermittent lakes) scattered through the area which catch water after rains and allow it to percolate back to the aquifer.

Soil

The authors of Our Texas, Ralph W. Steen and Frances Donecker, state that the High Plains were considered a "great American desert," suitable only for grazing, until late in the nineteenth century, when the land was found to be fertile. According to a report on Conservation Tillage issued by the Texas Agricultural Experiment Station (TAES) in July, 1987, soils in the proposed area vary from predominantly brown clay loams with clay textured subsoils in the north to fine sandy loams in the central and southern regions. The Ogallala aquifer, which supports irrigation within the proposed area, ends near the proposed southern boundary. The lack of available groundwater results in soils which are sandy, shallow and highly eroded to the south and east of the proposed area. The petitioner told of one vineyard south of the proposed boundary which was abandoned due to drifting sand.

Climate

According to the petitioner, the proposed area is characterized by low annual rainfall, moderate temperature, and variable, but gentle, wind.

According to a report on Irrigation Water Management by the Texas Water Resources Institute in August, 1987, average annual rainfall within the proposed area varies from 14 inches near the western boundary to 20 inches in the east. The report notes that the greatest monthly rainfall in the area occurs between May and September, a fact the petitioner attributes to warm moist air carried into the area from the Gulf of Mexico. This tropical air sometimes brings moderate to heavy thunderstorms with hail and intense winds. According to a chart from TAES, annual precipitation gradually increases to the east of the proposed area, and decreases to the west.

Other charts from TAES compare the annual temperatures in various parts of Texas. Mean annual temperature varies from 58° on the north to 61° on the south of the proposed area, a range which the petitioner claims is important to the quality potential of wine grapes. The proposed viticultural area's coldest temperatures range just above and below 0°, with colder temperatures to the north, and warmer temperatures to the south. According to the petitioner, growers to the north of the proposed boundary have abandoned plantings due to frequent freeze loss.

The petitioner also notes that, due to the low relative humidity on the High Plains, there is a very low incidence of such disease and pest problems as downy mildew, Pierces disease, phylloxera, and black rot, which are found in other parts of Texas.

Proposed Boundary

The boundary of the proposed Texas High Plains viticultural area may be found on six United States Geological Survey (U.S.G.S.) maps with a scale of 1:250,000. The boundary is described in § 9.144.

Executive Order 12291

It has been determined that this proposed regulation is not a major regulation as defined in Executive Order 12291 and a regulatory impact analysis is not required because it will not have an annual effect on the economy of $100 million or more; it will not result in a major increase in costs or prices for consumers, individual industries, Federal, State, or local government agencies, or geographic regions; and it will not have significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

Regulatory Flexibility Act

It is hereby certified that this regulation will not have a significant economic impact on a substantial number of small entities. Accordingly, a regulatory flexibility analysis is not required because the proposal, if promulgated as a final rule, is not expected (1) to have secondary, or incidental effects on a substantial number of small entities; or (2) to impose, or otherwise cause a significant increase in the reporting, recordkeeping, or other compliance burdens on a substantial number of small entities.

Paperwork Reduction Act

The provisions of the Paperwork Reduction Act of 1980, Public Law 96–511, 44 U.S.C. chapter 35, and its implementing regulations, 5 CFR part 1320, do not apply to this notice of proposed rulemaking because no requirement to collect information is proposed.

Public Participation

ATF requests comments from all interested parties. We particularly request comments concerning the name and boundaries of the proposed area. The area described in the petition is very large, but the evidence shows that the name "High Plains" applies to a much larger area which extends beyond the borders of the State of Texas to the west and north, and further south within the State. The use of the name "Texas High Plains" to describe the proposed area is only warranted if there is a

difference in growing conditions which coincides with the political boundaries. We are also concerned that use of the name "Texas High Plains" for a viticultural area which is smaller than the area commonly called by that name may tend to confuse consumers. We request comments as to whether there are areas suitable for viticulture within the larger area known as "Texas High Plains" which would be excluded from the proposed viticultural area. Commenters who believe a potential for confusion exists should suggest alternate names for the proposed area.

Comments received on or before the closing date will be carefully considered. Comments received after that date will be given the same consideration if it is practical to do so, but assurance of consideration cannot be given except as to comments received on or before the closing date.

ATF will not recognize any comment as confidential. Comments may be disclosed to the public. Any material which a commenter considers to be confidential or inappropriate for disclosure to the public should not be included in the comment. The name of the person submitting a comment is not exempt from disclosure. During the comment period, any person may request an opportunity to present oral testimony at a public hearing. However, the Director reserves the right to determine, in light of all circumstances, whether a public hearing will be held.

Drafting Information

The principal author of this document is Marjorie D. Ruhf, Wine and Beer Branch, Bureau of Alcohol, Tobacco and Firearms.

List of Subjects in 27 CFR Part 9

Administrative practices and procedures, Consumer protection, Viticultural areas, and Wine.

Authority and Issuance

Title 27, Code of Federal Regulations, part 9, American Viticultural Areas, is amended as follows:

PART 9—AMERICAN VITICULTURAL AREAS

Paragraph 1. The authority citation for part 9 continues to read as follows:

Authority: 27 U.S.C. 205.

Par. 2. Subpart C is amended by adding § 9.144 to read as follows:

Subpart C—Approved American Viticultural Areas

§ 9.144 Texas High Plains.

(a) *Name.* The name of the viticultural area described in this section is "Texas High Plains."

(b) *Approved maps.* The appropriate maps for determining the boundary of the Texas High Plains viticultural area are six U.S.G.S. topographical maps of the 1:250,000 scale. They are titled:

(1) "Clovis, New Mexico; Texas" 1954, revised 1973.

(2) "Brownfield, Texas; New Mexico" 1954, revised 1973.

(3) "Hobbs, New Mexico; Texas" 1954, revised 1973.

(4) "Plainview, Texas" 1954, revised 1974.

(5) "Lubbock, Texas" 1954, revised 1975.

(6) "Big Spring, Texas" 1954, revised 1975.

(c) *Boundary.* The Texas High Plains viticultural area is located in Armstrong, Bailey, Borden, Briscoe, Castro, Cochran, Crosby, Dawson, Deaf Smith, Dickens, Floyd, Gaines, Garza, Hale, Hockley, Lamb, Lubbock, Lynn, Motley, Parmer, Randall, Swisher, Terry and Yoakum Counties, Texas. The boundary is as follows:

(1) Beginning on the Hobbs, New Mexico; Texas, map at the intersection of the Texas-New Mexico border and U.S. Route 180 east of Hobbs, New Mexico,

(2) The boundary follows U.S. Route 180 east through Seminole, Texas and onto the Big Spring, Texas, U.S.G.S. map where it intersects with the 3000 foot contour line in the town of Lamesa;

(3) The boundary then follows the 3000 foot contour line in a generally northeasterly direction across the U.S.G.S. maps of Big Spring and Lubbock, Texas

(4) The boundary continues along the 3000 foot contour line onto the map of Plainview, Texas, where it follows a generally northwesterly direction until it intersects with State Highway 217 approximately 12 miles east of Canyon, Texas;

(5) The boundary then follows State Highway 217 west to Canyon, Texas, leaves State Highway 217 and proceeds in a straight line in a northwesterly direction until it intersects with U.S. Route 60, still within Canyon, Texas;

(6) The boundary then follows U.S. Route 60 in a southwesterly direction onto the U.S.G.S. map of Clovis, New Mexico; Texas, where it intersects the Texas-New Mexico border;

(7) The boundary then follows the Texas-New Mexico border south, across the U.S.G.S. map of Brownfield, Texas; New Mexico, to the beginning point on the Hobbs, New Mexico; Texas, U.S.G.S. map.

Approved: September 23, 1992.

Stephen E. Higgins,

Director.

BILLING CODE 4810-31-M

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

[LA-4-1-5207; FRL-4515-4]

Approval and Promulgation of Air Quality Implementation Plans Louisiana; Correction of Deficiencies in VOC RACT Rules

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rulemaking.

SUMMARY: This notice proposes to approve the revisions to the State of Louisiana's air quality regulations concerning reasonably available control technology (RACT) for sources emitting volatile organic compounds and recodify the federally-approved State Implementation Plan (SIP) to match the State's regulatory code. This action is necessary for several reasons. First, on May 26, 1988, EPA notified the State of Louisiana that its SIP for attaining the national ambient air quality standard (NAAQS) for ozone was substantially inadequate as it applied to the seven parishes comprising the Baton Rouge ozone nonattainment area: Ascension, East Baton Rouge, Iberville, Livingston, Pointe Coupee, St. James, and West Baton Rouge. This notice called for the State to correct deficiencies in its Volatile Organic Compound (VOC) RACT rules as they applied to those parishes. Second, on November 8, 1989, EPA notified Louisiana that its ozone SIP was substantially inadequate as it applied to Calcasieu Parish, which comprises the Lake Charles ozone nonattainment area, and also called for the State to correct existing deficiencies in its VOC RACT rules as these applied to Calcasieu Parish. Third, the Clean Air Act, as amended on November 15, 1990, required the State to revise its SIP to correct VOC RACT deficiencies within six months of enactment. Finally, the VOC RACT rules must be recodified to provide consistency between the State's code and the SIP. The effect of today's proposed action will be to correct existing deficiencies in the VOC RACT rules of the Louisiana SIP as required by

EPA notices of deficiency and the Clean Air Act, as amended, and to recodify the VOC RACT rules to conform with the State's code. This action is being taken under section 110 and Part D of the Clean Air Act, as amended by the Clean Air Act Amendments of 1990.

DATES: Comments on today's proposed action must be received on or before October 30, 1992.

ADDRESSES: Comments should be mailed to Thomas H. Diggs, Chief, Air Planning Section (6T–AP), USEPA Region 6, 1445 Ross Avenue, Dallas, Texas, 75202–2733. Copies of the documents relevant to today's action are available for public inspection during normal business hours at the above location and at the Louisiana Department of Environmental Quality, Air Quality Division, 7290 Bluebonnet Boulevard, Baton Rouge, Louisiana, 70810. Anyone wishing to review these documents at the USEPA office is asked to contact the person named below to schedule an appointment 24 hours in advance.

FOR FURTHER INFORMATION CONTACT: Guy Donaldson at (214) 655–7214.

SUPPLEMENTARY INFORMATION: In the **Federal Register** on November 24, 1987, EPA's Proposed Post-1987 Policy for Ozone and Carbon Monoxide stated that air quality monitors revealed exceedances of the ozone standard in the Baton Rouge area of Louisiana and that a "SIP call" would be issued (See 52 FR 45044). A SIP call is a finding by EPA that the SIP does not provide for attainment by the required date.[1] In a letter dated May 26, 1988 to Governor Buddy Roemer, EPA notified the State of Louisiana that because the Baton Rouge area had failed to attain the NAAQS for ozone by December 31, 1987, as required under section 172 of the Clean Air Act, its SIP was substantially inadequate and would need to be revised. Later on November 8, 1989, EPA notified the State that its SIP as it applied to Calcasieu Parish was substantially inadequate to achieve the ozone NAAQS in that area (i.e., Lake Charles).[2] EPA requested that the State respond to the SIP calls in two phases. Pursuant to the first phase, the State was to: (1) Correct identified deficiencies in the exisiting SIP's VOC regulations; (2) adopt VOC regulations previously required or committed to but never adopted; and (3) update the area's base year emissions inventory. Just as the Post '87 SIP calls were being anticipated, the Louisiana Department of Environmental Quality (LDEQ) recodified its air quality regulations. The bulk of this effort was conditionally approved March 8, 1989, at 54 FR 9783.[3] The VOC RACT rules were not approved as part of the recodification at that time because the majority of the VOC RACT rules as recodified were substantially changed from the rules previously approved as part of the SIP. This is because the State had revised its VOC RACT rules for various reasons, but the revisions had not been incorporated into the federally-approved SIP. Given the discrepancies between the State code and the SIP, EPA decided not to approve the recodification of the VOC RACT rules to avoid confusing the public about which version was part of the federally-approved SIP. Now that the revised language is considered acceptable, EPA is simultaneously approving the substantive revisions and the recodification and will refer to the VOC RACT rules by the recodified designations.

To understand the corrections to the VOC RACT rules, some background on RACT is necessary. The Clean Air Act, as amended in 1977, required that States promulgate rules that require RACT for existing industrial sources that are located in ozone nonattainment areas. EPA has defined RACT as the lowest emission limitation that a particular source is capable of meeting by the application of control technology that is reasonably available considering technological and economic feasibility (44 FR 53761). To help the States develop RACT rules, EPA issued Control Technology Guideline (CTG) documents. The Agency prepared three sets of CTG's covering 24 industrial source categories. These categories included coating operations, stage I vapor control from gasoline service stations, leaks from petroleum refinery equipment, storage of petroleum liquids in tanks, and other activities associated with VOC emissions.

States used the CTG's to develop RACT for VOC sources located in either urban or rural nonattainment areas, "urban" and "rural" being defined by population. Since urban areas were believed to need more controls than rural areas and CTGs were not meant to be all-encompassing, States also had to develop RACT for non-CTG major sources [4] in urban nonattainment areas. For the purposes of the Post '87 SIP calls, East and West Baton Rouge Parishes were urban nonattainment and Ascension, Iberville, Pointe Coupee, St. James and Calcasieu Parishes were rural nonattainment. The distinction between urban and rural does not affect most of these revisions because, generally, Louisiana adopts rules on a statewide basis. But it should be noted that some of the rules do not apply to the same degree in all of the parishes covered by the Post '87 SIP calls.

On May 25, 1988, EPA published a guidance document entitled, "Issues Relating to VOC Regulation Cutpoints, Deficiencies and Deviations" (the Blue Book). This document did not expand or modify existing Federal requirements but provided information to clarify past EPA guidance. The CTGs and the Blue Book were used to identify the deficiencies to be corrected in response to the Post '87 SIP calls. Correction of these deficiencies would provide better enforceability of the VOC RACT rules and a greater degree of equity.

Since the Post '87 SIP calls, Congress amended the Clean Air Act on November 15, 1990. Public Law 101–549, 104 Stat. 2399, codified at 42 U.S.C. 7401–7671q. Under the amended Act, those areas that were designated nonattainment before enactment of the Amendments, and which retained that designation and were classified as marginal or above as of enactment,[5] were required to meet the section 182(a)(2)(A) RACT fix-up requirement by May 15, 1991. The Baton Rouge and Lake Charles nonattainment areas are classified as serious and marginal, respectively, and therefore, are subject to the RACT fix-up requirement. Under section 182(a)(2)(A), those areas were required to correct RACT as it was required under preamendment

---

[1] Under the pre-amended Act, section 110(a)(2)(H) provided for a finding by the Administrator that a "plan is substantially inadequate to achieve the [NAAQS]." This provision was carried forth under the amended Act. In addition, section 110(k)(5) of the amended Act reinforces the Agency's authority to make such a finding.

[2] To avoid repetition, hereinafter the Baton Rouge and Lake Charles SIP calls will be referred to as the Post '87 SIP calls.

[3] The conditional approval of the rules has not been changed to final approval because the State still has not submitted changes to correct certain errors in the recodified rules. Also, since the publication of that conditional approval, EPA has found that one rule, previously thought to be unchanged, was changed substantially. The Agency issued a correction to the conditional approval (57 FR 8075, March 6, 1992) to note that the language of the recodified rule in question is not being approved.

[4] Sources that are not the subject of a CTG.

[5] Air monitoring data since the post-87 SIP call indicates that St. James Parish may have attained the NAAQS for ozone. It has retained its nonattainment designation but is classified as incomplete data. Therefore, St. James Parish is not subject to section 182(a)(2)(A) of the amended act. Louisiana will, however, have to correct any deficiencies regarding enforceability of existing rules in order to be redesignated to attainment. See the General Preamble 57 FR 13498, at 13525 (April 16, 1992)

guidance.[6] The Post '87 SIP call letters interpreted that guidance and indicated corrections necessary for specific nonattainment areas.

The Louisiana Department of Environmental Quality (LDEQ) adopted revisions to the VOC RACT rules in a series of actions making revisions to various sections of LAC:33:III: Chapter 1 (pertaining to General Provisions) and Chapter 21 (pertaining to Control of Emissions of Organic Compounds). The first submittal in response to the Post '87 SIP calls, sent to EPA in a letter dated June 13, 1990 [7], contained revisions to Chapter 21 as adopted on January 20 and February 20, 1990. The second submittal from the Governor, dated October 26, 1990, contained further corrections to Chapter 21 as adopted July 20, 1990. A third submittal dated May 9, 1991, contained revisions as adopted by emergency rulemaking procedures on May 1, 1991. A fourth submittal, received May 24, 1991, contained revisions to the VOC regulations adopted by LDEQ on November 20, 1990 and April 20, 1991.

Because LDEQ could not meet the statutory deadline using its regular rulemaking procedures, it resorted to emergency procedures allowed under the State's Administrative Procedures Act (LSA R.S. 49:953(B), 30:2011, and 30:2054) to make final corrections to the VOC RACT rules. These procedures allow rules to be revised without public hearing but limit their effectiveness to 120 days. However, since the rules are only effective for 120 days, LDEQ also used its regular rulemaking process and adopted rules again on July 20, 1991. These regulations were submitted to EPA on March 26, 1992.

The Louisiana emergency measure submitted on May 9, 1991, was not subject to notice and public hearing at the State level. Pursuant to section 110(a)(1) of the Clean Air Act, EPA requires States to submit SIPs and SIP revisions that the State has adopted "after reasonable notice and public hearing." The State cured this defect through its submittal of March 26, 1992. At that time, the State resubmitted the same rule, after it fulfilled the public notice and hearing requirements. Therefore, EPA is proposing to approve these submittals in this action.

At the same time that Louisiana submitted the rules that went through the public participation process, Louisiana resubmitted the recodification of the VOC RACT rules and submitted rules adopting capture efficiency test methods. It was necessary to resubmit the remodified version of the VOC RACT rules (previously submitted on January 6, 1988 but later recalled), to include changes to the State rules that were not included in the SIP and adopted prior to the June 13, 1990 submittal. The recodified VOC RACT rules, first submitted in 1988, serve as the baseline superseding all previous regulation submittals concerning VOC RACT rules.

Louisiana's revised regulations, submitted in response to the Post '87 SIP call letters, also respond to the RACT fix-up requirements of the Clean Air Act, as amended in 1990. Taken together, these submittals meet the requirements of section 182(a)(2)(A) of the amended Act.

The Post '87 SIP calls identified many deficiencies in the Louisiana VOC rules. Certain deficiencies were common to several rules. For example, many rules allowed "State Director's Discretion" to approve alternate methods of compliance. To correct those rules, the State needed to expressly provide that alternate means of compliance require both State and EPA approval. Another correction that was incorporated into many of the rules was the concept of "Once in, Always In." In other words, if a facility's throughput makes it subject to a control requirement at any time, then it is always subject to the control requirement. Finally, provisions for recordkeeping, test methods and monitoring requirements had to be added to improve the enforceability of many of the rules.

This notice contains a capsule description of each rule as it has been revised in its final form. A detailed explanation of the revisions is found in the Technical Support Document (TSD) prepared for this proposed action. A copy of this TSD is available, upon request, from the EPA Regional Office listed in the **ADDRESSES** section of this notice.

LAC:33:III:111. Definitions. This section has been revised to add a definition for Administration Authority*. The asterisk denotes that, both EPA and LDEQ must approve any alternative or equivalent test methods, waivers, monitoring methods, testing and monitoring procedures or other alternative methods of compliance not specified in the rule. Administrative Authority without an asterisk is only used in those rules where the State can retain approval authority. This is the mechanism by which Louisiana has removed the deficiency which had existed with regard to State director's discretion. The definition of VOC was also revised to remove a lower vapor pressure cutoff so that the definition now is consistent with the CAA as interpreted in EPA policy. Definitions were also added for the following terms to improve the enforceability of the rules; coating, miscellaneous metal parts, non-attainment area, and ozone exceedance.

LAC:33:III 2101. Compliance Schedules. This rule was changed to require all facilities to achieve compliance 1 year after becoming affected by a regulation. This is consistent with the CAA as interpreted in EPA's policy to require expeditious compliance.

LAC:33:III 2103. Storage of Volatile Organic Compounds. This rule covers control requirements for VOC storage tanks. Several changes were made to improve enforceability of the rule. First, State director's discretion for the approval of alternate seals was removed. Second, test methods were added for measuring secondary seal gaps and for determining the performance of add-on control devices. Third, the exemption was removed for tanks larger than 420,000 gallons storing crude oil or condensate in nonattainment parishes. Finally, recordkeeping requirements were added for demonstrating continuous compliance for vapor loss control systems.

LAC:33:III 2105. Storage Volatile Organic Compounds (Small Tanks). This section was combined into Section 2103.

LAC:33:III 2107. Volatile Organic Compounds—Loading. This Section deals with the control of VOC emissions during loading tanks, trucks or trailers. The rule was revised to include "once in, always in" requirements. The rule was also clarified to state that the control efficiency of any vapor control device must be at least 90%. A provision was added requiring visual monitoring to detect liquid and vapor leaks and recordkeeping requirements to demonstrate continuous compliance. Test methods were added for determining control device efficiency.

---

[6] Among other things, the pre-amendment guidance consists of those portions of the Post-1987 ozone and carbon monoxide policy that concern RACT, 52 FR 45044 (November 24, 1987); the Bluebook, "Issues Relating to VOC Regulation Cut-points, Deficiencies and Deviations, Clarification to appendix D of November 24, 1987 **Federal Register** Notice" (for which notice of availability was published in the **Federal Register** on May 25, 1988); and the existing CTGs.

[7] EPA has already taken action on a portion of Louisiana's June 13, 1990, submittal. Those portions, Subchapter B, Organic Solvents, Section 2123, paragraphs C.6 and D.3, were approved on September 7, 1990 (55 FR 36811). Louisiana revised these sections pursuant to an Order of the United States District Court for the Western District of Louisiana in the case of *United States* v. *General Motors Corporation*, Civil Action No. CV87-1890S.

LAC:33:III 2109. Oil/Water—Separation. This regulation outlines requirements for single and multiple compartment volatile organic compound water separators. In the Parishes subject to the Post '87 SIP calls, the exemption level was changed so that now VOC/water separators that are minor sources (emit less than 100 tons/yr) are required to have controls. The new exemption level is for separators that process less than 200 gallons/day or materials with a vapor pressure less than 0.5 psia. To improve the enforceability of the regulation, appropriate test methods and recordkeeping requirements were added. Also, director's discretion was removed for the approval of alternate control methods.

LAC:33:III 2111. Pumps and Compressors. This regulations was changed to effect only pumps and compressors handling volatile organic compounds having a true vapor pressure of 1.5 psia. This change was necessary because the definition of VOC was changed to remove the 1.5 psia cutoff.

LAC:33:III 2113. Housekeeping. This is a general provision in the Louisiana regulations to encourage measures to reduce the quantity of VOC emissions through good work practices. It does not arise from any Clean Air Act requirement, but is being approved as part of the SIP for its strengthening effect. The changes added specific requirements for housekeeping and maintenance plans.

LAC:33:III 2115. Waste Gas Disposal. This rule covers the Group III CTG categories of Manufacture of High-density Polyethylene, Polypropylene and Polystyrene Resins, and Air Oxidation Reactors. In addition, the rule covers non-CTG major sources that have waste gas streams. The main changes to this rule were made to improve the enforceability of the rule. They include removal of director's discretion for approval of exemption from the rule or for alternate means of control. Test methods were added for the determination of control device efficiency. Control device monitoring requirements were added so that the continued compliance of the control device will be demonstrated. Recordkeeping provisions were added so that past compliance will be recorded. In addition, recordkeeping requirements for facilities demonstrating exemption from the rule were added. Also, the rule now clearly states that the control requirement for non-halogented waste streams is 95 percent reduction or 50 ppm exhaust concentration, whichever is more stringent.

LAC:33:III 2117. Exemptions. This rule lists compounds that are exempt from the VOC control requirements due to low photochemical reactivity. It was revised to add four compounds to the list; dichlorotrifluouroethane (HCFC-123), tetrafluouroethane (HFC-134a), dichlorofluouroethane (HCFC-141b) and chlorodifluouroethane HCFC-142b). This change was made in response to revisions to the EPA policy on exempt compounds made January 18, 1989 (54 FR 1987) and is in keeping with the EPA definition of VOC promulgated February 3, 1992 (57 FR 3941).

LAC:33:III 2119. Variances. This regulation has provisions to allow variances from the requirements of the regulations. It was revised to show that any variances must be approved by both EPA and LDEQ.

LAC:33:III 2121. Fugitive Emission Control. This regulation sets requirements to control emissions from leaking components in Petroleum Refineries, Synthetic Organic Chemical Manufacturing Industry (SOCMI) plants, and Natural Gas Processing Plants. The emissions are controlled through requiring leak detection and repair (LDAR) programs. Several requirements were added that increased the stringency of these regulations to follow EPA guidelines. The changes included adding quarterly monitoring requirements for valves and pumps in light liquid service and valves in gas service in SOCMI and polymer manufacturing plants. Also, the revisions added a requirement that fugitive leaks detected by sight, sound or smell be repaired immediately regardless of concentration. The applicability of the rule was also expanded to cover the methyl tertiary butyl ether (MTBE) manufacturing industry.

Other changes were made to clarify previously vague areas in the rule for better enforceability. These changes included adding definitions for Inaccessible Valves, Heavy Liquid Service, Light Liquid Service and Light Liquid. Other changes were made to require both EPA and State approval for alternate monitoring plans.

LAC:33:III:2123. Organic Solvents. This regulation contains requirements designed to reduce emissions from solvent-using industries. Extensive changes were made to this regulation to lower exemption limits and improve enforceability. Sources in East and West Baton Rouge Parishes (pre-amendment urban nonattainment areas) that have potential emissions greater than 10 tons/year are now affected by this regulation. In other nonattainment parishes the exemption limit was lowered to 100 lbs/day.

To improve enforceability, "once in, always in" provisions were added. As a result, once a source is subject to the regulations, it is always subject, thereby simplifying applicability determinations. The rule now also explicitly states that the limits on the VOC content of the coatings minus water and exempt solvents. Also, test methods and recordkeeping requirements were added. Control device monitoring requirements were included. The revised regulations now explicitly state that VOC limits are on an as applied basis. Also, exemptions were added for plastisol coatings and for coatings applied to the exterior of fully assembled aircraft.

LAC:33:III:2125. Vapor Degreasers. Extensive revisions were made to this rule which covers regulations for open top vapor degreasers, conveyorized vapor degreasers and cold cleaners. For open top vapor degreasers, the revised regulation now requires either a minimum freeboard ratio of .75, a refrigerated chiller capable of 85% reduction, an enclosed design or control by a carbon adsorber. Numerous requirements were added for safety switches to stop the vaporization of solvent if a malfunction occurs in the degreaser.

For conveyorized degreasers, provisions were added to require that emissions be controlled by either a refrigerated condenser or a carbon adsorber. Various operating practice requirements and shutdown provisions were added in order to limit emissions. Cold cleaners are required by the revisions to have either a freeboard ratio greater than 0.7 or a water cover. This will result in reduced emissions. The applicability of the regulation was revised to cover cold cleaners using solvents with vapor pressures greater than 0.6 psi.

LAC:33:III:2127. Cutback Paving Asphalt. This rule regulates the use of cutback asphalt. The changes that have been made are to require recordkeeping to demonstrate compliance with the rule. Requirements were also added to cover emulsified asphalt to limit the VOC content of these materials.

LAC:33:III:2129. Perchloroethylene Dry Cleaning Systems. This regulation has control requirements to reduce emissions from dry cleaners. The revisions require weekly visual inspections to locate any liquid leaks. Any leaks that are discovered are required to be repaired within 15 working days. Test method and recordkeeping provisions were also added to allow consistent determinations of compliance.

LAC:33:III:2131. Filling of Gasoline Storage Vessels. This rule requires that gasoline storage vessels at service stations be equipped with vapor return lines to return vapors displaced during filling to the delivery vessel. One change that was made to this rule concerned exempting tanks greater than 40,000 gallons in capacity because these tanks are covered under Section 2103 which requires other types of control for these larger tanks. The rule was also revised to lower the exemption level from 500,000 gallons/month to 120,000 gallons/month. The exemption limit for the size of receiving vessels was also lowered from 2000 gallons to 250 gallons. Vapor tightness testing requirements were added and a requirement that any control devices used must achieve 90% control. Appropriate test methods and recordkeeping requirements were also added to the rule.

LAC:33:III:2133. Gasoline Bulk Plants. This regulation was revised to add several provisions to reduce VOC emissions and improve enforceability. The revised regulation includes a requirement that only leak-tight vehicles be serviced. This regulation now requires that all loading and vapor lines be equipped with fittings that close automatically when disconnected. Finally, so that compliance is documented, visual monitoring and recordkeeping requirements were added.

LAC:33:III:2135. Bulk Gasoline Terminals. This regulation was changed for easier enforceability. It was clarified that the exemption level is 20,000 gallons/day averaged over any 30 day period. "Once in always in" requirements were added. An equation for recovery efficiency was added. In addition, the proper test methods were added to provide for consistent testing. Control device efficiency was specified to be 90 percent. The revisions also added a requirement for inspections for visible liquid leaks, visible fumes, or odors resulting from gasoline dispensing. If leaks are observed, loading must be discontinued until the leak is repaired. To document continuing compliance, the revisions require the maintenance of daily records of exhaust gas temperature of direct flame incinerators, and inlet and outlet temperatures of chillers and catalytic incinerators. Also, the breakthrough of volatile organic compounds in a carbon adsorption unit must be recorded.

LAC:33:III.2137. Gasoline Terminal Vapor-Tight Control Procedure. This regulation is designed to prevent vapor leaks from gasoline tank trucks during loading and transport. This is to ensure that vapors collected during unloading at service stations (See 2131) are returned to the gasoline terminal for disposal. The following corrections were made to the regulation. First, the correct test method is now referenced. Second, State director's discretion to allow less frequent than annual monitoring was removed.

LAC:33:III.2139. Refinery Vacuum Producing Systems. This regulation is designed to reduce emissions from steam jet ejectors and mechanical pumps. Emissions are required to be controlled by one of the methods specified in 2115. A, B, and F (Waste Gas Disposal Rule). The rule refers back to 2115 to incorporate the test methods and recordkeeping requirements to aid in enforcement of the regulation.

LAC:33:III.2141. Refinery Unit Turnarounds. This regulation is designed to prevent VOC emissions during refinery process unit turnarounds. One of the main requirements is that vapors released during the depressurization of vessels be collected and controlled by one of the methods in 2115. A, B and F (Waste Gas Disposal) and that records be kept in accordance with 2115.

LAC:33:III.2143. Graphic Arts (Printing) by Rotogravure and Flexographic Process. This regulation is designed to control emissions from the printing industry by reducing the VOC content of inks or the institution of add-on controls. Deficiencies in the regulation were corrected to aid enforcement. One change prohibits cross-line averaging without approval of EPA and the state. The applicability of the regulation was clarified by stating that facilities with the potential to emit more than 100 tons/yr on an uncontrolled basis at full production (8760 hours per year basis) are subject to the regulation. Also, "once in, always in" provisions were added to further clarify applicability. A provision was also added to require continuous monitoring of control device operational parameters. Finally, to ensure consistent enforcement, compliance test methods were added to the rule A recordkeeping section was added, requiring records of testing, control device operating parameters and the solvent content of inks used. Language was also added stating that VOC content must be measured less water and exempt solvents.

LAC:33:III.2145. Pharmaceutical Manufacturing Facilities. This regulation is designed to regulate emissions from the Pharmaceutical Manufacturing industry. The requirements of this regulation were made more stringent by removing the exemption for facilities that emit less than 550 lbs/day of VOC. Now all reactors, distillation operations, crystallizers, centrifuges and vacuum dryers that have a potential to emit, prior to control, more than 15 lbs/day are subject to the requirements. The regulation was also made more stringent to conform to EPA policy by requiring that visible liquid leaks be repaired within 15 days. To ensure continuing compliance, requirements were added for monitors to be maintained to measure and record operational parameters of all control devices. Finally, test methods were added requiring that the appropriate reference methods be used to demonstrate compliance.

Proposed Action: Today's notice proposes to approve revisions to the Louisiana SIP as submitted on June 13, 1990, October 26, 1990, May 24, 1991, and March 26, 1992. These revisions to the VOC RACT rules are proposed as satisfying the requirements of the May 26, 1988 SIP call for the Baton Rouge nonattainment area, the November 8, 1989 SIP call for the Lake Charles nonattainment area and the RACT fix-up requirements of section 182(a)(2)(A) of the amended Act. The proposed recodification meets the requirements of Section 110 and part D of the Clean Air Act, as amended.

Under the Regulatory Flexibility Act, 5 U.S.C. 600 et. seq., EPA must prepare a regulatory flexibility analysis assessing the impact of any proposed or final rule on small entities. 5 U.S.C. 603 and 604. Alternatively, EPA may certify that the rule will not have a significant impact on a substantial number of small entities. Small entities include small businesses, small not-for-profit enterprises, and government entities with jurisdiction over populations of less than 50,000.

SIP approvals under section 110 and subchapter I, Part D of the CAA do not create any new requirements, but simply approve requirements that the State is already imposing. Therefore, because the federal SIP-approval does not impose any new requirements, I certify that it does not have a significant impact on any small entities affected. Moreover, due to the nature of the federal-state relationship under the CAA, preparation of a regulatory flexibility analysis would constitute federal inquiry into the economic reasonableness of state action. The CAA forbids EPA to base its actions concerning SIPs on such grounds. *Union Electric Co.* v. *U.S. E.P.A.*, 427 U.S. 246, 256–66 (S. Ct. 1976); 42 U.S.C. 7410(a)(2).

The Office of Management and Budget has exempted this rule from the requirements of section 3 of Executive Order 12291.

Glyceryl Behenate; Tolerance Exemption

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: This document proposes that an exemption from the requirement of a tolerance be established for residues of glyceryl behenate (CAS Reg. No. 18641-57-1) when used as an inert ingredient (adjuvant; encapsulating agent) in pesticide formulations applied to growing crops or to raw agricultural commodities after harvest. This proposed regulation was requested by the Parexel International Corp.

DATES: Comments, identified by the document control number [OPP-300264], must be received on or before October 30, 1992.

ADDRESSES: By mail, submit written comments to: Public Response and Program Resources Branch, Field Operations Division (H7506C), Office of Pesticide Programs, Environmental Protection Agency, 401 M St., SW., Washington, DC 20460. In person, deliver comments to: Rm. 1128, CM #2, 1921 Jefferson Davis Hwy., Arlington, VA 22202. Information submitted as a comment concerning this document may be claimed confidential by marking any part of all of that information as "Confidential Business Information" (CBI). Information so marked will not be disclosed except in accordance with procedures set forth in 40 CFR part 2. A copy of the comment that does not contain CBI must be submitted for inclusion in the public record. Information not marked confidential will be included in the public docket by the EPA without prior notice. The public docket is available for public inspection in Rm. 1128 at the address given above, from 8 a.m. to 4 p.m., Monday through Friday, excluding legal holidays.

FOR FURTHER INFORMATION CONTACT: By mail: Connie Welch, Registration Support Branch, Registration Division (H7505C), Office of Pesticide Programs, Environmental Protection Agency, 401 M St., SW., Washington, DC 20460. Office location and telephone number: Rm. 711I, CM #2, 1921 Jefferson Davis Hwy., Arlington, VA 22202, (703) 305-7252.

SUPPLEMENTARY INFORMATION: Parexel International Corp., One Alewife Place, Cambridge, MA 02140, submitted pesticide petition (PP) 1E03934 to EPA requesting that the Administrator, pursuant to section 408(e) of the Federal Food, Drug, and Cosmetic Act, 21 U.S.C. 346a(e), propose to amend 40 CFR 180.1001(c) by establishing an exemption from the requirement of a tolerance for residues of glyceryl behenate (CAS Reg. No. 18641-57-1) when used as an inert ingredient (adjuvant; encapsulating agent) in pesticide formulations applied to growing crops or to raw agricultural commodities after harvest.

Inert ingredients are all ingredients that are not active ingredients as defined in 40 CFR 153.125, and include, but are not limited to, the following types of ingredients (except when they have a pesticidal efficacy of their own): solvents such as alcohols and hydrocarbons; surfactants such as polyoxyethylene polymers and fatty acids; carriers such as clay and diatomaceous earth; thickeners such as carrageenan and modified cellulose; wetting, spreading, and dispersing agents; propellants in aerosol dispensers; microencapsulating agents; and emulsifiers. The term "inert" is not intended to imply nontoxicity; the ingredient may or may not be chemically active.

The data submitted in the petition and other relevant material have been evaluated. As part of the EPA policy statement on inert ingredients published in the **Federal Register** of April 22, 1987 (52 FR 13305), the Agency established data requirements which will be used to evaluate the risks posed by the presence of an inert ingredient in a pesticide formulation. Exemptions from some or all of the requirements may be granted if it can be determined that the inert ingredient will present minimal or no risk.

The Agency has decided that the data normally required to support the proposed tolerance exemption for glycerol tribehenate will not need to be submitted. The rationale for this decision is described below.

1. Glyceryl behenate is affirmed by the Food and Drug Administration under 21 CFR 184.1328 as generally recognized as safe (GRAS) when added directly to human food.

2. Behenic acid is a minor constituent of most seed and milk fats, and marine animal oils and a major constituent of mustard seed and rape oil.

3. The U.S. Food and Drug Administration has established specifications for the ingredients contained in glyceryl behenate for use in food with no limitation other than current good manufacturing practice under 21 CFR 184.1328.

4. Glyceryl behenate is approved by the U.S. Food and Drug Administration for use as a formulation aid (lubricant for tablets and capsules) as defined in 21 CFR 170.3(o)(14).

Based upon the above information and review of its use, EPA has found that, when used in accordance with good agricultural practice, this ingredient is useful and a tolerance is not necessary to protect the public health. Therefore, EPA proposes that the exemption from the requirement of a tolerance be established as set forth below.

Any person who has registered or submitted an application for registration of a pesticide, under the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) as amended, which contains any of the ingredients listed herein, may request within 30 days after publication of this document in the Federal Register that this rulemaking proposal be referred to an Advisory Committee in accordance with section 408(e) of the Federal Food, Drug, and Cosmetic Act.

Interested persons are invited to submit written comments on the proposed regulation. Comments must bear a notation indicating the document control number, [OPP-300264]. All written comments filed in response to this petition will be available in the Public Response and Program Resources Branch, at the address given above from 8 a.m. to 4 p.m., Monday through Friday, except legal holidays.

The Office of Management and Budget has exempted this rule from the requirements of section 3 of Executive Order 12291.

Pursuant to the requirements of the Regulatory Flexibility Act (Pub. L. 96-354, 94 Stat. 1164, 5 U.S.C. 601-612), the Administrator has determined that regulations establishing new tolerances or raising tolerance levels or establishing exemptions from tolerance requirements do not have a significant economic on a substantial number of

small entities. A certification statement to this effect was published in the Federal Register of May 4, 1981 (46 FR 24950).

List of Subjects in 40 CFR Part 180

Administrative practice and procedure, Agricultural commodities, Pesticides and pests, Recording and recordkeeping requirements.

Dated: September 18, 1992.

Anne E. Lindsay,

Director, Registration Division, Office of Pesticide Programs.

Therefore, it is proposed that 40 CFR part 180 be amended as follows:

PART 180—[AMENDED]

1. The authority citation for part 180 continues to read as follows:

Authority: 21 U.S.C. 346a and 371.

2. Section 180.1001(c) is amended by adding and alphabetically inserting the inert ingredient, to read as follows:

§ 180.1001 Exemptions from the requirement of a tolerance.

* * * * *

(c)

Inert ingredients	Limits	Uses
Glyceryl behenate		Adjuvant, encapsulating agent

* * * * *

40 CFR Part 180

[PP 9E3768 and 0E3947/P551; FRL-4163-3]

Pesticide Tolerance for Oryzalin

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: This document proposes that tolerances be established for residues of the herbicide oryzalin in or on the raw agricultural commodities guava and papaya. The proposed regulation to establish maximum permissible levels for residues of the herbicide in or on the commodities was requested in petitions submitted by the Interregional Research Project No. 4 (IR-4).

DATES: Comments, identified by the document control number [PP 9E3768 and 0E3947/P551], must be received on or before October 30, 1992.

ADDRESSES: By mail, submit written comments to: Public Response and Program Resource Branch, Field Operations Division (H7506C), Office of Pesticide Programs, Environmental Protection Agency, 401 M St., SW., Washington, DC 20460. In person, bring comments to: Rm. 1128, CM #2, 1921 Jefferson Davis Hwy., Arlington, VA 22202. Information submitted as a comment concerning this document may be claimed confidential by marking any part or all of that information as "Confidential Business Information" (CBI). Information so marked will not be disclosed except in accordance with procedures set forth in 40 CFR part 2. A copy of the comment that does not contain CBI must be submitted for inclusion in the public record. Information not marked confidential may be disclosed publicly by EPA without prior notice. All written comments will be available for public inspection in Rm. 1128 at the address given above, from 8 a.m. to 4 p.m., Monday through Friday, excluding legal holidays.

FOR FURTHER INFORMATION CONTACT: By mail: Hoyt L. Jamerson, Emergency Response and Minor Use Section (H7505C), Registration Division, Environmental Protection Agency, 401 M St., SW., Washington, DC 20460. Office location and telephone number: Rm. 718C, CM #2, 1921 Jefferson Davis Hwy., Arlington, VA 22202, (703)-305-5310.

SUPPLEMENTARY INFORMATION: The Interregional Research Project No. 4 (IR-4), New Jersey Agricultural Experiment Station, P.O. Box 231, Rutgers University, New Brunswick, NJ 08903, has submitted pesticide petitions (PP) 9E3768 and 0E3947 to EPA on behalf of the Agricultural Experiment Station of Hawaii. These petitions requested that the Administrator, pursuant to section 408(e) of the Federal Food, Drug, and Cosmetic Act, 21 U.S.C. 386a(e), propose the establishment of tolerances for residues of the herbicide oryzalin (3,5-dinitro-N^4,N^4-dipropylsulfanilamide) in or on the raw agricultural commodities banana and guava (PP OE3947) and papaya (PP 9E3768) at 0.05 part per million (ppm). The petition proposing tolerances for banana and guava (PP 0E3947) was subsequently amended by IR-4 withdrawing, without prejudice to subsequent filing, the proposal for establishment of a tolerance for residues of oryzalin in or on banana.

The petitioner proposed that these uses of oryzalin be limited to Hawaii based on the geographical representation of the residue data submitted. Additional residue data will be required to expand the area of usage. Persons seeking geographically broader registration should contact the Agency's Registration Division at the address provided above.

The data submitted in the petitions and other relevant material have been evaluated. The toxicological data considered in support of the proposed tolerances include:

1. A 1-year feeding study in rats fed diets containing 300, 900, and 2,700 ppm with a no-observed-effect level (NOEL) of 300 ppm (equivalent to 15 milligrams (mg)/kilogram (kg)/day) based on decreased hematocrit, hemoglobin, and red blood cells.

2. A 1-year feeding study in mice fed diets containing 500, 1,350, and 3,650 ppm with a NOEL of 500 ppm (equivalent to 75 mg/kg/day) based on alterations in hematology and blood chemistry and relative organ weights.

3. A three-generation reproduction study in rats with dosage levels of 250, 750, and 2,250 ppm with a NOEL for reproductive effects greater than 2,250 ppm (equivalent to 112.5 mg/kg/day).

4. A developmental toxicity study in rabbits given gavage doses of 0, 25, 75, and 125 mg/kg/day with maternal and fetotoxic NOEL's of 25 mg/kg/day, and no developmental toxicity observed at any dosage level tested.

5. A developmental toxicity study in rats given gavage doses of 0, 25, 75, and 225 mg/kg/day with no maternal, fetotoxic, or developmental effects observed under the conditions of the study.

6. A battery of mutagenicity tests were all negative under the conditions of the tests and include: an unscheduled DNA synthesis in rat hepatocytes; two dominant lethal assays in rat; and an Ames test (with and without S9 activation) at up to 300 micrograms per plate. A chromatid exchange assay in

Chinese hamster bone marrow was negative orally, and positive when administered by the intraperitoneal route.

7. A 2-year carcinogenicity study in mice fed diets containing 500, 1,350, and 3,650 ppm with a systemic NOEL of 500 ppm (equivalent to 75 mg/kg/day) based on a reduction in uterus and ovary weights. There were no carcinogenic effects observed under the conditions of the study at any dosage level tested.

8. A 2-year feeding/carcinogenicity study in rats fed diets containing 0, 300, 900, and 2,700 ppm with a systemic NOEL of 300 ppm (equivalent to 15 mg/kg/day) based on reduced survival, inhibition of growth, elevated organ weights, increased leukocyte counts, and reduced red blood cell, hemoglobin, and hematocrit levels.

The rat chronic/feeding oncogenicity study demonstrated a dose-related increase in tumors of the thyroid gland, skin, and mammary gland at the 2,700 ppm level, which exceeded the maximum tolerated dose (MTD). Some of the tumors (skin and mammary gland) occurred at the 900-ppm level which did not exceed the MTD. There were also mammary gland tumors at the 300-ppm level. The Agency concluded that there is limited evidence of carcinogenicity for oryzalin in male and female rats. Oryzalin is classified as a Category C carcinogen (a possible human carcinogen). This classification is based on the fact that oryzalin did not produce tumors in more than one species or strain, did not produce tumors in multiple experiments, and did produce tumors to an unusual degree with regard to incidence, tumor site or type, or age of animal at onset.

A carcinogenicity risk assessment for oryzalin has been completed by the Agency based on the available information. The potential carcinogenic risk to the general population from dietary exposure resulting from existing uses of oryzalin is calculated at 8.14 X 10^{-7}. The dietary risk assessment is based on a potency estimator (Q^*) of 0.13 $(mg/kg/day)^{-1}$ and dietary exposure estimated at 0.000006 mg/kg/day based on the anticipated residue contribution (ARC) from several existing uses. Tolerance level residues, anticipated residues, and percent of crop treated information were used to calculate the ARC for existing uses. The proposed uses would increase potential carcinogenic risk, as calculated by the theoretical maximum residue contribution for the named commodities, by 4.2 X 10^{-8}. The estimated carcinogenic risk is calculated at 8.56 X 10^{-7} for existing uses and the proposed uses on guava and papaya.

The nature of the residue is adequately understood for purposes of the proposed tolerances. An adequate analytical method, gas chromatography with electron capture detector, is available for enforcement purposes. The analytical method for enforcing this tolerance has been published in the Pesticide Analytical Manual (PAM), Vol. II. No secondary residues are expected to occur in meat, milk, poultry, or eggs since guava and papaya are not considered livestock feed items.

There are currently no actions pending against the continued registration of this chemical.

EPA issued a proposed rule on oryzalin, amending 40 CFR 180.304 by designating the existing text as paragraph (a) and adding new paragraph (b) providing for regional registration for the commodities green coffee beans and papayas, published in the **Federal Register** of June 20, 1990 (55 FR 25141). This document proposing to revise 40 CFR 180.304 supersedes the proposed rule of June 20, 1990.

Based on the above information considered by the Agency the tolerances established by amending 40 CFR 180.304 would protect the public health. Therefore, it is proposed that the tolerances be established as set forth below.

Any person who has registered or submitted an application for registration of a pesticide, under the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) as amended, which contains any of the ingredients listed herein, may request within 30 days after publication of this document in the **Federal Register** that this rulemaking proposal be referred to an Advisory Committee in accordance with section 408(e) of the Federal Food, Drug, and Cosmetic Act.

Interested persons are invited to submit written comments on the proposed regulation. Comments must bear a notation indicating the document control number, [PP 9E3768 and 0E3947/P551]. All written comments filed in response to these petitions will be available in the Public Response and Program Resources Branch at the address given above from 8 a.m. to 4 p.m., Monday through Friday, except legal holidays.

The Office of Management and Budget has exempted this rule from the requirements of section 3 of Executive Order 12291.

Pursuant to the requirements of the Regulatory Flexibility Act (Pub. L. 96-354, 94 Stat. 1164, 5 U.S.C. 601-612), the Administrator has determined that regulations establishing new tolerances or raising tolerance levels or establishing exemptions from tolerance requirements do not have a significant economic impact on a substantial number of small entities. A certification statement to this effect was published in the **Federal Register** of May 4, 1981 (46 FR 24950).

List of Subjects in 40 CFR Part 180

Administrative practice and procedure, Agricultural commodities, Pesticides and pests, Reporting and recordkeeping requirements.

Dated: September 8, 1992.

Anne E. Lindsay,

Director, Registration Division, Office of Pesticide Programs.

Therefore, it is proposed that 40 CFR part 180 be amended as follows:

PART 180—[AMENDED]

1. The authority citation for part 180 continues to read as follows:

Authority: 21 U.S.C. 346a and 371.

2. By revising § 180.304, to read as follows:

§ 180.304 Oryzalin; tolerances for residues.

(a) Tolerances are established for the combined residues of the herbicide oryzalin (3,4-dinitro-N^4,N^4-dipropylsulfanilamide) in or on the following raw agricultural commodities:

Commodity	Parts per million
Almond, hulls	0.05
Avocados	0.05
Citrus fruits	0.05
Cottonseed	0.05
Figs	0.05
Grain, barley	0.05
Grain, wheat	0.05
Kiwifruits	0.05
Nuts	0.05
Olives	0.05
Peas (succulent)	0.05
Pistachios	0.05
Pome fruits	0.05
Pomegranates	0.05
Potatoes	0.05
Small fruits	0.05
Soybeans	0.1
Stone fruits	0.05

(b) Tolerances with regional registration, as defined in § 180.1(n), are established for residues of oryzalin (3,5-dinitro-N^4,N^4-dipropylsulfanilamide) in or on the following raw agricultural commodities:

Commodity	Parts per million
Guava	0.05
Papayas	0.05

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Part 73

[MM Docket No. 92-216, RM-8068]

Radio Broadcasting Services; Clearwater and Rozel, KS

AGENCY: Federal Communications Commission.

ACTION: Proposed rule.

SUMMARY: This document requests comments on a petition filed by Gary Violet proposing the substitution of Channel 254C2 for Channel 254A at Clearwater, Kansas, and modification of the construction permit for Channel 254A to specify operation on the higher class channel. The coordinates for Channel 254C2 at Rozel are 37-23-31 and 97-35-55. To accommodate the upgrade at Clearwater, we shall propose to substitute Channel 235C1 for vacant Channel 254C1 at Rozel, Kansas. The coordinates for Channel 235C1 are 38-13-42 and 99-28-27. There is a site restriction 7 kilometers (4.3 miles) northwest of the community. If no interest is expressed in retaining a channel in the community, we propose to delete Channel 254C1 at Rozel without replacement. We shall propose to modify the construction permit for Channel 254A, Clearwater, in accordance with § 1.420(g) of the Commission's Rules and will not accept competing expressions of interest for the use of the channel or require petitioner to demonstrate the availability of an additional equivalent class channel for use by such parties.

DATES: Comments must be filed on or before November 16, 1992, and reply comments on or before December 1, 1992.

ADDRESSES: Federal Communications Commission, Washington, DC 20554. In addition to filing comments with the FCC, interested parties should serve the petitioner's counsel, as follows: Donald E. Johnson, Blair Joyce & Silva, 1825 K Street, NW., Washington, DC 20006.

FOR FURTHER INFORMATION CONTACT: Kathleen Scheuerle, Mass Media Bureau, (202) 634-6530.

SUPPLEMENTARY INFORMATION: This is a summary of the Commission's Notice of Proposed Rule Making, MM Docket No. 92-216, adopted August 31, 1992, and released September 24, 1992. The full text of this Commission decision is available for inspection and copying during normal business hours in the FCC Dockets Branch (room 230), 1919 M Street, NW., Washington, DC. The complete text of this decision may also be purchased from the Commission's copy contractors, Downtown Copy Center, 1990 M Street, NW., suite 640, Washington, DC 20036, (202) 452-1422.

Provisions of the Regulatory Flexibility Act of 1980 do not apply to this proceeding.

Members of the public should note that from the time a Notice of Proposed Rule Making is issued until the matter is no longer subject to Commission consideration or court review, all *ex parte* contacts are prohibited in Commission proceedings, such as this one, which involve channel allotments. See 47 CFR 1.1204(b) for rules governing permissible *ex parte* contact.

For information regarding proper filing procedures for comments, see 47 CFR 1.415 and 1.420.

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

50 CFR Part 17

RIN 1018-AB83

Endangered and Threatened Wildlife and Plants; Proposed Endangered or Threatened Status for Seven Central Florida Plants

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Proposed rule.

SUMMARY: The Service proposes endangered status pursuant to the Endangered Species Act of 1973 as amended (Act) for the following five plants: *Cladonia perforata* (Florida perforate cladonia), *Crotalaria avonensis* (Avon Park harebells), *Nolina brittoniana* (Britton's beargrass), *Polygala lewtonii* (Lewton's polygala), and *Polygonella myriophylla* (sandlace). The Service proposes threatened status for two plants: *Clitoria fragrans* (pigeon wings) and *Eriogonum longifolium* var. *gnaphalifolium* (scrub buckwheat). All seven plants are found in Highlands and Polk Counties in central Florida; four of the species range farther to the north or east, into Hernando, Lake, Osceola, Orange, and Marion Counties. One plant (the lichen) occurs on a barrier island in Okaloosa County, in northwest Florida. Loss of habitat, mainly to citrus groves and residential development, is the primary threat to these species. This proposal, if made final, would extend the Act's protection and recovery provisions to these seven species. The Service seeks data and comments from the public on this proposal.

DATES: Comments from all interested parties must be received by November 30, 1992. Public hearing requests must be received by November 16, 1992.

ADDRESSES: Comments and materials concerning this proposal should be sent to the Field Supervisor, Jacksonville Field Office, U.S. Fish and Wildlife Service, 3100 University Boulevard South, suite 120, Jacksonville, Florida 32216. Comments and materials received will be available for public inspection, by appointment, during normal business hours at the above address.

FOR FURTHER INFORMATION CONTACT: Michael M. Bentzien, Assistant Field Supervisor, at the above address (telephone: 904-232-2580).

SUPPLEMENTARY INFORMATION:

Background

The seven plants proposed for listing inhabit dry upland vegetation (including scrub, high pine, or intermediate "turkey oak barrens") in central peninsular Florida; one, the lichen *Cladonia perforata*, also occurs in coastal scrub in northwestern Florida.

Scrub is "a xeromorphic shrub community dominated by a layer of evergreen, or nearly evergreen oaks * * * or Florida rosemary (*Ceratiola ericoides*), or both, with or without a pine overstory, occupying well drained, infertile, sandy soils" (Myers 1990, pp. 154-155). The usual pine species in scrub is sand pine (*Pinus clausa*). Scrub is the habitat of the Florida scrub jay (*Aphelocoma coerulescens coerulescens*), a federally threatened species. Scrub occurs on dune ridges along Florida's Gulf and Atlantic coasts and on older inland sand ridges. Endemic plant species (species with limited geographic distributions) occur in scrub in various parts of Florida, with the largest concentration of endemics on the southernmost high interior ridge, the Lake Wales Ridge, northwest of Lake

Okeechobee. Plants endemic to the Lake Wales Ridge are concentrated in scrub dominated by Florida rosemary on sites where the sand is apparently particularly devoid of nutrients; sites with slightly better nutrient status usually have dense stands of oaks, hickory, and sand pines (Myers 1990).

The scrub ecosystem is maintained by infrequent high intensity fires, with fires occurring as often as once a decade to less than once a century in sparsely-vegetated rosemary scrub (Myers 1990).

High pine (also called sandhills vegetation) is the other major type of natural vegetation on dry uplands in central Florida. It once was a very widespread forest type in the southeastern United States from Virginia to Texas (Myers 1990, citing several authors). High pine is longleaf pine forest with an open, grassy understory of wiregrass (*Aristida stricta*) and other grasses, numerous herbs, and deciduous turkey oaks (*Quercus laevis*) or bluejack oaks (*Q. incana*) that tolerate being burned to the ground. Frequent low-intensity fires maintained the grassy understory and prevented hardwoods from becoming canopy trees. In central Florida, high pine is intermingled with scrub; and "turkey oak barrens," intermediate between the two types of vegetation, exist in Polk and Highlands Counties (Christman 1988). Most of the "barrens" that are in evidence today may represent the results of logging of longleaf pine, followed by fire suppression, which allowed turkey oaks to reach tree size, and allowed evergreen oaks to invade, but Christman considers some of the barrens to be much older.

On central Florida's Lake Wales Ridge, the great majority of high pine was converted to citrus groves many years ago. Today, scrub is being converted to groves. Urban development is also destroying large areas of upland vegetation. Of approximately 546,800 acres of xeric upland vegetation originally in Highlands and Polk Counties, only approximately 15% remains intact (S. Friedman and J. Fitzpatrick 1992).

Because scrub and high pine in central Florida have many endemic (narrowly distributed) plant taxa (species, subspecies, and varieties) (Muller et al. 1989), the Service has responded by listing 13 plants from this region (50 FR 45616, Nov. 1, 1985; 52 FR 2227, Jan. 21, 1987; 52 FR 42068, Nov. 2, 1987). The Service has also listed scrub animals: two lizards (52 FR 42658, Nov. 6, 1987) and the Florida scrub jay (52 FR 20715, June 3, 1987). Other plant species are candidates for listing, including: *Schizachyrium niveum* (scrub bluestem), a species whose northern range limit is imperfectly known; it has been collected as far north as Alachua County, Florida; *Calamintha ashei* (Ashe's savory, a mint), has an unusual distribution, occurring in central Florida and southeast Georgia; and *Panicum abscissum* (cutthroat grass), which inhabits moist seeps near scrub and high pine.

Conservation measures that are underway to conserve the central Florida upland flora include:

(1) The State of Florida's Conservation and Recreation Lands program (CARL) is buying land in Highlands and Polk Counties. A completed acquisition, the Arbuckle State Forest and Park (13,700 acres), includes excellent examples of scrub vegetation. Acquisitions in progress in Polk County include Catfish Creek (1,100 acres acquired, 5,200 remaining) and Saddle Blanket Lakes (78 acres acquired, 800 remaining); and in Highlands County, Placid Lakes (negotiations underway). In these two counties, a massive Lake Wales Ecosystems proposal now under consideration incorporates most of the intact scrub and high pine in reasonably large tracts on the Lake Wales Ridge, totalling 32,000 acres (FL Dept. Natural Resources 1992).

(2) The Nature Conservancy has acquired preserves at Tiger Creek and Lake Apthorpe. This private organization has also purchased land at other locations, is assisting State and Federal land projects, and is working on fire management and other management issues for biological preserves.

(3) The Fish and Wildlife Service has proposed to create a Lake Wales Ridge National Wildlife Refuge, totalling about 10,000 acres, for endangered species that inhabit scrub vegetation. The 12 sites that might be acquired overlap with those in State projects. A large tract at Carter Creek (Sebring Highlands subdivision), Highlands County, is tentatively a high priority for acquisition, if funds become available.

Further information on conservation of these plants is provided below, under "Available Conservation Measures".

Discussion of the Seven Species Proposed for Listing

Cladonia perforata (Florida perforate cladonia) is a conspicuous lichen, "forming large dense clusters 20–60 mm [0.8–2.5 inches] tall" (Hilsenbeck and Muller 1991). *Cladonia* and similar lichens (family Cladoniaceae) are probably the most commonly collected lichens (Evans 1952). *Cladonia subtenuis* or *Cladonia evansii* are used as miniature shrubbery in architectural models and floral arrangements. The latter species is characteristic of scrub (T. Hendrickson, pers. comm., 1992).

The branches of *Cladonia* lichens differ from those of other branched (fruticose) lichens in that the *Cladonia* branches (podetia) are developmentally derived from spore-producing structures, rather than from the vegetative body (thallus) of the fungus that makes up the basic structure of a typical lichen. For *Cladonia perforata*, the vegetative body is not in evidence, and "the podetia, which grow in intricate tufts, are pale yellowish grey, and the surface appears more or less glossy. Individual podetia are mostly 40–60 mm. (1–1.5 inches) in height and their larger axes measure 3–6 mm. in diameter" (Evans 1952, p. 326). The podetia branch dichotomously (i.e., they fork), or they form whorls (splitting into three or more branches). "Wherever a branching takes place a circular opening is formed in the axil (just above the branch), and the larger of these openings measure 1–1.5 mm. (0.06 inches) in diameter" (Evans 1952). Toward the top of the plant, where the branches are smaller, the openings are smaller, too. The surfaces of the podetia are uniform. The podetial wall's interior surface, facing the central canal, consists of loosely woven hyphae (fungal strands). A very similar species (not in Florida according to Moore (1968) although reported from southwest Florida by Evans (1952)), *Cladonia uncialis*, has podetial surfaces with more or less distinct greenish areolae, rather than appearing uniform. *Cladonia uncialis* does not have a perforation in every axil, and its podetial walls have a solid layer of cartilaginous tissue on the interior (Evans 1952).

Cladonia leporina, which is common in Florida, is very similar to *Cladonia perforata* except that it has no holes in the podetia and the podetia have red tips consisting of spore-producing tissue (apothecia). *Cladonia perforata* has larger, more regularly branched podetia, with perforations. *Cladonia perforata* is illustrated in Hale (1983, p. 18) and in Buckley and Hendrickson (1988).

Cladonia perforata was first collected by George Llano in 1945 on Santa Rosa Island, and was named by Evans (1952). Llano and Evans both stated the site was in Escambia County, but Wilhelm and Burkhalter (1990) showed that the site was really in Okaloosa County and was paved over sometime between 1945 and the mid 1950's, when Llano revisited the area. The lichen was not collected again until Moore (1968) found it in Highlands County, central Florida, during her massive survey of Florida

and Lake Apthorpe. Scrub buckwheat is likely to be protected at Catfish Creek and several other tracts if State or Federal land acquisition occurs as planned.

Nolina brittoniana (scrub beargrass) was collected and described by G.V. Nash (1895). H.H. Bartlett (1909) reviewed the genus in the Southeast and described the only other species of *Nolina* in Florida, *Nolina atopocarpa*, a candidate for Federal listing that occurs in the panhandle and in the peninsula from St. Augustine south of Charlotte County. The genus *Nolina* belongs to the family Agavaceae (agave family), which includes century plants and yuccas. The genus is centered in southwestern North America (Mabberley 1987). The Agavaceae are often included in the Liliaceae (lily family), in the broad sense.

Nolina brittoniana is a perennial growing from a short, thick, fleshy, bulblike rootstock. The leaves are 1–2 meters long (3–6 feet) and 6–13 mm (0.2–0.5 inch) wide, forming a rosette with the youngest leaves upright and the oldest lying nearly flat on the ground. The flowering stem, usually solitary, grows at least 2 meters (6 feet) high from the rosette in April. The inflorescence is a panicle with about 6 branches; when in bloom, the branches are covered with small, white six-parted flowers, making the plant very conspicuous (Kral 1983, Wunderlin et al. 1980b). Individual plants appear to usually have all male or female flowers. The plants bear abundant seed, which is easily germinated, and the plant is not difficult to propagate (S. Wallace, Bok Tower Gardens, pers. comm., 1990). In nature, this species occurs as scattered specimens, and rarely if ever forms large colonies. *Nolina atopocarpa*, a species of dry flatwoods, may occur in the vicinity of *Nolina brittoniana;* this species has shorter leaves, greenish flowers, and asymmetric fruits (*N. brittoniana* has symmetrical fruits, triangular in cross section).

Nolina brittoniana occurs in scrub, high pine, and even occasionally in hammocks (Christman 1988). Its range is from the south end of the Lake Wales Ridge in Highlands County north to Orange County (Orlando) and northern Lake County. An apparently isolated locality was reported from Hernando County, north of Tampa.

On the Lake Wales Ridge, *Nolina brittoniana* occurs in both Highlands and Polk Counties, where it occurs in most of the tracts that are targeted for acquisition by the State or by the Fish and Wildlife Service. Northeast of Polk County, *Nolina brittoniana* occurred in the northwest corner of Osceola County and western Orange County (where it was collected in 1958). The plant probably still exists in Orange County, but remaining habitat is being destroyed very rapidly. In Lake County, *Nolina brittoniana* occurs in remnants of high pine on hills west of Lake Apopka, near Clermont. Also in Lake County, the type specimens of *Nolina brittoniana* were collected near Eustis in 1894, and the plant was collected near Tavares in 1941. Robert McCartney (pers. comm., 1990), a knowledgeable field worker, considers the northern range limit for *Nolina brittoniana* to be northern Lake County; however, to the north, a specimen was collected on "low ground" near Belleview, Marion County in 1928. Christman (1988) doubts this locality, but suitable habitat does exist in the vicinity. The plant was collected in a "much disturbed, old white sand scrub with hardwood intrusion" north of Tampa in Hernando County, in 1961. Larger scrubs in the same area have probably not been searched for rare plants.

Polygala lewtonii (Lewton's polygala) is a member of the Polygalaceae (milkwort family). It was first collected near Frostproof, Florida by F.L. Lewton in 1894, and was named by Small (1898). Further information on plants named by Small is provided in Austin 1987. The status of *Polygala lewtonii* as a distinct species was affirmed by Blake (1924) and James (1957). The genus has since been reviewed by Miller (1970) and Saulmon (1971).

Polygala lewtonii is a perennial with a taproot. Each plant produces one to several annual stems, which are spreading, upward-curving, or erect, and are often branched. The leaves are small, sessile, rather succulent, broader toward the tip, and are borne upright, tending to overlap along the stem, like shingles. The normally opening flowers are in erect, loosely flowered racemes up to 1.5 cm (0.6 inch) long. They are about 0.5 cm long and bright pink (Wunderlin et al. 1981) or "attractive purplish-red (Ward and Godfrey 1979). Each flower is about 3.5 mm (0.14 inch) long. Two of the five sepals are enlarged and wing-like, between which the largest of the three petals forms a keel that ends in a tuft of finger-like projections (Ward and Godfrey 1979). This species is closely related to *Polygala polygama*, a widespread species that tends to form larger clumps and has a longer root, narrower leaves, and differently shaped wing sepals. *Polygala polygama* has short branches that hug the ground, bearing inconspicuous self-pollinating (cleistogamous) flowers. *Polygala lewtonii* is inferred to have similar cleistogamous flowers (James 1957 cited in Ward and Godfrey 1979), but Wunderlin et al. (1981) are not clear that they have been observed.

Polygala lewtonii occurs most frequently in habitats intermediate between high pine and scrub (turkey oak barrens), as well as in both habitats (Christman 1988, Wunderlin et al. 1981). It has been collected in Highlands, Polk, Osceola, Lake, and Marion Counties. In Highlands County, it was collected at two sites near Sebring in 1945 and 1955, but was not seen again (Wunderlin et al. 1981) until recently, when it was found in turkey oak barrens northeast of Sebring (J. Fitzpatrick, Archbold Biological Station, pers. comm., 1992).

In Polk County, *Polygala lewtonii* is currently known to occur in Arbuckle State Forest and Park, the State's Catfish Creek land acquisition project (G. Babb, The Nature Conservancy, *in litt.*, 1991), The Nature Conservancy's Tiger Creek Preserve (Wunderlin et al. 1981), at a site near Davenport that was partly bulldozed in 1991, and in the Poinciana residential development (N. Bissett, *in litt.*, 1991). It also occurs at a site with the endangered Florida ziziphus (*Ziziphus celata*) (DeLaney et al. 1989).

In Osceola County, *Polygala lewtonii* was collected in 1974 at the northwest corner of the county, on a dry prairie above Lake Davenport. In Lake County, the plant has been collected in scrub four miles north of Astatula and from at least five sites in the hills between Lake Apopka and Clermont. These hills were once covered with high pine that had a significant number of scrub plant species, including the endangered *Prunus geniculata* (scrub plum), *Nolina brittoniana* (Wunderlin et al. 1981), and *Warea amplexifolia* (wide-leaf mustard) (Judd 1980). *Polygala lewtonii* was collected once near Eustis (James 1957, cited in Wunderlin et al. 1981). The plant was collected from Ocala National Forest (Marion County) in firebreaks near Juniper Springs, 1949, and apparently not again until 1991, when it was found in scrub (C. Greenberg, Univ. of FL, pers. comm., 1992).

Polygonella myriophylla, a member of the Polygonaceae (jointweed family), was first collected by J.K. Small and DeWinkler on a scrub ridge south of Frostproof, Polk County, Florida. Small (1924) described it as a new species, *Dentoceras myriophylla*. Horton (1963) combined two of Small's genera with the genus *Polygonella*, making this species *Polygonella myriophylla*. The common name of sandlace comes from Christman (1988); other possibilities are Small's jointweed (Florida Natural

Areas Inventory) or woody wireweed (Wunderlin 1982).

Polygonella myriophylla is a sprawling shrub that, as G.L. Webster noted on a herbarium specimen, has the habit of the popular landscaping plant creeping juniper, *Juniperus horizontalis* (cited in Wunderlin et al. 1980c). The shrub's many branches zigzag along the ground and root at the nodes, forming low mats. The lower parts of the creeping branches have reddish-brown bark that cracks and partly separates in long, flat, interlacing strips. The short lateral branches are upright, leafy, and end in flowering racemes. *Polygonella myriophylla* has the distinctive sheathing stipules (ocreae and ocreolae) typical of the jointweed family. The leaves are needle-like, fleshy, 3–10 mm (0.1–0.4 inch) long. The small flowers have white (or pink or yellow) petal-like sepals up to 3–4 mm (0.1 inch) long. Because this shrub's appearance is so unique, information on its distribution and abundance is particularly complete and accurate.

Polygonella myriophylla is curiously absent from the southern tip of the Lake Wales Ridge. Its range extends from Archbold Biological Station northward along the Lake Wales Ridge to the Davenport-Poinciana area in northern Polk County. Further northeast, it occurs at one site in Osceola County and three in western Orange County where it occurs with the endangered scrub lupine *Lupinus aridorum* (Wunderlin 1984). The Orange County sites are at Vineland, a rapidly developing portion of the Orlando metropolitan area. A report of *Polygonella myriophylla* from Lake County was based on a misidentification (Wunderlin et al. 1980c, Christman 1988). Kral's (1983) distribution map places this plant in DeSoto County, based on a specimen collected by J.K. Small and J.B. DeWinkler in 1919, before Highlands County was created in 1921 (specimen cited in Wunderlin et al. 1980c).

Polygonella myriophylla occurs within scrubs that cover about 25,000 acres (Christman 1988). It is currently protected at Archbold Biological Station (where it is rare), Saddle Blanket Lakes and Catfish Creek (State acquisition projects), and Lake Apthorpe (The Nature Conservancy). It is abundant in several tracts that are proposed for acquisition by the State or the Service.

Previous Federal Action

Federal government actions on four of the seven plants began as a result of section 12 of the Endangered Species Act of 1973, which directed the Secretary of the Smithsonian Institution to prepare a report on plants considered to be endangered, threatened, or extinct. This report, designated as House Document No. 94–51, was presented to the Congress on January 9, 1975. On July 1, 1975, the Service published a notice in the **Federal Register** (40 FR 27823) of its acceptance of the report as a petition in the context of section 4(c)(2) (now section 4(b)(3)) of the Act, as amended, and of its intention to review the status of the plant taxa contained within. *Nolina brittoniana, Polygala lewtonii,* and *Polygonella myriophylla* were included in these documents as endangered species, and *Clitoria fragrans* as a threatened species.

On June 16, 1976, the Service published a proposal in the **Federal Register** (42 FR 24523) to determine approximately 1,700 vascular plant species to be endangered species pursuant to section 4 of the Act. This proposal included *Nolina brittoniana, Polygala lewtonii,* and *Polygonella myriophylla.* General comments on the 1976 proposal were summarized in an April 26, 1978, **Federal Register** publication (43 FR 17909). The Endangered Species Act Amendments of 1978 required that all proposals over 2 years old be withdrawn. A 1-year grace period was given to those proposals already more than 2 years old. In the December 10, 1979, **Federal Register** (44 FR 70796), the Service published a notice of withdrawal of the June 6, 1976 proposal.

On December 15, 1980, the Service published a notice of review for plants (45 FR 82480). This notice included *Clitoria fragrans, Eriogonum longifolium* var. *gnaphalifolium* (under the name *Eriogonum floridanum*), and *Polygala lewtonii* as category 1 candidates, and *Nolina brittoniana* and *Polygonella myriophylla* as category 2 candidates. Category 1 candidates are those for which the Service currently has on file substantial information on biological vulnerability and threats to support preparation of listing proposals, while category 2 candidates are those for which data in the Service's possession indicate listing is possibly appropriate, but for which substantial data on biological vulnerability and threats are not currently known or on file to support proposed rules. On November 28, 1983, the Services published in the **Federal Register** a supplement to the Notice of Review (48 FR 53640); the notice changed *Erigonum longifolium* var. *gnaphalifolium* to a category 2 species. Another updated notice of review published September 27, 1985 (50 FR 39526) changed *Polygonella myriophylla* to a category 3C species (no longer a candidate for Federal listing), based on a status survey that gave the impression that the plant was secure because it is locally abundant. Christman (*in litt.* 1987, 1988) pointed out that this was a mistake: *Polygonella myriophylla* is "much rarer, and more endangered, than several federally-listed scrub species, including *Paronychia chartacea, Chionanthus pygmaeus, Polygonella basiramia,* and *Prunus geniculata,* for example."

On February 21, 1990 (55 FR 6184), the plant notice was again revised, assigning category 1 candidate status to all five plants that had previously been candidates, based on an abundance of new survey information. The 1990 notice assigned category 2 status to *Crotalaria avonensis* and to *Cladonia perforata.* Since then, a status survey on *Cladonia perforata* has been completed and further information on *Crotalaria avonensis* has been received from Mr. Kris DeLaney, qualifying these species for category 1 status.

Based on the Service's system for ranking candidate species for listing, which has a range of 1 to 12, the listing priority number for each of the five endangered species in this proposal is 2. *Clitoria fragrans* and *Eriogonum longifolium* var. *gnaphalifolium,* the two threatened species, have been assigned a listing priority number of 8 and 9, respectively. A complete explanation of the Service's listing and recovery priority guidelines was published in the **Federal Register** of September 21, 1983 (48 FR 43098).

Petitions

The Service was petitioned to list the lichen *Cladonia perforata* by Ms. Ann Buckley in a letter received June 5, 1989. The Service found the action requested by the petition to be warranted, but precluded by work on other species having higher priority for listing (55 FR 31610, August 3, 1990). An administrative finding of "warranted but precluded" was repeated in October 1991, as discussed below, in connection with the Service's annual review of recycled petitions.

Section 4(b)(3)(B) of the Act, as amended in 1982, requires the Secretary to make findings on certain pending petitions within 12 months of their receipt. Section 2(b)(1) of the 1982 Amendments further requires that all petitions pending on October 13, 1982, be treated as having been newly submitted on that date. This was the case for *Clitoria fragrans, Nolina brittoniana, Polygala lewtonii,* and *Polygonella myriophylla* because the Service had accepted the 1975 Smithsonian report as a petition. In each October from 1983 through 1991, the

Service found that the petitioned listing of these species was warranted but precluded by other listing actions of a higher priority, and that additional data on vulnerability and threats were still being gathered. Publication of this proposal constitutes the final petition finding for these five species.

The Service has not received petitions to list *Eriogonum longifolium* var. *gnaphalifolium* or *Crotalaria avonensis*, although Mr. Kris DeLaney informally urged that the latter species be listed.

Summary of Factors Affecting the Species

Section 4(a)(1) of the Endangered Species Act (16 U.S.C. 1531 *et seq.*) and regulations (50 CFR part 424) promulgated to implement the listing provisions of the Act set forth the procedures for adding species to the Federal lists. A species may be determined to be an endangered or threatened species due to one or more of the five factors described in section 4(a)(1). These factors and their application to *Cladonia perforata* A.W. Evans (Florida perforate cladonia), *Clitoria fragrans* Small (pigeon wings), *Crotalaria avonensis* DeLaney & Wunderlin (Avon Park harebells), *Eriogonum longifolium* Nuttall var. *gnaphalifolium* Gandoger (*Eriogonum floridanum* Small) (scrub buckwheat), *Nolina brittoniana* Nash (Britton's beargrass), *Polygala lewtonii* Small (Lewton's polygala), and *Polygonella myriophylla* (Small) Horton (sandlace) are as follows:

A. *The Present or Threatened Destruction, Modification, or Curtailment of Its Habitat or Range*

All seven plants have already suffered serious loss of habitat to agriculture (citrus groves and pastures) and residential development, and all are threatened by future development. The Lake Wales Ridge in Polk and Highlands Counties originally had 250,000 acres of xeric upland vegetation (scrub and high pine), of which 27,500 acres remain. Because the plant species endemic to scrub or high pine in central Florida had much narrower local distributions within the Ridge (each species is likely to be found in only a fraction of seemingly suitable habitat), the loss of habitat for particular species has often been more severe than the overall figures indicate.

Citrus groves are being expanded rapidly on the southern Lake Wales Ridge because the area escaped the worst effects of severe freezes during the 1980's, especially December 1989. Development of a citrus grove recently caused the destruction of one population of *Cladonia perforata*, and other significant recent losses of scrub habitat have been documented from aerial photography by workers at Archbold Biological Station. Property taxation in most Florida counties favors agricultural land use and penalizes leaving land "idle" in native vegetation. These policies may change; Polk County already has "preservation" zoning to protect natural vegetation.

The population of the Lake Wales Ridge is increasing as retirees and other immigrants to Florida, as well as retirees from within Florida, are attracted to areas with low costs of living and the perception of few urban problems. Despite the current recession, immigration into central Florida will continue. This threatens the seven plants because most of them (*Cladonia perforata* and *Polygala lewtonii* appear to be exceptions) occur in subdivisions with unimproved lots without streets or utilities. The lack of streets discouraged building; the divided ownerships of these subdivisions and the high prices for which lots were originally sold discouraged the conversion of these subdivisions to citrus. As a result, these subdivisions have unintentionally protected the native vegetation, and several may be acquired as biological preserves, despite the difficulty of purchasing land on a lot-by-lot basis. There may be little time available to begin land acquisition at the largest subdivision under consideration for acquisition, Sebring Highlands (Carter Creek), where assessments collected from landowners have built up to a large enough sum to pave the main road through the subdivision. An electric line has already been built, so with the road paved, widespread construction of houses can be anticipated.

Funding for State or Federal land acquisition to conserve central Florida plants is not yet assured. Existing land acquisition plans by the Service focus on purchasing and managing scrub rather than high pine; this leaves *Eriogonum longifolium* var. *gnaphalifolium* and *Polygala lewtonii* unprotected. The State intends to purchase high pine, but funding for land management could be limited.

The largest populations of the lichen *Cladonia perforata* are on private land; the principal landowner intends to protect the lichen, but it is necessary to be cautious about the long-term conservation of this area.

In the counties north of Highlands and Polk, the pressures of residential development are generally severe, and historic populations of plants in the Orlando (Orange County), and Eustis and Clermont (Lake County) areas are known to have disappeared.

Clitoria fragrans occurs on Avon Park Air Force Range and has been collected on a low ridge with scrub in southern Osceola County, in a region of large ranches. The plant's habitat is appropriately managed on the Air Force Range, and conversations with range conservationists with the Soil Conservation Service indicate that scrub is quite likely to remain intact on ranches. Similarly, *Eriogonum longifolium* var. *gnaphalifolium* and *Polygala lewtonii* are probably secure in Ocala National Forest, although evaluation is needed of the distribution and management of these two species in the Forest. Because these species are relatively secure in parts of their ranges, relatively secure habitats are a major reason for proposing to list these two species as threatened rather than endangered species.

B. *Overutilization for Commercial, Recreational, Scientific, or Educational Purposes*

There is little commercial trade in these seven plants, although *Nolina brittoniana* and *Polygonella myriophylla* are propagated and sold on a limited scale (Association of Florida Native Nurseries 1989). Commercial trade in these species should not adversely affect them, provided that nursery operators abide by State law and the Florida Native Plant Society's policy on transplanting native plants from the wild.

C. *Disease or Predation*

Not applicable.

D. *The Inadequacy of Existing Regulatory Mechanisms*

Nolina brittoniana and *Polygala lewtonii* are listed as endangered species, and *Clitoria fragrans* and *Eriogonum longifolium* var. *gnaphalifolium* are listed as threatened species under the Preservation of Native Flora of Florida law (section 581.185–187, Florida Statutes), which regulates taking, transport, and sale of plants but does not provide habitat protection. The Endangered Species Act will provide additional protection through the consultation requirements of section 7, recovery planning, and the prohibitions of section 9, which include the Act's additional penalties for taking of plants in violation of Florida law. The Florida law provides for automatic addition of Federally listed plants to the State's list as endangered species.

Efforts by the Service to protect the threatened Florida scrub jay may benefit other plants and animals of the scrub. The scrub jay inhabits much of the scrub vegetation on the Lake Wales Ridge. The Endangered Species Act's prohibition against taking of listed

animals (section 9(a)(1)(B)) means that landowners seeking to destroy scrub habitat upon which scrub jays depend run the risk of a "taking" violation unless they obtain a section 10(a)(2) permit, which the Service can issue only if the landowner submits or participates in an acceptable conservation plan for the scrub jay.

As explained in the background section, 13 plant species from central Florida scrub and high pine habitat are already federally listed and recovery plans have been prepared (Fish and Wildlife Service 1987a, 1990). A proposal to list a fourteenth species, *Conradina brevifolia*, as endangered was published in the **Federal Register** on May 5, 1992. Efforts already underway to conserve the 13 listed plants should benefit *Conradina brevifolia* and most of the species in the current proposal.

E. *Other Natural or Manmade Factors Affecting its Continued Existence*

Fire occurs in scrub vegetation at irregular intervals. For all of the plants proposed for listing other than the lichen *Cladonia perforata*, fire is probably beneficial. For the lichen, however, fire seems to be entirely destructive. The largest populations of the lichen are in the largest existing rosemary balds, which seem to have been affected by fires at extremely long intervals; the area "supports an uneven-aged stand of sand pines, with the oldest trees approaching 100 years" (Myers 1990). At the neighboring Archbold Biological Station, *Cladonia perforata* probably benefitted from many years of fire suppression, which also left the Station grounds susceptible to wildfire. Today, the Station is implementing a prescribed fire program that probably offers the best long-term chance to maintain rosemary balds with *Cladonia* lichens, but there is a real possibility that lichen populations may be harmed by fires.

Human activities, including off road vehicle use, trash dumping, and inadvertent trampling during outdoor recreation activities, threaten most of these plants. The lichen *Cladonia perforata* appears to be vulnerable to public use on Eglin Air Force Base, Santa Rosa Island.

Hurricane storm surges may wash over the lichen populations on Santa Rosa Island.

The limited geographic distribution of each of the seven species, the fragmentation of remaining habitat into small segments isolated from each other, and the small sizes of populations of some species, especially *Cladonia perforata* and *Polygala lewtonii*, exacerbate the threats faced by these species.

The Service has carefully assessed the best scientific and commercial information available regarding the past, present, and future threats faced by these species in determining to propose the rule. Based on this evaluation, the preferred action is to list *Crotalaria avonensis*, *Nolina brittoniana*, *Polygala lewtonii*, and *Polygonella myriophylla* as endangered species, and *Clitoria fragrans* and *Eriogonum longifolium* var. *gnaphalifolium* as threatened. Each of the species proposed for listing as endangered is likely to become extinct in a significant portion of its range within the foreseeable future, meeting the Act's requirements for listing as an endangered species. The two species proposed for listing as threatened are likely to become endangered species if effective conservation measures are not taken, meeting the Act's definition of threatened species.

Critical Habitat

Section 4(a)(3) of the Act, as amended, requires that, to the maximum extent prudent and determinable, the Secretary propose critical habitat at the time the species is proposed to be endangered or threatened. The Service finds that designation of critical habitat is not prudent for these species. Except for the relatively few protected sites with one or more of these species, the populations of these species are on unprotected private land where they would gain no added protection from designation of critical habitat, and where such a designation might motivate landowners to extirpate the plants. Designation of critical habitat might also attract persons wishing to collect plants for horticultural purposes, with or without the written permission of the landowner that is required by Florida law. For these reasons, it would not now be prudent to determine critical habitat for the seven plant species. The State and The Nature Conservancy are working to acquire lands to conserve these plants. Many private owners of scrub habitat occupied by the threatened Florida scrub jay have been, or will be, contacted by the Service as part of its efforts to prevent taking of the bird without permit (including destruction of nests or of occupied habitat). As a result, these landowners are aware of the importance of scrub habitat, if not of individual plant species. Protection of the plant species will be addressed through the recovery process and through the section 7 consultation process. For these reasons, the Service considers designation of critical habitat not to be prudent.

Available Conservation Measures

Conservation measures provided to species listed as endangered or threatened under the Endangered Species Act include recognition, recovery actions, requirements for Federal protection, and prohibitions against certain practices. Recognition through listing encourages and results in conservation actions by Federal, State, and private agencies, groups, and individuals. The Endangered Species Act provides for possible land acquisition and cooperation with the States and requires that recovery actions be carried out for all listed species. The protection required of Federal agencies and the prohibitions against certain activities involving listed plants are discussed, in part, below.

Section 7(a) of the Act, as amended, requires Federal agencies to evaluate their actions with respect to any species that is proposed or listed as endangered or threatened and with respect to its critical habitat, if any is being designated. Regulations implementing this interagency cooperation provision of the Act are codified at 50 CFR part 402. Section 7(a)(4) requires Federal agencies to confer informally with the Service on any action that is likely to jeopardize the continued existence of a proposed species or result in destruction or adverse modification of proposed critical habitat. If a species is listed subsequently, section 7(a)(2) requires Federal agencies to ensure that activities they authorize, fund, or carry out are not likely to jeopardize the continued existence of such a species or to destroy or adversely modify its critical habitat. If a Federal action may affect a listed species or its critical habitat, the responsible Federal agency must enter into formal consultation with the Service.

Conservation of *Eriogonum longifolium* may require ensuring that use of herbicides in forestry or road right-of-way maintenance does not jeopardize this plant. It is not clear whether restrictions on herbicide use would be necessary to protect *Clitoria fragrans*, which occurs on grazing lands. The other species appear not to occur in situations where herbicide restrictions would be warranted. Implementation of any such restrictions would involve the Environmental Protection Agency.

Cladonia perforata occurs on a Gulf barrier island that is part of Eglin AFB; *Clitoria fragrans* occurs on Avon Park Air Force Range, and *Eriogonum longifolium* var. *gnaphalifolium* occurs in the Ocala National Forest. The Service is currently aware of no ongoing

or pending Federal actions (except for possible EPA involvement noted above) either on these lands or elsewhere that would affect these plants.

The Act and its implementing regulations found at 50 CFR 17.61, 17.62, and 17.63 for endangered species, and 17.71 and 17.72 for threatened species, set forth a series of general prohibitions and exceptions that apply to all listed plants. All trade prohibitions of section 9(a)(2) of the Act, implemented by 50 CFR 17.61 and 17.71, apply. These prohibitions, in part, make it illegal for any person subject to the jurisdiction of the United States to import or export, transport in interstate or foreign commerce in the course of a commercial activity, sell or offer for sale these species in interstate or foreign commerce, or to remove and reduce to possession these species from areas under Federal jurisdiction. Seeds from cultivated specimens of threatened plant species are exempt from these prohibitions provided that a statement of "cultivated origin" appears on their containers. In addition, for endangered plants, the 1988 amendments (Pub. L. 100–478) to the Act prohibit the malicious damage or destruction on Federal lands and the removal, cutting, digging up, or damaging or destroying of endangered plants in knowing violation of any State law or regulation, including State criminal trespass law. Section 4(d) of the Act allows for the provision of such protection to threatened species through regulations. This protection may apply to threatened plants once revised regulations are promulgated. Certain exceptions apply to agents of the Service and State conservation agencies. The Act and 50 CFR 17.62, 17.63, and 17.72 also provide for the issuance of permits to carry out otherwise prohibited activities involving endangered and threatened species under certain circumstances.

It is anticipated that few trade permits will be sought or issued because the seven plant species are of limited horticultural interest, and only two (*Nolina brittoniana* and *Polygonella myriophylla*) may be in commerce across state lines. Requests for copies of the regulations on listed plants and inquiries regarding prohibitions and permits may be addressed to the Office of Management Authority, U.S. Fish and Wildlife Service, 4401 N. Fairfax Drive, room 432, Arlington Virginia 22203 (703/358–2104).

Public Comments Solicited

The Service intends that any final rule resulting from this proposal will be as accurate and as effective as possible. Therefore, comments or suggestions from the public, other concerned governmental agencies, the scientific community, industry, or any other interested party concerning this proposed rule are hereby solicited. Comments particularly are sought concerning:

(1) Biological, commercial trade, or other relevant data concerning any threat (or lack thereof) to these species;

(2) The location of any additional populations of these species and the reasons why any habitat should or should not be determined to be critical habitat as provided by Section 4 of the Act;

(3) Additional information concerning the ranges, distributions, and population sizes of these species; and

(4) Current or planned activities in the subject area and their possible impacts on these species.

Final promulgation of the regulation on these species will take into consideration the comments and any additional information received by the Service, and such communications may lead to a final regulation that differs from this proposal.

The Endangered Species Act provides for a public hearing on this proposal, if requested. Requests must be received within 45 days of the date of publication of the proposal. Such requests must be made in writing and addressed to the Jacksonville, Florida, Field Office (see **ADDRESSES** section).

National Environmental Policy Act

The Fish and Wildlife Service has determined that an Environmental Assessment, as defined under the authority of the National Environmental Policy Act of 1969, need not be prepared in connection with regulations adopted pursuant to section 4(a) of the Endangered Species Act of 1973, as amended. A notice outlining the Service's reasons for this determination was published in **Federal Register** on October 25, 1983 (48 FR 49244).

References

A complete list of all references cited herein, as well as others, is available upon request from the Service's Jacksonville Field Office (see **ADDRESSES** section).

Author

The primary author of this proposed rule is Mr. David Martin (see **ADDRESSES** section).

Endangered and threatened species, Exports, Imports, Reporting and recordkeeping requirements, and Transportation.

Proposed Regulations Promulgation

Accordingly, it is hereby proposed to amend part 17, subchapter B of chapter I, title 50 of the Code of Federal Regulations, as set forth below:

PART 17—[AMENDED]

1. The Authority citation for part 17 continues to read as follows:

Authority: 16 U.S.C. 1361–1407; 16 U.S.C. 1531–1544; 16 U.S.C. 4201–4245; Pub. L. 99–625, 100 Stat. 3500; unless otherwise noted.

2. It is proposed to amend § 17.12(h) by adding the following, in alphabetical order, to the List of Endangered and Threatened Plants:

§ 17.12 Endangered and threatened plants.

* * * * *

(h) * * *

Species		Histroic range	Status	When listed	Critical habitat	Special rules
Scientific name	Common name					
Agavaceae—Agave family:						
Nolina brittoniana	Britton's beargrass	U.S.A. (FL)	E	NA	NA	
Cladoniaceae—Reindeer moss family:						
Cladonia perforata	Florida perforate cladonia	U.S.A. (FL)	E	NA	NA	
Fabaceae—Pea family:						

Species		Histroic range	Status	When listed	Critical habitat	Special rules
Scientific name	Common name					
Clitoria fragrans	Pigeon wings	U.S.A. (FL)	T	NA	NA	
Crotalaria avonensis	Avon Park harebells	U.S.A. (FL)	E	NA	NA	
Polygalaceae—Milkwort family:						
Polygala lewtonii	Lewton's polygala	U.S.A. (FL)	E	NA	NA	
Polygonaceae—Buckwheat family:						
Eriogonum longifolium var. *gnaphalifolium (=Eriogonum floridanum).*	Scrub buckwheat	U.S.A. (FL)	T	NA	NA	
Polygonella myriophylla	Sandlace	U.S.A. (FL)	E	NA	NA	

Dated: August 31, 1992.

Richard N. Smith,

Acting Director, Fish and Wildlife Service.

Vol. 57, No. 190
Wednesday, September 30, 1992

This section of the FEDERAL REGISTER contains documents other than rules or proposed rules that are applicable to the public. Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

DEPARTMENT OF AGRICULTURE

Animal and Plant Health Inspection Service

[Docket No. 92-149-1]

Receipt of Permit Applications for Release Into the Environment of Genetically Engineered Organisms

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Notice.

SUMMARY: We are advising the public that four applications for permits to release genetically engineered organisms into the environment are being reviewed by the Animal and Plant Health Inspection Service. The applications have been submitted in accordance with 7 CFR part 340, which regulates the introduction of certain genetically engineered organisms and products.

ADDRESSES: Copies of the applications referenced in this notice, with any confidential business information deleted, are available for public inspection in room 1141, South Building, U.S. Department of Agriculture, 14th Street and Independence Avenue SW., Washington, DC, between 8 a.m. and 4:30 p.m., Monday through Friday, except holidays. You may obtain copies of the documents by writing to the person listed under **FOR FURTHER INFORMATION CONTACT.**

FOR FURTHER INFORMATION CONTACT: Dr. Arnold Foudin, Deputy Director, Biotechnology Permits, Biotechnology, Biologics, and Environmental Protection, APHIS, USDA, room 850, Federal Building, 6505 Belcrest Road, Hyattsville, MD 20782, (301) 436-7612.

SUPPLEMENTARY INFORMATION: The regulations in 7 CFR part 340, "Introduction of Organisms and Products Altered or Produced Through Genetic Engineering Which are Plant Pests or Which There is Reason to Believe Are Plant Pests," require a person to obtain a permit before introducing (importing, moving interstate, or releasing into the environment) into the United States certain genetically engineered organisms and products that are considered "regulated articles." The regulations set forth procedures for obtaining a permit for the release into the environment of a regulated article, and for obtaining a limited permit for the importation or interstate movement of a regulated article.

Pursuant to these regulations, the Animal and Plant Health Inspection Service has received and is reviewing the following applications for permits to release genetically engineered organisms into the environment:

Application	Applicant	Date received	Organisms	Field test location
92-244-02 renewal of permit 92-066-01, issued on 06-04-92.	Holden's Foundation Seeds, Incorporated.	08-31-92	Corn plants genetically engineered to express a phosphinothricin acetyl transferase (PAT) gene for tolerance to the herbicide glufosinate.	Hawaii.
92-244-03 renewal of permit 92-105-02, issued on 06-18-92.	Holden's Foundation Seeds, Incorporated.	08-31-92	Corn plants genetically engineered to express male sterility linked with kanamycin or phosphinothricin tolerance as markers.	Hawaii.
92-245-01	AgriPro Seeds	09-01-92	Soybean plants genetically engineered to express the enzyme 5-enol-pyruvyl shikimate-3-phosphate synthase (EPSPS) and a metabolizing enzyme for tolerance to the herbicide glyphosate.	Puerto Rico.
92-245-02 renewal of permit 92-080-05, issued on 05-22-92.	Cargill Hybrid Seeds	09-01-92	Corn plants genetically engineered to express male sterility linked with kanamycin or phosphinothricin tolerance as markers.	Hawaii.

Done in Washington, DC, this 25th day of September 1992.

Robert Melland,

Administrator, Animal and Plant Health Inspection Service.

[FR Doc. 92-23697 Filed 9-29-92; 8:45 am]

BILLING CODE 3410-34-M

[Docket 92-150-1]

Availability of Environmental Assessments and Findings of No Significant Impact Relative to Issuance of Permits to Field Test Genetically Engineered Organisms

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Notice.

SUMMARY: We are advising the public that four environmental assessments and findings of no significant impact, have been prepared by the Animal and Plant Health Inspection Service relative to the issuance of permits to allow the field testing of genetically engineered organisms. The environmental assessments provide a basis for our conclusion that the field testing of the genetically engineered organisms will not present a risk of introducing or disseminating a plant pest and will not have a significant impact on the quality of the human environment. Based on its finding of no significant impact, the Animal and Plant Health Inspection Service has determined that an environmental impact statement need not be prepared.

ADDRESSES: Copies of the environmental assessments and findings of no significant impact are available for public inspection at USDA, room 1141, South Building, 14th Street and Independence Avenue SW., Washington, DC, between 8 a.m. and 4:30 p.m., Monday through Friday, except holidays.

FOR FURTHER INFORMATION CONTACT: Dr. Arnold Foudin, Deputy Director, Biotechnology Permits, Biotechnology, Biologics, and Environmental Protection, APHIS, USDA, room 850, Federal Building, 6505 Belcrest Road, Hyattsville, MD 20782, (301) 436–7612. For copies of the environmental assessment and finding of no significant impact, write to Mr. Clayton Givens at the same address. Please refer to the permit number listed below when ordering documents.

SUPPLEMENTARY INFORMATION: The regulations in 7 CFR part 340 (referred to below as the regulations) regulate the introduction (importation, interstate movement, and release into the environment) of genetically engineered organisms and products that are plant pests or that there is reason to believe are plant pests (regulated articles). A permit must be obtained before a regulated article may be introduced into the United States. The regulations set forth the procedures for obtaining a limited permit for the importation or interstate movement of a regulated article and for obtaining a permit for the release into the environment of a regulated article. The Animal and Plant Health Inspection Service (APHIS) has stated that it would prepare an environmental assessment and, when necessary, an environmental impact statement before issuing a permit for the release into the environment of a regulated article (see 52 FR 22906).

In the course of reviewing the permit applications, APHIS assessed the impact on the environment that releasing the organisms under the conditions described in the permit applications would have. APHIS has issued permits for the field testing of the organisms listed below after concluding that the organisms will not present a risk of plant pest introduction or dissemination and will not have a significant impact on the quality of the human environment. The environmental assessments and findings of no significant impact, which are based on data submitted by the applicants and on a review of other relevant literature, provide the public with documentation of APHIS' review and analysis of the environmental impact associated with conducting the field tests.

An environmental assessment and finding of no significant impact have been prepared by APHIS relative to the issuance of four permits to allow the field testing of the following genetically engineered organisms:

Permit No.	Permittee	Date issued	Organisms	Field test locations
92-175-01, renewal of permit 91-218-02, issued on 10-04-91.	Upjohn Company	08-28-92	Corn plants genetically engineered to express a glufosinate phosphinothricin acetyltransferase (PAT) gene for tolerance to phosphinothricin herbicides.	Puerto Rico.
92-218-01, renewal of permit 91-042-02, issued on 04-26-91.	Auburn University	08-31-92	*Xanthomonas campestris* pv. *campestris* genetically engineered to express a bioluminescence gene as a marker.	Alabama.
92-219-01, renewal of permit 89-320-01, issued on 02-12-90.	Calgene, Incorporated	08-31-92	Tomato plants genetically engineered to express an anti-sense polygalacturonase (PG) gene to delay ripening.	Florida.
92-127-01	Ciba-Geigy Corporation	09-01-92	Corn plants genetically engineered to express a phosphinothricin acetyl transferase (PAT) gene for tolerance to phosphinothricin herbicides, and a delta-endotoxin protein from *Bacillus thuringiensis* subsp. *kurstaki* strain HD-1 for resistance to lepidopteran insects.	Hawaii.

The environmental assessment and finding of no significant impact have been prepared in accordance with: (1) The National Environmental Policy Act of 1969 (NEPA) (42 U.S.C. 4321 *et seq.*), (2) Regulations of the Council on Environmental Quality for Implementing the Procedural Provisions of NEPA (40 CFR parts 1500–1508), (3) USDA Regulations Implementing NEPA (7 CFR part 1b), and (4) APHIS Guidelines Implementing NEPA (44 FR 50381–50384, August 28, 1979, and 44 FR 51272–51274, August 31, 1979).

Done in Washington, DC, this 25th day of September 1992.

Robert Melland,

Administrator, Animal and Plant Health Inspection Service.

[FR Doc. 92-23698 Filed 9-29-92; 8:45 am]

BILLING CODE 3410-34-M

[Docket No. 92-146-1]

Availability of List of U.S. Veterinary Biological Product and Establishment Licenses and U.S. Veterinary Biological Product Permits, Issued, Suspended, Revoked, or Terminated

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Notice.

SUMMARY: This notice pertains to veterinary biological product and establishment licenses and veterinary biological product permits that were issued, suspended, revoked, or terminated by the Animal and Plant Health Inspection Service, during the months of June and July 1992. These actions have been taken in accordance with the regulations issued pursuant to the Virus-Serum-Toxin Act. The purpose of this notice is to inform interested persons of the availability of a list of these actions and advise interested persons that they may request to be placed on a mailing list to receive the list.

FOR FURTHER INFORMATION CONTACT: Maxine Kitto, Program Assistant, Veterinary Biologics, Biotechnology, Biologics, and Environmental Protection, APHIS, USDA, room 838, Federal Building, 6505 Belcrest Road, Hyattsville, MD 20782, (301) 436–8245. For copies of the list or to be placed on the mailing list, write to Ms. Kitto at the above address.

SUPPLEMENTARY INFORMATION: The regulations in 9 CFR part 102, "Licenses for Biological Products," require that every person who prepares certain biological products that are subject to the Virus-Serum-Toxin Act (21 U.S.C. 151 *et seq.*) shall hold an unexpired, unsuspended, and unrevoked U.S.

Veterinary Biological Product License. The regulations set forth the procedures for applying for a license, the criteria for determining whether a license shall be issued, and the form of the license.

The regulations in 9 CFR part 102 also require that each person who prepares biological products that are subject to the Virus-Serum-Toxin Act (21 U.S.C. 151 *et seq.*) shall hold a U.S. Veterinary Biologics Establishment License. The regulations set forth the procedures for applying for a license, the criteria for determining whether a license shall be issued, and the form of the license.

The regulations in 9 CFR part 104, "Permits for Biological Products," require that each person importing biological products shall hold an unexpired, unsuspended, and unrevoked U.S. Veterinary Biological Product Permit. The regulations set forth the procedures for applying for a permit, the criteria for determining whether a permit shall be issued, and the form of the permit.

The regulations in 9 CFR parts 102 and 105 also contain provisions concerning the suspension, revocation, and termination of U.S. Veterinary Biological Product Licenses, U.S. Veterinary Biologics Establishment Licenses, and U.S. Veterinary Biological Product Permits.

Each month the Veterinary Biologics section of Biotechnology, Biologics and Environmental Protection prepares a list of licenses and permits that have been issued, suspended, revoked, or terminated. This notice announces the availability of the lists for the months of June and July 1992. The monthly lists are also mailed on a regular basis to interested persons. To be placed on the mailing list you may call or write the person designated under **FOR FURTHER INFORMATION CONTACT.**

Done in Washington, DC, this 25th day of September 1992.

Robert Melland,

Administrator, Animal and Plant Health Inspection Service.

[FR Doc. 92-23696 Filed 9-29-92; 8:45 am]

BILLING CODE 3410-34-M

Federal Grain Inspection Service

Request for Comments on the Applicant for Designation in the Geographic Area Currently Assigned to the Farwell (TX) Agency

AGENCY: Federal Grain Inspection Service (FGIS).

ACTION: Notice.

SUMMARY: FGIS requests interested persons to submit comments on the applicant for designation to provide official services in the geographic area currently assigned to Farwell Grain Inspection, Inc. (Farwell).

DATES: Comments must be postmarked, or sent by telecopier (FAX) or electronic mail by October 30, 1992.

ADDRESSES: Comments must be submitted in writing to Homer E. Dunn, Chief, Review Branch, Compliance Division, FGIS, USDA, room 1647 South Building, P.O. Box 96454, Washington, DC 20090-6454. SprintMail users may respond to [A:ATTMAIL,O:USDA,ID:A36HDUNN]. ATTMAIL and FTS2000MAIL users may respond to !A36HDUNN. Telecopier (FAX) users may send responses to the automatic telecopier machine at 202-720-1015, attention: Homer E. Dunn. All comments received will be made available for public inspection at the above address located at 1400 Independence Avenue, SW., during regular business hours.

FOR FURTHER INFORMATION CONTACT: Homer E. Dunn, telephone 202-720-8525.

SUPPLEMENTARY INFORMATION:

This action has been reviewed and determined not to be a rule or regulation as defined in Executive Order 12291 and Departmental Regulation 1512-1; therefore, the Executive Order and Departmental Regulation do not apply to this action.

In the August 3, 1992, **Federal Register** (57 FR 34109), FGIS asked persons interested in providing official services in the geographic area assigned to Farwell to submit an application for designation. Applications were due by September 2, 1992. Farwell, the only applicant, applied for designation in the entire area currently assigned to them.

FGIS is publishing this notice to provide interested persons the opportunity to present comments concerning the applicant for designation in the Farwell area. Commenters are encouraged to submit reasons and pertinent data for support or objection to the designation of this agency. All comments must be submitted to the Compliance Division at the above address.

Comments and other available information will be considered in making a final decision. FGIS will publish notice of the final decision in the **Federal Register**, and FGIS will send the applicant written notification of the decision.

AUTHORITY: Pub. L. 94-582, 90 Stat. 2867, as amended (7 U.S.C. 71 *et seq.*)

Dated: September 22, 1992

Neil E. Porter

Acting Director, Compliance Division

[FR Doc. 92-23506 Filed 9-29-92; 8:45 am]

BILLING CODE 3410-EN-F

Request for Applications from Persons Interested in Designation to Provide Official Services in the Geographic Area Presently Assigned to the Alton (IL) Agency

AGENCY: Federal Grain Inspection Service (FGIS).

ACTION: Notice.

SUMMARY: The United States Grain Standards Act, as amended (Act), provides that official agency designations shall end not later than triennially and may be renewed. The designation of Thomas P. Russell dba Alton Grain Inspection Department (Alton), will end March 31, 1993, according to the Act, and FGIS is asking persons interested in providing official services in the specified geographic area to submit an application for designation.

DATES: Applications must be postmarked or sent by telecopier (FAX) by October 30, 1992.

ADDRESSES: Applications must be submitted to Homer E. Dunn, Chief, Review Branch, Compliance Division, FGIS, USDA, room 1647 South Building, P.O. Box 96454, Washington, DC 20090-6454. Telecopier (FAX) users may send applications to the automatic telecopier machine at 202-720-1015, attention: Homer E. Dunn. If an application is submitted by telecopier, FGIS reserves the right to request an original application. All applications will be made available for public inspection at this address located at 1400 Independence Avenue, SW., during regular business hours.

FOR FURTHER INFORMATION CONTACT: Homer E. Dunn, telephone 202-720-8525.

SUPPLEMENTARY INFORMATION:

This action has been reviewed and determined not to be a rule or regulation as defined in Executive Order 12291 and Departmental Regulation 1512-1; therefore, the Executive Order and Departmental Regulation do not apply to this action.

Section 7(f)(1) of the Act authorizes FGIS' Administrator to designate a qualified applicant to provide official services in a specified area after determining that the applicant is better able than any other applicant to provide such official services.

FGIS designated Alton, headquartered in Florissant, Missouri, to provide

official grain inspection services under the Act on April 1, 1990.

Section 7(g)(1) of the Act provides that designations of official agencies shall end not later than triennially and may be renewed according to the criteria and procedures prescribed in section 7(f) of the Act. The designation of Alton ends on March 31, 1993.

The geographic area presently assigned to Alton, in the State of Illinois, pursuant to section 7(f)(2) of the Act, which will be assigned to the applicant selected for designation is as follows:

Calhoun, Jersey, and Madison (West of State Route 4 and North of Interstate 70 and 270) Counties.

Interested persons, including Alton, are hereby given the opportunity to apply for designation to provide official services in the geographic area specified above under the provisions of section 7(f) of the Act and section 800.196(d) of the regulations issued thereunder. Designation in the specified geographic area is for the period beginning April 1, 1993, and ending March 31, 1996. Persons wishing to apply for designation should contact the Compliance Division at the address listed above for forms and information.

Applications and other available information will be considered in determining which applicant will be designated.

AUTHORITY: Pub. L. 94–582, 90 Stat. 2867, as amended (7 U.S.C. 71 *et seq.*)

Dated: September 22, 1992

Neil E. Porter

Acting Director, Compliance Division

[FR Doc. 92–23507 Filed 9–29–92; 8:45 am]

BILLING CODE 3410–EN–F

Designation of the Cairo (IL) Agency

AGENCY: Federal Grain Inspection Service (FGIS).

ACTION: Notice.

SUMMARY: FGIS announces the designation of Cairo Grain Inspection Agency, Inc. (Cairo), to provide official inspection services under the United States Grain Standards Act, as amended (Act).

EFFECTIVE DATE: November 1, 1992.

ADDRESSES: Homer E. Dunn, Chief, Review Branch, Compliance Division, FGIS, USDA, room 1647 South Building, P.O. Box 96454, Washington, DC 20090–6454.

FOR FURTHER INFORMATION CONTACT: Homer E. Dunn, telephone 202–720–8525.

SUPPLEMENTARY INFORMATION:

This action has been reviewed and determined not to be a rule or regulation as defined in Executive Order 12291 and Departmental Regulation 1512–1; therefore, the Executive Order and Departmental Regulation do not apply to this action.

In the May 1, 1992, **Federal Register** (57 FR 18883), FGIS announced that the designation of Cairo ends on October 31, 1992, and asked persons interested in providing official services within the specified geographic area to submit an application for designation. Applications were due by June 1, 1992.

There were two applicants: Cairo and the Missouri Department of Agriculture (Missouri). Cairo and Missouri each applied for the entire Cairo geographic area. FGIS named and requested comments on the applicants for designation in the July 1, 1992, **Federal Register** (57 FR 29273). Comments were due by July 31, 1992. FGIS received 26 comments by the deadline. Twenty one commenters, (fourteen grain firms presently served by Cairo, five trade organizations, and two designated official agencies) supported designation of Cairo based on prompt, professional, and excellent quality service. One commenter supported designation of Cairo based on acquaintance. Four commenters supported designation of Missouri based on timely and accurate service, cost benefits, and the scope of services offered. Of the four, one is a grain firm currently served by Missouri, one is a State department of agriculture, one is a trade organization, and one is a grain firm in the area currently served by Cairo.

FGIS evaluated all available information regarding the designation criteria in Section 7(f)(1)(A) of the Act; and according to Section 7(f)(1)(B), determined that Cairo is better able to provide official services in the geographic area for which they applied.

Effective November 1, 1992, and ending October 31, 1995, Cairo is designated to provide official inspection services under the United States Grain Standards Act, as amended (Act) in the geographic area specified in the May **Federal Register**.

Interested persons may obtain official services by contacting Cairo at 618–734–0689.

AUTHORITY: Pub. L. 94–582, 90 Stat. 2867, as amended (7 U.S.C. 71 *et seq.*)

Dated: September 23, 1992

Neil E. Porter

Acting Director, Compliance Division

BILLING CODE 3410–EN–F

Forest Service

Exemption From Appeal, Tamarack Tussock Salvage and Stand Rehabilitation Project, Boise National Forest, Idaho

AGENCY: Forest Service, USDA.

ACTION: Notice of exemption from appeal.

SUMMARY: This is notification that timber salvage harvest and reforestation activities to recover and rehabilitate natural resources from recent insect epidemics on the Tamarack Tussock project area, Emmett Ranger District, Boise National Forest, are exempt from appeal in accordance with 36 CFR 217.4(a)(11).

DATES: Effective September 30, 1992.

FOR FURTHER INFORMATION CONTACT: Don Dittmer, Timber Management Assistant, Emmett Ranger District, Boise National Forest, 1648 N. Washington, Emmett, ID 83617, telephone: 208–365–3811.

SUPPLEMENTARY INFORMATION: Several years of drought in southwest Idaho have reduced soil moisture and weakened conifer trees. Consequently, Douglas-fir tussock moth, and bark beetle populations have dramatically increased and reached epidemic levels on the Boise National Forest. It is estimated that more than 400,000 trees larger than 12 inches in diameter have died on the Forest as a result of insect damage since 1986.

As part of the effort to recover and rehabilitate natural resources damaged by the insect epidemic, Emmett Ranger District personnel have developed a proposal to harvest dead and dying timber, and reforest damaged acres. The Forest Service has completed the Tamarack Tussock Salvage and Stand Rehabilitation Project Environmental Assessment (EA), identified issues, developed alternatives, and analyzed the effects of implementing timber salvage and other recovery activities.

The analysis area for the Tamarack Tussock Salvage and Stand Rehabilitation Project EA is located about 13 miles northeast of Ola, Idaho, and four miles northwest of Sagehen Reservoir. The Forest will salvage trees killed or severely damaged by the tussock moth and bark beetles on 3,930 acres and recover approximately 18.5 million board feet (MMbf), using tractor/jammer and skyline logging systems. The tussock moth infestation has created several large, open areas of dead and dying trees, which contain few healthy, live trees. Salvage of these stands would result in "salvage

openings," resembling clearcuts. A total of 950 acres of salvage opening would be created, including one opening each of about 200 and 170 acres. These acres would be rehabilitated by planting with ponderosa pine, Douglas-fir and western larch, to increase the sites' timber productivity, resilience and diversity of forest stands. Natural regeneration will be used to reforest small areas (less than five acres in size).

The project also calls for construction of 3.2 miles of road, reconstruction of about 0.8 miles and maintenance of about 71 miles, to facilitate timber harvest in the area. In addition, about 36 miles of road will be administratively closed between October 1 and June 30 when sale and post-sale activities are underway, and about 30 miles of road will be physically closed when sale and post-sale activities are completed, until big-game hiding cover is re-established (15–20 years).

Management direction for the Tamarack Tussock project area is established in the Boise National Forest Land and Resource Management Plan (Forest Plan). The Forest Plan (specifically, the Sagehen Management Area 48) provides for the removal of salvage timber from lands within the project area. In addition, the Forest Plan prescribes standards to protect soil, water, wildlife, visual, and other onsite resources. The selected alternative for the Tamarack Tussock project is consistent with standards and guidelines, objectives, and direction contained in the Forest Plan.

Forest Pest Management Specialists and District Foresters have analyzed the insect situation and have found no economical or practical means to control the current insect epidemic. Although salvage harvesting and reforestation will not control the epidemic, these activities will: (1) Recover valuable timber that would otherwise deteriorate, and (2) reforest those areas left without tree cover as a result of the insect-caused mortality with tree species more resistant to the tussock moth and western spruce budworm, to help minimize the potential for future outbreaks of these insects. It is extremely important to remove the dead and dying timber prior to deterioration and subsequent value losses. Through the timber salvage operations, the financial value of dead and dying trees can be captured, and live but infested, unhealthy trees—which have been predisposed to attack by other insects and diseases—can be removed. In addition, Knutson-Vandenburg (K–V) funds can be generated for use to restore forest resources that have been damaged by the insect epidemic. The Forest Supervisor has determined through preliminary scoping and environmental analysis that there is justification to expedite this project.

The decision for the Tamarack Tussock project will be implemented after publication of this notice in the **Federal Register**. If the project is delayed because of an appeal (delays of up to 150 days are possible), it is likely that the salvage harvest could not be implemented during the 1992 normal operating season. This would result in a loss of volume and value of the timber due to deterioration. The total estimated value of the merchantable dead, dying and unhealthy timber is $1,237,758. Of this, approximately $309,000 would be returned to counties from 25 percent fund receipts. Delays resulting from appeals could cause the loss of much of this value and potentially make the salvage sale unattractive to timber purchasers. This would jeopardize the objectives of the recovery and rehabilitation project.

Pursuant to 36 CFR 217.4(a)(11), it is my decision to exempt the Tamarack Tussock Salvage and Stand Rehabilitation Project, Emmett Ranger District, Boise National Forest, from appeal. The environmental assessment discloses the effects of the proposed actions on the environment and addresses issues resulting from the proposal.

Dated: September 24, 1992.

Robert C. Joslin,

Deputy Regional Forester, Intermountain Region, USDA Forest Service.

[FR Doc. 92–23672 Filed 9–29–92; 8:45 am]

BILLING CODE 3410–01–M

Rural Electrification Administration

Owen Electric Cooperative; Finding of No Significant Impact

AGENCY: Rural Electrification Administration, USDA.

ACTION: Notice of Finding of No Significant Impact.

SUMMARY: Notice is hereby given that the Rural Electrification Administration (REA) has made a Finding of No Significant Impact (FONSI) with respect to the potential environmental impact resulting from a proposal by Owen Electric Cooperative (OEC) to construct the Walton Service Center in Boone County, Kentucky. The FONSI is based on the borrower's environmental report (BER) prepared for OEC by Mr. Gary Gilpin of Gilpin Group Environmental Consulting and Planning. REA conducted an independent evaluation of the report and concurs with its scope and content. In accordance with REA Environmental Policies and Procedures, 7 CFR 1794.61, REA has adopted the OEC's BER as the environmental assessment for the project.

FOR FURTHER INFORMATION CONTACT: Jennifer A. Corwin, Environmental Protection Specialist, Environmental Compliance Branch, Electric Staff Division, room 1246, South Agriculture Building, Rural Electrification Administration, Washington, DC 20250, telephone (202) 720–1784.

SUPPLEMENTARY INFORMATION: The Walton Service Center is located in Boone County, Kentucky. The proposed facilities will involve the construction of a twenty-eight thousand square foot metal building for warehousing, construction vehicle parking, light vehicle maintenance activities and meeting facilities, two storm water sedimentation ponds one-half of an acre and one-third of an acre in size, a three-quarter of an acre outside pole storage area, the possible erection of a self-supporting lattice type radio tower and parking and paved areas. OEC has purchased a little over 10 acres for the new service center of which about eight will be affected by the proposed construction activities.

Alternatives considered to the project as proposed were no action, alternative facilities and alternative construction sites.

Based on an independent analysis of the adopted BER, REA has concluded that the construction of the Walton Service Center will have no significant impact on air quality, water quality, wetlands, the 100-year floodplain, existing land uses, prime farmland, historic properties, federally-listed threatened and endangered species or designated critical habitat or species proposed for listing or proposed critical habitat.

No other potential significant impact resulting from the construction and use of the proposed project has been identified. Copies of the environmental assessment and FONSI are available for review at, or can be obtained from, REA at the address provided herein or from Owen Electric Cooperative, Inc., 510 South Main Street, Owenton, Kentucky, 40359–0901.

Dated: September 24, 1992.

George E. Pratt,

Deputy Administrator—Program Operations.

[FR Doc 92–23644 Filed 9–29–92; 8:45 am]

BILLING CODE 3410–15–F

DEPARTMENT OF COMMERCE

Foreign-Trade Zones Board

[Docket A(32b1)-4-92]

Foreign-Trade Zone 9—Honolulu, Hawaii; Request for Manufacturing Authority (Luggage, Bags, and Cases)

A request has been submitted to the Foreign-Trade Zones (FTZ) Board pursuant to § 400.32(b)(1) of the Board's regulations for approval of zone export manufacturing authority within FTZ 9 by the State of Hawaii's Department of Business, Economic Development and Tourism, on behalf of the State of Hawaii, grantee of FTZ 9. It was formally filed on September 22, 1992.

The proposed operation involves the production for export of plastic and leather luggage, suitcases, handbags, wallets, and sportbags (included in HTS paragraph 4202) by the Hawaii Bag Company, Inc. (HBC). Up to 35 percent of the value of the finished products would be made from components sourced abroad, including articles of steel (HTS 7326.90.9090.5), rubber or plastic fabric (HTS 5903.10.2090.2), leather (HTS 4101.31.6090.8), plastic material (HTS 3926.90.9090.8), plastic fasteners (HTS 3926.90.9090.8), buckles and clasps (HTS 8308.90.6000.0), rigid plastic tubing (HTS 3917.29.0050.2), plastic sheeting (HTS 3920.99.5000.2), and cotton webbing (HTS 6307.90.9986.7).

Zone procedures would exempt HBC from payment of Customs duties on foreign components used in the exported finished products. (Customs duty rates on components range from 3.1 to 7.0 percent.) The request indicates that zone procedures would encourage export activity by helping the firm to reduce production costs, improving its international competitiveness.

Public comment on the proposal is invited from interested parties. Submissions (original and 3 copies) shall be addressed to the Board's Executive Secretary at the address below. The closing period for their receipt is November 16, 1992.

A copy of the application and accompanying exhibits will be available for public inspection at the following location: Office of the Executive Secretary, Foreign-Trade Zones Board, U.S. Department of Commerce, room 3716, 14th and Pennsylvania Avenue NW., Washington, DC 20230.

Dated: September 24, 1992.

John J. Da Ponte, Jr.,

Executive Secretary.

[FR Doc. 92-23734 Filed 9-29-92; 8:45 am]

BILLING CODE 3510-DS-M

International Trade Administration

[A-580-811]

Preliminary Determination of Sales at Less Than Fair Value and Postponement of Final Determination: Steel Wire Rope From Korea

AGENCY: Import Administration, International Trade Administration, Department of Commerce.

EFFECTIVE DATE: September 30, 1992.

FOR FURTHER INFORMATION CONTACT: Anna Snider, Amy Beargie, or Richard Rimlinger, Office of Antidumping Compliance, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue NW., Washington, DC 20230; telephone: (202) 377-4733.

PRELIMINARY DETERMINATION: We preliminarily determine that steel wire rope from Korea is being, or is likely to be, sold in the United States at less than fair value, as provided in section 733 of the Tariff Act of 1930, as amended (the Act). The estimated margins are shown in the "Suspension of Liquidation" section of this notice.

Case History

Since the initiation of this investigation on April 29, 1992 (57 FR 19280, May 5, 1992), the following events have occurred. On May 26, 1992, the U.S. International Trade Commission (ITC) preliminarily determined that there is a reasonable indication that an industry in the United States is materially injured by reason of imports of steel wire rope from Korea. (57 FR 23428, June 3, 1992).

On June 5, 1992, the Department presented an antidumping duty questionnaire to Korea Iron & Steel Wire, Ltd. (KIS), Man Ho Rope Manufacturing Co., Ltd. (Man Ho), and Young Heung Iron & Steel Co., Ltd. (Young Heung). These three respondents accounted for at least 60 percent of Korean exports of steel wire rope to the United States.

Responses to Section A of the questionnaire were due on June 19, 1992, and responses to the remaining sections were due on July 6, 1992. At the request of the respondents, the response deadline for Sections B and C was extended to July 27, 1992. Responses to Sections A, B, and C were received on their respective due dates. We issued supplemental sales questionnaires on August 18, 1992, and received the corresponding responses on September 1, 1992.

In a submission dated August 4, 1992, the petitioner alleged that KIS, Man Ho, and Young Heung were selling steel wire rope in the home market at prices below the cost of production. On August 25, 1992, the Department determined that petitioner had reasonable grounds to believe or suspect that the three Korean respondents were selling steel wire rope below cost in the home market and, accordingly, initiated a cost of production investigation pursuant to section 773(b) of the Act (*See* August 24, 1992 Memo from the Director of the Office of Antidumping Compliance to the Deputy Assistant Secretary for Compliance—Initiation of Cost Investigation). The Department issued a cost of production and constructed value questionnaire to each respondent on August 25, 1992. Responses to the questionnaire were originally due on September 22, 1992. However, in response to respondents' request for an extension, the Department extended the deadline for the responses to October 1, 1992. We will consider whether respondents made sales at below cost in the home market in the final determination.

On August 6, 1992, petitioner requested that the Department postpone the preliminary determination from September 16, 1992 until September 23, 1992, pursuant to 19 CFR 353.15(c). The Department granted this request on August 24, 1992. (57 FR 39390, August 31, 1992).

Respondents have requested by letter dated September 17, 1992 that, in the event of an affirmative preliminary determination in this investigation, the Department postpone the final determination until not later than 135 days after the date of publication of this notice. See "Postponement of Final Determination" section of this notice.

Scope of the Investigation

The product covered by this investigation is steel wire rope. Steel wire rope encompasses ropes, cables, and cordage of iron or carbon steel; other than stranded wire, not fitted with fittings or made up into articles, and not made up of brass plated wire. Imports of these products are currently classifiable under the following Harmonized Tariff Schedule (HTS) subheadings: 7312.10.9030, 7312.10.9060 and 7312.10.9090.

Excluded from this investigation is stainless steel wire rope, *i.e.*, ropes, cables and cordage other than stranded wire, of stainless steel, not fitted with fittings or made up into articles, which is classifiable under the HTS subheading 7312.10.6000. Although HTS subheadings are provided for convenience and customs purposes, our own written

description of the scope of these proceedings is dispositive.

Period of Investigation

The period of investigation (POI) extends from November 1, 1991 through April 30, 1992.

Such or Similar Merchandise

We have determined that all products covered by this investigation constitute a single category of such or similar merchandise. For purposes of calculating a dumping margin, the Department compared products sold in the United States with identical or similar products sold in the home market. Home market products were considered identical to U.S. products if the merchandise shared the following characteristics: (1) Type of steel wire, *i.e.*, bright carbon steel or galvanized carbon steel; (2) diameter of wire rope; (3) type of core, *i.e.*, fiber or steel; (4) class of wire rope (number of strands by number of wires), *e.g.*, 6×7, 6×19, 6×37 or 8×19; and (5) other characteristics including grade of steel, number of wires per strand, and design of strands.

Where there were no sales of identical merchandise in the home market with which to compare merchandise sold in the United States, sales of the most similar merchandise were compared on the basis of the criteria described above, ranked in order of importance from 1 through 5. For criterion (5), respondents were instructed to use grade of steel, number of wires per strand, and design of strands in the order they deemed appropriate. The information provided in the responses leads us to determine preliminarily that the ranking chosen by respondents is reasonable. We made adjustments for differences in the physical characteristics of the merchandise in accordance with section 773(a)(4)(c) of the Act.

Fair Value Comparisons

To determine whether sales of steel wire rope from Korea to the United States were made at less than fair value, we compared United States price with the foreign market value, as specified in the "United States Price" and "Foreign Market Value" sections of this notice.

United States Price

For KIS, Man Ho and Young Heung, we based United States price on purchase price in accordance with section 772(b) of the Act because all sales were made directly to unrelated parties prior to importation into the United States.

A. KIS

We calculated purchase price based on packed, f.o.b., c.& f., or c.i.f. prices to unrelated customers in the United States. We made deductions, where appropriate, for foreign inland freight, ocean freight, foreign brokerage, marine insurance, wharfage, container handling charges, containerization expenses, inspection fees, export licensing charges, postage, and other movement expenses, in accordance with section 772(d)(2) of the Act.

Pursuant to section 772(d)(1)(B) of the Act, we added duty drawback paid by the Korean government to the respondent as a rebate of duties paid on materials imported for production of steel wire rope. In accordance with section 772(d)(1)(C) of the Act, we added to United States price an amount for value-added taxes (VAT) calculated by applying the home market tax rate to gross U.S. price.

B. Man Ho

We calculated purchase price based on packed, f.o.b., c.& f., or c.i.f. prices to unrelated customers in the United States. We made deductions, where appropriate, for foreign inland freight, ocean freight, foreign brokerage, terminal handling charges, stevedoring charges, marine insurance, wharfage, containeration expenses, container taxes, inspection expenses, shoring charges and other movement charges, in accordance with section 772(d)(2) of the Act.

Pursuant to section 772(d)(1)(B) of the Act, we added duty drawback paid by the Korean government to the respondent as a rebate of duties paid on materials imported for production of steel wire rope. In accordance with section 772(d)(1)(C) of the Act, we added to United States price an amount for value-added taxes (VAT) calculated by applying the home market tax rate to gross U.S. price.

C. Young Heung

We calculated purchase price based on packed, f.o.b., c.& f., or c.i.f. prices to unrelated customers in the United States. We made deductions, where appropriate, for foreign inland freight, ocean freight, foreign brokerage, marine insurance, terminal handling charges, destination delivery charges, containerization expenses, inspection expenses, shoring charges, letter of credit charges, and other movement expenses, in accordance with section 772(d)(2) of the Act.

Pursuant to section 772(d)(1)(B) of the Act, we added duty drawback paid by the Korean government to the respondent as a rebate of duties paid on materials imported for production of steel wire rope. In accordance with section 772(d)(1)(C) of the Act, we added to United States price an amount for value-added taxes (VAT) calculated by applying the home market tax rate to gross U.S. price.

Foreign Market Value (FMV)

In order to determine whether there were sufficient sales of steel wire rope in the home market to serve as a viable basis for calculating foreign market value, we compared the volume of home market sales of steel wire rope with the volume of third country sales of the same product in accordance with section 773(a)(1)(B) of the Act. We found that the home market was viable for sales of steel wire rope by each of the respondents. Therefore, pursuant to section 773(a)(1)(A) of the Act, we calculated foreign market value based on home market sales.

A. KIS

Home market prices were based on the packed, ex-factory, ex-warehouse, or delivered prices to unrelated parties in the home market. Where applicable, we made adjustments for movement expenses (including inland freight, loading expenses, inspection fees, and servicing fees), rebates, direct selling expenses including product liability premiums and warranty expenses, differences in credit expenses, differences in costs attributable to differences in the physical characteristics of the merchandise, and differences in packing expenses. As a circumstance of sale adjustment, we added the same amount of VAT tax to home market price as that added to U.S. price.

KIS failed to provide the information necessary to calculate FMVs for six models sold in the United States and, as a consequence, we were unable to calculate margins for eleven U.S. sales. For purposes of the preliminary determination, the Department has applied to the affected sales a margin equal to the respondent's weighted-average rate.

B. Man Ho

Home market prices were based on the packed, delivered prices to unrelated parties in the home market. Where applicable, we made adjustments for movement expenses (including inland freight, delivery charges, warehousing expenses, and inspection fees), rebates, direct selling expenses including product liability premiums, differences in credit expenses, differences in costs

attributable to differences in the physical characteristics of the merchandise, and differences in packing expenses. As a circumstance of sale adjustment, we added the same amount of VAT tax to home market price as that added to U.S. price.

C. Young Heung

Home market prices were based on the packed, delivered prices to unrelated parties in the home market. Where applicable, we made adjustments for movement expenses including inland freight, rebates, direct selling expenses including product liability premiums, differences in credit expenses, differences in costs attributable to differences in the physical characteristics of the merchandise, and differences in packing expenses. As a circumstances of sale adjustment, we added the same amount of VAT tax to home market price as that added to U.S. price.

Currency Conversion

We made currency conversions based on the official exchange rates in effect on the dates of the U.S. sales as certified by the Federal Reserve Bank.

Verification

As provided in section 776(b) of the Act, we will verify the information used in reaching the final determination in this investigation.

Suspension of Liquidation

In accordance with section 733(d)(1) of the Act, we are directing the U.S. Customs Service to suspend liquidation of all entries (except for those of KIS and Young Heung) of steel wire rope, as defined in the "Scope of Investigation" section of this notice, that are entered, or withdrawn from warehouse, for consumption on or after the date of publication of this notice in the **Federal Register**. The U.S. Customs Service shall require a cash deposit or posting of a bond equal to the estimated preliminary dumping margins shown below. This suspension of liquidation will remain in effect until further notice. The margins are as follows:

Manufacturer/producer/exporter	Weighted-average margin percentage
Korea Iron & Steel Wire, Ltd	[1] 0.25
Man Ho Rope Mfg., Ltd	.99
Young Heung Iron & Steel Co., Ltd	[1] .06
All others	.99

[1] De minimis.

International Trade Commission Notification

In accordance with section 733(f) of the Act, we have notified the ITC of our determination. If our final determination is affirmative, the ITC will determine before the later of 120 days after the date of this preliminary determination or 45 days after our final determination whether these imports are materially injuring, or threaten material injury to, the U.S. industry.

Postponement of Final Determination

As stated above, the respondents have requested that, in the event of an affirmative determination, the Department postpone the final determination. In accordance with 19 CFR 353.20(b), we are postponing the date of the final determination until not later than 135 days after the date of publication of this notice.

Public Comment

In accordance with 19 CFR 353.38(c) and 19 CFR 353.8(d), case briefs or other written comments in at least ten copies may be submitted to the Assistant Secretary for Import Administration no later than December 4, 1992, and rebuttal briefs no later than December 11, 1992. Pursuant to 19 CFR 353.38(b), we will hold a public hearing, if requested, to afford interested parties an opportunity to comment on arguments raised in case or rebuttal briefs. Tentatively, the hearing will be held on December 15, 1992 at 10 a.m. at the U.S. Department of Commerce, room 3708, 14th Street and Constitution Avenue NW., Washington, DC 20230. Parties should confirm by telephone the time, date, and place of the hearing 48 hours before the scheduled time.

Interested parties who wish to request a hearing, or to participate if one is requested, must submit a written request to the Assistant Secretary for Import Administration, U.S. Department of Commerce, room B–099, within ten days of the publication of this notice in the **Federal Register**. Requests should contain:

(1) The party's name, address, and telephone number;

(2) The number of participants; and

(3) A list of the issues to be discussed.

In accordance with 19 CFR 353.38(b), oral presentations will be limited to issues raised in the briefs.

This determination is published pursuant to section 733(f) of the Act and 19 CFR 353.15(a)(4).

Dated: September 23, 1992

Alan M. Dunn,

Assistant Secretary for Import Administration.

BILLING CODE 3510–DS–M

Quarterly Update of Foreign Government Subsidies on Articles of Quota Cheese

AGENCY: International Trade Administration/Import Administration Department of Commerce.

ACTION: Publication of quarterly update of foreign government subsidies on articles of quota cheese.

SUMMARY: The Department of Commerce, in consultation with the Secretary of Agriculture, has prepared a quarterly update to its annual list of foreign government subsidies on articles of quota cheese. We are publishing the current listing of those subsidies that we have determined exist.

EFFECTIVE DATE: October 1, 1992.

FOR FURTHER INFORMATION CONTACT: Patricia W. Stroup or Maria MacKay, Office of Countervailing Compliance, International Trade Administration, U.S. Department of Commerce, Washington, DC 20230, telephone: (202) 377–2786 or 377–0983.

SUPPLEMENTARY INFORMATION: Section 702(a) of the Trade Agreements Act of 1979 ("the TAA") requires the Department of Commerce ("the Department") to determine, in consultation with the Secretary of Agriculture, whether any foreign government is providing a subsidy with respect to any article of quota cheese, as defined in section 701(c)(1) of the TAA, and to publish an annual list and quarterly updates of the type and amount of those subsidies.

The Department has developed, in consultation with the Secretary of Agriculture, information on subsidies (as defined in section 702(h)(2) of the TAA) being provided either directly or indirectly by foreign governments on articles of quota cheese.

In the current quarter the Department has determined that the subsidy amounts have changed for several of the countries for which subsidies were identified in our annual subsidy list. The appendix to this notice lists the country, the subsidy program or programs, and the gross and net amount of each subsidy on which information is currently available.

The Department will incorporate additional programs which are found to constitute subsidies, and additional

information on the subsidy programs listed, as the information is developed.

The Department encourages any person having information on foreign government subsidy programs which benefit articles of quota cheese to submit such information in writing to the Assistant Secretary for Import Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue NW., Washington, DC 20230.

This determination and notice are in accordance with section 702(a) of the TAA.

Dated: September 25, 1992.

Alan M. Dunn,

Assistant Secretary for Import Administration.

APPENDIX—QUOTA CHEESE SUBSIDY PROGRAMS

Country	Program(s)	Gross [1] subsidy (cents per pound)	Net [2] subsidy (cents per pound)
Belgium	European Community (EC) Restitution Payments	49.1	49.1
Canada	Export Assistance on Certain Types of Cheese	29.1	29.1
Denmark	EC Restitution Payments	60.7	60.7
Finland	Export Subsidy	158.1	158.1
France	EC Restitution Payments	58.3	58.3
Greece	EC Restitution Payments	66.8	66.8
Ireland	EC Restitution Payments	73.5	73.5
Italy	EC Restitution Payments	75.5	75.5
Luxembourg	EC Restitution Payments	49.1	49.1
Netherlands	EC Restitution Payments	51.0	51.0
Norway	Indirect (Milk) Subsidy	20.6	20.6
	Consumer Subsidy	45.6	45.6
Portugal	EC Restitution Payments	66.2	66.2

National Oceanic and Atmospheric Administration

Oceanic and Atmospheric Management Advisory Committee; Open Meeting

AGENCY: National Oceanic and Atmospheric Administration (NOAA), Commerce.

SUMMARY: The Oceanic and Atmospheric Management Advisory Committee (OAMAC) will meet on October 5–6, 1992, to advise the Secretary on issues related to the management of oceanic and atmospheric resources that fall within the legislative and administrative purview of the National Oceanic and Atmospheric Administration (NOAA). This Committee reviews on a selective basis, Earth systems research and data management, the status of marine and atmospheric science, service programs of NOAA, and NOAA's laboratories, fleet, satellites and supercomputers, and their application to resource management and to products and services beneficial to the American public.

TIME AND PLACE: October 5, 1992, from 8:30 a.m. until 5 p.m. at the Willard Hotel, 1401 Pennsylvania Avenue NW, Washington, DC, and on October 6, 1992, at the Willard Hotel from 8:30 a.m. until 4 p.m.

AGENDA: This is the third meeting of OAMAC. The committee will consider reports from the five subcommittees: (1) NOAA Definition and Public Appreciation (2) Fleet Modernization (3) Weather Station Closings (4) Fisheries—International Support (4) Marine Sanctuaries.

PUBLIC PARTICIPATION: The meeting will be opened to the public. Seat will be available on a first-come, first-served basis.

FOR FURTHER INFORMATION CONTACT: R.A. Edwards, Deputy Assistant Secretary of Commerce for Oceans and Atmosphere, room 5804, Hoover Building, Department of Commerce, 14th and Constitution Avenue NW., Washington, DC 20230. Telephone: (202) 377–3567.

R.A. Edwards,

Deputy Assistant Secretary for Oceans and Atmosphere.

Accordingly the following agenda for the second meeting of the Oceanic and Atmospheric Management Advisory Committee is published.

Agenda for the October 5–6, 1992 Meeting of the Oceanic and Atmospheric Advisory Committee

October 5, 1992

8:30 a.m.
Meeting (Willard Hotel).
OAMAC Overview and Business.
Subcommittee Reports.
12:30 p.m.—Lunch break.
2 p.m.
Lunch concludes.
Other Business.
5 p.m.
Meeting concludes.

October 6, 1992

8:30 a.m.—Subcommittee reports continue.
Noon—Lunch Break
1:30 p.m.
Lunch concludes.
OAMAC business.
2 p.m.—Conclude OAMAC Business.
2:30 p.m.—Adjournment.

[FR Doc. 92-23669 Filed 9-29-92; 8:45 am]
BILLING CODE 3510-08-M

Endangered Species; Permits

AGENCY: National Marine Fisheries Service (NMFS), NOAA, Commerce.

ACTION: Notice of correction regarding application for permit (P45K).

SUMMARY: This notice revises the first paragraph under the name and address of applicant section previously published in the **Federal Register** September 14, 1992 (57 FR 41922). The applicant's correct name and address should read as follows: The U.S. Fish and Wildlife Service, National Fisheries Research Center, Seattle-Columbia River Field Station, Star Route, Cook, WA 98604.

Dated: September 15, 1992.

Charles Karnella,

Deputy Director, Office of Protected Resources.

[FR Doc. 92-23619 Filed 9-29-92; 8:45 am]

BILLING CODE 3510-22-M

COMMODITY FUTURES TRADING COMMISSION

Agricultural Advisory Committee Meeting

This is to give notice, pursuant to section 10(a) of the Federal Advisory Committee Act, 5 U.S.C. app. 2, section 10(a) and 41 CFR 101-6.1015(b), that the Commodity Futures Trading Commission's Agricultural Advisory Committee will conduct a public meeting in the Hearing Room on the basement level of the Commission's Washington, DC headquarters, 2033 K Street, NW., Washington, DC on October 19, 1992, beginning at 8:30 a.m. and lasting until 12:30 p.m. The agenda will consist of:

Agenda

I. Introductory remarks, Commissioner Joseph B. Dial;
II. Demonstration of AUDIT;
III. Discussion of new agricultural futures contracts offered by CBOT;
IV. Discussion of speculative position limits;
V. Discussion of CFTC reauthorization;
VI. Discussion of agricultural trade options;
VII. Discussion of futures-style margining of options;
VIII. Discussion of *Arkansas Best;*
IX. Discussion on CFTC's Excellence 2000;
X. Discussion concerning agricultural education programs;
XI. Other Committee Business; and
XII. Closing Remarks by Commissioner Joseph B. Dial.

The purpose of this meeting is to solicit the views of the Committee on the above-listed agenda matters. The Advisory Committee was created by the Commodity Futures Trading Commission for the purpose of receiving advice and recommendations on agricultural issues. The purposes and objectives of the Advisory Committee are more fully set forth in the May 6, 1991 fourth renewal charter of the Advisory Committee.

The meeting is open to the public. The Chairman of the Advisory Committee, Commissioner Joseph B. Dial, is empowered to conduct the meeting in a fashion that will, in his judgment, facilitate the orderly conduct of business. Any member of the public who wishes to file a written statement with the Advisory Committee should mail a copy of the statement to the attention of: the Commodity Futures Trading Commission Agricultural Advisory Committee c/o Kimberly N. Griles, Commodity Futures Trading Commission, 2033 K Street, NW., Washington, DC 20581, before the meeting. Members of the public who wish to make oral statements should also inform Ms. Griles in writing at the foregoing address at least three business days before the meeting. Reasonable provision will be made, if time permits, for an oral presentation of no more than five minutes each in duration.

Issued by the Commission in Washington, DC on September 24, 1992.

Jean A. Webb,

Secretary of the Commission.

[FR Doc. 92-23680 Filed 9-29-92; 8:45 am]

BILLING CODE 6351-01-M

DEPARTMENT OF DEFENSE

Office of the Secretary

Defense Science Board Task Force on Submarine Service Life; Meeting

ACTION: Change in Date of Advisory Committee Meeting.

SUMMARY: The meeting of the Defense Science Board Task Force on Submarine Service Life scheduled for October 5 and 6, 1992, at the MITRE Corporation, McLean, Virginia, as published in the **Federal Register** (Vol. 57, No 183, Page 43441, Monday September 21, 1992, FR Doc. 92-22688) has been rescheduled for October 19 and 20, 1992.

Dated: September 24, 1992.

Linda M. Bynum,

Alternate OSD Federal Register Liaison Officer, Department of Defense.

[FR Doc. 92-23622 Filed 9-29-92; 8:45 am]

BILLING CODE 3810-01-M

Department of the Air Force

USAF Scientific Advisory Board; Meeting

The USAF Scientific Advisory Board will hold its Fall General Board Meeting on 20-22 October 1992 from 8 a.m. to 5 p.m. at the Pentagon, Washington, DC.

* * * * *

The purpose of this meeting is to provide attendees the opportunity to hear results of important SAB studies and to enable members and senior Air Force leaders to become better acquainted. Additionally, the attendees will begin planning for future studies.

This meeting will involve discussions of classified defense and contractor proprietary matters listed in section 552b(c) of title 5, United States Code, specifically subparagraphs (1) and (4) thereof, and accordingly will be closed to the public.

For further information, contact the Scientific Advisory Board Secretariat at (703) 697-4811.

Patsy J. Conner,

Air Force Federal Register Liaison Officer.

[FR Doc. 92-23624 Filed 9-29-92; 8:45 am]

BILLING CODE 3910-01-M

Department of the Army

Army Science Board; Notice of Partially Closed Meeting

In accordance with section 10(a)(2) of the Federal Advisory Committee Act (P.L. 92-463), announcement is made of the following Committee Meeting:

Name of the Committee: Army Science Board (ASB).

Dates of the Meetings: 15 October 1992.

Time:

0800-0835 Hours OPEN COI/ WELCOME
0835-1200 Closed
1300-1700 Closed

Place: Picatinny Arsenal, Dover, NJ

Agenda: The Army Science Board's Systems Issue Group will meet with government and contractor representatives to discuss results of the test firings at Yuma Proving Grounds, review pressure oscillation analysis and discuss the latest design of the Regenerative Liquid Propellant Gun. This meeting will be closed to the public in accordance with section 552b(c) of title 5, U.S.C., specifically subparagraphs (1) and (4) thereof, and title 5, U.S.C., appendix 2, subsection 10(d). The classified and unclassified matters and proprietary information to be discussed is so inextricably intertwined so as to preclude opening

any portion of the meeting. The ASB Administrative Officer, Sally Warner, may be contacted for further information (703) 695–0781.

Sally A. Warner,

Administrative Officer, Army Science Board.

[FR Doc. 92–23912 Filed 9–29–92; 8:45 am]

BILLING CODE 3710–08–M

DEPARTMENT OF EDUCATION

Business and Education Standards Program

AGENCY: Department of Education.

ACTION: Notice of final priority for Fiscal Year 1993.

SUMMARY: The Secretary announces a priority for fiscal year (FY) 1993 under the Business and Education Standards Program. Under this absolute priority, the Secretary will fund projects that develop skill standards so that workers and trainees are aware of the skills that are required to perform a job well in national labor markets. The Secretary takes this action in an effort to help meet the needs of business, industry, and educational institutions that educate and train workers. This absolute priority is the first step in developing competent entry-level workers who have attained national skill standards.

EFFECTIVE DATE: This priority takes effect either 45 days after publication in the **Federal Register** or later if the Congress takes certain adjournments. If you want to know the effective date of this priority, call or write the Department of Education contact person.

FOR FURTHER INFORMATION CONTACT: Debra J. Nolan, U.S. Department of Education, 400 Maryland Ave. SW., room 4512, Switzer Building, Washington, DC 20202–7242. Telephone: 202–205–9650. Deaf and hearing impaired individuals may call the Federal Dual Party Relay Service at 1–800–877–8339 (in the Washington, DC 202 area code, telephone 708–9300) between 8 a.m. and 7 p.m., Eastern time.

SUPPLEMENTARY INFORMATION: The Business and Education Standards Program is authorized by section 416 of the Carl D. Perkins Vocational and Applied Technology Education Act, as amended by Public Law 101–392, 104 Stat. 756, 818 (1990). On July 6, 1992, the Secretary published a notice of proposed priority for this program in the **Federal Register** (57 FR 29714). Under this final priority the Secretary funds projects that will organize and operate business-labor-education technical committees to develop national skill standards and skill certificates for competencies in industries and trades. The following entities are eligible for an award under this program: Industrial trade associations, labor organizations, national joint apprenticeship committees, and comparable national organizations, such as educational associations, industry councils, business and industry organizations, and associations of private or national research organizations.

The Secretary encourages applicants, in meeting this final priority, to replicate standards or adapt methods used in this country and abroad. In the United States, for example, the automotive industry is notable in the development of skill standards and the certification of individuals who have completed vocational-technical education programs. The work of the Vocational-Technical Education Consortium of States is notable in converting job analysis information into curriculum objectives and methods for assessing student achievement.

Other organizations that have attempted to define and measure employability and workplace competencies include the National Occupational Competency Testing Institute, the Educational Testing Service, the American College Testing Service, the American Society for Training and Development, the Secretary of Labor's Commission on Achieving Necessary Skills, and the National Occupational Information Coordinating Committee.

Other countries, such as Canada, the Netherlands, and Scotland, have done considerable work in developing national industry-based skill standards. These countries have been successful in establishing industry-occupational platform committees with strong representation from management, labor, education, and government.

The Netherlands has developed a computerized interactive curriculum information system for entering job analysis data and using artificial intelligence methods to convert those data into skill standards and vocational curricular objectives. The Netherlands has invited the United States to make use of this system, and the Secretary encourages interested applicants to consider this. Applicants may obtain an abstract that describes the Netherlands system from the National Occupational Information Coordinating Committee in Washington, DC (Telephone: 202–653–5665).

The Assistant Secretary for Vocational and Adult Education has consulted with the Assistant Secretary of Labor for Employment and Training regarding the Business and Education Standards Program. Both Departments will be involved in reviewing applications submitted under the FY 1993 competition and will continue meeting throughout the operation of the program.

The Business and Education Standards Program directly supports National Education Goal 5—to ensure that every adult American will possess the knowledge and skills necessary to compete in a global economy and exercise the rights and responsibilities of citizenship. The program is also an important element of AMERICA 2000, the President's strategy to help America achieve the National Education Goals. Specifically, it addresses Track III of the AMERICA 2000 strategy—transforming America into "A Nation of Students"—by establishing standards for job skills and knowledge through a cooperative effort by business, industry, labor, and education groups, so that workers can see what skills are needed to perform a job and can evaluate their own grasp of those skills.

Note: This notice of final priority does not solicit applications. A notice inviting applications under this competition is published in a separate notice in this issue of the **Federal Register**.

Public Comment

In the notice of proposed priority, the Secretary invited comments on the proposed priority. Four commenters submitted letters supporting the business and education standards priority. There were no comments opposing the priority. One of the commenters, in addition to supporting the priority, offered suggestions that were not related to the priority. Thus, the Secretary will not address these suggestions in this notice. The Secretary has made no changes in this priority since publication of the notice of proposed priority.

Priority

Under 34 CFR 75.105(c)(3), the Secretary gives an absolute preference to applications that meet the following priority. The Secretary funds under the FY 1993 competition only applications that meet this absolute priority:

Projects that propose to carry out all of the following activities:

(1) Develop a coalition—of employers, labor organizations, associations, vocational educators and others—who will participate in the development of skill standards that will serve as a basis for a certification process. The coalition must broadly represent entities

associated with a majority of the persons employed in a particular industry or industry cluster.

(2) Develop standards that include job-specific, academic, and reasoning skills along with a basis for a certification process that show promise of being maintained and updated after termination of the project.

(3) Develop methods for using skill standards as the basis for the development of curricula in vocational-technical education and for certification.

(4) Propose procedures for testing the validity of the skill standards to ensure nondiscrimination on the basis of race, color, national origin, gender, age, or disability.

(5) Develop a method for determining whether certified personnel are better performers than non-certified personnel.

(6) Propose procedures for identifying and accommodating probable future skill standards at the national and world class levels for business and industry.

Intergovernmental Review

This program is subject to the requirements of Executive Order 12372 and the regulations in 34 CFR part 79. The objective of the Executive order is to foster an intergovernmental partnership and a strengthened federalism by relying on processes developed by State and local governments for coordination and review of proposed Federal financial assistance.

In accordance with the order, this document is intended to provide early notification of the Department's specific plans and actions for this program.

APPLICABLE PROGRAM REGULATIONS: 34 CFR part 421.

Program Authority: 20 U.S.C. 2416.

(Catalog of Federal Domestic Assistance Number 84.244, Business and Education Standards Program)

Dated: September 11, 1992.

Lamar Alexander,

Secretary of Education.

[FR Doc. 92-23637 Filed 9-29-92; 8:45 am]

BILLING CODE 4000-01-M

DEPARTMENT OF ENERGY

University Research Instrumentation Program 1993

AGENCY: Office of University and Science Education, Department of Energy.

ACTION: Notice.

SUMMARY: The purpose of this notice is to announce the availability of the University Research Instrumentation (URI) Program solicitation, and to inform potential applicants of the closing date and location for transmittal of applications for awards under this program. This program provides grants to selected universities and colleges so that they can purchase advanced equipment which will enhance their capability to conduct energy research. The catalog number is 81.077 (Catalog of Federal Domestic Assistance), University Research Instrumentation Program.

DATES: Applications may be delivered by hand, U.S. First Class Mail, or express mail and must be received by the Idaho Field Office no later than 4:30 p.m. local prevailing time, Monday, December 7, 1992.

ADDRESSES: To be eligible, the application must be received by the U.S. Department of Energy, Idaho Field Office, 785 DOE Place, M/S 1220, Idaho Falls, ID 83401/1562, ATTN: J.H. Nadler, 1993 URI Program.

FOR FURTHER TECHNICAL INFORMATION CONTACT: Copies of the Program Solicitation may be obtained from the URI Program Manager, Office of University and Science Education, OUSE/ST-511, U.S. Department of Energy, 1000 Independence Avenue SW., Washington, DC 20585, (202) 586-8949.

SUPPLEMENTARY INFORMATION: The purpose of the University Research Instrumentation Program is to assist university and college scientists in strengthening their capabilities to conduct long-range research in specific energy research and development areas of direct interest to DOE through the acquisition of specialized research instrumentation. This program is consistent with, and part of, a government-wide effort to increase the availability of advanced research instrumentation in universities and colleges. For FY 1993, the appropriation recommended in the conference report for the Energy and Water Development Appropriations Bill is $5.647 million. In anticipation of enactment of this bill, DOE invites all qualified colleges and universities to write for a copy of its University Research Instruction Program solicitation, DOE-ER-0184/8, Notice of Program Announcement Number DE-PS05-93ER79139. Selection for award under this solicitation is subject to the availability of funds. Applications must be prepared and submitted in accordance with the instructions and forms included in the program solicitation.

In FY 1993 applications will only be accepted in the designated principal research areas. The URI program's funds will be concerned primarily with capital equipment costing $100,000 or more needed for on-campus research in one of six specific energy research areas (listed below in alphabetical order). The following research areas are divided into subjects, and in same instances, the subjects are further divided into segments. The applicant should only submit an application that fits within the current research area, subject(s), and if applicable, segment(s) stated in the 1993 URI Guide. A research area and/or subject extracted from previous guides (1984-1992) does not meet the criteria for submission and will not be accepted. Within each research area no preference is given to any of the subjects, or if applicable, any of the segments.

A. Biological and Environmental

1. Health Effects and Life Science

Research on the cellular and molecular effects of radiation and energy related chemicals to provide data needed to predict long-term health effects and research that provides fundamental information on the macromolecular structure and function of living systems.

a. Improved and innovative methods for detecting and quantitating DNA damage and repair;

b. Improved quantitation of the health and environmental effects of radon exposure;

c. More efficient and cost effective approaches to mapping and sequencing the human genome;

d. High resolution analysis of the structure and function of biological macromolecules.

2. Environmental Processes and Effects

a. Subsurface microbiology and factors affecting mobilization and immobilization of chemicals in soils and ground water systems, including new technologies to characterize microbes and the groundwater systems within which they grow;

b. Determination of the movement and fate of carbon, nutrients, and contaminants introduced along the ocean margins;

c. Development of fundamental integrated ecological studies in terrestrial systems that will contribute to understanding response functions of global and regional research activities.

3. Atmospheric and Climate Research

a. Measure and control systems for experimental research on the biological effects of CO_2 and climate variables; instrumentation to produce and measure trace materials (e.g., C_{11} isotope) for real-time studies of carbon fixation and metabolism within plants;

b. Ground based remote sensing instruments such as: Radio Acoustical Sounder (RASS) for temperature profiles, Differential Absorption Lidar (DIAL) and Raman Lidars for water vapor profiles, Doppler Wind Systems and High Resolution Interferometers Sounder (HIS) for solar and infrared spectral measurements, and other remote sensing instrument technology capable of identifying and profiling specific atmospheric constituents including aerosols.

B. Chemical Sciences

Equipment needs to augment research in specific areas of the Chemical Science include fundamental studies related to chemical reactivity, transformations, and conversion. Studies of the chemistry of fossil resources, particularly the characterization and transformation of coal, are critical to new or existing concepts of energy production and storage.

1. *Chemical Kinetics.* Dynamics and kinetics of high-temperature chemical reactions, reaction mechanisms of complex hydrocarbons, and formation of hazardous byproducts.

2. *Surface Chemistry.* Studies including the chemistry of adsorbates, surface compositions, and studies of molecules at the solid-gas interface.

3. *Separation Processes.* Organic and organometallic molecules used in separation processes, including solvent extraction.

4. *Correlation Effects.* Correlation effects which accompany multielectron transfer and excitation in laser-assisted atomic ion collisions, atomic processes in intense magnetic and electric fields.

C. Engineering

Instrumentation for use as diagnostic tools in basic or applied research on:

1. Multiphase flows, such as flows in porous media, gas-liquid flows, slurries, fluidized beds, flows including biologically active substances, e.g., bacteria and enzymes.

2. Fracture mechanics, metal fatigue, and mitigation of the effects of aging in energy-related structures.

3. Process control in advanced materials processing, such as determination of nonequilibrium states in thermal plasmas and evolution of particulates in plasma streams, tracking and identification of radicals, and the like.

D. Geosciences

Geophysics and geochemistry of rock-fluid systems emphasizing flow, interaction, and transport of fluids (oil, gas, geothermal fluids, magma, and ground water) in porous and fractured rocks of the earth's near-surface regime. Research topics include both natural processes and phenomena as well as those generated or modified by human interaction. The emphasis is on active geologic processes as they shed light on past phenomena and enhance our predictive capabilities for the future.

Basic and applied research in the geosciences funded by the Department of Energy contribute to important aspects of the Fossil, Renewable, and Nuclear Energy technologies and to Environmental Restoration and Waste Management. Of particular interest is instrumentation that will contribute to advanced training and education necessary in providing the cadre for the future.

1. *Geophysical Imaging:* Determination of geologic structure and properties of fluid-bearing reservoirs by acoustic and electromagnetic methods.

2. Geochemical Characterization: Measurement and interpretation of chemical, structural, and textural properties of rocks and minerals, including surface characterization of minerals and mineral-fluid interactions.

3. *Down-Hole Instrumentation:* Measurements of geophysical and geochemical properties under *in situ* conditions to provide information on rock properties and behavior. Includes hole-to-hole, hole-to-surface, and surface-to-hole active and passive measurements.

E. Materials Science

Equipment, apparatus, instrumentation, and facilities for controlled synthesis and processing of advanced materials including structural ceramics; structural ceramic matrix composites; polymers; photovoltaic semiconductors; structural intermetallic compounds; ceramic, polymeric, and intermetallic superconductors; magnetic materials; surfaces of controlled microstructure and microchemistry; and adhesive bonds or welds between either similar or dissimilar kinds of materials.

1. *Ceramic Fiber Synthesis.* Synthesis of controlled ceramic fiber, whisker, or powder of micron or submicron dimensions with reduced and controlled levels of impurity and foreign particulate contamination and in compliance with relevant health, environment, and safety concerns.

2. *Composition Control.* Reaction processes for the production of research laboratory quantities of controlled composition and purity materials with appropriate concern for the control of reaction temperatures, pressure, and chemical environment.

3. *Material Synthesis.* Hydrothermal and other forms of pressure-assisted reaction synthesis, biomimetic reactions, atomic vapor resonant ionization processes (to achieve very high purity), electrochemical synthesis, polymer synthesis, colloidal synthesis, ceramic precursor synthesis, cluster, and nanophase synthesis.

4. *Vapor Deposition.* Various "assisted" vapor reaction and deposition processes such as MBE, MOCBD, sputtering, etc., and including laser, plasma, microwave, particle beam, photon or other methods that may promote synthesis or process reactions that would not otherwise occur, or permit reactions to occur at lower temperatures.

5. *Bulk Processing.* Processing issues including processing material in bulk form with the objective of achieving a microstructure that gives desired properties in the bulk form. Subtopics that are included are high pressure (-GPa regime) reaction, self-propagating and self-organizing synthesis of consolidated products, hot isostatic pressing, and various "assisted" forms of consolidation including, but not necessarily limited to, RF, microwave, plasma, and various static and/or dynamic applied fields that are capable of achieving the densification of composite or multiphasic ensembles, or lowering the reacting temperature and time required to achieve full densification, and of providing preferred orientation of nonisotropic bulk materials.

6. *Fabrication and Joining.* Other appropriate topics include sheet metal fabrication and forming under multiaxial deforming forces, cross-linking and surface modification fabrication routes in polymers, welding and joining of both similar as well as dissimilar materials, e.g., joining a metal to ceramic, and near-net-shape forming and shaping processes.

F. Mechanistic Plant and Microbial Research

1. Basic Plant Sciences

Research devoted to understanding the fundamental cellular and molecular mechanisms of plant conversion of solar energy into chemical energy. This would include studies on growth and development, as well as other physiological processes that determine plant productivity as renewable resources (biomass).

2. Fermentation Microbiology

(a) Examination of the various basic biochemical processes involved in the

broad spectrum of metabolic, both anaerobic and aerobic, transformations carried out by non-medical microorganisms;

(b) Research on the physiology, biochemistry and molecular biology of both monocultures and complex consortia;

(c) Organisms occupying unique, exotic niches with the potential to be exploited in future energy-related biotechnologies.

While the equipment requested may be equally suitable and may be used for research on other energy-related topics, the need for the instrument(s) must be justified (and the application will be reviewed) in terms of its value and ability to enhance the institution's capabilities in the principal designated energy-related research area specified on the cover sheet. The instrument's utility in advancing other areas of scientific or technical research is of peripheral interest during the application's review procedure.

Participation in the URI Program is limited to U.S. universities and colleges that currently have active, ongoing DOE-funded research support (including subcontracts) totalling at least $150,000 in value in the specific research area for which the equipment is requested during the past two fiscal years (October 1, 1990 to September 30, 1992).

DOE is establishing this limitation to ensure that the instrumentation acquired with these grants will significantly expanded the research capability of institutions which have already demonstrated the capability to perform long-range energy research. The Office of University and Science Education believes that restricting eligibility to institutions which have performed $150,000 of DOE-supported research over a two-year period will limit eligibility in this grant program to those institutions which, because of their existing commitment to energy research, are best able to incorporate advanced instrumentation into their research programs. Special consideration will be given to Historically Black Colleges and Universities (HBCUs) and other traditional minority institutions which meet the institutional eligibility criteria, and have significant research capabilities in the selected research area. DOE will consider any requests for larger instruments, costing about $100,000 or more, which are required to advance research in the designated research area. Smaller research instruments (less than $100,000 each) will not be eligible for consideration in this program. General purpose computing equipment is also not eligible under this program. However, laboratory computers and associated peripherals dedicated for use directly with the instrument requested (or for use with existing research instruments in the selected area) may be considered. Computer equipment for theoretical research will be eligible under this program, but will be given secondary consideration relative to instrumentation for experimental research.

For more detailed background information about the URI solicitation, please refer to the following related documents: (1) DOE request for public comment on the URI program, June 7, 1983 (48 FR 26328), (2) October 18, 1983, DOE changes to the program (48 FR 48277); and (3) December 15, 1983, DOE program solicitation announcement (48 FR 55774). The authority for the University Research Instrumentation Program is contained in section 31 (a) and (b) of the Atomic Energy Act of 1954 (42 U.S.C. 2051) and section 209 of the Department of Energy Organization Act (42 U.S.C. 7139).

Steven W. Morrell,

Contracting Officer, Procurement & Contracts Division, Oak Ridge Field Office.

[FR Doc. 92-23740 Filed 9-29-92; 8:45 am]

BILLING CODE 6450-01-M

Federal Energy Regulatory Commission

[Docket Nos. ER92-434-001, et al.]

United Illuminating Co. et al.; Electric Rate, Small Power Production, and Interlocking Directorate Fillings

Take notice that the following filings have been made with the Commission:

1. United Illuminating Co.

[Docket No. ER92-434-001]

September 21, 1992.

Take notice that on September 17, 1992, United Illuminating Company tendered for filing its refund report in the above-referenced docket.

Comment date: October 6, 1992, in accordance with Standard Paragraph E at the end of this notice.

2. Empire District Electric Co.

[Docket No. ER91-616-001]

September 21, 1992.

Take notice that on September 14, 1992, Empire District Electric Company tendered for filing its compliance refund report in the above-referenced docket.

Comment date: October 6, 1992, in accordance with Standard Paragraph E at the end of this notice.

3. Central Hudson Gas & Electric Co.

[Docket No. ER92-608-000]

September 21, 1992.

Take notice that on September 10, 1992, Central Hudson Gas & Electric Company tendered for filing an amendment in the above-referenced docket.

Comment date: October 6, 1992, in accordance with Standard Paragraph E at the end of this notice.

4. Grayling Generating Station Limited Partnership

[Docket No. ER92-839-000]

September 21, 1992.

Take notice that on September 14, 1992, Grayling Generating Station Limited Partnership (Grayling), a Michigan limited partnership, tendered for filing, pursuant to 18 CFR 35.1 and 35.13, proposed Supplement No. 8 to Rate Schedule FERC No. 1, applicable to the sale of energy and capacity to Consumers Power Co. (Consumers) from a biomass waste wood generating facility located in Crawford County, Michigan. The facility is a qualifying small power production plant of more than 30 MW within the meaning of sections 201 and 210 of the Public Utility Regulatory Policies Act of 1978.

Supplement No. 8 makes three changes to Rate Schedule FERC No. 1. First, the not-to-exceed nameplate rating of the facility has been increased from 14 NW to 39 MW. This increase does not affect the amount of capacity sold or purchased under Rate Schedule FERC No. 1, which amount was and is a maximum of 28.17 MW. Second, the billing procedures have been modified. Originally, Grayling was required to calculate the amounts owed each month and invoice Consumers Power. When Grayling proved unable to calculate such amounts in a timely manner, the parties agreed to have Consumers Power calculate the monthly bill through its metering equipment. Third, CSS Form 0991 has been added, requiring Grayling to comply with certain federal laws, such as equal opportunity and environmental quality. Consumers Power requires inclusion of this form in all its contracts. Each change is technical in nature and does not affect rates or service.

Grayling also is requesting that the sixty-day notice period under 18 CFR 35.3 be waived and that Supplement No. 8 be accepted as effective on May 15, 1992 (for the billing and CSS Form 0991 changes) and on September 28, 1990 (for the nameplate rating change).

Copies of this filing have been served on Consumers Power Company.

Comment date: October 5, 1992, in accordance with Standard Paragraph E at the end of this notice.

5. Pennsylvania Power & Light Co.

[Docket No. ER92-700-000]

September 21, 1992.

Take notice that on August 31, 1992, Pennsylvania Power & Light Company tendered for filing supplemental information in the above-referenced docket.

Comment date: October 5, 1992, in accordance with Standard Paragraph E at the end of this notice.

6. Interstate Power Co.

[Docket No. ER91-687-000]

September 21, 1992.

Take notice that on August 24, 1992, Interstate Power Company tendered for filing revised page of the negotiated capacity agreement with Wisconsin Power & Light Company.

Comment date: October 5, 1992, in accordance with Standard Paragraph E at the end of this notice.

7. Green Mountain Power Corp.

[Docket Nos. ER92-361-000 and ER92-362-000]

September 21, 1992.

Take notice that on Augsut 18, 1992, Green Mountain Power Corporation tendered for filing an amendment in the above-referenced dockets.

Comment date: October 5, 1992, in accordance with Standard Paragraph E at the end of this notice.

8. Florida Power & Light Co.

[Docket No. ER92-841-000]

September 21, 1992.

Take notice that on September 16, 1992, Florida Power & Light Company (FPL) filed the Contract for Purchases and Sales of Scheduled Power and Energy Between Florida Power & Light Company and Utilities Commission, City of New Smyrna Beach, Florida. FPL requests an effective date of October 1, 1992.

Comment date: October 5, 1992, in accordance with Standard Paragraph E at the end of this notice.

9. Indiana & Michigan Municipal Distributors Association and City of Auburn, Indiana v. Indiana Michigan Power Co. et al.

[Docket Nos. EL88-1-000; ER88-31-002 and ER88-32-002; ER90-270-003 and ER90-271-003]

September 21, 1992.

Taken notice that on September 15, 1992, Indiana Michigan Power Company (I&M) tendered a modified compliance filing in the above-referenced dockets, in compliance with the Commission's June 3, 1992 Opinion and Order on Initial Decision. The modified compliance filing amends a prior compliance filing made by I&M on July 15, 1992 in order to reflect a correction to allocation factors related to the Rockport Plant Unit No. 1 deferrals.

Copies of the modified filing were served upon Richmond Power & Light, the Indiana Municipal Power Agency and the Indiana Utility Regulatory Commission.

Comment date: October 6, 1992, in accordance with Standard Paragraph E at the end of this notice.

10. United Illuminating Co.

[Docket No. ER92-589-001]

September 21, 1992.

Take notice that on September 4, 1992, United Illuminating Company tendered for filing its refund report in the above-referenced docket.

Comment date: October 6, 1992, in accordance with Standard Paragraph E at the end of this notice.

11. Southern Company Services, Inc.

[Docket No. ER92-826-000]

September 21, 1992.

Take notice that on September 4, 1992, Southern Company Services, Inc., acting on behalf of Alabama Power Company, Georgia Power Company, Gulf Power Company, Mississippi Power Company and Savannah Electric and Power Company (collectively referred to as "Southern Companies"), tendered for filing Amendment No. 1, dated September 3, 1992, to Service Schedule EP of the Interchange Contract between Florida Power & Light Company and Southern Companies. The Amendment extends the term and includes other modifications to Schedule EP. Southern Companies state that the modifications will have no effect on the rate or will result in a rate decrease.

Southern Companies request expedited review of the Amendment. Southern Companies also request waiver of the sixty day prior notice requirement and an immediate effective date.

Comment date: October 5, 1992, in accordance with Standard Paragraph E at the end of this notice.

12. Pacific Gas and Electric Co.

[Docket No. ER92-410-000]

September 21, 1992.

Take notice that on September 15, 1992, Pacific Gas and Electric Company (PG&E) tendered for filing an Addendum No. 2 dated August 27, 1992 to the Rate Settlement Agreement between PG&E and the Department of Water Resources of the State of California (DWR) dated March 23, 1992, previously filed with the Commission on March 27, 1992. Pursuant to the Commission Staff verbally requesting that certain components and a factor used in the calculation of the "Annual Transmission Rate Adjustment Factor" (ATRAF) in Attachment 1 to Exhibit II of the Rate Settlement Agreement either not be used or explained further as to why they are appropriate, PG&E has amended the Rate Settlement Agreement to reflect certain changes.

Copies of this filing were served upon DWR and the California Public Utilities Commission.

Comment date: October 5, 1992, in accordance with Standard Paragraph E at the end of this notice.

13. Nevada Power Co.

[Docket No. ER92-840-000]

September 21, 1992.

Take notice that on September 15, 1992, Nevada Power Company (NPC), tendered for filing a request for a waiver of § 35.14 of the Federal Energy Regulatory Commission's Regulations for all tariffed service provided by NPC to the City of Needles (Needles) under Rate Schedule FERC No. 41. The Primary purpose of the filing is to allow NPC to exclude the purchase power costs and energy of the Boulder Canyon Project Schedule B (Hoover B) power from the calculation of the fuel adjustment clause for power sold to Needless. The request asks that the waiver be for all service rendered since March 1990.

NPC states that copies of the filing were served upon Needles.

Comment date: October 5, 1992, in accordance with Standard Paragraph E at the end of this notice.

14. Western Massachusetts Electric Co.

[Docket No. ER92-458-000]

September 21, 1992.

Take notice that on September 15, 1992, Western Massachusetts Electric Company submitted for filing supplemental information of a rate schedule filed with the Commission in this Docket.

Comment date: October 5, 1992, in accordance with Standard Paragraph E at the end of this notice.

15. Gulf States Utilities Co.

[Docket No. EC92-24-000]

September 21, 1992.

Take notice that on September 14, 1992, Gulf States Utilities Company (Gulf States) filed an application seeking an order pursuant to section 203 of the

Federal Power Act authorizing the sale of two substations by Gulf States to Texaco Chemical Company (Texaco). These facilities serve Texaco's plant located at Port Neches, Texas.

Comment date: October 9, 1992, in accordance with Standard Paragraph E at the end of this notice.

16. Bangor Hydro-Electric Co.

[Docket No. ER92-697-000]

September 21, 1992.

Take notice that on September 14, 1992, Bangor Hydro-Electric Company (Bangor) tendered for filing an Amendment to Filing. The Rate Schedule included in this Amendment provides for the sale by Bangor to other utilities which enter into Service Agreements with Bangor, capacity and associated energy at negotiated rates not to exceed Bangor's cost of service.

Bangor requests that the Commission waive is notice requirement in order to allow the Rate Schedule to become effective as soon as review can be completed, in no event later than October 1, 1992.

Comment date: October 5, 1992, in accordance with Standard Paragraph E at the end of this notice.

17. Union Electric Co.

[Docket No. ER92-842-000]

September 21, 1992.

Take notice that on September 16, 1992, Union Electric Company (UE) tendered for filing (1) a Wholesale Power Service Agreement between UE and the Central Illinois Public Service Company (CIPS), (2) An amendment to the CIPS—UE Facility Use Agreement, and (3) an amendment to the Interconnection Agreement between CIPS, Illinois Power Company (IP), and UE. These three Agreements (collectively Agreements) are being filed in connection with a sales agreement whereby UE will sell to CIPS property used to provide service to UE's northern Illinois retail business, as well as certain related facilities located in Illinois. UE proposes as an effective date for the Agreements the day following the "closing date" as defined in the sales agreement.

Under the Wholesale Power Agreement, CIPS has agreed to purchase certain quantities of power and energy from UE, in accordance with the terms and conditions contained therein. The Wholesale Agreement shall terminate three years from its effective date.

The Amendment to the Facility Use Agreement reflects the change of ownership in facilities and calls for payments to compensate UE for the use of certain facilities.

The Amendment to the Interconnection Agreement reflects the change of ownership of facilities and the new interconnection points.

UE requests waiver to the extent necessary of the Commission's notice requirements so that the Agreements may take effect as of the date requested.

A copy of the filing was served upon Central Illinois Public Service Company, Illinois Power Company, the Iowa Utilities Board, the Missouri Public Service Commission, and the Illinois Commerce Commission.

Comment date: October 5, 1992, in accordance with Standard Paragraph E at the end of this notice.

18. PacifiCorp

[Docket No. ER92-835-000]

September 21, 1992.

Take notice that on September 15, 1992, PacifiCorp tendered for filing in accordance with 18 CFR part 35 of the Commission's Rules of and Regulations. the Red Butte Interconnection Agreement (Agreement) between PacifiCorp and Utah Associated Municipal Power Systems (UAMPS) dated December 21, 1990.

The Agreement provides for reciprocal emergency transmission services under certain conditions commencing with the energization of UAMPS' Central—St. George 138 kV transmission line.

Copies of this filing were supplied to UAMPS, the Public Utility Commission of Oregon and the Utah Public Service Commission.

Comment date: October 5, 1992, in accordance with Standard Paragraph E at the end of this notice.

19. Consumers Power Co.

[Docket No. ES92-59-000]

September 22, 1992.

Take notice that on September 15, 1992, Consumers Power Company filed an application with the Federal Energy Regulatory Commission under section 204 of the Federal Power Act requesting authorization to issue not more than $900 million of secured and/or unsecured short-term and/or evidence of indebtedness, including but not limited to notes, drafts, debentures and commercial paper on or before December 31, 1994, with a final maturity date not more than 364 days from the date of issue.

Comment date: October 14, 1992, in accordance with Standard Paragraph E at the end of this notice.

20. O.L.S. Energy-Agnews, Inc.

[Docket No. QF85-9-002]

September 22, 1992.

On September 4, 1992, O.L.S. Energy-Agnews, Inc. (Applicant), filed a petition with the Federal Energy Regulatory Commission for a temporary waiver of the operating standard. No determination has been made that the submittal constitutes a complete filing.

The 28 NW topping-cycle cogeneration facility is located in San Jose, California. The facility consists of two combustion turbine generators and associated heat recovery boilers, and an extraction/condensing steam turbine generator (STG). Steam extracted from the STG is used by the Agnews Department of Developmental Services of the State of California for space and water heating purposes. The facility uses natural gas as its primary energy source.

Applicant requests temporary waiver of the 5% operating standard for the period between October 19, 1990, and February 4, 1991. Applicant states that the temporary waiver is requested due to the limited operation of the facility during the start-up and testing period prior to the start of commercial operation of the facility.

Comment date: October 30, 1992, in accordance with Standard Paragraph E at the end of this notice.

Standard Paragraphs

E. Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214). All such motions or protests should be filed on or before the comment date. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Secretary.

BILLING CODE 6717-01-M

[Project No. 10371-003, Washington]

CPS Products, Inc.; Availability of Environmental Assessment

September 23, 1992.

In accordance with the National Environmental Policy Act of 1969 and the Federal Energy Regulatory Commission's (Commission's) regulations, 18 CFR part 380 (Order No. 486, 52 FR 47897), the Office of Hydropower Licensing has reviewed the application for major license for the proposed Bear Creek Project, to be located on Bear Creek in Skagit County, near Concrete, Washington, and has prepared an Environmental Assessment (EA) for the proposed project. In the EA, the Commission's staff has analyzed the project and has concluded that approval of the proposed project, with appropriate mitigative measures, would not constitute a major federal action significantly affecting the quality of the human environment.

Copies of the EA are available for review in the Public Reference Branch, room 3308, of the Commission's offices at 941 North Capitol Street NE., Washington, DC 20426.

Lois D. Cashell,

Secretary.

BILLING CODE 6717-01-M

[Docket No. JD92-09645T, Texas-73]

State of Texas; NGPA Notice of Determination by Jurisdictional Agency Denying Designation of Tight Formation

September 23, 1992.

Take notice that on September 21, 1992, the Railroad Commission of Texas (Texas) submitted the above-referenced notice of determination pursuant to § 271.703(c)(3) of the Commission's regulations, that the Middle Wilcox Sand Formation in a portion of Zapata County, Texas, does not qualify as a tight formation under section 107(b) of the Natural Gas Policy Act of 1978. The notice of determination covers approximately 640 acres within Railroad Commission District 4 and consists of portions of the following surveys:

Survey	Portion	Area
J. Santos Gutierrez A-32	20	NE/4
C & M RR A-130	187	NW/2
A.J. Nolen A-534	616	NW/16
Maria Josefa Guerra A-31.	19	NW/16
Isabel Maria Sanchez A-81.	21	S/2 of NE/4
G C & S F RR A-296	599	SW/10 SE/4
Surveying vacancy between Porcion 21 (A-81) and Porcion 599 (A-296).		

The notice of determination also contains Texas' findings that the referenced portion of the Middle Wilcox Sand Formation does not meet the requirements of the Commission's regulations set forth in 18 CFR part 271.

The application for determination is available for inspection, except for material which is confidential under 18 CFR 275.206, at the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426. Persons objecting to the determination may file a protest, in accordance with 18 CFR 275.203 and 275.204, within 20 days after the date this notice is issued by the Commission.

Lois D. Cashell,

Secretary.

BILLING CODE 6717-01-M

[Docket No. JD92-09646T Texas-74]

State of Texas; NGPA Notice of Determination by Jurisdictional Agency Designating Tight Formation

September 24, 1992.

Take notice that on September 21, 1992, the Railroad Commission of Texas (Texas) submitted the above-referenced notice of determination pursuant to § 271.703(c)(3) of the Commission's regulations, that the Travis Peak Formation in portions of Freestone and Limestone Counties, Texas, qualifies as a tight formation under section 107(b) of the Natural Gas Policy Act of 1978. The designated area, consisting of approximately 4,547 acres, is described in the attached appendix.

The notice of determination also contains Texas' findings that the referenced portion of the Travis Peak Formation meets the requirements of the Commission's regulations set forth in 18 CFR part 271.

The application for determination is available for inspection, except for material which is confidential under 18 CFR 275.206, at the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington DC 20426. Persons objecting to the determination may file a protest, in accordance with 18 CFR 275.203 and 275.204, within 20 days after the date this notice is issued by the Commission.

Lois D. Cashell,

Secretary.

Appendix

The recommended Travis Peak Formation is located in Freestone and Limestone Counties, Texas, within Railroad Commission District 5. The area of application covers approximately 4,547 acres and consists of all or portions of the following surveys:

Survey name	Abstract No.	County

BILLING CODE 6717-01-M

[Docket No. JD92-09647T]

State of Texas; NGPA Notice of Determination by Jurisdictional Agency Designating Tight Formation

September 24, 1992.

Take notice that on September 21, 1992, the Railroad Commission of Texas (Texas) submitted the above-referenced notice of determination pursuant to § 271.703(c)(3) of the Commission's regulations, that the Edwards Limestone Formation in a portion of LaSalle County, Texas, qualifies as a tight formation under section 107(b) of the Natural Gas Policy Act of 1978. The designated area is described in the attached appendix.

The notice of determination also contains Texas' findings that the referenced portion of the Edwards Limestone Formation meets the requirements of the Commission's regulations set forth in 18 CFR part 271.

The application for determination is available for inspection, except for material which is confidential under 18 CFR 275.206, at the Federal Energy Regulatory Commission, 825 North

Capitol Street NE., Washington, DC 20426. Persons objecting to the determination may file a protest, in accordance with 18 CFR 275.203 and 275.204, within 20 days after the date of this notice is issued by the Commission.

Lois D. Cashell,

Secretary.

Appendix

The recommended Edwards Limestone Formation is located in LaSalle County, Texas, within Railroad Commission District 1.

BILLING CODE 6717-01-M

[Docket Nos. CP92-698-000, et al.]

Trunkline Gas Co., et al.; Natural Gas Certificate Filings

Take notice that the following filings have been made with the Commission:

1. Trunkline Gas Co.

[Docket No. CP92-698-000]

September 21, 1992.

Take notice that on September 11, 1992, Trunkline Gas Company (Trunkline), P.O. Box 1642, Houston, Texas 77251-1642, filed in Docket No. CP92-698-000 an application pursuant to Section 7(b) of the Natural Gas Act for an order granting permission and approval to abandon transportation services provided to Panhandle Eastern Pipe Line Company (PEPL) under Trunkline's Rate Schedules T-73 and T-88, effective November 1, 1992, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Trunkline states that under Rate Schedule T-73, Trunkline provides firm transportation service of up to 13,200 Mcf of natural gas per day (Mcfd) for PEPL from a point of receipt in East Cameron Block 359, offshore Louisiana. Trunkline further states that it then transports the gas to the East Cameron Block 338 interconnection with Stingray Pipeline Company (Stingray). Trunkline says that it uses its capacity entitlement in Stingray to transport the gas to an interconnection between Stingray and High Island Offshore System (HIOS) in High Island Block A-330 for Trunkline's account. Trunkline indicates that it utilizes its entitlement capacities in HIOS and U-T Offshore System (U-TOS) to transport the gas onshore where Natural Gas Pipeline Company of America (NGPL) receives the gas and transports it to Trunkline's facilities in Cameron Parish, Louisiana. Trunkline then transports and redelivers the gas to PEPL at the point of interconnection between PEPL and Trunkline located in Tuscola, Douglas County, Illinois (Tuscola Interconnect).

Trunkline states that under Rate Schedule T-88, Trunkline provides firm transportation service of up to 6,000 Mcfd for PEPL from a point of receipt in High Island Block A-343, offshore Texas. Trunkline says that it utilizes its capacity entitlements in HIOS, U-TOS and NGPL to transport the gas to Trunkline's onshore facilities. Trunkline states that it then transports and redelivers the gas to PEPL at the Tuscola Interconnect.

Trunkline states that PEPL and Trunkline have agreed to terminate Rate Schedules T-73 and T-88 effective November 1, 1992.

Comment date: October 13, 1992, in accordance with Standard Paragraph F at the end of this notice.

2. Columbia Gas Transmission Corp.

[Docket No. CP92-703-000]

September 22, 1992

Take notice that on September 14, 1992, Columbia Gas Transmission Corporation (Columbia), 1700 MacCorkle Avenue, SE., Charleston, West Virginia 25314, filed in Docket No. CP92-703-000 a request pursuant to §§ 157.205 and 157.211 of the Commission's Regulations under the Natural Gas Act for authorization to construct and operate a new point of delivery for sales service to an existing wholesale customer pursuant to its blanket certificate issued in Docket No. CP83-76-000 pursuant to section 7 of the Natural Gas Act, all as more fully set forth in the request which is on file with the Commission and open for public inspection.

Columbia requests authorization to construct and operate the facilities necessary to provide a new point of delivery for sales service to Washington Gas Light company (Washington Gas) in Prince William County, Virginia; to serve a new residential development, as follows:

Wholesale customer	Estimated design day delivery (Dth)	Estimated annual delivery (Dth)	Estimated construction cost ($)
Washington Gas Light Company	1,000	365,000	82,100

Columbia states that the additional point of delivery has been requested by Columbia's existing wholesale customer to serve a new residential development (Lake Manassas). Columbia indicates that the quantities to be provided through the new delivery point are within Columbia's currently authorized level of sales service and will be within existing peak day entitlements of Washington Gas. Columbia states that the sales to be made through the proposed new point of delivery will be under Columbia's currently effective service agreement with Washington Gas under Rate Schedule CDS. Finally Columbia indicates that Washington Gas has agreed to reimburse Columbia for all cost exceeding $45,000 plus any gross-up for tax purposes.

Comment date: November 6, 1992, in accordance with Standard Paragraph G at the end of this notice.

3. Northern Natural Gas Com., Division of Enron Corp.

[Docket No. CP92-710-000]

September 22, 1992.

Take notice that on September 17, 1992, Northern Natural Gas Company, Division of Enron Corp. (Northern), 1400 Smith Street, P.O. Box 1188, Houston, Texas 77251-1188, filed in Docket No. CP92-710-000 a request pursuant to § 157.205 of the Commission's Regulations under the Natural Gas Act (18 CFR 157.205) for authorization to

operate and maintain existing delivery facilities, originally installed to serve single end-users through local distribution companies (LDCs), to serve multiple end-users, under Northern's blanket certificate issued in Docket No. CP82-401-000, pursuant to section 7 of the Natural Gas Act, all as more fully set forth in the request which is on file with the Commission and open to public inspection.

Northern states that it originally installed 90 farm taps to provide service to single end-users through local distribution companies. Almost all of these facilities were constructed and certified in the 1960's and 1970's. However, Northern states, it was recently brought to Northern's attention that certain LDC's and landowners installed additional distribution lines and meters downstream of Northern's farm tap facilities, to provide service to customers other than those Northern had installed the farm taps to serve. Northern conducted an investigation to identify the locations on its system where facilities had been installed by others.

To be in compliance with the Regulations, Northern initially filed an application on February 10, 1992, at Docket No. CP92-342-000, pursuant to its blanket certificate and § 157.205 and 157.212 of the Regulations for authorization to operate and maintain 90 existing delivery facilities to serve multiple end-users. Northern states that because of an adverse intervention by Minnegasco, Inc., a Division of Arkla, (Minnegasco), its application was treated as a section 7 by the Commission. Northern further states that because Minnegasco's intervention has been withdrawn, Northern cannot justify the $39,440 filing fee, and therefore Northern is withdrawing its application in Docket No. CP92-342-000, and filing the instant application.

Northern also states that volumes delivered to the existing delivery points will not impact Northern's peak day or annual deliveries.

Comment date: November 6, 1992, in accordance with Standard Paragraph G at the end of this notice.

Standard Paragraphs

F. Any person desiring to be heard or make any protest with reference to said file with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determing the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to jurisdiction conferred upon the Federal Energy Regulatory Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission or its designee on this filing if no motion to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a motion for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for the applicant to appear or be represented at the hearing.

G. Any person or the Commission's staff may, within 45 days after the issuance of the instant notice by the Commission, file pursuant to Rule 214 of the Commission's Procedural Rules (18 CFR 385.214) a motion to intervene or notice of intervention and pursuant to § 157.205 of the Regulations under the Natural Gas Act (18 CFR 157.205) a protest to the request. If no protest is filed within the time allowed therefore, the proposed activity shall be deemed to be authorized effective the day after the time allowed for filing a protest. If a protest is filed and not withdrawn within 30 days after the time allowed for filing a protest, the instant request shall be treated as an application for authorization pursuant to section 7 of the Natural Gas Act.

Lois D. Cashell,

Secretary.

Arkla Energy Resources, a division of Arkla, Inc.; Filing

September 23, 1992.

Take notice that on September 18, 1992, Arkla Energy Resources, a division of Arkla, Inc. ("AER") tendered for filing the following tariff sheets to its FERC Gas Tariff:

Second Revised Vol. No. 1

Second Subst Fifth Revised Sheet No. 11
Second Subst Fifth Revised Sheet No. 16
Substitute Seventh Revised Sheet No. 11
Substitute Seventh Revised Sheet No. 16
Substitute Eighth Revised Sheet No. 11
Substitute Eighth Revised Sheet No. 16
Second Subst Eleventh Revised Sheet No. 11
Second Subst Eleventh Revised Sheet No. 16
Second Subst Twelfth Revised Sheet No. 11
Second Subst Twelfth Revised Sheet No. 16
Second Subst Thirteenth Revised Sheet No. 11
Substitute Thirteenth Revised Sheet No. 16
Substitute Fifteenth Revised Sheet No. 11
Substitute Fifteenth Revised Sheet No. 16
Original Sheet No. 18A
Original Sheet No. 18B
Original Sheet No. 18C
Original Sheet No. 18D
Original Sheet No. 46A
Original Sheet No. 46B
Original Sheet No. 46C
Original Sheet No. 46D
Original Sheet No. 46E
Original Sheet No. 46F
Original Sheet No. 46G
Original Sheet No. 46H
Original Sheet No. 46I
Original Sheet No. 46J
Original Sheet No. 46K
Original Sheet No. 46L
Original Sheet No. 46M
Original Sheet No. 46N
Original Sheet No. 46O
Original Sheet No. 46P
Original Sheet No. 46Q
Original Sheet No. 46R
Original Sheet No. 46S
Original Sheet No. 46T
Original Sheet No. 46U
Original Sheet No. 46V
Original Sheet No. 46W
Original Sheet No. 46X
Original Sheet No. 46Y
Original Sheet No. 46Z
Original Sheet No. 46AA
Original Sheet No. 46BB
Original Sheet No. 46CC

First Revised Vol. No. 1-A

Third Substitute Third Revised Sheet No. 5
Substitute Fourth Revised Sheet No. 5
Substitute Fifth Revised Sheet No. 5
First Revised Sheet No. 6
First Revised Sheet No. 21
Original Sheet No. 21A
First Revised Sheet No. 33
Original Sheet No. 55A
Original Sheet No. 55B
Original Sheet No. 55C
First Revised Sheet No. 56

AER states that it is filing the above tariff sheets to implement the terms of the Settlement approved in the Commission's order of August 6, 1992. Arkla Energy Resources, a division of Arkla, Inc., 60 FERC ¶ 61,160.

Any person desiring to protest said filing should file a protest with the

Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Rule 211 of the Commission's Rules of Practice and Procedure 18 CFR 385.211. All such protests should be filed on or before September 30, 1992. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Secretary.

BILLING CODE 6717-01-M#

[Docket No. RP92-211-001]

El Paso Natural Gas Co.; Compliance Filing

September 23, 1992.

Take notice that on September 18, 1992, El Paso Natural Gas Company ("El Paso") filed pursuant to part 154 of the Federal Energy Regulatory Commission ("Commission") Regulations Under the Natural Gas Act and in compliance with the directive of the Commission in its order issued August 31, 1992, Substitute Third Revised Sheet No. 251 to its FERC Gas Tariff, Second Revised Volume No. 1, to be effective September 1, 1992.

El Paso states that by order issued August 31, 1992, the Commission accepted, to become effective September 1, 1992, certain tariff sheets providing for the elimination of the maximum rate under Rate Schedule IS-1, applicable to interruptible sales, and in place thereof establish a negotiated gas cost rate. Ordering paragraph (B) of the August 31, 1992 order required El Paso to file tariff language to comply with the reporting requirements and affiliate transaction requirements of part 284 of the Commission's Regulations and Order No. 497 with respect to its IS-1 sales.

Accordingly, El Paso submitted Substitute Third Revised Sheet No. 251 expressly including in its tariff that El Paso shall comply with the provisions against undue discrimination contemplated by the reporting requirements of part 284 of the Commission's Regulations, by Order No. 497 and the Commission's orders issued November 29, 1988 and April 28, 1989 at Docket Nos. CP88-332-000 and CP88-332-001, respectively, to protect against undue preference to affiliates or to El Paso's own merchant service.

El Paso requested that the tendered tariff sheet be accepted for filing and permitted to become effective September 1, 1992, the same date as authorized by the Commission's order issued August 31, 1992 at Docket No. RP92-211-000.

Copies of the filing were served upon all parties of record in Docket No. RP92-211-000 and interested state regulatory commissions.

El Paso states that copies of the filing were served upon all parties of record in Docket No. RP92-211-000 and interested state regulatory commissions.

Any person desiring to protest said filing should file a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Rule 211 of the Commission's Rules of Practice and Procedure 18 CFR 385.211. All such protests should be filed on or before September 30, 1992. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Secretary.

BILLING CODE 6717-01-M

[Docket No. RS92-36-000]

Gateway Pipeline Co.; Conference

September 24, 1992.

Take notice that on Tuesday, October 6, 1992, at 10 a.m., a conference will be convened in the above-captioned docket to discuss Gateway Pipeline Company's summary of its proposed plan for implementation of Order No. 636.

The conference will be held in a hearing or conference room of the Federal Energy Regulatory Commission, 810 First Street NE., Washington, DC 20426. All interested parties are invited to attend. Attendance at the conference, however, will not confer parties status. For additional information, interested persons can call Ingrid Olson at (202) 208-0691 or William C. Lansinger, Jr., at (202) 208-2082.

BILLING CODE 6717-01-M

[Docket No. QF88-269-002]

Kamine/Besicorp Syracuse, L.P.; Amendment to Filing

September 24, 1992.

On September 22, 1992, Kamine/Besicorp Syracuse, L.P. tendered for filing a supplement to its filing in this docket.

The supplement provides additional information pertaining to the ownership structure of the facility. No determination has been made that the submittal constitutes a complete filing.

Any person desiring to be heard or objecting to the granting of qualifying status should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426, in accordance with rules 211 and 214 of the Commission's Rules of Practice and Procedure. All such motions or protests should be filed by October 7, 1992, and must be served on the Applicant. Protests will be considered by the Commission in determining the appropriate action to be taken but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

BILLING CODE 6717-01-M

[Docket No. TM93-1-99-000]

Kern River Gas Transmission Co.; Filing

September 24, 1992.

Take notice that on September 22, 1992, Kern River Gas Transmission Company ("Kern River"), submitted for filing ten copies each of 1st Revised 2nd Substitute Original Sheet No. 5 and 1st Revised Substitute Original No. 6 to Original Volume No. 1 of its FERC Gas Tariff to be effective October 1, 1992.

Kern River states that the purpose of the filing is to reflect the new Annual Charge Adjustment (ACA). The New ACA rate is $0.0023 compared to $0.0024, a decrease of $0.0001.

Kern River states that copies of the filing have been mailed to all affected customers and state regulatory commissions.

Any person desiring to be heard or to protest such filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20425, in accordance with rules 211 and 214 of the Commission's Rules of Practice and Procedures. All such petitions or protests should be filed on or before October 1, 1992. Protests will be considered by the Commission in determining appropriate action but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene; provided, however, that any person who had previously filed a petition to intervene in this proceeding is not required to file a further petition. Copies of this filing are on file with the Commission and are available for public inspection.

BILLING CODE 6717-01-M

[Docket No. TM93-1-53-001]

K N Energy, Inc., Tariff Filing

September 23, 1992.

On September 10, 1992, K N Energy, Inc. ("K N") tendered for filing the following revised tariff sheet:

First Revised Volume No. 1-A

Fifth Revised Sheet No. 4

as part of its Annual Charge Adjustment (ACA) filing. Certain rates contained therein were inadvertently misstated. On September 10, 1992 K N filed Substitute Fifth Revised Sheet No. 4 to correct this error.

Any person desiring to protest said filing should file a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Rule 211 of the Commission's Rule of Practice and Procedure 18 CFR 385.211. All such protests should be filed on or before September 30, 1992. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Copies of this filing are on file with the Commission and are available for public inspection.

[Docket Nos. RP92-1-010 and RP91-224-006]

Northern Natural Gas Co.; Proposed Changes in FERC Gas Tariff

September 23, 1992.

Take notice that Northern Natural Gas Company (Northern) on September 21, 1992, tendered for filing to become part of Northern's F.E.R.C. Gas Tariff Third Revised Volume 1, the following tariff sheets, proposed to be effective November 1, 1991.

Substitute Fourth Revised Sheet No. 52F.14
Substitute Second Revised Sheet No. 52F.14a
Substitute Original Sheet No. 52F.14b
Substitute Fourth Revised Sheet No. 52F.15
Substitute Sixth Revised Sheet No. 56A

Northern states that such tariff sheets are being submitted in compliance with the Commission's Letter Order dated August 25, 1992, in Docket Nos. RP92-1-007 and RP91-224-003, to clarify the tariff provisions regarding processing.

Northern further states that copies of the filing have been mailed to each of its customers and interested state commissions.

Any person desiring to protest said filing should file a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426, in accordance with Rule 211 of the Commission's Rules of Practice and Procedure 18 CFR 385.211. All such protests should be filed on or before September 30, 1992. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Copies of this filing are on file with the Commission and are available for public inspection.

BILLING CODE 6717-01-M

Southeastern Power Administration

Intent To Select Financial Sponsor and Intent To Formulate Power Marketing Policy

AGENCY: Southeastern Power Administration, Department of Energy.

ACTION: Notice.

SUMMARY: Notice of intent to select a financial sponsor for the proposed upgrade of the Wolf Creek Hydropower Project, Russell County, Kentucky, and Notice of Intent to Formulate a Power Marketing Policy to market additional capacity from Wolf Creek Project upgrade.

DATES: All submissions or requests should be made as soon as possible but not later than November 30, 1992.

ADDRESSES: Submissions Concerning the Proposed Marketing Policy: Comments/recommendations pertaining to the proposed marketing policy should be sent to John A. McAllister, Jr., Administrator, Southeastern Power Administration, Samuel Elbert Building, Elberton, Georgia 30635, (706) 283–9911.

SUBMISSIONS BY A PROPOSED SPONSOR: Potential sponsors should send a copy of the applications and/or proposals to both the Administrator of Southeastern Power Administration and the Nashville District of the Corps of Engineers at the addresses shown.

FOR FURTHER INFORMATION ABOUT THE PROPOSED PROJECT, CONTACT: CEORNEP–P, Sue Ferguson, Technical Manager, Nashville District Corps of Engineers, P.O. Box 1070, U.S. Courthouse 801 Broadway, Nashville, Tennessee 37202–1070, (615) 736–7191.

FOR FURTHER INFORMATION ABOUT THE PROPOSED MARKETING OF THE POWER FROM THE PROPOSED PROJECT, CONTACT: Leon Jourolmon, Director, Power Marketing Division, Southeastern Power Administration, Samuel Elbert Building, Elberton, Georgia 30635, (706) 283–9911.

SUPPLEMENTARY INFORMATION: 1. Wolf Creek Dam and Lake Cumberland constitute a significant portion of the Cumberland River Reservoir System. The project, authorized by the Flood Control Acts of 1938 and 1946, is operated to serve flood control, hydropower, recreation, fish and wildlife and water quality needs. Located at River Mile 460.9, Wolf Creek Dam controls drainage from almost 5,800 square miles. About 2.1 million acre-feet of Lake Cumberland storage is reserved for power production. The power plant contains six units brought online between 1951 and 1952. They have a total nameplate capacity of 270 megawatts (310 MW maximum peaking capacity). Average annual generation at Wolf Creek is 906 Gigawatt-hours, produced at a plant factor of 38 percent.

2. In the mid-1980's the Corps of Engineers investigated the economic and environmental soundness of upgrading the Wolf Creek powerplant. The resulting plan included replacing key electrical and mechanical components of the existing units to improve generating capacity and efficiency. These improvements would allow the plant to be operated more as a peaking plant. The benefits of the project would be derived from shifting the current energy production from off-peak to peak hours, where it has a higher value. No new energy would be produced. The upgrade plan has the potential to increase capacity between 80 MW and 110 MW and could cost roughly $40 million to $65 million (1992 prices).

3. The Wolf Creek Project is connected to the transmission systems of the Tennessee Valley Authority and East Kentucky Power Cooperative. Marketing of the additional capacity from this upgrade would have to be made over TVA's or East Kentucky's transmission system. Arrangements are in place whereby TVA will either buy or wheel to customers on the periphery of its systems, existing power from the project; however, transmission of additional capacity may have to be negotiated.

4. The present Federal policy set forth in the Water Resources Development Act of 1986 (Pub. L. 99–662) with regard to water resource projects is to encourage each agency to negotiate reasonable private financing for the development of approved project purposes. A sponsor is solicited to fund the construction of the upgrade of the Wolf Creek Hydropower Project and to pay the annual operation, maintenance, and major replacement costs and administrative costs associated with the proposed upgrade. The sponsor may also be expected to pay all the costs of preliminary studies required to be conducted by the Corps of Engineers before project construction can begin. These studies, include, among other things, the environmental, engineering and economic feasibility of the project. The project will be Federally owned. In return for providing the funding, the sponsor may receive an allocation of capacity from the proposed project upgrade, or other suitable compensation.

5. The Corps of Engineers and Southeastern Power Administration, jointly, intend to select the private sponsor to provide the financing for the planning, design and construction of the proposed Wolf Creek Hydropower Project upgrade, based on the proposals to be submitted pursuant to this notice.

6. Criteria to be utilized in the sponsor selection process will include but not be limited to:

—The sponsor must recognize that preference in the sale of power is given to public bodies and cooperatives as described in section 5 of the 1944 Flood Control Act, as amended.

—The sponsor must demonstrate the capability to finance the upgrade activities in accordance with requirements to be established by the Corps of Engineers and Southeastern Power Administration.

—The sponsor will be the entity whose proposal would result in provision of power at the least possible rate consistent with sound business principles.

7. The Corps of Engineers' and Southeastern Power Administration's selection process involves this public request for proposals and/or comments. Upon receipt of any response, the Corps of Engineers and Southeastern Power Administration will consider such comments and proposals and make final selection of the sponsor. All interested parties will be notified of the final selection.

8. If the proposal submitted involves an allocation of capacity from the Wolf Creek Project upgrade, a power marketing policy to cover the disposition of capacity from this upgrade will be required. Pursuant to Procedure for Public Participation in the Formulation of Marketing Policy published in the **Federal Register** of July 6, 1978, 43 FR 29186, Southeastern intends to develop a written marketing policy for future disposition of capacity from the proposed upgrade of the Wolf Creek Hydropower Project. The policy will address to the extent feasible those policy elements necessary to carry out the provisions of section 5 of the Flood Control Act of 1944, 16 U.S.C. 825s. The proposed policy, however, would be only for any increased capacity which would result from the upgrade of the Wolf Creek Project and does not include any power currently marketed under the existing marketing policy for the Cumberland system of projects.

A copy of the current power marketing policy for the Cumberland System of Projects, published in the **Federal Register** on March 16, 1983, (48 FR 11148), of which the Wolf Creek Project is a part, may be obtained from the Southeastern Power Administration at the address shown above.

Proposals and recommendations for consideration in formulating the proposed written marketing policy, as well as for proposals to become a sponsor of the project upgrade, are solicited as are requests for further information or consultation.

Issued in Elberton, Georgia, September 17, 1992.

John A. McAllister, Jr.,

Administrator.

BILLING CODE 6450-01-M

ENVIRONMENTAL PROTECTION AGENCY

[FRL-4514-3]

Approval of Modification of Prevention of Significant Air Quality Deterioration (PSD) Permit to CertainTeed Corporation (EPA Project Number SJ 80-02)

AGENCY: Environmental Protection Agency (EPA), Region 9.

ACTION: Notice.

SUMMARY: Notice is hereby given that on September 14, 1992, the Environmental Protection Agency issued a modified PSD permit under EPA's federal regulations 40 CFR 52.21 to the applicant named above. The modified PSD permit grants approval to CertainTeed to increase glass production from the glass melting furnace at their fiberglass manufacturing facility from 240 to 260 metric tons per day. Permitted emission limits are unchanged. The permit is subject to certain conditions, including an allowable emission rate as follows:

Source	Pollutants	Maximum emissions
Dry ESP Outlet	Particulate	8.4 lbs/hr 0.1 gr/scf.
C-11 Wet ESP Outlets (Combined total)	Particulate	11.8 lbs/hr 0.1 gr/scf.
C-12 Wet ESP Outlet	Particulate	2.6 lbs/hr 0.1 gr/scf.
Final Stack	Particulate	22.8 lbs/hr 0.1 gr/scf
	Opacity	20 percent.
	Hydrocarbons	18.0 lbs/hr.
	Nitrogen Oxides [1]	
	Sulfur Dioxide	54.0 lb/hr (oil-fired) 24.3 lb/hr (gas-fired) 24.3 lb/hr (gas-fired).

[1] Nitrogen Oxides: 40 lbs/hr (oil-fired, maximum design capacity) 55.9 lbs/hr (gas-fired, maximum design capacity)

FOR FURTHER INFORMATION CONTACT: Copies of the permit modification are available for public inspection upon request; address request to: Linda Barajas, (A-5-1), U.S. Environmental Protection Agency, Region 9, 75 Hawthorne Street, San Francisco, California 94105, (415) 744-1244.

SUPPLEMENTARY INFORMATION: The modified PSD permit does not change BACT requirements for this project.

DATE: The PSD permit is reviewable under section 307(b)(1) of the Clean Air Act only in the Ninth Circuit Court of Appeals. A petition for review must be filed within 60 days of the date of this notice.

Dated: September 21, 1992.

David P. Howekamp,

Director, Air and Toxics Division, Region 9.

BILLING CODE 6560-50-M

Public Water System Supervision Program Revision for the State of Delaware

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: Notice is hereby given in accordance with the provisions of Section 1413 of the Safe Drinking Water Act as amended, 42 U.S.C. 300f et seq., and 40 CFR 142.10, the National Primary Drinking Water Regulations, that the State of Delaware has revised their approved State Public Water System Supervision Primary Program. Delaware has adopted drinking water regulations for filtration, disinfection, turbidity, giardia lamblia, viruses, legionella, and heterotrophic bacteria that corresponds to the National Primary Drinking Water Regulations for filtration, disinfection, turbidity, giardia lamblia, viruses, legionella, and heterotrophic bacteria promulgated by EPA on June 29, 1989 (54 FR 27486); and total coliforms (including fecal coliforms and E. Coli) that corresponds to the National Primary Drinking Water Regulations for total coliforms (including fecal coliforms and E. Coli) promulgated by EPA on June 29, 1989 (54 FR 27544). EPA has determined that these State program revisions are no less stringent than the corresponding Federal regulations. Therefore, EPA has tentatively decided to approve these State program revisions.

All interested parties are invited to request a public hearing. A request for a public hearing must be submitted by October 30, 1992 to the Regional Administrator at the address shown below. Frivolous or insubstantial requests for a hearing may be denied by the Regional Administrator. However, if a substantial request for a public request is made by October 30, 1992, a public hearing will be held. If no timely and appropriate request for a hearing is received and the Regional Administrator does not elect to hold a hearing on his own motion, this determination shall become effective on October 30, 1992.

A request for a public hearing shall include the following:

(1) The name, address, and telephone number of the individual, organization, or other entity requesting a hearing.

(2) A brief statement of the requesting person's interest in the Regional Administrator's determination and of information that the requesting person intends to submit at such a hearing.

(3) The signature of the individual making the request; or, if the request is made on behalf of an organization or other entity, the signature of a responsible official of the organization or other entity.

ADDRESSES: All documents relating to this determination are available for inspection between the hours of 8 a.m. and 4:30 p.m., Monday through Friday, at the following offices:

- Regional Administrator, U.S. Environmental Protection Agency, Region 3, 841 Chestnut Building, Philadelphia, Pennsylvania 19107.
- Delaware Division of Public Health, Department of Health and Social Services, P.O. Box 637, Dover, Delaware 19901.

FOR FURTHER INFORMATION CONTACT: Ghassan M. Khaled, U.S. EPA, Region 3, Drinking Water Section (3WM41), at the Philadelphia address given above; telephone (215) 597-0609.

Dated: September 21, 1992.

Edwin B. Erickson,

Regional Administrator, EPA Region 3.

BILLING CODE 6560-30-M

[FRL-4515-5]

Public Water System Supervision Program Revision for the State of West Virginia

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: Notice is hereby given in accordance with the provisions of Section 1413 of the Safe Drinking Water Act as amended, 42 U.S.C. 300f et seq., and 40 CFR 142.10, the National Primary Drinking Water Regulations, that the State of West Virginia has revised their approved State Public Water System Supervision Primacy Program. West Virginia has adopted drinking water regulations for filtration, disinfection, turbidity, giardia lamblia, viruses, legionella, and heterotrophic bacteria that corresponds to the National Primary Drinking Water Regulations for filtration, disinfection, turbidity, giardia lambia, viruses, legionella, and heterotrophic bacteria promulgated by EPA on June 29, 1989 (54 FR 27486); and total coliforms (including fecal coliforms and E. Coli) that corresponds to the National Primary Drinking Water Regulations for total coliforms (including fecal coliforms and E. Coli) promulgated by EPA on June 29, 1989 (54 FR 27544). EPA has determined that these State program revisions are no less stringent than the corresponding Federal regulations. Therefore, EPA has tentatively decided to approve these State program revisions.

All interested parties are invited to request a public hearing. A request for a public hearing must be submitted by October 30, 1992 to the Regional Administrator at the address shown below. Frivolous or insubstantial requests for a hearing may be denied by the Regional Administrator. However, if a substantial request for a public request is made by October 30, 1992, a public hearing will be held. If no timely and appropriate request for a hearing is received and the Regional Administrator does not elect to hold a hearing on his own motion, this determination shall become effective on October 30, 1992.

A request for a public hearing shall include the following: (1) The name, address, and telephone number of the individual, organization, or other entity requesting a hearing. (2) A brief statement of the requesting person's interest in the Regional Administrator's determination and of information that the requesting person intends to submit at such a hearing. (3) The signature of the individual making the request; or, if the request is made on behalf of an organization or other entity, the signature of a responsible official of the organization or other entity.

ADDRESSES: All documents relating to this determination are available for inspection between the hours of 8 a.m. and 4:30 p.m., Monday through Friday, at the following offices:

- Regional Administrator, U.S. Environmental Protection Agency, Region 3, 841 Chestnut Building, Philadelphia, Pennsylvania 19107.
- West Virginia Office of Environmental Health Services, Morrison Building, 815 Quarrier Street, Charleston, West Virginia 25301.

FOR FURTHER INFORMATION CONTACT: Ghassan M. Khaled, U.S. EPA, Region 3, Drinking Water Section (3WM41), at the Philadelphia address given above; telephone (215) 597-0609.

Dated: September 21, 1992.

Edwin B. Erickson,

Regional Administrator, EPA, Region 3.

BILLING CODE 6560-50-M

[OPP-30343; FRL-4164-2]

Ciba-Geigy Corp.; Applications to Register Pesticide Products

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: This notice announces receipt of applications to register pesticide products containing an active ingredient not included in any previously registered product pursuant to the provisions of section 3(c)(4) of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), as amended.

DATES: Written comments must be submitted by October 30, 1992.

ADDRESSES: By mail submit comments identified by the document control number [OPP-30343] and the file symbol/registration number to: Public Response and Program Resources Branch, Field Operations Division (H7506C), Attention PM 19, Registration Division (H7505C), Office of Pesticide Programs, Environmental Protection Agency, 401 M St., SW., Washington, DC 20460. In person, bring comments to: Rm. 1128, Environmental Protection Agency, CM #2, 1921 Jefferson Davis Highway, Arlington, VA.

Information submitted in any comment concerning this notice may be claimed confidential by marking any part or all of that information as "Confidential Business Information" (CBI). Information so marked will not be disclosed except in accordance with procedures set forth in 40 CFR part 2. A copy of the comment that does not contain CBI must be submitted for inclusion in the public record. Information not marked confidential may be disclosed publicly by EPA without prior notice to the submitter. All written comments will be available for public inspection in Rm. 1128 at the address given above, from 8 a.m. to 4 p.m., Monday through Friday, except legal holidays.

FOR FURTHER INFORMATION CONTACT: PM 19, Dennis H. Edwards, Rm. 207, CM #2, (703-305-6386).

SUPPLEMENTARY INFORMATION: EPA received applications to register pesticide products containing an active ingredient not included in any previously registered product pursuant to the provisions of section 3(c)(4) of FIFRA. Notice of receipt of the applications does not imply a decision by the Agency on the applications.

Products Containing Active Ingredients Not Included In Any Previously Registered Products

1. File Symbol: 100-TUU. Applicant: Ciba-Geigy Corporation, Animal Health Division, PO Box 18300, Greensboro, NC 27419-8300. Product name: Azamethiphos Technical. Insecticide. Active ingredient: Azamethiphos s (6-chloro-oxazolo [4,5-b] pyridine-2 (3H)-on-3-ylmethyl) *O,O*-dimethyl-phosphorothioate 93 percent. Proposed classification/Use: General. For formulation into end use products intended for nondomestic indoor use. (PM 19)

2. File Symbol: 100-TUL. Applicant: Ciba-Geigy Corp. Product name: Alfacron 10 WP. Insecticide. Active ingredient: Azamethiphos s (6-chloro-oxazolo [4,5-b] pyridine-2 (3H)-on-3-ylmethyl) *O,O*-dimethyl-phosphorothioate 10 percent. Proposed classification/Use: General. For the control of house flies inside horse facilities. (PM 19)

3. File Symbol: 100-TUG. Applicant: Ciba-Geigy Corp. Product name: Alfacron 1% Bait. Insecticide. Active ingredient: Azamethiphos s (6-chloro-oxazolo [4,5-b] pyridine-2 (3H)-on-3-ylmethyl) *O,O*-dimethyl-phosphorothioate 1 percent. Proposed classification/Use: General. Attracts

and kills resistant and susceptible flies inside horse facilities. (PM 19)

Notice of approval or denial of an application to register a pesticide product will be announced in the **Federal Register**. The procedure for requesting data will be given in the **Federal Register** if an application is approved.

Comments received within the specified time period will be considered before a final decision is made; comments received after the time specified will be considered only to the extent possible without delaying processing of the application.

Written comments filed pursuant to this notice, will be available in the Public Response and Program Resources Branch, Field Operations Division office at the address provided from 8 a.m. to 4 p.m., Monday through Friday, except legal holidays. It is suggested that persons interested in reviewing the application file, telephone the FOD office (703–305–5805), to ensure that the file is available on the date of intended visit.

Authority: 7 U.S.C. 136.

Dated: September 15, 1992.

Anne E. Lindsay,

Director, Registration Division, Office of Pesticide Programs.

[FR Doc. 92–23504 Filed 9–29–92; 8:45 am]

BILLING CODE 6560–50–F

[OPP–30247A; FRL–3794–9]

U. S. Borax and Chemical Corp; Approval of Pesticide Product Registration

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: This notice announces Agency approval of an application submitted by U. S. Borax and Chemical Corporation, to conditionally register the pesticide product Firebrake® ZB, containing an active ingredient not included in any previously registered product pursuant to the provisions of section 3(c)(7)(C) of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), as amended.

FOR FURTHER INFORMATION CONTACT: By mail: Susan T. Lewis, Product Manager (PM) 21, Registration Division (H7505C), Office of Pesticide Programs, 401 M St., SW., Washington, DC 20460. Office location and telephone number: Rm. 227, CM #2, Environmental Protection Agency, 1921 Jefferson Davis Hwy, Arlington, VA 22202, (703–305–6900).

SUPPLEMENTARY INFORMATION: EPA issued a notice, published in the **Federal Register** of January 23, 1985 (50 FR 3024), which announced that U. S. Borax and Chemical Corporation, 3075 Wilshire Blvd., Los Angeles, CA 90010, had submitted an application to conditionally register the pesticide product 20 Mule Team Firebrake® ZB (EPA File Symbol 1624–REN), containing the active ingredient zinc borate at 100 percent; an active ingredient not included in any previously registered product.

The application was approved for general use on July 15, 1991, as Firebrake® ZB (EPA Registration No. 1624–120) as a fire retardant and fungicide for manufacturing or formulating use only in producing plastics and coatings resistant to fungal growth.

A conditional registration may be granted under section 3(c)(7)(C) of FIFRA for a new active ingredient where certain data are lacking, on condition that such data are received by the end of the conditional registration period and do not meet or exceed the risk criteria set forth in 40 CFR 154.7; that use of of the pesticide during the conditional registration period will not cause unreasonable adverse effects; and that use of the pesticide is in the public interest.

The Agency has considered the available data on the risks associated with the proposed use of zinc borate, and information on social, economic, and environmental benefits to be derived from such use. Specifically, the Agency has considered the nature of the chemical and its pattern of use, application methods and rates, and level and extent of potential exposure. Based on these reviews, the Agency was able to make basic health and safety determinations which show that use of zinc borate during the period of conditional registration will not cause any unreasonable adverse effect on the environment, and that use of the pesticide is, in the public interest.

Consistent with section 3(c)(7)(C), the Agency has determined that this conditional registration is in the public interest. Use of this pesticide is of significance to the user community, and appropriate labeling, use directions, and other measures have been taken to ensure that use of the pesticide will not result in unreasonable adverse effects to man and the environment.

More detailed information on this registration is contained in a Chemical Fact Sheet on zinc borate.

A copy of this fact sheet, which provides a summary description of the chemical, use patterns and formulations, science findings, and the Agency's regulatory position and rationale, may be obtained from the National Technical Information Service (NTIS), 5285 Port Royal Road, Springfield, VA 22161.

In accordance with section 3(c)(2) of FIFRA, a copy of the approved label and the list of data references used to support registration are available for public inspection in the office of the Product Manager. The data and other scientific information used to support registration, except for material specifically protected by section 10 of FIFRA, are available for public inspection in the Public Response and Program Resources Branch, Field Operations Division (H7506C), Office of Pesticide Programs, Environmental Protection Agency, Rm. 1128, CM #2, Arlington, VA 22202, (703–305–5805). Requests for data must be made in accordance with the provisions of the Freedom of Information Act and must be addressed to the Freedom of Information Office (A–101), 401 M St., SW., Washington, D.C. 20460. Such requests should: (1) identify the product name and registration number and (2) specify the data or information desired.

Authority: 7 U.S.C. 136.

Dated: September 4, 1992.

Douglas D. Campt,

Director, Office of Pesticide Programs.

Issuance of Experimental Use Permits

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: EPA has granted experimental use permits to the following applicants. These permits are in accordance with, and subject to, the provisions of 40 CFR part 172, which defines EPA procedures with respect to the use of pesticides for experimental use purposes.

FOR FURTHER INFORMATION CONTACT: By mail: Registration Division (H7505C), Office of Pesticide Programs, Environmental Protection Agency, 401 M St., SW., Washington, DC 20460.

In person or by telephone: Contact the product manager at the following address at the office location or telephone number cited in each experimental use permit: 1921 Jefferson Davis Highway, Arlington, VA.

SUPPLEMENTARY INFORMATION: EPA has issued the following experimental use permits:

8340-EUP-10. Extension. Hoechst Celanese Corporation, Rt. 202-206, P.O. Box 2500, Somerville, NJ 08876. This experimental use permit allows the use of 1,204.50 pounds of the herbicide monoammonium 2-amino-4-(hydroxymethylphosphinyl)butanoate on 511 acres of soybeans, tree and vine crops, and noncrop areas to evaluate the control of weeds. The program is authorized in the States of Arkansas, California, Delaware, Florida, Georgia, Illinois, Indiana, Iowa, Kentucky, Maryland, Michigan, Minnesota, Mississippi, New Jersey, New York, North Carolina, Ohio, Oregon, Pennsylvania, South Carolina, Tennessee, Texas, Virginia, and Washington. The experimental use permit is effective from June 6, 1992 to June 6, 1993. A temporary tolerance for residues of the active ingredient in or on soybeans and tree and vine crops has been established. (Joanne Miller, PM 23, Rm. 237, CM #2, (703-305-7830))

707-EUP-122. Renewal. Rohm and Haas Company, Independence Mall West, Philadelphia, PA 19105. This experimental use permit allows the use of 321 pounds (each year) of the fungicide myclobutanil on 535 acres (each year) of cucurbits to evaluate the control of powdery mildew. The program is authorized in the States of Arizona, Arkansas, California, Connecticut, Delaware, Florida, Georgia, Illinois, Iowa, Indiana, Maryland, Massachusetts, Michigan, Missouri, New Hampshire, New Jersey, New York, North Carolina, Ohio, Pennsylvania, South Carolina, Tennessee, Texas, Virginia, and Wisconsin. The experimental use permit is effective from August 11, 1992 to January 22, 1994. A temporary tolerance for residues of the active ingredient in or on cucurbits has been established. (Susan Lewis, PM 21, Rm. 227, CM #2, (703-305-6900))

55947-EUP-11. Sandoz Crop Protection Corporation, 1300 East Touhy Avenue, Des Plaines, IL 60018. This experimental use permit allows the use of 3,390 pounds of the herbicide 2-chloro-N-[(1-methyl-2-methoxy]-N-(2,4-dimethyl-thien-3-yl)-acetamide on 3,920 acres of corn to evaluate the control of yellow nutsedge, annual grasses, and annual broadleaf weeds. The program is authorized in the States of Colorado, Illinois, Indiana, Iowa, Kansas, Kentucky, Maryland, Michigan, Missouri, Minnesota, Nebraska, North Carolina, North Dakota, Pennsylvania, Ohio, South Dakota, Tennessee, Virginia, and Wisconsin. The experimental use permit will be effective from March 1, 1993 to March 1, 1994. A temporary tolerance for residues of the active ingredient in or on corn has been established. (Cynthia Giles-Parker, PM 22, Rm. 229, (703-305-5540))

Persons wishing to review these experimental use permits are referred to the designated product managers. Inquires concerning these permits should be directed to the persons cited above. It is suggested that interested persons call before visiting the EPA office, so that the appropriate file may be made available for inspection purposes from 8 a.m. to 4 p.m., Monday through Friday, excluding legal holidays.

Authority: 7 U.S.C. 136.

Dated: September 18, 1992.

[OPPTS-44591; FRL-4165-8]

TSCA Chemical Testing; Receipt of Test Data

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: This notice announces the receipt of test data on tributyl phosphate (TBP) (CAS No. 126-73-8) and commercial hexane (CAS Nos. 96-37-7 and 110-54-3) submitted pursuant to a final test rule under the Toxic Substances Control Act (TSCA). Publication of this notice is in compliance with section 4(d) of TSCA.

FOR FURTHER INFORMATION CONTACT: Susan B. Hazen, Director, Environmental Assistance Division (TS-799), Office of Pollution Prevention and Toxics, Environmental Protection Agency, rm. E-543B, 401 M St., SW., Washington, DC 20460, (202) 554-1404, TDD (202) 554-0551.

SUPPLEMENTARY INFORMATION: Section 4(d) of TSCA requires EPA to publish a notice in the **Federal Register** reporting the receipt of test data submitted pursuant to test rules promulgated under section 4(a) within 15 days after it is received.

I. Test Data Submissions

Test data for TBP were submitted by the Tributyl Phosphate Task Force of the Synthetic Organic Chemical Manufacturers Association, Inc., on behalf of the test sponsor and pursuant to a test rule at 40 CFR 799.4360. They were received by EPA on August 14, 1992. The submission describes a two generation reproductive toxicity study of TBP administered in the feed to CD® (sprague dawley) rats. Health effects testing is required by this test rule. This chemical is used in aircraft hydraulic fluids; for extraction and separation processes in the Plutonium Uranium Reduction Extraction process; as a defoamer in the paper industry; in textile sizers, inks, and lacquers; and as a plasticizer.

Test data for commercial hexane were submitted by The American Petroleum Institute on behalf of the test sponsors and pursuant to a test rule at 40 CFR 799.2155. They were received by EPA on August 27, 1992. The submission describes the disposition and pharmacokinetics of commercial hexane following *iv bolus* injection, dermal absorption or nose-only inhalation. Health effects testing is required by this test rule. This chemical is used as a solvent to extract seed oils.

EPA has initiated its review and evaluation process for these data submissions. At this time, the Agency is unable to provide any determination as to the completeness of the submissions.

II. Public Record

EPA has established a public record for this TSCA section 4(d) receipt of data notice (docket number OPPTS-44591). This record includes copies of all studies reported in this notice. The record is available for inspection from 8 a.m. to 12 noon, and 1 p.m. to 4 p.m., Monday through Friday, except legal holidays, in the TSCA Public Docket Office, Rm. NE-G004, 401 M St., SW., Washington, DC 20460.

Authority: 15 U.S.C. 2603.

Dated: September 22, 1992.

Charles M. Auer,

Director, Existing Chemical Assessment Division, Office of Pollution Prevention and Toxics.

BILLING CODE 6560-50-F

[OPPTS-83002N; FRL-4165-3]

Receipt of Requests for Exclusion and Waiver from Testing

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of receipt of requests for exclusion and waiver from testing.

SUMMARY: EPA requires that specified chemical substances be tested to determine if they are contaminated with halogenated dibenzo-*p*-dioxins (HDDs)

or halogenated dibenzofurans (HDFs), and that results be reported to EPA. However, provisions have been made for exclusion and waiver from these requirements if an appropriate application is submitted to EPA and is approved. EPA has received requests for an exclusion and waiver from these requirements from the Ethyl Corporation, and will accept comments on these requests. EPA will publish another Federal Register notice announcing its decisions on this request.

DATES: Submit written comments on or before October 15, 1992.

ADDRESSES: Submit written comments in triplicate, identified with the document control number OPPTS–83002N, to: Public Docket Office (TS–793), Office of Pollution Prevention and Toxics, Environmental Protection Agency, Rm. NE–G004, 401 M St., SW., Washington, DC 20460.

FOR FURTHER INFORMATION CONTACT: Susan Hazen, Director, Environmental Assistance Division (TS–799), Office of Pollution Prevention and Toxics, Environmental Protection Agency, Rm. E–543B, 401 M St., SW., Washington, DC 20460, (202) 554–1404, TDD (202) 554–0551.

SUPPLEMENTARY INFORMATION: Under 40 CFR part 766 (52 FR 21412, June 5, 1987) EPA requires testing of certain chemical substances to determine whether they may be contaminated with HDDs and HDFs. Under 40 CFR 766.32(a)(1)(i) and (ii), a company may be granted an exclusion from the testing requirements of part 766 if the process and reaction conditions are such that HDDs and HDFs would not be produced, or appropriate testing of the chemical substances has already been done, respectively.

Under 40 CFR 766.32(a)(2)(i) a waiver may be granted if a responsible company official certifies that the chemical substance is produced only in quantities of 100 kilograms or less per year, and only for research and development purposes. Under 40 CFR 766.32(a)(2)(ii) a waiver may be granted if, in the judgement of EPA, the cost of testing would drive the chemical substance off the market or prevent resumption of manufacture or import of the chemical substance; or if it is not currently manufactured, and the chemical substance will be produced so that no unreasonable risk will occur due to its manufacture, import, processing, distribution, use, or disposal. Under 40 CFR 766.32(a)(2)(iii), waivers may be appropriately conditioned with respect to such factors as time and conditions of manufacture and use.

Under the regulation, a request for either an exclusion or a waiver must be made before September 4, 1987, for persons manufacturing, importing, or processing a chemical substance as of June 5, 1987; or 60 days before resumption of manufacture or importation of a chemical substance not being manufactured, imported, or processed as of June 5, 1987.

Ethyl Corporation requests an exclusion under 40 CFR 766.32(a)(1)(i) and a waiver under 40 CFR 766.32(a)(2)(ii) for 2,4,6-tribromophenol (CAS No. 118–79–6), which is produced as an impurity. Some of their supporting data was submitted as confidential business information (CBI). CBI, while part of the record, is not available for public review. A public version of the record, from which CBI has been deleted, is available for inspection in the TSCA Public Docket Office, Rm. NE–G004, 401 M St., SW., Washington, DC from 8 a.m. to 12 noon, and from 1 p.m. to 4 p.m., Monday through Friday, except legal holidays.

Dated: September 22, 1992.

Charles M. Auer,

Director, Existing Chemical Assessment Division, Office of Prevention, Pesticides and Toxic Substances.

BILLING CODE 6560–50–F

FEDERAL COMMUNICATIONS COMMISSION

Public Information Collection Requirements Submitted to Office of Management and Budget for Review

September 24, 1992.

The Federal Communications Commission has submitted the following information collection requirements to OMB for review and clearance under the Paperwork Reduction Act of 1980 (44 U.S.C. 3507).

Copies of these submissions may be purchased from the Commission's copy contractor, Downtown Copy Center, 1990 M Street, NW., suite 640, Washington, DC 20036, (202) 452–1422. For further information on these submissions contact Judy Boley, Federal Communications Commission, (202) 632–7513. Persons wishing to comment on these information collections should contact Jonas Neihardt, Office of Management and Budget, room 3235 NEOB, Washington, DC 20503, (202) 395–4814.

OMB Number: None.
Title: Section 43.21(c), Holding company annual report.
Action: Existing collection in use without an OMB control number.
Respondents: Businesses or other for-profit.
Frequency of Response: Annual reporting.
Estimated Annual Burden: 20 responses; 1 hour average burden per response; 20 hours total annual burden per response.
Needs and Uses: Filing of Security and Exchange Commission (SEC) Form 10K is required by §§ 1.785 and 43.21(c) of the FCC rules and authorized by section 219 of the Communications Act of 1934, as amended. Filing of the form is required. Each company, not of itself a communication common carrier, that directly or indirectly controls any communication common carrier having annual revenues in excess of $2,500,000 must file annually with the Commission, not later than the date prescribed by the SEC for its purposes, two complete copies of any annual report Forms 10K. It is anticipated that the Commission will soon be instituting a rulemaking to modify the dollar requirement from $2.5 million to $100 million. The information is used by FCC staff to regulate and monitor the telephone industry and by the public to analyze the industry. Selected information is compiled and published in the Commission's annual common carrier statistical publication.

OMB Number: None.
Title: Section 43.21(d), Miscellaneous and specialized common carrier annual letter.
Action: Existing collection in use without an OMB control number.
Respondents: Businesses or other for-profit.
Frequency of Response: Annual reporting.
Estimated Annual Burden: 13 responses; 1 hour average burden per response; 13 hours total annual burden.
Needs and Uses: Filing of § 43.21(d) data is required by §§ 21.1 and 43.21(d) of the FCC Rules and authorized by section 219 of the Communications Act of 1934, as amended. The information if required from each miscellaneous common carrier with operating revenues over $100 million for the calendar year. A letter is required from these large communications common carriers showing the company's operating revenues for that year and the value of its total communications plant at the end of the year. The information is used by FCC staff members to regulate and monitor the telephone

industry and by the public to analyze the industry. The information is compiled and published in the Commission's annual common carrier statistical publication and market share report. The revenue amounts are used as the basis for an equitable compensation mechanism for pay phone operators by the operator service providers.

Federal Communications Commission.

Donna R. Searcy,

Secretary.

BILLING CODE 6712-01-M

FEDERAL LABOR RELATIONS AUTHORITY

Relating to the Issuance of a Policy Statement

AGENCY: Federal Labor Relations Authority.

ACTION: Notice relating to the issuance of a policy statement.

SUMMARY: This notice solicits written comments on a question of whether the Federal Labor Relations Authority should issue a policy statement requested by the Federal Service Impasses Panel regarding an agency's obligation to continue to cooperate in certain impasse proceedings and, if the Authority issues such statement, what the Authority's policy should be.

DATES: Written comments must be submitted by the close of business on October 30, 1992, to be considered.

ADDRESSES: Send written comments to the Federal Labor Relations Authority, 500 C Street, SW., room 213, Washington, DC 20424.

FOR FURTHER INFORMATION CONTACT: Alicia N. Columna, Director, Case Control Office, 500 C Street, SW., Washington, DC 20424, (202) 382-0748.

SUPPLEMENTARY INFORMATION: The Federal Labor Relations Authority was established by Reorganization Plan No. 2 of 1978, effective January 1, 1979 (43 FR 36037). Since January 11, 1979, the Authority has conducted its operations under the Federal Service Labor-Management Relation Statute (92 Stat. 1192).

The Authority has received a request from the Federal Service Impasses Panel that it issue a general statement of policy or guidance in accordance with § 2429.4 of its rules and regulations. Interested persons are invited to express their views in writing as to whether the Authority should issue a policy statement on the question raised by the Panel, and if the Authority issues a statement, what the Authority's policy should be.

Notice

To Heads of Agencies, Presidents of Labor Organizations and Other Interested Persons:

The Authority has received a request from the Federal Service Impasses Panel pursuant to § 2429.4 of the Authority's rules and regulations (5 CFR 2429.4), that the Authority address a major policy issue arising in a case before the Panel. The specific question, as stated by the Panel, is as follows:

Is there a duty on the part of an agency to continue to cooperate with impasse proceedings if a question concerning representation arises following the Panel's assertion of jurisdiction over an impasse?

The issue before the Authority at this time is whether a policy statement on this question is warranted, and if the Authority issues a policy statement, what the policy should be. In conformity with § 2427.4 of our rules and regulations, the Authority solicits your views on these matters in writing. To receive consideration, such views must be submitted to the Authority by close of business on October 30, 1992.

Issued: Washington, DC, September 24, 1992.

Federal Labor Relations Authority.

Jean McKee,

Chairman.

BILLING CODE 6730-01-M

FEDERAL RESERVE SYSTEM

Compagnie de Suez, et al.; Notice of Applications to Engage de novo in Permissible Nonbanking Activities

The companies listed in this notice have filed an application under § 225.23(a)(1) of the Board's Regulation Y (12 CFR 225.23(a)(1)) for the Board's approval under section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)) and § 225.21(a) of Regulation Y (12 CFR 225.21(a)) to commence or to engage *de novo*, either directly or through a subsidiary, in a nonbanking activity that is listed in § 225.25 of Regulation Y as closely related to banking and permissible for bank holding companies. Unless otherwise noted, such activities will be conducted throughout the United States.

Each application is available for immediate inspection at the Federal Reserve Bank indicated. Once the application has been accepted for processing, it will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices." Any request for a hearing on this question must be accompanied by a statement of the reasons a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party commenting would be aggrieved by approval of the proposal.

Unless otherwise noted, comments regarding the applications must be received at the Reserve Bank indicated or the offices of the Board of Governors not later than October 23, 1992.

A. Federal Reserve Bank of New York (William L. Rutledge, Vice President) 33 Liberty Street, New York, New York 10045:

1. Compagnie de Suez, Paris, France, and Banque Indosuez, Paris, France; to engage *de novo* through their subsidiary Indosuez Carr Futures, Inc., Chicago, Illinois, in providing securities brokerage services pursuant to § 225.25(b)(15) of the Board's Regulation Y.

B. Federal Reserve Bank of Chicago (David S. Epstein, Vice President) 230 South LaSalle Street, Chicago, Illinois 60690:

1. Sullivan Bancshares, Inc., Sullivan, Illinois; to engage *de novo* in purchasing short term loan participations from The First National Bank of Sullivan, Sullivan, Illinois, pursuant to § 225.25(b)(1) of the Board's Regulation Y.

C. Federal Reserve Bank of St. Louis (Randall C. Sumner, Vice President) 411 Locust Street, St. Louis, Missouri 63166:

1. The Farmers and Merchants Bankshares, Incorporated, Stuttgart, Arkansas; to engage *de novo* in residential, commercial, and agricultural real estate appraisal services pursuant to § 225.25(b)(13) of the Board's Regulation Y. These activities will be conducted in Arkansas, Prairie, Monroe, Jefferson and Lonoke Counties in the State of Arkansas.

Board of Governors of the Federal Reserve System, September 23, 1992.

Jennifer J. Johnson,

Associate Secretary of the Board.

BILLING CODE 6210-01-F

First Western Corp.; Formation of, Acquisition by, or Merger of Bank Holding Companies; and Acquisition of Nonbanking Company

The company listed in this notice has applied under § 225.14 of the Board's Regulation Y (12 CFR 225.14) for the Board's approval under section 3 of the Bank Holding Company Act (12 U.S.C. 1842) to become a bank holding company or to acquire voting securities of a bank or bank holding company. The listed company has also applied under § 225.23(a)(2) of Regulation Y (12 CFR 225.23(a)(2)) for the Board's approval, under section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)) and § 225.21(a) of Regulation Y (12 CFR 225.21(a)) to acquire or control voting securities or assets of a company engaged in a nonbanking activity that is listed in § 225.25 of Regulation Y as closely related to banking and permissible for bank holding companies, or to engage in such an activity. Unless otherwise noted,

these activities will be conducted throughout the United States.

The application is available for immediate inspection at the Federal Reserve Bank indicated. Once the application has been accepted for processing, it will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices." Any request for a hearing on this question must be accompanied by a statement of the reasons a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party commenting would be aggrieved by approval of the proposal.

Comments regarding the application must be received at the Reserve Bank indicated or the offices of the Board of Governors not later than October 23, 1992.

A. Federal Reserve Bank of Kansas City (John E. Yorke, Senior Vice President) 925 Grand Avenue, Kansas City, Missouri 64198:

1. First Western Corp., Kimball, Nebraska; to acquire 100 percent of the voting shares of Citywide Bank of Northglenn, Northglenn, Colorado.

In connection with this application, Applicant also seeks approval to retain its wholly owned lending and leasing subsidiary, First Mortgage Bancorp, Kimball, Nebraska, and thereby continue to engage in direct lending activities pursuant to § 225.25(b)(1) and in leasing real and personal property pursuant to § 225.25(b)(5), and to retain its wholly owned insurance agency, Elm Creek Insurance Agency, Elm Creek, Nebraska, and thereby continue to engage in general insurance agency activities in a town with a population of less than 5,000 pursuant to § 225.25(b)(8)(iii) of the Board's Regulation Y.

Board of Governors of the Federal Reserve System, September 23, 1992.

Jennifer J. Johnson,

Associate Secretary of the Board.

BILLING CODE 6210-01-F

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Centers for Disease Control

Clinical Laboratory Improvement Advisory Committee; Meeting

In accordance with section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92-463), the Centers for Disease Control (CDC) announces the following committee meeting.

Name: Clinical Laboratory Improvement Advisory Committee Meeting.

Times and Dates: 8 a.m.-5 p.m., October 28, 1992, 8 a.m.-4 p.m., October 29, 1992

Place: CDC, Auditorium A, Building 2, 1600 Clifton Road, NE, Atlanta, Georgia 30333.

Status: Open to the public, limited only by the space available.

Purpose: This committee is charged with providing scientific and technical advice and guidance to the Secretary of Health and Human Services and the Assistant Secretary for Health regarding the need for, and the nature of, revisions to the standards under which clinical laboratories are regulated; the impact on medical and laboratory practice of proposed revisions to the standards; and the modification of the standards to accommodate technological advances.

Matters to be Discussed: This is the initial meeting of the Clinical Laboratory Improvement Advisory Committee. The agenda will include discussion of the role of the committee, information and data needs of the committee, the need for and topic areas for subcommittees, and time schedules for committee activities. It will also include an overview of the laboratory standards portion of the Clinical Laboratory Improvement Amendments (CLIA) Final Rule, the research plan for conducting CLIA studies, and the ongoing and planned implementation activities.

Agenda items are subject to change as priorities dictate.

Contact Person for Additional Information: Henry M. Colvin, Assistant Director for Program Policy, Division of Laboratory Systems, Public Health Practice Program Office, CDC, 1600 Clifton Road, NE, Mailstop G-25, Atlanta, Georgia 30333, telephone 404/639-1706.

Anyone wishing to make an oral presentation should submit their request in writing to Mr. Colvin by close of business, October 16, 1992. The request should include the name, address, and telephone number of the participant, the approximate time needed, and a brief summary of the topic to be presented. Depending on the number of requests received, up to 10 minutes will be allowed for each oral presentation.

Dated: September 24, 1992.

Elvin Hilyer,

Associate Director for Policy Coordination, Centers for Disease Control.

BILLING CODE 4160-18-M

Social Security Administration

[Social Security Acquiescence Ruling 92-7(9)]

Gonzalez v. Sullivan; Effect of Initial Determination Notice Language on the Application of Administrative Finality

AGENCY: Social Security Administration, HHS.

ACTION: Notice of Social Security Acquiescence Ruling.

SUMMARY: In accordance with 20 CFR 422.406(b)(2) published January 11, 1990 (55 FR 1012), the Commissioner of Social Security gives notice of Social Security Acquiescence Ruling 92-7(9)

EFFECTIVE DATE: September 30, 1992.

FOR FURTHER INFORMATION CONTACT: Walt Burton, Litigation Staff, Social Security Administration, 6401 Security Blvd., Baltimore, MD 21235, (410) 966-5041.

SUPPLEMENTARY INFORMATION: Although not required to do so pursuant to 5 U.S.C. 552(a)(1) and (a)(2), we are publishing this Social Security Acquiescence Ruling in accordance with 20 CFR 422.406(b)(2).

A Social Security Acquiescence Ruling explains how we will apply a holding in a decision of a United States Court of Appeals that we determine conflicts with our interpretation of a provision of the Social Security Act or regulations when the Government has decided not to seek further review or is unsuccessful on further review.

We will apply the holding of the Court of Appeals decision as explained in this Social Security Acquiescence Ruling to claims at all levels of administrative adjudication within the Ninth Circuit. This Social Security Acquiescence Ruling will apply to all determinations and decisions made on or after September 30, 1992. If we made a determination or decision on your application for benefits between September 12, 1990, the date of the Court of Appeals' decision and September 30, 1992, the effective date of this Social Security Acquiescence Ruling, you may request application of the Social Security Acquiescence Ruling to your claim if you first demonstrate, pursuant to 20 CFR 404.985(b), or 416.1485(b), that application of the Ruling would change our prior determination or decision.

If this Social Security Acquiescence Ruling is later rescinded as obsolete, we will publish a notice in the **Federal Register** to that effect as provided for in 20 CFR 404.985(e), or 416.1485(e). If we decide to relitigate the issue covered by this Social Security Acquiescence Ruling

as provided for by 20 CFR 404.985(c), or 416.1485(c), we will publish a notice in the **Federal Register** stating that we will apply our interpretation of the Act or regulations involved and explaining why we have decided to relitigate the issue.

(Catalog of Federal Domestic Assistance Programs Nos. 93.802 Social Security—Disability Insurance; 93.803 Social Security—Retirement Insurance; 93.805 Social Security Survivor's Insurance; 93.806—Special Benefits for Disabled Coal Miners; 93.807—Supplemental Security Income.)

Gwendolyn S. King

Commissioner of Social Security

Acquiescence Ruling 92–7(9)

Gonzalez v. Sullivan, 914 F.2d 1197 (9th Cir. 1990)—Effect of Initial Determination Notice Language on the Application of Administrative Finality—Titles II and XVI of the Social Security Act.

Issue

Whether an initial determination in the Social Security or Supplemental Security Income (SSI) programs must be reopened when the notice of the initial determination did not explicitly state that the failure to seek reconsideration results in a final determination, and the claimant did not pursue a timely appeal.

Statute/Regulation/Ruling Citation

Section 205(b)(1) of the Social Security Act (42 U.S.C. 405(b)(1)), 20 CFR 404.904, 404.905, 404.957(c)(1), 404.987, 404.988, 404.989, 416.1404, 416.1405, 416.1457(c)(1), 416.1487, 416.1488, 416.1489.

Circuit

Ninth(Alaska, Arizona, California, Guam, Hawaii, Idaho, Montana, Nevada, Northern Mariana Islands, Oregon, Washington)—*Gonzalez v. Sullivan*, 914 F.2d 1197 (9th Cir. 1990)

Applicability Of Ruling

This Ruling applies to determinations or decisions on subsequent applications at all administrative levels (i.e., initial, reconsideration, administrative law judge hearing and Appeals Council).

Description Of Case

Mr. Gonzalez first applied for disability benefits on May 26, 1983, alleging that his disability began on March 8, 1982. In a notice dated July 27, 1983, the Secretary denied the application. The notice stated that:

> If you believe that this determination is not correct, you may request that your case be reexamined. If you want this reconsideration, you must request it not later than 60 days from the date you receive this notice. You may make your request through any social security office. If additional evidence is available, you should submit it with your request. Please read the enclosed leaflet for a full explanation of your right to question the determination made on your claim.
>
> If you do not request reconsideration of your case within the prescribed time period, you still have the right to file another application at any time.

On October 24, 1984, Mr. Gonzalez reapplied for disability benefits, once again alleging that he had been disabled since March 8, 1982. After a hearing, an Administrative Law Judge denied the plaintiff's application. The decision stated, in relevant part, that the issue of disability was *res judicata* through July 27, 1983, the date of the initial denial on the previous application. The Administrative Law Judge also did not reopen the determination on the claimant's previous application. The Administrative Law Judge's decision became the final decision of the Secretary for the period after July 27, 1983. Mr. Gonzalez appealed to district court. After the district court found that substantial evidence supported the Secretary's decision, Mr. Gonzalez appealed to the United States Court of Appeals for the Ninth Circuit. On appeal to the Ninth Circuit, the claimant raised, for the first time, the issue of the sufficiency of the notice of the initial determination on his first application.

Holding

The Ninth Circuit held that the notice given in the determination on the first application violates a claimant's fifth amendment right to procedural due process. In addition, the court stated that:

> Moreover, the form of the notice used here is sufficiently misleading that it introduces a high risk of error into the disability decisionmaking process.... One of the fundamental requirements of procedural due process is that a notice must be reasonably calculated to afford parties their right to present objections.... The notice given in this case does not clearly indicate that if no request for reconsideration is made, the determination is final.

Statement As To How Gonzalez Differs From Social Security Policy

It is SSA's policy to issue notices that provide claimants procedural due process. SSA believes that the notices of initial determination used in the past have done that. The notice and the enclosed leaflet explained the claimant's rights and the result of not appealing the determination.

The notice language at issue in *Gonzalez* was revised in 1989 to explain more clearly the difference between appealing a determination, which prevents the determination from becoming final, and filing a new application. SSA completed implementation of the 1989 notice language change in February 1990. SSA is further revising that language in accordance with section 5107 of the Omnibus Budget Reconciliation Act of 1990, Public Law 101–508 (OBRA '90). The statute provides that determinations made on or after July 1, 1991, may not be given *res judicata* effect if the claimant demonstrates that he/she failed to appeal the determination "acting in good faith reliance upon incorrect, incomplete, or misleading information, relating to the consequences of reapplying for benefits in lieu of seeking review of an adverse determination, provided by any officer or employee" of the SSA or a State agency making determinations for the Secretary.

As stated above, the Ninth Circuit Court of Appeals has found that the Secretary's former notice language resulted in a denial of due process.

Explanation Of How SSA Will Apply The Decision Within The Circuit

This Ruling applies only to cases involving claimants who: (1) reside in Alaska, Arizona, California, Guam, Hawaii, Idaho, Montana, Nevada, Northern Mariana Islands, Oregon, or Washington; and (2) received an adverse initial determination made prior to July 1, 1991; and (3) did not timely appeal that determination. Claimants who file new claims after receiving notices of initial determinations made on or after July 1, 1991 are protected by the provisions of OBRA '90 as explained above. SSA will apply this Ruling in adjudicating a subsequent application at the initial, reconsideration, Administrative Law Judge, or Appeals Council levels.

A new determination based on the merits of the claim must be issued and a notice of the determination must be sent to the claimant in accordance with 20 CFR 404.992 or 416.1492 if:

- the claimant received a notice like that received by Mr. Gonzalez, as described above; and
- the claimant files a subsequent application; and
- the claimant either requests reopening of the prior initial determination or requests some or all of the benefits claimed in the prior application.

For purposes of this Ruling, the time limits for reopening and revising final agency determinations do not apply.

BILLING CODE 4190–29–F

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Office of the Assistant Secretary for Community Planning and Development

[Docket No. N-92-3368; FR-3157-N-02]

Funding Availability for the HUD-Administered Small Cities Community Development Block Grant Program; Fiscal Year 1992 Announcement of Funding Awards

AGENCY: Office of the Assistant Secretary for Community Planning and Development, HUD.

ACTION: Announcement of funding awards for Fiscal Year 1992.

SUMMARY: In accordance with section 102(a)(4)(C) of the Department of Housing and Urban Development Reform Act of 1989, this announcement notifies the public of funding decisions made by the Department under the HUD-Administered Small Cities Community Development Block Grant (CDBG) Program for Fiscal Year (FY) 1992. The announcement contains the names and addresses of grantees and the amounts of the awards.

FOR FURTHER INFORMATION CONTACT: Stanley Gimont, State and Small Cities Division, Office of Community Planning and Development, Department of Housing and Urban Development, room 7184, 451 7th Street, SW., Washington, DC 20410, Telephone (202) 708–1322. The TDD number is (202) 708–2565. (These are not toll-free numbers.)

SUPPLEMENTARY INFORMATION:

Background

Title I of the Housing and Community Development Act of 1974, as amended (the HCD Act), authorizes the Community Development Block Grant (CDBG) Program. Section 106 of title I permits States to assume administrative responsibility for the CDBG Program for nonentitled units of general local government within their jurisdictions. Section 106 provides that HUD will administer the CDBG Program for nonentitled areas within a State which does not assume administrative responsibility for the program.

Hawaii and New York are the only two States which have not elected to assume administrative responsibility for the nonentitled CDBG Program. HUD therefore continues to operate the nonentitlement CDBG Program in these two States in accordance with 24 CFR part 570, subpart F.

Hawaii's FY 1992 Nonentitlement Allocation

In Hawaii, HUD distributes nonentitlement CDBG funds on a formula basis as set out in 24 CFR 570.435 because there are only three eligible jurisdictions—the counties of Hawaii, Kauai, and Maui. The State of Hawaii's Fiscal Year 1992 nonentitlement allocation (including reallocated funds) totals $2,778,000. All three counties are allocated funds from this amount, in accordance with the formula set forth in 24 CFR 570.435, but must apply to HUD for the funds. County officials for these three counties have been notified of the amounts available to their respective counties for purposes of preparing applications. HUD expects to make final decisions regarding these applications in the next 60 days. The amounts available to each of three counties are as follows:

1. County of Hawaii, Lorraine R. Inouye, 25 Aupuni Street, Hilo, HI 96720: Amount available—$1,254,000
2. County of Kauai, JoAnn A. Yukimura, Lihue, HI 96766 Amount available—$508,000
3. County of Maui, Linda Crockett-Lingle, 200 South High Street, Maui, HI 96793: Amount available—$1,016,000.

For further information regarding these applications and grants, contact:

Ms. Patty Nicholas, Director, Community Planning and Development Division, Department of Housing and Urban Development, 500 Ala Moana Boulevard, Suite 500, Honolulu, HI 96813–1323.

New York's FY 1992 Nonentitlement Allocation

In New York State, HUD conducts an annual competition in which nonentitled units of general local government may apply for nonentitled CDBG funds allocated to New York State. The Fiscal Year 1992 competition in New York State was announced by means of a Notice of Funding Availability (NOFA) published in the **Federal Register** on March 2, 1992 (57 FR 7438). The NOFA announced the allocation of the State's nonentitled CDBG funds between the New York Regional Office and the Buffalo Field Office as well as the amount of funds for available for Single Purpose and Comprehensive grants. A total of $41,199,000 was available for nonentitled communities in New York State. The NOFA also explained in detail how HUD would apply regulatory threshold requirements for funding eligibility and the selection criteria for rating and scoring applications.

In New York, HUD received applications presenting 243 projects for consideration, seeking a total of more than $92 million in funding. One hundred and two (102) separate projects were selected for funding, totalling $41,199,000 in awards. In accordance with section 102(a)(4)(C) of the Department of Housing and Urban Development Reform Act of 1989, the Department is publishing the names, addresses and amounts of those awards as follows. For further information regarding these grants, contact either:

U.S. Department of Housing and Urban Development, Office of Community Planning and Development, 26 Federal Plaza, New York, NY 10278–0068.

or;

U.S. Department of Housing and Urban Development, Community Planning and Development Division, Lafayette Court, 465 Main St., Buffalo, NY 14203.

The following awards were announced August 7, 1992.

Single Purpose Grants—New York Regional Office

1. Town of Liberty, Jack I. Simons, 120 North Main Street, Liberty, NY 12754—$400,000
2. Sullivan County, Walter Sipple, County Government Center, Monticello, NY 12701—$245,000
3. Village of Walden, Charles Frank, 8 Scofield Street, Walden, NY 12586—$400,000
4. Town of Rockland, Elton Harris, Town Hall, Livingston Manor, NY 1275?—$243,900
5. Town of Shawangunk, Kevin V. Hunt, P.O. Box 247, Wallkill, NY 12589—$400,000
6. Town of Shandaken, Neil Grant, P.O. Box 134, Shandaken, NY 12480—$400,000
7. Village of Greenport, William R. Pell, III, Village Hall, 236 Third Street, Greenport, NY 11944—$400,000
8. Town of Ulster, Frank Sottile, Town Hall, Neighborhood Road, Lake Katrine, NY 12449—$399,100
9. Village of Bloomingburg, Ronald Scott, P.O. Box 96, Bloomingburg, NY 12721—$400,000
10. Village of New Square, Mates Freisel, 766 North Main Street, New Square, NY 10977—$400,000
11. Village of Monticello, John M. Diuguid, 2 Pleasant Street, Monticello, NY 12701—$400,000

Comprehensive Grants—New York Regional Office

1. City of Kingston, John A. Amarello, 1 Garraghan Drive, Kingston, NY 12401—$600,000
2. City of Port Jervis, Richard K. Roberts, Municipal Building, Port Jervis, NY 12771—$600,000

Single Purpose Grants—Buffalo Field Office

1. City of Amsterdam, Mario Villa, City Hall, 61 Church St., Amsterdam, NY 12010—$400,000
2. City of Cortland, Ronald T. Walsh, Jr., City Hall, 25 Court St., Cortland, NY 13045—$364,630
3. City of Fulton, George C. Valette, Two Tower Drive–Suite B, Watertown Hill, Fulton, NY 13069—$112,400
4. City of Lockport, Thomas C. Rotundo, Jr., Municipal Bldg., One Locks Plaza, Lockport, NY 14094—$400,000
5. City of North Tonawanda, Elizabeth C. Hoffman, City Hall, 216 Payne Avenue, N. Tonawanda, NY 14120—$400,000
6. City of Ogdensburg, John C. Krol, City Hall, 330 Ford Street, Ogdensburg, NY 13669—$400,000
7. City of Oneonta, David W. Brenner, City Hall, 258 Main Street, Oneonta, NY 13820—$395,000
8. Town of Altona, Glenn Watts, Town Hall, Altona, NY 12910—$400,000
9. Town of Ausable, Robert Mitchell, Town Hall, South Sable St., Keeseville, NY 12944—$400,000
10. Town of Bellmont, JoAnne Hannon, Route 374, Merrill, NY 12955—$400,000
11. Town of Brandon, Patrick Kingston, RFD 1, North Bangor, NY 12966—$400,000
12. Town of Brighton, Al Graf, RFD Box 171E, Saranac Lake, NY 12983—$400,000
13. Town of Brookfield, Loren C. Corbin, Town Hall, Maine St., Brookfield, NY 13314—$400,000
14. Town of Caroline, Robert Spaulding, P.O. Box 36, Slaterville Springs, NY 14881—$400,000
15. Town of Champlain, Gerald Mayo, Town Hall, Champlain, NY 12919—$400,000
16. Town of Chateaugay, Patrick W. Burke, Town Hall, 45 East Main St., Chateaugay, NY 12920—$400,000
17. Town of Chesterfield, Roger E. Poland, Town Hall, Keeseville, NY 12944—$400,000
18. Town of Cincinnatus, Jack Stafford, Town Hall, Cincinnatus, NY 13040—$398,400
19. Town of Dannemora, Robert Kanaly, Town Hall, Dannemora, NY 12929—$400,000
20. Town of Forestport, Russell J. Hirschey, Town Hall, Forestport, NY 13338—$400,000
21. Town of Franklin, John P. O'Neill, RFD 1, Box 94, Vermontville, NY 12989—$400,000
22. Town of Friendship, Lawrence Riehle, 50 West Main St., Friendship, NY 14739—$400,000
23. Town of Gouverneur, Donald A. Peck, RD #5—Box 10, Gouverneur, NY 13643—$400,000
24. Town of Harrisburg, Stephen N. Bernat, RD 1, Lowville, NY 13367—$400,000
25. Town of Independence, James V. Clark, P.O. Box 38, Marietta Ave., Whitesville, NY 14897—$400,000
26. Town of Italy, Leslie Fitzwater, RD 2, Naples, NY 14512—$383,500
27. Town of Lewis, Joseph E. Boone, Town Hall, Lewis, NY 12950—$400,000
28. Town of Lorraine, William W. Johnson, 6 RD 1, Box 892, Lorraine, NY 13659—$400,000
29. Town of Salisbury, Robert T. Jorrey, Box 241, Salisbury Center, NY 13454—$400,000
30. Town of Savannah, Donald G. Colvin, 1564 North Main Street, Savannah, NY 13146—$99,700
31. Town of Shelby, John Fox, 11248 Maple Ridge Road, Medina, NY 14103—$400,000
32. Town of Smithfield, David G. Brooks, P.O. Box 146, Peterboro, NY 13134—$400,000
33. Town of Stephentown, Michael Angley, Staples Road, Stephentown, NY 12168—$400,000
34. Town of Stockton, Arthur A. Nist, 22 North Main Street, Stockton, NY 14784—$101,210
35. Town of Sullivan, John Gladney, RD #2, Lakeport Road, Chittenango, NY 13037—$369,000
36. Town of Verona, Maurice G. Deeley, Germany Road, RD #1, Box 249, Durhamville, NY, 13054—$400,000
37. Town of Watson, Virgil E. Taylor, Star Route, Lowville, NY, 13367—$297,000
38. Town of Wells, Allen L. Hunt, Town Hall, N.Y. Route 30, Wells, NY, 12190—$400,000
39. Town of Willet, K.C. Burlingame, Town Hall, P.O. Box 37, Willet, NY, 13863—$390,000
40. Town of Willsboro, Teresa Sayward, Town Office, Willsboro, NY, 12996—$400,000
41. Town of Wilmington, Joanne Zaumetzer, Town Hall, Wilmington, NY, 12997—$400,000
42. Village of Adams, Charles A. Peck, 2 North Main Street, Adams, NY, 13605—$400,000
43. Village of Arcade, Gordon H. Cramer, Village Office, 17 Church St., Arcade, NY, 14009—$179,050
44. Village of Canisteo, Arthur J. Burdick, 35 Main St., Canisteo, NY, 14823—$400,000
45. Village of Dolgeville, Bruce Smith, 41 N. Main St., Dolgeville, NY, 13329—$400,000
46. Village of Dresden, Timothy Chambers, 69 Seneca St., Dresden, NY, 14441—$400,000
47. Village of Edwards, Joseph C. Brassard, Town Hall, Main St., Edwards, NY, 13635—$400,000
48. Village of Franklinville, Raymond G. Doty, Village Hall, Franklinville, NY, 14737—$400,000
49. Village of Fredonia, Louis C. Mancuso, Village Hall, 9–11 Church St., Fredonia, NY, 14063—$362,100
50. Village of Gouverneur, Laura M. Slate, 33 Clinton St., Gouverneur, NY, 13642—$400,000
51. Village of Hancock, Robert H. Drumm, 66 East Front St., Hancock, NY, 13783—$400,000
52. Village of Homer, Mary Alice Bellardini, Village Hall, 31 North Main St., Homer, NY, 13077—$358,360
53. Village of Malone, Richard A. Gokey, 16 Elm St., Malone, NY, 12953—$400,000
54. Village of Millport, Kenneth Wood, 5508 Main St., Millport, NY, 14864—$400,000
55. Village of Moravia, Robert E. Copley, Central St., Moravia, NY, 13118—$352,000
56. Village of Northville, Sheldon F. Ginter, Third Street, Northville, NY, 12134—$400,000
57. Village of Penn Yan, Floyd Paddock, P.O. Box 426, 3 Maiden Lane, Penn Yan, NY, 14527—$385,000
58. Village of Phoenix, Carole G. Fields, 821 Main Street, Phoenix, NY, 13135—$400,000
59. Village of Port Henry, Richard Gonyeau, 25 South Main Street, Port Henry, NY, 12974 $258,950
60. Village of Saranac Lake, Richard V. DePuy, Power & Light Building, 2 Main Street, Saranac Lake, NY, 12983—$400,000
61. Village of Victory Mills, A. Bruce Cornell, P.O. Box 149, Pine Street, Victory Mills, NY, 12884—$400,000
62. Cayuga County, Herbert Marshall, Jr., County Office Bldg., 160 Genesee St., Auburn, NY, 13021—$400,000
63. Chenango County, Glenn Angell, 5 Court St., County Office Bldg., Norwich, NY, 13815—$400,000
64. Essex County, Joseph E. Boone, County Building Church St., Elizabethtown, NY, 12932—$395,000
65. Greene County, Frank Stabile, Jr., HCR 3, P.O. Box 909, Cairo, NY, 12413—$82,500
66. Jefferson County, William H. Fulkerson, 175 Arsenal St., Watertown, NY, 13601—$400,000
67. Madison County, Robert H. Kuiper, P.O. Box 635, Madison County Office Bldg., Wampsville, NY, 13163—$600,000
68. Montgomery County, Robert W. D'Arcangelis, Park St., P.O. Box 1500 County Annex Bldg., Fonda, NY, 12068—$400,000

69. Otsego County, Carl F. Higgins, County Office Bldg., 197 Main St., Cooperstown, NY, 13326—$595,000
70. Rensselaer County, John L. Buono, County Office Building, 1600 7th Avenue, Troy, NY, 12180—$360,000
71. St. Lawrence County, Betty H. Bradley, County Courthouse, Court Street, Canton, NY, 13617—$600,000
72. Warren County, Victor R. Grant, Municipal Center, Lake George, NY, 12845—$578,200

Comprehensive Grants—Buffalo Field Office

1. City of Ithaca, Benjamin Nichols, 108 East Green St., Ithaca, NY 14850—$600,000
2. City of Little Falls, Roger Stock, City Hall, 659 Main St., Little Falls, NY 13326—$553,000
3. City of Oswego, Terrance Hamill, City Hall, Oswego, NY 13126—$600,000
4. Village of Canastota, Joseph Paone, Village Hall, 205 S. Peterboro, Canastota, NY 13032—$577,000
5. City of Hornell, Shawn Hogan, 108 Broadway, Hornell, NY 14843—$600,000
6. City of Auburn, James Galvin, Memorial City Hall, 24 South St., Auburn, NY 13021—$564,000
7. City of Hudson, Michael Yusko, Jr., City Hall, Hudson, NY 12534—$600,000
8. City of Cohoes, Robert D. Signoracci, City Hall, Mohawk Street, Cohoes, NY, 12047—$600,000
9. City of Oneida, Army Carcini, City Hall, 109 North Main Street, P.O. Box 550, Oneida, NY, 13421—$600,000
10. Village of Lake Placid, Robert J. Peacock, 301 Main Street, Lake Placid, NY, 12946—$600,000
11. City of Plattsburg, Clyde M. Rabideau, Jr., City Hall, Plattsburgh, NY, 12901—$600,000
12. Village of Potsdam, William J. Lawson, Civic Center, P.O. Box 5168, Potsdam, NY, 13676—$600,000
13. Village of Medina, Howard A. Lake, 600 Main St., Medina, NY, 14103—$600,000
14. City of Mechanicville, Patrick Hildreth, City Hall, 36 N. Main Street, Mechanicville, NY, 12118—$600,000

Dated: September 21, 1992.

Randall Erben,

Acting Assistant Secretary for Community Planning and Development.

BILLING CODE 4210-29-M

Office of Assistant Secretary for Housing—Federal Housing Commissioner

[Docket No. N-92-3411; FR-3195-N-02]

Fund Availability (NOFA) for Supportive Housing for Persons With Disabilities—Set-aside for Persons Disabled as a Result of Infection With the Human Acquired Immunodeficiency Virus

AGENCY: Office of Assistant Secretary for Housing—Federal Housing Commissioner, HUD.

ACTION: Notice of fund availability; Limited reopening of competition.

SUMMARY: On April 7, 1992, HUD announced in a Notice of Fund Availability (NOFA), published in the **Federal Register** (57 FR 11868), a competition for 285 units ($20,310,000) of the set-aside established in the Departments of Veterans Affairs and Housing and Urban Development, and Independent Agencies Appropriation Act, 1991 (Pub. L. 101-504, approved November 5, 1990) for supportive housing for persons disabled as a result of infection with the Human Acquired Immunodeficiency Virus (HIV). This competition has been completed, and there were not sufficient approvable applications to use all of the set-aside. HUD has decided to conduct a limited competition for the remaining 120 units in the set-aside. This competition is limited to all applicants who were unsuccessful in the April 7, 1992 competition.

DATES: The deadline date for receipt of revised applications is October 16, 1992. Revised applications must be received by 5:15 p.m. on the deadline date. The application deadline is firm as to date and hour. In the interest of fairness to all competing applicants, the Department will treat as ineligible for consideration any application that is received after the deadline. Applicants should take this practice into account and make early submission of their materials to avoid any risk of loss of eligibility brought about by unanticipated delays or other delivery-related problems.

ADDRESSES: Two copies of the revised applications must be delivered to Robert Wilden, Director, Housing for Elderly and Handicapped People Division, Division, Department of Housing and Urban Development, 451 Seventh Street, SW., room 6116, Washington, DC 20410. HUD will date-stamp incoming applications to evidence timely receipt, and upon request, provide the applicant with an acknowledgement of receipt. Applications submitted by facsimile are not acceptable.

FOR FURTHER INFORMATION CONTACT: Robert Wilden, Director, Housing for Elderly and Handicapped People Division, Department of Housing and Urban Development, 451 Seventh Street, SW., room 6116, Washington, DC 20410, telephone (202) 708-2730. The TDD number is 708-4594. (These are not toll-free numbers.)

SUPPLEMENTARY INFORMATION:

Paperwork Reduction Act Statement

In accordance with the Paperwork Reduction Act of 1980 (44 U.S.C. 3501-220), the information collection requirements have been assigned OMB Control Number 2502-0462.

Purpose and Substantive Description

On April 7, 1992, HUD announced in a Notice of Fund Availability (NOFA), published in the **Federal Register** (57 FR 11868), a competition for 285 units ($20,310,000) of the set-aside established in the Departments of Veterans Affairs and Housing and Urban Development, and Independent Agencies Appropriation Act, 1991 (Pub. L. 101-504, approved November 5, 1990) for supportive housing for persons disabled as a result of infection with the Human Acquired Immunodeficiency Virus (HIV). This competition has been completed, and there were not sufficient approvable applications to use all of the set-aside.

This NOFA announces another competition for the remaining set-aside units. This competition is limited to all applicants who were unsuccessful in the April 7, 1992 competition. The allocation of capital advance for this NOFA (remainder of set-aside) is 120 units; $11,490,000. Because of this limited amount of funds, it is impractical to conduct a larger competition. All such applicants will receive a personal letter informing them of this limited competition and a copy of this NOFA. Applicants are to revise their previous applications based upon the requirements specified in the April 7, 1992 NOFA. HUD will provide technical assistance as needed. Applicants are to submit their revised applications within 45 days of this NOFA. HUD Headquarters will review the revised applications and make selections based on the April 7, 1992 NOFA.

Applicants who were successful in response to the original announcement of this competition will be notified of their selection, and will not be affected by today's notice.

Authority: Section 811, National Affordable Housing Act, Sec. 7(d). Department of Housing and Urban Development Act (42 U.S.C. 3535(d)).

Dated: September 18, 1992.

James E. Schoenberger,

Associate General Deputy, Assistant Secretary for Housing Federal Housing Commissioner.

BILLING CODE 4210-27-M

Office of Fair Housing and Equal Opportunity

[Docket No. D-92-1002, FR-3345-D-01]

Amendment of Redelegation of Authority Under the Fair Housing Act

AGENCY: Office of the Assistant Secretary for Fair Housing and Equal Opportunity, HUD.

ACTION: Notice of amendment of redelegation of authority.

SUMMARY: By this notice, the Assistant Secretary for Fair Housing and Equal Opportunity for the Department of Housing and Urban Development is amending a redelegation of authority published in the **Federal Register** on January 3, 1992, at 57 FR 296, which redelegated authority, initially redelegated from the General Counsel to the Assistant Secretary, to the Directors of the HUD Regional Offices for Fair Housing and Equal Opportunity (Regional Directors) to make determinations of no reasonable cause respecting fair housing complaints under 24 CFR 103.400. This amendment to the redelegation of authority published on January 3, 1992, clarifies that the Assistant Secretary for Fair Housing and Equal Opportunity is authorized to reopen for purposes of reconsideration determinations by the Regional Directors, as well as his or her own determinations of no reasonable cause.

EFFECTIVE DATE: September 21, 1992.

FOR FURTHER INFORMATION CONTACT: Roy J. Rodriquez, Office of Fair Housing and Equal Opportunity, Department of Housing and Urban Development, room 5206, 451 Seventh Street, SW., Washington, DC 20410-2000, telephone: (202) 619-8041. (This is not a toll-free number.) A telecommunications device for hearing impaired persons (TDD) is available at 1-800-543-8294.

SUPPLEMENTARY INFORMATION: Part 103 of title 24 of the Code of Federal Regulations contains HUD's regulations governing the processing of complaints by members of the public under the Fair Housing Act. Under 24 CFR 103.400, in processing complaints under the Act, the General Counsel of HUD was delegated authority to make determinations of whether or not reasonable cause exists to believe that discrimination occurred. The General Counsel redelegated the authority in 24 CFR 103.400 to make determinations of no reasonable cause concerning fair housing complaints to the Assistant Secretary for Fair Housing and Equal Opportunity in a revised rule published in the **Federal Register** on December 28, 1990, at 55 FR 53293.

Under a redelegation of authority published in the **Federal Register** on January 3, 1992, at 57 FR 296, the Assistant Secretary for Fair Housing and Equal Opportunity redelegated to the Regional Directors the authority to issue determinations of no reasonable cause in processing fair housing complaints and to carry out functions attendant to such determinations. This redelegation did not affect the authority of the General Counsel, or the authority redelegated in part of Regional Counsel, to make determinations under 24 CFR 103.400.

This amendment to the redelegation of authority published on January 3, 1992, at 57 FR 296, clarifies that the Assistant Secretary for Fair Housing and Equal Opportunity is authorized to reopen for purposes of reconsideration determinations by Regional Directors, as well as his or her own determinations of no reasonable cause.

If the Assistant Secretary for Fair Housing and Equal Opportunity reopens for purposes of reconsideration a no reasonable cause determination, the Assistant Secretary or his or her designee shall promptly notify all parties to the complaint.

In another notice published elsewhere in today's **Federal Register**, the General Counsel amends a redelegation of authority published in the **Federal Register** on January 25, 1991, at 56 FR 2931, which redelegated authority to Regional Counsel respecting fair housing complaints under 24 CFR 103.400, to clarify that the General Counsel is authorized to reopen for purposes of reconsideration determinations of no reasonable cause by Regional Counsel, as well as his or her own determinations of no reasonable cause.

Accordingly, the Assistant Secretary for Fair Housing and Equal Opportunity amends the redelegation of authority published on January 3, 1992, at 57 FR 296, to read as follows:

Section A—Authority Redelegated

The Assistant Secretary for Fair Housing and Equal Opportunity redelegates to the Directors of the HUD Regional Offices of Fair Housing and Equal Opportunity (Regional Directors) the authority under 24 CFR 103.400:

(1) To determine in processing fair housing complaints that no reasonable cause exists to believe that a discriminatory housing practice has occurred or is about to occur;

(2) To carry out the following functions attendant to such a determination;

a. Issuing a short and plain written statement of the facts upon which the Regional Director has based the no reasonable case of determination.

b. Dismissing the complaint based on the no reasonable cause determination.

c. Notifying the aggrieved person and the respondent of the dismissal (including the written statement of facts) as required by 24 CFR 103.400(a)(1); and

d. Making public disclosure of the dismissal as described in 24 CFR 103.400(a)(1).

Section B—Authority Excepted

(1) The Assistant Secretary for Fair Housing and Equal Opportunity is authorized to reopen for purposes of reconsideration determinations of no reasonable cause by Regional Directors, as well as his or her own determinations of no reasonable cause.

(2) If the Assistant Secretary for Fair Housing and Equal Opportunity reopens for purposes of reconsideration any no reasonable cause determination, the Assistant Secretary or his or her designee shall promptly notify all parties to the complaint.

Section C—No Further Redelegation

The authority granted in Section A of this redelegation may not be further redelegated pursuant to this redelegation.

Section D—Redelegation Revoked

The redelegation of authority published in the **Federal Register** on January 3, 1992, at 57 FR 296 (Docket No. D-91-975; FR-3197-D-01) is revoked.

Authority: 42 U.S.C. 3600-3619; 42 U.S.C. 3535(d).

Dated: September 21, 1992.

Gordon H. Mansfield,

Assistant Secretary for Fair Housing and Equal Opportunity.

[FR Doc. 92-23627 Filed 9-29-92; 8:45 am]

BILLING CODE 4210-01-M

Office of the General Counsel

[Docket No. D-92-1001; FR-3344-D-01]

Amendment of Redelegation of Authority Under the Fair Housing Act

AGENCY: Office of the General Counsel, HUD.

ACTION: Notice of amendment of redelegation of authority.

SUMMARY: By this notice, the General Counsel for the Department of Housing and Urban Development is amending a redelegation of authority published in the **Federal Register** on January 25, 1991, at 56 FR 2931, which redelegated authority to Regional Counsel to make determinations respecting fair housing complaints under 24 CFR 103.400. This amendment clarifies that the General Counsel is authorized to reopen for purposes of reconsideration determinations of no reasonable cause Regional Counsel have made concerning fair housing complaints, as well as his or her own determinations of no reasonable cause.

EFFECTIVE DATE: September 21, 1992.

FOR FURTHER INFORMATION CONTACT: Harry L. Carey, Assistant General Counsel, Fair Housing Division, Office of the General Counsel, Department of Housing and Urban Development, room 9238, Washington, DC 20410. Telephone (202) 708–0570. (This is not a toll-free number.) The toll-free TDD Number for hearing impaired persons is 1–800–543–8294.

SUPPLEMENTARY INFORMATION: 24 CFR part 103 contains the Department's regulations governing the processing of complaints filed by members of the public under the Fair Housing Act. In a final rule published December 28, 1990, at 55 FR 53283, HUD revised 24 CFR 103.400(a) concerning determinations of whether there is or is not reasonable cause to believe that a discriminatory housing practice has occurred or is about to occur in connection with a complaint filed under the Fair Housing Act. Under the final rule, the Assistant Secretary for Fair Housing and Equal Opportunity refers to the General Counsel all complaints where the Assistant Secretary, based on the facts, believes that a discriminatory housing practice has occurred or is about to occur. All other cases will be dismissed by the Assistant Secretary under 24 CFR 103.400(a)(1). Where a referral is made, the General Counsel either: (1) Issues a reasonable cause determination and a charge (24 CFR 103.400(a)(2)(i)); (2) issues a no reasonable cause determination and a dismissal (24 CFR 103.400(a)(2)(ii)); or (3) refers the matter to the Department of Justice if the complaint involves the legality of a local zoning or land use law or ordinance (24 CFR 103.400(a)(3)).

Under a redelegation of authority published on January 25, 1991, at 56 FR 2931, the General Counsel redelegated to the Regional Counsel of the ten HUD regions the authority under 24 CFR 103.400, except authority concerning complaints involving complex facts or novel issues of law or the legality of local zoning or land use laws or ordinances. In that redelegation of authority, the General Counsel redelegated concurrent authority to determine which complaints involve complex facts or novel issues of law or involve the legality of local zoning or land use laws to the Associate General Counsel for Equal Opportunity and Administrative Law and to the Assistant General Counsel for Fair Housing.

This amendment to the redelegation of authority published on January 25, 1991, at 56 FR 2931, clarifies that the General Counsel is authorized to reopen for purposes of reconsideration Regional Counsel determinations of no reasonable cause. After such reconsideration, the General Counsel may affirm the Regional Counsel's determination that no reasonable cause exists to believe that a discriminatory housing practice has occurred or is about to occur, issue an independent determination that no reasonable cause exists, or issue a determination that reasonable cause exists to believe that a discriminatory housing practice has occurred or is about to occur.

This amendment to the redelegation of authority also clarifies that the General Counsel may decide to reopen for purposes of reconsideration his or her own determinations of no reasonable cause.

If the General Counsel reopens for purposes of reconsideration a no reasonable cause determination, the General Counsel or his or her designee shall promptly notify all parties to the complaint.

In another notice published elsewhere in today's **Federal Register**, the Assistant Secretary for Fair Housing and Equal Opportunity is publishing an amendment to the redelegation of authority published on January 3, 1992, at 57 FR 298, in which the Assistant Secretary for Fair Housing and Equal Opportunity redelegated to the Directors of HUD Regional Offices for Fair Housing and Equal Opportunity the authority to make determinations of no reasonable cause. The amendment to the redelegation of authority clarifies that the Assistant Secretary for Fair Housing and Equal Opportunity is authorized to reopen for purposes of reconsideration determinations of no reasonable cause made by Directors of HUD Regional Offices for Fair Housing and Equal Opportunity, as well as his or her own determinations of no reasonable cause.

According, the General Counsel amends the redelegation of authority published on January 25, 1991, at 56 FR 2931, to read as follows:

Section A—Authority Delegated

(1) The General Counsel redelegates the authority under 24 CFR 103.400, except with regard to complaints found by the General Counsel to involve either complex facts or novel issues of law, or the legality of local zoning or land use laws or ordinances, to the ten Regional Counsel.

(2) The General Counsel redelegates the authority to determine which complaints involve complex facts or novel issues of law, or involve the legality of local zoning or land use laws to the Associate General Counsel for Equal Opportunity and Administrative Law and to the Assistant General Counsel for Fair Housing.

Section B—Authority Excepted

(1) The General Counsel is authorized to reopen for purposes of reconsideration determinations made by Regional Counsel that no reasonable cause exists that a discriminatory housing practice has occurred or is about to occur. The General Counsel may, following reconsideration, affirm a determination that no reasonable cause exists to believe that a discriminatory housing practice has occurred or is about to occur, issue an independent determination that no reasonable cause exists, or issue a determination that reasonable cause exists to believe that a discriminatory housing practice has occurred or is about to occur.

(2) The General Counsel may reopen for purposes of reconsideration his or her own determinations of no reasonable cause.

(3) If the General Counsel reopens for purposes of reconsideration a no reasonable cause determination, the General Counsel or his or her designee shall promptly notify all parties to the complaints.

Section C—No Further Redelegation

The authority granted in section A of this redelegation may not be further redelegated pursuant to this redelegation.

Section D—Redelegation Revoked

The redelegation of authority published in the **Federal Register** on January 25, 1991, at 56 FR 2931 (Docket No. D–91–941; FR–2969) is revoked.

Authority: 42 U.S.C. 3600–3619; 42 U.S.C. 3525(d).

Dated: September 21, 1992.

Frank Keating,

General Counsel.

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

[CA-066-4333-12]

Notice of Closure; Palm Springs-South Coast Resource Area, Riverside County, CA

AGENCY: Bureau of Land Management, Interior.

ACTION: Correction to Notice of Closure of Public Entry to Public Lands.

SUMMARY: The original notice of closure as cited in the **Federal Register**/Vol. 57, No. 147, Page 33731, published on July 30, 1992 is hereby corrected under Summary to read, closed to public entry from the hours of 10 p.m. and 5:30 a.m.

Dated: September 19, 1992.

Russell L. Kaldenberg,

Area Manager.

[FR Doc. 92-23621 Filed 9-29-92; 8:45 am]

BILLING CODE 4310-40-M

[NV-930-92-4333-11; NV5-92-39]

Nevada: Temporary Closure of Certain Public Lands in the Las Vegas District for Management of the 1992 "Gold Coast 300" Off-Highway Vehicle (OHV) Race

ACTION: Temporary closure of certain Public Lands in Clark County, Nevada, on and adjacent to the 1992 "GOLD COAST 300" race course on October 10, 1992. Access will be limited to race officials, entrants, law-enforcement and emergency personnel, licensed permittee(s) and right-of-way grantees.

SUPPLEMENTARY INFORMATION: Certain public lands in the Las Vegas District, Clark County, Nevada will be temporarily closed to public access from 0001 hours, October 10, 1992, to 2359 hours, October 10, 1992, to protect persons, property, and public land resources on and adjacent to the High Desert Racing Association (HDRA) 1992 "GOLD COAST 300" OHV race course. Spectators are restricted to the start/finish, and the area shown as the high speed test section, along the paved I-15 frontage road only.

These temporary closures and restrictions are made pursuant to 43 CFR part 8364. The public lands to be closed or restricted are those lands adjacent to and including roads, trails and washes identified as the 1992 "GOLD COAST 300" OHV race course.

The following public lands restricted or closed are described as: The Hidden Valley area, T. 23 S., R. 61 E., all of sections 1 through 36; T. 24 S., R. 61 E., all of sections 1 through 36. The Erie area, T. 24 S., R. 60 E., all of sections 1 through 36; T. 23 S., R. 60 E., all of section 36. The Jean area, T. 25 S., R. 59 E., all of sections 1 through 36. The Jean Lake area, T. 25 S., R. 60 E., all of sections 1 through 36; T. 25 S., R. 61 E., all of sections 1 through 36. The Roach Lake area, T. 26 S., R. 59 E., all of sections 1 through 36; T. 27 S., R. 59 E., all of sections 1 through 36. The Beer Bottle Pass area, T. 26 S., R. 60 E., all of sections 1 through 36. The Lucy Grey area, T. 27 S., T. 60 E., all of sections 1 through 36.

The above legal land descriptions are for public lands within Clark County, Nevada. A map showing specific areas closed to public access is available from the following BLM office: The Las Vegas District Office, P.O. Box 26569, Las Vegas, Nevada 89126, (702) 647-5000. Any person who fails to comply with this closure order issued under 43 CFR part 8364 may be subject to the penalties provided in 43 CFR 8360.7.

Dated: September 16, 1992.

Colin P. Christensen,

Acting District Manager, Las Vegas District.

[FR Doc. 92-23623 Filed 9-29-92; 8:45 am]

BILLING CODE 4310-HC-M

[ID-010-02-1530-70-F279]

Foothills Fire in Rural Ada and Elmore Counties, ID; Emergency Closure

AGENCY: Bureau of Land Management, Interior.

ACTION: Emergency closure of roads, trails and all cross-country travel to mechanized vehicles (motor vehicles and mountain bikes) on BLM-administered lands within the perimeter of the Foothills Fire in rural Ada and Elmore Counties, Idaho.

SUMMARY: Operation of all mechanized vehicles (motorized vehicles and mountain bikes) is prohibited on public lands administered by the Bureau of Land Management within the boundaries of the Foothills Fire in Ada and Elmore Counties, Idaho to protect soil, watershed and wildlife values. The area is roughly bounded by the Foothills/Mayfield Road on the south, Lucky Peak Reservoir on the west, Cow Creek Road on the east and the South Fork of the Boise River on the north.

The closure will be in effect immediately and will continue for an indeterminate period, until such time as the authorized officer determines that the soil and vegetation within the burned area are sufficiently stabilized to sustain vehicle traffic. At that time some roads and trails will be re-opened for vehicle use. Exceptions to this closure, which will be posted, include vehicle use for administrative and emergency purposes. Under special circumstances, and upon request, the authorized officer may issue a permit allowing vehicle access into the area for other purposes, on a case-by-case basis. Within the perimeter of the fire, only the Blacks Creek Road will remain open to vehicle traffic. All traffic on the Blacks Creek Road will be confined to the roadbed and will not be permitted to travel off the road.

Definitions

(a) "Public lands" mean any lands or interest in lands owned by the United States and administered by the Bureau of Land Management.

(b) "Authorized Officer" means any employee of the Bureau of Land Management who has been delegated the authority to perform under title 43.

(c) "Emergency vehicles" means any military, fire or law enforcement vehicles in use for emergency purposes.

(d) "Administrative vehicles" refers to vehicles used by an employee, agent, or designated representative of the Federal Government, or one of its contractors, in the course of their employment, agency or representation.

SUPPLEMENTARY INFORMATION: This closure is being jointly established and administered by the BLM, the Boise National Forest, the Idaho Department of Lands, and the Idaho Department of Fish and Game. Mechanized vehicle use on lands within the burned area of the fire administered by those agencies are similarly restricted. Authority for this closure is contained in CFR title 43, subpart 8341.2 and complies with CFR title 43, subpart 8364.1 Closure and Restriction Orders. Violation of this closure order is in accordance with CFR title 43, subpart 8360.0-7 punishable by a fine not to exceed $1,000 and/or imprisonment not to exceed 12 months.

Dated: September 16, 1992.

Rodger E. Schmitt,

Associate District Manager.

BILLING CODE 4310-GG-M

INTERNATIONAL TRADE COMMISSION

[Investigations Nos. 732-TA-539-A through 539-F (Final)]

Uranium From Kazakhstan, Kyrgystan, Russia, Tajikistan, Ukraine, and Uzbekistan

AGENCY: United States International Trade Commission.

ACTION: Change in hearing date and date for prehearing briefs for the subject investigations.

EFFECTIVE DATE: September 25, 1991.

FOR FURTHER INFORMATION CONTACT: Tedford Briggs (202–205–3181), Office of Investigations, U.S. International Trade Commission, 500 E Street SW., Washington, DC 20436. Hearing-impaired persons can obtain information on this matter by contacting the Commission's TDD terminal on 202–205–1810. Persons with mobility impairments who will need special assistance in gaining access to the Commission should contact the Office of the Secretary at 202–205–2000.

SUPPLEMENTARY INFORMATION: On June 2, 1992, the Commission instituted the subject investigations and established a schedule for their conduct (57 FR 27065, June 17, 1992). Subsequently, the Department of Commerce extended the date for its final determinations in the investigations from August 11, 1992, to October 16, 1992 (57 FR 30946, July 13, 1992), and the Commission, revised its schedule in the investigations to conform with the Commerce's new schedule (57 FR 33735, July 30, 1992). On September 22, 1992, the Commission received a request from counsel for petitioners to change the date of the Commission's hearing and the date for the prehearing briefs.

The Commission's new schedule for the investigations is as follows: requests to appear at the hearing must be filed with the Secretary to the Commission not later than October 5, 1992; the prehearing conference will be held at the U.S. International Trade Commission Building on October 13, 1992; the prehearing staff report will be placed in the nonpublic record on October 5, 1992; the deadline for filing prehearing briefs is October 20, 1992; the hearing will be held at the U.S. International Trade Commission Building on October 23, 1992; and the deadline for filing posthearing briefs is October 28, 1992.

For further information concerning these investigations see the Commission's notice of investigations cited above and the Commission's Rules of Practice and Procedure, part 201, subparts A through E (19 CFR part 201), and part 207, subparts A and C (19 CFR part 207)..

Authority: These investigations are being conducted under authority of the Tariff Act of 1930, title VII. This notice is published pursuant to section 207.20 of the Commission's rules.

Issued: September 28, 1992.

By order of the Commission.

Paul R. Bardos,

Acting Secretary.

[FR Doc. 92–23856 Filed 9–29–92; 8:45 am]

BILLING CODE 7020–02–M

INTERSTATE COMMERCE COMMISSION

Privacy Act Records; Fee Billing and Collection System; Correction

AGENCY: Interstate Commerce Commission.

ACTION: Corrected Notice of additional Privacy Act system of records.

SUMMARY: At 57 FR 43261 (September 18, 1992), the Commission published a notice pertaining to the existence and character of an additional Privacy Act System of Records pursuant to 5 USC 552a(e)(4). The category of individuals covered by the system is the holders of fee billing accounts with the Commission. The categories of records in the system are developed from information which is supplied by individuals or entities that apply for accounts and financial information which may be obtained from credit bureaus or the Commission field staff. The information obtained will be available to the Commission and its staff and may be made available to government agencies such as the Internal Revenue Service, the Department of Justice, the General Accounting Office and credit bureaus and debt collection contractors for the purposes of collecting debt owed to the Commission.

This corrected notice is being published to provide for public comment on the proposed system of records. Also reference to the potential routine use of this information to publish a list of delinquent account holders is being omitted because the Commission has decided not to propose publishing such a list.

DATES: This notice is effective November 18, 1992. Comments are due October 30, 1992.

ADDRESSES: An original and two copies of comments on this proposed system of records should be submitted to: Privacy Officer, Room 1312, Interstate Commerce Commission, Washington, DC 20423

System Address for this system is as follows:

The System is located at the Interstate Commerce Commission Headquarters in Washington, DC. The System Manager and address are as follows:

Chief, Budget and Fiscal Office, Interstate Commerce Commission, Room 1330, 12th and Constitution Avenue, NW., Washington, DC 20423

FOR FURTHER INFORMATION CONTACT: Kathleen M. King 202–927–5493, [TDD for hearing impaired: [(202)–927–5721.]

SUPPLEMENTARY INFORMATION: The above described System is called Fee Billing and Collection System (32–20–0014). The policies and practices for storing, retrieving, accessing, retaining, and disposing of the records in the System are as follows: The records are maintained on magnetic discs and kept in a locked file cabinet under direct control of the responsible official. The record source categories for the System are the individuals and entities who request fee billing accounts, credit bureaus, and ICC field staff. Access to these files will be made upon request and presentation of proper identification. Notification and contesting record procedures are the same as for all other Privacy Act files. No exemption in the Privacy Act applies to this system of record. The authority for maintenance of this system is found at 49 USC 10321, and 31 USC 3711 *et seq.* and 9701.

By the Commission, S. Arnold Smith, Privacy Officer.

Sidney L. Strickland, Jr.,

Secretary.

Pursuant to 5 USC 552a(e)(4), the Interstate Commerce Commission republishes this notice pertaining to the existence and character, of an additional system of records.

32–20–0014

SYSTEM NAME:

Fee Billing and Collection System.

SYSTEM LOCATION:

Interstate Commerce Commission, Budget and Fiscal Office, Room 1330, 12th and Constitution Avenue, NW, Washington, DC 20423.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Individuals or entities that hold fee billing accounts.

CATEGORIES OF RECORDS IN THE SYSTEM:

Individual or entities submit Form ICC–1032 to request establishment of an account for fee billing purposes. Files contain a record of charges, including applicable interest, penalties and administrative charges and payments for fee billing accounts. File include correspondence and other documentation relating to collection activities of the ICC. The files may include financial information obtained from credit bureaus of developed by ICC field staff.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

The authority for maintenance of the system is found in 49 USC 10321, 31 USC 3711 *et seq.* and 9701.

ROUTINE USE OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

Maintaining a recordkeeping and accounting system to record changes, including applicable interest, penalties and administrative charges, and payments for fee billing accounts.

The information in the system of records may be provided to other federal agencies and entities including but not limited to the Internal Revenue Service, the General Accounting Office, and the Department of Justice. The information also may be provided to credit bureaus and debt collection contractors, as authorized by the Debt Collection Act of 1982, 31 USC 3711, *et seq.*

POLICIES AND PRACTICES FOR STORING, RETRIEVING ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

The Budget and Fiscal files consist of paper records maintained in folders, and on automated data storage devices and magnetic computer discs Files are secured at all times.

RETRIEVABILITY:

Indexed in data base by account number and name of account holder. Paper records filed by account number.

SAFEGUARDS:

Access to the records is limited to authorized staff in the Budget and Fiscal Office and to other authorized officials or employees of the ICC on a need-to-know basis as determined by the Budget and Fiscal Office. All records are kept in limited access areas during duty hours and in locked files at all other times.

RETENTION AND DISPOSAL:

To be retained for 5 years.

SYSTEM MANAGER AND ADDRESS:

Interstate Commerce Commission, Chief, Budget and Fiscal Office, Room 1330, 12th and Constitution Avenue, NW, Washington, DC 20423.

NOTIFICATION PROCEDURES:

See 49 CFR part 1007.

RECORD ACCESS PROCEDURES:

See 49 CFR part 1007.

CONTESTING RECORD PROCEDURES:

See 49 CFR part 1007.

RECORD SOURCE CATEGORIES:

Account holders, credit bureaus, ICC field staff.

SYSTEMS EXEMPTED FROM CERTAIN PROVISIONS OF THE ACT:

None.

[FR Doc. 92–23704 Filed 9–29–92; 8:45 am]

BILLING CODE 7035–01–M

[Finance Docket No. 32055]

The Three Rivers Railway Company—Acquisition and Operation Exemption—The Pittsburgh and Lake Erie Railroad Company

The Three Rivers Railway Company (TRRC), a wholly owned noncarrier subsidiary of CSX Transportation, Inc. (CSXT), has filed a notice of exemption to acquire and operate approximately 67.8 miles of rail line owned by The Pittsburgh and Lake Erie Railroad Company (P&LE). Additionally, it will acquire by assignment from P&LE and operate: (1) A leasehold interest in 61.15 miles of rail lines owned by CSXT and (2) 223.3 miles of incidental trackage rights over the lines of third party carriers. These properties together constitute substantially all of the rail lines currently operated by P&LE. The properties consist of the following:

(a) Substantially all of the operating rail lines currently owned by P&LE, including the following main or branch lines (together with associated branch and/or side tracks and rights to operate over associated P&LE track and property):

(1) Approximately 19.67 miles of P&LE's main line between milepost 44.415 at West Pittsburgh, PA, and milepost 64.065 at Youngstown, OH;

(2) Approximately 38.49 miles of P&LE's main line between milepost 15.37 at McKeesport, PA, and milepost 53.86 at Brownsville Junction, PA;

(3) Approximately 4.19 miles of P&LE's Ohio River Branch between milepost 0.0 and milepost 4.19 in Beaver County, PA;

(4) Approximately 0.25 miles of P&LE's Neville Island Branch, connecting with CSXT's main line at approximately milepost CP–5 at Stowe Township, PA;

(5) Approximately 1.7 miles of P&LE's Koppel Branch, connecting with CSXT's main line at Big Beaver Township and Koppel Borough, PA and;

(6) Approximately 3.5 miles of P&LE's New Castle and Big Run Branches, in Taylor Township and New Castle, PA; [1]

(b) P&LE's leasehold interest in approximately 61.15 miles of rail line owned by CSXT, between milepost CP 43 at West Pittsburgh, PA, and milepost CP 17Y at Sinns, PA; [2]

(c) Incidental trackage rights over:

(1) 86.5 miles of rail lines owned by Consolidated Rail Corporation, consisting of 60.6 miles between Youngstown, OH, and Ashtabula, OH (milepost 58.3 to milepost 0.0),[3] and 25.9 miles of rail line between Youngstown and Shenango, PA (mileposts 58.3 to milepost 57.6, milepost 68.2 to milepost 87.9, and milepost 130.8 to milepost 136.3);

(2) 136.8 miles of rail line owned by Norfolk and Western Railway Company, extending from milepost 138.3 at Geneva, OH (near Ashtabula), through Erie County, to milepost 1.5 at Buffalo, NY.

The proposed transportation was to have been consummated on or about September 11, 1992. TRRC certifies that upon consummation it will become a class III carrier.

This notice of exemption is related to Finance Docket No. 32056, *CSX Transp., Inc.—Control—The Three Rivers Ry. Co.* In that proceeding, CSX Corporation (CSX) and its wholly owned Subsidiary, CSXT, have petitioned under 49 U.S.C. 10505 for an exemption from the prior approval requirements of 49 U.S.C. 11343 *et seq.*, for their continuance in control of TRRC following consummation of the proposed transaction.[4]

---

[1] TRRC will also acquire P&LE's entire stock interest in the Mahoning State Line Railroad Company (Mahoning). P&LE currently holds 92.75 percent of the issued and outstanding common stock of Mahoning and will transfer that stock to TRRC under the terms of the Purchase and Sale Agreement. Mahoning owns a 4.61-mile branch line located between Bentley, and Shaw Junction, PA. However, that line was taken out of service, and no rail operations have been conducted on it for several years. Mahoning has no employees.

[2] The Sinns-West Pittsburgh line was sold to CSXT and simultaneously leased back to P&LE in 1991. See Finance Docket No. 31827, *CSX Transp., Inc.—Acq. & Lease Exempt.—Pittsburgh and Lake Erie R. Co.* (not printed), served June 28, 1991.

[3] Mileposts do not accurately reflect route miles because the trackage rights assigned included trackage from milepost 0.0 at Ashtabula to Ashtabula Harbor and certain trackage in Ashtabula Harbor yard.

[4] If the requested control exemption is not granted before the proposed acquisition is consummated, CSXT states that it will simultaneously with consummation place all the outstanding stock of TRRC in an independent voting trust pending final action on the control exemption. Under 49 CFR part 1013, its draft voting trust agreement was informally approved by Commission staff, and it was so notified in a letter dated August 28, 1992.

Any comments must be filed with the Commission and served on G. Paul Moates, Sidley & Austin, 1722 Eye Street NW., Washington, DC 20006.

The notice is filed under 49 CFR 1150.31. If the notice contains false or misleading information, the exemption is void *ab initio*. Petitions to revoke the exemption under 49 U.S.C. 10505(d) may be filed at any time. The filing of a petition to revoke will not automatically stay the transaction.

Decided: September 24, 1992.

By the Commission, David M. Konschnik, Director, Office of Proceedings.

Sidney L. Strickland, Jr.,

Secretary.

[FR Doc. 92-23705 Filed 9-29-92; 8:45 am]

BILLING CODE 7035-01-M

[Docket No. AB-55 (Sub-No. 439X)]

CSX Transportation, Inc.—Abandonment Exemption—in Wayne County, MI

CSX Transportation, Inc. (CSXT), has filed a notice of exemption under 49 CFR Part 1152 Subpart F-Exempt Abandonments to abandon a 1.06-mile rail line between milepost CSN-0.0, at Valuation Station 0+00, and milepost CSN-1.06, at Valuation Station 55.80, in Detroit, Wayne County, MI.

CSXT has certified that: (1) No local traffic has moved over the line for at least 2 years; (2) there is no overhead traffic on the line; and (3) no formal complaint filed by a user of rail service on the line (or by a State or local government entity acting on behalf of such user) regarding cessation of service over the line either is pending with the Commission or with any U.S. District Court or has been decided in complainant's favor within the 2-year period. CSXT further certified that the notice requirements at 49 CFR 1105.12 and 49 CFR 1152.50(d)(1) have been met.

As a condition to this exemption, any employee adversely affected by the abandonment shall be protected under Oregon Short Line R. Co.—Abandonment—Goshen, 360 I.C.C. 91 (1979). To address whether this condition adequately protects affected employees, a petition for partial revocation under 49 U.S.C. 10505(d) must be filed.

This exemption will be effective on November 4, 1992, unless stayed or a formal expression of intent to file an offer of financial assistance (OFA) is filed. Petitions to stay that do not involve environmental issues,[1] formal expressions of intent to file an OFA under 49 CFR 1152.27(c)(2),[2] and trail use/rail banking requests under 49 CFR 1152.29 [3] must be filed by October 15, 1992. Petitions to reopen or requests for public use conditions under 49 CFR 1152.28 must be filed by October 26, 1992, with: Office of the Secretary, Case Control Branch, Interstate Commerce Commission, Washington, DC 20423.

A copy of any pleading filed with the Commission should be sent to CSXT's representative: Charles M. Rosenberger, 500 Water Street J150, Jacksonville, FL 32202.

If the notice of exemption contains false or misleading information, the exemption is void *ab initio*.

CSXT has filed an environmental report which addresses the abandonment's effects, if any, on the environment and historic resources. SEE will issue an environmental assessment (EA) by October 9, 1992. Interested persons may obtain a copy of the EA by writing to SEE (Room 3219, Interstate Commerce Commission, Washington, DC 20423) or by calling Elaine Kaiser, Chief of SEE, at (202) 927-6248. Comments on environmental and historic preservation matters must be filed within 15 days after the EA is available to the public.

Environmental, historic preservation, public use, or trail use/rail banking conditions will be imposed, where appropriate, in a subsequent decision.

Decided: September 22, 1992.

By the Commission, David M. Konschnik, Director, Office of Proceedings.

Sidney L. Strickland, Jr.,

Secretary.

BILLING CODE 7035-01-M

DEPARTMENT OF LABOR

Office of the Secretary

Agency Recordkeeping/Reporting Requirements Under Review by the Office of Management and Budget (OMB)

Background: The Department of Labor, in carrying out its responsibilities under the Paperwork Reduction Act (44 U.S.C. chapter 35), considers comments on the reporting/recordkeeping requirements that will affect the public.

List of Recordkeeping/Reporting Requirements Under Review: As necessary, the Department of Labor will publish a list of the Agency recordkeeping/reporting requirements under review by the Office of Management and Budget (OMB) since the last list was published. The list will have all entries grouped into new collections, revisions, extensions, or reinstatements. The Departmental Clearance Officer will, upon request, be able to advise members of the public of the nature of the particular submission they are interested in.

Each entry may contain the following information:

- The Agency of the Department issuing this recordkeeping/reporting reporting requirement.
- The title of the recordkeeping/reporting requirement.
- The OMB and/or Agency identification numbers, if applicable.
- How often the recordkeeping/reporting requirement is needed.
- Whether small businesses or organizations are affected.
- An estimate of the total number of hours needed to comply with the recordkeeping/reporting requirements and the average hours per respondent.
- The number of forms in the request for approval, if applicable.
- An abstract describing the need for and uses of the information collection.

Comments and Questions: Copies of the recordkeeping/reporting requirements may be obtained by calling the Departmental Clearance Officer, Kenneth A. Mills ([202] 523-5095). Comments and questions about the items on this list should be directed to Mr. Mills, Office of Information Resources Management Policy, U.S. Department of Labor, 200 Constitution Avenue, NW., room N-1301, Washington, DC 20210. Comments should also be sent to the Office of Information and Regulatory Affairs, Attn: OMB Desk Officer for (BLS/DM/ESA/ETA/OLMS/MSHA/OSHA/PWBA/VETS), Office of Management and Budget, Room 3001, Washington, DC 20503 ([202] 395-6880).

Any member of the public who wants to comment on recordkeeping/reporting reporting requirements which have been submitted to OMB should advise Mr. Mills of this intent at the earliest possible date.

---

[1] A stay will be issued routinely where an informed decision on environmental issues, whether raised by a party or by the Commission's Section of Energy and Environment (SEE), cannot be made before the effective date of the notice of exemption. See Exemption of Out-of-Service Rail Lines, 5 I.C.C.2d 377 (1989). Any entity seeking a stay on environmental grounds is encouraged to file promptly so that the Commission may act on the request before the effective date.

[2] See Exempt. of Rail Abandonment—Offers of Finan. Assist., 4 I.C.C.2d 164 (1987).

[3] The Commission will accept a late-filed trail use request as long as it retains jurisdiction to do so.

Extension

Employment and Training Administration

Producers/Purchasers Survey Data Request
1205–0109; ETA 8566
On Occasion
Businesses or other for-profit; Small businesses or organizations 30 respondents; 53 total hours; 1 hour 45 minutes per response; 1 form.

To acquire aggregate statistics needed by the Secretary of Labor to make determinations of eligibility of petitioning worker to apply for worker trade adjustment assistance in accordance with Section 223 of the Trade Act of 1974, as amended.

Mine Safety and Health Administration

Rock Burst Control Plan
1219–0097
On occasion
Business and other for-profit; small businesses or organizations
2 respondents; 12 hours per response; 24 total burden hours

Requires metal and nonmetal mine operation to develop a rock burst control plan within 90 days after a rock burst has been experienced. Plans are required to be made available to MSHA inspectors and are used by the mine operator for work assignments to assure miner safety and to schedule correction work.

Signed at Washington, DC, this 25th day of September, 1992.

Kenneth A. Mills,

Departmental Clearance Officer.

[FR Doc. 92-23702 Filed 9-29-92; 8:45 am]

BILLING CODE 4510-30-M

Mine Safety and Health Administration

Petitons for Modification

The following parties have filed petitions to modify the application of mandatory safety standards under section 101(c) of the Federal Mine Safety and Health Act of 1977.

1. Hecla Mining Company

[Docket No. M-92-09-M]

Hecla Mining Company, Box C-8000, Coeur d'Alene, Idaho 83814-1931 has filed a petition to modify the application of 30 CFR 57.4761 (underground shops) to its Lucky Friday Mine (I.D. No. 10-00088) located in Shoshone County, Idaho. The petitioner proposes to perform limited routine maintenance and repair work at the shaft stations of Lucky Friday 4900, 5300, 5500, 5700, 5900 and 6100 level development headings. The petitioner requests that existing air control doors near the shaft station qualify as control doors for the temporary maintenance and repair area. The petitioner asserts that the proposed alternate method would provide at least the same measure of protection as would the mandatory standard.

Request for Comments

Persons interested in these petitions may furnish written comments. These comments must be filed with the Office of Standards, Regulations and Variances, Mine Safety and Health Administration, room 627, 4015 Wilson Boulevard, Arlington, Virginia 22203. All comments must be postmarked or received in that office on or before October 30, 1992. Copies of these petitions are available for inspection at that address.

Dated: September 23,1992.

Patricia W. Silvey,

Director, Office of Standards, Regulations and Variances.

[FR Doc. 92-23703 Filed 9-29-92; 8:45 am]

BILLING CODE 4510-43-M

NATIONAL SCIENCE FOUNDATION

Permit Application Received Under the Antarctic Conservation Act of 1978

AGENCY: National Science Foundation.

ACTION: Notice of permit application received under the Antarctic Conservation Act of 1978, Public Law 95-541.

SUMMARY: The National Science Foundation (NSF) is required to publish notice of permit applications received to conduct activities regulated under the Antarctic Conservation Act of 1978. NSF has published regulations under the Antarctic Conservation Act of 1978 at title 45 part 670 of the Code of Federal Regulations. This is the required notice of permit applications received.

DATES: Interested parties are invited to submit written data, comments, or views with respect to this permit application by October 2, 1992. Permit applications may be inspected by interested parties at the Permit Office, address below.

ADDRESSES: Comments should be addressed to Permit Office, room 627, Division of Polar Programs, National Science Foundation, Washington, DC 20550.

FOR FURTHER INFORMATION CONTACT: Thomas F. Forhan at the above address or (202) 357-7817.

SUPPLEMENTARY INFORMATION: The National Science Foundation, as directed by the Antarctic Conservation Act of 1978 (Pub. L. 95-541), has developed regulations that implement the "Agreed Measures for the Conservation of Antarctic Fauna and Flora" for all United States citizens. The Agreed Measures, developed by the Antarctic Treaty Consultative Parties, recommended establishment of a permit system for various activities in Antarctica and designation of certain animals and certain geographic areas as requiring special protection. The regulations establish such a permit system to designate Specially Protected Areas and Sites of Special Scientific Interest.

The applications received are as follows: 1. *Applicant:* Sean Turner, Dept. Biological Sciences, University of Cincinnati, Cincinnati, OH 45221-0006.

Activity for Which Permit Requested

Import into USA. Enter Specially Protected Area. Enter Site of Special Scientific Interest. Recovery of lichnenized sandstone rocks from Linnaeus Terrace. Specific rocks are part of a long term experiment on growth enhancement of photosynthetic, endolithic microorganisms beginning in 1987. Rocks will be returned to McMurdo station for shipment to the University of Cincinnati for completion of analysis. Travel to the Cape Royds Adelie penguin rookery and collection of algal samples from the ponds surrounding the rookery. Samples collected will be of floating photosynthetic algal mats from the ponds nearest Shackleton's hut.

Location: Linnaeus Terrace, Asgard Mountains, Victoria Land. Cape Royds, Ross Island.

Dates: 10/15/92-2/15/93.

2. *Applicant:* Peter P. Sheridan, Dept. Biological Sciences, University of Cincinnati, Cincinnati, OH 45221-0006.

Activity for Which Permit Requested

Import into USA. Enter Specially Protected Area. Enter Site Recovery of lichnenized sandstone rocks from Linnaeus Terrace. Specific rocks are part of a long term experiment on growth enhancement of photosynthetic, enolithic microorganisms beginning in 1987. Rocks will be returned to McMurdo station for shipment to the University of Cincinnati for completion of analysis. Travel to the Cape Royds Adelie penguin rookery and collection of algal samples from the ponds surrounding the rookery. Samples collected will be of floating photosynthetic algal mats from the ponds nearest Shackleton's hut.

Location: Linnaeus Terrace, Asgard Mountains, Victoria Land. Cape Royds, Ross Island.

Dates: 10/15/92–2/15/93.

3. *Applicant:* Gerald L. Kooyman, Physiological Research Lab 0204, Scripps Institution of Oceanography, University of California, San Diego, La Jolla, CA 92093.

Activity for Which Permit Requested

Taking. Enter specially protected area. Two breeding birds will be captured on the sea ice near the Cape Crozier colony. They will be held for about 30 minutes while they are weighed and a satellite transmitter is attached by quick-drying epoxy and nylon ties to the mid-line of the back. After attachment, the birds will be released to continue their journey to sea. When they return two or three weeks later, the transmitter will be removed. If recapture fails, the unit will be shed in late December when the bird moults. The Crozier birds occupy the most southerly and one of the smallest known colonies. It borders the southern Ross Sea polynga. There is no information on where these birds feed, nor how long the foraging cycles are. The satellite location data would provide this information, and whether their distribution at sea mixes with those birds from larger colonies to the north.

The birds at the McMurdo Sound ice edge will be handled in a similar manner as above to attach time-depth recorders or 3 satellite transmitters. Eight of these birds will be stomach lavaged for food habitat studies. Except for the satellite transmitters which will be moulted off, the TDR's will be removed after a few hours of diving by the birds. Birds are commonly found feeding in this area, but nothing is known about their foraging behavior, food habits or from what colonies they may come. This study will begin to determine this, as well as for the first time observe and determine foraging behavior in the areas where the birds are feeding.

Location: Cape Crozier emperor penguin colony. McMurdo Sound ice edge.

Dates: 10/15/92–01/1/93.

Thomas F. Forhan,

Permit Office, Division of Polar Programs.

BILLING CODE 7555-01-M

Special Emphasis Panel in Chemical and Thermal Systems; Meetings

In accordance with Federal Advisory Committee Act (Pub. L. 92–463, as amended), the National Science Foundation (NSF) announces the following meetings.

Date and Time: October 14, 1992; 8:30 a.m. to 5 p.m.

Place: Room 523, 1800 G Street, NW., Washington, DC 20550.

Contact Person: Drs. Charles Malderelli and Robert Wellek, Program Directors, room 1115, National Science Foundation, 1800 G Street, NW, Washington, DC 20550. Telephone: (202) 357–9606.

Date and Time: October 21, 1992; 8:30 a.m. to 5 p.m.

Place: Room 540B, 1800 G Street, N.W., Washington, DC 20550.

Contact Person: Drs. Charles Malderelli and Robert Wellek, Program Directors, room 1115, National Science Foundation, 1800 G Street, NW., Washington, DC 20550. Telephone: (202) 357–9606.

Type of Meetings: Closed.

Purpose of Meetings: To provide advice and recommendations concerning support of research proposals submitted to the NSF for possible funding.

Agenda: To review and evaluate Small Business Innovation Research (SBIR) proposals as part of the selection process for awards.

Reason for Closing: The proposals being reviewed include information of a proprietary or confidential nature, including technical information; financial data, such as salaries; and personal information concerning individuals associated with the proposals. These matters are exempt under 5 U.S.C. 552b(c) (4) and (6) of the Government in the Sunshine Act.

Dated: September 24, 1992.

M. Rebecca Winkler,

Committee Management Officer.

[FR Doc. 92–23628 Filed 9–29–92; 8:45 am]

BILLING CODE 7555-01-M

NATIONAL TRANSPORTATION SAFETY BOARD

Public Hearing in Secaucus, NJ; Highway Accident

In connection with its investigation of a charter bus loss of control, overturn, and fire in Vernon, New Jersey, on July 26, 1992, the National Transportation Safety Board will convene a public hearing at 9 a.m., on Wednesday, October 21, 1992, in Ballroom D of the Meadowlands Hilton Hotel, Two Harmon Plaza, Secaucus, New Jersey. For further information contact Ted Lopatkiewicz, Office of Public Affairs, National Transportation Safety Board, 490 L'Enfant Plaza East, SW., Washington, DC 20594, telephone (202) 382–0660.

Dated: September 24, 1992.

Bea Hardesty,

Federal Register Liaison Officer.

BILLING CODE 7533-01-M

NUCLEAR REGULATORY COMMISSION

Nuclear Safety Research Review Committee; Notice of Meeting

The Nuclear Safety Research Review Committee (NSRRC) will hold a telephone conference meeting on October 22, 1992, from 4 p.m. until approximately 6 p.m. (If necessary, the meeting will be extended to approximately 7 p.m.) The designated conference room for the meeting will be the Rockville Room in the Bethesda Marriott Hotel, 5151 Pooks Hill Road, Bethesda, Maryland 20814, with conference call hook-ups to participating committee members not present in the conference room. The meeting will be held in accordance with the requirements of the Federal Advisory Committee Act (FACA). This meeting is open for attendance by members of the public who wish to be present at the committee's deliberations. Communication with committee members not present in the conference room will be by speaker phone located in the designated conference room.

The NSRRC provides advice to the Director of the Office of Nuclear Regulatory Research (RES) and through him to the Commission on matters of overall management importance in the direction of the NRC's program of nuclear safety research. The purpose of this meeting is to deliberate on reports submitted to the Committee by two of its subcommittees. The first subject of deliberations will be the report of the Severe Accident Subcommittee on the "Severe Accident Research Program Plan Update," Draft NUREG–1365, Rev. 1. The second subject will be the report of the Advanced Reactor Subcommittee on AP–600 thermal-hydraulic testing plans, including the proposed conduct of integral systems tests at the ROSA facility of the Japanese Atomic Energy Research Institute.

Members of the public may file written statements regarding any matter to be discussed at the meeting. Members of the public may also make requests to speak at the meeting, but permission to speak will be subject to the approval of the Committee chairperson in accordance with procedures established by the Committee.

Inquiries regarding this notice, any subsequent changes in the status of the meeting, the filing of written statements, and requests to speak at the meeting may be made to the Designated Federal Officer, Mr. George Sege (telephone: 301/492–3904), Monday through Friday, between 8:15 a.m. and 5 p.m.

Dated: September 24, 1992.

John Hoyle,

Advisory Committee Management Officer.

BILLING CODE 7590-01-M

Biweekly Notice

Applications and Amendments to Operating Licenses Involving No Significant Hazards Considerations

I. Background

Pursuant to Public Law (P.L.) 97-415, the Nuclear Regulatory Commission (the Commission or NRC staff) is publishing this regular biweekly notice. P.L. 97-415 revised section 189 of the Atomic Energy Act of 1954, as amended (the Act), to require the Commission to publish notice of any amendments issued, or proposed to be issued, under a new provision of section 189 of the Act. This provision grants the Commission the authority to issue and make immediately effective any amendment to an operating license upon a determination by the Commission that such amendment involves no significant hazards consideration, notwithstanding the pendency before the Commission of a request for a hearing from any person.

This biweekly notice includes all notices of amendments issued, or proposed to be issued from September 4, 1992, through September 18, 1992. The last biweekly notice was published on September 16, 1992 (57 FR 42767).

Notice of Consideration of Issuance of Amendment To Facility Operating License, Proposed No Significant Hazards Consideration Determination, And Opportunity For a Hearing

The Commission has made a proposed determination that the following amendment requests involve no significant hazards consideration. Under the Commission's regulations in 10 CFR 50.92, this means that operation of the facility in accordance with the proposed amendments would not (1) involve a significant increase in the probability or consequences of an accident previously evaluated; or (2) create the possibility of a new or different kind of accident from any accident previously evaluated; or (3) involve a significant reduction in a margin of safety. The basis for this proposed determination for each amendment request is shown below.

The Commission is seeking public comments on this proposed determination. Any comments received within 30 days after the date of publication of this notice will be considered in making any final determination. The Commission will not normally make a final determination unless it receives a request for a hearing.

Written comments may be submitted by mail to the Rules and Directives Review Branch, Division of Freedom of Information and Publications Services, Office of Administration, U.S. Nuclear Regulatory Commission, Washington, DC 20555, and should cite the publication date and page number of this **Federal Register** notice. Written comments may also be delivered to Room P-223, Phillips Building, 7920 Norfolk Avenue, Bethesda, Maryland from 7:30 a.m. to 4:15 p.m. Federal workdays. Copies of written comments received may be examined at the NRC Public Document Room, the Gelman Building, 2120 L Street, NW., Washington, DC 20555. The filing of requests for hearing and petitions for leave to intervene is discussed below.

By October 30, 1992, the licensee may file a request for a hearing with respect to issuance of the amendment to the subject facility operating license and any person whose interest may be affected by this proceeding and who wishes to participate as a party in the proceeding must file a written request for a hearing and a petition for leave to intervene. Requests for a hearing and a petition for leave to intervene shall be filed in accordance with the Commission's "Rules of Practice for Domestic Licensing Proceedings" in 10 CFR Part 2. Interested persons should consult a current copy of 10 CFR 2.714 which is available at the Commission's Public Document Room, the Gelman Building, 2120 L Street, NW., Washington, DC 20555 and at the local public document room for the particular facility involved. If a request for a hearing or petition for leave to intervene is filed by the above date, the Commission or an Atomic Safety and Licensing Board, designated by the Commission or by the Chairman of the Atomic Safety and Licensing Board Panel, will rule on the request and/or petition; and the Secretary or the designated Atomic Safety and Licensing Board will issue a notice of hearing or an appropriate order.

As required by 10 CFR 2.714, a petition for leave to intervene shall set forth with particularity the interest of the petitioner in the proceeding, and how that interest may be affected by the results of the proceeding. The petition should specifically explain the reasons why intervention should be permitted with particular reference to the following factors: (1) the nature of the petitioner's right under the Act to be made a party to the proceeding; (2) the nature and extent of the petitioner's property, financial, or other interest in the proceeding; and (3) the possible effect of any order which may be entered in the proceeding on the petitioner's interest. The petition should also identify the specific aspect(s) of the subject matter of the proceeding as to which petitioner wishes to intervene. Any person who has filed a petition for leave to intervene or who has been admitted as a party may amend the petition without requesting leave of the Board up to fifteen (15) days prior to the first prehearing conference scheduled in the proceeding, but such an amended petition must satisfy the specificity requirements described above.

Not later than fifteen (15) days prior to the first prehearing conference scheduled in the proceeding, a petitioner shall file a supplement to the petition to intervene which must include a list of the contentions which are sought to be litigated in the matter. Each contention must consist of a specific statement of the issue of law or fact to be raised or controverted. In addition, the petitioner shall provide a brief explanation of the bases of the contention and a concise statement of the alleged facts or expert opinion which support the contention and on which the petitioner intends to rely in proving the contention at the hearing. The petitioner must also provide references to those specific sources and documents of which the petitioner is aware and on which the petitioner intends to rely to establish those facts or expert opinion. Petitioner must provide sufficient information to show that a genuine dispute exists with the applicant on a material issue of law or fact. Contentions shall be limited to matters within the scope of the amendment under consideration. The contention must be one which, if proven, would entitle the petitioner to relief. A petitioner who fails to file such a supplement which satisfies these requirements with respect to at least one contention will not be permitted to participate as a party.

Those permitted to intervene become parties to the proceeding, subject to any limitations in the order granting leave to intervene, and have the opportunity to participate fully in the conduct of the hearing, including the opportunity to present evidence and cross-examine witnesses.

If a hearing is requested, the Commission will make a final determination on the issue of no significant hazards consideration. The final determination will serve to decide when the hearing is held.

If the final determination is that the amendment request involves no

significant hazards consideration, the Commission may issue the amendment and make it immediately effective, notwithstanding the request for a hearing. Any hearing held would take place after issuance of the amendment.

If the final determination is that the amendment request involves a significant hazards consideration, any hearing held would take place before the issuance of any amendment.

Normally, the Commission will not issue the amendment until the expiration of the 30-day notice period. However, should circumstances change during the notice period such that failure to act in a timely way would result, for example, in derating or shutdown of the facility, the Commission may issue the license amendment before the expiration of the 30-day notice period, provided that its final determination is that the amendment involves no significant hazards consideration. The final determination will consider all public and State comments received before action is taken. Should the Commission take this action, it will publish in the **Federal Register** a notice of issuance and provide for opportunity for a hearing after issuance. The Commission expects that the need to take this action will occur very infrequently.

A request for a hearing or a petition for leave to intervene must be filed with the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, DC 20555, Attention: Docketing and Services Branch, or may be delivered to the Commission's Public Document Room, the Gelman Building, 2120 L Street, NW., Washington DC 20555, by the above date. Where petitions are filed during the last ten (10) days of the notice period, it is requested that the petitioner promptly so inform the Commission by a toll-free telephone call to Western Union at 1-(800) 325-6000 (in Missouri 1-(800) 342-6700). The Western Union operator should be given Datagram Identification Number N1023 and the following message addressed to **(Project Director)**: petitioner's name and telephone number, date petition was mailed, plant name, and publication date and page number of this **Federal Register** notice. A copy of the petition should also be sent to the Office of the General Counsel, U.S. Nuclear Regulatory Commission, Washington, DC 20555, and to the attorney for the licensee.

Nontimely filings of petitions for leave to intervene, amended petitions, supplemental petitions and/or requests for hearing will not be entertained absent a determination by the Commission, the presiding officer or the Atomic Safety and Licensing Board that the petition and/or request should be granted based upon a balancing of factors specified in 10 CFR 2.714(a)(1)(i)-(v) and 2.714(d).

For further details with respect to this action, see the application for amendment which is available for public inspection at the Commission's Public Document Room, the Gelman Building, 2120 L Street, NW., Washington, DC 20555, and at the local public document room for the particular facility involved.

Baltimore Gas and Electric Company, Docket Nos. 50-317 and 50-318, Calvert Cliffs Nuclear Power Plant, Unit Nos. 1 and 2, Calvert County, Maryland

Date of amendments request: September 1, 1992

Description of amendments request: The proposed amendments would revise the Unit Nos. 1 and 2 Spent Fuel Pool enrichment limit. The Spent Fuel Pool enrichment limit is being decreased from the current value of 5.0 weight percent (w/o) U-235 to 4.52 w/o U-235 because of errors in the calculations performed by ABB/Combustion Engineering which supported 5.0 w/o U-235. Baltimore Gas and Electric Company has imposed administrative limits on the maximum allowable enrichment, based on analysis performed when the errors were identified, until the requested decrease in the enrichment limit is processed.

Basis for proposed no significant hazards consideration determination: As required by 10 CFR 50.91(a), the licensee has provided its analysis of the issue of no significant hazards consideration, which is presented below:

1. Would not involve a significant increase in the probability or consequences of an accident previously evaluated.

The only accident previously evaluated in the Updated Final Safety Analysis Report which involves the Spent Fuel Pool is the fuel handling accident. Fuel assembly enrichment is not a precursor to this accident. The isotopic inventory assumed in the fuel handling accident is not adversely effected by the decrease in enrichment of U-235. Therefore, the proposed change to the Spent Fuel Pool enrichment limit does not involve a significant increase in the probability or consequences of an accident previously evaluated.

2. Would not increase the possibility of a new or different type of accident from any accident previously evaluated.

The proposed change to the allowed enrichment of fuel in the Spent Fuel Pool does not result in any change to the configuration or operation of the plant. Specifically, no new hardware is being added to the plant as a part of the proposed change nor are there significantly different types of operations being introduced.

The only potential for a new type of accident lies in the area of accidental criticality. The Spent Fuel Pool maintains fuel in a subcritical condition with k-effective less than 0.95 (no credit is taken for soluble boron being present in the pool). The required degree of subcriticality continues to be met at the new enrichment limit of 4.52 w/o U-235 which ensures an accidental criticality will not occur. Therefore, the proposed change to the Spent Fuel Pool enrichment limit does not create the possibility of a new or different type of accident from those previously evaluated.

3. Would not involve a significant reduction in the margin of safety.

The margin of safety maintained in the Spent Fuel Pool is the degree to which the fuel is maintained subcritical. The proposed change to the allowed enrichment of fuel in the Spent Fuel Pool will ensure that the margin of safety is maintained. The maximum multiplication factor for storing fuel assemblies with a 4.52 w/o U-235 is 0.95. The previously approved maximum multiplication factor for 5.0 w/o was 0.946. The new maximum multiplication factor does not represent a significant reduction in the margin of safety. Therefore, the proposed change to the Spent Fuel Pool enrichment limit does not involve a significant reduction in the margin of safety.

The NRC staff has reviewed the licensee's analysis and, based on this review, it appears that the three standards of 50.92(c) are satisfied. Therefore, the NRC staff proposes to determine that the amendments request involves no significant hazards consideration.

Local Public Document Room location: Calvert County Library, Prince Frederick, Maryland 20678.

Attorney for licensee: Jay E. Silbert, Esquire, Shaw, Pittman, Potts and Trowbridge, 2300 N Street, NW., Washington, DC 20037.

NRC Project Director: Robert A. Capra

Baltimore Gas and Electric Company, Docket Nos. 50-317 and 50-318, Calvert Cliffs Nuclear Power Plant, Unit Nos. 1 and 2, Calvert County, Maryland

Date of amendments request: September 1, 1992

Description of amendments request: The proposed amendments will make changes to Technical Specification 3.8.2.1, AC Distribution - Operating, for Units 1 and 2, by adding additional requirements to the Limiting Condition for Operation (LCO). The LCO changes will require that all 480 volt emergency busses must be operable in Modes 1 through 4. In addition, two safety-related motor control centers for each unit are added to the list of AC busses which must be operable.

Basis for proposed no significant hazards consideration determination:

As required by 10 CFR 50.91(a), the licensee has provided its analysis of the issue of no significant hazards consideration, which is presented below:

1. Would not involve a significant increase in the probability or consequences of an accident previously evaluated.

Adding the additional operating requirements to the Alternating Current (AC) Electrical Distribution System will have no effect on the probability of an accident as more busses will be required to be in service. The proposed Limiting Condition for Operation (LCO) specifies that all four 480-volt Emergency Busses and the two safety-related Motor Control Centers (MCCs) are required to be operable during power operation. These changes ensure that there are two independent and redundant power sources to the engineered safety features systems as assumed in the Chapter 14 accident analyses and that the plant will be able to meet the single-failure criteria.

Adding the additional operating requirements to the AC Electrical Distribution System will decrease the consequences of an accident as electrical redundancy to Engineered Safety Features Actuation System (ESFAS) is required. Therefore, changing the operating bus requirements will not involve a significant increase in the probability or consequences of an accident previously evaluated.

2. Would not create the possibility of a new or different type of accident from any accident previously evaluated.

The proposed changes to the AC Electrical Distribution System operating bus requirements do not represent a significant change in the configuration of the plant. Specifically, no new hardware is being added to the plant as part of the proposed changes. Ensuring additional emergency busses are operable does not create the possibility of a new or different type of accident. Therefore, this change would not create the possibility of a new or different type of accident from those previously evaluated.

3. Would not involve a significant reduction in the margin of safety.

The proposed changes to the AC Electrical Distribution System operating bus requirements will ensure that the margin of safety is maintained or increased. Increasing the number of busses that are required for operation ensures that there are two independent and redundant power sources to the engineered safety features systems and that the plant will be able to meet single-failure criteria. Therefore, the proposed changes do not involve a significant reduction in the margin of safety.

The NRC staff has reviewed the licensee's analysis and, based on this review, it appears that the three standards of 50.92(c) are satisfied. Therefore, the NRC staff proposes to determine that the amendments request involves no significant hazards consideration.

Local Public Document Room location: Calvert County Library, Prince Frederick, Maryland 20678.

Attorney for licensee: Jay E. Silbert, Esquire, Shaw, Pittman, Potts and Trowbridge, 2300 N Street, NW., Washington, DC 20037.

NRC Project Director: Robert A. Capra

Baltimore Gas and Electric Company, Docket Nos. 50-317 and 50-318, Calvert Cliffs Nuclear Power Plant, Unit Nos. 1 and 2, Calvert County, Maryland

Date of amendments request: September 1, 1992

Description of amendments request: The proposed amendments are requested in response to Generic Letter 90-06, "Resolution of Generic Issue 70, 'Power-Operated Relief Valve and Block Valve Reliability,' and Generic Issue 94, 'Additional Low-Temperature Overpressure Protection For Light-Water Reactors,' pursuant to 10 CFR 50.54 (f)." The amendment request is divided into two specific areas.

Change No. 1 of the proposed amendments would revise the Technical Specifications for both Units 1 and 2 to improve the reliability of the Reactor Coolant System's power-operated relief valves (PORVs) and their associated block valves for overpressure protection during normal operation and anticipated transients. This requested change is based on the recommendations in Enclosure A of Generic Letter 90-06.

Change No. 2 would revise the Technical Specifications for both Units 1 and 2 to improve the availability of the Reactor Coolant Systems's power-operated relief valves (PORVs) for low temperature overpressure protection. This requested change is based on the recommendations in Enclosure B of Generic Letter 90-06.

Basis for proposed no significant hazards consideration determination: As required by 10 CFR 50.91(a), the licensee has provided its analysis of the issue of no significant hazards consideration, which is presented below:

[Change No. 1]

1. Would not involve a significant increase in the probability or consequences of an accident previously evaluated.

Implementation of these changes will increase the availability of the power-operated relief valves (PORVs) and their associated block valves. The increased availability is obtained through maintaining power to the block valves which are closed to control PORV seat leakage and by requiring shutdown and repairing the PORV(s) if the PORV(s) is inoperable for reasons other than excessive seat leakage. There is also an improvement in the availability of the LTOP system by requiring shutdown if the block valves cannot be restored to operable status. Closing the block valves to control excessive PORV seat leakage establishes reactor coolant pressure boundary integrity. Maintaining power to the block valve provides the flexibility of reopening the valves to allow the PORV to be used to control reactor pressure.

An inadvertent opening of both PORVs is considered as an initiator for a Reactor Coolant System (RCS) depressurization transient in Updated Final Safety Analysis Report (UFSAR), Section 14.8. This transient, if not terminated, would be considered a small break loss of coolant accident (LOCA). The small break LOCA analyses results are provided in Section 14.17. However, the RCS depressurization transient is considered to occur during power operation. Closing the block valve for a PORV that is inoperable due to causes other than excessive seat leakage and removing power to the block valves assures that the valve will not be inadvertently opened when the condition of the PORV is uncertain. Since this change does not propose opening the PORVs during power operation, and the power is removed from the closed block valve, there is no increase in the probability of this event. The change to the Action Statement to close the block valve to isolate a PORV that has excessive seat leakage and maintain power to the block valve does not significantly increase the probability of a small break LOCA. This revision will allow the block valve to remain operable and to be subsequently opened to allow the PORV to be used to control reactor pressure. Therefore, this change does not involve a significant increase in the probability or consequences of an accident previously evaluated.

Placing the PORV in override closed when the block valve is inoperable establishes remedial measures to preclude the potential for having a stuck-open PORV that could not be isolated because of an inoperable block valve. The time allowed to restore the block valve(s) to operable status is based upon the remedial action time limits for an inoperable PORV.

The allowed out-of-service times (AOT) have been revised to provide adequate time to reach the non-applicable condition. The AOT for inoperable PORV(s) due to causes other than excessive seat leakage have been established to be consistent with their LTOP safety function.

These proposed changes will increase the availability of the PORVs and their associated block valves for overpressure protection during normal operation and anticipated transients. Additionally, there is no change in the function of the PORVs or the block valves in response to any previously evaluated accidents. Therefore, the proposed changes will not include a significant increase in the probability or consequences of an accident previously evaluated.

2. Would not create the possibility of a new or different type of accident from any accident previously evaluated.

The changes to the Action Statements for the PORVs and the associated block valves will improve the availability of these valves for overpressure protection during normal operation and anticipated transients. These proposed changes do not involve a change in the design of the PORVs or the block valves

and do not make a change in the function of these valves. Therefore, the proposed changes would not create the possibility of a new or different type of accident from any accident previously evaluated.

3. Would not involve a significant reduction in a margin of safety.

The proposed changes will improve the availability of the PORVs and the block valves for overpressure protection during normal operation and anticipated transients and will ensure that the margin of safety for overpressure protection events is maintained for the LTOP region. The proposed changes do not impact the setpoints or response of the PORVs or block valves. Therefore, the changes would not involve a significant reduction in a margin of safety.

[Change No. 2]

1. Would not involve a significant increase in the probability or consequences of an accident previously evaluated.

Implementation of the shortened allowed out-of-service time (AOT) for the low temperature overpressure protection (LTOP) systems in Modes 5 and 6 will increase the availability of this system. The plant is at the highest risk from low temperature overpressure transients with the reactor coolant temperature less than or equal to 200F, especially when in a water-solid condition. The additional administrative restriction provides assurance that the LTOP system is available if needed for a low temperature overpressure transient. Requiring the block valves to be opened when in the LTOP region will allow the power-operated relief valves (PORVs) to perform their LTOP safety function.

The proposed changes do not impact the current design or analysis for a low-temperature overpressure event. There is no change in the function of the low temperature overpressure protection system in response to any previously evaluated event so there is no change in the probability or consequences. Therefore, these changes would not involve a significant increase in the probability or consequences of any accident previously evaluated.

2. Would not create the possibility of a new or different type of accident from any accident previously evaluated.

The proposed changes do not involve a change in the design or operation of the low temperature overpressure protection systems. The decrease in the AOT for a PORV inoperable in Modes 5 and 6 will provide additional availability of the LTOP system. Requiring the block valves to be open while in the LTOP region will ensure that the PORVs will function as required. Therefore, this change would not create the possibility of a new or different type of accident from any accident previously evaluated.

3. Would not involve a significant reduction in a margin of safety.

The changes do not impact the setpoints or response of the LTOP systems, but increase the availability of the systems by decreasing the AOT for a PORV in Modes 5 and 6. Having the block valves open will ensure that the margin of safety that the LTOP system provides for low temperature overpressure transients is maintained. Therefore, the changes would not involve a significant reduction in the margin of safety.

The NRC staff has reviewed the licensee's analysis and, based on this review, it appears that the three standards of 50.92(c) are satisfied. Therefore, the NRC staff proposes to determine that the amendments request involves no significant hazards consideration.

Local Public Document Room location: Calvert County Library, Prince Frederick, Maryland 20678.

Attorney for licensee: Jay E. Silbert, Esquire, Shaw, Pittman, Potts and Trowbridge, 2300 N Street, NW., Washington, DC 20037.

NRC Project Director: Robert A. Capra

Carolina Power & Light Company, et al., Docket Nos. 50-325 and 50-324, Brunswick Steam Electric Plant, Units 1 and 2, Brunswick County, North Carolina

Date of amendments request: August 25, 1992

Description of amendments request: The proposed change increases the acceptable limits for control rod average scram insertion time from 0.040 to 0.049 seconds for each of the rod positions listed in Technical Specifications (TSs) 3.1.3.3 and 3.1.3.4. In addition, the proposed change revises the values of mu (mean value for statistical scram time distribution), sigma (standard deviation) and tau sub A (average scram time) specified in TS 3.2.2.2.

Basis for proposed no significant hazards consideration determination: As required by 10 CFR 50.91(a), the licensee has provided its analysis of the issue of no significant hazards consideration, which is presented below:

1. The proposed change does not involve a significant increase in the probability of an accident previously evaluated. The values of mu, sigma, and [tau sub A] in Technical Specification 3.2.2.2 do not affect any physical system or equipment which would change the probability of an accident. The proposed change to Technical Specifications 3.1.3.3. and 3.1.3.4 to increase the control rod average insertion times will not cause unplanned initiation of the control rod system, will not impede the initiation of the control rod system, and will not affect the probability of a control roddrop accident. Therefore, the proposed change does not result in a significant increase in the probability of an accident previously evaluated.

The proposed change does not involve a significant increase in the consequences of an accident previously evaluated. Technical Specifications 3.1.3.3 and 3.1.3.4 ensure that control rod insertion times are consistent with those used in the accident analysis. Specifically, control rod scram insertion times are listed in the Technical Specifications to ensure that actual control rod drive performance during a plant transient is bounded by the reactivity assumed in the safety analysis to be inserted by a reactor scram. The control rod system is analyzed to bring the reactor subcritical at a rate fast enough to prevent the Minimum Critical Power Ratio (MCPR) from becoming less than the Safety Limit MCPR of Technical Specification 2.1.2 during the limiting power transient analyzed in Section 15.2 of the Updated Final Safety Analysis Report. The proposed change will define the scram insertion time from de-energization of the scram solenoid to dropout of the control rod position reed switch instead of from de-energization of the scram solenoid to pick-up of the control rod position reed switch. The proposed values of mu, sigma, and [tau sub A] will maintain fuel thermal limits equivalent to the existing fuel thermal limits and ensure that the Safety Limit MCPR stated in Technical Specification 2.1.2 is not exceeded. Consequently, fuel failure assumptions previously used in analyses will not be exceeded, thereby ensuring the consequences of previously evaluated accidents and operational transients will not be significantly increased.

2. The proposed amendment does not create the possibility of a new or different kind of accident from any accident previously evaluated. The proposed changes to Technical Specifications 3.1.3.3. and 3.1.3.4 to increase the control rod average insertion times and the proposed changes to the values of mu, sigma, and [tau sub A] in Technical Specification 3.2.2.2 do not alter or change the manner in which the control rod system performs its safety function. Also, the proposed changes will not cause unplanned initiation of the control rod system, nor will the proposed changes impede the initiation of the control rod system. No new or different mode of plant operation will be created as a result of the proposed changes; therefore, no new or different kinds of accident than that previously evaluated will be created.

3. The proposed change does not involve a significant reduction in the margin of safety. As discussed in Item 1 above, technical Specifications 3.1.3.3 and 3.1.3.4 ensure that control rod insertion times are consistent with those used in the accident analysis. Specifically, control rod scram insertion times are listed in the Technical Specifications to ensure that actual control rod drive performance during a plant transient is bounded by the reactivity assumed in the safety analysis to be inserted by a reactor scram. The control rod system is analyzed to bring the reactor subcritical at a rate fast enough to prevent the MCPR from becoming less than the Safety Limit MCPR of Technical Specification 2.1.2 during the limiting power transient analyzed in Section 15.2 of the Updated Final Safety Analysis Report. The proposed change will define the scram insertion time from de-energization of the scram solenoid to dropout of the control rod position reed switch instead of from de-energization of the scram solenoid to pickup of the control rod position reed switch. The proposed values of mu, sigma, and [tau sub A] will maintain fuel thermal limits equivalent to the existing fuel thermal limits

and ensure that the Safety Limit MCPR stated in Technical Specification 2.1.2 is not exceeded. By ensuring that the Safety Limit MCPR is not exceeded, fuel failure assumptions previously used in the safety analysis will not be exceeded; therefore, the margin of safety will not be significantly reduced.

The NRC staff has reviewed the licensee's analysis and, based on this review, it appears that the three standards of 10 CFR 50.92(c) are satisfied. Therefore, the NRC staff proposes to determine that the amendment request involves no significant hazards consideration.

Local Public Document Room location: University of North Carolina at Wilmington, William Madison Randall Library, 601 S. College Road, Wilmington, North Carolina 28403-3297.

Attorney for licensee: R. E. Jones, General Counsel, Carolina Power & Light Company, P. O. Box 1551, Raleigh, North Carolina 27602

NRC Project Director: Elinor G. Adensam

Carolina Power & Light Company, Docket No. 50-261, H. B. Robinson Steam Electric Plant, Unit No. 2, Darlington County, South Carolina

Date of amendment request: November 27, 1991

Description of amendment request: The proposed amendment would revise Technical Specifications (TS) 3.3.1.2 and 3.3.1.3 so one safety injection accumulator may be inoperable due to improper pressure, borated water volume, or boron concentration for the same Limiting Condition for Operation (LCO) time currently allowed by the TSs for inoperability due to being isolated. The existing TS provide no LCO for inoperability due to these causes. The proposed amendment is intended to reduce operator confusion and prevent unnecessary entry into TS 3.0 (eight-hour shutdown requirement).

Basis for proposed no significant hazards consideration determination: As required by 10 CFR 50.91(a), the licensee has provided its analysis of the issue of no significant hazards consideration, which is presented below:

1. Operation of the facility, in accordance with the proposed amendment, would not involve a significant increase in the probability or consequences of an accident previously analyzed because the proposed change, including the four-hour LCO time requirement, is consistent with requirements provided within the existing TSs. The proposed change only clarifies the existing TS by providing an Action Statement to address an inoperable accumulator. In addition, the accumulators are an accident mitigating system that is not part of any previously evaluated accident initiating sequences; therefore, the probability of a previously analyzed accident is not significantly increased.

The safety significance associated with an inoperable accumulator is considered to be no different than that associated with an isolated accumulator. Additional time would be provided to allow the accumulator safety parameters to be returned to within specifications without taking the plant through the perturbation of a power reduction.

Although there are physical differences between an isolated accumulator and an inoperable accumulator, the implementation of a four hour LCO due to an inoperable accumulator does not affect the margin of safety, nor does it increase the consequences of an accident previously evaluated. Our past and present LOCA [Loss- of-Coolant Accident] calculation methods, performed in accordance with 10CFR50 Appendix K, are not able to show acceptable results with an inoperable accumulator. The inherent presumption is that the four hour time period is short enough that we are allowed to consider the accumulators as always being operable. [NOTE: The NRC staff does not endorse the licensee's position in the preceding sentence. The statement, however, does not affect our determination.] More specifically, a qualitative assessment shows that the probability of a LOCA occurring during the four hour LCO is low enough to be inconsequential. Therefore, implementation of a four hour LCO due to an inoperable accumulator is consistent with the margin of safety incorporated into the existing Technical Specifications.

It can be postulated that the proposed LCO time to hot shutdown may exceed the time requirement of the existing specification. However, any difference between the current and proposed time to hot shutdown is expected to be minor and is considered to have an inconsequential impact on plant safety.

2. Operation of the facility in accordance with the proposed amendment would not create the possibility of a new or different kind of accident from any accident previously evaluated because the proposed change provides a specific Action Statement to address a probable plant condition. Additionally, no modifications are being made to plant equipment or procedures; therefore, no new or different accident scenarios can be introduced.

3. Operation of the facility, in accordance with the proposed amendment, would not involve a significant reduction in a margin of safety. Implementation of the proposed amendment will allow an accumulator to bein operable for four hours prior placing the reactor in hot shutdown with normal operating procedures. The time until achieving hot shutdown will not be significantly different than the current situation,wwhich requires hot shutdown within eight hours. Based on a qualitative assessment of LOCA calculation methods, the implementation of a four hour LCO due to an inoperable accumulator will maintain the margin of safety already provided by the LCO for an isolated accumulator. Therefore, operation of the facility in accordance with the proposed amendment will not involve a reduction in a margin of safety.

The NRC staff has reviewed the licensee's analysis and, based on this review, it appears that the three standards of 10 CFR 50.92(c) are satisfied, Therefore, the NRC staff proposes to determine that the amendment request involves no significant hazards consideration.

Local Public Document Room location: Hartsville Memorial Library, Home and Fifth Avenues, Hartsville, South Carolina 29535

Attorney for licensee: R. E. Jones, General Counsel, Carolina Power & Light Company, P. O. Box 1551, Raleigh, North Carolina 27602

NRC Project Director: Elinor G. Adensam

Carolina Power & Light Company, et al., Docket No. 50-400, Shearon Harris Nuclear Power Plant, Unit 1, Wake and Chatham Counties, North Carolina

Date of amendment request: September 8, 1992

Description of amendment request: The proposed change decreases the sum of the minimum safety injection intact line flow rates, with a single charging/ safety injection pump running, as described in Technical Specification Surveillance Requirement 4.5.2.h.1.a from "greater than or equal to 379 gpm" to "greater than or equal to 348 gpm."

Basis for proposed no significant hazards consideration determination: As required by 10 CFR 50.91(a), the licensee has provided its analysis of the issue of no significant hazards consideration, which is presented below:

1. The proposed amendment does not involve a significant increase in the probability or consequences of an accident previously evaluated.

The proposed change affects Safety Injection flow which is a mitigative condition following the occurrence of an accident and has no impact on the probability of an accident occurring.

The change in the Surveillance flowrate is accommodated by the current ECCS-LOCA analysis without altering its analyzed consequences, i.e., there are no changes in the limiting case LOCA consequences for minimum safety injection flow and the existing margins to the 10 CFR 50.46 acceptance limits for core cooling are preserved. Similarly, there is no impact on the consequences predicted by the accident analyses as presented in the FSAR. Therefore, there would be no increase in the probability or consequences of an accident previously evaluated.

2. The proposed amendment does not create the possibility of a new or different kind of accident from any accident previously evaluated.

The limiting consequences associated with minimum conditions of Safety Injection flow are already addressed within the ECCS-LOCA analysis provided in FSAR Sections 6.2 and 6.3, and the supporting documentation. The proposed change in the acceptable minimum Safety Injection flow condition for one Safety Injection pump is consistent with the analyzed accident assumptions. The proposed change makes no other changes to the facility or its operation. Therefore, the proposed changes do not create the possibility of a new or different kind of accident from any accident previously evaluated.

3. The proposed amendment does not involve a significant reduction in the margin of safety.

The proposed change decreases the sum of the minimum Safety Injection intact line flow rates as described in Technical Specification 4.5.2.h.1.a "to greater than or equal to 348 gpm." This limit is established in conjunction with the minimum flow requirement of the ECCS-LOCA analysis. The acceptance limits for the ECCS-LOCA analysis are described in NUREG-1038 (Supplement 4) as being the 10 CFR 50.46 prescribed criteria for core cooling. The proposed change is consistent with the assumptions under which the ECCS-LOCA analysis was performed. Therefore, the proposed changes do not involve a significant reduction in a margin of safety.

The NRC staff has reviewed the licensee's analysis and, based on this review, it appears that the three standards of 10 CFR 50.92(c) are satisfied. Therefore, the NRC staff proposes to determine that the amendment request involves no significant hazards consideration.

Local Public Document Room location: Cameron Village Regional Library, 1930 Clark Avenue, Raleigh, North Carolina 27605.

Commonwealth Edison Company, Docket Nos. 50-237 and 50-249, Dresden Nuclear Power Station, Units 2 and 3, Grundy County, Illinois

Date of application for amendment request: September 2, 1992

Description of amendment request: The proposed amendment would remove Table 3.7.1, "Primary Containment Isolation" from the current Technical Specifications as addressed in Generic Letter 91-08. References to Table 3.7.1 will also be removed. The table will be incorporated into the plant procedures in the Administrative Controls Section of the Technical Specifications.

Basis for proposed no significant hazards consideration determination: As required by 10 CFR 50.91(a), the licensee has provided its analysis of the issue of no significant hazards consideration, which is presented below:

1) Involve a significant increase in the probability or consequences of an accident previously evaluated because:

This is an administrative change to remove the component list of Primary Containment Isolation Valves, Table 3.7.1 from the Technical Specifications. The Limiting Condition for Operation (LCO), 3.7.D, is being revised to define which components the LCO applies. The wording of the revised LCO encompasses all of the components listed in the current Specification 3.7.D. Removal of this component list does not change the probability of any accident initiators or change any other relevant initial assumptions. Also, there is no change to the consequences of an accident previously evaluated, because removing this list from Technical Specifications does not change either the onsite or offsite dose consequences resulting from the event. The component list will be controlled by an Administrative Procedure and can only be changed by the 10 CFR 50.59 change process with review and approval per the Onsite Review and Investigative Function specified by Technical Specification Section 6.0, Administrative Controls. Therefore, there is no increase in either the probability or consequences of an accident previously evaluated.

2) Create the possibility of a new or different kind of accident from any accident previously evaluated because:

This is an administrative change to control the list of Primary Containment Isolation Valves outside the Dresden Unit 2 and Unit 3 Technical Specifications. The administrative controls provided to control this component list assure that the design and operation of the plant will continue to be in accordance with the UFSAR, Facility License and the associated Technical Specifications. Therefore, the possibility of a new or different kind of accident from any previously evaluated is not created.

3) Involve a significant reduction in the margin of safety because:

The Limiting Condition for Operation for Technical Specification 3.7.D, Primary Containment Isolation Valves, is revised by this Technical Specification change to specifically define the components to which the LCO applies. Therefore, removal of Technical Specification Table 3.7.1, which lists the specific components to which the LCO applies does not change the scope or applicability of the specification. The component list will be controlled administratively with any changes to the list made in accordance with the 10 CFR 50.59 change process. Therefore, this is an administrative change only and there is no reduction in the margin of safety.

The NRC staff has reviewed the licensee's analysis and, based on this review, it appears that the three standards of 10 CFR 50.92(c) are satisfied. Therefore, the NRC staff proposes to determine that the amendment request involves no significant hazards consideration.

Local Public Document Room location: Morris Public Library, 604 Liberty Street, Morris, Illinois 60450

Attorney for licensee: Michael I. Miller, Esquire; Sidley and Austin, One First National Plaza, Chicago, Illinois 60690

NRC Project Director: Richard J. Barrett

Commonwealth Edison Company, Docket No. 50-237, Dresden Nuclear Power Station, Unit 2, Grundy County, Illinois

Date of amendment request: September 2, 1992

Description of amendment request: The proposed amendment would revise the technical specifications to reference Siemens Nuclear Power's (SNP) new, NRC-approved methodologies for reload licensing calculations. The use of these methodologies increases the Safety Limit Minimum Critical Power Ratio (SLMCPR) to reflect the effects of fuel channel bow and core modelling. Specifications referring to the SLMCPR for GE fuel will be removed.

Basis for proposed no significant hazards consideration determination: As required by 10 CFR 50.91(a), the licensee has provided its analysis of the issue of no significant hazards consideration, which is presented below:

The proposed amendment does not involve a significant increase in the probability or consequences of an accident previously evaluated.

The NRC-approved methodologies to be referenced in the Technical Specifications are used to evaluate core operating limits and do not introduce physical changes to the plant. SNP will continue to analyze the same spectrum of limiting events for each reload under the new methodology. The increase in the SLMCPR adequately accounts for the effects of the new methods and potential effects of channel bow, and will continue to maintain fuel cladding integrity by ensuring that 99.9% of the fuel rods will avoid transition boiling during limiting anticipated operational occurrences. The removal of the SLMCPR for GE fuel has no effect since the Dresden Station Unit 2 core currently does not contain GE fuel. Therefore, the changes do not effect the probability or consequences of accidents previously evaluated.

The proposed amendment does not create the possibility of a new or different kind of accident from any accident previously evaluated.

The referenced NRC-approved methodologies will continue to be used to analyze limiting transients, and do not introduce any physical changes to the plant; therefore, the possibility of a new or different kind of accident is not created. Similarly, the basis of the SLMCPR has not been changed and will continue to maintain fuel cladding integrity during limiting anticipated operational occurrences.

The proposed amendment does not involve a significant reduction in a margin of safety.

The referenced NRC-approved methodologies will continue to ensure fuel design and licensing criteria are met. The increase in the SLMCPR reflects the new methods, bounds the effect of fuel channel bow for Cycle 14, and provides additional conservatism to facilitate future reload licensing reviews under the provisions of 10

CFR 50.59. Therefore, the margin between the safety limit and potential fuel failure after the onset of transition boiling is not decreased.

The NRC staff has reviewed the licensee's analysis and, based on this review, it appears that the three standards of 10 CFR 50.92(c) are satisfied. Therefore, the NRC staff proposes to determine that the amendment request involves no significant hazards consideration.

Consolidated Edison Company of New York, Docket No. 50-247, Indian Point Nuclear Generating Unit No. 2, Westchester County, New York

Date of amendment request: July 29, 1992

Description of amendment request: This amendment request is a followup to the amendment request of May 29, 1992, published in the Federal Register on July 8, 1992 (57 FR 30242), which changed the Technical Specifications Section 1.0, Definitions, to accommodate a 24-month fuel cycle and which proposed the extension of the surveillance intervals for 26 specific surveillances. This amendment request proposes extending the surveillance intervals to 24 months for the following additional specific surveillances:

(1) Main Steam Stop Valves
(2) Overpressure Protection System (OPS) Backup Nitrogen System
(3) Main Fire Pump Capacity
(4) Emergency Fire Pump Diesel Preventive Maintenance
(5) Steam Driven Auxiliary Boiler Feed Pump
(6) Fire Hose Station
(7) Containment Air Filtration System
(8) Reactor Cavity Level Alarm System
(9) Diesel Driven Fire Pumps
(10) Diesel Fire Pump Batteries
(11) Hydrogen Recombiners
(12) Fan Cooler Units - Charcoal; Post Accident Containment Air Vent - Charcoal
(13) Containment Spray Check Valves; City Water Service/Containment Isolation Valves

The submittal of item (5), Steam Driven Auxiliary Boiler Feed Pump, completes the safety evaluation required for extending the surveillance interval for TS 4.8.A.2 which includes all Auxiliary Boiler Feed Pumps. The safety evaluation for the Motor Driven Auxiliary Boiler Feed Pumps was submitted with the May 29, 1992, amendment request.

The submittal of item (6), Fire Hose Station, completes the safety evaluation required for extending the surveillance interval for TS 4.14.E.1.c, which includes all interior fire stations. The safety evaluation for interior fire stations inside containment was submitted with the May 29, 1992, amendment request.

The submittal of item (13), Containment Spray Check Valves; City Water Service/Containment Isolation Valves completes the safety evaluation required for extending the surveillance interval for TS 4.14.A.1.g(ii) which covers valves in the High Pressure Fire Protection System required for protection of Safe Shutdown Systems and not testable with the plant on-line. The safety evaluation for the remainder of the valves in this category was submitted with the May 29, 1992, amendment request.

It is also proposed to change TS Table 1.4.1, Item 22, Accumulator Level and Pressure, to Item 22a., Accumulator Level, and Item 22b., Accumulator Pressure. This is an administrative change and is proposed because the safety evaluations for these two functions were submitted separately.

The changes requested by the licensee are related to a 24-month fuel cycle and are in accordance with Generic Letter 91-04, "Changes in Technical Specification Surveillance Intervals to Accommodate a 24-Month Fuel Cycle."

Basis for proposed no significant hazards consideration determination: As required by 10 CFR 50.91(a), the licensee has provided its analysis of the issue of no significant hazards consideration, which is presented below:

(1) Main Steam Stop Valves

The proposed change does not involve a significant hazards consideration since:

1. There is no significant increase in the probability or consequences of an accident.

In all of the tests examined, the main steam stop valves performed acceptably. For an operating cycle that has been extended several months, no degradation mechanism has been identified which would change the results of these previous tests. There is minimal risk that the valves would not perform acceptably over an extended cycle.

2. The possibility of a new or different kind of accident from any previously analyzed has not been created.

Past tests provide reasonable confidence that the main steam stop valves will perform in an acceptable manner for an extended operating cycle. In addition, redundancy exists which prevents the blowdown of more than one steam generator even if one valve fails to close. Thus, it is concluded that the plant will perform within its design basis for an extended operating cycle.

3. There has been no reduction in the margin of safety.

Based upon reliability demonstrated by past surveillance testing and redundancy there is minimal impact upon the margin of safety by extending the surveillance cycle to a maximum of 30 months.

(2) Over Pressure Protection System Backup Nitrogen System

The proposed change does not involve a significant hazards consideration since:

1. There is no significant increase in the probability or consequences of an accident.

In addition to the surveillance test performed at refueling intervals, Section 3.1.A.4 requires that the OPS be operable whenever RCS temperature is equal to or less than 305F subject to other limitations. The determination of operability is by test. Under these circumstances it is highly unlikely that both the normal OPS system and the backup would fail.

2. The possibility of a new or different kind of accident from any previously analyzed has not been created.

The primary overpressure protection system is a kept [is kept] in standby during normal operation and is not required except when the plant is preceding [proceeding] to cold shutdown. By its design, the primary nitrogen system is inherently reliable. The backup nitrogen system has similar characteristics. Loss of both systems at the same time is considered highly unlikely.

3. There has been no reduction in the margin of safety.

Due to the reliability of the primary and backup nitrogen systems and the requirement to determine operability of the primary system by test just prior to use, it is not believed that the margin of safety is significantly compromised by extending the surveillance interval for the backup nitrogen system.

(3) Main Fire Pump Capacity

The proposed change does not involve a significant hazards consideration since:

1. There is no significant increase in the probability or consequences of an accident.

The system is in standby status during plant operation except for test periods which are of limited duration. Periodic tests confirm continued pump operability. Accordingly little wear is induced on the pumps and their capacity is expected to be unaffected by a longer plant operating cycle.

2. The possibility of a new or different kind of accident from any previously analyzed has not been created.

Extension of the plant operating cycle will primarily extend the time spent by the pumps in standby service which will have no affect upon pump capacity.

3. There has been no reduction in the margin of safety.

As the pump capacity is expected to be unaffected by a longer plant operating cycle there will be no impact upon the margin of safety.

(4) Emergency Fire Pump Diesel Preventive Maintenance

The proposed change does not involve a significant hazards consideration since:

1. There is no significant increase in the probability or consequences of an accident.

Except for periodic testing, the diesel is in a standby state and not subject to operational stress. Periodic testing imposes limited wear as evidenced by the absence of major repairs during past maintenance. Extension of the operating cycle for several months is expected to have vitally [virtually] no impact upon diesel operability. Monthly testing would detect any degradation.

2. The possibility of a new or different kind of accident from any previously analyzed has not been created.

Extension of the surveillance interval by several months is expected to have no impact on operability of the diesel. Monthly tests will serve to confirm operability during this period.

3. There has been no reduction in the margin of safety.

As there is expected to be no impact upon diesel operability, no impact upon the margin of safety is expected.

(5) Steam Driven Auxiliary Boiler Feed Pump

The proposed change does not involve a significant hazards consideration since:

1. There is no significant increase in the probability or consequences of an accident.

Past test data indicates a highly reliable system with no deficiencies noted in four surveillances. In addition, there is an ASME [American Society of Mechanical Engineers] Section XI quarterly test which would monitor pump performance during the extended operating cycle. There is sufficient confidence that the turbine driven pump would perform adequately during the extended operating cycle. There is also the added assurance provided by the quarterly ASME Section XI test.

2. The possibility of a new or different kind of accident from any previously analyzed has not been created.

Given the high reliability of the turbine driven auxiliary feedwater pump, monitoring provided by the ASME Section XI test and the redundant diverse motor driven auxiliary feedwater pumps there is sufficient assurance that a new type, or different kind of accident, will not be introduced.

3. There has been no [significant] reduction in the margin of safety.

Due to the high reliability of turbine driven pump, the alternate motor driven pumps and other periodic means of monitoring pump operability, the margin of safety has not been compromised.

(6) Fire Hose Station

The proposed change does not involve a significant hazards consideration since:

1. There is no increase in the probability or consequences of an accident.

The system is normally not required to operate and during the operating period is in standby. It is not subject to operating conditions during their [this] period. Extending the plant operating period by several months is not expected to result in any accelerated degradation mechanism.

2. The possibility of a new or different kind of accident from any previously analyzed has not been created.

Past surveillance tests have not indicated any degradation mechanism which would be expected to render the hose system inoperable if its term in standby were extended several months.

3. There has been no significant reduction in the margin of safety.

Past test data confirm that the hoses are reliable when inspected on an 18 month basis. Extending the surveillance interval by several months is expected to have minimal impact on the hoses.

(7) Containment Air Filtration System

The proposed change does not involve a significant hazards consideration since:

1. There is no increase in the probability or consequences of an accident.

Except for the fans, the HEPA [high-efficiency particulate air] filter/charcoal bank is in standby status during normal operation and is not subjected to operational stress. In addition, every 31 days flow is initiated through the unit and maintained for 15 minutes for the purpose of detecting abnormalities. This periodic test would detect any unit degradation during the extended operating interval. Adequate monitoring by this test as well as good past performance virtually assures adequate performance of the unit in an extended operation cycle.

2. The possibility of a new or different kind of accident from any analyzed has not been created.

Due to the factors enumerated in (1) above, the capability of the Containment Fan Cooler System to perform its intended safety function in an extended operating cycle in [is] virtually assured. In addition due to the design of the systems for Containment Heat Removal, defense in depth exists due to the multiple combination of components which can perform this function.

3.There has been no significant reduction in the margin of safety.

Due to the proven reliability based on past test data, the defense-in-depth design of the Containment heat removal system and periodic testing the margin of safety is essentially unchanged by the proposed change in surveillance testing.

(8) Reactor Cavity Level Alarm System

The proposed change does not involve a significant hazards consideration since:

1. There is no significant increase in the probability or consequences of an accident.

The level switches and associated alarm circuits have proven to be generally reliable devices. Only one departure from the norm was observed over the past five years and it was in the conservative direction. The alarm occurred when required but did not clear. This deviation is considered independent of time and would have occurred regardless of the interval between tests. Extension of the surveillance interval is expected to have minimal impact on performance of the monitoring system.

2. The possibility of a new or different kind of accident from any previously analyzed has not been created.

The reactor cavity sump monitoring system is considered highly reliable based on past performance. In addition the system is redundant. Thus, it is considered highly likely that the system will perform in the extended surveillance interval.

3. There has been no significant reduction in the margin of safety.

As it is considered highly likely that the monitoring system will perform its intended safety function during the extended surveillance interval, the impact upon the margin of safety is minimal.

(9) Diesel Driven Fire Pumps

The proposed change does not involve a significant hazards consideration since:

1. There is no significant increase in the probability or consequences of an accident.

Past testing of the diesel driven pumps has established an excellent reliability record. In addition a search of written reports indicates only one deficiency. From a reliability viewpoint, safety will not be compromised by extending the surveillance interval.

2. The possibility of a new or different kind of accident from any previously analyzed has not been created.

In addition to demonstrated reliability, the system is a static system which is subjected to minimal wear during test periods. Under these circumstances the pump can be relied upon to perform its function for an operating cycle extended to 30 months.

3. There has been no [significant] reduction in the margin of safety.

In addition to the above points monthly testing is conducted which would detect any degradation in the extended operating cycle. If there is a mode of degradation it is expected to be gradual and not catastrophic permitting corrective action prior to unacceptable pump performance.

(10) Diesel Fire Pump Batteries

The proposed change does not involve a significant hazards consideration since:

1. There is no significant increase in the probability or consequences of an accident.

Inspection of the batteries on a weekly, monthly and refueling interval provides adequate assurance that the batteries are maintained in a continuous operable status. Extending the refueling interval inspection for the batteries to 24 months (+25%) is expected to have no impact upon the performance of the batteries.

2. The possibility of a new or different kind of accident from any previously analyzed has not been created.

Historical data does not indicate any deficiencies related to the diesel batteries. Frequent inspection and operation of the diesel-driven fire pump as a system indicates a highly reliable system. Extending the operating cycle is not expected to influence the operability of the batteries.

3. There has been no [significant] reduction in the margin of safety.

Based upon past acceptable inspections as well as the periodic (weekly) inspection of the batteries extending the operating cycle is not expected to compromise the margin of safety.

(11) Hydrogen Recombiners

The proposed change does not involve a significant hazards consideration since:

1. There is no significant increase in the probability or consequences of an accident.

Past test data indicates that the Recombiners are highly reliable. Absent an emergency, the Recombiners are in a standby condition with no operational stresses. Extension of the surveillance interval would only lengthen the time spent at standby. Under these circumstances it is considered highly likely that the recombiners would perform their intended function if called upon during the extended standby interval.

2. The possibility of a new or different kind of accident from any previously analyzed.

In addition to being a proven reliable system, the recombiner system is redundant and provides a diverse means of controlling hydrogen build-up post accident to the Containment Vent System. Thus the extended surveillance interval is considered to have no affect on hydrogen control.

3. There has been no significant reduction in the margin of safety.

In addition to the above points testing is performed every two months on the fans and six months on controls. This provides added assurance that the recombiner system would function if called upon during the extended interval.

(12) Fan Cooler Units - Charcoal; Post Accident Containment Air Vent - Charcoal

The proposed change does not involve a significant hazards consideration since:

1. There is no significant increase in the probability or consequences of an accident.

There is no significant increase in the probability or consequences of an accident. The primary failure mode of the charcoal is air inleakage over time so that adsorption properties of the charcoal would be reduced to unacceptable levels. The past surveillances indicate that this in not the case. Extending the operating cycle is not expected to change the acceptable results achieved in the past.

2. The possibility of a new or different kind of accident from any previously analyzed has not been created.

Based on past test results it is expected that the adsorption property will remain above acceptable levels for an operating cycle which is extended several months. In addition, each operating cycle is started with fresh charcoal thus eliminating any degradation which occurred during the previous cycle.

3. There has been no [significant] reduction in the margin of safety.

The charcoal absorbers [adsorbers] are maintained in standby status. Past test results do not indicate that normal plant operation unduly compromises the absorption [adsorption] capacity of the charcoal. A longer plant operating cycle is not expected to change this conclusion.

(13) Containment Spray Check Valves: City Water Service/Containment Isolation Valves

The proposed change does not involve a significant hazards consideration since:

1. There is no significant increase in the probability or consequences of an accident.

There is no significant increase in the probability or consequences of an accident. The Containment Spray System and City Water Service to containment are static systems which are in standby during normal operation. Thus the systems are not subjected to the wear and tear of normal operation. Any degradation mechanism is slow acting over time. Exercising of the valves at refueling intervals demonstrates that the valves would change position and function if required. Extension of the normal operating cycle by several months is not expected to influence the operability of these valves.

2. The possibility of a new or different kind of accident from any previously analyzed has not been created.

The possibility of a new or different kind of accident from any previously analyzed has not been created. Past tests over an 18 month (+25%) cycle has demonstrated that valve operability is essentially insensitive to the duration of the operating cycle. Therefore, it is expected that the valves would perform their intended safety function if called upon during the extended operating cycle.

3. There has been no [significant] reduction in the margin of safety.

For the reasons enumerated above, operability of the valves is not expected to be adversely affected by a longer operating cycle.

(14) Internal and External Visual Inspection of Containment Structure and Related Components

The proposed change does not involve a significant hazards consideration since:

1. There is no significant increase in the probability or consequences of an accident.

As could be expected minor observations were identified on eight of nine inspections mostly concerning surface cracking as a result of normal service wear. In no instance was an observation identified which has the potential to accelerate in a short period of time to compromise structural or leakage integrity. As noted above this type of deterioration is a normal and expected phenomenon. Over the proposed extended surveillance interval there is no basis to conclude that the Containment would not provide its intended design function.

2. The possibility of a new or different kind of accident from any previously analyzed has not been created.

As it is concluded that the containment building would continue to perform its intended safety function over a longer operating cycle, the possibility of a new or different type of accident has not been created.

3. There has been no [significant] reduction in the margin of safety.

The nature of the observations noticed in past surveillances have been superficial with respect to structural integrity and containment leakage. A longer operating cycle extended by several months is not expected to change the results of future surveillance.

(15) Acoustic Monitor

The proposed change does not involve a significant hazards consideration since:

1. There is no significant increase in the probability or consequences of an accident.

No failures or deficiencies were observed in the surveillances performed in the last four refuelings indicating a system of high reliability. There were no modes of degradation observed which would be expected to radically change the performance of the acoustic monitors if the operating cycle were extended to 30 months.

2. The possibility of a new or different kind of accident from any previously analyzed has not been created.

The devices are static and are in a standby condition during a normal operating cycle. Thus the amount of service induced stress is minimized. Under these circumstances it is expected that the monitors would perform acceptably over an operating cycle extended by several months.

3. There has been no [significant] reduction in the margin of safety.

The monitors have a demonstrated reliability and, during normal operation, do not function. Under these circumstances there is expected to be a minimal impact upon safety by extending the normal operating cycle by several months.

(16) Accumulator Level CCR and Transmitters

The proposed change does not involve a significant hazards consideration since:

As part of the ongoing efforts associated with the extended Technical Specification Surveillance Interval Extension Program for Indian Point Unit 2, the accumulator level setpoint was evaluated. The evaluation took into account the instrument and channel uncertainties associated with a 30 month calibration interval. Because of the effects on instrument drift and the range of the instrumentation, an acceptable setpoint could not be obtained for 30 months with the current Technical Specification limits. In order to develop an acceptable setpoint for 30 months, the acceptable operating band associated with the level measurement must be increased. The current Technical Specification limits for accumulator volume are a minimum volume of 787.5 ft^3 and a maximum accumulator volume of 802.5 ft^3. To support the proposed change to the Indian Point Unit 2 Technical Specifications, an evaluation of the affect of increasing the accumulator water volume band to a minimum volume of 775 ft^3 and a maximum volume of 815 ft^3 was performed.

The evaluations addressed the impact of assumed minimum and maximum accumulator water volume limits of 775 ft^3 and 815 ft^3 respectively, on the licensing basis LOCA [loss-of-coolant accident], Non-LOCA, Radiological Consequences, Containment Design, Setpoints, and other safety related areas accident analyses and licensing bases. These evaluations have demonstrated that the results and conclusions which form the licensing basis for operation of the Indian Point Unit 2 remain valid up to these assumed limits (i.e., increasing the accumulator water volume band to a minimum volume of 775 ft^3 and a maximum volume of 815 ft^3). The proposed Technical Specification limit band can be expanded to the limits assumed in the evaluation (minimum and maximum accumulator water volume limits of 775 ft^3 and 815 ft^3 respectively) with no adverse impact on the Indian Point Unit 2 licensing basis analyses. A summary of this conclusion

is provided in Table 1 for the related LOCA evaluations.

Conformance of the proposed amendments to the standards for a determination of no significant hazards, as defined in the three factor test of 10 CFR 50.92, is shown in the following:

1. There is no significant increase in the probability or consequences of an accident.

Large Break LOCA, Small Break LOCA, Blowdown Hydraulic Forcing Functions, Post-LOCA Longterm Core Cooling, Hot Leg Switchover to Prevent Potential Boron Precipitation, Non-LOCA Analyses, Steam Generator Tube Rupture, Radiological Consequences, Containment Design, setpoints, Emergency operating Procedures, and Probabilistic Risk Assessment considerations maintain conformance with the required acceptance criteria regulations. In addition, an assessment of NSSS primary components, including the reactor pressure vessel system, reactor coolant pump, steam generator, pressurizer, control rod drive mechanisms, and RCS piping, as well as Instrumentation and Control Systems and Fluid Systems considerations concluded that the integrity of these components, systems, and considerations will be unaffected by the increase in the accumulator water level band. Therefore, the probability of an accident previously analyzed will not be increased and the consequences of the accidents considered in the Indian Point Unit 2 licensing basis remain unchanged.

2. The possibility of a new or different kind of accident from any previously analyzed has not been created.

The increase in the accumulator water volume band to a minimum volume of 775 ft^3 and a maximum volume of 815 ft^3 does not significantly change the plant configuration in a manner which introduces a new potential hazard to the Indian Point Unit 2 plant. Since design limitations continued to be met and component integrity is maintained, no new failure mode is expected. Therefore, an accident which is different than any already evaluated in the FSAR [Final Safety Analysis Report] will not be created as a result of this change.

3. There has been no [significant] reduction in the margin of safety.

The margin of safety with respect to design basis analyses, licensing basis analyses, setpoints, and pressure boundary components remain in compliance with the codes and standards per the Indian Point Unit 2 licensing basis. Hence, the margin of safety is not reduced as a result of the increase in the accumulator water volume band to a minimum volume of 775 ft^3 and maximum volume of 815 ft^3.

Based on the above, it is concluded that operation of Indian Point Unit 2 in accordance with the proposed amendment does not result in the creation of an unreviewed safety question, does not create the possibly of a new or different kind of accident from any accident previously evaluated, and does not reduce any margins to plant safety. Therefore, the license amendment does not involve a Significant Hazards Consideration as defined in 10 CFR 50.92.

(17) Recirculation Sump Level Monitoring (Discrete)

The proposed change does not involve a significant hazards considerations since:

1. There is no increase in the probability or consequences of an accident. Historical data from four surveillances indicates no test failures. Therefore it is concluded that minimal risk is involved in extending the surveillance interval to 24 months (+25%).

2. The possibility of a new or different kind of accident has not been created. Past test data indicates the sump monitoring system to be highly reliable. Operation for the extended surveillance interval is anticipated without problems.

3. There has been no significant reduction in the margin of safety. In addition to being highly reliable, the discrete monitoring system is redundant to a continuous monitoring level monitoring system which contributes to minimizing the risk in extending the surveillance interval.

(18) Reactor Coolant Vents

The proposed change does not involve a significant hazards consideration since:

1. There is no significant increase in the probability or consequences of an accident previously evaluated.

Past historical test data and a redundant means of venting the RCS [reactor coolant system] contribute to minimizing any risk due to an extended surveillance interval. It is concluded that any increase in the probability or consequence due to an accident from an extended surveillance interval is negligible.

2. The possibility of a new or different kind of accident from any previously analyzed has not been created.

Venting of the RCS has not been identified as an accident precursor nor is credit taken in the accident analysis. Therefore any uncertainty created by extending the surveillance interval will not contribute to creation of a new or different kind of accident from any previously analyzed.

3. There has been no significant reduction in the margin of safety.

The basis for establishing this surveillance is ASME Section XI. The proposed surveillance interval is within the testing frequency required by ASME Section XI.

(19) Containment Sump Pumps and Instrumentation

The proposed change does not involve a significant hazards consideration since:

1. There will be no significant increase in the probability or consequences of an accident. Past test data indicates that the monitoring system is generally reliable with only one instance where test acceptance criteria were not met. However, the system was not inoperable. Due to the previous good test results and redundancy, extension of the surveillance interval will not significantly compromise safety.

2. The possibility of a new or different kind of accident from any previously analyzed has not been created. Due to the generally good test results and design redundancy there is reasonable confident that the monitoring system will remain operable over the extended surveillance interval.

3. There has been no significant reduction in the margin of safety.

The reasonably good past performance of this system as evidenced by past test data indicates that the margin of safety will not be significantly compromised by an extended operating cycle.

(20) Control Rods - Full Length Rod Drop Time

The proposed change does not involve a significant hazards consideration since:

1. There is no significant increase in the probability or consequences of an accident.

Past historical data indicates that the rod drop time limit was met by a large margin. Evaluation of test data indicated no anomalies which could be attributed to a time dependent degradation mechanism which could degrade rod drop times to an unacceptable value if the operating surveillance was extended by several months.

2. The possibility of a new or different kind of accident from any previously analyzed has not been created.

The degree of success demonstrated by post testing indicates that the control rods will continue to perform their intended function under a longer operating cycle which is extended by several months.

3. There has been no [significant] reduction in the margin of safety.

Past test data indicates that considerable margin exists between acceptance limits and measured data which will not be significantly reduced by extending the operating cycle.

(21) Diesel Generator Building Water Sprinkling System

The proposed change does not involve a significant hazards consideration since:

1. There is no significant increase in the probability or consequences of an accident.

Past test data is generally positive with some deficiencies noted in the earliest test reviewed which did not relate to operability of the system. Since the system is a static system extension of the operating interval is not expected to impact operability of the system.

2. The possibility of a new or different kind of accident from any previously analyzed has not been created.

The extension of the surveillance interval is not expected to influence operability of the system. As the system has historically been proven to be reliable, its safety function will not be compromised.

3. There has been no reduction in the margin of safety.

As operability of the system is not expected to be affected by the longer surveillance interval, the margin of safety represented by this system will not be compromised.

(22) PORVs and Block Valves

The proposed change does not involve a significant hazards consideration since:

1. There is no significant increase in the probability or consequences of an accident.

Since only one deficiency was noted over the time interval reviewed, the historical data supports the conclusion that safety will not be compromised by extending the interval between surveillances to 24 months with a maximum of 30 months.

2. The possibility of a new or different kind of accident from any previously analyzed has not been created.

Based upon past historical data the limit switches have a demonstrated reliability. In addition, failure of a limit switch would not preclude operation of the PORVs or block valves.

3. There has been no [significant] reduction in the margin of safety.

Given the demonstrated reliability of the limit switches and the fact that operability of neither the PORVs nor block valves is dependent upon the limit switches, it is concluded that the margin of safety has not been significantly diminished.

The NRC staff has reviewed the licensee's analysis and, based on this review, it appears that the three standards of 50.92(c) are satisfied. Therefore, the NRC staff proposes to determine that the amendment request involves no significant hazards consideration.

Local Public Document Room location: White Plains Public Library, 100 Martine Avenue, White Plains, New York 10610.

Attorney for licensee: Brent L. Brandenburg, Esq., 4 Irving Place, New York, New York 10003.

NRC Project Director: Robert A. Capra

Consolidated Edison Company of New York, Docket No. 50-247, Indian Point Nuclear Generating Unit No. 2, Westchester County, New York

Date of amendment request: August 7, 1992

Description of amendment request: The licensee has proposed to amend the Technical Specification (TS) to remove Table 3.12-1, Safety-Related Shock Suppressors (Snubbers), and references to Table 3.12-1, in accordance with Generic Letter 84-13, which permits licensees to remove snubber listings from the TS and Generic Letter 91-08 which addresses administrative controls for component lists which are removed from the TS.

Basis for proposed no significant hazards consideration determination: As required by 10 CFR 50.91(a), the licensee has provided its analysis of the issue of no significant hazards consideration, which is presented below:

In accordance with the requirements of 10 CFR 50.92, the proposed changes to the Technical Specifications are deemed not to involve any "Significant Hazards Considerations" because operation of Indian Point Unit No. 2 in accordance with these changes would not:

1) Involve a significant increase in the probability or consequences of an accident previously evaluated;

The relocation of the listing of snubbers to a plant procedure is an administrative change. No technical requirements are affected in that the function, operation or surveillance requirements for any system or component are not being altered. Therefore, the conclusions of current accident analyses are not affected.

Further, as required by Generic Letter 84-13, any changes in snubber quantities, types or locations will require the completion of a safety evaluation per the requirements of 10 CFR 50.59 to determine that the proposed change will not involve an unreviewed safety question. Therefore, future snubber changes will be evaluated against similar criteria.

2) Create the possibility of a new or different kind of accident from any accident previously evaluated;

All changes described herein are administrative, introduce no new mode of plant operation, do not involve physical modification to any structure, system or component and do not affect the function, operation or surveillance requirements for any system or component. Therefore the changes can not result in an unanalyzed accident. Further, as required by Generic Letter 84-13, any changes in snubber quantities, types or locations will require the completion of a safety evaluation per the requirements of 10 CFR 50.59 to determine that the proposed change will not involve an unreviewed safety question. Therefore, future snubber changes will be evaluated against similar criteria.

3) Involve a significant reduction in a margin of safety.

The administrative changes involved do not affect the requirement that all snubbers required to protect the primary coolant system or any other safety system or component be operable during reactor operation because no change to the current quantities, types or locations of snubbers is proposed. Further, these administrative changes do not impact the surveillance requirements that verify the existing snubbers will perform their design functions. Therefore, no margins of safety established by design or verified by testing to ensure operability of safety-related systems or components are affected. Further, as required by Generic Letter 84-13, any changes in snubber quantities, types or locations will require the completion of a safety evaluation per the requirements of 10 CFR 50.59 to determine that the proposed change will not involve an unreviewed safety question. Therefore, future snubber changes will be evaluated against similar criteria.

The NRC staff has reviewed the licensee's analysis and, based on this review, it appears that the three standards of 50.92(c) are satisfied. Therefore, the NRC staff proposes to determine that the amendment request involves no significant hazards consideration.

Local Public Document Room location: White Plains Public Library, 100 Martine Avenue, White Plains, New York 10610.

Attorney for licensee: Brent L. Brandenburg, Esq., 4 Irving Place, New York, New York 10003.

NRC Project Director: Robert A. Capra

Georgia Power Company, Oglethorpe Power Corporation, Municipal Electric Authority of Georgia, City of Dalton, Georgia, Docket Nos. 50-424 and 50-425, Vogtle Electric Generating Plant, Units 1 and 2, Burke County, Georgia

Date of amendment request: August 31, 1992

Description of amendment request: The proposed amendments would revise surveillance requirements of Technical Specifications (TSs) 4.8.1.1.2.h.6)b) and 4.8.1.1.2.h.7 to decouple two different tests of the diesel generators (DGs):

1. TS 4.8.1.1.2.h.7 requires, in part, that the DGs be tested periodically, during shutdown, by operating them at specified loads for 24 hours, and that "Within 5 minutes after completing this 24-hour test, perform Specification 4.8.1.1.2.h.6)b)." This quoted sentence would be deleted.

2. TS 4.8.1.1.2.h.6)b) requires periodic testing to verify automatic starting and loading of DGs by simulating a loss-of-offsite power (LOOP) in conjunction with an engineered safety features actuation system (ESFAS) test signal. A footnote to TS 4.8.1.1.2.h.6)b) states that:

If Specification 4.8.1.1.2.h.6)b) is not satisfactorily completed, it is not necessary to repeat the preceding 24-hour test. Instead, the diesel generator may be operated at the load required by Surveillance Requirement 4.8.1.1.2.a5 [i.e., 6800-7000] kW for 1 hour or until operating temperature has stabilized.

This footnote would be changed to read:

Prior to performing Surveillance Requirement 4.8.1.1.2.h.6)b), the diesel generator shall be operated at the load required by Surveillance Requirement 4.8.1.1.2.a5 for 1 hour or until operating temperature has stabilized. Surveillance Requirement 4.8.1.1.2h.6)b) shall be started within 5 minutes of stopping the diesel generator upon completion of this prerequisite.

Basis for proposed no significant hazards consideration determination: The effect of the proposed change would be to remove the requirement to perform the LOOP/ESFAS test within 5 minutes after completing the 24-hour test. Instead, the LOOP/ESFAS test would be preceded by a period of operation at a specified load for 1 hour or until operating temperature has stabilized. The basis for requiring the LOOP/ESFAS test within 5 minutes of the 24-hour test was to demonstrate hot restart capability under full-load operating temperature conditions. However, operating experience had shown that stable, full-load operating temperatures are achieved in less than 1 hour. Thus, coupling is unnecessary and decoupling the two tests provides additional flexibility for outage scheduling and execution.

As required by 10 CFR 50.91(a), the licensee has provided its analysis of the issue of no significant hazards consideration, which is presented below:

1. The proposed change does not involve a significant increase in the probability or consequences of an accident previously evaluated. Separating the 24-hour test from the LOOP/ESFAS test will have no effect on the initiating events assumed for any existing accident analysis. The basis for the existing requirement is to ensure the hot restart capability of the DGs. The proposed change in requirements will continue to demonstrate that capability, and the DGs will remain able to perform their safety function as assumed in the accident analyses. Therefore, there will be no effect on the consequences of any existing accident analyses.

2. The proposed change does not create the possibility of a new or different kind of accident from any accident previously evaluated. The change does not introduce any new equipment into the plant or require any existing equipment to be operated in a manner different than that for which it was designed to operate. The proposed change only involves the duration for which the full-load temperature conditions are maintained prior to performing the LOOP/ESFAS test. Therefore, the performance, reliability, or capability of the DGs to perform their design function will not be affected.

3. The proposed change does not involve a significant reduction in a margin of safety. The basis for the existing requirement is to ensure the hot restart capability of the DGs. The proposed change will continue to ensure that capability, thereby maintaining the margin of safety afforded by the existing surveillance requirements.

The NRC staff has reviewed the licensee's analysis and, based on this review, it appears that the three standards of 10 CFR 50.92(c) are satisfied. Therefore, the NRC staff proposes to determine that the amendment request involves no significant hazards consideration.

Local Public Document Room location: Burke County Public Library, 412 Fourth Street, Waynesboro, Georgia 30830.

Attorney for licensee: Mr. Arthur H. Domby, Troutman, Sanders, Lockerman and Ashmore, Candler Building, Suite 1400, 127 Peachtree Street, NE., Atlanta, Georgia 30303-1810.

NRC Project Director: David B. Matthews

Houston Lighting & Power Company, City Public Service Board of San Antonio, Central Power and Light Company, City of Austin, Texas, Docket Nos. 50-498 and 50-499, South Texas Project, Units 1 and 2, Matagorda County, Texas

Date of amendment request: June 26, 1991, as supplemented by letters dated January 24, 1992 and June 24, 1992.

Brief description of amendments: This was previously published in the Federal Register on September 18, 1991 (56 FR 47238). The amendment proposed to make changes to the Technical Specifications in accordance with the guidance provided in Generic Letter 89-01. The changes consist of relocating the procedural details of Radiological Effluent Technical Specifications (RETS) into the Offsite Dose Calculations Manual (ODCM) or the Process Control Program (PCP) in a manner that ensures these details are incorporated into plant operating procedures. In addition, programmatic controls would be added to the Administrative Controls section of the Technical Specifications to satisfy the regulatory requirements and controls changes to the procedural details of the ODCM or PCP. By letter dated June 24, 1992, Houston Lighting and Power submitted a supplement to the June 26, 1991 amendment request. The supplement proposed to retain the definitions of an unrestricted area and venting in the Technical Specifications. The January 24, 1992, supplemental letter requested a 15-day implementation period following the date of issuance of the license amendments.

Basis for proposed no significant hazards consideration determination: As required by 10 CFR 50.91(a), the licensee has provided its analysis of the issue of no significant hazards consideration, which is presented below:

1. The proposed amendment does not involve a significant increase in the probability or consequences of an accident previously evaluated. The amendment involves only relocation of the requirements for responses to radiological effluent releases from one governing source to another. The requirements themselves are not changed; therefore, accident probability and/or consequences are unaffected.

2. The proposed amendment does not create the possibility of a new or different kind of accident from any accident previously evaluated. The design of STPEGS is not changed by the proposed amendment. The proposed amendment relocates existing procedural details without change which does not create the possibility of a new or different accident from any accident previously evaluated. Any changes in the future will be performed in accordance with 10 CFR 50.59 and will have a clear establishment of the basis of the requirement, an appropriate analysis or evaluation, a determination of conformance to regulations, review by a multidisciplinary review group (PORC), Plant Manager approval and post approval review by the NSRB [Nuclear Safety Review Board]. Therefore, changes to the ODCM or PCP are controlled to prevent the possibility of a new or different kind of accident from any accident previously evaluated.

3. The proposed amendment does not involve a significant reduction in the margin of safety. The proposed amendment adds programmatic controls to the Administrative Controls section of Technical Specifications to satisfy the regulatory requirements and changes to the procedural details of the ODCM or PCP will be controlled by the Administrative Controls section of Technical Specifications. The addition of these controls does not involve a significant reduction in the margin of safety. The relocation of the procedural details for radiological effluents has been performed to ensure that these controls are placed appropriately in the ODCM or PCP such that these details are incorporated into plant procedures and programs. Incorporation of these radiological effluent details into the plant procedures and programs ensures that there is not a significant reduction in the margin of safety.

The NRC staff has reviewed the licensee's analysis and, based on this review, it appears that the three standards of 10 CFR 50.92(c) are satisfied. Therefore, the NRC staff proposes to determine that the request for amendments involves no significant hazards consideration.

Local Public Document Room location: Wharton County Junior College, J. M. Hodges Learning Center, 911 Boling Highway, Wharton, Texas 77488

Attorney for licensee: Jack R. Newman, Esq., Newman & Holtzinger, P. C., 1615 L Street, N.W, Washington, D.C. 20036

Houston Lighting & Power Company, City Public Service Board of San Antonio,Central Power and Light Company, City of Austin, Texas, Docket Nos. 50-498 and 50-499, South Texas Project, Units 1 and 2, Matagorda County, Texas

Date of amendment request: August 4, 1992

Brief description of amendments: The proposed amendment changes the Technical Specifications to reflect the results of a correction to the containment free volume calculation. The original calculation for the South Texas Project, MC-5281 "Free and Sprayed Volumes Inside Containment>Revision 1, overestimated the containment free volume. The proposed amendment reflects the evaluation of the as-built facility.

Basis for proposed no significant hazards consideration determination: As required by 10 CFR 50.91(a), the licensee has provided its analysis of the issue of no significant hazards consideration, which is presented below:

(1) The proposed changes do not involve a significant increase in the probability or

consequences of an accident previously evaluated.

The containment and safety-related systems inside containment remain operable as previously analyzed. The changes in the containment volume, pressure, and temperature, do not increase or cause an increase in the likelihood of a DEPSG [doubled-ended pump suction guillotine], MSLB [main steamline break], or any other DBA. The increase in peak containment post accident pressure resulting from the reduced free volume is bounded by the original design pressure.

Current containment leakage test results are well within acceptance criteria even with an increased test pressure which was greater than the recalculated post accident peak containment pressure. In addition, equipment inside containment remains qualified and functional in the changed environment and onsite/offsite doses and airborne concentration remain with[in] stipulated limits. In addition, no changes in either equipment or operator actions are required which would affect either probability or consequences.

(2) The proposed changes do not create the possibility of a new or different kind of accident from any previously evaluated.

All containment and safety-related systems inside containment will function within design or EQ [environmental qualification] limits and all analysis results are bounded by design and regulatory requirements. No new modes of operation are proposed or supposed. No physical plant changes are necessary or proposed as a result of the changes. The proposed changes do not adversely affect or alter equipment which is assumed to operate in accident conditions. In addition, no new operator actions are required and no existing actions are either altered or deleted.

(3) The proposed changes do not involve significant reductions in the margin of safety.

The margin of safety as defined in NSAC 125 (Guidelines for 10 CFR 50.59 Safety Evaluations, Nuclear Safety Analysis Center) Section 3.6 is the difference between a failure point and the acceptance limit.

The containment pressure acceptance limit is the containment design pressure of 56.5 psig per SRP [Standard Review Plan] and SER [Safety Evaluation Report] Sections 6.2.1. Since the calculated peak containment internal pressure resulting from reduced free volume (40.5 psig) is below the acceptance limit, this change does not reduce the margin of safety.

Current leakage rates are significantly below the acceptance limits. The margin between the measured value and the acceptance value was 45 percent on Unit 1 and 71 percent on Unit 2. These margins provide reasonable assurance that actual leak rates will remain within the acceptance criteria even at the higher pressure resulting from the reduced volume. Therefore, the increase in the calculated peak pressure does not decrease the margin of safety.

Although, the proposed change in containment accident peak temperature from 323 degree F to 328 degree F results in a reduction in the margin of safety from 17 degree F to 12 degree F, it is not considered to be a significant reduction. Equipment will continue to perform as designed because the time-temperature equivalency of the qualification test adequately exceeds the duration of the increased peak containment accident temperature. In addition, revised onsite and offsite radiological doses and airborne concentrations do not exceed previously accepted values.

The NRC staff has reviewed the licensee's analysis and, based on this review, it appears that the three standards of 10 CFR 50.92(c) are satisfied. Therefore, the NRC staff proposes to determine that the request for amendments involves no significant hazards consideration.

Local Public Document Room location: Wharton County Junior College, J. M. Hodges Learning Center, 911 Boling Highway, Wharton, Texas 77488

Attorney for licensee: Jack R. Newman, Esq., Newman & Holtzinger, P. C., 1615 L Street, N.W, Washington, D.C. 20036

Public Service Electric & Gas Company, Docket No. 50-272, Salem Nuclear Generating Station, Unit No. 1, Salem County, New Jersey

Date of amendment request: August 14, 1992

Description of amendment request: In response to Generic Letter 91-11, Public Service Electric and Gas Company, the licensee, has proposed to change the Salem, Unit 1 Technical Specifications (TS) for the operation of the vital instrument bus inverters to make them identical to the TS currently in place for Salem, Unit 2. The changes would add a separate Action Statement for an inoperable inverter. Currently, there is only an Action Statement for equipment associated with the vital instrument bus. The proposed change would allow an inverter to be inoperable for up to 24 hours. There are also administrative changes to clarify the existing Limiting Condition of Operation.

Basis for proposed no significant hazards consideration determination: As required by 10 CFR 50.91(a), the licensee has provided its analysis of the issue of no significant hazards consideration, which is presented below:

The proposed changes to the Salem, Unit 1 Technical Specifications:

1. Do not involve a significant increase in the probability or consequences of an accident previously evaluated.

The proposed changes would revise Technical Specification 3.8.2 to make the Unit 1 vital instrument bus Limiting Conditions of Operation (LCO) and action statements identical to those of

Unit 2. The proposed changes do not alter the design or operation of the vital instrument buses or inverters.

The proposed changes would add an allowed outage time (AOT) of 24 hours for one inoperable inverter. The Unit 1 Technical specifications presently require restoration of an inverter to operable and energized status within 8 hours, based on the action statement applicable to the AC buses. The 24 hour period allowed for the inverter would only apply if the affected vital instrument bus remains energized or is re-energized within 8 hours in accordance with the present action statement. The vital instrument bus may be energized through a constant voltage transformer in the event the inverter is not available to provide the normal AC power feed. 24 hours to restore the inverter to operable status is consistent with standard industry practice (eg., Westinghouse Standard Technical Specifications, revision 4) for allowing restoration of inverter operability without incurring an unacceptable risk of losing a vital instrument bus following a loss of the preferred (offsite) power source.

The proposed changes would also clarify that the AC distribution system operability requirements including energizing the 115 V AC buses through an operable inverter. These clarifications reflect present practices and are compatible with the Technical Specifications as written.

2) Do not create the possibility of a new or different kind of accident from any accident previously evaluated.

The proposed change would not introduce any changes to the design or operating configuration of the AC distribution system. Therefore, the proposed changes do not introduce the possibility of a new or different kind of accident.

3) Do not involve a significant reduction in a margin of safety.

The changes to the Unit 1 vital instrument bus and inverter Technical Specification requirements are consistent with the present requirements for Unit 2, which have been determined to ensure an acceptable margin of safety relative to AC power availability. The proposed changes do not involve a significant reduction in any margin of safety.

The NRC staff has reviewed the licensee's analysis and, based on this review, it appears that the three standards of 10 CFR 50.92(c) are satisfied. Therefore, the NRC staff proposes to determine that the amendment request involves no significant hazards consideration.

Local Public Document Room location: Salem Free Public library, 112 West Broadway, Salem, New Jersey 08079

Attorney for licensee: Mark J. Wetterhahn, Esquire, Winston and Strawn, 1400 L Street, N.W., Washington, D.C., 20005-3502

NRC Project Director: Charles L. Miller

Public Service Electric & Gas Company, Docket Nos. 50-272 and 50-311, Salem Nuclear Generating Station, Unit Nos. 1 and 2, Salem County, New Jersey

Date of amendment request: July 8, 1992 and September 1, 1992

Description of amendment request: This amendment request would change Technical Specification (TS) 6.3.1 and 6.4.1 to delete existing licensed operator qualification and training requirements that are superseded based on 1) INPO accreditation of Public Sercie Electric and Gas Company's (PSE&G's) licensed operator training program, which are based on a systems approach to training, and 2) promulgation of the revised 10 CFR 55. The existing requirement is replaced by a requirement that licensed operator qualifications and associated training programs comply with the requirements of 10 CFR 55.

Basis for proposed no significant hazards consideration determination: As required by 10 CFR 50.91(a), the licensee has provided its analysis of the issue of no significant hazards consideration, which is presented below:

1. Do not involve a significant increase in the probability or consequences of an accident previously evaluated.

The proposed TS changes are administrative changes to clarify the current requirements for licensed operator qualifications and training programs and to conform to the revised 10 CFR 55 rule. Although licensed operator qualifications and training can have an indirect impact on accidents previously evaluated, the NRC considered this impact during the rulemaking process, and by promulgation of the revised rule, concluded that this impact remains acceptable as long as licensed operator training programs are accredited and based on a systems approach to training. PSE&G's licensed operator training programs have been accredited by INPO and are based on a systems approach to training. The proposed TS changes take credit for the INPO accreditation of the licensed operator training programs and require continued compliance with the requirements of 10 CFR 55. The TS requirements for all other unit staff qualifications and training programs remain unchanged. Therefore, the proposed TS changes do not increase the probability or consequences of an accident previously evaluated.

2. Do not create the possibility of a new or different kind of accident from any accident previously evaluated.

The proposed TS changes are administrative changes to clarify the current requirements for licensed operator qualifications and training programs and to conform to the revised 10 CFR 55 rule. The changes do not affect plant design, hardware, system operation, or procedures. Additionally, in promulgating the revised rule, the NRC concluded that the impact of the revised rule on the possibility of creating a new or different kind of accident is acceptable as long as licensed operator training programs are accredited and based on a systems approach to training. As noted previously, PSE&G's licensed operator training programs have been accredited by INPO and are based on a systems approach to training. The proposed TS changes take credit for the INPO accreditation and require continued compliance with the requirements of 10 CFR 55. The TS requirements for all other unit staff qualifications and training programs remain unchanged. Therefore, the proposed TS changes do not create the possibility of a new or different kind of accident from any accident previously evaluated.

3. Do not involve a significant reduction in a margin of safety.

The proposed TS changes are administrative changes to clarify the current requirements for licensed operator qualifications and training programs and to conform to the revised 10 CFR 55 rule. Licensed operator qualifications and training can have an indirect impact on a margin of safety; however, the NRC, in promulgating the revised rule, determined that the impact on margin of safety was acceptable when licensees maintain licensed operator training programs that are accredited and based on a systems approach to training. As noted previously, PSE&G's licensed operator training programs have been accredited by INPO and are based on a systems approach to training. The NRC has concluded, as stated in NUREG-1262, that the standards and guidelines applied by INPO in their training accreditation program are equivalent to those put forth or endorsed by the NRC. As a result, maintaining INPO accredited, systems based licensed operator training programs is equivalent to maintaining NRC approved licensed operator training programs which conform with applicable NRC regulatory guides or NRC endorsed ANSI/ANS standards. The TS requirements for the qualifications and training programs for all other unit staff remain unchanged. The licensed operator qualifications and training programs will continue to be required to comply with the requirements of 10 CFR 55. The margin of safety is maintained by virtue of maintaining INPO accredited licensed operator training programs and through continued compliance with the requirements of 10 CFR 55. Therefore, the proposed TS changes do not reduce a margin of safety.

The NRC staff has reviewed the licensee's analysis and, based on this review, it appears that the three standards of 10 CFR 50.92(c) are satisfied. Therefore, the NRC staff proposes to determine that the amendment request involves no significant hazards consideration.

Local Public Document Room location: Salem Free Public Library, 112 West Broadway, Salem, New Jersey 08079

Attorney for licensee: Mark J. Wetterhahn, Esquire, Winston and Strawn, 1400 L Street, N.W., Washington, D.C., 20005-3502

NRC Project Director: Charles L. Miller

Public Service Electric & Gas Company, Docket Nos. 50-272 and 50-311, Salem Nuclear Generating Station, Unit Nos. 1 and 2, Salem County, New Jersey

Date of amendment request: August 14, 1992

Description of amendment request: This amendment would modify Technical Specification (TS) 3/4.3.2, Engineered Safety Feature Actuation System Instrumentation, Limiting Conditions for Operation, Action Requirements, and Surveillance Requirements including associated tables. The amendment includes administrative changes, provides consistency between Salem Unit 1 and Salem Unit 2, and ensures technical accuracy.

This amendment also proposes to change TS 3/4.3.2 to allow entry into Mode 1 with one Main Feedwater pump out-of-service, allow the ACTION statement in TS Functional Units 4a and 4b to require taking the Unit to one mode below the Mode of Applicability instead of two, and would delete all references to three and four loop operation.

Basis for proposed no significant hazards consideration determination: As required by 10 CFR 50.91(a), the licensee has provided its analysis of the issue of no significant hazards consideration. The NRC staff has reviewed the licensee's analysis against the standards of 10 CFR 50.92(c). The NRC staff's review of Criterion 1 and the licensee's analysis of Criteria 2 and 3 are presented below.

1. Will not involve a significant increase in the probability or consequences of an accident previously evaluated. These changes involve providing clarity and consistency within the TS and between the two Units, providing more accurate references and descriptions, providing better consistency with actual plant conditions, and correcting typographical errors. These changes are either administrative, editorial, or do not represent changes to plant equipment or operation, and therefore, would not increase the probability or consequences of a previously analyzed accident.

There are also changes in this amendment to allow taking the Units to Mode 1 with one Main Feedwater Pump out-of-service. Two Main Feedwater Pumps are not required until greater than 50% power. The ACTION statements in TS Functional Units 4a and 4b would be changed to allow taking the Units to one mode below the Mode of Applicability rather than two. This would be consistent with general industry practice. All references to three and four loop operation would be deleted as the current Salem Accident Analysis does not support three loop operation. These changes do not represent

changes to plant equipment or operation, and therefore, would not increase the probability or consequences of a previously analyzed accident.

2. Create the possibility of a new or different kind of accident. As stated above, the proposed changes are either administrative, editorial, or do not represent modifications to plant equipment or operation. Therefore, there can be no impact on plant response to the point where a different accident is created.

3. Involve a significant reduction in a margin of safety. As stated above, the proposed changes are either administrative, editorial, or do not represent modifications to plant equipment or operation. Therefore, there can be no reduction in any margin of safety.

Based on this review, it appears that the three standards of 10 CFR 50.92(c) are satisfied. Therefore, the NRC staff proposes to determine that the amendment request involves no significant hazards consideration.

Local Public Document Room location: Salem Free Public library, 112 West Broadway, Salem, New Jersey 08079

Attorney for licensee: Mark J. Wetterhahn, Esquire, Winston and Strawn, 1400 L Street, N.W., Washington, D.C., 20005-3502

NRC Project Director: Charles L. Miller

Southern California Edison Company, et al., Docket No. 50-206, San Onofre Nuclear Generating Station, Unit No. 1, San Diego County, California

Date of amendment request: September 16, 1992

Description of amendment request: This proposed change will provide for an exemption to the requirement to perform the hot SIS test during the anticipated permanent shutdown of SONGS 1 in November 1992 following the current Cycle 11 operation. The San Onofre, Unit 1, Technical Specification 4.2.1.I.A, "Hot Safety Injection System Test," requires that a Hot Safety Injection System (SIS) test be performed in MODE 3 when the plant is being shutdown from MODE 1, and MODE 5 is planned to be entered. The test must be performed while the Reactor Coolant System (RCS) pressure is above 1,500 psi. The test includes determination of the force required to open Main Feed Pump Safety Injection Discharge valves HV-851A and HV-851B, and the margin of available actuation force. The proposed change will also correct a typographical error in item (1) of Specification 4.2.1.I.A so that the valves are identified correctly as HV-851A and HV-851B.

Basis for proposed no significant hazards consideration determination: As required by 10 CFR 50.91(a), the licensee has provided its analysis of the issue of no significant hazards consideration, which is presented below:

1. Will operation of the facility in accordance with this proposed change involve a significant increase in the probability or consequences of an accident previously evaluated?

Response: No

The Technical Specification requires that the hot SIS test be performed while the plant is being brought down from Mode 1, and Mode 5 is planned to be entered. The purpose of the test is to assure that the SIS will be operable if needed during future plant operation. Therefore, the requirement for the test is based on the assumption that the plant will be brought back up to power subsequently, and the plant operation will continue. In the case of SONGS 1 however, the plant is being shutdown permanently, and therefore, the SIS will not be required to be operable following the shutdown. Consequently, the requirement for the hot SIS test is not applicable to SONGS 1 permanent shutdown. The proposed exemption will eliminate the need to perform this test.

The proposed exemption will have no impact on the plant design, operation, or the operability of SIS in Modes 1-3, as required, while the plant is being shutdown. The exemption will mean that the operability of the SIS cannot be assured for subsequent fuel cycles. However, the future SIS operability is not needed since the plant is being shutdown permanently. As a practical matter, exemption from the test will eliminate any risks that may be associated with the test while the plant is being shutdown, and allow entry into Mode 5 to be made sooner. Therefore, the proposed exemption to the Technical Specification requirement will not result in an increase in the probability of an accident previously evaluated. Since the SIS will not be needed following the permanent shutdown of the plant, the proposed exemption will not result in an increase in the consequences of an accident previously evaluated.

2. Will operation of the facility in accordance with this proposed change create the possibility of a new or different kind of accident from any accident previously evaluated?

Response: No

The proposed change will provide for an exemption to the requirement to perform a hot SIS test while the plant is being shutdown permanently. Since this requirement has no impact on the current operation of the SIS, the exemption to perform this test will not lead to any reduction in the capability of the SIS during the current fuel cycle. The proposed exemption has no impact on the existing plant design, operation, or safety analyses. Nor does it have any impact on any factors that could create accidents. Consequently, the proposed exemption will not create the possibility of a new or different kind of accident from any accident previously evaluated.

3. Will operation of the facility in accordance with this proposed change involve a significant reduction in margin of safety?

Response: No

The proposed exemption will have no impact on the existing plant design or the safety analyses, and therefore, will not involve a significant reduction in margin of safety.

The NRC staff has reviewed the licensee's analysis and, based on this review, it appears that the three standards of 50.92(c) are satisfied. Therefore, the NRC staff proposes to determine that the amendment request involves no significant hazards consideration.

Local Public Document Room location: Main Library, University of California, P. O. Box 19557, Irvine, California 92713

Attorney for licensee: James A. Beoletto, Esquire, Southern California Edison Company, P. O. Box 800, Rosemead, California 91770

NRC Project Director: Theodore R. Quay

Southern Nuclear Operating Company, Inc., Docket Nos. 50-348 and 50-364, Joseph M. Farley Nuclear Plant, Units 1 and 2, Houston County, Alabama

Date of amendments request: June 23, 1992

Description of amendments request: The proposed changes to the Technical Specifications (TS) would add new programmatic requirements governing radioactive effluents, radiological environmental monitoring and solid radioactive wastes to the Administrative Controls Section of the TS. The existing TS containing procedural details on radioactive effluents, radiological environmental monitoring, solid radioactive wastes and associated reporting requirements are being relocated to the Offsite Dose Calculation Manual or to the Process Control Program, as appropriate, in accordance with Generic Letter 89-01.

Basis for proposed no significant hazards consideration determination: As required by 10 CFR 50.91(a), the licensee has provided its analysis of the issue of no significant hazards consideration, which is presented below:

1. The proposed changes do not involve a significant increase in the probability or consequences of an accident previously evaluated. The proposed changes are administrative in nature and alter only the format and location of programmatic controls and procedural details relative to radioactive effluents, radiological environmental monitoring, solid radioactive wastes, and associated reporting requirements. Compliance with applicable regulatory requirements will continue to be maintained. In addition, the proposed changes do not alter the conditions or assumptions in any of the FSAR accident analyses. Since the FSAR

accident analyses remain bounding, the radiological consequences previously evaluated are not adversely affected by the proposed changes. Therefore, it can be concluded that the proposed changes do not involve a significant increase in the probability or consequences of an accident previously evaluated.

2. The proposed changes do not create the possibility of a new or different kind of accident from any accident previously evaluated. The proposed changes do not involve any change to the configuration or method of operation of any plant equipment. Accordingly, no new failure modes have been defined for any plant system or component important to safety nor has any new limiting single failure been identified as a result of the proposed changes. Also, there will be no change in types or increase in the amounts of any effluents released offsite. Therefore, it can be concluded that the proposed changes do not create the possibility of a new or different kind of accident from any accident previously evaluated.

3. The proposed changes do not involve a significant reduction in a margin of safety. The proposed changes do not involve any actual change in the methodology used in the control of radioactive effluents, solid radioactive wastes, or radiological environmental monitoring. These changes are considered administrative in nature and provide for the relocation of procedural details outside of the technical specifications but add appropriate administrative controls to provide continued assurance of compliance to applicable regulatory requirements. These proposed changes also comply with the guidance contained in Generic Letter 89-01. Therefore, it can be concluded that the proposed changes do not involve a significant reduction in a margin of safety.

The NRC staff has reviewed the licensee's analysis and, based on this review, it appears that the three standards of 10 CFR 50.92(c) are satisfied. Therefore, the NRC staff proposes to determine that the amendment request involves no significant hazards consideration.

Local Public Document Room location: Houston-Love Memorial Library, 212 W. Burdeshaw Street, P. O. Box 1369, Dothan, Alabama 36302

Attorney for licensee: James H. Miller, III, Esq., Balch and Bingham, P. O. Box 306, 1710 Sixth Avenue North, Birmingham, Alabama 35201

NRC Project Director: Elinor G. Adensam

Southern Nuclear Operating Company, Inc., Docket Nos. 50-348 and 50-364, Joseph M. Farley Nuclear Plant, Units 1 and 2, Houston County, Alabama

Date of amendments request: August 24, 1992

Description of amendments request: The proposed revisions to the Technical Specifications (TS) are requested in order to implement the new 10 CFR Part 20 requirements at Joseph M. Farley Nuclear Plant, Units 1 and 2. The proposed TS changes revise (1) the Bases and Administrative Controls sections to appropriately incorporate the new 10 CFR Part 20 references, (2) the Administrative Controls Section to provide operational flexibility needed for liquid and gaseous releases, and (3) the Administrative Controls Section regarding the distance used to make measurements of radioactivity to determine if the major portion of a body can receive and excessive exposure.

Basis for proposed no significant hazards consideration determination: As required by 10 CFR 50.91(a), the licensee has provided its analysis of the issue of no significant hazards consideration, which is presented below:

1. The proposed changes do not involve a significant increase in the probability or consequences of an accident previously evaluated. The proposed changes will facilitate the implementation of the new 10 CFR 20 requirements. Compliance with other applicable regulatory requirements will continue to be maintained. In addition, the existing alarm/trip setpoints for instruments which monitor the spent fuel pool area and containment for gaseous activity, and the curie limit for the outside temporary liquid holdup tanks are being retained. These values are based on the old 10 CFR 20 requirements which were evaluated and shown to be conservative relative to the values that would be obtained based on the new 10 CFR 20 requirements. Also, the proposed changes do not alter the conditions or assumptions in any of the FSAR accident analyses. Since the FSAR accident analyses remain bounding, the radiological consequences previously evaluated are not adversely affected by the proposed changes. Therefore, it can be concluded that the proposed changes do not involve a significant increase in the probability or consequences of an accident previously evaluated.

2. The proposed changes do not create the possibility of a new or different kind of accident from any accident previously evaluated. The proposed changes do not involve any change to the configuration or method of operation of any plant equipment. Accordingly, no new failure modes have been defined for any plant system or component important to safety nor has any new limiting single failure been identified as a result of the proposed changes. Also, there will be no change in types or increase in the amount of effluents released offsite. Therefore, it can be concluded that the proposed changes do not create the possibility of a new or different kind of accident from any accident previously evaluated.

3. The proposed changes do not involve a significant reduction in a margin of safety. The proposed changes do not involve any actual change in the methodology used in the control of solid radioactive wastes or radiological environmental monitoring. The methodology that will be used in the control of radioactive effluents will result in the same effluent release rate as the current methodology now being used. The operational flexibility needed for effluent releases allows the use of concentration values ten times the values given in the new 10 CFR 20. However, this is acceptable since annual doses will be limited to the doses specified in 10 CFR 50, Appendix I and 40 CFR 190. Therefore, it can be concluded that the proposed changes do not involve a significant reduction in a margin of safety.

The NRC staff has reviewed the licensee's analysis and, based on this review, it appears that the three standards of 10 CFR 50.92(c) are satisfied. Therefore, the NRC staff proposes to determine that the amendment request involves no significant hazards consideration.

Local Public Document Room location: Houston-Love Memorial Library, 212 W. Burdeshaw Street, P. O. Box 1369, Dothan, Alabama 36302

Southern Nuclear Operating Company, Inc., Docket Nos. 50-348 and 50-364, Joseph M. Farley Nuclear Plant, Units 1 and 2, Houston County, Alabama

Date of amendments request: August 28, 1992

Description of amendments request: The proposed changes are administrative in nature and will make title changes and clarifying changes to the Technical Specifications as given below:

1. The title "Vice President - Nuclear" will be changed in Section 6.0 to "Vice President."

2. In Section 6.1.2, the term "Nuclear Generation" will be replaced with "Plant Farley nuclear operations."

3. Sections 6.3.1 and 6.4.1 are revised to remove references to the March 28, 1990, NRC letter and Appendix A to 10 CFR Part 55 as all of the requirements are now included in the body of 10 CFR Part 55.

4. The title "Performance and Planning Manager" will be changed in Sections 6.5.1 and 6.5.3 to "Systems Performance Manager."

Basis for proposed no significant hazards consideration determination: As required by 10 CFR 50.91(a), the licensee has provided its analysis of the issue of no significant hazards consideration, which is presented below:

1. The proposed change will not involve a significant increase in the probability or consequences of an accident previously evaluated. The changes are administrative in nature and involve no physical alternation of the plant or changes to setpoints or operating parameters. The changes do not affect operation, maintenance, or testing of the plant. The changes will accurately reflect organizational titles and names, the proper reference to 10 CFR 55, and a title of a

manager which may approve non-administrative procedures. For these reasons, the response of the plant to previously evaluated accidents will remain unchanged.

2. The proposed changes will not create the possibility of a new or different kind of accident from any accident previously evaluated. Since no change is being made to the design, operation, maintenance, or testing of the plant, a new mode of failure is not created. Therefore, a new or different kind of accident will not occur as a result of these changes.

3. The proposed changes do not involve a significant reduction in a margin of safety. The organizational title and name revisions are administrative changes. The CFR reference change reflects the fact that 10 CFR 55 no longer contains an Appendix A. The requirements which were previously in Appendix A of 10 CFR 55 have been incorporated into the body of 10 CFR 55 making this revision an administrative change. The change in the title of the Performance and Planning Manager to the title of Systems Performance Manager is an administrative change. Therefore, these administrative changes will not reduce any margin of safety.

The NRC staff has reviewed the licensee's analysis and, based on this review, it appears that the three standards of 10 CFR 50.92(c) are satisfied. Therefore, the NRC staff proposes to determine that the amendment request involves no significant hazards consideration.

Attorney for licensee: James H. Miller, III, Esq., Balch and Bingham, P. O. Box 306, 1710 Sixth Avenue North, Birmingham, Alabama 35201

NRC Project Director: Elinor G. Adensam

Tennessee Valley Authority, Docket Nos. 50-327 and 50-328, Sequoyah Nuclear Plant, Units 1 and 2, Hamilton County, Tennessee

Date of amendment request: August 21, 1992 (TS 92-07)

Description of amendment request: The proposed amendments would revise the allowable value for the Reactor Coolant System loss of flow reactor trip setpoint from greater than or equal to 89.4 percent to greater than or equal to 89.6 percent of design flow per loop.

Basis for proposed no significant hazards consideration determination: As required by 10 CFR 50.91(a), the licensee has provided its analysis of the issues of no significant hazards consideration, which is presented below:

TVA has evaluated the proposed technical specification (TS change and has determined that it does not represent a significant hazards consideration based on criteria established in 10 CFR 50.92(c). Operation of Sequoyah Nuclear Plant (SQN) in accordance with the proposed amendment will not:

1. Involve a significant increase in the probability or consequences of an accident previously evaluated.

This change to increase the reactor coolant system (RCS) loss of flow reactor trip allowable value from greater than or equal to 89.4 percent to greater than or equal to 89.6 percent does not alter the functions of any safety-related equipment. The change implements a more conservative allowable value that is consistent with the latest assumptions for SQN's accident analysis. This new value provides for reactor trip initiation consistent with SQN's previous analysis with the additional consideration of RCS flow measurement uncertainties for elbow taps without the normalization from a primary[-]to[-]secondary calorimetric. Therefore, accident mitigation functions remain consistent with the analysis and there is not an increase in the consequences of an accident. Likewise, the increase in this allowable value will not increase the probability of an accident because this function provides accident mitigation actions and is not considered the source of any accident.

2. Create the possibility of a new or different kind of accident from any previously analyzed.

As discussed above, the RCS loss of flow reactor trip function provides an accident mitigation function and is not an initiator of any accident. Therefore, the increase in the allowable value for this function will not create a new or different kind of accident previously analyzed, but does implement a more conservative value that is consistent with the accident analysis.

3. Involve a significant reduction in a margin of safety.

This change implements a conservative increase in the loss of flow allowable value to maintain the margin of safety. This increase is being implemented to offset the potential decrease in margin created by using the elbow taps to determine RCS flow. Therefore, this change does not reduce any margin of safety and provides conservative values that will maintain the margin of safety within the SQN accident analysis assumptions.

The NRC has reviewed the licensee's analysis and, based on this review, it appears that the three standards of 10 CFR 50.92(c) are satisfied. Therefore, the NRC staff proposes to determine that the amendment request involves no significant hazards consideration.

Local Public Document Room location: Chattanooga-Hamilton County Library, 1101 Broad Street, Chattanooga, Tennessee

Attorney for licensee: General Counsel, Tennessee Valley Authority, 400 West Summit Hill Drive, Ell B33, Knoxville, Tennessee 37902

NRC Project Director: Frederick J. Hebdon

Tennessee Valley Authority, Docket Nos. 50-327 and 50-328, Sequoyah Nuclear Plant, Units 1 and 2, Hamilton County, Tennessee

Date of amendment request: August 21, 1992 (TS 92-09)

Description of amendment request: The proposed amendments would revise Action a of Specification 3.6.5.2, Containment Air Return Fans, and the Modes 5 and 6 Actions of Specification 3.7.7, Control Room Emergency Ventilation System, by adding exclusion statements that indicate the limitation of Specification 3.0.4 is not applicable. These proposed changes would allow changes in plant operating modes with the control room indication of ice bed temperatures inoperable, but with local temperature monitoring available and obtainable on at least a 12-hour frequency. Also, the proposed changes would allow changes in plant operating modes between Modes 5 and 6 (only) when the Control Room Emergency Ventilation System is inoperable.

Basis for proposed no significant hazards consideration determination: As required by 10 CFR 50.91(a), the licensee has provided its analysis of the issues of no significant hazards consideration, which is presented below:

TVA has evaluated the proposed technical specification (TS) change and has determined that it does not represent a significant hazards consideration based on criteria established in 10 CFR 50.92(c). Operation of Sequoyah Nuclear Plant (SQN) in accordance with the proposed amendment will not:

1. Involve a significant increase in the probability or consequences of an accident previously evaluated.

This addition of an exclusion to TS 3.0.4 for ice bed temperature monitoring will continue to provide a level of temperature monitoring capability that will verify the operability of the ice condenser and thereby ensure its ability to mitigate the consequences of an accident. Loss of all ice bed temperature monitoring capability will require unit shutdown within an acceptable time interval that ensures the availability of the ice condenser safety functions for accident mitigation. For the inoperability of control room emergency ventilation system (CREVS) in Modes 5 and 6, the exclusion to TS 3.0.4 will not remove the actions to return the inoperable train to operable status or place the unaffected train in operation. Similarly, with both trains inoperable, suspension of core alterations or positive reactivity changes will still be required. For operation in Modes 5 and 6, these actions are acceptable based on postulated accidents and are unchanged by the proposed change; therefore, the allowance to change between Modes 5 and 6 while maintaining these positions does not reduce the ability of the CREVS to perform the accident mitigation safety functions assumed in the analysis. Therefore, the TS

3.0.4 exclusion as applied in this proposed change to TSs 3.6.5.2 and 3.7.7 will not increase the consequences of an accident previously evaluated.

The allowance to change operational modes while maintaining the required actions as described will not reduce the availability or functionality of the ice bed temperature monitoring system or CREVS. This continues to ensure that the unit is maintained within the assumptions used in the safety analysis. These systems provide monitoring and accident mitigation functions, and these changes will not increase their potential to create accidents because they are not considered the source of any accident. Therefore, the proposed changes will not increase the probability of an accident previously evaluated.

2. Create the possibility of a new or different kind of accident from any previously analyzed.

As discussed above, the systems affected by this change provide monitoring and accident mitigation functions and are not postulated to be the source of any accident. This change only provides the allowance to change modes while maintaining the required actions that allow continued operation for indefinite periods of time. Therefore, this change cannot contribute to the initiation of an accident or create the possibility of a new or different accident.

3. Involve a significant reduction in a margin of safety.

This change does not alter any functions of the ice bed temperature monitoring system or CREVS, and maintains the same action requirements for system inoperability. These systems will continue to provide the same level of ice condenser temperature indication and control room environment control as assumed in the safety analysis. Therefore, the margin of safety is not reduced as a result of adding an exclusion to TS 3.0.4 for TSs 3.6.5.2 and 3.7.7.

The NRC has reviewed the licensee's analysis and, based on thisreview, it appears that the three standards of 10 CFR 50.92(c) are satisfied. Therefore, the NRC staff proposes to determine that the amendment request involves no significant hazards consideration.

Local Public Document Room location: Chattanooga-Hamilton County Library, 1101 Broad Street, Chattanooga, Tennessee

Attorney for licensee: General Counsel, Tennessee Valley Authority, 400 West Summit Hill Drive, Ell B33, Knoxville, Tennessee 37902

NRC Project Director: Frederick J. Hebdon

Wisconsin Electric Power Company, Docket Nos. 50-266 and 50-301, Point Beach Nuclear Plant, Unit Nos. 1 and 2, Town of Two Creeks, Manitowoc County, Wisconsin

Date of amendment request: September 10, 1992

Description of amendment request: The proposed amendment would revise Technical Specification Section 15.4.6, "Emergency Power System Periodic Tests." Specification A.3 currently requires that each diesel generator be given an inspection, at least annually. For the current inspection only, an 18-month interval would be allowed since the last inspection of diesel generator GO2.

Basis for proposed no significant hazards consideration determination: As required by 10 CFR 50.91(a), the licensee has provided its analysis of the issue of no significant hazards consideration, which is presented below:

1. Operation of a facility in accordance with a proposed amendment does not result in a significant hazards consideration if it does not result in a significant increase in the probability or consequences of an accident previously evaluated. Extending the present G02 annual inspection interval to a maximum of 18 months is not expected to have an adverse effect on diesel reliability. A formal diesel generator reliability program has been established which has not indicated a reduction in diesel generator reliability based on established trigger values. Previous inspections have found no abnormalities which would be expected to affect the diesel during this time. G02 has been maintained in accordance with the manufacturer's recommendations since installation and the diesel generator vendor concurs that an 18-month inspection is acceptable. A significant increase in the probability of a failure of the diesel generator to perform its function, as analyzed in the PBNP FSAR, during the six month additional time between inspections will not occur. Therefore, an increase in the probability or consequences of a previously analyzed accident will not occur.

2. Operation of a facility in accordance with a proposed amendment does not result in a significant hazards consideration if it does not result in a new or different kind of accident than any accident previously evaluated.

The proposed amendments will allow a one-time extension of the Diesel Generator G02 annual inspection interval to 18 months. These amendments will not result in, nor are they the result of any change in the design or function of the emergency diesel generators. The diesel generators will continue to function as designed and analyzed in the PBNP FSAR. A new or different kind of accident than any previously evaluated cannot result.

3. Operation of a facility in accordance with a proposed amendment does not result in a significant hazards consideration if it does not result in a significant reduction in a margin of safety.

The extension of the annual diesel inspection is needed to ensure that Gas Turbine Generator G05 is back in service prior to performing the annual inspection of Emergency Diesel Generator G02. G05 is capable of providing power to on-site electrical distribution systems, including the safeguards buses, and would be utilized in the event of a loss of off-site power and the operable emergency diesel generator. By delaying the Diesel Generator G02 inspection, which requires removing the diesel generator from service, a backup (G05), is available should a failure of G01 occur on demand, thereby improving the availability of on-site electrical power to required equipment under normal and accident conditions. Therefore, a margin of safety will not be significantly reduced.

The NRC staff has reviewed the licensee's analysis and, based on this review, it appears that the three standards of 10 CFR 50.92(c) are satisfied. Therefore, the NRC staff proposes to determine that the amendment request involves no significant hazards consideration.

Notice of Issuance of Amendment To Facility Operating License

During the period since publication of the last biweekly notice, the Commission has issued the following amendments. The Commission has determined for each of these amendments that the application complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment.

Notice of Consideration of Issuance of Amendment to Facility Operating License, Proposed No Significant Hazards Consideration Determination, and Opportunity for Hearing in connection with these actions was published in the **Federal Register** as indicated. No request for a hearing or petition for leave to intervene was filed following this notice.

Unless otherwise indicated, the Commission has determined that these amendments satisfy the criteria for categorical exclusion in accordance with 10 CFR 51.22. Therefore, pursuant to 10 CFR 51.22(b), no environmental impact statement or environmental assessment need be prepared for these amendments. If the Commission has prepared an environmental assessment under the special circumstances provision in 10 CFR 51.12(b) and has made a determination based on that assessment, it is so indicated.

For further details with respect to the action see (1) the applications for amendments, (2) the amendments, and (3) the Commission's related letters, Safety Evaluations and/or Environmental Assessments as indicated. All of these items are available for public inspection at the Commission's Public Document Room, the Gelman Building, 2120 L Street, NW., Washington, D.C., and at the local public document rooms for the particular facilities involved. A copy of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, DC 20555, Attention: Director, Division of Reactor Projects.

Arizona Public Service Company, et al., Docket Nos. STN 50-528, STN 50-529, and STN 50-530, Palo Verde Nuclear Generating Station, Units 1, 2, and 3, Maricopa County, Arizona

Date of application for amendments: June 25, 1991

Brief description of amendments: These amendments delete the Iodine Removal System from Technical Specifications 3/4 3.6.2.2 for Units 1, 2, and 3. The Iodine Removal System uses hydrazine as an additive to the containment spray system at Palo Verde. The removal of the hydrazine additive from the containment spray system will not result in a significant increase in post-Loss of Coolant Accident (LOCA) doses outside of containment.

Date of issuance: September 8, 1992

Effective date: September 8, 1992

Amendment Nos.: 64, 50, and 37

Facility Operating License Nos. NPF-41, NPF-51, and NPF-74: The amendments revised the Technical Specifications.

Date of initial notice in **Federal Register:** September 4, 1991 (56 FR 43803) The Commission's related evaluation of the amendments is contained in a Safety Evaluation dated September 8, 1992. No significant hazards consideration comments received: No.

Local Public Document Room location: Phoenix Public Library, 12 East McDowell Road, Phoenix, Arizona 85004

Baltimore Gas and Electric Company, Docket Nos. 50-317 and 50-318, Cliffs Nuclear Power Plant, Unit Nos. 1 and 2, Calvert County, Maryland

Date of application for amendments: February 13, 1992

Brief description of amendments: The amendments revise the Technical Specifications relating to reactivity control systems to provide clarification and simplification for the control element assemblies and other minor administrative corrections. The Bases Section is revised to reflect the TS changes.

Date of issuance: September 3, 1992

Effective date: September 3, 1992

Amendment Nos.: 174 and 151

Facility Operating License Nos. DPR-53 and DPR-69: Amendments revised the Technical Specifications.

Date of initial notice in **Federal Register:** March 18, 1992 (57 FR 9439) The Commission's related evaluation of these amendments is contained in a Safety Evaluation dated September 3, 1992. No significant hazards consideration comments received: No

Local Public Document Room location: Calvert County Library, Prince Frederick, Maryland 20678.

Carolina Power & Light Company, et al., Docket No. 50-400, Shearon Harris Nuclear Power Plant, Unit 1, Wake and Chatham Counties, North Carolina

Date of application for amendment: February 7, 1992

Brief description of amendment: The amendment revises Operating License (NPF-63) to allow the use of an alternate steam generator tube plugging criterion for the portion of the tubes within the tubesheet. The proposed revision would amend Technical Specification (TS) 4.4.5 specifying an F* (F-star) distance within the tubesheet below which indications would not require repair or plugging.

Date of issuance: September 4, 1992

Effective date: September 4, 1992

Amendment No.: 31

Facility Operating License No. NPF-63. Amendment revises the Technical Specifications.

Date of initial notice in **Federal Register:** April 1, 1992 (57 FR 11104) The Commission's related evaluation of the amendment is contained in a Safety Evaluation dated September 4, 1992. No significant hazards consideration comments received: No

Local Public Document Room location: Cameron Village Regional Library, 1930 Clark Avenue, Raleigh, North Carolina 27605.

Carolina Power & Light Company, et al., Docket No. 50-400, Shearon Harris Nuclear Power Plant, Unit 1, Wake and Chatham Counties, North Carolina

Date of application for amendment: December 16, 1991

Brief description of amendment: The amendment revises Technical Specification 4.2.3.5 so the allowable time period for the use of calibrated instrumentation utilized in the performance of the reactor coolant system calorimetric flow measurement would be increased from 7 to 21 days.

Date of issuance: September 8, 1992

Effective date: September 8, 1992

Amendment No.: 32

Facility Operating License No. NPF-63. Amendment revises the Technical Specifications.

Date of initial notice in **Federal Register:** February 19, 1992 (57 FR 6035) The Commission's related evaluation of the amendment is contained in a Safety Evaluation dated September 8, 1992. No significant hazards consideration comments received: No

Local Public Document Room location: Cameron Village Regional Library, 1930 Clark Avenue, Raleigh, North Carolina 27605.

Commonwealth Edison Company, Docket Nos. STN 50-454 and STN 50-455, Byron Station, Unit Nos. 1 and 2, Ogle County, Illinois Docket Nos. STN 50-456 and STN 50-457, Braidwood Station, Unit Nos. 1 and 2, Will County, Illinois; Docket Nos. 50-373 and 50-374, LaSalle County Station, Units 1 and 2, LaSalle County, Illinois; Docket Nos. 50-295 and 50-304, Zion Nuclear Power Station Units 1 and 2, Lake County, Illinois

Date of application for amendments: May 7, 1992, as supplemented July 1, 1992

Brief description of amendments: The amendments consist of administrative changes which revise the types of procedures that require review by the Onsite Review and Investigative Function (OnSR&IF), specifies the level of review and approval for procedures governed by the proposed Technical Review and Control process, clarifies the authority assigned to the OnSR&IF, and incorporates editorial changes to provide conforming changes to the proposed administrative changes.

Date of issuance: September 4, 1992

Effective date: September 4, 1992

Amendment Nos.: 50, 50, 39, 39, 86, 70, 140, and 129

Facility Operating License Nos. NPF-37, NPF-66; NPF-72, NPF-77; NPF-11, NPF-18; and DPR-39, DPR-48: The amendments revised the Technical Specifications.

Date of initial notice in **Federal Register:** June 10, 1992 (57 FR 24668) The Commission's related evaluation of the amendments is contained in a Safety Evaluation dated September 4, 1992 No significant hazards consideration comments received: No

Local Public Document Room location: For Byron, the Byron Public Library, 109 N. Franklin, P.O. Box 434, Byron, Illinois 61010; for Braidwood, the Wilmington Township Public Library, 201 S. Kankakee Street, Wilmington,

Commonwealth Edison Company, Docket Nos. 50-237 and 50-249, Dresden Nuclear Power Station, Units 2 and 3, Grundy County, Illinois

Date of application for amendments: April 24, 1992

Brief description of amendments: Revision of Technical Specifications to add two new sections under Administrative Controls; Section 6.11 - Radiation Protection Program and Section 6.12 - High Radiation Area.

Date of issuance: September 11, 1992

Effective date: Immediately, to be implemented within 30 days.

Amendment Nos.: 118 and 114

Facility Operating License Nos. DPR-19 and DPR-25. The amendments revised the Technical Specifications.

Date of initial notice in **Federal Register:** June 10, 1992 (57 FR 24668). The Commission's related evaluation of the amendments is contained in a Safety Evaluation dated September 11, 1992. No significant hazards consideration comments received: No

Local Public Document Room location: Morris Public Library, 604 Liberty Street, Morris, Illinois 60450.

Detroit Edison Company, Docket No. 50-341, Fermi-2, Monroe County, Michigan

Date of application for amendment: September 24, 1991, as modified January 31, and April 30, 1992. The licensee submitted additional information to supplement the application by letters dated February 24, March 23 and 26, April 23, May 11, August 12 and 13, 1992.

Brief description of amendment: The proposed amendment would change the licensed thermal power level of the reactor from the current limit of 3293 MWt to an increased limit of 3430 MWt. This request is in accordance with the generic BWR power uprate program established by the General Electric Company (GE) and approved by the NRC staff in a letter dated September 29, 1991.

Date of issuance: September 9, 1992

Effective date: Start of the third refueling outage (RFO3), currently scheduled for September 12, 1992, with full implementation prior to startup from RFO3.

Amendment No.: 87

Facility Operating License No. NPF-43. The amendment revises Facility Operating License NPF-43 and the Technical Specifications.

Date of initial notice in **Federal Register:** March 18, 1992 (57 FR 9442) and June 24, 1992 (57 FR 28198). The supplemental letters submitted additional information and did not change the initial proposed no significant hazards consideration determination. The Commission's related evaluation of the amendment is contained in a Safety Evaluation dated September 9, 1992. No significant hazards consideration comments received: No.

Local Public Document Room location: Monroe County Library System, 3700 South Custer Road, Monroe, Michigan 48161.

Duke Power Company, et al., Docket Nos. 50-413 and 50-414, Catawba Nuclear Station, Units 1 and 2, York County, South Carolina

Date of application for amendments: April 13, 1992, as supplemented July 8 and August 26, 1992

Brief description of amendments: The amendments consist of changes to the Technical Specifications for Catawba Unit 1 Cycle 7 operation including revisions to reflect use of methodology developed by the Duke Power Company for accident and transient analysis, as well as other revisions.

Date of issuance: September 14, 1992

Effective date: September 14, 1992

Amendment Nos.: 101 and 95

Facility Operating License Nos. NPF-35 and NPF-52: Amendments revised the Technical Specifications.

Date of initial notice in **Federal Register:** July 21, 1992 (57 FR 32240) The August 26, 1992, letter provided clarifying information that did not change the initial proposed no significant hazards consideration determination. The Commission's related evaluation of the amendments is contained in a Safety Evaluation dated September 14, 1992. No significant hazards consideration comments received: No.

Local Public Document Room location: York County Library, 138 East Black Street, Rock Hill, South Carolina 29730

Iowa Electric Light and Power Company, Docket No. 50-331, Duane ArnoldEnergy, Center, Linn County, Iowa

Date of application for amendment: November 15, 1991

Brief description of amendment: The amendment revised the Technical Specifications applicable to loading fuel assemblies adjacent to Source range Monitors, added Limiting Conditions for Operation and Surveillance Requirements and made administrative changes.

Date of issuance: August 25, 1992

Effective date: August 25, 1992

Amendment No.: 186

Facility Operating License No. DPR-49. Amendment revised the Technical Specifications.

Date of initial notice in **Federal Register:** December 11, 1991 (56 FR 64654) The Commission's related evaluation of the amendment is contained in a Safety Evaluation dated August 25, 1992. No significant hazards consideration comments received: No.

Local Public Document Room location: Cedar Rapids Public Library, 500 First Street, S. E., Cedar Rapids, Iowa 52401.

Long Island Power Authority, Docket No. 50-322, Shoreham Nuclear Power Station, Unit 1, Suffolk County, New York

Date of application for amendment: June 28, 1990 as supplemented on June 13, June 27, October 31, and December 5, 1991.

Brief description of amendment: License No. NPF-82 was transferred from the Long Island Lighting Company (LILCO) to the Long Island Power Authority (LIPA) by Order dated February 29, 1992. This amendment revises Licensee No. NPF-82 and the Technical Specifications to reflect the transfer of the license from LILCO to LIPA.

Date of issuance: September 4, 1992

Effective date: Thirty (30) calendar days from date of issuance.

Amendment No.: 9

Possession Only License No. NPF-82: Transfer license from LILCO to LIPA.

Date of initial notice in **Federal Register:** March 20, 1991, (56 FR 11781) The Commission's related evaluation of the amendment is contained in a Safety Evaluation dated September 4, 1992.

No significant hazards consideration comments received: On March 20, 1991, the NRC published in the **Federal Register** a Notice of Consideration of Issuance of Amendment to Facility Operating License and Proposed No Significant Hazards Consideration Determination and Opportunity for Hearing related to the requested action (56 FR 11781). The NRC has received comments and a request for hearing. However, the petitioners in their letter dated June 3, 1992, requested permission to withdraw their opposition in accordance with their settlement agreement with the licensee. The Atomic Safety and Licensing Board in its Order of June 17, 1992, granted the petitioner's request to withdraw.

Public Library, Route 25A, Shoreham, New York 11786-9697.

Philadelphia Electric Company, Public Service Electric and Gas Company Delmarva Power and Light Company, and Atlantic City Electric Company,Docket Nos. 50-277 and 50-278, Peach Bottom Atomic Power Station,Unit Nos. 2 and 3, York County, Pennsylvania

Date of application for amendments: January 10, 1992 as revised by letter dated July 20, 1992 and as supplemented by letter dated April 3, 1992.

Brief description of amendments: These amendments change the Technical Specification (TS) Section 3.9.C., Allowable Out of Service Times (AOTs) for the Emergency Service Water (ESW) pumps. The changes delete Section 3.9.C.3 of the TS which addressed use of the Emergency Cooling Water (ECW) pump as an equivalent ESW pump. The changes also modify surveillance requirements for the ECW pump, ESW Booster pumps and the Emergency Cooling Water Tower fans. The amendment modifies the Bases to reflect the above changes. Finally, the amendments modify terminology and numbering in Section 3.9.C and 4.9.C to make the TS consistent with the Updated Final Safety Analysis Report.

Date of issuance: September 16, 1992

Effective date: September 16, 1992

Amendments Nos.: 170 and 174

Facility Operating License Nos. DPR-44 and DPR-56: Amendments revised the Technical Specifications.

Date of initial notice in **Federal Register:** February 5, 1992 (57 FR 4492) The Commission's related evaluation of the amendments is contained in a Safety Evaluation dated September 16, 1992. No significant hazards consideration comments received: No

Local Public Document Room location: Government Publications Section, State Library of Pennsylvania, (REGIONAL DEPOSITORY) Education Building, Walnut Street and Commonwealth Avenue, Box 1601, Harrisburg, Pennsylvania 17105.

Power Authority of the State of New York, Docket No. 50-333, James A. FitzPatrick Nuclear Power Plant, Oswego County, New York

Date of application for amendment: June 22, 1992

Brief description of amendment: The amendment adds response time testing requirements for the reactor protection system and main steam isolation valve actuation instrumentation including the analog transmitter trip system (ATTS). These testing requirements are applied to instrument channels for which response time is significant to the Final Safety Analysis Report transient and accident analyses.

Date of issuance: September 9, 1992

Effective date: September 9, 1992

Amendment No.: 183

Facility Operating License No. DPR-59: Amendment revised the Technical Specifications.

Date of initial notice in **Federal Register:** July 8, 1992 (57 FR 30256) The Commission's related evaluation of the amendment is contained in a Safety Evaluation dated September 9, 1992. No significant hazards consideration comments received: No

Local Public Document Room location: Reference and Documents Department, Penfield Library, State University of New York, Oswego, New York 13126.

Wolf Creek Nuclear Operating Corporation, Docket No. 50-482, Wolf CreekGenerating Station, Coffey County, Kansas

Date of amendment request: June 19, 1992

Brief description of amendment: The amendment revises Technical Specification 6.8 to clarify the approval process for plant procedures, makes an editorial correction to Technical Specification 3.3 and updates position titles in Technical Specification 6.5.1.2.

Date of issuance: September 10, 1992

Effective date: September 10, 1992

Amendment No.: Amendment No. 56

Facility Operating License No. NPF-42. Amendment revised the Technical Specifications.

Date of initial notice in **Federal Register:** August 5, 1992 (57 FR 34593) The Commission's related evaluation of the amendment is contained in a Safety Evaluation dated September 10, 1992. No significant hazards consideration comments received: No.

Local Public Document Room Locations: Emporia State University, William Allen White Library, 1200 Commercial Street, Emporia, Kansas 66801 and Washburn University School of Law Library, Topeka, Kansas 66621

Yankee Atomic Electric Company, Docket No. 50-029, Yankee Nuclear Power Station, Franklin County, Massachusetts

Date of application for amendment: July 8, 1992

Brief description of amendment: Permits the licensee to revise the organizational and staffing sections of the Administrative Controls Technical Specifications to be consistent with the present plant status.

Date of issuance: September 4, 1992

Effective date: September 4, 1992

Amendment No.: 145

Possession Only License No. DPR-3: Amendment revised the Technical Specifications.

Date of initial notice in **Federal Register:** August 5, 1992, (57 FR 34593). The Commission's related evaluation of the amendment is contained in a Safety Evaluation dated September 4, 1992.

No significant hazards consideration comments received: No

Local Public Document Room location: Greenfield Community College, 1 College Drive, Greenfield, Massachusetts 01301.

Dated at Rockville, Maryland, this 23rd day of September 1992.

For the Nuclear Regulatory Commission.

Steven A. Varga,

Director, Division of Reactor Projects-I/II. Office of Nuclear Reactor Regulation

BILLING CODE 7590-F

[Docket No. 50-17]

Catholic University of America (Catholic University of America AGN-201 Research Reactor); Order Approving Decommissioning Plan and Authorizing Decommissioning

I.

By application dated February 6, 1992, the Catholic University of America (the licensee) requested authorization to decommission and dismantle the Catholic University of America's Aerojet-General Nucleonics Corporation (AGN) AGN-201 Research Reactor, Facility License No. R-31, located on the licensee's campus in Washington, DC, and to dispose of the component parts, in accordance with the Decommissioning Plan for the AGN-201 Research Reactor (Decommissioning Plan) submitted as part of the application. A "Notice of Proposed Issuance of Orders Approving Decommissioning Plan, Authorizing Decommissioning, and Terminating Facility License" was published in the **Federal Register** on August 20, 1992, (57 FR 37850). No request for a hearing or petition for leave to intervene was filed following notice of the proposed action.

II.

The U.S. Nuclear Regulatory Commission (the Commission) has reviewed the application with respect to the provisions of the Commission's rules and regulations and has found that the decommissioning, dismantling and disposal of component parts as stated in

the licensee's Decommissioning Plan will be consistent with the regulations in 10 CFR chapter I, and will not be inimical to the common defense and security, or the health and safety of the public. The basis of these findings is set forth in the concurrently issued Safety Evaluation by the Office of Nuclear Reactor Regulation.

III.

Pursuant to 10 CFR 51.21, 51.30, and 51.35, the Commission has prepared an Environmental Assessment and Finding of No Significant Impact for the proposed action. Based on that Assessment, the Commission has determined that the proposed action will not result in any significant environmental impact and that an environmental impact statement need not be prepared.

IV.

Accordingly, pursuant to Section 103, 161b, 161i, and 161o, of the Atomic Energy Act of 1954, as amended, the licensee is hereby authorized to decommission and dismantle the AGN-201 Research Reactor facility covered by Facility License No. R-31, as amended, and dispose of the component parts in accordance with its Decommissioning Plan, and the Commission's rules and regulations, subject to the following conditions:

(a)(1) The licensee may make changes in facilities and procedures described in the approved Decommissioning Plan without prior Commission approval, unless the proposed change involves a change in the Technical Specifications (TS) incorporated in the license or an unreviewed safety question.

(2) A proposed change shall be deemed to involve an unreviewed safety question (i) if the probability of occurrence or the consequences of an accident or malfunction of equipment important to safety previously evaluated in the Decommissioning Plan may be increased; or (ii) if a possibility for an accident or malfunction of a different type than evaluated previously in the Decommissioning Plan may be created; or (iii) if the margin of safety as defined in the basis for any TS is reduced.

(b)(1) The licensee shall maintain records of changes in the facilities and of changes in procedures made pursuant to this section, to the extent that these changes constitute changes in the facilities or procedures as described in the Decommissioning Plan. These records must include a written safety evaluation which provides the basis for the determination that the change does not involve an unreviewed safety question.

(2) The licensee shall submit, as specified in 50.4, a report containing a brief description of any changes, including a summary of the safety evaluation of each. The report must be submitted annually.

(3) The records of changes in the facility or changes in procedures shall be maintained until the date of termination of the license.

(c) If the licensee desires (1) a change in the TS or (2) to make a change in the facilities or procedures described in the Decommissioning Plan which involve an unreviewed safety question or a change in the TS, the licensee shall submit an application for amendment of the license pursuant to 10 CFR 50.90 or request approval of a revision to the Decommissioning Plan.

V.

After completion of the dismantling and disposal, the licensee will submit a report on the radiation survey it has performed to confirm that radiation and surface contamination levels in the facility area satisfy the values specified in the Decommissioning Plan and in the Commission's guidance which is set forth in the staff's Safety Evaluation. Following an inspection by representatives of the Commission to verify the radiation and contamination levels in the facility, consideration will be given to issuance of a further order terminating Facility License No. R-31.

VI.

For further detail with respect to this action, see (1) the licensee's application for authorization to decommission and dismantle the facility, and dispose of component parts, dated February 6, 1992; (2) the Commission's Safety Evaluation; and (3) the Environmental Assessment and Finding of No Significant Impact. All of these items are available for public inspection at the Commission's Public Document Room, 2120 L Street, NW., Washington, DC. Copies of items (2) and (3) may be obtained by request to the U.S. Nuclear Regulatory Commission, Washington, DC 20555, Attention: Director, Division of Reactor Projects—III/IV/V.

Dated at Rockville, Maryland this 24th day of September 1992.

For the Nuclear Regulatory Commission.

Bruce A. Boger,

Director, Division of Reactor Projects—III/IV/V, Office of Nuclear Reactor Regulation.

BILLING CODE 7590-01-M

[Docket No. 40-08681-MLA; ASLBP No. 92-666-01-MLA (Source Materials License No. Sua-1358)]

UMETCO Minerals Corp.; Memorandum and Order

September 24, 1992.

Before Administrative Judge James P. Gleason, Presiding Officer

Prehearing Conference

Notice is hereby given that under the authority of 10 CFR 2.1209 a prehearing conference will be held in this proceeding on October 29, 1992 in the San Juan County Commission Chambers, 2nd Floor, 117 S. Main Street, Monticello, Utah. The conference will commence at 1 p.m. and will be preceded by a site visit to the UMETCO White Mesa Mill in Blanding, Utah at 10 a.m.

The conference is being held for the purpose of simplifying the issues, to define the matters in controversy and to expedite the orderly disposition of the proceeding. It is anticipated that the future hearing procedure will be determined by the conclusion of the conference. Persons who may desire to submit their views on this license proceeding, either orally or in written form, will have that opportunity during the conference. Such statements will not be considered a part of the decisional record and will be limited to a time to be announced at the beginning of the conference.

Ordered. Bethesda, Maryland, September 24, 1992.

For the Atomic Safety and Licensing Board.

James P. Gleason,

Presiding Officer, Administrative Judge.

BILLING CODE 7590-01-M

NUCLEAR WASTE TECHNICAL REVIEW BOARD

Stuctural Geology & Geoengineering Panel to hold workshop on Exploratory Studies Facility Design and Construction Alternatives

Pursuant to its authority under section 5051 of Public Law 100-203, the Nuclear Waste Policy Amendments Act of 1987, the Nuclear Technical Review Board's (the Board) Panel on Structural Geology & Geoengineering will hold a two-and-a-half-day workshop on November 4-6, 1992. The workshop will focus on alternative design and construction strategies for the proposed exploratory studies facility (ESF) at Yucca Mountain, Nevada. A site at Yucca Mountain currently is being

characterized by the Department of Energy (DOE) for its suitability as the possible location of a permanent repository for civilian spent fuel and defense high-level waste. The workshop, which is open to the public, will be held at the Stouffer Concourse Hotel, 3801 Quebec Street, Denver, Colorado 80207; (303) 399–7500.

The workshop tentatively has four sessions, each of which will consist of a brief status update by DOE staff and/or contractors followed by informal round-table discussion. Tentative session topics include (1) the baseline ESF—approaches to developing the baseline configuration and alternative strategies; (2) exploration and testing—the definition of early exploration and testing, and how the ESF can best be used to accomplish key elements of the site-suitability and site-characterization programs; (3) management and acquisition strategies—a review of alternatives for obtaining early delivery of construction at minimum cost; and (4) a summary and wrap-up of recommendations for a preferred alternative for obtaining early access to the underground.

The Board has invited representatives from the DOE and its contractors and from the construction industry to the workshop. Expert consultants to the Board also will be attending.

Transcripts of the workshop will be available on a library-basis from Victoria Reich, Board librarian, beginning December 17, 1992. For further information, contact Paula N. Alford, Director, External Affairs, Nuclear Water Technical Review Board, 1100 Wilson Boulevard, suite 910, Arlington, Virginia 22209; (703) 235–4473.

Dated: September 25, 1992.

William Barnard,

Executive Director, Nuclear Technical Review Board.

BILLING CODE 6820–AM–M

OFFICE OF MANAGEMENT AND BUDGET

Office of Federal Procurement Policy

Policy Letter on Inherently Governmental Functions

AGENCY: Office of Management and Budget, Executive Office of the President, Office of Federal Procurement Policy.

ACTION: Policy letter on inherently governmental functions.

SUMMARY: The Office of Federal Procurement Policy (OFPP) publishes today the final version of a policy letter providing guidance to Executive Departments and agencies on (1) what functions are inherently governmental functions that must only be performed by Government officers and employees and (2) what contractible functions so closely support Government officers and employees in their performance of inherently governmental functions that the terms and performance of those contracts require closer scrutiny from Federal officials. This policy letter has been developed because executive agencies, members of Congress, the General Accounting Office, and the public have from time to time either requested guidance regarding, or inquired about, the propriety of awarding contracts for certain types of functions or administering contracts in certain ways. Previous guidance on this issue has also not been as detailed as that which we now provide.

FOR FURTHER INFORMATION CONTACT: Richard A. Ong, Deputy Associate Administrator, Office of Federal Procurement Policy, 725 17th Street, NW.—Suite 9001, Washington, DC 20503 (202) 395–7209. To obtain a copy of this policy letter, please call OMB's Publications Office at (202) 395–7332.

SUPPLEMENTARY INFORMATION:

Comments received. We received 34 comments in response to our proposed policy letter published in the **Federal Register** on December 16, 1991 (56 Fed. Reg. 65279): Eight from industry or trade groups, four from private individuals, two from employee organizations, one from a Federally funded research and development center, and 19 from Government agencies.

1. *Purpose of the policy letter.* This policy letter on inherently governmental functions is being published to provide guidance on what kinds of functions, as a matter of policy, must be performed by officials of the Executive Branch of the United States and what kinds of functions may be performed by private persons under contract with the Federal Government.

Previous guidance on these matters that has been available to the Executive Branch has not been detailed and sometimes Federal agencies have permitted contractors to perform functions that should be performed by Government personnel. We now provide more detailed guidance.

2. *Relationship of policy letter to other OFPP publications on service contracting.* This policy letter is also one of several that the Office of Federal Procurement Policy (OFPP) has published recently that have focused on some aspect of service contracting in the Federal Government. At this time, OFPP has determined it is best to deal with individual aspects of service contracting rather than trying to publish comprehensive guidance in one document. We will consider collecting all of the guidance on service contracts in one document in the future.

Thus, we do not cover in detail in this policy letter such matters as cost effectiveness of contracting for services, conflicts of interest of service contractors, and management of service contracts. These issues are dealt with in OMB Circular No. A–76, Performance of Commercial Activities, August 4, 1983 (under revision); OFPP Policy Letter 89–1, Conflict of Interest Policies Applicable to Consultants, 54 FR 51805 (December 18, 1989); OFPP Memorandum for Agency Senior Procurement Executives, Government-Wide Guidance on Contract Administration (March 15, 1991); OFPP Policy Letter 91–2, Service Contracting, 56 FR 15110 (April 15, 1991); proposed OFPP Policy Letter 92–_____, Past Performance Information, 56 FR 63988 (December 6, 1991); and proposed OFPP Policy Letter of 92–_____, Management of Service Contracting, 56 FR 66091 (December 20, 1991).

3. *Relationship to OMB Circular No. A–76.* One commenter asked that we make clear our apparent intent to clarify rather than alter the guidance originally found in OMB Circular No. A–76 on inherently governmental functions. That is our intent. No fundamental change is intended.

We have altered the form of the original Circular A–76 definition of an inherently governmental function in the interest of clarity. Specific examples cited in the original A–76 definition have been incorporated into appendix A and a list of the general principles underlying the selection of the functions listed in that appendix has been added in their stead.

The terms "function" and "activity" as used in this policy letter and Circular A–76, respectively, are interchangeable.

The same commenter above suggested that we add a new appendix C, containing a nonexclusive list of functions that are commercial activities that should be contracted. We have not adopted this suggestion because the scheme proposed is the same one we have implicitly adopted. The proposed appendix C is nothing more than the list of examples of commercial activities found as an Attachment to Circular A–76. We do not believe it is necessary to incorporate that A–76 attachment in this policy letter. The fact that we have not provided this appendix C thus should

not be construed as narrowing the scope of functions that have been contracted in the past. Nonetheless, we have added language to section 5 to clarify the relationship between Circular A–76 and this policy letter on this point.

Another commenter stated that the relationship between this policy letter and Circular A–76 is unclear. This policy letter is to be the exclusive source of guidance on what constitutes, as a matter of policy, an inherently governmental function.

4. *Libraries.* Several persons questioned the inclusion of library operations as a ministerial function that should be contracted out in subsection 7(a) of the December version of the policy letter. The fact that employees render professional services in performing a function does not mean that the function in question is necessarily inherently governmental. In fact, the Government frequently seeks out contract services precisely because of the level of sophistication required to perform a particular function. On the other hand, agencies may determine that aspects of their library operations, such as handling certain types of information in certain circumstances, involve performance of an inherently governmental function. Therefore, we have removed the reference to libraries.

5. *Contract audits for inspectors general.* One commenter suggested that Federal inspector general (IG) work should be done by using Government resources, with exceptions justified on a case-by-case basis, unless specific technical expertise is needed temporarily and is not available within the Government. This suggestion was not adopted because (1) Congress has specifically authorized the use of contract auditors in ¶ 6(a)(9) of the Inspector General Act codified at 5 U.S.C. App. 3, and (2) financial and compliance audit activities are not considered inherently governmental functions.

Another commenter questioned whether subsection 12(g) of Appendix A pertaining to the determination of whether contract costs are reasonable, allocable, and allowable proscribes the use of contract audit services. It does not. The decision on what costs are reasonable, allocable, and allowable is ultimately a Government decision, but that decision may be based on recommendations made by contract auditors. Certified public accountants, for example, only render "opinions" and contracts sometimes provide that audit reports are advisory only. Moreover, the use of contract auditors has been authorized by Congress, as noted above.

6. *Agency determinations.* One commenter interpreted the policy letter as authorizing Federal managers to make a final determination on whether a function is an inherently governmental function, under this policy letter, without such determination's being subject to being overturned by the Office of Management and Budget (OMB) or being subject to a cost comparison study under Circular A–76. In general, agencies are expected to make their own determinations, subject to oversight by OMB. Language has been added to subsection 7(c) to clarify this point.

7. *Agency discretion.* One commenter questioned the need for the language in former subsection 7(e) regarding agency discretion to award nonpersonal service contracts. We agree it is unnecessary. It is already clear that awarding a contract is an agency responsibility.

8. *Incorporation in OMB Circular No. A–76, other documents.* Several commenters suggested that the policy letter be incorporated in Circular A–76, "Commercial Activities," currently being revised. We did not incorporate this suggestion because A–76 is already a lengthy document. Also, contracting for inherently governmental functions is indeed a consideration in contracting out, but it is not unique to the A–76 program. All Federal officials who contract for nonpersonal services must consider the problem of inherently governmental functions, and we thus believe separate guidance applicable to all such contracting, not just to nonpersonal service contracting in the A–76 context, is the better alternative. Other commenters urged that the policy letter be combined with one or more other OFPP policy letters, such as those on conflict of interest, service contracting, and past performance and published in a form other than a policy letter. This suggestion has merit but we believe it best to try to deal with discrete portions of service contracting rather than to try to deal with all facets of a complex problem at once, as discussed in point 2, above.

9. *Agency discretion regarding resource allocation.* One commenter suggested we should address the issues of the future balance between official and contractor workforce in the performance of "basic governmental work," the specific expertise needed to manage the contractor workforce now or in the future, where this expertise should be located, and the way in which it can be maintained. We believe this is a matter for agencies themselves to determine, given their knowledge of their mission, their resources, the kinds of services they wish to contract, and the size of their service contracting effort. We merely highlight the problem of lack of oversight as a loss of Government control and require agencies to be aware of their existing oversight responsibilities. They are, however, to use their own discretion to figure out how to manage their contracts.

10. *Evaluation of proposals.* One commenter believes there is an apparent conflict between former subsection 14(b) in appendix A and section 8 of appendix B. There is no conflict as new subsection 12(b) refers to participation as a voting member on source selection boards only.

11. *Appendix B. controls.* The same commenter also suggested that appendix B should contain a discussion of possible controls that the Government should employ to prevent the functions listed there from being perceived as inherently governmental function. We do not believe this is necessary, as any function that is in appendix B is by definition not an inherently governmental function.

12. *Applicability to nonpersonal services.* Three commenters questioned why the policy letter applies only to nonpersonal service contracts. Upon consideration, we have accordingly deleted the definition of "service contract" in section 5. No useful purpose is served by defining "personal services" differently from the FAR and no harm arises from having the policy letter apply to the minimal number of true personal service contracts. Personal service contracts that are really personnel appointments are excluded from the coverage of the policy letter. Thus, FAR 37.102(b) need not be amended as a result of this policy letter.

13. *Subcontractors.* Commenters questioned whether subsection 12(d) of appendix A should apply to subcontractors. It does not and clarifying language has been added.

14. *Supplies or services purchased by prime contractors.* Some commenters questioned the apparent effect of subsection 12 in appendix A of preventing contractors from buying supplies and services for their own account. It is not the intent of this policy letter to prevent contractor mess halls from buying food to be prepared for military personnel. Nor does it affect what or how contractors buy to be incorporated into supplies or services to be delivered to the Government. Similarly, contractors may purchase supplies or services for the Government while acting within reasonable Government guidelines. Section 12 is

only meant to address the Government's direct acquisition of supplies or services.

15. *Independent judgement.* The emphasis placed on independent judgement by this policy letter does not preclude the wholesale adoption of contractor advice, opinions, recommendations, ideas, or conclusions. They merely may not be adopted, in whole or in part, without officials' first exercising independent judgement.

16. *Duties of contracting officers.* We have added language to section 8 to spell out the analytical steps to be followed by contracting officers seeking to comply with this policy letter.

17. *Risk of injury to the public.* One commenter stated that the definition of an inherently governmental function does not clearly address the danger to the public interest when a function is contracted out and the public is at risk if contractors, such as fire fighters or military support contractors, fail or refuse to act in time of crisis. The risk of injury to the public is an important consideration. We believe, however, that ¶7(b)(5) appropriately identifies this point as a consideration in determining whether a function is, as a matter of policy, an inherently governmental function. The decision to include several of the functions listed in appendix A reflects an underlying concern for this risk.

18. *Binding nature of decisions.* This same commenter noted that it is an overstatement to say that the use of discretion (referred to in what is now subsection 7(a) of the policy letter) must have the effect of committing the Government to a course of action. This is because a scientific consulting firm, for example, could submit a study that would have a tremendous impact or regulations or other agency actions but would not necessary lead to a commitment to a course of action.

We have addressed the element of discretion in subsection 7(a) to convey the idea that the mere existence of the element of discretion is not determinative of whether, as a matter of policy, an inherently governmental function is involved. Moreover, it is useful to observe that a study that has a tremendous impact is not per se a bad thing. A study may have that effect because of its great merit. We should be concerned, however, when a study is allowed to proceed to the point where alternative views, solutions, research, or conclusions, and so forth, cannot realistically be included or taken into account. In this case, the contractor has in effect made all important decisions. Section 7(b)(3) addresses this issue.

19. *Federally funded research and development centers (FFRDCs).* One commenter stated that while profit-making contractors can perform functions listed in appendix B, the policy letter should cross-reference FAR 35.017 pertaining to FFRDCs and "recognize that FFRDCs are an equally viable source of expertise requiring less rigorous oversight." We have not adopted this suggestion. We do not agree that FFRDCs necessarily require less oversight. We do recognize, however, that they are dealt with in detail in FAR Part 35 and that its provisions may suffice to enable satisfactory agency oversight of FFRDCs. Whether fewer or additional control measures are necessary to ensure agency control over FFRDCs is a matter for agencies to decide in the circumstances of each case.

20. *Architect-engineer evaluation boards.* This same commenter questioned whether section 3, which states that services obtained by personnel appointments and advisory committees are not covered by this policy letter, could be construed to prohibit private individuals appointed to architect-engineer source evaluation boards in accordance with FAR 36.602 from voting. To the extent such boards are advisory committees, the policy letter is not applicable to them. If they are not, the commenter makes an excellent point. FAR 36.602–4 makes clear that the agency is to make the final selection and FAR 36.602–3(d) provides for the evaluation board to set out in its report the considerations upon which its recommendations were based. This is an acceptable mechanism and we have accordingly revised subsection 12(b) of appendix A and section 14 of appendix B to make clear that it is selection of sources that is the most sensitive function. Contractor activities that result in recommendations and that explain how those recommendations were arrived at adequately preserve agency options. A related change has been made in subsection 7(f) stating that requiring contractors to explain how they arrived at their recommendations is another available control measure.

21. *Factors to consider in totality of the circumstances*—(a) *Complexity and oversight.* One commenter questioned the inclusion of ¶7(d)(2) of the proposed policy letter relating to the complexity of the task to be performed. Upon consideration, we conclude that complexity is better considered in conjunction with the provision that was at 7(d)(12) relating to oversight procedures, resources, and practices. We have amended paragraph 12 accordingly and moved it, as well as the provision in former ¶7(d)(4) relating to the duration of the contract, to new subsection 7(d), Post-award responsibilities. This was done to remove questions relating to contract oversight from the "totality of the circumstances" test. It is important to understand that, if an agency has inadequate oversight procedures or poor oversight practices, the underlying function of any agency contract affected by these deficiencies is not thereby transformed into an inherently governmental function. As the totality test focuses on the nature of the function in question and as there can be a transfer of oversight responsibility even if the underlying function is contractible, the issue of de facto transfer of control should therefore be dealt with elsewhere. (Note that a transfer of contract management responsibility to the contractor is explicitly not permitted by appendix A, subsection 12(e).)

(b) *Ultimate user of contractor work product.* Several commenters questioned the inclusion of this factor at ¶7(d)(3) of the proposed policy letter. We agree it should be taken out. Who will use the contractor's work product is important and this has bearing on how much management attention to give to the contract, but it doesn't say anything about the nature of the underlying function or the adequacy of agency contract administration.

(c) *Review of contractor action.* The same commenter questions the advisability of including a factor (new ¶7(d)(5)) that relates to the finality of any contractor's adjudication of any claim and the type of agency review of contractor adjudications. We see no problem with agencies' providing for contractor adjudication of claims so long as citizens know that they have a right of recourse to agency decisionmakers if they are dissatisfied with the decision of the contractor. (Note, however, that certain kinds of hearings may still not be conducted by contractors, e.g., hearings to determine the eligibility of any person for a security clearance, or hearings involving actions that affect matters of personal reputation or eligibility to participate in Government programs. See appendix A, section 14.)

Thus, we distinguish between, on the one hand, holding hearings and making recommendations and, on the other, retaining the authority to issue the final adjudicatory decision. Contractors may perform the former functions so long as there is adequate oversight, agencies retain the authority to issue the final decision, and the public has a right to insist that the agency make the final decision, if is so desires. This is easier to understand if one views the contractor's action as more of an advisory action

than one that binds the claimant with only limited opportunities to change the result before the agency. Note that in the absence of an appeal by a claimant, the agency need not rule on each contractor decision or ruling. It should, of course, inspect or sample contractor decisions or rulings from time to time to ensure that contractors comply with agency guidelines and procedures.

(d) *Limiting or extinguishing discretion.* The same commenter noted that our speaking in terms of contractor limiting or extinguishing discretion in former ¶7(d)(5) could mistakenly create the impression that some of the Government's authority can be exercised by a contractor. The policy letter attempts to clarify this issue at subsection 7(a).

(e) *Public perception.* Several commenters questioned the inclusion of this factor at ¶7(d)(11) of the proposed policy letter, believing that public perception is too ambiguous a concept. We agree. A function can probably be analyzed in the light of other factors listed without the need to resort to the concept of perceptions. Appendix A of the policy letter is itself an up-to-date listing that already takes into account the factor of public perceptions. The paragraph has been deleted.

(f) *Laws applicable to the Civil Service.* Several commenters questioned the inclusion of this factor at ¶7(d)(13) of the proposed policy letter. We agree and have deleted this factor. The considerations listed may be relevant to what good contract management should require by way of contract conditions, but they don't say anything about the nature of the function or the adequacy of agency contract administration practices.

(g) *Record keeping requirement.* One commenter found the meaning of paragraph 7(d)(15) of the proposed policy letter unclear. This factor was included to cover situations such as a contractor's providing aircraft-related training. If the contractor proves to be incompetent or negligent, the fact that the contractor did maintain or was required to maintain records of who was trained permits corrective action to be taken, such as locating improperly trained students and requiring retraining. If records are not maintained, the Government cannot exercise ultimate control because it cannot correct any errors. Nonetheless, the provision appears to have only limited application and has been deleted.

22. *Collection of fees.* Two commenters questioned the provisions of section 20 of appendix A of the proposed policy letter prohibiting collection of fees or other public moneys, pointing out that contractors in mess halls for military personnel currently collect charges for meals and Department of Housing and Urban Development (HUD) contractors collect fees from purchasers of HUD properties. We have modified the policy letter to enable routine collection of fees where good cash management practices and other controls are in effect, where there is little danger of miscalculating the amount of money ultimately due the Government, and where there is little difficulty in obtaining payment. For example, a contractor could have discretion to determine that a family seeking entrance to a park consists of four people rather than three, and that one of the four is a child under 12, but the contractor would not have the discretion to determine the amount of the fee to be paid by each person in a particular category. HUD contractors may also collect fees from purchasers of HUD properties in accordance with subsection 17(a) of appendix A. We also make clear that routine voucher and invoice examination by contractors is an acceptable practice.

23. *Contract for one function or several.* One commenter questioned whether the policy letter reflects our belief that only contracts with multiple functions are susceptible to confusion with respect to inherently governmental functions. This is not our belief. The policy letter is intended to provide guidance with respect to discrete functions regardless of whether there is a mixture of several functions in a contract or there is only one function that is being contracted.

24. *Post-award responsibilities.* Section 7(e) has been amended to make clear that agency contract oversight is to ensure contractor performance in accordance with the terms of the contract, but that oversight must not be exercised so as to create a personal service contract. Language from subsection 7(d) of the proposed policy letter has been moved to subsection 7(e), as explained in section 21, above.

25. *Drafting of Congressional testimony, responses to Congressional correspondence, and agency responses to audit reports from an Inspector General, the General Accounting Office, or other Federal audit entity.* Two commenters questioned whether contractors should be able to draft Congressional testimony, subject to ultimate agency approval. Approval is a key power reserved to any official and we by no means agree that officials do or will approve contractor work in a perfunctory manner. We have nonetheless reexamined this issue and, because of the importance of Congressional testimony and correspondence and of agency responses to audit reports, we are now deciding, as a matter of policy, that these documents should not be drafted by contractors. We have thus added a new subsection (c) to the body of the policy letter to this effect. We deleted the relative portions of appendix A because we do not believe that drafting documents per se is an inherently governmental function and failing to exercise sufficient oversight with respect to drafting of such documents does not transform the underlying function into an inherently governmental function, as noted in subsection 21(a), above. Contractor reports, conclusions, summaries, analyses, and other work products may, of course, still be quoted or otherwise referenced in Congressional testimony, correspondence, responses to audit reports, or set out in such things as attachments, appendices, or enclosures thereto.

26. *Reliance on contractor support.* One commenter called attention to our statement in section 4 of the policy letter that agencies "award service contracts for various reasons, such as to acquire special skills not available in the Government or to meet the need for intermittent services." The commenter pointed out that " 'support service' contractors have come to serve as the permanent workforce for many programs" seemingly implying that our statement does not take this into account. In fact, our statement is an accurate one, citing only two of the reasons why agencies award service contracts as examples. Contracting actions under Circular A–76 are also a reason why agencies award service contracts.

Whatever the reason for using service contracts to accomplish agency missions, it is important to understand that agency use of service contracts is limited by our policy letter in two ways: the function must not be an inherently governmental function, and if it is not, the agency must be able to exercise effective oversight of any contract awarded. We make clear that management of a contract is just as important as deciding whether the contract may properly be awarded in the first place.

Our policy letter is limited in scope and does not focus on why agencies use service contracts. Rather we are concerned that service contracts, when used, are used only when contractors may perform the functions in question and when agencies have the resources to manage the contracts. It is true that

meaningful oversight of contractor performance, the resources available for such oversight, the actual practice of the agency regarding oversight, the duration of the contract, and the complexity of the tasks to be performed.

(f) *Management controls.* When functions described in appendix B are involved, additional management attention to the terms of the contract and the manner of performance is necessary. How close the scrutiny or how extensive or stringent the management controls need to be is for agencies to determine. Examples of additional control measures that might be employed are:

(1) Developing carefully crafted statements of work and quality assurance plans, as described in OFPP Policy Letter 91–2, Service Contracting, that focus on the issue of Government oversight and measurement of contractor performance;

(2) Establishing audit plans for periodic review of contracts by Government auditors;

(3) Conducting preaward conflict of interest reviews to ensure contract performance in accordance with objective standards and contract specifications;

(4) Physically separating contractor personnel from Government personnel at the worksite; and

(5) Requiring contractors to (a) submit reports that contain recommendations and that explain and rank policy or action alternatives, if any, (b) describe what procedures they used to arrive at their recommendations, (c) summarize the substance of their deliberations, (d) report any dissenting views, (e) list sources relied upon, and/or (f) otherwise make clear the methods and considerations upon which their recommendations are based.

(g) *Identification of contractor personnel and acknowledgement of contractor participation.* Contractor personnel attending meetings, answering Government telephones, and working in other situations where their contractor status is not obvious to third parties must be required to identify themselves as such to avoid creating an impression in the minds of members of the public or the Congress that they are Government officials, unless, in the judgment of the agency, no harm can come from failing to identify themselves. All documents or reports produced by contractors are to be suitably marked as contractor products.

(h) *Degree of reliance.* The extent of reliance on service contractors is not by itself a cause for concern. Agencies must, however, have a sufficient number of trained and experienced staff to manage Government programs properly. The greater the degree of reliance on contractors the greater the need for oversight by agencies. What number of Government officials is needed to oversee a particular contract is a management decision to be made after analysis of a number of factors. These include, among others, the scope of the activity in question; the technical complexity of the project or its components; the technical capability, numbers, and workloads of Federal oversight officials; the inspection techniques available; and the importance of the activity. Current contract administration resources shall not be determinative. The most efficient and cost effective approach shall be utilized.

(i) *Exercise of approving or signature authority.* Official responsibility to approve the work of contractors is a power reserved to Government officials. It should be exercised with a thorough knowledge and understanding of the contents of documents submitted by contractors and a recognition of the need to apply independent judgment in the use of these work products.

8. *Responsibilities*—(a) *Heads of agencies.* Heads of departments and agencies are responsible for implementing this policy letter. While these policies must be implemented in the Federal Acquisition Regulation (FAR), it is expected that agencies will take all appropriate actions in the interim to develop implementation strategies and initiate staff training to ensure effective implementation of these policies.

(b) *Federal Acquisition Regulatory Council.* Pursuant to subsections 6(a) and 25(f) of the OFPP Act, as amended, 41 U.S.C. 405(a) and 421(f), the Federal Acquisition Regulatory Council shall ensure that the policies established herein are incorporated in the FAR within 210 days from the date this policy letter is published in the **Federal Register**. Issuance of final regulations within this 210-day period shall be considered issuance "in a timely manner" as prescribed in 41 U.S.C. 405(b).

(c) *Contracting officers.* When requirements are developed, when solicitations are drafted, and when contracts are being performed, contracting officers are to ensure:

(1) That functions to be contracted are not among those listed in appendix A of this letter and do not closely resemble any functions listed there;

(2) That functions to be contracted that are not listed in appendix A, and that do not closely resemble them, are not inherently governmental functions according to the totality of the circumstances test in subsection 7(b), above;

(3) That the terms and the manner of performance of any contract involving functions listed in appendix B of this letter are subject to adequate scrutiny and oversight in accordance with subsection 7(f), above; and

(4) That all other contractible functions are properly managed in accordance with subsection 7(e), above.

(d) *All officials.* When they are aware that contractor advice, opinions, recommendations, ideas, reports, analyses, and other work products are to be considered in the course of their official duties, all Federal Government officials are to ensure that they exercise independent judgment and critically examine these products.

9. *Judicial review.* This policy letter is not intended to provide a constitutional or statutory interpretation of any kind and it is not intended, and should not be construed, to create any right or benefit, substantive or procedural, enforceable at law by a party against the United States, its agencies, its officers, or any person. It is intended only to provide policy guidance to agencies in the exercise of their discretion concerning Federal contracting. Thus, this policy letter is not intended, and should not be construed, to create any substantive or procedural basis on which to challenge any agency action or inaction on the ground that such action or inaction was not in accordance with this policy letter.

10. *Information contact.* For information regarding this policy letter contact Richard A. Ong, Deputy Associate Administrator, the Office of Federal Procurement Policy, 725 17th Street, NW., Washington, DC 20503. Telephone (202) 395–7209.

11. *Effective date.* This policy letter is effective 30 days after the date of publication.

Allan V. Burman,

Administrator.

Appendix A

The following is an illustrative list of functions considered to be inherently governmental functions:[1]

1. The direct conduct of criminal investigations.

2. The control of prosecutions and performance of adjudicatory functions (other than those relating to arbitration or other methods of alternative dispute resolution).

3. The command of military forces, especially the leadership of military personnel who are members of the combat, combat support or combat service support role.

4. The conduct of foreign relations and the determination of foreign policy.

5. The determination of agency policy, such as determining the content and application of regulations, among other things.

6. The determination of Federal program priorities or budget requests.

7. The direction and control of Federal employees.

8. THe direction and control of intelligence and counter-intelligence operations.

9. The selection or nonselection of individuals for Federal Government employment.

10. The approval of position descriptions and performance standards for Federal employees.

11. The determination of what Government property is to be disposed of and on what terms (although an agency may give contractors authority to dispose of property at prices within specified ranges and subject to other reasonable conditions deemed appropriate by the agency).

12. In Federal procurement activities with respect to prime contracts,

(a) Determining what supplies or services are to be acquired by the Government (although an agency may give contractors authority to acquire supplies at prices within specified ranges and subject to other reasonable conditions deemed appropriate by the agency);

---

[1] With respect to the actual drafting of Congressional testimony, of responses to Congressional correspondence, and of agency responses to audit reports from an Inspector General, the General Accounting Office, or other Federal audit entity, see special provisions in subsection 6(c) of the text of the policy letter.

(b) Participating as a voting member on any source selection boards;

(c) Approval of any contractual documents, to include documents defining requirements, incentive plans, and evaluation criteria;

(d) Awarding contracts;

(e) Administering contracts (including ordering changes in contract performance or contract quantities, taking action based on evaluations of contractor performance, and accepting or rejecting contractor products or services);

(f) Terminating contracts; and

(g) Determining whether contract costs are reasonable, allocable, and allowable.

13. The approval of agency responses to Freedom of Information Act requests (other than routine responses that, because of statute, regulation, or agency policy, do not require the exercise of judgment in determining whether documents are to be released or withheld), and the approval of agency responses to the administrative appeals of denials of Freedom of Information Act requests.

14. The conduct of administrative hearings to determine the eligibility of any person for a security clearance, or involving actions that affect matters of personal reputation or eligibility to participate in Government programs.

15. The approval of Federal licensing actions and inspections.

16. The determination of budget policy, guidance, and strategy.

17. The collection, control, and disbursement of fees, royalties, duties, fines, taxes and other public funds, unless authorized by statute, such as title 31 U.S.C. 952 (relating to private collection contractors) and title 31 U.S.C. 3718 (relating to private attorney collection services), but not including:

(a) Collection of fees, fines, penalties, costs or other charges from visitors to or patrons of mess halls, post or base exchange concessions, national parks, and similar entities or activities, or from other persons, where the amount to be collected is easily calculated or predetermined and the funds collected can be easily controlled using standard cash management techniques, and

(b) Routine voucher and invoice examination.

18. The control of the treasury accounts.

19. The administration of public trusts.

Appendix B

The following list is of services and actions that are not considered to be inherently governmental functions. However, they may approach being in that category because of the way in which the contractor performs the contract or the manner in which the Government administers contractor performance. When contracting for such services and actions, agencies should be fully aware of the terms of the contract, contractor performance, and contract administration to ensure that appropriate agency control is preserved.

This is an illustrative listing, and is not intended to promote or discourage the use of the following types of contractor services:

1. Services that involve or relate to budget preparation, including workload modeling, fact finding, efficiency studies, and should-cost analyses, etc.

2. Services that involve or relate to reorganization and planning activities.

3. Services that involve or relate to analyses, feasibility studies, and strategy options to be used by agency personnel in developing policy.

4. Services that involve or relate to the development of regulations.

5. Services that involve or relate to the evaluation of another contractor's performance.

6. Services in support of acquisition planning.

7. Contractors' providing assistance in contract management (such as where the contractor might influence official evaluations of other contractors).

8. Contractors' providing technical evaluation of contract proposals.

9. Contractors' providing assistance in the development of statements of work.

10. Contractors' providing support in preparing responses to Freedom of Information Act requests.

11. Contractors' working in any situation that permits or might permit them to gain access to confidential business information and/or any other sensitive information (other than situations covered by the Defense Industrial Security Program described in FAR 4.402(b)).

12. Contractors' providing information regarding agency policies or regulations, such as attending conferences of behalf of an agency, conducting community relations campaigns, or conducting agency training courses.

13. Contractors' participating in any situation where it might be assumed that they are agency employees or representatives.

14. Contractors' participating as technical advisors to a source selection board or participating as voting or nonvoting members of a source evaluation board.

15. Contractors' serving as arbitrators or providing alternative methods of dispute resolution.

16. Contractors' constructing buildings or structures intended to be secure from electronic eavesdropping or other penetration by foreign governments.

17. Contractors' providing inspection services.

18. Contractors' providing legal advice and interpretations of regulations and statutes to Government officials.

19. Contractors' providing special non-law enforcement, security activities that do not directly involve criminal investigations, such as prisoner detention or transport and non-military national security details.

BILLING CODE 3110-01-M

RESOLUTION TRUST CORPORATION

Coastal Barrier Improvement Act; Property Availability; Kachina Village, Coconino County, AZ

AGENCY: Resolution Trust Corporation.

ACTION: Notice.

SUMMARY: Notice is hereby given that the property known as Kachina Village, located in Coconino County, Arizona, is affected by section 10 of the Coastal Barrier Improvement Act of 1990, as specified below.

DATES: Written notices of serious interest to purchase or effect other transfer of the property may be mailed or faxed to the RTC until December 29, 1992.

ADDRESSES: Copies of detailed descriptions of the property, including maps, can be obtained from or are available for inspection by contacting the following person: Mr. Robert Wessel, Resolution Trust Corporation, c/o Great American FSA, 600 B Street, M/C 5480, San Diego, CA 92183, (619) 231-3035, Fax (619) 231-4051.

SUPPLEMENTARY INFORMATION: The Kachina Village property is located in the unincorporated area of Kachina Village, south of the City of Flagstaff, Coconino County, Arizona. The site is situated west of Tovar Trail and about 200 feet north of Kachina Trail. The property contains wetlands, has recreational value and is adjacent to the Coconino National Forest. The property is covered property within the meaning of section 10 of the Coastal Barrier Improvement Act of 1990, Public Law 101-591 (12 U.S.C. 1441a-3).

Characteristics of the property include: The property consists of approximately 57.5 acres of undeveloped land. Several natural springs and streams run through the property and drain into a wash area. The northeast part of the property is slightly elevated above the rest of the property and is partially forested. There is no developed access to the property.

Property Size: Approximately 57.5 acres.

Written notice of serious interest in the purchase or other transfer of the property must be received on or before December 29, 1992 by the Resolution Trust Corporation at the address stated above.

Those entities eligible to submit written notices of serious interest are:

1. Agencies or entities of the Federal government;

2. Agencies or entities of State or local government; and

3. "Qualified organizations" pursuant to section 170(h)(3) of the Internal Revenue Code of 1986 (26 U.S.C. 170(h)(3)).

Written notices of serious interest to purchase or effect other transfer of the property must be submitted by December 29 1992 to Mr. Robert Wessel

at the above **ADDRESSES** and in the following form:

Notice of Serious Interest

RE: Kachina Village, **Federal Register** Publication Date: [**insert Federal Register** publication date]

1. Entity name.

2. Declaration of eligibility to submit Notice under criteria set forth in Coastal Barrier Improvement Act of 1990, Public Law 101–591, section 10(b)(2), (12 U.S.C. 1441a–3(b)(2)).

3. Brief description of proposed terms of purchase or other offer (e.g., price and method of financing).

4. Declaration by entity that it intends to use the property primarily for wildlife refuge, sanctuary, open space, recreational, historical, cultural, or natural resource conservation purposes.

5. Authorized Representative (Name/Address/Telephone/Fax).

Dated: September 24, 1992.

Resolution Trust Corporation.

Coastal Barrier Improvement Act; Property Availability; Woodlands Village, Coconino County, AZ

AGENCY: Resolution Trust Corporation.

ACTION: Notice.

SUMMARY: Notice is hereby given that the property known as Woodlands Village, located in the City of Flagstaff, Coconino County, Arizona, is affected by section 10 of the Coastal Barrier Improvement Act of 1990, as specified below.

DATES: Written notices of serious interest to purchase or effect other transfer of the property may be mailed or faxed to the RTC until December 29, 1992.

ADDRESSES: Copies of detailed descriptions of the property, including maps, can be obtained from or are available for inspection by contacting the following person: Mr. Scott Dressler, Resolution Trust Corporation, c/o Great American FSA, 600 B Street, M/C 0208, San Diego, CA 92183, (619) 231–6535, Fax (619 231–6329.

SUPPLEMENTARY INFORMATION: The Woodlands Village property is located at the intersection of Highway 17 and Interstate Highway 40 in Flagstaff, Coconino County, Arizona. The property has recreational value and is adjacent to lands managed by the State of Arizona for forestry purposes. The property is covered property within the meaning of section 10 of the Coastal Barrier Improvement Act of 1990, Public Law 101–591 (12 U.S.C. 1441a–3).

Characteristics of the property include: The property consists of approximately 290 acres comprised by a master planned community with 148 acres of undeveloped land in the vicinity of the Coconino National Forest. The vegetation on the site is characterized as native and is critical to the support of local wildlife populations.

Property size: Approximately 290 acres.

Written notice of serious interest in the purchase or other transfer of the property must be received on or before December 29, 1992 by the Resolution Trust Corporation at the address stated above.

Those entities eligible to submit written notices of serious interest are:

1. Agencies or entities of the Federal government;

2. Agencies or entities of State or local government; and

3. "Qualified organizations" pursuant to section 170(h)(3) of the Internal Revenue Code of 1986 (26 U.S.C. 170(h)(3)).

Written notices of serious interest to purchase or effect other transfer of the property must be submitted by December 29, 1992, to Mr. Scott Dressler at the above **ADDRESSES** and in the following form:

SECURITIES AND EXCHANGE COMMISSION

Self-Regulatory Organizations; Applications for Unlisted Trading Privileges and of Opportunity for Hearing; Midwest Stock Exchange, Incorporated

September 24, 1992.

The above named national securities exchange has filed applications with the Securities and Exchange Commission ("Commission") pursuant to section 129(f)(1)(B) of the Securities Exchange Act of 1934 and Rule 12f–1 thereunder for unlisted trading privileges in the following securities:

Allied Research Corporation
Common Stock, $.01 Par Value (File No. 7–9154)

Blackrock California Insured Municipal 2008 Term Trust, Inc.
Common Stock, $.01 Par Value (File No. 7–9155)

Blackrock New York Insured Municipal 2008 Term Trust, Inc.
Common Stock, $.01 Par Value (File No. 7–9156)

Blackrock Florida Insured Municipal 2008 Term Trust, Inc.
Common Stock, $.01 Par Value (File No. 7–9157)

Blackrock Insured Municipal 2008 Term Trust, Inc.
Common Stock, $.01 Par Value (File No. 7–9158)

Equus Investments Incorporated
Common Stock, $.001 Par Value (File No. 7–9159)

Equus II Incorporated
Common Stock, $.001 Par Value (File No. 7–9160)

HMO America, Inc.
Common Stock, $.01 Par Value (File No. 7–9161)

PLC Systems, Inc.
Common Stock, No Par Value (File No. 7–9162)

PLC Systems, Inc.
Warrants to purchase Common Stock at $4.80, No Par Value (File No. 7–9163)

PLC Systems, Inc.
Units (consisting of two Common Shares and one warrant to purchase one Common Share at $4.80) No Par Value (File No. 7–9164)

Paxar Corporation
Common Stock, $.10 Par Value (File No. 7–9165)

Conner Peripherals, Inc.
Common Stock, No Par Value (File No. 7–9166)

These securities are listed and registered on one or more other national securities exchange and is reported in the consolidated transaction reporting system.

Interested persons are invited to

submit on or before October 16, 1992, written data, views and arguments concerning the above-referenced application. Persons desiring to make written comments should file three copies thereof with the Secretary of the Securities and Exchange Commission, 450 Fifth Street, NW., Washington, DC 20549. Following this opportunity for hearing, the Commission will approve the application if it finds, based upon all the information available to it, that the extensions of unlisted trading privileges pursuant to such application is consistent with the maintenance of fair and orderly markets and the protection of investors.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

Jonathan G. Katz,

Secretary.

BILLING CODE 8010-01-M

[Release No. 34-31226; File No. SR-PSE-92-15]

Self-Regulatory Organizations; Filing of Proposed Rule Change by the Pacific Stock Exchange, Inc., Relating to the Adjudication of Minor Rule Plan Violations

September 23, 1992.

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934 ("Act"), 15 U.S.C. 78s(b)(1), notice is hereby given that on April 17, 1992, the Pacific Stock Exchange, Inc. ("PSE" or "Exchange") filed with the Securities and Exchange Commission ("SEC" or "Commission") the proposed rule change as described in Items I, II and III below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The PSE proposes to amend its rules regarding the adjudication of minor rule violations and related disciplinary procedures. The proposed rule changes fall into the following six categories:

(1) Amendments to the PSE's Minor Rule Plan ("MRP");

(2) Amendments to the recommended fine schedules for MRP violations;

(3) Amendments to the PSE's Summary Sanction Procedures;

(4) Amendments to rules governing hearings and appeals;

(5) Amendments to Exchange Rule 6.2, governing admission to and conduct on the options trading floor; and

(6) Fines and charges for late Financial and Operational Combined Uniform Single ("FOCUS") reports and Securities Investor Protection Corporation ("SIPC") reports.

The text of the proposed rule change is available at the Office of the Secretary, PSE and at the Commission.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The self-regulatory organization has prepared summaries, set forth in sections (A), (B), and (C) below, of the most significant aspects of such statements.

(A) Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Amendments to the PSE's Minor Rule Plan

The Exchange is proposing to amend its rules to incorporate detailed procedures relating to the Exchange's MRP and to add certain rules to its list of MRP violations.[1] Specifically, the PSE proposes to adopt Exchange Rule 10.13, entitled "Minor Rule Plan," which is designed to streamline the Exchange's disciplinary process so that the Exchange and its committees do not spend undue time resolving cases involving minor rule violations. The PSE believes that the amended MRP provides for procedures whereby members and member organizations may be disciplined appropriately in cases involving minor rule violations where a sanction more serious than a warning or cautionary letter is appropriate. Cases under the proposed MRP will be resolved without the issuance of a formal complaint and without a formal hearing.

Each case will be decided by a committee designated to consider a staff report on the matter and a written statement, if any, submitted by the person or organization alleged to have committed a minor rule violation. The PSE believes that the abbreviated procedures are justified because violations subject to the proposed MRP are either objective or technical in nature and easily verifiable, thereby lending themselves to the use of a fine schedule. The PSE believes that the MRP will provide better allocation of Exchange resources by eliminating time-consuming procedures that would otherwise be required in connection with formal proceedings. The PSE also believes that the due process protection and notice provisions established under the MRP will result in fair proceedings for those alleged to have committed a minor rule violation.

Specifically, proposed PSE Rule 10.13 authorizes the PSE's Executive Committee, Ethics and Business Conduct Committee, Options Floor Trading Committee and Equity Floor Trading Committee to impose a fine of up to $5,000 on any member, member organization, or person associated with a member or member organization for any violation of an Exchange Rule that has been determined to be minor in nature. The MRP also contains recommended fine schedules for each type of rule violation. These fines are graduated to account for repeat offenders. At the discretion of the Exchange, however, a serious, aggravated or repeated violation of a minor rule may be adjudicated through formal proceedings under PSE Rule 10.3, possibly resulting in other, more serious sanctions.

Under the MRP, the PSE will serve a person or organization accused of a minor rule violation with a written statement setting forth: (i) The Exchange Rule(s) alleged to have been violated; (ii) the act or omission constituting each violation; and (iii) notice that the accused person or organization may submit a written statement to a designated committee for its consideration. Payment of a fine imposed under the MRP will be deemed a waiver of any right to a disciplinary proceeding under Exchange Rule 10.11 and of any right to a review of the matter by the Exchange's Board of Governors. However, fines imposed under the MRP may be contested by filing with the PSE's Compliance Department a written application meeting the requirements of Exchange Rule 10.11. The application must be submitted within five business days after receipt of written notification of the fine. A determination contested pursuant to this provision becomes a formal disciplinary action and penalties imposed by a hearing panel will be reported publicly to the Exchange membership after the decision has become "final" pursuant to Exchange Rule 10.7.

---

[1] The Exchange's MRP was initially approved by the Commission in 1985. See Securities Exchange Act Release no. 22854 (November 21, 1985), 50 FR 48853 (order approving File No. SR-PSE-85-24) ("MRP Approval Order").

A person or organization sanctioned under the MRP need not report the minor rule violation to the Commission on SEC Form BD, provided that the sanction consists of a fine not exceeding $2,500, and provided that the sanctioned person or organization has not sought an adjudication, a hearing, or otherwise exhausted the administrative remedies available with respect to the matter. Fines in excess of $2,500 imposed pursuant to the MRP will be subject to current rather than quarterly reporting to the Commission.

The Exchange proposes to add the following new rules to its list of minor violations:

(1) Trading as both market maker and floor broker on the same business day in options covering the same underlying security (Exchange Rule 6.38(a));

(2) Failure to remain for a specified amount of time after trade processing (Exchange Rule 6.17);

(3) Failure to honor a ten-up market (Exchange Rule 6.86);

(4) Failure to identify an order as for a broker-dealer under the ten-up rule (Exchange Rule 6.86(a));

(5) Improper vocalization of a trade (Exchange Rules 6.69, 6.73, and Options Floor Procedure Advice ("OFPA") G–10);

(6) Disruptive action involving physical contact while on the trading floor (Exchange Rule 6.2);

(7) Use of abusive language on the trading floor (Exchange Rule 6.2);

(8) Minor position limit violation (Exchange Rule 6.8);

(9) Minor exercise limit violation (Exchange Rule 6.9);

(10) Failure to submit trade data to the Exchange in a timely manner (Exchange Rule 10.2(c));

(11) Failure to file a FOCUS report in a timely manner (Exchange Rule 2.12(b)); and

(12) Failure to file a SIPC Form SIPC–6 or Form SIPC–7 in a timely manner (Exchange Rule 2.12(a)).

The amended MRP also sets forth specific procedures relating to the issuance of floor citations on the options and equity floors. The only significant change to the current procedures is that Exchange options Order Book Officials ("OBO") would now be permitted to issue floor citations on the options floor.[2] Specifically paragraph (g) under proposed Rule 10.13, entitled "Floor Citations," allows a floor official and/or an OBO to issue floor citations for violations of rules specified in paragraph (h) of proposed Rule 10.13, entitled "Minor Rule Plan: Options Floor Decorum and Minor Trading Rule Violations," and paragraph (i) of proposed Rule 10.13, entitled "Minor Rule Plan: Equity Floor Decorum and Minor Trading Rule Violations." Except as provided in proposed Rule 10.14, entitled "Summary Sanction Procedure," the circumstances underlying the issuance of each floor citation shall be reviewed by a designated committee to determine the sufficiency of the evidence supporting the violation.

Proposed paragraph (h) lists 22 MRP violations, including, among other things, a floor broker's failure to use due diligence in the handling or execution of an order; a floor broker's failure to record a change in the limit or size of an order; a floor broker's improper execution of a cross transaction; a market maker's failure to respond to an OBO's call for market makers or to respond to demands for bids and/or offers; trading as both a market maker and floor broker on the same business day in options covering the same underlying securities; a member's inadvertent placement of a non-public order with an OBO; a member's failure to honor a ten-up market or to identify a broker-dealer order under the ten-up rule; improper communication on the floor by use of hand signals; improper vocalization of a trade; violations of standards of conduct or dress or disruptive action on the trading floor; and minor position and exercise limit violations.

Proposed paragraph (i) lists five equity floor decorum violations involving, among other things, member conduct on the equity floor, use of badges on the equity floor, proper time stamping of trade tickets, and proper reporting of transactions executed at the Exchange.

Proposed paragraph (j) of Rule 10.13, entitled "Minor Rule Plan: Record Keeping and Other Minor Rule Violations," lists three violations, including failure to submit trade data to the Exchange in a timely manner and failure to file FOCUS and SIPC reports in a timely manner. Under the proposal, minor violations of these rules can be handled under the MRP but cannot be handled through the issuance of a Floor Citation.

The PSE believes that violations of these rules should not require formal disciplinary proceedings, and, moreover, that the inclusion of these rules in the MRP will provide for prompt, effective and meaningful discipline when these rules are violated.

2. Recommended Fine Schedule for MRP Violations

The Recommended Fine Schedule for MRP violations was initially approved by the Commission in 1985 [3] and was subsequently amended in 1989.[4] The Exchange proposes to increase the amount of the recommended fines for a number of MRP violations, as indicated in the Fine Schedule. While the Exchange does not intend to publish the Fine Schedule itself in the Rules of the Board or Governors, the PSE represents that the schedule will be circulated to the Exchange membership periodically.

3. Summary Sanction Procedures.

Proposed Rule 10.14, entitled "Summary Sanction Procedure," provides the Exchange with an alternative to the commencement of a disciplinary action as provided in Exchange Rule 10.3. Under proposed Rule 10.14, the PSE may summarily sanction members, member organizations, and persons associated with a member or member organization for the following infractions:

(1) Violation of a standard of conduct or dress on the trading floor (Exchange Rule 6.2, Equity Floor Procedure Advice ("EFPA") 1–A and EFPA 1–B;

(2) Disruptive action on the trading floor (Exchange Rule 6.2, EFPA 1–A and EFPA 1–B);

(3) Disruptive action involving physical contact while on the trading floor (Exchange Rule 6.2, EFPA 1–A and EFPA 1–B);

(4) Failure to act in a professional manner (Exchange Rule 6.2, EFPA 1–A and EFPA 1–B);

(5) Use of abusive language on the trading floor (Exchange Rule 6.2, EFPA 1–A and EFPA 1–B);

(6) Failure to time stamp an order ticket (Exchange Rules 5.28(b) and 6.69, OFPA G–12 and EFPA 3–A);

(7) Inadvertent placement of non-public order with an OBO (Exchange Rule 6.52(a); and

(8) Failure to report a transaction properly (Exchange Rules 5.12 and 5.13 and EFPA 2–C);

In issuing a summary sanction, the proposal requires two floor officials to, among other things, issue a floor citation and apprise the person cited of the alleged violation, notify the PSE's Compliance Department of the alleged violation, and indicate on the citation the amount of the fine. Sanctions imposed under proposed Rule 10.14 may

[2] Currently, on the options trading floor, a floor citation may only be issued by two floor officials. See PSE Rule 6.2, Commentary .05.

[3] See MRP Approval Order, *supra* note 1.

[4] See Securities Exchange Act Release No. 27162 (August 30, 1989), 54 FR 35969 (order approving File No. SR–PSE–89–08).

be appealed pursuant to Exchange Rule 10.11.

Because all of the foregoing violations are included in the proposed MRP, they may be adjudicated either through the Summary Sanction Procedure (whereby findings are made by two floor officials) or through the MRP procedures set forth in proposed Rule 10.13 (whereby findings are made by a full committee). The PSE believes that cases involving these violations are objective in nature and not reasonably subject to dispute; therefore, the Exchange believes that the summary proceedings are appropriate.

The proposed Summary Sanction Procedure expands the PSE's current rules by making the sanctions applicable to the equity floor as well as to the options floor. The PSE notes that under the proposal, the Summary Sanction Procedure will cover only certain designated violations, primarily those relating to floor decorum.

4. Amendments to Rules Governing Hearings and Appeals

The PSE proposes to amend Exchange Rule 10.11, to be entitled "Appeal of Floor Citations and Minor Rule Plan Sanctions," to make the procedures set forth in Exchange Rule 10.11 applicable to MRP violations. Under Exchange Rule 10.11, an aggrieved person may apply to the Exchange's Compliance Department for review of a contested violation. The aggrieved person may request permission to make an oral presentation or may request that the matter be reviewed solely on the basis of written documentation.

In addition, the PSE proposes to amend Exchange Rule 10.4, entitled "Hearing," to provide that parties objecting to the composition of a hearing panel must submit their objection to the Hearing Administrator within five business days of receiving notification of the composition of the panel. The proposed amendment also provides that parties must submit to the Hearing Administrator a list of witnesses and documentary evidence or other materials to be presented at the hearing at least five business days prior to the hearing. In addition, the proposal provides that parties to a hearing must be given at least 15 calendar days notice of the time and place of the hearing and a statement of the matters to be considered at the hearing.

5. Amendments to Rules Governing Admission to and Conduct on the Options Trading Floor

The PSE proposes to amend Exchange Rule 6.2 entitled "Admission to and Conduct on the Options Trading Floor," in order to make Exchange Rule 6.2 consistent with a similar rule (EFPA 1–B) governing conduct on the equity trading floor. The proposed amendments to Exchange Rule 6.2 make more specific the types of conduct prohibited in connection with the Exchange's standards of dress and conduct. In addition, the PSE proposes to delete OFPA F–4 from its rules and to incorporate its provisions, with minor revisions, into Exchange Rule 6.2 in order to provide greater clarity and consistency.

In general, Exchange Rule 6.2 requires that all persons on the options trading floor be dressed in a manner appropriate for business purposes and in accordance with good taste and professional standards. Exchange Rule 6.2 also requires that all persons on the options trading floor conduct themselves in accordance with a seemly and professional standard of behavior.

6. Fines and Charges for Late FOCUS and SIPC Reports

The Exchange proposes to amend Exchange Rule 2.12, entitled "Financial Reports," to double the charge imposed for a member organization's late filing of a Report of Financial Condition on SEC Form X–17A–5. Specifically, for reports 1–30 days late, the charge will increase from $100 to $200; for reports 31–60 days late, the charge will increase from $200 to $400; for reports 61–90 days late, the charge will increase from $400 to $800.

The PSE proposes to include under the MRP cases involving SIPC and FOCUS reports 90 days late. Currently, those cases must be resolved by a hearing panel of the Ethics and Business Conduct Committee, unless the matter is resolved by offer of settlement or default judgment. The PSE believes that, in general, such cases do not warrant formal disciplinary proceedings and that adjudication of these cases requires more time and effort than necessary. The Recommended Fine Schedule imposes the following fines for late filings of FOCUS reports (Form X–17A–5) and Form SIPC–6 and Form SIPC–7 reports: First violation, $1,200; second violation $1,800; and third violation, $2,400.

Statutory Basis for the Proposed Rule Changes

The PSE believes that its proposals are consistent with section 6(b)(5) of the Act in that they will promote just and equitable principles of trade. In addition, the PSE believes that its proposals are consistent with section 6(b)(7) of the Act in that they will provide a fair procedure for disciplining members and persons associated with members.

(B) Self-Regulatory Organization's Statement on Burden on Competition

The PSE does not believe that the proposed rule changes will impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act.

(C) Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants or Others

Written comments on the proposed rule change were neither solicited nor received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Within 35 days of the date of publication of this notice in the Federal Register or within such longer period (i) as the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and publishes its reason for so finding or (ii) as to which the self-regulatory organization consents, the Commission will:

(a) by order approve such proposed rule change, or

(b) institute proceedings to determine whether the proposed rule change should be disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, DC 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying at the Commission's Public Reference Section, 450 Fifth Street, NW., Washington, DC. Copies of such filing will also be available for inspection and copying at the principal office of the above-mentioned self-regulatory organization. All submissions should refer to the file number in the caption above and should be submitted by October 21, 1992.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

Margaret H. McFarland,

Deputy Secretary.

BILLING CODE 8010-01-M

DEPARTMENT OF STATE

[Public Notice 1707]

Secretary of State's Advisory Committee on Private International Law; International Protection of Cultural Property; Draft UNIDROIT Convention on the Return of Stolen and Illegally Exported Cultural Objects; Request for Public Comment and Study Group Meeting

A revised draft of a proposed convention (multilateral treaty) on the return of stolen or illegally exported cultural objects has been prepared under the auspices of the International Institute for the Unification of Private Law (UNIDROIT). The United States is a member state of UNIDROIT, an international organization headquartered in Rome, Italy, which is comprised of 55 member states. UNIDROIT will hold its 3rd meeting of governmental representatives to consider the revised draft convention starting on November 2, 1992. In order to prepare United States government positions for that meeting, public comments are being sought on the revised draft convention and a Study Group of the Secretary of State's Advisory Committee on Private International Law will hold a meeting on this subject on Friday, October 16 at the Philadelphia Museum of Art.

UNIDROIT had earlier requested comments from governments in 1991 in preparation for its first meeting of governmental representatives to review the draft convention. Comments by interested persons and organizations were solicited by **Federal Register** notice and through general publication in December, 1990 to assist the Department of State to prepare responses to UNIDROIT's request. Persons or organizations who have previously commented on this draft convention may wish to review the present revised draft and to submit further comment.

The revised draft convention contains provisions on two basic subjects: Restitution of stolen cultural objects and return of illegally exported cultural objects (some governments have proposed that the latter be expanded to include illegally excavated objects). Other provisions cover standards for asserting claims for return, certain rights of compensation and repose, and application of national laws and related matters.

The proposed convention would not alter United States obligations under an earlier multilateral convention prepared by UNESCO which entered into force for the United States in 1983, nor as presently drafted, would it significantly alter rights of recovery under U.S. law as to stolen objects. Except for the United States, Canada and Australia, most "art importing" countries have not joined the UNESCO treaty. One of the issues on which comments are now sought is whether the United States should support a convention which may be acceptable to other "art importing" countries, even if it has standards different from those presently applicable under U.S. law. Another will be whether United States positions should take into account the possibility of future laws regulating the export of certain objects such as certain archaeological, anthropological or ethnological historical objects, in view of the fact that the United States, unlike many countries, generally does not now regulate the export of such items. In addition, commentators should note that it has been proposed by some governments that the convention also cover illegally excavated objects; the implications of adding this additional category of objects potentially covered by the convention will be discussed.

The revised draft convention is accompanied by a report of the second governmental meeting on this convention held in January 1992 (UNIDROIT documents 1992 Study LXX-30 and 31), and an earlier explanatory report which provides background information and sets forth underlying premises for the approaches taken and alternative solutions that were considered. Copies of these and other relevant documents may be obtained from the Office of the Legal Adviser at the address indicated below or by calling (202) 653-9852.

Comments on the draft convention should be received not later than Wednesday October 14 addressed to Harold S. Burman, by writing to the Office of the Legal Adviser, attention L/PIL Room 501, 2100 "K" Street, NW., Washington, DC 20037-7180, or by fax to (202) 632-5283.

The meeting of the Advisory Committee Study Group will be held from 10:15 a.m. until 4:30 p.m. in the Seminar Room at the Philadelphia Museum of Art, located at 26th Street and Benjamin Franklin Parkway in Philadelphia, PA. Members of the public may attend up to the capacity of the meeting room and subject to the direction of the chair. Persons wishing to attend should provide their name, affiliation, address and telephone number to Miss Rosalia Gonzales at the Office of the Legal Adviser indicated above or (202) 653-9853; not later than Wednesday October 14.

Dated: September 24, 1992

Peter H. Pfund,

Assistant Legal Adviser for Private International Law and Vice-Chair, Secretary of State's Advisory Committee on Private International Law.

BILLING CODE 4710-08-M

THE PRESIDENTIAL COMMISSION ON THE ASSIGNMENT OF WOMEN IN THE ARMED FORCES

Meeting

SUMMARY: The Presidential Commission on the Assignment of Women in the Armed Forces will hold its next hearing October 1st through October 4th. Presentations to include: GAO Briefings on Women in Desert Storm and Sexual Harassment in the Service Academies; A Navy "Lost-Time" presentation; testimony by Admiral J.M. Kime, Commandant of the Coast Guard; Captain Rick Hauck (UNS), a former Astronaut; and a briefing on a military survey about the roles of women in the military. Panels of the Commission's four Fact Finding Panels will present final reports of their findings to the full Commission.

LOCATION: Sheraton/Crystal City Hotel, Ballroom C (2nd Floor), South Eads Street at 18th, Arlington, Virginia 22202, (703) 486-1111.

DATES:

Thursday, October 1st
8 am-3:30 pm/General Session
3:30-5:30 pm/Panel 1: Final Review of Findings
Friday, October 2nd
8 am-10:15 am/Panel 2: Final Review of Findings
10:30-12:30 pm/Panel 3: Final Review of Findings
2 pm-4:00 pm/Panel 4: Final Review of Findings
4 pm-5:30 pm/Approve Commission Findings
Saturday, October 3rd
8 am-5:30 pm/General Session
Sunday, October 4th
10:30-TBD/General Session

Note: The next hearings of the Presidential Commission on the Assignment of Women in the Armed Forces are scheduled in Washington, DC, October 22-24, and

November 2–3 or November 9–10. Please call the Commission office for further details.

STATUS: Open to public.

CONTACT: Please call for more information and possible schedule changes: Contact: Magee Whelan or Kevin Kirk (202) 376–6905.

The Presidential Commission on the Assignment of Women in the Armed Forces was established by Congress in the National Defense Authorization Act of 1992 (Public Law 102–190). The 15-member commission shall assess the laws and policies governing the assignment of women in the military and shall make recommendations on such matters to the President by November 15, 1992.

W. S. Orr,

Staff Director.

[FR Doc. 92–23688 Filed 9–29–92; 8:45 am]

BILLING CODE 6820–CD–M

DEPARTMENT OF TRANSPORTATION

Federal Railroad Administration

Petition for Waiver of Compliance

In accordance with 49 CR sections 211.9 and 211.41, notice is hereby given that the Federal Railroad Administration (FRA) has received a request for a waiver of compliance with certain requirements of the federal safety laws and regulations. The individual petition is described below, including the parties seeking relief, the regulatory provisions involved, the nature of the relief being requested and the petitioner's arguments in favor of relief.

Southern Pacific Lines

Docket Number H–92–4

The Southern Pacific Lines (SP) seeks a waiver of compliance from certain sections of 49 CFR part 231, Safety Appliance Standards, and 49 CFR part 232, Power Brakes and Drawbars regulations, to allow it to run rail tests of Mark V RoadRailer equipment coupled in trains behind double-stack container cars.

A double-stack container car is a deep-well articulated car comprised of five units permanently coupled together. Each unit will carry two or more cargo containers stacked on top of each other (a double-stack configuration). The Mark V RoadRailers are almost identical to the standard semi-trailer presently used to haul cargo over the highway, the only difference being that they are equipped with a special drawbar and are supported and moved on a standard 70-ton freight car truck.

The RoadRailer Mark V semi-trailers, by design, cannot be subjected to traditional switching procedures that are conducted in railroad classification yards. The standard RoadRailer coupler assembly will only couple to another RoadRailer vehicle or to a specially designed vehicle located behind the locomotive referred to as an AdaptoRailer. The RoadRailer semi-trailer has no safety appliances and the test waiver will permit non-compliance with all the provisions of the Safety Appliance Standards (49 CFR part 231). These regulatory standards include provisions for the number, location and dimensional specifications for the handholds, ladders, sill steps and hand brakes that are required for each railroad freight car. The Mark V RoadRailer bogie ABDW braking capabilities will be compatible with the existing double-stack air brake equipment and the brake pipe dimension will be the same, that is, 1¼ inch inside diameter.

The SP test plan substitutes a CouplerMate and associated 70-ton bogie as the interface vehicle instead of an AdaptoRailer. The CouplerMate will provide the connection between the RoadRailer and conventional standard automatic coupler behind the doublestack container car. Also, a CouplerMate and associated bogie will be at the end of the RoadRailer portion of the train. The SP states that the CouplerMate bogies at the ends of the block of RoadRailer units will be modifications of the CouplerMate II design used for a similar National Railroad Passenger Corporation (Amtrak) test to determine the efficacy of hauling RoadRailers in mail service behind passenger trains (for in-depth discussion see FR 28127, July 9, 1990, Docket Number H–90–2).

Prior to the testing by Amtrak, RoadRailer conducted compression tests on the CouplerMate II interface vehicle to confirm its structural capabilities when mated to a RoadRailer dry van semi-trailer in both front and rear positions. The two CouplerMate bogies in the SP test will be equipped with all the safety appliances required by the Safety Appliance Standards, 49 CFR part 231, with the exception of the hand brake described in part 231.1(a). The bogies are provided with a spring biased parking brake which is used in lieu of the conventional type manually operated hand brake and it is not necessary for a person to mount and dismount the CouplerMate bogie to apply or release the handbrake.

The SP petition contains data derived from an earlier Burlington Northern Railroad mixed train test conducted at the American Association of Railroad's (AAR) test facility in Pueblo, Colorado. To accommodate the coupling of the RoadRailer unit to the double-stack container car, a newly designed connector on the double-stack car was utilized and tested at the same time. The BN report entitled Double-Stack/RoadRailer Connector Tests, describes the test procedures and results. These tests, were patterned after the AAR Chapter XI certification for new and untried cars, included high speed stability, stop distance, curving, and tests over perturbed track, such as rock and roll, pitch and bounce, yaw and sway, and bunched spiral (for the depth discussion see **Federal Register** 32416, August 7, 1989, Docket Number PB–89–4 and SA–89–8). However, it should be noted that the connecter in the BN test is much different from the CouplerMate design to be tested by the SP.

The SP proposed test program's initial phase will involve no more than ten RoadRailer units being operated behind the double-stack container cars. Instrumentation will be provided to monitor trains over the route between Los Angeles, California and Portland, Oregon. After a body of experience is gained, the SP proposes to gradually increase the number of RoadRailer units in steps of no more than ten.

Interested parties are invited to participate in these proceedings by submitting written views, data, or comments. FRA does not anticipate scheduling a public hearing in connection with these proceedings since the facts do not appear to warrant a hearing. If any interested party desires an opportunity for oral comment, they should notify FRA, in writing, before the end of the comment period and specify the basis for their request.

All communications concerning this proceeding should identify the appropriate docket number (e.g., Waiver Petition Docket Number H–92–4) and must be submitted in triplicate to the Docket Clerk, Office of Chief Counsel, Federal Railroad Administration, Nassif Building, 400 Seventh Street, SW., Washington, DC 20590. Communications received before November 2, 1992. will be considered by FRA before final action is taken. Comments received after that date will be considered as far as practicable. All written communications concerning these proceedings are available for examination during regular business hours (9 a.m.–5 p.m.) in Room 8201, Nassif Building, 400 Seventh Street, SW., Washington, DC 20590.

Issued in Washington, DC on September 22, 1992.

Phil Olekszyk,

Deputy Associate Administrator for Safety.

[FR Doc. 92-23673 Filed 9-29-92; 8:45 am]

BILLING CODE 4910-06-M

National Highway Traffic Safety Administration

[Docket No. 92-41; Notice 2]

Long Range Strategic Planning

AGENCY: National Highway Traffic Safety Administration (NHTSA), Department of Transportation.

ACTION: Extension of comment period.

SUMMARY: The National Highway Traffic Safety Administration (NHTSA) has initiated a long range strategic planning initiative. A notice requesting public comment on the initiative was published on July 28, 1992. This notice extends the closing date for the comment period from September 28, 1992 to October 30, 1992.

DATES: Comments on Docket No. 92-41, Notice 1, must be received on or before October 30, 1992.

ADDRESSES: Comments should refer to the Docket No. 92-41 and should be submitted to: Docket Section, NHTSA, Room 5109, Nassif Building, 400 Seventh Street, SW., Washington, DC 20590. (Docket hours are 9:30 a.m. to 4 p.m.).

FOR FURTHER INFORMATION CONTACT: Dr. Carl E. Nash, Director, Office of Strategic Planning and Evaluation, NPP-10, National Highway Traffic Safety Administration, 400 Seventh Street, SW., Washington, DC 20590, telephone (202) 366-1574.

SUPPLEMENTARY INFORMATION: This notice grants a petition by Toyota Motor Corporate Services of North America to extend one month the time period in which the public may submit comments, suggestions and recommendations on the agency's strategic planning initiative including highway safety, motor vehicle safety, the Agency's non-safety programs and/or other of NHTSA's activities. The extension will assure that the public has adequate time to provide substantive comments on the strategic planning initiative. The comment closing date is extended from September 28, 1992 to October 30, 1992.

Donald C. Bischoff,

Associate Administrator for Plans and Policy.

[FR Doc. 92-23679 Filed 9-29-92; 8:45 am]

BILLING CODE 4910-59-M

DEPARTMENT OF THE TREASURY

Office of Thrift Supervision

[No. 92-417]

General Valuation Allowances

AGENCY: Office of Thrift Supervision, Treasury.

ACTION: Request for comment; extension of comment period.

SUMMARY: The Office of Thrift Supervision (OTS) is hereby extending until November 2, 1992 the comment period on the request for comment entitled "General Valuation Allowances" published on September 1, 1992 (57 FR 39736). The comment period was originally scheduled to close on October 1, 1992.

DATES: Comments must be received on or before November 2, 1992.

ADDRESSES: Send comments to Director, Information Services Division, Public Affairs, Office of Thrift Supervision, 1700 G Street, NW., Washington, DC 20552, Attention Docket No. 92-294. These submissions may be hand delivered to 1700 G Street, NW. from 9 a.m. to 5 p.m. on business days; they may be sent by facsimile transmission to FAX Number (202) 906-7753 or (202) 906-7755. Submissions must be received by 5 p.m. on the day they are due in order to be considered by the OTS. Late-filed, misaddressed or misidentified submissions will not be considered in this rulemaking. Comments will be available for inspection at 1776 G Street, NW., Street Level.

FOR FURTHER INFORMATION CONTACT: John C. Price, Jr., Deputy Assistant Director for Policy, (202) 906-5745; Robert J. Fishman, Program Manager, (202) 906-5672; William J. Magrini, Project Manager, (202) 906-5744; or Dorene Rosenthal, Attorney, (202) 906-7268; Regulations, Legislation and Opinions Division, Office of Thrift Supervision, 1700 G Street, NW., Washington, DC 20552.

SUPPLEMENTARY INFORMATION: The Director of the OTS has determined that, due to the number of OTS regulatory initiatives currently pending, it is appropriate to extend the comment period for the request for comment on General Valuation Allowances. The OTS currently has nine regulatory initiatives out for public comment. Based upon the number of initiatives and the complexity and importance of the matters raised in the General Valuation Allowances notice, the Director has determined that the original 30-day comment period is not sufficient to allow for meaningful comment on the proposed guidance on General Valuation Allowances. Therefore, the comment period is hereby extended from its original closing date of October 1, 1992 for an additional 30 days, until November 2, 1992.

Dated: September 28, 1992.

By the Office of Thrift Supervision.

Timothy Ryan,

Director.

Sunshine Act Meetings

Federal Register
Vol. 57, No. 190
Wednesday, September 30, 1992

This section of the FEDERAL REGISTER contains notices of meetings published under the "Government in the Sunshine Act" (Pub. L. 94-409) 5 U.S.C. 552b(e)(3).

FEDERAL HOUSING FINANCE BOARD:

"FEDERAL REGISTER" CITATION OF PREVIOUS ANNOUNCEMENT: 57 FR, 43057, September 17, 1992.

PREVIOUSLY ANNOUNCED TIME AND DATE OF THE MEETING: 8 a.m., Wednesday, September 23, 1992.

CHANGES IN THE MEETING: The following topics were added to the agenda during the closed portion of the meeting.

1. District Bank Dividends and Retained Earnings Policy
2. Office of Finance—Expanded Discount Note Program

The above matter is exempt under 552b(c)(9)(A)–(B) of title 5 of the United States Code.

CONTACT PERSON FOR MORE INFORMATION: Elaine L. Baker, Executive Secretary to the Board, (202) 408–2837.

COMMITTEE ON EMPLOYEE BENEFITS OF THE FEDERAL RESERVE SYSTEM

TIME AND DATE: Approximately 3:30 p.m., Monday, October 5, 1992, following a recess at the conclusion of the open meeting.

PLACE: Marriner S. Eccles Federal Reserve Board Building, C Street entrance between 20th and 21st Streets, NW., Washington, DC 20551.

STATUS: Closed.

MATTERS TO BE CONSIDERED:

1. The Committee's agenda will consist of matters relating to (a) the general administrative policies and procedures of the Retirement Plan, Thrift Plan, Long-Term Disability Income Plan, and Insurance Plan for Employees of the Federal Reserve System; (b) general supervision of the operations of the Plans; (c) the maintenance of proper accounts and accounting procedures in respect to the Plans; (d) the preparation and submission of an annual report on the operations of each of such Plans; and (e) the maintenance and staffing of the Office of the Federal Reserve Employee Benefits System; and (f) the arrangement for such legal, actuarial, accounting, administrative, and other services as the Committee deems necessary to carry out the provisions of the Plans. Specific items include: 1992 Federal Reserve Bank early retirement proposals.
2. Any items carried forward from a previously announced meeting.

CONTACT PERSON FOR MORE INFORMATION: Mr. Joseph R. Coyne, Assistant to the Board; (202) 452–3204.

Dated: September 25, 1992.

William W. Wiles, Secretary of the Board.

BILLING CODE 6210–01–M

FEDERAL MINE SAFETY AND HEALTH REVIEW COMMISSION

September 23, 1994

TIME AND DATE: 10 a.m., Thursday, October 1, 1992.

PLACE: Room 600, 1730 K Street, NW., Washington, DC.

STATUS: Open.

MATTERS TO BE CONSIDERED: The Commission will consider and act upon the following:

1. *Ford Construction Company*, Docket No WEST 90–346 (Issues include whether the judge erred in vacating two citations charging violations of 30 C.F.R. § 56.14130(g), which requires that equipment operators wear seat belts.)
2. *Gatliff Coal Company, Inc.*, Docket No. KENT 89–242–R, etc. (Issues include whether the judge erred in concluding that Gatliff's violation of 30 C.F.R. § 77.1701, was not of a significant and substantial nature and was not caused by its unwarrantable failure to comply with the safety standard.)

Any person attending this meeting who requires special accessibility features and/or auxiliary aids, such as sign language interpreters, must inform the Commission in advance of those needs. Subject to 29 CFR § 2706.150(a)(3) and § 2706.160(e).

CONTACT PERSON FOR MORE INFORMATION: Jean Ellen (202) 653–5629 / (202) 708–9300 for TDD Relay / 1–800–877–8339 for toll free.

Jean H. Ellen,
Agenda Clerk.

Corrections

Federal Register
Vol. 57, No. 190
Wednesday, September 30, 1992

This section of the FEDERAL REGISTER contains editorial corrections of previously published Presidential, Rule, Proposed Rule, and Notice documents. These corrections are prepared by the Office of the Federal Register. Agency prepared corrections are issued as signed documents and appear in the appropriate document categories elsewhere in the issue.

ENVIRONMENTAL PROTECTION AGENCY

[FRL-4511-2]

Final NPDES General Permits for Storm Water Discharges From Construction Sites

Correction

In notice document 92-23326 beginning on page 44412, in the issue of Friday, September 25, 1992, make the following correction:

On page 44412, in the first column, in the **DATES** section, the effective date is corrected to read September 25, 1992.

Department of the Treasury

Fiscal Service

31 CFR Parts 349 and 356

Sale and Issue of Marketable Book-Entry Treasury Bills, Notes, and Bonds; Proposed Rule

DEPARTMENT OF THE TREASURY

Fiscal Service

31 CFR Parts 349 and 356

[Department of the Treasury Circular, Public Debt Series No. 1-92]

Sale and Issue of Marketable Book-Entry Treasury Bills, Notes, and Bonds

AGENCY: Bureau of the Public Debt, Fiscal Service, Department of the Treasury.

ACTION: Proposed rule.

SUMMARY: The Department of the Treasury hereby publishes, for comment, a revised proposed rule which sets out the terms and conditions for the sale and issue by the Department to the public of marketable book-entry Treasury bills, notes, and bonds. This rule, also referred to as the uniform offering circular, will apply to securities held in the book-entry system established by the Department and maintained through the Federal Reserve Banks, commonly referred to as the commercial book-entry system, as well as to those held in the TREASURY DIRECT system [31 CFR part 357). Part 356, for the most part, consolidates into one document the terms and conditions which currently exist in a variety of other documents. It will replace 31 CFR part 349, relating to the offering of Treasury bills. In addition, individual offering circulars for Treasury notes and bonds will no longer be published once this uniform offering circular becomes effective in final form.

DATES: Comments must be received on or before October 30, 1992.

ADDRESSES: Comments should be sent to: Office of Financing, Bureau of the Public Debt, room 534, E Street Building, Washington, DC 20239–0001. Comments received will be available for public inspection and copying at the Treasury Department Library, FOIA Collection, room 5030, Main Treasury Building, 1500 Pennsylvania Avenue, NW., Washington, DC 20220. Persons wishing to visit the library should call (202) 622–0990 for an appointment.

FOR FURTHER INFORMATION CONTACT: Michael W. Sunner, Deputy Assistant Commissioner, Office of Financing, Bureau of the Public Debt (202) 219–3350, or Margaret Marquette, Attorney-Adviser, Office of the Chief Counsel, Bureau of the Public Debt (202) 219–3320.

SUPPLEMENTARY INFORMATION:

I. Background

On January 31, 1992, the Department of the Treasury published a proposed rule setting out the terms and conditions governing the sale and issue of marketable book-entry Treasury bills, notes, and bonds (57 FR 3870). Sixteen written comments were received in response to the proposed rule. The comments were from various sources, including trade associations, financial institutions, and broker/dealers. The Department found the comments extremely useful in making the revisions described herein. Although some minor comments are not addressed here, all comments have been considered in the formulation of this revised rule.

The majority of comments were in the following areas: single bidder criteria, net long position reporting, restriction on competitive and noncompetitive bidding, submitting bids for customers, and certifications. The comments are discussed, as appropriate, in the following Section-by-Section Analysis.

II. Section-by-Section Analysis

Section 356.2 Definitions

Two comments were received suggesting that the definitions of "bidder" and "single bidder" be consolidated to clarify the distinction, if any, between them. The proposed rule defined "bidder" as a person or an entity that bids in an auction. It further defined bidder as one or more entities and/or persons which, because of their affiliation, have the potential to act in concert with respect to formulating or entering a bid in an auction. Section 356.15 provided that bidders would be treated collectively as a single bidder where such bidders, because of their affiliation, have the potential for aggregating bids.

The Department has revised the definition of bidder to clarify the concept that a bidder may be a person or an entity or, in some cases, two or more persons or entities that are considered collectively to be one bidder, based on their relationship or actions in participating in an auction. Section 356.15 has been deleted from the revised rule, and references throughout the document to "single bidder" have been changed to "bidder." Bidder categories are defined in appendix A, Bidder Definitions.

The definition of the term "customer" has been revised to emphasize that it is more limited than the term customer is in ordinary usage. Specifically, in order for a person or an entity to be considered a customer, such person or entity must submit its bid through either a depository institution or a dealer. Further, the person or entity must direct the depository institution or dealer to bid for a specified par amount of securities in a specific auction. It should be noted that only depository institutions and dealers are permitted to submit bids for customers.

The Department has modified several other terms to make them more precise. In addition, it has added some terms and deleted others. Further, it has provided references throughout the document, where appropriate, to the distinction between multiple-price auctions and single-price auctions.

Section 356.10 Offering Announcement

Six comments were received regarding the provision that certain terms and conditions of the sale of securities would not be included in the offering circular but would rather be contained in the appropriate offering announcement for a security. This, together with the statement that the offering announcement will control in the event of inconsistencies between the offering announcement and the offering circular, raised concerns that the Department may intend to modify these provisions frequently and with little notice. Commenters were concerned that frequent or last-minute changes in such terms and conditions would introduce uncertainty, cause confusion, and make it difficult for bidders to ensure that they are in compliance with current auction rules. The commenters urged the Department to consolidate its auction rules, including the maximum award limitation, the maximum recognized bid at a single yield, the net long position reporting amount, and the designated time for calculating the net long position, in the offering circular. Commenters generally felt that the rules should be amended formally, with an appropriate notice and comment period.

The Department concurs in the recommendation to consolidate its auction rules, to the greatest extent possible, in the offering circular. Therefore, it has revised this part to include additional specific terms and conditions. It should be noted, however, that the Department reserves the right to modify any terms and conditions of new securities offerings without first publishing such changes for public comment. Changes will be made by means of an amendment to the offering circular, by notice in the offering announcement, or by other public notice. When a change is other than a temporary change and is announced by other than an amendment to the offering circular, it is the intent of the Department to amend the circular timely to reflect such change.

Section 356.11 Submission of Bids

One commenter suggested that, in the case where a tender is submitted by a person whose name is not included on the list of persons authorized to submit tenders on behalf of a submitter, prior to rejecting the tender, the Department should contact the submitter to determine whether the person is, in fact, authorized to submit tenders. Given the time constraints that usually exist in conducting auctions, the Department does not believe that such a provision should be added to the rule. In addition, the Department believes that it is the responsibility of the submitter to keep current the list of persons authorized to submit tenders.

Section 356.12 Noncompetitive and Competitive Bidding

Eight comments were received on this section. The commenters expressed concern over the restriction that a bidder submitting a competitive bid for its own account for an issue of securities may not submit a noncompetitive bid for its own account for the same issue. Several commenters pointed out that, because of the aggregation requirements of the single bidder criteria, many potential noncompetitive bidders would be precluded from participating in Treasury auctions solely as the result of the competitive bidding activities of their affiliates. This would be true, it was stated, even if the noncompetitive bidder has no relationship with the affiliate other than having a mutual parent, and does not communicate with the affiliate concerning its investment strategy.

Commenters specifically recommended that investment advisors should not be prohibited from submitting noncompetitive bids on behalf of clients solely because an affiliate has submitted a proprietary competitive bid. Also, it was suggested that there should be no restriction on the ability of an investment advisor or other entity with discretionary authority to submit noncompetitive bids on behalf of one customer and competitive bids for another. Similarly, it was contended that a fiduciary of managed accounts should not be precluded from bidding competitively for one account and noncompetitively for another account in the same auction as this could hamper the fiduciary from fulfilling its fiduciary responsibilities.

One commenter stated that a bidder that is bidding competitively should not be precluded from submitting a noncompetitive bid on behalf of a managed third-party account so long as the manager agrees not to resell the securities purchased for that account for a period of time long enough to prevent arbitrage activity in the primary distribution. The commenter suggested that retention of the securities until the next business day after the auction would satisfy that requirement.

The Department has retained the restriction against a bidder bidding both competitively and noncompetitively. Noncompetitive bidding is provided to permit smaller bidders to participate directly in auctions. It is believed that investors that bid competitively should not be afforded the noncompetitive option. A change has been made, however, in the bidder definitions to allow a "major organizational component" meeting identified criteria to request recognition as a separate bidder, thereby allowing an affiliate that has been recognized as a separate bidder to bid competitively or noncompetitively without regard to the bids of another separately recognized affiliate. In addition, a bidder category has been established for trusts and other fiduciary estates that allows each trust or fiduciary estate meeting the definition to be considered a bidder.

Two commenters suggested that § 356.12(b)(2) clarify that a bidder that has a position in an outstanding issue of a security is not prohibited from submitting a noncompetitive bid in an auction of an additional issue of that security, i.e., an announced reopening of the same security. In response to this suggestion, § 356.12(b) has been changed from "a bidder submitting a competitive bid for its own account for an issue of securities may not submit a noncompetitive bid for its own account for the same issue of securities" to "a bidder bidding competitively for its own account may not bid noncompetitively for its own account in the same auction."

The Department adopted the recommendation made by one commenter to add, in § 356.12(b)(2), the words "for its own account" to clarify that a dealer or depository institution submitting a noncompetitive bid for an unaffiliated customer is not prohibited from holding positions in the security being auctioned for its own account through when-issued trading or futures or forward contracts.

Another commenter expressed concern over the rule disallowing a noncompetitive bid if the bidder holds a position in when-issued trading. The commenter felt that the rule is unnecessarily restrictive for noncompetitive bidders and asked that an exemption be provided for low volume bidders to allow "dual bids" in when-issued trading and noncompetitive bidding. The Department has not modified this restriction. The Department believes that any bidder engaged in when-issued trading of a security need not be provided the opportunity also to bid noncompetitively for that security.

The Department has included in the revised rule specific maximum amounts that will apply to noncompetitive and competitive bids. Section 356.12(b)(1) states that a noncompetitive bidder may not bid for more than $1 million for bills and $5 million for notes and bonds in a single auction. Section 356.12(c)(2) states that a competitive bid at a single yield or discount rate that exceeds 35% of the public offering amount will be reduced to that amount.

Section 356.13 Net Long Position

Nine comments were received on this section. Several commenters expressed concern about the requirement that a bidder report its net long position when the sum of all its bids and its net long position exceeds the reporting amount specified in the offering announcement. While the commenters appreciated that the change to a higher reporting threshold reduced the number of bidders required to report, they disliked that the approach would require a bidder, in addition to computing its net long position, to aggregate the position with the amount of its bid before being able to determine whether it must report its net long position. As auction participants bidding competitively frequently do not determine the amount of their bids until the last possible moment prior to the deadline for submitting tenders, the aggregation requirement imposes an added burden on such bidders. The commenters recommended that the Department return to a reporting threshold that would be based solely on the net long position as of a specified time, eliminating the bid amount component from the computation. Under this approach, it was also suggested that an increase in the amount of the net long position threshold, for example, from the previous $200 million to $500 million, would achieve the Department's goal of reducing the number of bidders that would be required to concern themselves with the possibility of having to report a net long position.

The Department has retained the $2 billion threshold for net long position reporting, as calculated by the sum of a bidder's net long position and its bids. As noted earlier, the Department wished to eliminate the need for net long position reporting by bidders who are

certain that they will never approach the combined $2 billion threshold. The Department believes that this goal and its goal of ensuring that a bidder not receive a disproportionate share of the issue can most effectively be achieved by considering both a bidder's bids and its net long position in determining whether the position must be reported.

The Department has incorporated into the revised offering circular two items related to net long position reporting that had previously been found only in offering announcements. The first is the inclusion of the current $2 billion threshold amount that triggers the requirement to report a net long position. The second is the inclusion of a specific time, i.e., one-half hour prior to the closing time for receipt of competitive bids, for calculating the net long position. A requirement has also been added that, if the person making the bidding decision knows of an increase of $200 million or more in the bidder's net long position prior to the submission of the bid, the larger amount must be used in complying with net long position reporting requirements.

Several commenters stated that the net long position reporting requirement is particularly burdensome for bidders with large numbers of affiliates and third-party accounts for which they have management discretion. One commenter stated that the rule would put the bidder into the position of arbitrating among a large number of proprietary and managed accounts with respect to the sizes of the positions they may accumulate in advance of an auction, the timing with respect to when they may or may not add to positions, and the amounts of securities they may acquire. Additionally, the commenter pointed out that the bidder would face numerous legal and policy objections. Perhaps most significant among them would be the concern that each related person or entity, by being required to reveal the net long position of the entire organization, would be implicitly revealing bid information to its submitter.

The Department believes that the revised bidder definitions, which provide a procedure for affiliates and other "major organizational components" to be recognized as separate bidders, give bidders with a large number of affiliates the ability to reduce significantly the reporting burden. The new definitions also address the concern regarding disclosure of an entire organization's net long position since an affiliate recognized as a separate bidder would report only its own position.

One commenter noted that the requirement that a bidder report its net long position to every dealer submitting a bid on its behalf could present problems in certain situations. For example, entities within a holding company structure frequently submit bids through one or more submitters that are not part of that holding company. Under the single bidder criteria, those entities would be considered a single bidder for auction purposes. Therefore, under the net long position reporting requirement, any one of those entities would be required to report information regarding the net long position and bids of its affiliates. If one of those affiliates was a primary dealer, none of the other affiliates would be able to bid through another dealer since primary dealers and other submitters would not permit bid and other information to be disclosed to their direct competitors. To address this problem, the commenter recommended that provision be made for one member within a group of affiliated bidders to be designated as the affiliate responsible for reporting the aggregate net long position of the bidder group. This would permit an affiliate of a primary dealer or bank to submit bids through an unrelated dealer since the affiliate would not be required to report the position of an affiliated primary dealer to a competing submitter. It would also simplify, for an affiliate, the process of collecting information since the information would flow in only one direction and would not have to be collected by each affiliate.

The revised bidder definitions will help alleviate this problem. In addition, § 356.13 has been revised to provide that, in cases where a bidder that is required to report the amount of its net long position bids through more than one submitter or Federal Reserve Bank, the bidder's total net long position should be reported through only one submitter or Federal Reserve Bank.

Four commenters commented on the calculation of the net long position. One commenter opposed the requirement that cash settled futures be included in the determination since, to the extent that a futures contract does not require delivery of a specific security being auctioned, the contract does not afford an opportunity to acquire any control over that security. The recommendation was made that, for purposes of determining a net long position, a bidder should include only futures contracts calling for delivery of the specific security being auctioned, as opposed to cash-settled futures contracts or futures contracts where the auctioned security is one of several potentially deliverable instruments.

Section 356.13(b) has been revised to indicate that a net long position includes only those futures contracts that require delivery of the specific security being auctioned. It does not include futures contracts for which the security being auctioned is one of several securities that may be delivered, or futures contracts that are cash-settled.

Two commenters made reference to the requirement that a bidder include in its net long position its holdings of outstanding securities with the same CUSIP number as the new offering where the offering announcement identifies the security being offered as an additional issue of an outstanding one. Since the 35% calculation is based on the amount being auctioned, this requirement could cause a bidder to receive less than 35% of the additional amount because of such holdings. The commenter suggested that either the holdings of the issue being reopened be excluded from the bidder's net long position or, alternatively, the maximum award be 35% of the total amount issued in all auctions of that issue, rather than 35% of only the additional amount.

The Department has retained the requirement that holdings of outstanding securities with the same CUSIP number as the security being auctioned be included in calculating a bidder's net long position. It has also retained the provision, now found in § 356.22(b), limiting a competitive bidder to an award of 35% of the public offering less its net long position. If the holdings of the issue being reopened were to be excluded from the net long position computation, a holder of a large outstanding amount could receive an auction award that, when combined with its net long position, would highly concentrate the holdings of the security as a result of the reopening. Similarly, if the 35% limit were to be applied to the combined auction amounts, holders of relatively small amounts of outstanding securities would be in a position to receive significantly more than 35% of the additional offering. A change such as that proposed could result in a limited distribution of additional offerings.

One commenter requested a clarification of the rule that a net short position should not be reported and would not be used to determine the bidder's auction award. Specifically, the commenter questioned whether the statement that a net short position should not be reported means that a net short position should not be factored into the threshold calculation. For

example, in a situation in which a bidder with a $500 million net short position intends to place a $2.4 billion bid in an auction, should the bidder certify that its net long position plus the total of all its bids exceeds $2 billion? The Department has clarified this provision by providing in § 356.13(a) that a net short position should be considered a net long position of zero in the calculation of a bidder's net long position.

Commenters supported the position taken in the proposed rule that STRIPS components should be included in the calculation of a net long position only if the bidder holds all components necessary for reconstitution into the security being auctioned. One of those commenters indicated that this position should be taken because the components, unless subject to reconstitution, represent an interest distinct from the Treasury security being offered. One commenter noted that it might be operationally difficult to determine on a real-time basis whether a bidder has all the components necessary for reconstitution.

The provision that STRIPS components should be included in the calculation of a bidder's net long position only if the bidder holds all components necessary for reconstitution into the security to be auctioned has been changed. The revised rule provides that holdings of STRIPS principal components of the security being auctioned, including when-issued trading positions of such principal components, are to be included in a bidder's net long position. This change recognizes that the principal component is the only component that belongs exclusively to a single reconstituted security. Administratively, this change should lessen the burden of reporting STRIPS positions as it presumably will be easier for a bidder to determine if it owns the principal component than to determine if it holds all the components necessary for reconstitution.

Three comments were received concurring with the exclusion of repurchase and reverse repurchase transactions, securities lending transactions, and options from the calculation of a bidder's net long position. One commenter said that repurchase and reverse repurchase transactions and securities lending transactions are financing transactions which provide only a temporary transfer of one party's interest in a security to another. As there is no simple and consistent formula for incorporating them into the net long position reporting requirement, it was urged that they not be included. Two commenters felt that options should likewise be excluded from the determination of the bidder's net long position because it would be difficult, analytically and logistically, to provide for their inclusion. One of the commenters stated that it would be more appropriate for the Department to obtain information regarding these transactions through other means, such as large position reporting.

The Department agrees with the comments made on the exclusion of repurchase and reverse repurchase transactions, securities lending transactions, and options. The revised rule continues to exclude them from the net long position calculation.

Section 356.14 Submitting Bids for Customers

Seven comments were received on this section, formerly entitled "Bidding for customers," primarily in connection with customer net long position reporting. One commenter stated that § 356.14(c), by requiring a submitter of a competitive bid for a customer to report a customer's net long position, appears to shift the compliance burden to the submitter. Commenters generally felt that bidders, not submitters, should bear the primary responsibility for complying with the net long position reporting requirement.

Commenters also viewed the requirement to document every inquiry and response as being excessively burdensome and unnecessary. They felt that, by submitting a bid on behalf of a customer, the submitter confirms that an inquiry has been made and a response received. One commenter said that it was not reasonable, in the case of small customers, to expect individualized inquiries to be made of them as to their net long positions. Accordingly, the adoption of a *de minimis* exemption was recommended for customers submitting bids of $1 million or less.

Several commenters took strong exception to the requirement that if the submitter "has reason to believe" that a customer's information is incorrect, the customer's bid shall not be submitted by the submitter. One commenter stated that this standard appeared to be based on the theory that submitters should adopt a supervisory and investigatory role with respect to customers. Commenters pointed out that, both as a legal and as a practical matter, submitters have limited ability to perform such a role. For example, submitters generally do not have knowledge of bids submitted through other submitters, and bidders, for legal or valid business reasons, may wish not to disclose that information. Additionally, it was felt that the "reason to believe" standard was vague and subjective. Another commenter expressed concern that, if it could be inferred that there is a single submitter rule that parallels the single bidder rule, then the "reason to believe" standard could apply not only to the entity submitting the bid but also, in the case of a holding company, to all entities within that company. That commenter felt that the requirements associated with reporting a customer's net long position would be the equivalent of an absolute liability standard.

Section 356.14(c) on net long position of customers has been revised. The requirement for the submitter to inquire of every customer and document the customer's response has been deleted. The section now requires that the submitter report the net long position information as provided by the customer and requires that the submitter inform only those customers bidding competitively through that submitter for $10 million or more of the net long position reporting obligation. The "reason to believe" standard has also been deleted. This section now provides that if the submitter "knows that the position information provided by the customer is incorrect," the customer's bid shall not be submitted by the submitter.

With respect to § 356.14(b)(3), formerly 356.14(b)(4), one commenter recommended the elimination of the requirement that bids submitted on behalf of trust estates provide a reference to the document creating the trust, with date of execution. The commenter felt that the requirement serves no purpose, and would be an administrative burden for the submitter.

The Department has not adopted this recommendation. The bidder definitions, in defining a trust or other fiduciary estate, now state that, in order for a trust or fiduciary estate to be considered a bidder, it must be able to be identified by the name or title of the trustee or fiduciary; specific reference to the trust instrument, court order, or legal authority under which the trustee or fiduciary is acting; and the unique IRS-assigned employer identification number for the entity. The requirement to provide this information on the tender is not only consistent with the bidder definitions, but it reduces the possibility of mistakenly characterizing as a "trust or other fiduciary estate" a fund that does not meet the definition. The only substantive change to this section is the addition of a reference to "fiduciary estate" in those places where "trust" appears.

Section 356.15 Certification

This section, formerly Section 356.16, has been revised to indicate that a submitter, by submitting a tender, and a customer, by bidding for a security, are deemed to have certified that they are in compliance with this rule and the offering announcement governing the sale and issue of the security. In addition, the submitter is deemed to have certified that the information provided on the tender with regard to bids for its own account is accurate and complete, and that the information provided with regard to bids for customers accurately and completely reflects information provided by the customer. The customer is deemed to have certified that the information provided to the submitter is accurate and complete.

Eight comments were received on the requirement for written certifications. The majority of comments related to § 356.16(b) on certifications by customers. Two comments related to § 356.16(a) on certifications by submitters.

With regard to certifications by submitters, one commenter requested confirmation that the requirement for submitters to make a written certification that they are in compliance with the offering circular is a procedural mechanism under which submitters would confirm annually that the submitter is in material compliance with the requirements of the auction rules, rather than a requirement under which the submitter takes responsibility for the accuracy of the information furnished by customers. Another commenter expressed concern about certifying compliance with the proposed single bidder criteria. That commenter suggested that a submitter should be responsible for certifying compliance with the criteria only when the submitter manages the account submitting a bid or when the affiliate in issue is an affiliate of the submitter. The submitter should not be responsible for certifying compliance, it was argued, when the submitter and bidder have a customer relationship only. In that case, the certification responsibility should be with the customer or its manager-advisor. This commenter suggested that the Department use a bidder identification number to assist in compliance with the criteria. At most, it was stated, the submitter should only have to certify that the personnel submitting a bid on its behalf do not have actual knowledge of noncompliance by an unrelated customer.

The Department has retained a written certification requirement for submitters. By completing the certification on the paper tender form or the annual certification for automated bidding, a submitter is certifying that it is in compliance with this Part and the applicable offering announcement, but it is not certifying to the accuracy of information provided by customers.

With regard to customer certifications, two commenters objected to the requirement that all customers bidding competitively or noncompetitively through submitters must have on file with the submitter, prior to the time the submitter submits a bid in an auction, an annually submitted written certification that they are in compliance with the offering circular and applicable offering announcements. The commenters felt that the certification requirement and the customer notification requirement contained in § 356.14(d) would create a significant administrative burden on submitters with a large customer base.

In addition, one commenter felt that since the requirement for customer certifications would apply even where the submitter has no direct relationship with the person on whose behalf a bid is placed, i.e., for customers of customers, this might imply a certain level of due diligence. This commenter suggested that the certifications for such customers should be sent directly to the appropriate Federal Reserve Bank, as is done with customer confirmations.

Commenters objected, in particular, to the requirement that customers bidding noncompetitively make a written certification. The commenters stated that the majority of such customers purchase small amounts of securities, and are not engaged in any of the trading practices that the offering circular is attempting to address. Several commenters suggested that the Department include a *de minimis* exception to the certification requirement for any customer submitting a bid of $1 million or less. The suggestion was also made to permit first-time bidders to submit certifications within some reasonable time, e.g., 7 days, after bidding in an auction to accommodate those who decide at the last minute to participate in an auction. In response to the above concerns, the Department has deleted the requirement for annual written customer certifications.

Section 356.24 Notice of Awards; Confirmations

All four comments received on this section, formerly Section 356.23, related to confirmation of large customer bids. One commenter requested that the provision that a submitter submitting a customer bid is responsible for notifying its customer of the confirmation requirement be modified to indicate that the notification is required only when a customer actually is awarded $500 million or more. This section has been revised to indicate that a submitter submitting a customer bid is responsible for notifying its customer of the confirmation requirement if the customer is awarded $500 million or more as a result of bids submitted by the submitter.

Two commenters noted that the offering circular does not address a customer's failure to confirm its bid when required to do so. They made reference to the provision in the "Joint Report on the Government Securities Market" of the Treasury, the Securities and Exchange Commission, and the Federal Reserve Board that if a customer fails to confirm an award, the dealer will be held responsible for the bid, unless the 35% rule would be violated, in which case the issue would be reduced proportionately. The commenters felt that the Department should not hold the dealer responsible for the bid or reduce the amount of the issue. One commenter suggested that the Department should deal directly with the customer, and both commenters suggested that an inquiry should be made into the reasons for the customer's failure to confirm.

The Department has not specifically addressed this comment in the revised rule. However, consistent with other changes that have been made, the Department views the customer as being responsible for confirming awards of $500 million or more.

A customer net long position confirmation requirement has been added to § 356.24. Under this requirement, any customer awarded $100 million or more in an auction must furnish a written statement to a Federal Reserve Bank indicating whether it had a reportable net long position and, if a position had to be reported, the amount of such reportable position and the name of the depository institution or dealer through which the customer had requested that the position be reported.

Section 356.34 Remedies

A new section on remedies has been added to the revised rule. This section provides for liquidated damages of 1% of the par amount of securities awarded the bidder in an auction if the bidder fails to pay for the securities in a timely manner.

Appendix A—Department of the Treasury Bidder Definitions

Appendix A, formerly entitled "Department of the Treasury Single Bidder Criteria," has been revised substantially. Twelve comments were received on this section. All commenters felt that the single bidder criteria were excessively broad. They specifically objected to the definition of a single bidder as entities and/or persons which, because of their affiliation, have the potential to act in concert with respect to formulating or entering a bid in a Treasury auction. They likewise objected to the presumption that an affiliation is deemed to exist if there is (a) control in management (including investment strategy) or (b) control through ownership (defined as 25% or more).

Commenters generally agreed that the Department should treat as a single bidder entities that do, in fact, act together. One commenter recommended that the Department define a single bidder as any group of entities that act in concert with respect to formulating or entering a bid in a Treasury auction. It then recommended that the responsibility for determining the entities that constitute a single bidder be placed on the bidders themselves. It pointed out that, under § 356.16, all submitters and customers must certify that they are in compliance with the offering circular and applicable offering announcements governing the sale and issue of securities. As a result, they would be certifying that the positions of all entities that act together are reflected in the bidder's net long position, and that the amount awarded to that bidder will not exceed the maximum amount that may be awarded to a single bidder at a particular yield or rate.

That commenter suggested that, as an alternative to the above, the Department enumerate certain factors it would view as presumptive of acting in concert and then establish a mechanism for rebutting those presumptions. Another commenter proposed that the Department adopt an affiliate certification system to address the numerous situations in which exchanges of information between affiliates do not occur. Under this system, affiliates would be permitted to certify, on a form developed by the Department, that they have established "Chinese walls," management policies, or other procedures to prohibit interaffiliate communications in relation to Treasury auctions. Affiliates submitting such a certification would be considered separate bidders for purposes of Treasury auctions, and, therefore, would not be required to aggregate bids for purposes of the net long reporting requirement and would not be subject to the other limitations imposed with respect to a single bidder.

Commenters objected to the concept that an affiliation exists if there is control in management or control through ownership. One commenter suggested that control in management should not be a standard by which control is determined because it is hard to define and may lead to difficult interpretive questions. That commenter felt that objective criteria should be used to define control.

Several commenters objected to the 25% ownership threshold used to define control through ownership. They felt that the 25% threshold, when applied to large banks and broker/dealers, would group together a wide variety of affiliated companies whose management and business activities are completely separate. In addition, they felt that it was common to have minority investments that might exceed 25% but that by definition do not involve control. In most of those cases, management would not want to share information about its positions in Treasury securities with a minority stockholder that might be a competitor. Those commenters suggested that the ownership threshold be returned to 50% or greater, consistent with the current single bidder guidelines.

In addition, the suggestion was made to develop a procedure whereby certain ownership situations that fall within the literal definition of an affiliate but do not give rise to actual control or otherwise give rise to policy concerns could be excluded from the single bidder definition. The example was given of a bank that forecloses on stock pledged by a company that defaults under a loan.

Several commenters expressed concern that the single bidder criteria contain inconsistencies in the treatment of certain categories of bidders, in particular, banks, broker/dealers, and investment agents. Commenters recommended that the Department develop a uniform standard for banks, broker/dealers, and investment agents with respect to directed, managed, and proprietary accounts. Specifically, they recommended that such bidders should be advised to treat directed accounts as separate bidders and managed accounts collectively as a single bidder. In addition, they recommended that directed accounts be treated as bidders separate from any proprietary accounts, and that managed accounts collectively be treated as a bidder separate from proprietary accounts. These guidelines would apply regardless of whether the various accounts are held by a single entity or by multiple affiliates. Another commenter recommended that each fiduciary account be treated separately as a single bidder. That commenter also recommended that accounts with shared investment authority be treated separately from those with sole investment authority.

The revised rule, in appendix A, after specifying that persons or entities who intentionally act together are considered, collectively, to be one bidder, defines and categorizes bidders. The definitions contain, for each category, information to determine if persons or entities are considered one bidder or more than one bidder for purposes of complying with bidding limitations and net long position reporting requirements.

The revised appendix A contains several changes from the prior version. First, the bidder definitions are intended to be all inclusive. Second, the definition of a bidder as one or more entities and/or persons who, because of their affiliation, have the potential to act in concert with respect to formulating or entering a bid in a Treasury auction has been deleted.

Third, the presumption of an affiliation has been revised. The proposed rule stated that an affiliation is deemed to exist if there is (a) control in management (including investment strategy), (b) control through ownership (defined as 25% or more), or (c) an agreement, formal or informal, written or oral, to act together for the purpose of acquiring securities. The revised rule defines an affiliate of a corporation or partnership as any: (a) entity that is more than 50% owned, directly or indirectly, by the corporation or partnership, (b) entity that is more than 50% owned, directly or indirectly, by any other affiliate of the corporation or partnership, (c) person or entity that owns, directly or indirectly, more than 50% of the corporation or partnership, (d) person or entity that owns, directly or indirectly, more than 50% of any other affiliate of the corporation or partnership, or (e) entity, a majority of whose board of directors or a majority of whose general partners are directors or officers of the corporation or general partners of the partnership or of any affiliate of the corporation or partnership.

Fourth, the revised rule, unlike the proposed rule, makes provision for affiliates or other "major organizational components" of a corporation or partnership to request recognition as a separate bidder if such affiliates or components are prohibited by law from

exchanging, or have established written internal procedures (Chinese walls) designed to prevent the exchange of, information related to bidding in Treasury auctions with other components in the corporate structure. The rule identifies characteristics of a major organizational component and includes a certification that must be completed by any component or components requesting recognition as a separate bidder.

Fifth, the category of political subdivision has been changed to government-related entity and has been expanded to include, as separate bidders, governmental entities, bodies, or corporations established under Federal, State, or local law, and foreign central banks, governments of foreign states, and international organizations in which the United States holds membership. Funds of a government-related entity that meet the definition of the trust or fiduciary estate category are also separate bidders.

Sixth, the distinction in the previous proposed rule between persons acting as trustees and other fiduciaries, and entities acting in those same capacities has been deleted. The revised rule contains one category for trusts or other fiduciary estates meeting specified requirements.

Seventh, the separate categories for "mutual fund or pension fund" and "investment agent/money manager" contained in the proposed rule have been deleted. Under the revised rule, if such person or entity meets the "corporation," "partnership," or "individual" category definition, such person or entity may be included within such category.

Eighth, a new category is provided for a person whether acting in his or her individual capacity, as a sole proprietor, or for any entity not otherwise defined as a bidder. Certain related persons are also included in the "individual" category. The separate category for "family" contained in the proposed rule has been deleted.

Finally, the revised rule contains a new category for "other bidder." This category is not a catch-all but is meant to accommodate bidders that are institutions or organizations with unique employer identification numbers but which do not fit within any other bidder category.

Procedural Requirements

It has been determined that this document is not a major regulation as defined in E.O. 12291 and a regulatory impact analysis is not required.

Although this rule is being issued in proposed form to secure the benefit of public comment, the notice and public procedures requirements of the Administrative Procedure Act are inapplicable, pursuant to 5 U.S.C. 553(a)(2). As no notice of proposed rulemaking is required, the provisions of the Regulatory Flexibility Act (5 U.S.C. 601, *et seq.*) do not apply.

The collections of information contained in this notice of proposed rulemaking have been submitted to the Office of Management and Budget for review in accordance with the Paperwork Reduction Act of 1980 (44 U.S.C. 3504(h)). Comments on the collections of information should be sent to the Office of Management and Budget, Paperwork Reduction Project (1535-_____), Washington, DC 20503, with copies to Bureau of the Public Debt, Forms Management Officer, Washington, DC 20239-1300.

The collections of information in this proposed rule are in §§ 356.11, 356.12, 356.13, and 356.14, and in appendix A. This information is required by the Department of the Treasury to conduct auctions of Treasury marketable securities, and will be used to process bids submitted for the purchase of Treasury marketable securities and to ensure compliance with the provisions of this part. The likely respondents are individuals and households, State and local governments, businesses and other for-profit institutions, non-profit institutions, and small businesses and organizations.

Estimated total annual reporting burden: 126,225 hours.

Estimated average annual burden hours per respondent: .51 hours.

Estimated number of respondents: 247,500.

Estimated annual frequency of responses: on occasion.

List of Subjects

31 CFR Part 349

Federal Reserve System, Government securities, Securities.

31 CFR Part 356

Bonds, Federal Reserve System, Government securities, Securities. For the reasons set forth in the preamble, 31 CFR chapter II, subchapter B, is proposed to be amended as follows:

PART 349—[REMOVED]

1. Part 349 is removed.
2. Part 356 is added to read as follows:

PART 356—SALE AND ISSUE OF MARKETABLE BOOK-ENTRY TREASURY BILLS, NOTES, AND BONDS (DEPARTMENT OF THE TREASURY CIRCULAR, PUBLIC DEBT SERIES NO. 1-92)

Subpart A—General Information

Sec.
356.0 Authority for sale and issue.
356.1 Applicability.
356.2 Definitions.
356.3 Book-entry securities and systems.
356.4 Functions of Federal Reserve Banks.
356.5 Description of securities.

Subpart B—Bidding, Certifications, and Payment

356.10 Offering announcement.
356.11 Submission of bids.
356.12 Noncompetitive and competitive bidding.
356.13 Net long position.
356.14 Submitting bids for customers.
356.15 Certifications.
356.16 Responsibility for payment.

Subpart C—Determination of Auction Awards and Settlement

356.20 Determination of auction awards.
356.21 Proration of awards.
356.22 Limitation on auction awards.
356.23 Announcing auction results.
356.24 Notice of awards; confirmations.
356.25 Payment for awarded securities.

Subpart D—Miscellaneous Provisions

356.30 Payment of principal and interest on notes and bonds.
356.31 STRIPS.
356.32 Taxation.
356.33 Reservation of rights.
356.34 Remedies.
356.35 Reservations as to terms of offerings.
356.36 Paperwork Reduction Act approval.

Appendix A to Part 356—Bidder Definitions

Appendix B to Part 356—Formulas and Tables

Exhibit A to Part 356—Sample Announcements of Treasury Offerings to the Public

Exhibit B to Part 356—Sample Autocharge Agreement to Deliver and Charge for Securities Awarded in Department of the Treasury Auctions

Exhibit C to Part 356—Minimum Par Amounts for STRIPS

Authority: 5 U.S.C. 301; 31 U.S.C. 3102, *et seq.*

Subpart A—General Information

§ 356.0 Authority for sale and issue.

The Secretary of the Treasury is authorized under chapter 31 of title 31, United States Code, to issue United States obligations and to offer them for sale under such terms and conditions as the Secretary may prescribe.

§ 356.1 Applicability.

Unless otherwise specified in an offering announcement, the provisions in this Part, including the Appendices which are incorporated herein by reference, govern the sale and issuance of all marketable Treasury securities and any other obligations issued by the Secretary that, by the terms of the offering announcement, are made subject to this Part.

§ 356.2 Definitions.

In this Part, unless the context indicates otherwise:

Accrued interest means an amount payable to the Department for such part of the next semiannual interest payment that represents interest income attributed to the period prior to the date of issue. (See appendix B.)

Auction means a bidding process by which the Department sells marketable Treasury securities to the public.

Autocharge agreement means a written agreement between a submitter and a depository institution, acknowledged by a Federal Reserve Bank, which authorizes a Federal Reserve Bank to deliver securities awarded to the submitter and its customers at auction to the book-entry account of the depository institution or, when authorized, to a Treasury Direct account, and to charge a funds account of the depository institution for the settlement amount of the securities. (See exhibit B for a sample autocharge agreement.)

Bid means an offer to purchase a stated par amount of securities, either competitively or noncompetitively, in an auction.

Bidder, as further defined in appendix A, means a person or an entity that bids either directly or through an entity authorized to submit bids for customers in an auction. In some cases, two or more persons or entities are considered to be one bidder based on their relationship or their actions in participating in an auction.

Book-entry security means a security the issuance and maintenance of which are represented by an accounting entry or electronic record and not by a certificate.

Call means the redemption, pursuant to the terms specified in its offering announcement, of a security, in whole or in part, prior to maturity, at the option of the Secretary.

Competitive bid means a bid to purchase a stated par amount of securities at a yield or discount rate specified by the bidder.

Corpus means the principal component of a stripped security and future callable semiannual interest payments, if any.

CUSIP means Committee on Uniform Securities Identification Procedures.

CUSIP number means the unique identifying number assigned to each separate security issue and each separate STRIPS component. CUSIP numbers are provided by the CUSIP Service Bureau of Standard & Poor's Corporation.

Customer means a bidder that has directed a depository institution or dealer to submit a competitive or noncompetitive bid on the bidder's behalf for a specified amount of securities in a specific auction. Only depository institutions and dealers may submit bids for customers, whether directly at a Federal Reserve Bank or the Bureau of the Public Debt, or through an intermediary depository institution or dealer.

Dated date means the date from which interest accrues. The dated date and issue date are the same except when the date from which interest accrues is prior to the issue date.

Dealer means an entity that is registered or has given notice of its status as a government securities broker or government securities dealer, pursuant to section 15C(a)(1) of the Securities Exchange Act of 1934.

Department means the United States Department of the Treasury.

Depository institution means an entity described in section 19(b)(1)(A), excluding subparagraph (vii), of the Federal Reserve Act (12 U.S.C. 461(b)(1)(A)). Under section 19(b)(1)(A) of the Federal Reserve Act, the term *depository institution* includes:

(1) Any insured bank as defined in 12 U.S.C. 1813 or any bank which is eligible to make application to become an insured bank under 12 U.S.C. 1815;

(2) Any mutual savings bank as defined in 12 U.S.C. 1813 or any bank which is eligible to make application to become an insured bank under 12 U.S.C. 1815;

(3) Any savings bank as defined in 12 U.S.C. 1813 or any bank which is eligible to make application to become an insured bank under 12 U.S.C. 1815;

(4) Any insured credit union as defined in 12 U.S.C. 1752 or any credit union which is eligible to make application to become an insured credit union under 12 U.S.C. 1781;

(5) Any member as defined in 12 U.S.C. 1422; and

(6) Any savings association (as defined in 12 U.S.C. 1813) which is an insured depository institution (as defined in the Federal Deposit Insurance Act, 12 U.S.C. 1811, *et seq.*) or is eligible to apply to become an insured depository institution under such Act.

Discount means the difference between par and the price of the security, when the price is less than par.

Discount amount means the discount divided by 100 and multiplied by the par amount.

Discount rate, also referred to as "bank discount rate," means an annualized rate of return to maturity on bills, expressed in percentage terms and based on a 360-day year. (See appendix B for formulas and examples.)

Federal Reserve Bank means a Federal Reserve Bank or a branch of a Federal Reserve Bank.

Funds account means a cash account maintained by a depository institution at a Federal Reserve Bank.

Interest rate means the annual percentage rate of interest paid on the par amount of a specific issue of notes or bonds. (See appendix B for methods and examples of interest calculations on notes and bonds.)

Issue date means the date specified in the offering announcement on which a security is issued as an obligation of the United States, and from which interest normally begins to accrue.

Marketable security means a security that is negotiable and transferable, i.e., may be bought and sold in the secondary market.

Maturity date means the date specified in the offering announcement on which a security becomes due and payable, and ceases to earn interest.

Minimum to hold means the smallest amount of a security that will be issued to a bidder and may be held in any book-entry account. Unless otherwise stated in the offering announcement, the minimum to hold is the same as the minimum bid amount given in the offering announcement.

Multiple-price auction means an auction in which each successful bidder pays the price equivalent to the yield or rate that it bid.

Multiple to hold means the smallest additional amount of a security that will be issued to a bidder and may be held in any book-entry account above the minimum to hold. Unless otherwise stated in the offering announcement, the multiple to hold is the same as the multiple to bid amount given in the offering announcement.

Noncompetitive bid means a bid to purchase securities at the weighted average yield or discount rate of awards to competitive bidders.

Par means a price of 100. (See appendix B.)

Par amount means the stated value of a security that will be paid at maturity.

Person means a natural person.

Premium means the difference between par and the price of the security, when the price is greater than par.

Premium amount means the premium divided by 100 and multiplied by the par amount.

Price means the price of a security as calculated using the formulas in appendix B.

Public offering means the par amount of securities offered to the public for purchase in an auction. For all bills except cash management bills, the public offering is the amount specified in the offering announcement, less securities awarded in the auction to the Federal Reserve Banks for their own account (up to the amount of maturing securities held by the Federal Reserve) and for the account of foreign and international monetary authorities (up to the amount of maturing securities held by foreign and international accounts). For notes, bonds, and cash management bills, the public offering is the same as the amount specified in the offering announcement.

Reopening means the auction of an additional amount of an outstanding security.

Secretary means Secretary of the Treasury.

Security means a Treasury bill, note, or bond, each as described in this part, and any other obligation issued by the Secretary that, by the terms of the applicable offering announcement, is made subject to this part. Security includes an interest or principal component under the STRIPS program (see below).

Settlement means final and complete payment made by a submitter for securities awarded in an auction.

Settlement amount means the par amount of securities awarded less any discount amount and plus any premium amount and accrued interest.

Single-price auction means an auction in which all successful bidders pay the same price regardless of the yields or rates they each bid.

STRIPS (Separate Trading of Registered Interest and Principal of Securities) means the Department's program under which eligible securities are authorized to be separated into principal and interest components, and traded separately. These components are maintained in book-entry form on the books of a Federal Reserve Bank.

Submitter means the person or entity submitting bids directly to a Federal Reserve Bank or the Bureau of the Public Debt for its own account, for the account of others, or both. The only submitters that are permitted to submit for the account of others are depository institutions and dealers.

Tender means the document or computer transmission submitted to a Federal Reserve Bank or the Bureau of the Public Debt by which a bidder bids for securities.

Tint means an interest component associated with a stripped security.

TREASURY DIRECT means the TREASURY DIRECT Book-Entry Securities System.
(See 31 CFR part 357, subpart C.)

Weighted average means the average of the yields or discount rates at which securities are awarded to competitive bidders weighted by the par amount of securities allotted at each yield or discount rate.

Yield, also referred to as "yield to maturity," means the annualized rate of return to maturity on a note or bond expressed as a percentage. (See appendix B.)

§ 356.3 Book-entry securities and systems.

Securities issued subject to this part shall be held in either of two systems for maintaining book-entry securities, described below. Securities may be transferred from one system to the other in accordance with Treasury regulations governing book-entry Treasury bills, notes, and bonds. See Department of the Treasury Circular No. 300, as currently revised, and Department of the Treasury Circular, Public Debt Series No. 2–86, as amended (31 CFR parts 306 and 357).

(a) *Commercial book-entry system.*[1] The commercial book-entry system is established, maintained, and operated by the Federal Reserve Banks, acting as fiscal agents of the United States, pursuant to 12 U.S.C. 391. The Federal Reserve Banks maintain book-entry accounts for themselves, depository institutions, and other authorized entities, such as government and international agencies and foreign central banks. In their accounts, depository institutions maintain securities held for their own account and for the accounts of others, including other depository institutions and dealers, which may, in turn, maintain accounts for others.

(b) *TREASURY DIRECT.* TREASURY DIRECT is a system in which the book-entry securities of account holders are identified and maintained directly on the records of the Bureau of the Public Debt, Department of the Treasury.

[1] Upon the adoption of a final rule therefor, the commercial book-entry system will be referred to as the Treasury/Reserve Automated Debt Entry System (TRADES).

§ 356.4 Functions of Federal Reserve Banks.

Federal Reserve Banks, as fiscal agents of the United States, are authorized to perform all activities necessary to carry out the provisions of this part, any offering announcements, and applicable regulations.

§ 356.5 Description of securities.

Securities offered pursuant to this part are offered exclusively in book-entry form and are direct obligations of the United States, issued under chapter 31 of title 31 of the United States Code. The securities are subject to the terms and conditions set forth in this part, as well as the general regulations governing United States securities (31 CFR part 306), the regulations governing book-entry Treasury bills, notes, and bonds (31 CFR part 357), and the offering announcements, all to the extent applicable. When the Department issues additional securities with the same CUSIP number as outstanding securities, all securities with the same CUSIP number are considered the same security.

(a) *Treasury bills.* Treasury bills are issued at a discount, are redeemed at their par amount at maturity, and have maturities of not more than one year.

(b) *Treasury notes.* Treasury notes are issued with a stated rate of interest, earn interest semiannually, and are redeemed at their par amount at maturity. They are sold at discount, par, or premium, depending upon the auction results. They have maturities of at least one year, but of not more than ten years.

(c) *Treasury bonds.* Treasury bonds are issued with a stated rate of interest, earn interest semiannually, and are redeemed at their par amount at maturity. They are sold at discount, par, or premium, depending upon the auction results. They typically have maturities of more than ten years.

Subpart B—Bidding, Certifications, and Payment

§ 356.10 Offering announcement.

The Department provides public notice of the sale of bills, notes, and bonds by issuing an offering announcement. The offering announcement lists the specifics of each offering, e.g., offering amount, term and type of security, CUSIP number, and issue and maturity dates. The offering announcement and this Part, including the Appendices, specify the terms and conditions of sale. To the extent that the provisions of an offering announcement are inconsistent with the provisions of this Part, the provisions of the offering

announcement will control. (See exhibit A for sample announcements.)

§ 356.11 Submission of bids.

(a) *General.* (1) Bids may be submitted directly to a Federal Reserve Bank that is authorized to accept tenders or to the Bureau of the Public Debt, Washington, DC, or through a depository institution or dealer that is authorized, pursuant to § 356.14, to submit bids on behalf of customers. Except as otherwise provided in this Section, tenders must be submitted in an approved format. Competitive and noncompetitive bids must be received prior to the respective closing times specified in the offering announcement, except as provided below in paragraph (b)(2) of this section. Bids not received timely will not be recognized in the auction. Bids for securities are binding on the bidder after the closing time specified in the offering announcement.

(2) If the awarded securities are to be issued in the commercial book-entry system, a submitter must have on file at a Federal Reserve Bank a certificate listing those persons who are authorized to submit tenders on its behalf. The certificate must be duly executed by an authorized person on behalf of the submitter. A tender will not be recognized if the person submitting the tender is not listed on the certificate. The submitter is responsible for any tenders submitted for the submitter by persons who are designated on the certificate as authorized to submit tenders on its behalf.

(b) *Submission of paper tenders.* (1) Paper tenders should be on preprinted forms provided by the Federal Reserve Bank to which the tender is submitted or preprinted forms of the Bureau of the Public Debt, and should provide the information requested on the form. Paper tenders in any other form or incomplete tenders may be accepted or rejected at the option of the Department.

(2) The submitter is responsible for ensuring that the paper tender is received timely at the Federal Reserve Bank or the Bureau of the Public Debt, Washington, DC. A noncompetitive bid submitted by mail is considered timely if the envelope containing the tender bears a U.S. Postal Service cancellation date prior to the auction date and is received on or before the issue date.

(3) Neither the Federal Reserve Bank nor the Department shall be, in any way, responsible for any unauthorized paper tender submissions or for any delays, errors, or omissions in the submission of paper tenders.

(c) *Submission of tenders by computer.* Competitive and noncompetitive tenders may be submitted by computer transmission to a Federal Reserve Bank. Tenders may be submitted by computer only by those submitters that have previously arranged with a Federal Reserve Bank for such submission.

(1) For computer tenders, the submitter must use a software application provided by the Federal Reserve Bank or otherwise comply with the computer communications standards for Treasury auctions. Incomplete tenders or transmissions that do not comply with the communications standards may be accepted or rejected at the option of the Department.

(2) All tenders submitted by computer are binding on the submitter to the same extent as if they had been paper tenders. No paper tender should be submitted that duplicates a tender submitted by computer.

(3) Tenders submitted by computer must be received by the applicable closing time; the Federal Reserve Bank's computer time stamp will establish the time of receipt.

(4) The submitter bears sole risk for any disruption or failure in the operation of its own computer, any electronic-based communications facilities, or any communications lines between the submitter and the Federal Reserve Bank.

(5) If disruptions or failures in the operation of the Federal Reserve Bank's computer or communications facilities result in the non-receipt or untimely receipt of tenders otherwise timely submitted, the Department at its option may accept or reject such tenders.

(6) The submitter is responsible for tenders submitted using computer equipment on its premises, whether or not such tenders are authorized.

(7) Neither the Federal Reserve Bank nor the Department shall be, in any way, responsible for any delays, errors, or omissions in the submission of tenders.

§ 356.12 Noncompetitive and competitive bidding.

(a) *General.* All bids must state the par amount of securities bid for and must equal or exceed the minimum bid amount stated in the offering announcement. Bids that exceed the minimum bid amount must be in the multiple stated in the offering announcement.

(b) *Noncompetitive.* A bidder bidding competitively for its own account may not bid noncompetitively for its own account in the same auction. A request for reinvestment of securities maturing in TREASURY DIRECT is a noncompetitive bid.

(1) *Maximum bid.* A bidder may not bid noncompetitively for more than $1 million in a bill auction or more than $5 million in a note or bond auction. The maximum bid limitation does not apply to bidders who are bidding solely through TREASURY DIRECT reinvestment requests.

(2) *Additional restrictions.* A bidder may not bid noncompetitively for its own account if, in the security being auctioned, it holds a position in when-issued trading or in futures or forward contracts between the date of the offering announcement and the designated closing time for the receipt of competitive tenders. A noncompetitive bidder may not enter into any agreement to purchase or sell or otherwise dispose of the security being auctioned prior to the designated closing time for receipt of competitive tenders.

(c) *Competitive.* A bidder bidding noncompetitively for its own account may not bid competitively for its own account in the same auction.

(1) *Bid format.* A competitive bid must show the yield or discount rate bid, expressed with two decimals. Fractions may not be used.

(2) *Maximum recognized bid.* There is no limitation on the maximum dollar amount that a bidder may bid for competitively, either at one yield or discount rate, or at different yields or discount rates. However, a competitive bid by a bidder at a single yield or discount rate that exceeds 35% of the public offering amount will be reduced to that amount. For example, if the public offering is $10 billion, the maximum bid amount that will be recognized at any one yield or discount rate from any bidder is $3.5 billion. (See § 356.22 for award limitations.)

§ 356.13 Net long position.

(a) *Reporting the net long position.* (1) When bidding competitively, a bidder must report the amount of its net long position when the total of all of its bids in an auction plus the bidder's net long position in the security being auctioned equals or exceeds $2 billion. If the bidder either has no position or has a net short position and the total of all of its bids equals or exceeds $2 billion, a net long position of zero must be reported. In cases where a bidder that is required to report the amount of its net long position bids through more than one submitter or Federal Reserve Bank, the bidder's total net long position should be reported through only one submitter or Federal Reserve Bank. A bidder that is a customer must report its net long position through one depository institution or dealer. (See § 356.14(c).)

(2) When one person or entity is making the bidding decisions (i.e., whether to bid and how much to bid) for

one or more other persons or entities, all bids for and net long positions of such persons and entities must be combined for purposes of the net long position reporting requirements of this section. If the total of the combined bids and positions equals or exceeds the net long position reporting threshold of $2 billion, the person or entity making the bidding decisions must provide the names of such bidders and the aggregate net long position. The names and the aggregate position must be provided, prior to the closing time for receipt of competitive bids, to the Federal Reserve Banks to which the bids are submitted.

(b) *Determination of net long position.* The net long position must be determined as of the designated reporting time, which is one-half hour prior to the closing time for receipt of competitive bids. However, if the net long position increases by $200 million or more after the designated reporting time and the person making the bidding decision knows of the increase, the larger amount must be used in complying with net long position reporting requirements. A net long position includes the par amount of:

(1) Holdings of outstanding securities with the same CUSIP number as the security being auctioned;

(2) Positions, in the security being auctioned, in

(i) When-issued trading,

(ii) Futures contracts that require delivery of the specific security being auctioned (but not futures contracts for which the security being auctioned is one of several securities that may be delivered, and not futures contracts that are cash-settled), and

(iii) Forward contracts; and

(3) Holdings of STRIPS principal components of the security being auctioned, including when-issued trading positions of such principal components.

§ 356.14 Submitting bids for customers.

Depository institutions and dealers may submit bids for their own account, for customers, or, in the case of customers that are also depository institutions or dealers, for customers of those customers, subject to the requirements set out below in paragraphs (a), (b), and (c) of this section. Others are permitted to submit bids only for their own account.

(a) *Payment.* By submitting a bid on behalf of a customer, a submitter agrees to remit payment for securities awarded as a result of such bid.

(b) *Customer lists.* A customer list must be submitted or be available, as provided below, whenever bids for more than one customer are included on the same tender. The customer list must include direct customers of the submitter as well as customers of a depository institution or dealer who is submitting bids through the submitter.

(1) For competitive bids submitted by paper tender, the submitter must provide a separate tender for each yield or discount rate at which a bid is submitted. As a part of such tender, the submitter must provide a list that includes the name of each customer and the amount bid by each customer. For competitive bids submitted by computer, the submitter may submit bids at multiple yields or discount rates on the same tender. On each such tender, the submitter must submit the name of each customer and the amount bid at each yield or discount rate by each customer.

(2) For noncompetitive bids, a list must be provided that includes the name of each customer and the amount bid by each customer. For mailed tenders, the customer list must be submitted with the tender. For other than mailed tenders, the customer list should accompany the tender. If the customer list is not submitted with the tender, information for the list must be complete and available for review by the deadline for submission of noncompetitive tenders, and must be received by the Federal Reserve Bank to which the tender was submitted by close of business on the auction day.

(3) Bids submitted on behalf of trusts or other fiduciary estates must identify on the customer list the name or title of the trustee or fiduciary; a reference to the document creating the trust or fiduciary estate with date of execution; and the employer identification number of the trust or fiduciary estate.

(c) *Net long position of customers.* (1) The submitter, when submitting bids for any customer bidding competitively through that submitter for $10 million or more, must inform that customer of the customer's net long position reporting obligation as described in § 356.13.

(2) A submitter, when submitting a competitive bid for a customer, must report the net long position amount if such amount is provided by the customer.

(3) If the submitter knows that the position information provided by the customer is incorrect, the customer's bid shall not be submitted by the submitter.

(4) If the amount of a customer's net long position is to be reported by the submitter by paper tender, a separate tender must be submitted for that customer that includes the amount of the net long position.

§ 356.15 Certifications.

(a) *Submitters.* By submitting a tender for a security, a submitter is deemed to have certified that it is in compliance with this part and the offering announcement governing the sale and issue of the security. Further, the submitter is deemed to have certified that the information provided on the tender with regard to bids for its own account is accurate and complete, and that the information provided on the tender with regard to bids for customers accurately and completely reflects information provided by the customer. Prior to submitting a computer tender, a submitter must have on file a written certification that the submitter is certifying, each time it submits a computer tender, that it is in compliance with this part and the applicable offering announcement. The certification must be signed and dated by an authorized person on behalf of the submitter, be filed with the Federal Reserve Bank to which the computer tender is submitted, and be renewed at least annually.

(b) *Customers.* By bidding for a security, a customer is deemed to have certified that it is in compliance with this part and the offering announcement governing the sale and issue of the security and that the information provided to the submitter in connection with the bid is accurate and complete.

§ 356.16 Responsibility for payment.

A bidder agrees to pay the settlement amount for any securities awarded to it in the auction. (See Section 356.25.) In addition, certain payments or provisions for payment are required at the time a tender is submitted. The specific requirements, outlined below, depend on whether awarded securities will be delivered to TREASURY DIRECT or the commercial book-entry system.

(a) *TREASURY DIRECT.* For securities to be held in TREASURY DIRECT, payment of the par amount and announced accrued interest, if any, must be submitted with the tender unless provision has been made for payment by charge to the funds account of a depository institution.

(1) *Payment with tender.* For bills, payment must be by cash, depository institution (cashier's or teller's) check, certified check, currently dated Treasury or fiscal agency check made payable to the bidder, or definitive Treasury securities maturing on or before the issue date of the securities being auctioned, but which are not overdue as defined in the general regulations governing United States securities (31 CFR 306.25). Also, maturing securities

held in TREASURY DIRECT may be used as payment for new securities that are being offered, provided that the appropriate transaction request is received timely. For notes or bonds, payment must be in one of the forms described above for bills, or by personal check. Checks submitted to a Federal Reserve Bank must be made payable to that Bank and checks submitted to the Bureau of the Public Debt must be made payable to the Bureau of the Public Debt.

(2) *Authorized charge to a funds account.* If a depository institution or dealer submits a tender on behalf of a TREASURY DIRECT bidder and payment is not submitted with the tender, an authorization from a depository institution to charge the institution's funds account at a Federal Reserve Bank must be submitted with the tender.

(b) *Commercial book-entry system.* For securities to be held in the commercial book-entry system, payment of the par amount and announced accrued interest, if any, must be submitted with the tender unless provision has been made for payment by charge to the funds account of a depository institution.

(1) *Payment with tender.* Where payment is submitted with the tender, payment must be by one of the means specified above under (a)(1).

(2) *Authorized charge to a funds account.* Where payment is not submitted with the tender, an authorization to charge the funds account of a depository institution must be provided as follows:

(i) A depository institution with a funds account submitting tenders directly to a Federal Reserve Bank may authorize the Bank to charge its funds account upon delivery of the securities.

(ii) A submitter that chooses not to pay by charge to its funds account or a submitter that does not have a funds account must, prior to the submission of a tender, have an approved autocharge agreement on file at the Federal Reserve Bank to which the tender is submitted. By submitting a tender to be paid for under such autocharge agreement, the submitter authorizes the Federal Reserve Bank to provide, to the depository institution whose funds account will be charged under the agreement, notice of the total par amount of, and price to be charged for, securities awarded as a result of the submitter's tender.

Subpart C—Determination of Auction Awards and Settlement

§ 356.20 Determination of auction awards.

(a) *Determining the range and amount of accepted competitive bids*—(1) *Accepting bids.* Determinations of awards in auctions are made at the Bureau of the Public Debt after the closing time for receipt of bids. In determining auction awards, the Bureau of the Public Debt first accepts in full all noncompetitive bids received by the closing time specified in the offering announcement. Then competitive bids are accepted, starting with those at the lowest yields or discount rates through successively higher yields or discount rates, up to the amount required to meet the public offering. Bids at the highest accepted yield or discount rate will be prorated (as described below), if necessary. If the amount of noncompetitive bids would absorb most or all of the public offering, competitive bids will be accepted in an amount determined by the Department to be sufficient to provide a fair determination of the yield or discount rate for the securities being auctioned.

(2) *Accepting bids at the high yield or discount rate.* When the total amount of bids at the highest accepted yield or discount rate exceeds the amount of the public offering remaining after acceptance of noncompetitive bids and competitive bids at the lower yields or discount rates, a percentage of the bids received at the highest accepted yield or discount rate will be awarded. This proration is performed for the purpose of awarding a par amount of securities close to the public offering amount. The percentage is derived by dividing the remaining par amount needed to fill the public offering by the par amount of the bids recognized at the high yield or rate and rounding up to the next whole percentage point.

(b) *Determining the interest rate for new note and bond issues.* The interest rate established as a result of the auction will generally be set at the ⅛ of one percent increment that produces the price closest to, but not above, par when evaluated at the weighted average yield of awards to competitive bidders.

(c) *Determining purchase prices for awarded securities.* (See appendix B for formulas and tables. Price calculations will be rounded to three decimal places on the basis of price per hundred, e.g., 99.954.)

(1) *Multiple-price auctions*—(i) *Competitive bids.* The price of securities awarded to competitive bidders is the price equivalent to each yield or discount rate at which their bids were accepted.

(ii) *Noncompetitive bids.* The price of securities awarded to noncompetitive bidders is the price equivalent to the weighted average yield or discount rate of accepted competitive bids.

(2) *Single-price auctions.* The price of securities awarded to both competitive and noncompetitive bidders is the price equivalent to the highest yield or discount rate at which bids were accepted.

§ 356.21 Proration of awards.

(a) *Awards to submitters.* In auctions where bids at the highest accepted yield or discount rate are prorated under § 356.20(a)(2) of this part, the Federal Reserve Banks are responsible for prorating awards for submitters at the percentage announced by the Department. For example, if 80% is the announced percentage at the highest yield or discount rate, then each bid at that rate or yield shall be awarded 80% of the amount bid. Hence, a bid for $100,000 at the highest accepted yield or discount rate would be awarded $80,000. In all cases, awards will be for, at least, the minimum to hold, and awards must be in an appropriate multiple to hold. For example, Treasury bills may be issued with a minimum to hold of $10,000 and multiples to hold of $5,000. Where a $100,000 bid is accepted at the high discount rate, and the percent awarded at the high discount rate was 11%, the award to that bidder would be $15,000, because bills cannot be held in an amount of $11,000. Awards at the highest accepted yield or rate are adjusted upwards, if necessary, to an appropriate multiple to hold. If tenders at the highest accepted rate were prorated at, for example, a rate of 4%, the award for a $100,000 bid would be $10,000, instead of $4,000, in order to meet the minimum to hold for a bill issue.

(b) *Awards to customers.* In auctions where bids at the highest accepted yield or discount rate are prorated under § 356.20(a)(2) of this part, depository institutions and dealers are responsible for prorating awards for their customers at the same percentage as that announced by the Department. For example, if 80% is the announced percentage at the highest yield or discount rate, then each customer bid at that rate or yield shall be awarded 80%. The same prorating rules apply to customers as apply to submitters.

§ 356.22 Limitation on auction awards.

(a) *Awards to noncompetitive bidders.* The maximum award that will be made to any bidder is $1 million for bills and $5 million for notes and bonds. This

does not apply to bidders bidding solely through TREASURY DIRECT reinvestment requests.

(b) *Awards to competitive bidders.* The maximum award that will be made to any bidder is 35% of the public offering less the bidder's net long position as reportable under § 356.13.

For example, in a note auction with a $10 billion public offering, a bidder with a reported net long position of $1 billion could receive a maximum auction award of $2.5 billion. When the bids and net long positions of more than one person or entity must be combined as required by § 356.13(a)(2), such combined amount will be used for the purpose of this award limitation.

§ 356.23 Announcing auction results.

After the conclusion of the auction, the Department will make an official announcement of the auction results through a press release. The press release will include such information as the amounts of bids recognized and accepted, the range of yields or discount rates at which securities were awarded, noncompetitive yield or discount rate, proration percentage, the interest rate for a note or bond, a breakdown of the amounts of noncompetitive and competitive bids recognized and accepted from the public, the amounts recognized and accepted from the Federal Reserve Banks for their own accounts and for foreign and international monetary authorities, and the minimum par amount required to strip a STRIPS-eligible note or bond.

§ 356.24 Notice of awards; confirmations.

(a) *Notice of awards.* Notice of awards will be provided by a Federal Reserve Bank or the Department to submitters of successful competitive bids. Submitters of noncompetitive bids will be notified only when the price to be paid by noncompetitive bidders is over par or if noncompetitive bids are not accepted in full.

(b) *Confirmation of award to customer.* A submitter submitting a bid for a customer is responsible for notifying its customer of the award.

(c) *Confirmation of award and settlement amount to a depository institution having an autocharge agreement with a submitter.* Not later than the day after each auction, the appropriate Federal Reserve Bank will notify each depository institution that has entered into an autocharge agreement with a submitter as to the amount to be charged to the institution's funds account at the Federal Reserve Bank on the issue date.

(d) *Customer net long position confirmation.* Any customer awarded a par amount of $100 million or more in an auction must furnish in writing a statement indicating whether it had a reportable net long position as defined in Section 356.13, and, if a position had to be reported, the amount of any such position and the name of the depository institution or dealer through which the customer requested that the position be reported. This statement must be provided to the Federal Reserve Bank where the bid was submitted no later than close of business on the day before the issue date. A submitter submitting a customer bid is responsible for notifying its customer of this confirmation requirement if the customer is awarded a par amount of $100 million or more as a result of bids submitted by the submitter.

(e) *Customer bid confirmation.* Any customer awarded a par amount of $500 million or more in an auction must furnish, no later than 10 a.m. on the day following the auction, written confirmation of its bid to the Federal Reserve Bank where the bid was submitted. A submitter submitting a customer bid is responsible for notifying its customer of this confirmation requirement if the customer is awarded a par amount of $500 million or more as a result of bids submitted by the submitter.

§ 356.25 Payment for awarded securities.

Payment for securities is to be accomplished by the issue date. Payment will be accomplished as follows:

(a) *Payment with tender.* When payment is made with the tender as provided for in § 356.16(a)(1) and (b)(1), settlement is accomplished as follows:

(1) *When an amount is due the submitter.* When the payment previously remitted by the submitter exceeds the settlement amount, the balance will be refunded to the submitter following the auction.

(2) *When the submitter owes an additional amount.* When the settlement amount exceeds the payment previously remitted by the submitter, the submitter will be notified of the additional amount due and is responsible for remitting it immediately. Such additional amount may be due if the auction calculations result in a premium or if accrued interest is due.

(b) *Payment by authorized charge to a funds account.* Where the submitter's method of payment is an authorized charge to the funds account of a depository institution as provided for in § 356.16(a)(2) and (b)(2), the settlement amount will be charged to the specified funds account on the issue date.

Subpart D—Miscellaneous Provisions

§ 356.30 Payment of principal and interest on notes and bonds.

Principal on notes and bonds will be paid on the maturity date as specified in the offering announcement unless the security is called pursuant to its terms and in accordance with appropriate public notice. Interest on notes and bonds accrues from the dated date. Interest is payable on a semiannual basis on the interest payment dates specified in the offering announcement through the date that the principal becomes payable. In the event any principal or interest payment date is a Saturday, Sunday, or other day on which the Federal Reserve Banks are not open for business, the amount is payable (without additional interest) on the next business day.

§ 356.31 STRIPS.

(a) *General.* A note or bond may be designated in the offering announcement as eligible for the STRIPS program. At the option of the holder, and generally at any time from its issue date until its call or maturity, any such security may be "stripped," i.e., divided into separate principal and interest components maintained in the commercial book-entry system. The principal components of such stripped security have a single CUSIP number that is different from the CUSIP number of the fully-constituted (unstripped) security. When an interest payment is stripped, an interest component is created and the interest payment date becomes the maturity date for the component. A short or long first interest payment and all interest payments within a callable period are not eligible to be stripped from the principal component. All interest components with the same maturity date have the same CUSIP number, regardless of the underlying security from which the interest payments were stripped. The CUSIP numbers of all interest components are different from the CUSIP number of any fully-constituted security and any principal component. The CUSIP numbers and payment dates for the principal and interest components are provided in the offering announcement if not previously announced.

(b) *Minimum par amounts required for STRIPS.* For a note or bond to be stripped into the components described above, the par amount of the note or bond must be in an amount that, based on its interest rate, will produce a semiannual interest payment in a multiple of $1,000. Exhibit C to this part provides the minimum par amounts

required to strip a note or bond at various interest rates, as well as the corresponding interest payments. Amounts greater than the minimum par amount must be in multiples of that amount. The minimum par amount required to strip a particular security will be provided in the press release announcing the auction results.

(c) *Reconstituting a security.* Stripped interest and principal components may be reconstituted, i.e., restored to their fully-constituted form, and maintained in the commercial book-entry system. A principal component and all related unmatured interest components, in the appropriate minimum or multiple amounts, must be submitted together for reconstitution.

(d) *Applicable regulations.* Unless otherwise provided in this part, the Department's general regulations governing United States securities (31 CFR part 306) apply to notes and bonds separated into their STRIPS components.

§ 356.32 Taxation.

Securities issued under this part are subject to all applicable taxes imposed under the Internal Revenue Code of 1986. Under Section 3124 of title 31, United States Code, the securities are exempt from taxation by a State or political subdivision of a State, except for State estate or inheritance taxes and other exceptions as provided in that section.

§ 356.33 Reservation of rights.

The Secretary reserves the right to accept or reject or refuse to recognize any or all bids or tenders submitted under this part. The Secretary also reserves the right to award more or less securities than the amount of securities specified in the offering announcement. The Secretary further reserves the right to waive any provision or provisions of this part for any or all bidders or submitters. Decisions of the Secretary under this Section shall be final.

§ 356.34 Remedies.

(a) *General.* When a person or an entity fails to comply with the requirements of this part, the Secretary will consider the circumstances of such failure and determine an appropriate remedy. Such remedy may include prohibiting the person or entity from participating in future auctions for its own account, for the account of others, or both. The Secretary may refer such occurrences to the appropriate regulatory agency for enforcement action.

(b) *Liquidated damages.* A bidder agrees to pay liquidated damages of 1% of the par amount of securities awarded the bidder in an auction if the bidder fails to pay for the awarded securities in a timely manner. The Secretary may waive, in whole or in part, the payment of liquidated damages. This liquidated damages provision shall not preclude the use of any other available remedy.

§ 356.35 Reservations as to terms of offerings.

The Secretary reserves the right to supplement or amend provisions of this part. The Secretary further reserves the right to modify the terms and conditions of new securities and to depart from the customary pattern of securities offerings at any time. Public notice of any such changes will be provided.

§ 356.36 Paperwork Reduction Act approval.

The collections of information contained in §§ 356.11, 356.12, 356.13, and 356.14, and in appendix A of this part have been approved by the Office of Management and Budget under control number 1535-_____.

Appendix A to Part 356—Bidder Definitions

For the purpose of this part, the categories set forth below further define a bidder. These definitions are to be used by persons and entities in determining whether they are considered one bidder or more than one bidder for the purpose of bidding in auctions and for the purpose of complying with the requirements of this part. Notwithstanding these definitions, any persons or entities that intentionally act together with respect to bidding in a Treasury auction are considered, collectively, to be one bidder.

The following definitions will be used by the Department in applying competitive and noncompetitive award limitations and related requirements, as described in this part.

(a) *Corporation*—A corporation and all affiliates, whether persons, partnerships, or other entities, hereinafter referred to as a corporate structure, are considered, collectively, to be one bidder.

An affiliate is any: entity that is more than 50% owned, directly or indirectly, by the corporation; entity that is more than 50% owned, directly or indirectly, by any other affiliate of the corporation; person or entity that owns, directly or indirectly, more than 50% of the corporation; person or entity that owns, directly or indirectly, more than 50% of any other affiliate of the corporation; or entity, a majority of whose board of directors or a majority of whose general partners are directors or officers of the corporation or of any affiliate of the corporation.

Under certain circumstances, one or more major organizational components (e.g., the parent or a subsidiary) in a corporate structure, either separately or together with one or more other organizational components in the corporate structure, may be recognized as a bidder separate from the larger corporate structure. All of the following criteria must be met for such component or components to qualify for recognition as a separate bidder:

(1) Such component or components must be prohibited by law or regulation from exchanging, or must have established written internal procedures (i.e., Chinese walls) designed to prevent the exchange of, information related to bidding in Treasury auctions with any other component in the corporate structure;

(2) Such component or components must not be created for the purpose of circumventing the Department's bidding and award limitations;

(3) Decisions related to purchasing Treasury securities at auction and participation in specific auctions must be made by employees of such component or components. Employees of such component or components that make decisions to purchase or dispose of Treasury securities must not perform the same function for other components within the corporate structure; and

(4) The records of such component or components related to the bidding for, acquisition of, and disposition of Treasury securities must be maintained by such component or components. Those records must be identifiable—separate and apart from similar records for other components within the corporate structure.

To obtain recognition as a separate bidder, each component or group of components must request such recognition from the Department, provide a description of the component or group and its position within the corporate structure, and provide the following certification:

"[Name of the bidder] hereby certifies that to the best of its knowledge and belief it meets the criteria for a separate bidder as described in appendix A to 31 CFR part 356. The above-named bidder also certifies that it has established written policies or procedures, including ongoing compliance monitoring processes, that are designed to prevent the component or group of components from:

"(1) Exchanging any of the following information with any other part of the corporate structure: (a) yields or rates at which it plans to bid; (b) amounts of securities for which it plans to bid; (c) positions that it holds or plans to acquire in a security being auctioned; and (d) investment strategies that it plans to follow, or

"(2) In any way intentionally acting together with any other part of the corporate structure with respect to formulating or entering bids in a Treasury auction.

"The above-named bidder agrees that it will promptly notify the Department in writing when any of the information provided to obtain separate bidder status changes or when this certification is no longer valid."

(b) *Partnership*—A partnership for which the Internal Revenue Service has assigned a tax-identification number; general partners acting on behalf of the partnership; and all affiliates, whether persons, corporations, or other entities; hereinafter referred to as a partnership structure, are considered, collectively, to be one bidder. A partnership

structure that contains one or more corporations is considered one bidder under either this "partnership" category or the "corporation" category, but not both.

An affiliate is any: entity that is more than 50% owned, directly or indirectly, by the partnership; entity that is more than 50% owned, directly or indirectly, by any other affiliate of the partnership; person or entity that owns, directly or indirectly, more than 50% of the partnership; person or entity that owns, directly or indirectly, more than 50% of any other affiliate of the partnership; or entity, a majority of whose general partners or a majority of whose board of directors are general partners or directors of the partnership or of any affiliate of the partnership.

Under certain circumstances, one or more major organizational components (e.g., the partnership or a subsidiary) in a partnership structure, either separately or together with one or more other organizational components in the partnership structure, may be recognized as a bidder separate from the larger partnership structure. All of the following criteria must be met for such component or components to qualify for recognition as a separate bidder:

(1) Such component or components must be prohibited by law or regulation from exchanging, or must have established written internal procedures (i.e., Chinese walls) designed to prevent the exchange of, information related to bidding in Treasury auctions with any other component in the partnership structure;

(2) Such component or components must not be created for the purpose of circumventing the Department's bidding and award limitations;

(3) Decisions related to purchasing Treasury securities at auction and participation in specific auctions must be made by employees of such component or components. Employees of such component or components that make decisions to purchase or dispose of Treasury securities must not perform the same function for other components within the partnership structure; and

(4) The records of such component or components related to the bidding for, acquisition of, and disposition of Treasury securities must be maintained by such component or components. Those records must be identifiable—separate and apart from similar records for other components within the partnership structure.

To obtain recognition as a separate bidder, each component or group of components must request such recognition from the Department, provide a description of the component or group and its position within the partnership structure, and provide the following certification:

"[Name of the bidder] hereby certifies that to the best of its knowledge and belief it meets the criteria for a separate bidder as described in appendix A to 31 CFR part 356. The above-named bidder also certifies that it has established written policies or procedures, including ongoing compliance monitoring processes, that are designed to prevent the component or group of components from:

(1) Exchanging any of the following information with any other part of the partnership structure: (a) yields or rates at which it plans to bid; (b) amounts of securities for which it plans to bid; (c) positions that it holds or plans to acquire in a security being auctioned; and (d) investment strategies that it plans to follow, or

"(2) In any way intentionally acting together with any other part of the partnership structure with respect to formulating or entering bids in a Treasury auction.

"The above-named bidder agrees that it will promptly notify the Department in writing when any of the information provided to obtain separate bidder status changes or when this certification is no longer valid."

(c) *Government-related entity*—

(1) The government of each of the 50 states and of the District of Columbia is considered to be one bidder.

(2) A unit of local government, including any county, city, municipality, or township, or other unit of general government, as defined by the Bureau of the Census for statistical purposes, is considered to be one bidder.

(3) The government of a commonwealth, territory, or possession of the United States is considered to be one bidder.

(4) A governmental entity, body, or corporation established under Federal, State, or local law is considered to be one bidder.

(5) A foreign central bank, the government of a foreign state, or an international organization in which the United States holds membership is considered to be one bidder.

An investment, reserve, or other fund of one of the above government-related entities, not otherwise meeting the definition of the "trust or other fiduciary estate" category, is considered part of that entity and not a separate bidder unless applicable law requires that the investments of such fund be made separately.

(d) *Trust or other fiduciary estate*—A legal entity created under a valid trust instrument, court order, or other legal authority that designates a trustee or fiduciary to act for the benefit of a named beneficiary may be considered a bidder. To be considered a bidder, such legal entity must be able to be identified by the name or title of the trustee or fiduciary; specific reference to the trust instrument, court order, or legal authority under which the trustee or fiduciary is acting; and the unique IRS-assigned employer identification number (not social security number) for the entity. Further, it must be the trustee or fiduciary who makes the decisions related to participation in auctions on behalf of the trust or fiduciary estate.

(e) *Individual*—A person, whether acting in his or her individual capacity, as a sole proprietor, for any entity not otherwise defined as a bidder, or in more than one such capacity, is considered to be one bidder. When a person meets the definition of an affiliate within a corporate or partnership structure as defined above, such person may only be considered a bidder in this "individual" category when the bidder of which they are a part is not bidding in the same auction. A person acting in an official capacity as an employee or other representative of a bidder defined in any other category is not considered an "individual" bidder when acting in such capacity. A person, his or her spouse, and any children under the age of 21 having a common household are considered, collectively, to be one "individual" bidder.

(f) *Other bidder*—A bidder defined by any of the above categories is not considered a bidder in this category. A bidder not defined by any of the above categories may possibly be considered a bidder in this category. For purposes of this definition, "other bidder" means an institution or organization with a unique IRS-assigned employer identification number. This definition of other bidder includes such entities as an association, church, university, union, or club. This category does not include any person or entity acting in a fiduciary or investment management capacity, a sole proprietorship, an investment account, an investment fund, a form of registration, or investment ownership designation.

Notwithstanding the definitions in this appendix, it is the intent of the Department that no auction participant receive a larger auction award by acquiring securities through an intermediary than it could have received had it been considered a bidder under these definitions.

Appendix B to Part 356—Formulas and Tables

I. Computation of Interest on Treasury Bonds and Notes

II. Formulas for Conversion of Bond and Note Yields to Equivalent Prices

III. Computation of Purchase Price, Discount Rate, and Investment Rate for Treasury Bills

I. Computation of Interest on Treasury Bonds and Notes

A. Regular Half-Year Payment Period

Interest on marketable Treasury bonds and notes is payable on a semiannual basis. The regular interest payment period is a full half-year of six calendar months. Examples of half-year periods are: (1) February 15 to August 15, (2) May 31 to November 30, and (3) February 29 to August 31 (in a leap year). Calculation of an interest payment for a note with a par amount of $1,000 and an interest rate of 8% is made in this manner: ($1,000 × .08) ÷ 2 = $40. Specifically, a semiannual interest payment represents one half of one year's interest, and is computed on this basis regardless of the actual number of days in the half-year.

B. Daily Interest Decimal

In cases where an interest payment period is shorter or longer than six months or where accrued interest is payable by an investor, a daily interest decimal, based on the actual number of days in the half-year or half-years involved, must be computed. The number of days in any half-year period is shown in Table 1.

TABLE.—1

Interest period	Beginning and ending days are 1st or 15th of the months listed under interest period (number of days)		Beginning and ending days are the last days of the months listed under interest period (number of days)	
	Regular year	Leap year	Regular year	Leap year
January to July	181	182	181	182
February to August	181	182	184	184
March to September	184	184	183	183
April to October	183	183	184	184
May to November	184	184	183	183
June to December	183	183	184	184
July to January	184	184	184	184
August to February	184	184	181	182
September to March	181	182	182	183
October to April	182	183	181	182
November to May	181	182	182	183
December to June	182	183	181	182

Table 2 below sets forth the daily interest decimals covering interest from ⅛% to 20% on $1,000 for one day in increments of ⅛ of one percent. These decimals represent $1/181$, $1/182$, $1/183$, or $1/184$ of a full semiannual interest payment, depending on which half-year is applicable.

BILLING CODE 4810-35-M

TABLE 2

Decimal for one day's interest on $1,000 at various rates of interest, payable semiannually or on a semiannual basis, in regular years of 365 days and in years of 366 days (to determine applicable number of days, see TABLE 1).

BILLING CODE 4810-35-C

C. Short First Payment Period

In cases where the first interest payment period for a bond or note covers less than a full half-year period (a "short coupon"), the daily interest decimal is multiplied by the number of days from, but not including, the issue date to, and including, the first interest payment date, resulting in the amount of the interest payable per $1,000 par amount. In cases where the par amount of securities is greater than $1,000, the appropriate multiple should be multiplied by the unrounded interest payment amount for $1,000 par amount.

Example

A 2-year note paying 8⅜% interest was issued on July 2, 1990, with the first interest payment on December 31, 1990. The number of days in the full half-year period of June 30 to December 31, 1990, was 184 (see Table 1). The number of days for which interest actually accrued was 182 (not including July 2, but including December 31). The daily interest decimal, $0.227581522 (see Table 2, line for 8⅜%, under the column for half-year of 184 days), was multiplied by 182, resulting in a payment of $41.419837004 per $1,000. Because the note was issued in a minimum denomination of $5,000, $41.419837004 was multiplied by 5, resulting in a payment of $207.099185020, or $207.10, for a $5,000 note. For $20,000 of these notes, $41.419837004 would be multiplied by 20, resulting in a payment of $828.39674008 ($828.40).

D. Long First Payment Period

In cases where the first interest payment period for a bond or note covers more than a full half-year period (a "long coupon"), the daily interest decimal is multiplied by the number of days from, but not including, the issue date to, and including, the last day of the fractional period that ends one full half-year before the interest payment date. That amount is added to the regular interest amount for the full half-year ending on the first interest payment date, resulting in the amount of interest payable for $1,000 par amount. In cases where the par amount of securities is greater than $1,000, the appropriate multiple should be applied to the unrounded interest payment amount for $1,000 par amount.

Example

A 5-year 2-month note paying 7⅞% interest was issued on December 3, 1990, with the first interest payment due on August 15, 1991. Interest for the regular half-year portion of the payment was computed to be $39.375 per $1,000 par amount. The fractional portion of the payment, from December 3 to February 15, fell in a 184-day half-year (August 15, 1990, to February 15, 1991). Accordingly, the daily interest decimal for 7⅞% was $0.213994565. This decimal, multiplied by 74 (the number of days from but not including December 3, 1990, to and including February 15), resulted in interest for the fractional portion of $15.835597810. When added to $39.375 (the normal interest payment portion ending on August 15, 1991), this produced a first interest payment of $55.210597810, or $55.21 per $1,000 par amount. For $7,000 par amount of these notes, $55.210597810 would be multiplied by 7, resulting in an interest payment of $386.474184670 ($386.47).

E. Accrued Interest

Accrued interest will be payable by the purchaser of a Treasury bond or note when interest accrues prior to the issue date of the security. Because the purchaser receives a full interest payment despite having held the security for only a portion of the interest payment period, the Department is compensated through the payment of accrued interest at settlement.

If accrued interest covers a fractional portion of a full half-year period, the number of days in the full half-year period and the stated interest rate will determine the daily interest decimal to be used in computing the accrued interest. The decimal is multiplied by the number of days for which interest has accrued. If a reopened bond or note has a long first interest payment period (a "long coupon"), and the dated date for the reopened issue is less than six full months before the first interest payment, the accrued interest will fall into two separate half-year periods, and a separate daily interest decimal must be multiplied by the respective number of days in each half-year period during which interest has accrued. All accrued interest computations are rounded to five decimal places for a $1,000 par amount, using normal rounding procedures. Accrued interest for a par amount of securities greater than $1,000 is calculated by applying the appropriate multiple to accrued interest payable for $1,000 par amount, taken to five decimal places.

Examples

(1) Involving One Half-Year:

A bond paying interest at a rate of 8¾%, originally issued on August 15, 1990, as a 30-year bond with a first interest payment date of February 15, 1991, was reopened as a 29-year 9-month bond on November 15, 1990. Interest had accrued for 92 days, from August 15 to November 15. The regular interest period from August 15 to February 15, 1991, covered 184 days. Accordingly, the daily interest decimal, $0.237771739, multiplied by 92, resulted in an accrued interest payable of $21.874999988, or $21.87500, for each $1,000 bond purchased. If the bonds have a par amount of $150,000, then 150 is multiplied by $21.87500, resulting in an amount payable of $3,281.25.

(2) Involving Two Half-Years:

A 10¾% bond, originally issued on July 2, 1985, as a 20-year 1-month bond, with a first interest payment date of February 15, 1986, was reopened as a 19-year 10-month bond on November 4, 1985. Interest had accrued for 44 days, from July 2 to August 15, 1985, during a 181-day half-year (February 15 to August 15); and for 81 days, from August 15 to November 4, during a 184-day half-year (August 15, 1985, to February 15, 1986). Accordingly, $0.296961328 was multiplied by 44, and $0.292119585 was multiplied by 81, resulting, in products of $13.066298344 and $23.661684765 which, added together, resulted in accrued interest payable of $36.727983109, or $36.72798, for each $1,000 bond purchased. If the bonds have a par amount of $11,000, then 11 is multiplied by $36.72798, resulting in an amount payable of $404.00778 ($404.01).

II. Formulas for Conversion of Bond and Note Yields to Equivalent Prices [1]

Definitions

P = price per 100 (dollars), rounded to three places, using normal rounding procedures

C = the regular annual interest per $100, payable semiannually, e.g., 10.125 (the decimal equivalent of a 10⅛% interest rate)

i = nominal annual rate of return or yield to maturity, based on semiannual interest payments and expressed in decimals, e.g., .0719

n = number of full semiannual periods from the issue date to maturity, except that, if the issue date is a coupon frequency date, n will be one less than the number of full semiannual periods remaining to maturity. Coupon frequency dates are the two semiannual dates based on the maturity date of each note or bond issue. For example, a security maturing on November 15, 1995, would have coupon frequency dates of May 15 and November 15.

r = (1) number of days from the issue date to the first interest payment (regular or short first payment period), or (2) number of days in fractional portion (or "initial short period") of long first payment period

s = (1) number of days in the full semiannual period ending on the first interest payment date (regular or short first payment period), or (2) number of days in the full semiannual period in which the fractional portion of a long first payment period falls, ending at the onset of the regular portion of the first interest payment

$v^n = 1/[1+(i/2)]^n$ = present value of 1 due at the end of n periods

$a_n = (1-v^n)/(i/2) = v + v^2 + v^3 + \ldots + v^n$ = present value of 1 per period for n periods

A = accrued interest

A. For bonds and notes with a regular first interest payment period:

Formula:

$$P[1+(r/s)(i/2)] = (C/2)(r/s) + (C/2)a_n + 100\,v^n$$

Example:

For an 8¾% 30-year bond, issued May 15, 1990, due May 15, 2020, with interest payments on November 15 and May 15, solve for the price per 100 (P) at a yield of 8.84%.

Definitions:

C = 8.75

i = .0884

r = 184 (May 15 to November 15, 1990)

s = 184 (May 15 to November 15, 1990)

n = 59 (There are 60 full semiannual periods, but n is reduced by 1 because the issue date is a coupon frequency date.)

$v^n = 1/[(1+.0884/2)]^{59}$, or .077940

[1] In the following examples, intermediate rounding is used to allow the reader to follow the calculations. In actual practice, the Department does not round prior to determining the final result.

$a_n = (1 - .077940)/.0442$, or 20.861086

Resolution:

$P[1 + (r/s)(i/2)] = (C/2)(r/s) + (C/2)a_n + 100\ v^n$

or

$P[1 + (184/184)(.0884/2)] = (8.75/2)(184/184) + (8.75/2)(20.861086) + 100(.077940)$

(1) $P[1 + .0442] = 4.375 + 91.267251 + 7.7940$

(2) $P[1.0442] = 103.436251$

(3) $P = 103.436251 \div 1.0442$

(4) $P = 99.057892$

(5) $P = 99.058$

B. For bonds and notes with a short first interest payment period:

Formula:

$P[1 + (r/s)(i/2)] = (C/2)(r/s) + (C/2)a_n + 100\ v^n$

Example:

For an 8½% 2-year note, issued April 2, 1990, due March 31, 1992, with interest payments on September 30 and March 31, solve for the price per 100 (P) at a yield of 8.59%.

Definitions:

C = 8.50

i = .0859

n = 3

r = 181 (April 2 to September 30, 1990)

s = 183 (March 31 to September 30, 1990)

$v^n = 1/[(1 + .0859/2)]^3$, or .881474

$a_n = (1 - .881474)/.04295$, or 2.759627

Resolution:

$P[1 + (r/s)(i/2)] = (C/2)(r/s) + (C/2)a_n + 100\ v^n$

or

$P[1 + (181/183)(.0859/2)] = (8.50/2)(181/183) + (8.50/2)(2.759627) + 100(.881474)$

(1) $P[1 + .042481] = 4.203552 + 11.728415 + 88.1474$

(2) $P[1.042481] = 104.079367$

(3) $P = 104.079367 \div 1.042481$

(4) $P = 99.838143$

(5) $P = 99.838$

C. For bonds and notes with a long first interest payment period:

Formula:

$P[1 + (r/s)(i/2)] = [(C/2)(r/s)]v + (C/2)a_n + 100\ v^n$

Example:

For an 8½% 5-year 2-month note, issued March 1, 1990, due May 15, 1995, with interest payments on November 15 and May 15 (first payment on November 15, 1990), solve for the price per 100 (P) at a yield of 8.53%.

Definitions:

C = 8.50

i = .0853

n = 10

r = 75 (March 1 to May 15, 1990, which is the fractional portion of the first interest payment)

s = 181 (November 15, 1989, to May 15, 1990)

$v = 1/(1 + .0853/2)$, or .959095

$v^n = 1/(1 + .0853/2)^{10}$, or .658589

$a_n = (1 - .658589)/.04265$, or 8.004947

Resolution:

$P[1 + (r/s)(i/2)] = [(C/2)(r/s)]v + (C/2)a_n + 100\ v^n$ or

$P[1 + (75/181)(.0853/2)] = [(8.50/2)(75/181)].959095 + (8.50/2)(8.004947) + 100(.658589)$

(1) $P[1 + .017673] = 1.689014 + 34.021025 + 65.8589$

(2) $P[1.017673] = 101.568939$

(3) $P = 101.568939 \div 1.017673$

(4) $P = 99.805064$

(5) $P = 99.805$

D. (1) For bonds and notes reopened during a regular interest period where the purchase price includes predetermined accrued interest.

(2) For new bond and note issues accruing interest from the coupon-frequency date immediately preceding the issue date, with the interest rate established in the auction being used to determine the accrued interest payable on the issue date.

Formula:

$(P + A)[1 + (r/s)(i/2)] = C/2 + (C/2)a_n + 100v^n$

Where $A = [(s - r)/s](C/2)$

Example:

For a 9½% 10-year note, interest accruing from November 15, 1985, issued November 29, 1985, due November 15, 1995, with interest payments on May 15 and November 15, solve for the price per 100 (P) at a yield of 9.54%. Accrued interest is from November 15 to November 29 (14 days).

Definitions:

C = 9.50

i = .0954

n = 19

r = 167 (November 29, 1985, to May 15, 1986)

s = 181 (November 15, 1985, to May 15, 1986)

$v^n = 1/[(1 + .0954/2)]^{19}$, or .412570400

$a_n = (1 - .412570)/.0477$, or 12.315094

$A = [(181 - 167)/181](9.50/2)$, or .367403

Resolution:

$(P + A)[1 + (r/s)(i/2)] = C/2 + (C/2)a_n + 100v^n$

or

$(P + .367403)[1 + (167/181)(.0954/2)] = (9.50/2) + (9.50/2)(12.315094) + 100(.412570)$

(1) $(P + .367403)[1 + .04401 1] = 4.75 + 58.496697 + 41.2570$

(2) $(P + .367403)[1.044011] = 104.503697$

(3) $(P + .367403) = 104.503697 \div 1.044011$

(4) $(P + .367403) = 100.098272$

(5) $P = 100.098272 - .367403$

(6) $P = 99.730869$

(7) $P = 99.731$

E. For bonds and notes reopened during the regular portion of a long first payment period:

Formula:

$(P + A)[1 + (r/s)(i/2)] = (r'/s'')(C/2) + C/2 + (C/2)a_n + 100v^n$

Where $A = AI' + AI$

$AI' = (r'/s'')(C/2)$

$AI = [(s - r)/s](C/2)$

and r = number of days from the reopening date to the first interest payment date

s = number of days in the semiannual period for the regular portion of the first interest payment period

r' = number of days in the fractional portion (or "initial short period") of the first interest payment period

s'' = number of days in the semiannual period ending with the commencement date of the regular portion of the first interest payment period

Example:

A 10¾% 19-year 9-month bond due August 15, 2005, is issued on July 2, 1985, and reopened on November 4, 1985, with interest payments on February 15 and August 15 (first payment on February 15, 1986), solve for the price per 100(P) at a yield of 10.47%. Accrued interest is calculated from July 2 to November 4.

Definitions:

C = 10.75

i = .1047

n = 39

r = 103 (November 4, 1985, to February 15, 1986)

s = 184 (August 15, 1985, to February 15, 1986)

r' = 44 (July 2 to August 15, 1985)

s'' = 181 (February 15 to August 15, 1985)

$v^n = 1 / [(1 + .1047 / 2)]^{39}$, or .136695

$a_n = (1 - .136695)/.05235$, or 16.491022

$AI' = (44/181)(10.75/2)$, or 1.306630

$AI = [(184 - 103)/184](10.75/2)$, or 2.366168

$A = AI' + AI$, or 3.672798

Resolution:

$(P + A)[1 + (r/s)(i/2)] = (r'/s'')(C/2) + C/2 + (C/2)a_n + 100v^n$ or

$(P + 3.672798)[1 + (103/184)(.1047/2)] = (44/181)(10.75/2) + 10.75/2 + (10.75/2)(16.491022) + 100(.136695)$

(1) $(P + 3.672798)[1 + .0293 05] = 1.306630 + 5.375 + 88.639243 + 13.6695$

(2) $(P + 3.672798)[1.029305] = 108.990373$

(3) $(P + 3.672798) = 108.990373 \div 1.029305$

(4) $(P + 3.672798) = 105.887344$

(5) $P = 105.887344 - 3.672798$

(6) $P = 102.214546$

(7) $P = 102.215$

F. For bonds and notes reopened during a short first payment period:

Formula:

$(P + A)[1 + (r/s)(i/2)] = (r''/s)(C/2) + (C/2)a_n + 100v^n$

Where $A = [(r'' - r)/s](C/2)$

and r'' = number of days from the original issue date to the first interest payment date

Example:

For a 10½% 8-year note due May 15, 1991, originally issued on May 16, 1983, and reopened on August 15, 1983, with interest payments on November 15 and May 15 (first payment on November 15, 1983), solve for the price per 100 (P) at yield of 10.53%. Accrued interest is calculated from May 16 to August 15.

Definitions:

C = 10.50

i = .1053

n = 15

r = 92 (August 15, 1983, to November 15, 1983)

s = 184 (May 15, 1983, to November 15, 1983)

r'' = 183 (May 16, 1983, to November 15, 1983)

$v^n = 1/[(1 + .1053/2)]^{15}$, or .463170

$a_n = (1 - .463170)/.05265$, or 10.196201

$A = [(183 - 92)/184](10.50/2)$, or 2.596467

Resolution:

$(P + A)[1 + (r/s)(i/2)] = (r''/s)(C/2) + (C/2)a_n + 100v^n$ or

$(P + 2.596467)[1 + (92/184)(.1053/2)] = (183/184)(10.50/2) + (10.50/2)(10.196201) + 100(.463170)$

(1) $(P + 2.596467)[1 + .026325] = 5.221167 + 53.530055 + 46.3170$

(2) $(P + 2.596467)[1.026325] = 105.068522$

(3) (P+2.596467)=105.068522÷1.026325
(4) (P+2.596467)=102.373539
(5) P=102.373539−2.596467
(6) P=99.777072
(7) P=99.777

G. For bonds and notes reopened during the fractional portion (initial short period) of a long first payment period:

Formula:

$(P+A)[1+(r/s)(i/2)]=[(r'/s)(C/2)]v+(C/2)a_n+100v^n$

Where $A=[(r'r)/s](C/2)$
and r=number of days from the reopening date to the end of the short period
r'=number of days in the short period
s=number of days in the semiannual period ending with the end of the short period

Example:

For a 9¾% 6-year 2-month note due December 15, 1994, originally issued on October 15, 1988, and reopened on November 15, 1988, with interest payments on June 15 and December 15 (first payment on June 15, 1989), solve for the price per 100 (P) at a yield of 9.79%. Accrued interest is calculated from October 15 to November 15.

Definitions:

C=9.75
i=.0979
n=12
r=30 (November 15, 1988, to December 15, 1988)
s=183 (June 15, 1988, to December 15, 1988)
r'=61 (October 15, 1988, to December 15, 1988)
v=1/(1+.0979/2), or .953334
$v^n=[1/(1+.0979/2)]^{12}$, or .563563
$a_n=(1-.563563)/.04895$, or 8.915975
A=[(61−30)/183](9.75/2), or .825820

Resolution:

$(P+A)[1+(r/s)(i/2)]=[(r'/s)(C/2)]v+(C/2)_{an}+100v^n$ or
(P+.825820)[1+(30/183)(.0979/2)]=[(61/183)(9.75/2)](.953334)+(9.75/2)(8.915975)+100(.563563)
(1) (P+.825820)[1+.00802 5]=1.549168+43.465378+56.3563
(2) (P+.825820)[1.008025]=101.370846
(3) (P+.825820)=101.370846÷1.008025
(4) (P+.825820)=100.563821
(5) P=100.563821−.825820
(6) P=99.738001
(7) P=99.738

III. Computation of Purchase Price, Discount Rate, and Investment Rate (Equivalent Coupon-Equivalent Yield) for Treasury Bills

A. Conversion of the discount rate to a purchase price for Treasury bills of all maturities:

Formula:

P=100 [(1−dr)/360]
Where d=discount rate, in decimals
r=number of days remaining to maturity
P=price per 100 (dollars)

Example:

For a bill issued November 24, 1989, due February 22, 1990, at a discount rate of 7.61%, solve for price per 100 (P).

Definitions:

d=.0761
r=90 (November 24, 1989 to February 22, 1990)

Resolution:

P=100 (1−dr/360)
(1) P=100 [1−(.0761)(90)/360]
(2) P=100 (1−.019025)
(3) P=100 (.980975)
(4) P=98.0975
(5) P=98.098

Note: Purchase prices per $100 are rounded to three decimal places, using normal rounding procedures.

B. Computation of purchase prices and discount amounts based on price per $100, for Treasury bills of all maturities:

1. To determine the purchase price of any bill, divide the par amount by 100 and multiply the resulting quotient by the price per $100.

Example

To compute the purchase price of a $10,000 13-week bill sold at a price of $98.098 per $100, divide the par amount ($10,000) by 100 to obtain the multiple (100). That multiple times 98.098 results in a purchase price of $9,809.80.

2. To determine the discount amount for any bill, subtract the purchase price from the par amount of the bill.

Example

For a $10,000 bill with a purchase price of $9,809.80, the discount amount would be $190.20, or $10,000−$9,809.80.

C. Conversion of prices to discount rates for Treasury bills of all maturities:

Formula:

$$d=\left[\frac{100-P}{100}\times\frac{360}{r}\right]$$

Where P=price per 100 (dollars)
d=discount rate
r=number of days remaining to maturity

Example:

For a 26-week bill issued December 30, 1982, due June 30, 1983, with a price of $95.930, solve for the discount rate (d).

Definitions:

P=95.930
r=182 (December 30, 1982, to June 30, 1983)

Resolution:

$$d=\left[\frac{100-P}{100}\times\frac{360}{r}\right]$$

$$(1)\quad d=\left[\frac{100-95.930}{100}\times\frac{360}{182}\right]$$

(2) d=[.0407×1.978022]
(3) d=.080506
(4) d=8.051%

Note: Since April 18, 1983, bills have been sold only on a discount rate basis, where the discount rates bid are submitted with two decimals, e.g., 7.32%. In price-basis auctions, discount rates calculated from prices were rounded to three places, using normal rounding procedures.

D. Calculation of investment rate (coupon-equivalent yield) for Treasury bills:

1. For bills of not more than one half-year to maturity:

Formula:

$$i=\left[\frac{100-P}{P}\times\frac{y}{r}\right]$$

Where i=investment rate, in decimals
P=price per 100 (dollars)
r=number of days remaining to maturity
y=number of days in year following the issue date; normally 365 but, if the year following the issue date includes February 29, then y is 366.

Example:

For a cash management bill issued June 1, 1990, due June 21, 1990, with a price of $99.559 (computed from a discount rate of 7.93%), solve for the investment rate (i).

Definitions:

P=99.559
r=20 (June 1, 1990, to June 21, 1990)
y=365

Resolution:

$$i=\left[\frac{100-P}{P}\times\frac{y}{r}\right]$$

$$(1)\quad i=\left[\frac{100-99.559}{99.559}\times\frac{365}{20}\right]$$

(2) i=[.004430×18.25]
(3) i=.080848
(4) i=8.08%

2. For bills of more than one half-year to maturity:

Formula: $P\,[1+(r-y/2)(i/y)]\,(1+i/2)=100$

This formula must be solved by using the quadratic equation, which is:

$ax^2+bx+c=0$

Therefore, rewriting the bill formula in the quadratic equation form gives:

$$\left(\frac{r}{2y}-.25\right)i^2+\left(\frac{r}{y}\right)i+\left(\frac{P-100}{P}\right)=0$$

and solving for "i" produces:

$$i=\frac{-b+\sqrt{b^2-4ac}}{2a}$$

Where i=investment rate in decimals
b=r/y
a=(r/2y)−.25
c=(P−100)/P
P=price per 100 (dollars)
r=number of days remaining to maturity
y=number of days in year following the issue date; normally 365, but if the year following the issue date includes February 29, then y is 366.

Example:

For a 52-week bill issued June 7, 1990, due June 6, 1991, with a price of $92.265 (computed from a discount rate of 7.65%), solve for the investment rate (i).

Definitions:

r=364 (June 7, 1990, to June 6, 1991)
y=365
P=92.265
b=364/365, or .997260
a=(364/730)−.25, or .24863
c=(92.265−100)/92.265, or −.083835

Resolution:

$$i = \frac{-b + \sqrt{b^2 - 4ac}}{2a}$$

$$(1)\ i = \frac{-.997260 + \sqrt{(.997260)^2 - 4[(.24863)(-.083835)]}}{2(.248630)}$$

$$(2)\ i = \frac{-.997260 + \sqrt{.994528 + .083376}}{.497260}$$

(3) i=(−.997260+1.038222)/.497260
(4) i=.040962/.497260
(5) i=.082375 or
(6) i=8.24%

Exhibit A to Part 356—Sample Announcements of Treasury Offerings to the Public

I. Treasury Quarterly Financing Announcement
II. Treasury Weekly Bill Announcement
III. Treasury Cash Management Bill Announcement

I. Treasury Quarterly Financing Announcement

For release when authorized at press conference, May 1, 19XX.

Contact: Office of Financing, 202/219–3350.

Treasury May Quarterly Financing

The Treasury will auction two notes and one bond totaling approximately $37,000 million, to be issued May 15, 19XX. This offering will provide about $18,025 million of new cash and will refund $18,976 million of securities maturing that date.

In addition to the public holdings, Federal Reserve Banks hold $3,662 million of the maturing securities for their own accounts, which may be refunded by issuing additional amounts of the new securities at the average yield of accepted competitive tenders.

The maturing securities held by the public include $1,099 million held by Federal Reserve Banks as agents for foreign and international monetary authorities. Amounts bid for these accounts by Federal Reserve Banks will be added to the offering. Bids for such accounts will be accepted at the average yield of accepted competitive tenders.

The 9¾-year note and 30-year bond being offered today will be eligible for the STRIPS program.

Tenders will be received at Federal Reserve Banks and Branches and at the Bureau of the Public Debt, Washington, D. C.

Details about each of the new securities are given in the attached offering highlights and in the Treasury Department's Uniform Offering Circular.

New TINT CUSIP number.	Not applicable	Not applicable	912833 LD 0.
New TINT due date	Not applicable	Not applicable	May 15, 20XX.
The following rules apply to all securities mentioned above:			
Submission of Bids:			
Noncompetitive bids	Accepted in full up to $5,000,000 at the weighted average yield of accepted competitive bids.		
Competitive bids	(1) Must be expressed as an annual yield with two decimals, e.g., 7.10%. (2) Net long position for each bidder must be reported when the sum of the total bid amount, at all yields, and the net long position is $2 billion or greater. (3) The net long position must be determined as of one-half hour prior to the closing time for receipt of competitive tenders.		
Maximum recognized bid at a single yield.	35% of offering amount.		
Maximum award	35% of offering amount.		
Receipt of Tenders:			
Noncompetitive tenders.	Prior to 12:00 noon Eastern time on auction day.		
Competitive tenders	Prior to 1:00 p.m. Eastern time on auction day.		
Payment terms	Full payment with tender or by charge to a funds account on issue date.		

II. Treasury Weekly Bill Announcement

For release at 2:30 p.m., October 9, 19XX.
Contact: Office of Financing, 202/219–3350.

Treasury's Weekly Bill Offering

The Treasury will auction two series of Treasury bills totaling approximately $18,800 million, to be issued October 18, 19XX. This offering will provide about $1,375 million of new cash, as the maturing weekly bills are currently outstanding in the amount of $17,421 million.

Federal Reserve Banks hold $4,294 million of the maturing bills for their own accounts, which may be refunded within the offering amount at the weighted average discount rate of accepted competitive tenders.

Federal Reserve Banks hold $1,104 million as agents for foreign and international monetary authorities, which may be refunded within the offering amount at the weighted average discount rate of accepted competitive tenders. Additional amounts may be issued for such accounts if the aggregate amount of new bids exceeds the aggregate amount of maturing bills.

Tenders for the bills will be received at Federal Reserve Banks and Branches and at the Bureau of the Public Debt, Washington, DC.

Details about each of the new securities are given in the attached offering highlights and in the Treasury Department's Uniform Offering Circular.

Payment Terms	Full payment with tender or by charge to a funds account on issue date.

Exhibit B to Part 356—Sample Autocharge Agreement to Deliver and Charge for Securities Awarded in Department of Treasury Auctions

Federal Reserve Bank of _____
Attention: (Name of Fiscal Officer)
(Address)
(Address)

To Whom It May Concern:

I. The depository institution ("DI") and the submitting entity ("Submitter"), as identified below, agree that

(a) The Submitter is authorized to submit tenders to the Federal Reserve Bank of _____ ("Bank");

(b) The Bank is authorized to deliver, as provided herein, Treasury securities awarded to the Submitter through the auction process;

(c) The Bank, or other Federal Reserve Bank identified in Section II below, is authorized to charge the DI's funds account for payment of awarded securities that are delivered by the Bank hereunder. Such charge is to be made at the same time the securities are delivered;

(d) The Submitter [ ] is, [ ] is not authorized to submit TREASURY DIRECT tenders. Where such tenders are authorized, the Bank is instructed to deliver awarded securities to the TREASURY DIRECT Book-Entry System and charge the DI's funds account for the securities delivered; and

(e) The Bank [ ] is, [ ] is not authorized to deliver the awarded securities to the DI's securities account at a Federal Reserve Bank other than the Bank.

The above authorizations apply to: [ ] bills; [ ] notes; [ ] bonds.

II. For securities to be delivered to a Federal Reserve Bank other than the Bank receiving the tender, the Submitter must complete the following:

Awarded securities are to be delivered hereunder by the Bank to the DI's securities account at the Federal Reserve Bank of _____.

III. The following wire instructions are to be used by the Bank to deliver securities to the DI:

Wire Instructions: _____

IV. General Provisions.

This agreement is effective on the date it is received by the Bank, although the Bank normally will not act under the agreement until it has acknowledged receipt of such.

The Submitter hereunder is the entity submitting bids to a Bank for its own account or for the account of others. The Sub mitter is responsible to the Treasury for full payment of all securities awarded, including any securities awarded under customer bids submitted by the Submitter.

Any Federal Reserve Bank identified herein is authorized to act on information in any tender in the name of the Submitter that reasonably appears to be valid and genuine. The DI, by executing this agreement,

guarantees the authority and signature of the person signing this agreement on behalf of the Submitter.

This agreement will remain in effect until written notice is received by the Bank from either the DI or the Submitter that the agreement has been terminated, provided that if securities are scheduled to be delivered hereunder, such notice must be received in accordance with the termination procedures hereafter described.

As to termination action by the DI, notice of termination will not be effective unless received in writing by a Fiscal/Securities Department officer by the later of (i) 5:00 p.m. (the Bank's time) on the business day prior to the issue date of the securities scheduled to be delivered hereunder or (ii) if the submitter has authorized the Bank to advise the DI of securities to be delivered, two hours after such advice is sent by the Bank. Such termination action by the DI shall not affect the Submitter's responsibility to make full payment for the securities awarded. A DI may, at any time, waive in writing its right to terminate hereunder.

As to termination action by the Submitter after an auction but prior to delivery of awarded securities, the written notice of termination will not be effective, and this agreement shall remain in full force and effect, unless the Submitter has provided to the Bank, and the latter has acknowledged, a new autocharge agreement executed by a DI having a funds account at a Federal Reserve Bank.

Written notices to be sent hereunder in connection with the termination of this autocharge agreement shall be sent by either the Submitter or the DI to the Bank authorized to receive tenders hereunder.

In the event that this autocharge agreement is terminated, it is the sole responsibility of the party terminating the agreement to notify the other party hereto.

AGREED TO BY _____

Instructions for Completing the Autocharge Agreement

1. Depository Institution: This is the DI whose funds account at a Federal Reserve Bank will be debited, under this autocharge agreement, for the price of Treasury securities awarded at auction to the Submitter. Also, this DI must have a book-entry securities account at the Federal Reserve Bank to which securities will be delivered against payment on settlement day pursuant to the autocharge agreement and the Submitter's tender submission.

2. Submitter: The Submitter must identify the full name of the entity that is submitting bids under this autocharge agreement. The name shown on the autocharge agreement should be the same as that appearing on related tender forms.

3. Bank: This is the Federal Reserve Bank to which the Submitter will be submitting tenders in Treasury auctions.

4. Signature for DI: This is the signature of an officer of the DI having authority to enter into or terminate this autocharge agreement, and whose signature is on file at the Federal Reserve Bank where the DI has a funds account.

5. Signature for Submitter: This is the signature of an officer of the Submitter having authority to enter into or terminate the autocharge agreement.

6. Signature for Bank: This is the signature of an officer of the Bank having authority to acknowledge this autocharge agreement.

PART III

Department of Education

Business and Education Standards Program; Notice Inviting Applications for New Awards for Fiscal Year 1993; Notice

DEPARTMENT OF EDUCATION

[CFDA No.: 84.244]

Business and Education Standards Program; Notice Inviting Applications for New Awards for Fiscal Year (FY) 1993

Note to Applicants: This notice is a complete application package. Together with the statute authorizing the program and the Education Department General Administrative Regulations (EDGAR), this notice contains all of the information, application forms, and instructions needed to apply for a grant under this competition.

Purpose of Program: The Business and Education Standards Program provides financial assistance for organizing and operating business-education-labor technical committees that will develop national standards for competencies in industries and trades. This program is authorized under section 416 of the Carl D. Perkins Vocational and Applied Technology Education Act, 20 U.S.C. 2416, as amended by Public Law 101-392, 104 Stat. 753 (1990).

The Secretary wishes to highlight for potential applicants that the Business and Education Standards Program is an element of AMERICA 2000, the President's education strategy to help America move itself toward the National Education Goals. The Business and Education Standards Program also supports National Education Goal 5 of ensuring that every American possesses the knowledge and skills necessary to compete in a global economy and exercises the rights and responsibilities of citizenship. Specifically, the program addresses Track III of the AMERICA 2000 strategy—transforming America into "A Nation of Students"—by establishing standards for job skills and knowledge through a cooperative effort by business, labor, and education groups, so that workers can see what skills are needed to perform a job and can evaluate their own grasp of those skills.

Eligible Applicants: The following entities are eligible for an award under this program:

- Industrial trade associations.
- Labor organizations.
- National joint apprenticeship committees.
- Comparable national organizations, such as educational associations, industry councils, business and industry organizations, and associations of private or national research organizations.

Deadline for Transmittal of Applications: November 20, 1992.

Deadline for Intergovernmental Review: January 19, 1993.

Available Funds: $3,500,000 for the first 18 months (funding for the second 18 months is subject to the availability of funds).

Estimated Range of Awards: $450,000 to $550,000 (funding for the first 18 months).

Estimated Number of Awards: 7.

Note.—The Department is not bound by any estimates in this notice.

Project Period: Up to 36 months (two 18-month grant cycles).

Applicable Regulations

(a) The Education Department General Administrative Regulations (EDGAR) as follows:

(1) 34 CFR Part 74 (Administration of Grants to Institutions of Higher Education, Hospitals, and Nonprofit Organizations).

(2) 34 CFR Part 75 (Direct Grant Programs).

(3) 34 CFR Part 77 (Definitions that Apply to Department Regulations).

(4) 34 CFR Part 79 (Intergovernmental Review of Department of Education Programs and Activities).

(5) 34 CFR Part 81 (General Education Provisions Act—Enforcement).

(6) 34 CFR Part 82 (New Restrictions on Lobbying).

(7) 34 CFR Part 85 (Governmentwide Debarment and Suspension (Nonprocurement) and Governmentwide Requirements for Drug-Free Workplace (Grants)).

(8) 34 CFR Part 86 (Drug-Free Schools and Campuses).

(b) The regulations for this program in 34 CFR part 421.

Priorities

The priority in the notice of final priority for this program, as published elsewhere in this issue of the **Federal Register**, applies to this competition.

Selection Criteria

The Secretary uses the following selection criteria to evaluate applications for new grants under the FY 1993 grant competition.

The maximum score for all of these criteria is 100 points.

The maximum score for each criterion is indicated in parentheses. The Secretary assigns the fifteen points reserved in 34 CFR 421.20(b) as follows: 5 points to selection criterion (a)—Program factors—in 34 CFR 421.21(a) for a total of 20 points for that criterion; 5 points to selection criterion (c)—Plan of operation—in 34 CFR 421.21(c) for a total of 20 points for that criterion; and 5 points to selection criterion (d)—Evaluation plan—in 34 CFR 421.21(d) for a total of 15 points for that criterion.

(a) *Program factors.* (20 points) The Secretary reviews each application to assess the quality and effectiveness of the applicant's approach to developing national standards for competencies in industries and trades, including the extent to which the application proposes—

(1) To develop standards for—

(i) The competencies required for actual jobs, including the increased competency requirements created by the changing workplace;

(ii) Major divisions or specialty areas identified within the occupations the applicant proposes to study;

(iii) The minimum hours of study needed to be competent in those divisions or specialty areas;

(iv) Minimum tools and equipment required in those divisions or specialty areas;

(v) Minimum tasks to be included in any course of study purporting to prepare individuals for work in those divisions or specialty areas; and

(vi) Minimum qualifications for instructional staff in those divisions or specialty areas; and

(2) An adequate needs assessment of the program factors described in paragraph (a)(1) of this section as a part of the project.

(b) *Extent of need for the project.* (15 points) The Secretary reviews each application to determine the extent to which the project meets specific needs, including—

(1) The extent of the need for national standards for competencies in the major division or specialty areas identified within the occupations that the applicant proposes to study;

(2) How the applicant identified and documented those needs;

(3) How the standards to be developed will meet those needs, including the need of business for competent entry-level workers in the occupations to be studied; and

(4) The benefits to business, labor, and education that will result from meeting those needs.

(c) *Plan of operation.* (20 points) The Secretary reviews each application to determine the quality of the plan of operation for the project, including the extent to which—

(1) The plan of management will be effective, will ensure proper and efficient administration of the program, and includes timelines that show starting and ending dates for all tasks;

(2) The specific procedures proposed will accomplish the project's objectives, including how the procedures for

selecting the business-labor-education technical committees will ensure that the members are knowledgeable about the occupations to be studied and include representatives of business, labor, and education;

(3) The applicant plans to organize and operate the business-labor-education technical committees effectively in developing national standards for competencies in industries and trades;

(4) The development of proposed competencies for major divisions or specialty areas within occupations will be coordinated with education and industrial trade associations, labor organizations, and businesses;

(5) The methods the applicant proposes to use to select project participants, if applicable, will ensure that project participants who are otherwise eligible to participate are selected without regard to race, color, national origin, gender, age, or disability.

(d) *Evaluation plan.* (15 points) The Secretary reviews each application to determine the quality of the evaluation plan for the project, including the extent to which the plan includes specific procedures for—

(1) A formative evaluation to help assess and improve the accuracy of standards for competencies; and

(2) A summative evaluation conducted by an independent evaluator.

(e) *Key personnel.* (10 points)

(1) The Secretary reviews each application to determine the extent of the applicant's experience in fields related to the objectives of the project.

(2) The Secretary reviews each application to determine the quality of key personnel the applicant plans to use including—

(i) The qualifications, in relation to project requirements, of the project director, if one is to be used;

(ii) The qualifications, in relation to project requirements, of each of the other key personnel to be used in the project;

(iii) The appropriateness of the time that each person referred to in paragraphs (e)(2) (i) and (ii) of this section will commit to the project; and

(iv) The experience and training of the project director and key personnel in project management.

(f) *Budget and cost effectiveness.* (10 points) The Secretary reviews each application to determine the extent to which—

(1) The budget is adequate to support the project; and

(2) Costs are reasonable in relation to the objectives of the project.

(g) *Dissemination plan.* (10 points) The Secretary reviews each application to determine the quality of the dissemination plan for the project, including—

(1) A clear description of the dissemination procedures;

(2) A description of the types of materials the applicant plans to make available;

(3) Provisions for publicizing the proposed national standards for competencies in industries and trades; and

(4) Provisions for encouraging the adoption and use of the proposed standards by education and training programs.

Intergovernmental Review of Federal Programs

This program is subject to the requirements of Executive Order 12372 (Intergovernmental Review of Federal Programs) and the regulations in 34 CFR part 79.

The objective of the Executive order is to foster an intergovernmental partnership and to strengthen federalism by relying on processes developed by State and local governments for coordination and review of proposed Federal financial assistance.

Applicants must contact the appropriate State Single Point of Contact to find out about, and to comply with, the State's process under Executive Order 12372. Applicants proposing to perform activities in more than one State should immediately contact the Single Point of Contact for each of those States and follow the procedure established in each State under the Executive order. If you want to know the name and address of any State Single Point of Contact, see the list in the appendix to the Department's combined application notice published elsewhere in this issue of the **Federal Register.**

In States that have not established a process or chosen a program for review, State, areawide, regional, and local entities may submit comments directly to the Department.

Any State Process Recommendation and other comments submitted by a State Single Point of Contact and any comments from State, areawide, regional, and local entities must be mailed or hand-delivered by the date indicated in this notice to the following address: The Secretary, E.O. 12372—CFDA #84.244, U.S. Department of Education, room 4518, Switzer Building, 330 C Street SW., 20202–7242.

Proof of mailing will be determined on the same basis as applications (see 34 CFR 75.102). Recommendations or comments may be hand-delivered until 4:30 p.m. (Washington, DC time) on the date indicated in this notice.

Please note that the above address is not the same address as the one to which the applicant submits its completed application. Do not send applications to the above address. Instructions for transmittal of applications:

(a) If an applicant wants to apply for a grant, the applicant shall—

(1) Mail the original and six copies of the application on or before the deadline date to:

U.S. Department of Education, Application Control Center, Attention: (CFDA #83.244), Washington, DC 20202–4725.

or

(2) Hand deliver the original and six copies of the application by 4:30 p.m. (Washington, DC time) on the deadline date to:

U.S. Department of Education, Application Control Center, Attention: (CFDA #84.244), Room #3633, Regional Office Building #3, 7th and D Streets SW., Washington, DC 20202–4725.

(b) An applicant must show one of the following as proof of mailing:

(1) A legibly dated U.S. Postal Service postmark.

(2) A legible mail receipt with the date of mailing stamped by the U.S. Postal Service.

(3) A dated shipping label, invoice, or receipt from a commercial carrier.

(4) Any other proof of mailing acceptable to the Secretary.

(c) If an application is mailed through the U.S. Postal Service, the Secretary does not accept either of the following as proof of mailing:

(1) A private metered postmark.

(2) A mail receipt that is not dated by the U.S. Postal Service.

Notes.—(1) The U.S. Postal Service does not uniformly provide a dated postmark. Before relying on this method, an applicant should check with its local post office.

(2) The Application Control Center will mail a Grant Application Receipt Acknowledgement to each applicant. If an applicant fails to receive the notification of application receipt within 15 days from the date of mailing the application, the applicant should call the U.S. Department of Education Application Control Center at (202) 708–9494.

(3) The applicant must indicate on the envelope and—if not provided by the Department—in Item 10 of the Application for Federal Assistance (Standard Form 424) the CFDA number—and suffix letter, if any—of the competition under which the application is being submitted.

Application Instructions and Forms

The appendix to this application is divided into five parts, plus a statement regarding estimated public reporting burden and various assurances and certifications. These parts and additional materials are organized in the same manner that the submitted application should be organized. The parts and additional materials are as follows:

Part I: Application for Federal Assistance (Standard Form 424 (Rev. 4–88)).

Part II: Budget Information.

Part III: Budget Narrative.

Part IV: Program Narrative.

Part V: Additional Assurances and Certifications.

a. Assurances—Non-Construction Programs (Standard Form 424B).

b. Certifications regarding Lobbying; Debarment, Suspension, and Other Responsibility Matters; and Drug-Free Workplace Requirements (ED 80–0013) and instructions.

c. Certification regarding Debarment, Suspension, Ineligibility and Voluntary Exclusion: Lower Tier Covered Transactions (ED 80–0014, 9/90) and instructions.

Note.—ED 80–0014 is intended for the use of grantees and should not be transmitted to the Department.

d. Disclosure of Lobbying Activities (Standard Form LLL) (if applicable) and instructions; and Disclosure of Lobbying Activities Continuation Sheet (Standard Form LLL–A).

All forms and instructions are included as appendix A of this notice. Questions and answers pertaining to this program are included, as appendix B, to assist potential applicants.

All applicants must submit ONE original signed application, including ink signatures on all forms and assurances and SIX copies of the application. Please mark each application as original or copy. Local or State agencies may choose to submit two copies with the original.

No grant may be awarded unless a completed application form has been received.

FOR FURTHER INFORMATION CONTACT: Debra J. Nolan, U.S. Department of Education, 400 Maryland Avenue SW. (room 4518—MES), Washington, DC 20202–7242. Telephone: (202) 205–9650. Deaf and hearing impaired individuals may call the Federal Dual Party Relay Service at 1–800–877–8339 (in the Washington, DC 202 area code, telephone 708–9300) between 8 a.m. and 7 p.m., Eastern time.

Priority Authority: 20 U.S.C. 2416.

Dated: September 14, 1992.

Betsy Brand,

Assistant Secretary, Vocational and Adult Education.

Standard Form 424 (REV 4-88)
Prescribed by OMB Circular A-102

Authorized for Local Reproduction

INSTRUCTIONS FOR THE SF 424

This is a standard form used by applicants as a required facesheet for preapplications and applications submitted for Federal assistance. It will be used by Federal agencies to obtain applicant certification that States which have established a review and comment procedure in response to Executive Order 12372 and have selected the program to be included in their process, have been given an opportunity to review the applicant's submission.

Item: Entry:

1. Self-explanatory.
2. Date application submitted to Federal agency (or State if applicable) & applicant's control number (if applicable).
3. State use only (if applicable).
4. If this application is to continue or revise an existing award, enter present Federal identifier number. If for a new project, leave blank.
5. Legal name of applicant, name of primary organizational unit which will undertake the assistance activity, complete address of the applicant, and name and telephone number of the person to contact on matters related to this application.
6. Enter Employer Identification Number (EIN) as assigned by the Internal Revenue Service.
7. Enter the appropriate letter in the space provided.
8. Check appropriate box and enter appropriate letter(s) in the space(s) provided:
   - "New" means a new assistance award.
   - "Continuation" means an extension for an additional funding/budget period for a project with a projected completion date.
   - "Revision" means any change in the Federal Government's financial obligation or contingent liability from an existing obligation.
9. Name of Federal agency from which assistance is being requested with this application.
10. Use the Catalog of Federal Domestic Assistance number and title of the program under which assistance is requested.
11. Enter a brief descriptive title of the project. if more than one program is involved, you should append an explanation on a separate sheet. If appropriate (e.g., construction or real property projects), attach a map showing project location. For preapplications, use a separate sheet to provide a summary description of this project.

Item: Entry:

12. List only the largest political entities affected (e.g., State, counties, cities).
13. Self-explanatory.
14. List the applicant's Congressional District and any District(s) affected by the program or project.
15. Amount requested or to be contributed during the first funding/budget period by each contributor. Value of in-kind contributions should be included on appropriate lines as applicable. If the action will result in a dollar change to an existing award, indicate *only* the amount of the change. For decreases, enclose the amounts in parentheses. If both basic and supplemental amounts are included, show breakdown on an attached sheet. For multiple program funding, use totals and show breakdown using same categories as item 15.
16. Applicants should contact the State Single Point of Contact (SPOC) for Federal Executive Order 12372 to determine whether the application is subject to the State intergovernmental review process.
17. This question applies to the applicant organization, not the person who signs as the authorized representative. Categories of debt include delinquent audit disallowances, loans and taxes.
18. To be signed by the authorized representative of the applicant. A copy of the governing body's authorization for you to sign this application as official representative must be on file in the applicant's office. (Certain Federal agencies may require that this authorization be submitted as part of the application.)

PART II - BUDGET INFORMATION

SECTION A - Budget Summary by Categories

	A	B	C
1. Personnel			
2. Fringe Benefits (Rate %)			
3. Travel			
4. Equipment			
5. Supplies			
6. Contractual			
7. Other			
8. Total Direct Cost (lines 1 through 7)			
9. Indirect Cost (Rate %)			
10. Training Costs/Stipends			
11. TOTAL, Federal Funds Requested (lines 8 through 10)			

SECTION B - Cost Sharing Summary (if appropriate)

	A	B	C
1. Cash Contribution			
2. In-Kind Contribution (only costs specifically for this project)			
3. TOTAL, Cost Sharing (Rate %)			

NOTE: For FULLY-FUNDED PROJECTS use Column A to record the first 12-month budget period; Column B to record the remaining months of the project; and Column C to record the total.

For MULTI-YEAR PROJECTS use Column A to record the first 12-month budget period; Column B to record the second 12-month budget period; and Column C to record the third 12-month budget period.

SECTION C - Budget Estimates (Federal Funds Only) for Balance of Project

Budget Periods

	Second	Third	Fourth	Fifth

INSTRUCTIONS FOR PART II - BUDGET INFORMATION

SECTION A - Budget Summary by Categories

1. Personnel: Show salaries to be paid to project personnel.

2. Fringe Benefits: Indicate the rate and amount of fringe benefits.

3. Travel: Indicate the amount requested for both inter- and intra-State travel of project staff. Include funds for at least one trip for two people to attend a project director's meeting in Washington, D.C.

4. Equipment: Indicate the cost of non-expendable personal property that has a useful life of more than one year and a cost of $300 or more per unit ($5,000 or more if State, Local, or Tribal Government).

5. Supplies: Include the cost of consumable supplies and materials to be used during the project.

6. Contractual: Show the amount to be used for (1) procurement contracts (except those which belong on other lines such as supplies and equipment; and (2) sub-contracts.

7. Other: Indicate all direct costs not clearly covered by lines 1 through 6 above, including consultants.

8. Total, Direct Cost: Show the total for lines 1 through 7.

9. Indirect Costs: Indicate the rate and amount of indirect costs. NOTE: For training grants, the indirect cost rate cannot exceed 8%.

10. Training/Stipend Cost: (if allowable)

11. TOTAL, Federal Funds Requested: Show total for lines 8 through 10.

SECTION B - Cost Sharing Summary

Indicate the actual rate and amount of cost sharing when there is a cost sharing requirement. If cost sharing is required by program regulations, the local share required refers to a percentage of TOTAL PROJECT COST not of Federal funds.

SECTION C - Budget Estimates (Federal Funds Only) for Balance of Project

If the project period exceeds 12 months, include cost estimates for the continuation budget periods, as appropriate. This SECTION does not apply to projects that are full-funded.

NOTE: Grant recipients under the Business and Education Standards Program (CFDA 84.244) are required to provide not less than 50 percent of the total cost of the demonstration project conducted under this program. In other words, the amount shown on Line 3, Section B, must be at least 50 percent of the TOTAL PROJECT COST.

BILLING CODE 4000-01-C

Instructions for Part III—Budget Narrative

The Budget Narrative should explain, justify, and, if needed, clarify your budget summary. For each line item (personnel, fringe benefits, travel, etc.) in your budget, explain why it is there and how you computed the costs.

Please limit this section to no more than five pages. Be sure that each page of your application is numbered consecutively.

Instructions for Part IV—Program Narrative

Before preparing the Application Narrative, an applicant should read carefully the description of the program, the information regarding priorities, and the selection criteria the Secretary uses to evaluate applications.

The narrative should encompass each function or activity for which funds are being requested and should—

1. Begin with an Abstract; that is, a summary of the proposed project;

2. Describe the proposed project in light of each of the selection criteria in the order in which the criteria are listed in this Notice; and

3. Include any other pertinent information that might assist the Secretary in reviewing the application.

The Secretary strongly requests the applicant to limit the Program Narrative to no more than 30 double-spaced, typed pages (on one side only), although the Secretary will consider applications of greater length.

Applicants may include as an appendix to the Program Narrative supporting documentation, also on 8½" × 11" paper, (e.g., letters of support, footnotes, resumes, etc.) or any other pertinent information that might assist the Secretary in reviewing the application.

Applicants are advised that—

(1) Under 34 CFR 75.217 of the Education Department General Administrative Regulations (EDGAR), the Department considers only information contained in the application in ranking applications for funding consideration. Letters of support sent separately from the formal application package are not considered in the review by the technical review panels.

(2) In reviewing applications, the technical review panel evaluates applications solely on the basis of the established technical review criteria. Letters of support contained in the application will strengthen the application only insofar as they contain commitments that pertain to the established technical review criteria, such as commitment and resources.

Additional Materials: Instructions for Estimated Public Reporting Burden

Under terms of the Paperwork Reduction Act of 1980, as amended, and the regulations implementing that Act, the Department of Education invites comment on the public reporting burden in this collection of information. Public reporting burden for this collection of information is estimated to average 90 hours per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. You may send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden, to the U.S. Department of Education, Information Management and Compliance Division, Washington, DC 20202–4651; and to the Office of Management and Budget, Paperwork Reduction Project OMB 1830–0013, Washington, DC 20503.

(Information collection approved under OMB control number 1830–0013. Expiration date: February 28, 1995.)

ASSURANCES — NON-CONSTRUCTION PROGRAMS

Note: Certain of these assurances may not be applicable to your project or program. If you have questions, please contact the awarding agency. Further, certain Federal awarding agencies may require applicants to certify to additional assurances. If such is the case, you will be notified.

As the duly authorized representative of the applicant I certify that the applicant:

1. Has the legal authority to apply for Federal assistance, and the institutional, managerial and financial capability (including funds sufficient to pay the non-Federal share of project costs) to ensure proper planning, management and completion of the project described in this application.

2. Will give the awarding agency, the Comptroller General of the United States, and if appropriate, the State, through any authorized representative, access to and the right to examine all records, books, papers, or documents related to the award; and will establish a proper accounting system in accordance with generally accepted accounting standards or agency directives.

3. Will establish safeguards to prohibit employees from using their positions for a purpose that constitutes or presents the appearance of personal or organizational conflict of interest, or personal gain.

4. Will initiate and complete the work within the applicable time frame after receipt of approval of the awarding agency.

5. Will comply with the Intergovernmental Personnel Act of 1970 (42 U.S.C. §§ 4728-4763) relating to prescribed standards for merit systems for programs funded under one of the nineteen statutes or regulations specified in Appendix A of OPM's Standards for a Merit System of Personnel Administration (5 C.F.R. 900, Subpart F).

6. Will comply with all Federal statutes relating to nondiscrimination. These include but are not limited to: (a) Title VI of the Civil Rights Act of 1964 (P.L. 88-352) which prohibits discrimination on the basis of race, color or national origin; (b) Title IX of the Education Amendments of 1972, as amended (20 U.S.C. §§ 1681-1683, and 1685-1686), which prohibits discrimination on the basis of sex; (c) Section 504 of the Rehabilitation Act of 1973, as amended (29 U.S.C. § 794), which prohibits discrimination on the basis of handicaps; (d) the Age Discrimination Act of 1975, as amended (42 U.S.C.§§ 6101-6107), which prohibits discrimination on the basis of age; (e) the Drug Abuse Office and Treatment Act of 1972 (P.L. 92-255), as amended, relating to nondiscrimination on the basis of drug abuse; (f) the Comprehensive Alcohol Abuse and Alcoholism Prevention, Treatment and Rehabilitation Act of 1970 (P.L. 91-616), as amended, relating to nondiscrimination on the basis of alcohol abuse or alcoholism; (g) §§ 523 and 527 of the Public Health Service Act of 1912 (42 U.S.C. 290 dd-3 and 290 ee-3), as amended, relating to confidentiality of alcohol and drug abuse patient records; (h) Title VIII of the Civil Rights Act of 1968 (42 U.S.C. § 3601 et seq.), as amended, relating to nondiscrimination in the sale, rental or financing of housing; (i) any other nondiscrimination provisions in the specific statute(s) under which application for Federal assistance is being made; and (j) the requirements of any other nondiscrimination statute(s) which may apply to the application.

7. Will comply, or has already complied, with the requirements of Titles II and III of the Uniform Relocation Assistance and Real Property Acquisition Policies Act of 1970 (P.L. 91-646) which provide for fair and equitable treatment of persons displaced or whose property is acquired as a result of Federal or federally assisted programs. These requirements apply to all interests in real property acquired for project purposes regardless of Federal participation in purchases.

8. Will comply with the provisions of the Hatch Act (5 U.S.C. §§ 1501-1508 and 7324-7328) which limit the political activities of employees whose principal employment activities are funded in whole or in part with Federal funds.

9. Will comply, as applicable, with the provisions of the Davis-Bacon Act (40 U.S.C. §§ 276a to 276a-7), the Copeland Act (40 U.S.C. § 276c and 18 U.S.C. §§ 874), and the Contract Work Hours and Safety Standards Act (40 U.S.C. §§ 327-333), regarding labor standards for federally assisted construction subagreements.

Standard Form 424B (4-88)
Prescribed by OMB Circular A-102

Authorized for Local Reproduction

10. Will comply, if applicable, with flood insurance purchase requirements of Section 102(a) of the Flood Disaster Protection Act of 1973 (P.L. 93-234) which requires recipients in a special flood hazard area to participate in the program andto purchase flood insurance if the total cost of insurable construction and acquisition is $10,000 or more.

11. Will comply with environmental standards which may be prescribed pursuant to the following: (a) institution of environmental quality control measures under the National Environmental Policy Act of 1969 (P.L. 91-190) and Executive Order (EO) 11514; (b) notification of violating facilities pursuant to EO 11738; (c) protection of wetlands pursuant to EO 11990; (d) evaluation of flood hazards in floodplains in accordance with EO 11988; (e) assurance of project consistency with the approved State management program developed under the Coastal Zone Management Act of 1972 (16 U.S.C. §§ 1451 et seq.); (f) conformity of Federal actions to State (Clear Air) Implementation Plans under Section 176(c) of the Clear Air Act of 1955, as amended (42 U.S.C. § 7401 et seq.); (g) protection of underground sources of drinking water under the Safe Drinking Water Act of 1974, as amended, (P.L. 93-523); and (h) protection of endangered species under the Endangered Species Act of 1973, as amended, (P.L. 93-205).

12. Will comply with the Wild and Scenic Rivers Act of 1968 (16 U.S.C. §§ 1271 et seq.) related to protecting components or potential components of the national wild and scenic rivers system.

13. Will assist the awarding agency in assuring compliance with Section 106 of the National Historic Preservation Act of 1966, as amended (16 U.S.C. 470), EO 11593 (identification and protection of historic properties), and the Archaeological and Historic Preservation Act of 1974 (16 U.S.C. 469a-1 et seq.).

14. Will comply with P.L. 93-348 regarding the protection of human subjects involved in research, development, and related activities supported by this award of assistance.

15. Will comply with the Laboratory Animal Welfare Act of 1966 (P.L. 89-544, as amended, 7 U.S.C. 2131 et seq.) pertaining to the care, handling, and treatment of warm blooded animals held for research, teaching, or other activities supported by this award of assistance.

16. Will comply with the Lead-Based Paint Poisoning Prevention Act (42 U.S.C. §§ 4801 et seq.) which prohibits the use of lead based paint in construction or rehabilitation of residence structures.

17. Will cause to be performed the required financial and compliance audits in accordance with the Single Audit Act of 1984.

18. Will comply with all applicable requirements of all other Federal laws, executive orders, regulations and policies governing this program.

SF 424B (4-88) Back

CERTIFICATIONS REGARDING LOBBYING; DEBARMENT, SUSPENSION AND OTHER RESPONSIBILITY MATTERS; AND DRUG-FREE WORKPLACE REQUIREMENTS

Applicants should refer to the regulations cited below to determine the certification to which they are required to attest. Applicants should also review the instructions for certification included in the regulations before completing this form. Signature of this form provides for compliance with certification requirements under 34 CFR Part 82, "New Restrictions on Lobbying," and 34 CFR Part 85, "Government-wide Debarment and Suspension (Nonprocurement) and Government-wide Requirements for Drug-Free Workplace (Grants)." The certifications shall be treated as a material representation of fact upon which reliance will be placed when the Department of Education determines to award the covered transaction, grant, or cooperative agreement.

1. LOBBYING

As required by Section 1352, Title 31 of the U.S. Code, and implemented at 34 CFR Part 82, for persons entering into a grant or cooperative agreement over $100,000, as defined at 34 CFR Part 82, Sections 82.105 and 82.110, the applicant certifies that:

(a) No Federal appropriated funds have been paid or will be paid, by or on behalf of the undersigned, to any person for influencing or attempting to influence an officer or employee of any agency, a Member of Congress, an officer or employee of Congress, or an employee of a Member of Congress in connection with the making of any Federal grant, the entering into of any cooperative agreement, and the extension, continuation, renewal, amendment, or modification of any Federal grant or cooperative agreement;

(b) If any funds other than Federal appropriated funds have been paid or will be paid to any person for influencing or attempting to influence an officer or employee of any agency, a Member of Congress, an officer or employee of Congress, or an employee of a Member of Congress in connection with this Federal grant or cooperative agreement, the undersigned shall complete and submit Standard Form - LLL, "Disclosure Form to Report Lobbying," in accordance with its instructions;

(c) The undersigned shall require that the language of this certification be included in the award documents for all subawards at all tiers (including subgrants, contracts under grants and cooperative agreements, and subcontracts) and that all subrecipients shall certify and disclose accordingly.

2. DEBARMENT, SUSPENSION, AND OTHER RESPONSIBILITY MATTERS

As required by Executive Order 12549, Debarment and Suspension, and implemented at 34 CFR Part 85, for prospective participants in primary covered transactions, as defined at 34 CFR Part 85, Sections 85.105 and 85.110 –

A. The applicant certifies that it and its principals:

(a) Are not presently debarred, suspended, proposed for debarment, declared ineligible, or voluntarily excluded from covered transactions by any Federal department or agency;

(b) Have not within a three-year period preceding this application been convicted of or had a civil judgment rendered against them for commission of fraud or a criminal offense in connection with obtaining, attempting to obtain, or performing a public (Federal, State, or local) transaction or contract under a public transaction; violation of Federal or State antitrust statutes or commission of embezzlement, theft, forgery, bribery, falsification or destruction of records, making false statements, or receiving stolen property;

(c) Are not presently indicted for or otherwise criminally or civilly charged by a governmental entity (Federal, State, or local) with commission of any of the offenses enumerated in paragraph (1)(b) of this certification; and

(d) Have not within a three-year period preceding this application had one or more public transactions (Federal, State, or local) terminated for cause or default; and

B. Where the applicant is unable to certify to any of the statements in this certification, he or she shall attach an explanation to this application.

3. DRUG-FREE WORKPLACE (GRANTEES OTHER THAN INDIVIDUALS)

As required by the Drug-Free Workplace Act of 1988, and implemented at 34 CFR Part 85, Subpart F, for grantees, as defined at 34 CFR Part 85, Sections 85.605 and 85.610 –

A. The applicant certifies that it will or will continue to provide a drug-free workplace by:

(a) Publishing a statement notifying employees that the unlawful manufacture, distribution, dispensing, possession, or use of a controlled substance is prohibited in the grantee's workplace and specifying the actions that will be taken against employees for violation of such prohibition;

(b) Establishing an on-going drug-free awareness program to inform employees about–

(1) The dangers of drug abuse in the workplace;

(2) The grantee's policy of maintaining a drug-free workplace;

(3) Any available drug counseling, rehabilitation, and employee assistance programs; and

(4) The penalties that may be imposed upon employees for drug abuse violations occurring in the workplace;

(c) Making it a requirement that each employee to be engaged in the performance of the grant be given a copy of the statement required by paragraph (a);

(d) Notifying the employee in the statement required by paragraph (a) that, as a condition of employment under the grant, the employee will–

(1) Abide by the terms of the statement; and

(2) Notify the employer in writing of his or her conviction for a violation of a criminal drug statute occurring in the workplace no later than five calendar days after such conviction;

(e) Notifying the agency, in writing, within 10 calendar days after receiving notice under subparagraph (d)(2) from an employee or otherwise receiving actual notice of such conviction. Employers of convicted employees must provide notice, including position title, to: Director, Grants and Contracts Service, U.S. Department of Education, 400 Maryland Avenue, S.W. (Room 3124, GSA Regional Office

Building No. 3), Washington, DC 20202-4571. Notice shall include the identification number(s) of each affected grant;

(f) Taking one of the following actions, within 30 calendar days of receiving notice under subparagraph (d)(2), with respect to any employee who is so convicted--

(1) Taking appropriate personnel action against such an employee, up to and including termination, consistent with the requirements of the Rehabilitation Act of 1973, as amended; or

(2) Requiring such employee to participate satisfactorily in a drug abuse assistance or rehabilitation program approved for such purposes by a Federal, State, or local health, law enforcement, or other appropriate agency;

(g) Making a good faith effort to continue to maintain a drug-free workplace through implementation of paragraphs (a), (b), (c), (d), (e), and (f).

B. The grantee may insert in the space provided below the site(s) for the performance of work done in connection with the specific grant:

Place of Performance (Street address, city, county, state, zip code)

DRUG-FREE WORKPLACE
(GRANTEES WHO ARE INDIVIDUALS)

As required by the Drug-Free Workplace Act of 1988, and implemented at 34 CFR Part 85, Subpart F, for grantees, as defined at 34 CFR Part 85, Sections 85.605 and 85.610 --

A. As a condition of the grant, I certify that I will not engage in the unlawful manufacture, distribution, dispensing, possession, or use of a controlled substance in conducting any activity with the grant; and

B. If convicted of a criminal drug offense resulting from a violation occurring during the conduct of any grant activity, I will report the conviction, in writing, within 10 calendar days of the conviction, to: Director, Grants and Contracts Service, U.S. Department of Education, 400 Maryland Avenue, S.W. (Room 3124, GSA Regional Office Building No. 3), Washington, DC 20202-4571. Notice shall include the identification number(s) of each affected grant.

Certification Regarding Debarment, Suspension, Ineligibility and Voluntary Exclusion – Lower Tier Covered Transactions

This certification is required by the Department of Education regulations implementing Executive Order 12549, Debarment and Suspension, 34 CFR Part 85, for all lower tier transactions meeting the threshold and tier requirements stated at Section 85.110.

Instructions for Certification

1. By signing and submitting this proposal, the prospective lower tier participant is providing the certification set out below.

2. The certification in this clause is a material representation of fact upon which reliance was placed when this transaction was entered into. If it is later determined that the prospective lower tier participant knowingly rendered an erroneous certification, in addition to other remedies available to the Federal Government, the department or agency with which this transaction originated may pursue available remedies, including suspension and/or debarment.

3. The prospective lower tier participant shall provide immediate written notice to the person to which this proposal is submitted if at any time the prospective lower tier participant learns that its certification was erroneous when submitted or has become erroneous by reason of changed circumstances.

4. The terms "covered transaction," "debarred," "suspended," "ineligible," "lower tier covered transaction," "participant," "person," "primary covered transaction," "principal," "proposal," and "voluntarily excluded," as used in this clause, have the meanings set out in the Definitions and Coverage sections of rules implementing Executive Order 12549. You may contact the person to which this proposal is submitted for assistance in obtaining a copy of those regulations.

5. The prospective lower tier participant agrees by submitting this proposal that, should the proposed covered transaction be entered into, it shall not knowingly enter into any lower tier covered transaction with a person who is debarred, suspended, declared ineligible, or voluntarily excluded from participation in this covered transaction, unless authorized by the department or agency with which this transaction originated.

6. The prospective lower tier participant further agrees by submitting this proposal that it will include the clause titled "Certification Regarding Debarment, Suspension, Ineligibility, and Voluntary Exclusion—Lower Tier Covered Transactions," without modification, in all lower tier covered transactions and in all solicitations for lower tier covered transactions.

7. A participant in a covered transaction may rely upon a certification of a prospective participant in a lower tier covered transaction that it is not debarred, suspended, ineligible, or voluntarily excluded from the covered transaction, unless it knows that the certification is erroneous. A participant may decide the method and frequency by which it determines the eligibility of its principals. Each participant may, but is not required to, check the Nonprocurement List.

8. Nothing contained in the foregoing shall be construed to require establishment of a system of records in order to render in good faith the certification required by this clause. The knowledge and information of a participant is not required to exceed that which is normally possessed by a prudent person in the ordinary course of business dealings.

9. Except for transactions authorized under paragraph 5 of these instructions, if a participant in a covered transaction knowingly enters into a lower tier covered transaction with a person who is suspended, debarred, ineligible, or voluntarily excluded from participation in this transaction, in addition to other remedies available to the Federal Government, the department or agency with which this transaction originated may pursue available remedies, including suspension and/or debarment.

Certification

(1) The prospective lower tier participant certifies, by submission of this proposal, that neither it nor its principals are presently debarred, suspended, proposed for debarment, declared ineligible, or voluntarily excluded from participation in this transaction by any Federal department or agency.

(2) Where the prospective lower tier participant is unable to certify to any of the statements in this certification, such prospective participant shall attach an explanation to this proposal.

INSTRUCTIONS FOR COMPLETION OF SF-LLL, DISCLOSURE OF LOBBYING ACTIVITIES

This disclosure form shall be completed by the reporting entity, whether subawardee or prime Federal recipient, at the initiation or receipt of a covered Federal action, or a material change to a previous filing, pursuant to title 31 U.S.C. section 1352. The filing of a form is required for each payment or agreement to make payment to any lobbying entity for influencing or attempting to influence an officer or employee of any agency, a Member of Congress, an officer or employee of Congress, or an employee of a Member of Congress in connection with a covered Federal action. Use the SF-LLL-A Continuation Sheet for additional information if the space on the form is inadequate. Complete all items that apply for both the initial filing and material change report. Refer to the implementing guidance published by the Office of Management and Budget for additional information.

1. Identify the type of covered Federal action for which lobbying activity is and/or has been secured to influence the outcome of a covered Federal action.

2. Identify the status of the covered Federal action.

3. Identify the appropriate classification of this report. If this is a followup report caused by a material change to the information previously reported, enter the year and quarter in which the change occurred. Enter the date of the last previously submitted report by this reporting entity for this covered Federal action.

4. Enter the full name, address, city, state and zip code of the reporting entity. Include Congressional District, if known. Check the appropriate classification of the reporting entity that designates if it is, or expects to be, a prime or subaward recipient. Identify the tier of the subawardee, e.g., the first subawardee of the prime is the 1st tier. Subawards include but are not limited to subcontracts, subgrants and contract awards under grants.

5. If the organization filing the report in item 4 checks "Subawardee", then enter the full name, address, city, state and zip code of the prime Federal recipient. Include Congressional District, if known.

6. Enter the name of the Federal agency making the award or loan commitment. Include at least one organizational level below agency name, if known. For example, Department of Transportation, United States Coast Guard.

7. Enter the Federal program name or description for the covered Federal action (item 1). If known, enter the full Catalog of Federal Domestic Assistance (CFDA) number for grants, cooperative agreements, loans, and loan commitments.

8. Enter the most appropriate Federal identifying number available for the Federal action identified in item 1 (e.g., Request for Proposal (RFP) number; Invitation for Bid (IFB) number; grant announcement number; the contract, grant, or loan award number; the application/proposal control number assigned by the Federal agency). Include prefixes, e.g., "RFP-DE-90-001."

9. For a covered Federal action where there has been an award or loan commitment by the Federal agency, enter the Federal amount of the award/loan commitment for the prime entity identified in item 4 or 5.

10. (a) Enter the full name, address, city, state and zip code of the lobbying entity engaged by the reporting entity identified in item 4 to influence the covered Federal action.

    (b) Enter the full names of the individual(s) performing services, and include full address if different from 10 (a). Enter Last Name, First Name, and Middle Initial (MI).

11. Enter the amount of compensation paid or reasonably expected to be paid by the reporting entity (item 4) to the lobbying entity (item 10). Indicate whether the payment has been made (actual) or will be made (planned). Check all boxes that apply. If this is a material change report, enter the cumulative amount of payment made or planned to be made.

12. Check the appropriate box(es). Check all boxes that apply. If payment is made through an in-kind contribution, specify the nature and value of the in-kind payment.

13. Check the appropriate box(es). Check all boxes that apply. If other, specify nature.

14. Provide a specific and detailed description of the services that the lobbyist has performed, or will be expected to perform, and the date(s) of any services rendered. Include all preparatory and related activity, not just time spent in actual contact with Federal officials. Identify the Federal official(s) or employee(s) contacted or the officer(s), employee(s), or Member(s) of Congress that were contacted.

15. Check whether or not a SF-LLL-A Continuation Sheet(s) is attached.

16. The certifying official shall sign and date the form, print his/her name, title, and telephone number.

Public reporting burden for this collection of information is estimated to average 30 minutes per response, including time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding the burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden, to the Office of Management and Budget, Paperwork Reduction Project (0348-0046), Washington, D.C. 20503.

BILLING CODE 4000-01-C

Appendix B

Potential applicants frequently direct questions to officials of the Department regarding application notices and programmatic and administrative regulations governing various direct grant programs. To assist potential applicants the Department has assembled the following most commonly asked questions.

Q. Can we get extension of the deadline?

A. No. A closing date may be changed only under extraordinary circumstances. Any change must be announced in the **Federal Register** and apply to all applications. Waivers for individual applications cannot be granted regardless of the circumstances.

Q. How many copies of the application should I submit and must they be bound?

A. Our new policy calls for an original and six copies to be submitted. The binding of the application is optional.

Q. We just missed the deadline for the XXX competition. May we submit under another competition?

A. Yes, however, the likelihood of success is not good. A properly prepared application must meet the specifications of the competition to which it is submitted.

Q. I'm not sure which competition is most appropriate for my project. What should I do?

A. We are happy to discuss any questions with you and provide clarification on the unique elements of the various competitions.

Q. Will you help us prepare our application?

A. We are happy to provide general program information. Clearly, it would not be appropriate for staff to participate in the actual writing of an application, but we can respond to specific questions about application requirements, evaluation criteria, and the priorities. Applicants should understand that this previous contact is not required, nor will it in any way influence the success of an application.

Q. When will I find out if I'm going to be funded?

A. You can expect to receive notification within 3 to 4 months of the application closing date, depending on the number of applications received and the number of competitions with closing dates at about the same time.

Q. Once my application has been reviewed by the review panel, can you tell me the outcome?

A. No. Every year we are called by a number of applicants who have legitimate reasons for needing to know the outcome of the review prior to official notification. Some applicants need to make job decisions, some need to notify a local school district, etc. Regardless of the reason, because final funding decisions have not been made at that point, we cannot share information about the review with anyone.

Q. How long should an application be?

A. The Department of Education is making a concerted effort to reduce the volume of paperwork in discretionary program applications. The scope and complexity of projects is too variable to establish firm limits on length. Your application should provide enough information to allow the review panel to evaluate the significance of the project against the criteria of the competition. We recommend that you address all of the selection criteria in an "Program Narrative" of no more than thirty pages in length. Supporting documentation may be included in appendices to the Application Narrative. Some examples:

(1) Staff qualification. These should be brief. They should include the person's title and role in the proposed project and contain only information about his or her qualifications that are relevant to the proposed project. Qualifications of consultants and advisory council members should be provided and be similarly brief.

(2) Assurance of participation of an agency other than the applicant if such participation is critical to the project.

(3) Copies of evaluation instruments proposed to be used in the project in instances where such instruments are not in general use.

Q. Will my application be returned if I am not funded?

A. We no longer return unsuccessful applications. Thus, applicants should retain at least one copy of the application.

Q. Can I obtain copies of reviewers' comments?

A. Upon written request, reviewers' comments will be mailed to unsuccessful applicants.

Q. How should my application be organized?

A. The Application Narrative should be organized to follow the exact sequence of the components in the selection criteria pertaining to the specific program competition for which the application is prepared. In each instance, a table of contents and a one-page abstract summarizing the objectives, activities, project participants, and expected outcomes of the proposed project generally enhance the review of the application.

Q. Is travel allowed under these projects?

A. Travel associated with carrying out the project is allowed (i.e., travel for data collection, etc.). Because we may request the principal investigator or director of funded projects to attend an annual staff development meeting, you may also wish to include a trip or two to Washington, DC in the travel budget. Travel to conferences is sometimes allowed when it is for purposes of dissemination.

Q. If my application receives high scores from the reviewers, does that mean that I will receive funding?

A. Not necessarily. It is often the case that the number of applications scored highly by the reviewers exceeds the dollars available for funding projects under a particular competition. The order of selection, which is based on the scores of all the applications and other relevant factors, determines the applications that can be funded.

Q. What happens during negotiations?

A. During negotiations technical and budget issues may be raised. These are issues that have been identified during the panel and staff reviews that require clarification. Sometimes issues are stated as "conditions." These are issues that have been identified as so critical that the award cannot be made unless those conditions are met. Questions may also be raised about the proposed budget. Generally, these issues are raised because there is inadequate justification or explanation of a particular budget item, or because the budget item seems unimportant to the successful completion of the project. If you are asked to make changes that you feel could seriously affect the project's success, you may provide reasons for not making the changes or provide alternative suggestions. Similarly, if proposed budget reductions will, in your opinion, seriously affect the project activities, you may explain why and provide additional justification for the proposed expenses. An award cannot be made until all negotiation issues have been resolved.

Q. How do I provide an assurance?

A. Except for SF–424B, "Assurances—Non-Construction Programs," simply state in writing that you are meeting a proscribed requirement.

Q. Where can copies of the **Federal Register**, program regulations, and Federal statutes be obtained?

A. Copies of these materials can usually be found at your local library. If not, they can be obtained from the Government Printing Office by writing to: Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402. Telephone: (202) 783–3238. When requesting copies of
